machinery carefully distributed and accurately calculated the strains of the different parts, so that these were *justly proportioned*, a feature which up to a very recent period was a peculiar characteristic of British machinery. He was born at Phantassie in Haddingtonshire, 7th June, 1761. His father was a farmer, celebrated for his skill and desire to improve agriculture. As early as 1780, on being asked at what season he began ploughing, answered that he ploughed at all seasons! John Rennie acquired the rudiments of education at the school of Phantassie and afterwards at Dunbar, where, on the promotion of the master, he, for a short time, conducted the school. He early displayed a love of nature, and an aptitude for mechanical contrivance, and the use of tools. He worked as a mechanic for some years under Andrew Meikle, a millwright of the district, under whose superintendence he assisted in the erection of some mills in Haddingtonshire, and went as far as Dundee to erect one on his own account. The opportunity presented itself, and Rennie took advantage of it, to attend the courses of lectures on mechanical philosophy and chemistry, by Robison and Black, in Edinburgh college. Prepared thus with what books and professors could teach, he entered the world; and it may be said, that during all the course of his useful life, he was adding to his stock of knowledge, or seeking the means of improving his practice by observing the operations and effects of his own works, as well as of those which had been executed by other engineers. About 1781, or when in his twenty-first year, feeling himself qualified to practise the profession of civil engineering on a greater scale than Scotland then afforded field for, he set out for London. On his way he spent some months with Watt at Soho. Soon after he was established in London, Bolton and Watt employed Rennie in the construction of two steam engines, and the machinery connected with them, at the Albion Flour Mills. All the wheel work was of *cast iron* instead of wood, which had been always previously used in such machinery. The works were finished in 1789, and obtained Watt's highest commendation. Rennie continued to the last to be employed in the construction of steam engines and other machinery, and, at the same time, he was almost constantly engaged in designing or superintending those public works which have given him so just a claim to celebrity. Rennie designed and executed innumerable bridges, but his masterpieces are Waterloo bridge, the Southwark cast iron bridge, and New London bridge, the execution of which latter was left to his sons to complete. His great engineering genius was displayed besides in numerous canals for navigation successfully carried out under his direction; in the extensive drainage schemes for the Lincolnshire fens, which he planned and executed; in the magnificent London, and East and West India docks; the Hull docks, where he constructed the first *dredging machine* used in this country. But the catalogue of his works cannot be recited here. He was indefatigable in business, and personally directed minutest details. He was a man of noble presence, of somewhat austere temper, and not very social habits. Chantrey, who made a bust of him, said of it that it was his (Chantrey's) *Jupiter*. Until within a few years of his death he enjoyed excellent health. He died Oc-

tober 16, 1821, at the early age of sixty-one, leaving many magnificent designs to be executed by his two elder sons, GEORGE and JOHN, the latter now Sir John Rennie; he was buried in St. Paul Cathedral. [L.D.B.G.]

RENNIGER, or RHANGER, MICHAEL, a native of Hampshire, chaplain to Queen Elizabeth, and author of Latin poems, 1529-1609.

RENOU, A., a French painter, 1731-1806.

RENTI, GASTON JEAN BAPTISTE, a French nobleman, remarkable for his ascetic devotion to religion, and for his charities, 1611-1649.

RENZI, A., an Italian writer, 1780-1823.

REPIN, NICHOLAS WASILIEWITSCH, Prince, a celebrated Russian diplomatist, 1731-1801.

REPTON, HUMPHREY, a private gentleman, distinguished as a wr. on landscape gardening, 1752-1811.

REQUENO Y VIVES, VINCENT, a Span.

Jesuit, numismatist, and archæologist, 1743-1811.

REQUIER, J. B., a French writer, 1715-1781.

RESENIUS, JOHN PAUL, a learned divine, and of a Lutheran clergyman of Denmark, 1561-1616. His grandson, PETER JOHN, professor of metaphysics and jurisprudence at Copenhagen, 1625-1696.

RESTAUT, P., a Fr. grammarian, 1696-1776.

RESTIF-DE-LA-BRETONNE, N. E., a French and cynical French novelist, 1731-1806.

RESTOUT, JOHN, a French painter, director of the Academy, 1692-1768. His son, J. BERNA, a painter and member of the Academy, died 1771.

RETTY, J. A., a Latin poet, 1755-1814.

RETZ, GILLES DE SAVAL, Seigneur de France, French marshal, born 1396, distinguished himself in the wars with the English, and acquired a graceful celebrity by his cruelties and infamous debaucheries: hung and burnt 1440.

RETZ, or RAIZ, ALBERT DE GONDI, Marquis de France, a native of Florence, who came to France with Catharine de Medici, and was rewarded with barony of Retz and a marshal's baton, 1522-1611. His brother, PIERRE, Cardinal de Retz, advanced by favour of Catharine, 1533-1616. Their nephew is the subject of the following article.

RETZ, JEAN FRANCOIS PAUL DE GONDI, Cardinal de France, the hero of the civil wars of the Fronde in the minority of Louis XIV., was son of Philip Emanuel de Gondi, general of the French Gallies, and was born at Montmirail, 1611. He was educated by St. Vincent de Paul, destined for the church, but turned out a dissipated and turbulent character in his youth, preferred entering into the intrigues of the court and heading the popular party opposed to Mazarin and Condé. The only sincere parties in the cabal, for it hardly possesses the dignity of a party, though it was marked by all the sufferings of a war, was the distressed people, who became mere tools of ambition and faction. The popular manifestations provoked by De Retz were such as to those which marked the commencement of the French revolution; and the year 1649 was signalized by the resort to arms and the erection of barricades. The court was obliged to leave him till De Retz was purchased by a cardinal: which he was nominated by the king in 1651. He was then arrested, during the lull which followed by Mazarin, and remained a prisoner from 1651 to 1654, when he escaped to Spain, and going to that country to Rome, engaged in the intrigues

the papal court. In 1661, the death of Mazarin enabled him to return to France and make his peace with the king; he resigned, however, the titular archbishopric which he had held since the death of his uncle, and received the abbey of St. Denis in lieu of it. The remainder of his life presents a singular contrast with the part we have sketched; he abandoned his magnificent manner of living, and sequestered the greater part of his income to the payment of his debts, amounting to more than a million and a-half sterling; twice it is said, he wished to renounce the purple, which he confessed to have purchased too dearly. He died at Paris, universally esteemed, in 1679, leaving 'Memoirs' which are highly valued for their impartiality, and for the sketches of character with which they are replete. [E.R.]

RETZIUS, A. J., a Swed. botanist, 1747-1821.

REUCHLIN, JOHN, one of the most eminent German scholars, prof. of Greek and Hebrew at Wittenberg, and teacher of Melancthon, 1455-1522.

REUILLY, J. DE, a Fr. traveller, 1780-1810.

REUSCH, J. P., a Ger. philologist, 1691-1754.

REUSNER, N., a German juriconsult and statesman, author of some compilations and Latin poems, 1545-1602. His brother, ELIAS, an antiquary and historian, 1555-1612.

REUSS, J. D., a Germ. philologist, 1750-1837.

REUTH, B., a Russian historian, last century.

REUVEN, P., a Dutch painter, 1650-1718.

REUVENS, JOHN EVERHARD, one of the best learned juriconsults ever produced in Holland, was born at Haarlem, 1763, and perished at Brussels, the victim of a conspiracy in 1816. He was one of the authors of the new criminal code of the Low Countries.

REVEL, J., a French painter, 1684-1751.

REVELEY, WILLEY, a pupil of Sir W. Chambers, dist. as an architect and antiquary, d. 1799.

REVELLIERE-LEPAUX, LOUIS MARIE, a member of the constituent assembly, of the convention, and the directory, 1753-1824.

REVER, M. F. G., a Fr. antiquary, 1753-1828.

REVIUS, J., a Dutch *savant*, 1586-1658.

REWBELL, JEAN BAPTISTE, successively deputy to the estates-general, the convention, and the directory of the French republic, in which he was replaced by Sieyès, 1746-1816.

REY, J., a French chemist, died 1645.

REY, JEAN BAPTISTE, an eminent musical composer, several years director of the orchestra in the chapel of Napoleon, 1734-1810.

EYHER, S., a German *savant*, 1635-1714.

EYN, J. DE, a Flemish painter, died 1678.

EYNA, C. DE, a Spanish Hebraist, 16th cent.

EYNEAU, C. R., a Fr. geometr., 1656-1728.

EYNER, E., a nonconf. div., abt. 1600-1670.

EYNIER, JOHN LOUIS EBENEZER, a French general and statesman, 1771-1814. His brother, ANTHONY, an economist, 1762-1814.

EYNOLDS, E., an Engl. prelate, 1595-1676.

EYNOLDS, SIR JOSHUA, considered the father of the English school of painting as regards special characteristics, was born at Plympton Devonshire, where his father was rector, July 1723. He was intended for the medical profession, but was induced by the perusal of Richardson's *Essays on Painting*, &c., to take up painting as a profession. A handsome edition of these

essays was in 1773 dedicated to Sir Joshua by Richardson's son, comprising—*The Theory of Painting*, *Essay on the Art of Criticism*, and *The Science of a Connoisseur*. Reynolds's first master was Hudson the portrait painter, with whom he was placed in 1741. He first set up as a portrait painter at Devonport, but in 1746 settled in London in St. Martin's Lane. In 1749 he accompanied Commodore Keppel in the Centurion to the Mediterranean, and remained altogether about three years in Italy. He commenced business again in London in 1752, and soon became the most prominent painter of the capital. In 1768, when the Royal Academy was established, Reynolds was unanimously elected president at the first meeting of the members, December 14, of that year, and he was knighted by George III. in consequence. In 1784 he succeeded Allan Ramsay as principal painter in ordinary to the king; and after an unrivalled career as a portrait painter, died at his house in Leicester Square, February 23, 1792. He was buried with great pomp in St. Paul's Cathedral, where a fine statue by Flaxman is placed immediately below the dome, in honour of his memory. His large fortune, about £80,000, was inherited by his niece, Miss Palmer, who became afterwards marchioness of Thomond. His collection of works of art sold for nearly £17,000. Sir Joshua Reynolds, notwithstanding his careless and feeble drawing, was indisputably a great painter; some of his portraits are among the first masterpieces of the art, whether as simple portraits, or as fancy pieces, as for instance, 'Lord Heathfield' in the National Gallery, of the former class, and 'Mrs. Siddons as the Tragic Muse,' at Dulwich, of the latter. His pictures are necessarily very numerous, their chief excellence is their natural grace, fullness of expression, substantial character, and frequently a charming richness of colour and light and shade. His eulogium cannot be better expressed than in the words of Burke:—"He was the first Englishman who added the praise of the elegant arts to the other glories of his country;" "The loss of no man of his time can be felt with more sincere, general, and unmixed sorrow." Sir Joshua has bequeathed to posterity besides his paintings, fifteen elegant and valuable 'Discourses,' of which a magnificent edition edited by John Burnet, was published by James Carpenter in 1842. There is a full life of Reynolds by Northcote, two vols. 8vo, London, 1819. [R.N.W.]

REYRAC, FRANCIS PHILIP DELAURENS DE, a French ecclesiastic and poet, 1734-1782.

REYS, ANTHONY DAS, a Portuguese divine, known as a poet and biographer, 1690-1738.

REZZANO, F., an Italian poet, 1731-1780.

REZZONICO, ANTHONY JOSEPH, Count Della Torre, an Ital. critic, and gov. of Parma, 1709-85.

RHAY, T., a French controversialist, 1603-71.

RHAZES, an Arabian physician, died 932.

RHEINEK, C., a German composer, 1748-96.

RHENANUS, BEATUS, a learned critic, and one of the restorers of letters in Germany, 1485-1547.

RHENFERD, J., a Ger. Orientalist, 1654-1712.

RHESE, J. D., a Welch philologist, 1534-1609.

RHETICUS, G. J., a Swiss astron., 1514-1576.

RHIANUS, a Greek grammarian, B.C. 200.

RHIGAS, a modern Greek poet, and martyr of patriotism, was born in Thessaly about 1758.

Having organized a secret society to achieve the independence of Greece, he was arrested by the Austrian government, and, a rescue being feared, was drowned in the Danube, May, 1798. His poems are said to be full of inspiration, besides which he commenced a Greek journal, and translated several French works.

RHO, J., an Italian ascetic, 1590-1662.

RHODE, J. G., a Germ. Orientalist, died 1827.

RHODES, ALEXANDER DE, a Fr. Jesuit, dist. as a missionary to the East, from 1618 to 1660.

RHODES, J., a Danish *savant*, 1587-1659.

RHODIGINUS, CELIUS, a learned Italian, called by Scaliger, who was a pupil of his, the Varro of his age. His proper name was LODOVICO CELIO RICCHERI, 1450-1525.

RHODOMAN, L., a Germ. *savant*, 1546-1606.

RHUNKEN, or RUHNEKEN, DAVID, an eminent critic and professor at Leyden, 1723-98.

RHYNE, W. F., a Dutch naturalist, 17th cent.

RHYZELIUS, ANDREW, a Swedish antiquarian, chaplain to Charles XII., bp. of Lincoping, and member of the Upsala Academy, 1677-1755.

RIBALTA, FRANCISCO, a Spanish painter, 1551-1628. JUAN, his son and pupil, 1597-1628.

RIBAS, JOSEPH DE, a Neapolitan general, employed in the service of Russia, and one of the negotiators of the peace of Jassi; born about 1735.

RIBAS-Y-CARASQUILLAS, F. DE, a Spanish Dominican, and adversary of the Jesuits, 1612-87.

RIBERA, ANASTASIUS PANTALEON DE, a Span. poet and wit, time of Philip IV., 1580-1629.

RIBERA. See SPAGNOLETTO.

RIBES, ANNE ARNAUD DE, a French colonel of engineers, distinguished in Spain in the wars of the French republic and of the empire, 1731-1811.

RIBIER, W., a French historian and deputy to the estates-general, 1575-1663.

RIBIT, J., a French Hellenist, 16th century.

RIBOUTTE, F. L., a Fr. dramat., 1770-1834.

RICARD, D., a French translator, 1741-1803.

RICARDO, DAVID, a merchant of London, of Dutch descent, famous for his writings on finance and the statistics of public economy, was born 1772, and first appeared as an author during the discussion connected with the Bullion Committee in 1810. His great work 'On the Principles of Political Economy and Taxation,' was published in 1817. In 1819, he became member of parliament for Portarlington. Died 1823.

RICART, or RYCAUT, SIR PAUL, an English traveller, historian, and diplomatist, died 1700.

RICCATI, VINCENT DE, an Italian mathematician and engineer, 1707-1775. His brother, JOURDAIN, a musician, 1709-1790.

RICCHERI. See RHODIGINUS.

RICCI, ANTONIO, an Italian painter, surnamed *Barbalunga*, taught by Domenichino, 1600-1649.

RICCI, C., an Italian painter, 1580-1620.

RICCI, J. B., an Italian painter, 1545-1620.

RICCI, LORENZO, the last general of the Jesuits, born at Florence, 1703, died in the castle of St. Angelo, 1775. His nephew, SCPIO, an Italian prelate, imprisoned for his attachment to the protestant doctrines, 1741-1810.

RICCI, M., a Romish missionary, 1552-1610.

RICCI, M. A., an Italian cardinal, 1619-1682.

RICCI, SEBASTIANO, an Italian painter, who executed in this country the staircase at Montague

House, 1660-1734. MARCO, his nephew and pupil, born 1676, died at Venice 1730.

RICCIARELLI. See VOLTERRA.

RICCIO, B., an Italian painter, 16th century.

RICCIO, DOMENICO, generally called *Brusasorci*, an Italian painter, 1494-1567. His son, FELIX, called *Brusasorci the Younger*, 1550-1600. BAPTISTA, the brother of the latter, and CECILIA, his sister, were also painters.

RICCIOLI, GIOVANNI BATISTA, a learned Italian Jesuit and astronomer, 1578-1671.

RICCOBONI, LUIGI, called *Lelio*, an eminent Italian dramatist and comic actor, born at Modena about 1674, died 1753. His first wife, HELENA VIRGINIA BALETTI, was also an actress and authoress, 1686-1771. Their son, ANTONIO FRANCESCO, was an actor, dramatic writer, and alembicist, 1707-1772. The wife of the latter, MARIE JEANNE LABORAS DE MEZIERES, a French lady, was disting. as an actress and novelist, 1713-92.

RICH, CLAUDIUS JAMES, the distinguished traveller and Orientalist, was born in 1787, at Dijon, in Burgundy, and was brought to England in his infancy, and educated at Bristol. He became so remarkable for his skill in the Eastern languages that he obtained an appointment in the East India Company's service as early as 1803, when in seventeenth year. In 1807 he resided with James Macintosh, at Bombay, and married a daughter. His researches in Babylonia date from 1811 to 1820, and he died prematurely at Shiraz in 1821. His Oriental antiquities and MSS. were purchased by parliament for the British Museum. His memoirs were published by his widow, went through a second edition in 1839.

RICH, PENELOPE DEVEREUX, Lady of 1000, Robert Rich, was a daughter of the old earl of Essex, and the affianced bride of Sir Philip Sidney. She is the Stella of his exquisitely beautiful verses, and is admitted to have been the friend and woman of her age. The love story of 'Astrophel and 'Stella,' is one of the most painful romances of real life. It has been illustrated by the grave pen of Mrs. Jameson among others.

RICHARD I., king of England, surnamed *Cœur de Lion*, the 'Lion-hearted,' was the second son of Henry II. and Eleanor of Guienne, and had been divorced by Louis VII. of France. He was born at Oxford in 1157, and succeeded to the throne by the death of his father in 1189; he previously displayed so haughty and rebellious spirit, that it had contributed to lay the aged king in his grave. Remorse for his past misconduct was instantly followed by preparations for a crusade in Palestine, which had been resolved upon during Henry's lifetime, in consequence of the progress in arms of the renowned Saladin. On the 1st of July, 1190, Richard met Philip Augustus of France in the plain of Vezelai, and agreed upon the terms of a mutual expedition. He was then accompanied from Marseilles by the English barons, and the kings rejoined company at Messina, the appointed rendezvous of the two armies. Here the romantic episode of Richard's expedition against Cyprus, and his marriage with Berengaria took place. In the middle of 1191, these interesting proceedings ended in the capture of the armament before St. Jean d'Acre, there and for two years past besieged by the crusaders.

under the emperor Frederic. The English monarch immediately became popular among the knights, and took a leading part in the operations of the siege. The fortress surrendered, notwithstanding the efforts of Saladin to raise the siege on the 12th of July, and soon afterwards Philip Augustus departed for France, pretending sickness, but really disgusted with the supremacy of Richard, and far outshone by him in feats of arms. Richard now marched from St. Jean D'Acre at the head of 100,000 men, and defeated Saladin in a general engagement on the road towards Ascalon. This victory put the crusaders in possession of the principal towns along the sea-coast, and furnished a basis of operations that Richard was enabled to press forward to the capture of Jerusalem. Disaffection among the Christian forces prevented the accomplishment of this design, and Richard, hearing of the perfidy of his brother, John, and Philip of France, concluded a truce with Saladin, and embarked for Europe on the 9th of October, 1192. His fame had already been spread far and wide by the songs of the troubadours, and the reports of the pilgrims. Armed with a heavy battle-axe, he never hesitated to rush single-handed into the midst of the enemy, and such deeds are recorded of him as would be incredible if they were not well attested by eye-witnesses. On the passage home he was shipwrecked near Aquileia, on the coast of Italy, and, disguising himself as a pilgrim, he endeavoured to reach England by way of Germany. When near Vienna, his real character was discovered, and Leopold, duke of Austria, caused him to be arrested both in revenge of his brother-in-law, the king of Cyprus, and of the contempt that Richard had shown for his flag at Acre. On his captivity becoming known,

interrupted by a truce, and being resumed again a second truce was agreed upon, both which events occurred within the three years, 1196-1199. In the last-mentioned year Richard was preparing to return to England, when Vidomar, the count of Limoges, discovered a treasure, part of which he sent to Richard as his feudal superior. The latter claimed the whole. Avariciousness could be no part of such a character, but it should be considered that he had been at great costs in his recent wars, and his conscience may have told him that his subjects had paid a far higher ransom for him than he was worth as their sovereign. Provoked at the refusal of the Limousan, Cœur de Lion invested the castle of Chaluz, and haughtily refusing all overtures, threatened to hang the whole garrison as soon as he had taken the place. While reconnoitering this stronghold, he was shot in the shoulder with an arrow by a cross-bow-man, named Bertrand de Gourdon. The wound proved mortal, and Richard expired in the tenth year of his reign, on the 16th April, 1199. The garrison in the meanwhile had been defeated, and the king displayed his usual magnanimity by ordering that Gourdon should be set at liberty. On the contrary, the hapless man was flayed alive and then hung, by order of Marchade, the leader of the Brabantine soldiers in Richard's army. The fame of Richard Cœur de Lion has been no less widely spread in the East than in his own country, and his daring passed into a proverb among the Saracens. He had qualities also that must have made him a great king, in every sense of the word, had he outlived his martial enthusiasm, or had war been pursued for political ends in those times as in later ages. [E.R.]

RICHARD II., eldest son of Edward the black prince, and of Jane, daughter of Edmund, earl of Kent, was born at Bourdeaux 1366, and succeeded his grandfather, Edward III., 1377. He was called to govern in difficult times, when the nobles were turbulent and powerful, and the commons were just acquiring a knowledge of the power they might possibly exercise: his minority also was disturbed by the continuance of the French wars of his grandfather. At that time the modern principles of taxation were not understood, and disaffection was provoked by the exactions necessary for the public service. A priest, named John Ball, became the orator of the multitude, and the people rushed to arms under Wat Tyler, a poor man, whose daughter had been outraged by the indecent conduct of the collector of the poll-tax. This was in 1381, when the king was only fifteen years of age. Tyler, who lived at Dartford, in Kent, collected a body of 100,000 insurgents under his banner, and having pitched his camp at Blackheath, made a disastrous descent upon the metropolis. The promises of the government caused the greater part of this force to disband, and their leader was stabbed in Smithfield while conferring with the king, by Walworth, mayor of London. Assassination under such circumstances was a dangerous experiment, but Richard at this critical moment, with great presence of mind, rode up to the insurgents, and declaring he would redress their grievances, finally persuaded them to disperse to their homes. By similar means the insurrection, which had spread from county to county,

[Castle of Tournai, the prison of Richard.]

which was concealed as long as possible, Richard was ransomed by his subjects at the price of 20,000 marks, and arrived in London on the 20th of March, 1194. His contemptible brother, John, had been in connivance with Philip to usurp the kingdom, and that monarch advised him of Richard's return, with the laconic warning to 'take care of himself, for the devil had broke loose.' Richard, however, generously forgave him, and had been crowned again at Winchester, crossed to France to chastise Philip. Hostilities were

was everywhere suppressed in detail; and when all was supposed to be over the concessions were withdrawn, and commissioners being sent to all parts, supported by a large army, 1,500 of the insurgents were executed. The display of spirit by Richard on this, and a few other occasions subsequently, was mere impulse or empty vanity, unsupported by any steadfast resolve or sense of justice; and the remainder of his reign would be wholly comprehended in the history of his fall, and the assumption of power by a man of stronger will and more politic judgment, in the person of his cousin, Henry Bolingbroke, duke of Lancaster. It is the history of favouritism and weakness on the one hand, giving abundant scope to ambition and strength of resolve on the other. Richard, become the prisoner of Henry, was solemnly deposed on the 29th of September, 1399, and was either killed or starved to death in Pontefract castle at the beginning of 1400. The usurpation of the duke of Lancaster, now Henry IV., commenced the civil wars of England between the red and white roses. [E.R.]

RICHARD III., the most execrated of all English princes, was the youngest son of Richard duke of York, and was born at Fotheringay castle in Northamptonshire, 1452. He was created duke of Gloucester in 1461, on the accession of his brother, Edward IV., who claimed the throne as a descendant of Philippa, only daughter of the duke of Clarence, who was the second son of Edward III. In 1472 Richard married Ann, widow of the Lancastrian prince of Wales, and daughter of the great Warwick; the sister of that lady having previously wedded his brother Clarence. The latter prince being his elder brother, stood in the way of Richard's ambition, who fomented the intrigues which proved fatal to him; so that on the death of Edward in 1483, Richard became the natural guardian of his nephews, and was appointed legal protector of the kingdom. The elder of the boys was immediately proclaimed king as Edward V., the other was duke of York. The history of the times is only obscurely known, but the tradition of the murder of these princes in the Tower by order of Richard, is in all human probability substantially true, and a darker deed of treachery is not on record in any language. This event took place about the middle of 1483, and in January, 1484, the succession of Richard was confirmed by a servile parliament, his other rivals, the children of Clarence, having been declared illegitimate by defamation of the usurper's own mother. In about three months afterwards Richard lost his son, the prince of Wales, and within another year the daughter of Warwick followed her child to the tomb. Richard, thus made a widower, proposed to marry the Princess Elizabeth, eldest daughter of his brother Edward, who was destined for the earl of Richmond, the heir of the house of Lancaster. The latter was abroad at the time, but now hastened the preparations for his intended return to deliver England from Richard's tyranny, and in fine, landed at Milford Haven on the 7th of August, 1485. Richard took the field at the head of 15,000 men, and met Richmond at the head of 10,000, with the assurance, however, of aid from Lord Stanley, who commanded another body of 7,000. The encounter

took place at Bosworth field, near Leicester, the 21st of August, and Stanley keeping his promise at the critical moment, secured the victory to Richmond. Richard III. was as brave as was cruel and politic. As the action grew desperate he fought with the courage of a hero, making a last determined rush at his opponent, fell under the number of assailants that closed around him. Richmond then became king under the title of Henry VII., and having married Elizabeth, united thereby the houses of York and Lancaster, and thus terminated the civil wars. In short a time, passed in expectation of his struggle, Richard can hardly be said to have reigned, yet he distinguished himself by acts which mark the statesman. Such acts, however, never be admitted to cancel crime; the first act is to avoid evil; the first possible right, is independence of all wrong. [E.]

RICHARD, two dukes of Normandy:—**RICHARD I.**, son and successor of William Long-Sword, reigned 993-996. **RICHARD II.**, son and successor of the preceding, 996-1027. A duke of Burgundy, reigned 877-921. A count of Evreux, accompanied William the Bastard in his expedition against England, reigned 1037-1067. **princes of Capua**:—**RICHARD I.**, succeeded his father as count of Aversa 1059, and was invested with the principality of Capua by the pope, Nicholas II., 1062; died 1078. **RICHARD II.** succeeded 1091, and, being deposed by his subjects, was established by Roger, duke of Apulia, 1098, and 1105. Lastly, a count of Rhodes, who died a long reign about 1135.

RICHARD, bishop of Chichester, died 125. **RICHARD**, archbishop of Armagh, surnamed ARMACHANUS, said to have translated the Bible into Irish, and a reformer of the friars, died 14.

RICHARD OF BURY, a learned statesman and patron of learning, was born at Bury Edmunds 1287. He commenced his career as tutor of Prince Edward, afterwards Edward I., became bishop of Durham in 1333, and chancellor and high treasurer of England in 1334; died 1343.

RICHARD OF CIRENCESTER, a Benedictine monk of Westminster, author of works on chronology and British history, died 1401 or 1402.

RICHARD OF CORNWALL, an uncrowned emperor of Germany, son of John, king of England, was born 1209, and first distinguished himself in Palestine. He was crowned king of Germany at Aix-la-Chapelle to the prejudice of Conrad in 1255, and was remarkable for the wisdom of his administration; died 1272.

RICHARD OF ST. VICTOR, a Scottish philosopher and Scripture commentator of the 12th century.

RICHARD, C., a Fr. mathematician, 1589-1644.

RICHARD, C. L., a political and ecclesiastical writer, author of 'Dictionnaire des Sciences et des Lettres', b. in Lorraine 1711, shot at Mons 1757.

RICHARD, CLAUDE LOUIS, an excellent naturalist, was born in 1754. He died in 1821. His grandfather was one of Bernard de Jussieu's disciples at the Jardin du Roi at Paris, and he had the superintendence of Louis XVth's garden at Auteuil. Inheriting thus a love for botany, his passion for the study was carried to the extreme, his parents wished him to study theology, as there were good prospects for him in the church, but he

ears, entreaties, nor threats, could prevail upon him to follow the line of life chalked out for him, and his father at last turned him out of doors at the age of fourteen, with a miserable pittance to support him. Nothing daunted by this rigorous treatment, the young enthusiast made his way to Paris, where he studied botany under Bernard de Jussieu, and in a few years afterwards received an appointment to proceed as botanist to Cayenne and the other French colonies in America. He remained there for eight years, and during that time made extensive collections both in botany and zoology. Arriving in France in 1789, he found the men in power so much absorbed in their own struggles for existence to attend to scientific pursuits. He had before him the mortification to find the little money he had previously accumulated gone, his health injured and himself cruelly neglected. Unfortunately for science these disappointments and blighted hopes rendered him misanthropical and churlish. He shut himself up from the scientific world, and henceforth studied for himself alone. The fine collections he made, thus became of no avail to his countrymen, and he was exceedingly chary even in communicating to any one the results of his researches. In 1795 he was appointed professor of botany at the Ecole de Médecine. His lectures were excellent and well attended; and fortunately a portion of them has been published by one of his pupils from notes taken at the time. This work contains a few memoirs which he published in some of the scientific journals show that he possessed original views in botany, and could express them with great conciseness and accuracy. He had in view the intention of producing a new philosophy of botany in the style of Linnæus, as also a new nomenclature of the science, but he did not live long enough to maturity. [W.B.]

RICHARD G., a French missionary, 1764-1832.

RICHARD J., an ecclesiastical wr., 1639-1719.

RICHARD, J. P., a Fr. preacher, 1743-1820.

RICHARDSON, J., an African traveller, d. 1851.

RICHARDSON, JOHN, a learned Irish prelate, author of 'Observations on the Old Testament,' d. 1654.

RICHARDSON, JONATHAN, a distinguished portrait painter and writer on art, about 1665-1715. His son and literary assistant, died 1771.

RICHARDSON, JOSEPH, a poet, died 1803.

RICHARDSON, SAMUEL, the son of a joiner, was born in Derbyshire in 1689. After passing through a village school, he was bound to a printer in London, and, after having been a few years foreman to his master, set up in business for himself. He prospered as rapidly as his good conduct and industry deserved, was appointed printer of the journals of the House of Commons, and enjoyed domestic happiness in two successive marriages. He was always fond of reading, was a voluminous letter-writer, especially to ladies, and furnished places to the booksellers. But his authorship went no farther than this, till he had completed his fiftieth year. He then agreed, on the request of two publishers, to compose a series of familiar and instructive letters; and, when he had worked for three months at his task, what he produced was his novel of 'Pamela, or Virtue Rewarded.' It was published in 1740. It was the first novel of domestic life which had broke in on the unadorned romances, (for Defoe had barred himself from

polite patronage by his unlucky choice of subjects); and it had therefore novelty, besides its great merit in natural and minute description, to recommend it to the extraordinary popularity which it immediately attained. In 1749 it was followed by 'The History of Clarissa Harlowe,' a novel whose pathos is so profound as to be positively painful. In 'The History of Sir Charles Grandison,' published in 1753, the author aspired somewhat above the sphere of manners which he was best qualified to describe; but, in spite of this, and of the wearisome prolixity which reigns here yet more than in his other novels, this is really a fine picture of the ideal gentleman. It is to the immortal honour of Richardson that he, the earliest of our modern novelists, (unless Defoe should be ranked among them,) produced works untainted by the immorality which disgraced Fielding and his other successors. He passed his old age in comfort and fame, being only a good deal spoiled by the homage of his admirers, particularly the ladies who flocked about him. He died in 1761. [W.S.]

RICHARDSON, W., son of a Scottish minister, known as a miscellaneous writer and poet, d. 1814.

RICHARDSON, W., a learned antiquarian and minister of the Church of England, 1698-1775.

RICHE, CLAUDE ANTHONY GASPARD, a Fr. physician, distinguished as a naturalist, 1762-1797.

RICHELET, CÉSAR PETER, a Fr. writer, au. of several Dictionaries and translations, 1631-1691.

RICHELIEU, ARMAND JEAN DU PLESSIS, Cardinal, was born at Paris on the 5th of September, 1585. The family name was Plessis, but many members of it became distinguished in connection with the territorial title of Richelieu. Armand was a younger son, and was consecrated bishop of Luçon in 1607. It was a period when the possession of the great ecclesiastical dignities was not supposed in France to turn the habits of a young man of noble family from the usual licentious pursuits of his rank, but Richelieu was fonder of power than of pleasure, and he soon acquired it by ably and rigidly performing the functions of his high office. His court success is said to have commenced with a harangue which it fell to him to deliver to the young monarch, Louis XIII., and which secured the attention and approval of the queen mother, Mary of Medicis. He received his cardinal's hat in 1622, and two years afterwards became chief minister of the crown. His ministry was remarkable for the development of great systems, and the chief of them was the breaking down the territorial power of the nobility, and confirming the influence of the crown, which had long before brought the commons under subjection to a perfect despotism. His career was distinguished at once by daring and success. All who resisted him, including the highest princes of the blood, were remorselessly executed as common criminals, and thinking it necessary to his purpose, he drove his old patroness the queen dowager into exile. He broke the power of the Calvinists by besieging and taking their stronghold Rochelle. But his antipathy to them seems to have originated less in religious intolerance than in a desire to uproot those singular secular privileges which made them supreme even over the royal prerogative in the districts assigned to them. In counteracting the power of Austria, which was the second main

principle of his ministry, he used for his purpose the Calvinists of the north, and the Mahomedans of the south, with thorough impartiality. He combined with his courage and great talent many ludicrous weaknesses. He died on the 4th of December, 1642. [J.H.B.]

RICHELIEU, ALPHONSO LOUIS DU PLESSIS DE, eldest brother of the statesman, known as the cardinal of Lyons, and distinguished for his charities; 1582-1663. **L. F. ARMAND**, his grand-nephew, a marshal of France, and member of the Academy, was born at Paris in 1696; at the age of fourteen he was married and commenced life at court, died 1788. **ARMAND EMMANUEL**, grandson of the latter, was born in 1766, and at the period of the emigration, 1789, took service under Suwarrow. In 1815 he returned to France, and became foreign minister. Died 1822.

RICHER, ADRIAN, a distinguished French historian, 1720-1798. His brother, **FRANCIS**, a jurist and writer on mythology, &c., 1718-1790.

RICHER, E., a learned French divine, author of a work on ecclesiastical and political power, which gave rise to much controversy, 1560-1631.

RICHER, E., an elegant and learned French writer, author of 'La Nouvelle Jerusalem,' d. 1835.

RICHER, H., a dramatic writer, 1685-1748.

RICHER, J., a French astronomer, died 1696.

RICHERAND, BARNO, a celebrated French surgeon and writer on physiology, died 1840.

RICHMAN, G. W., a native of Livonia, prof. of natural philosophy at Petersburg, 1711-1753.

RICHMOND, CHARLES LENNOX, duke of, secretary of state and grand master of artillery, 1735-1806. His nephew, and heir of the same name, governor of Plymouth, lord-lieutenant of Sussex and governor of Canada, 1764-1812.

RICHMOND, LEGH, a minister of the Church of England, editor of a 'Selection from the Fathers of the Church,' and author of 'Annals of the Poor,' 1772-1827.

RICHTER, A. G., a Ger. surgeon, 1742-1812.

RICHTER, JEAN PAUL FRIEDRICH, was born in 1763, in the principality of Baireuth, in Franconia. His father, a Lutheran village pastor, was so poor that his son's education was carried on with much difficulty; and, dying before Jean Paul reached the university, he left his family in great distress. The youth, bent on attaining scholarship, and intending at first to be a clergyman, struggled on for a while at Leipzig, often wanting bread; and in 1783 he found his way to the press with a work (the 'Grönländische Prozessen,') which showed him to have already opened his peculiar vein. Another of his strange sketches, 'An Extract from the Devil's Papers,' lay unpublished for several years, during which Jean Paul remained in the depths of penury. In 1793 he opened a school in the little town of Schwarzenbach, in his native province; and then also he attracted public applause for the first time, by the publication of 'The Invisible Lodge.' Thus encouraged, he devoted himself entirely to authorship, poured forth his works with rapidity, and became one of the most celebrated among the German writers of his time. He shifted his residence often till 1803, and then settled at Baireuth for the remainder of his life, which closed in 1825. Jean Paul wrote philosophical treatises, such as his

'Levana, or the Theory of Education,' and the 'Introduction to Aesthetics' (Vorschule der Ästhetik). But his fame rests on a kind of compositions which are almost, yet not quite, novels or romances. They unite narrative, description, and reflection; they pass from the wildest flights of grotesque to original humour to the depths of pathetic tenderness; they contain as much of striking thought as ever was embodied in any work of fiction, as much of poetic imagination as ever was pressed in prose. His thinking is unsystematic but often wonderfully suggestive as well as acute, and his style is entirely his own, and so eccentric that his books are not less difficult for Germans than for foreigners. Among the works which his sixty volumes a few may be named:—'Herakleitos,' 'Quintus Fixlein,' 'Biographical Divisions under the Skull of a Giantess,' 'Flower, Fire and Thorn-Pieces,' 'The Journey of the Regimental Chaplain Schmelzle,' 'Titan,' 'The Life of Fit,' 'The Comet, or Nicolaus Markgraf.' [W.]

RICHTER, OTTO FREDERICK VON, a Prussian traveller and Oriental scholar, 1792-1816.

RICIMER, a Roman patrician and general of Swedish origin, regarded as the ablest commander of the age. From the period of his first success against the enemies of Rome in 456, he posed and created the emperors at his will. In 472 he stormed Rome, and gave it up to the rage and cruelty of his soldiers. He died soon after.

RICIUS, P., a learned German, 16th century.

RICKMAN, JOHN a distinguished statistician, many years assistant clerk in the House of Commons, 1771-1841.

RIDER, JOHN, an Irish prelate, 1562-1633.

RIDER, WILLIAM, master of St. Paul's school, author of a 'History of England,' &c., died 1717.

RIDGLEY, T., a nonconf. divine, 1667-1738.

RIDINGER, J. E., a Germ. painter, 1695-1761.

RIDLEY, GLOSTER, an English divine and theologian, best known as a dramatic writer, poet, 1702-1774. His son, **JAMES**, a chaplain to the army, author of 'Tales of the Genii,' d. 1774.

RIDLEY, NICHOLAS, a martyr of the English Church during the Marian persecution, was born in Northumberland, and educated at Newcastle Tyne, at the commencement of the sixteenth century. He was soon known for his high attainments in theological learning, and his promotion commenced by his appointment as chaplain to archbishop of Canterbury (Cranmer) in 1537. The accession of Edward VI. in 1547, he became a popular preacher of the doctrine of reformation; in September of that year he was appointed bishop of Rochester, and in 1549, on the deprivation of Bonner, bishop of London. Cranmer and Ridley worked heartily together during the reign of Edward VI., but with this difference, that Cranmer was more willing to trim his sails to the current winds, and Ridley stood firmer in his individual convictions. It was a long time before he gave up the doctrine of the corporal presence at the eucharist, and he never abandoned his preference for episcopalian distinctions, the use of vestments, and the priestly manner of administering the Lord's supper. Ridley tried in vain to convince Hooker, the bishop elect of Gloucester, of the retention of these 'rags of superstition,' and he himself underwent a long imprisonment before

submitted to wear them. It is to Ridley, in short, more than to any other prelate, that we are indebted for the English liturgy as it exists at present; and no one acquainted with the history of Edward the Sixth's reign will require to be told under what difficulties it was formed. When the health of Edward was declining in 1553, he induced that prince to endow the public charities which bear his name; viz., Christ's Hospital, St. Bartholomew's, St. Thomas's, and Bridewell; and at the king's death joined the party who endeavoured to place the crown on the head of Lady Jane Grey. Though he submitted himself to martyr, he was committed to the Tower in July, 1553, and in March, 1554, was conveyed to Oxford, together with Latimer and Cranmer, to be tried for heresy. He walked to the place of execution in his episcopal robes, a striking proof of his regard for those distinctions, and was burnt with Latimer on the 16th of October, 1555, in front of Balliol college. He endured the torments of the stake with great courage, and as the flames did not reach the vital parts so soon in his case, Latimer expired before him. His works have been republished by the Parker Society. [E.R.]

RIDLEY, SIR THOMAS, of the same family as the martyr, distinguished as a civilian, died 1629.

RIDOLFI, C., an Italian painter, 1570-1644.

RIDOLFI, C., a painter and historian, 1602-60.

RIEBOV, G. H., a Germ. theologian, 1708-74.

RIEDEL, J. H., a Germ. diploma., 1740-85.

RIEDINGER, JOHN ELIAS, a native of Ulm

Swabia, dist. as a painter of animals, 1695-1757.

RIEGGER, J. A. G., a Ger. canonist, d. 1795.

RIEGO-Y-NUNEZ, RAFAEL DEL, a Spanish painter and patriot of the revolution of 1820, born 1785, executed after the restoration of Ferdinand I., November, 1823.

RIEM, J., a German agriculturist, 1739-1807.

RIENZI, or RIENZO. COLA, or NICOLA GABRIANO DE RIENZO, famous in Roman history for his assumption of the dictatorship in that capital, was born of humble parents about 1310, and was known in 1340 as a friend of Petrarch, and like the poet, was distinguished by his love of the ancient public institutions of Rome, and by his profound knowledge of antiquity. He was also a great orator, and was in the habit of addressing the people on their political degradation and the oppression of the nobles. His most frequent theme was the destruction of the noble monuments of ancient Rome, the conversion of palaces and churches into fortresses by the rival factions, and the total abandonment of the city by the popes, who then resided at Avignon. His eloquent appeals borrowed force from the ruins, in the midst of which he addressed the people, and it was always easy to give that political meaning to his harangues at the anarchy of the times dictated. The papal authority favoured a movement which held out some prospect of depressing the factions, and on the 20th of May, 1347, Rienzo was accompanied to the capitol, at the head of an immense multitude, by the bishop of Orvieto, the pope's vicar, and was then appointed the people's tribune with full sanction. In this character Rienzo, surrounded by a regular militia, re-established the administration of justice, sent ambassadors to other states, and was courted, as the mediator between them

and the pope, by some of the principal sovereigns of Europe. His power lasted no longer than the December of the same year, when a reaction took place, headed by the great families he had depressed, and Rienzo, abandoned by the people, sought refuge in Bohemia. In 1352 he was conveyed a prisoner to Avignon, and would have been executed, but his own eloquence, the intercession of his friend Petrarch, and the death of Clement VI., saved him. Innocent VI., who succeeded Clement, found it politic to restore Rienzo to his dictatorship, but he was now hampered with restrictions, and with the necessity of raising supplies of money for the pope. These circumstances, and the severities he found it necessary to exercise, alienated the city, and a popular tumult being excited, Rienzo was massacred on the 8th of October, 1354. The popes continued to reside at Avignon till 1376, a period, in the whole of seventy years, bewailed by Petrarch as a time of barbaric devastation. [E.R.]

RIES, FERDINAND, a celebrated musician, was born at Bonn in Germany, in the year 1784. His father and grandfather were both musicians, the one having been first violinist, and the other leader of the orchestra, at Cologne. The young Ferdinand received his musical education from Bernhard Romberg, and from Albrechtsberger. In 1801 he removed to Munich, and afterwards to Vienna, where he became the first acknowledged pupil of Beethoven, and where he laid the foundation of his future fame as a composer. In 1805 he was drawn as a conscript for the French army, but having in early life lost the sight of one eye from small-pox he was dismissed as being disqualified to serve as a soldier. He afterwards visited Russia, where he remained till 1813, when he arrived in England and was admitted a member of the Philharmonic Society, where several of his compositions were performed with great applause, and where he was much admired as a piano-forte player. Having acquired a well-merited independence he returned to his native town, when he produced two German operas and an oratorio 'David.' He died at Frankfurt in 1838. [J.M.]

RIETER, H., a Swiss painter, 1751-1818.

RIGAUD, HYACINTH, a celebrated painter, called the Vandyke of France, 1659-1743.

RIGAUD, STEPHEN PETER, professor of astronomy at Oxford, born at Richmond, 1775, d. 1839.

RIGAULT, N., a Fr. philologist, 1577-1654.

RIGHINI, V., an Italian composer, 1758-1812.

RIGHTWISE, or RITWYSE, JOHN, a classical scholar, and master of St. Paul's school, d. 1532.

RIGORD, RIGORDUS, RIGOTTUS, or RIGOTUS, a French ecclesiastic and historian of Philip-Augustus of France, died about 1207.

RIGORD, J. P., a French antiq., 1656-1727.

RILEY, JOHN, an English painter, 1646-1691.

RINALDI, ODESICO, a learned ecclesiastical historian, born at Treviso, 1595, died 1671.

RINCON, A. DE, a Span. painter, 1446-1500.

RING, JOHN, a pupil of the two Hunters, distinguished as a surgical writer, 1751-1821.

RINGELBERGIUS, JOACHIM FORTIUS, German SHERCK, a disting. Flemish philos., 16th ct.

RINGGLI, G., a Swiss painter, 1575-1635.

RINK, F. T., a German Orientalist, died 1811.

RINNANN, S., a Swiss mineralogist, 1720-92.

RINUCCINI, OTTAVIO, a Florentine poet, said to be the inventor of the opera, died 1621.

RIOJA, P. DE, a Spanish poet, 1590-1658.

RIOLAN, JEAN, a French physician of considerable celebrity, born at Paris in 1580, and died there in 1657, aged seventy-seven. He was a vigorous controversialist, and his somewhat numerous treatises were collected into 1 volume folio, in 1650. In conjunction with La Brosse he was the founder of the Royal Botanic Garden at Paris, to establish which he had obtained permission from Mary de Medicis, the mother of Louis XIII. [J.M.C.]

RIPAULT, L. M., a French *savant*, 1775-1823.

RIPLEY, GEORGE, or GREGORY, an English alchemist and poet, time of Henry VII., d. 1490.

RIPPERDA, JOHN WILLIAM, Baron De, a military and political adventurer, who rose to great distinction in the empire of Morocco, born at Groningen, in Flanders, 1680, died at Tetuan 1737.

RIQUET, PETER PAUL DE, the engineer of the noble canal of Languedoc, to the execution of which he devoted the whole of his fortune, 1604-1680. This canal unites the Mediterranean with the Bay of Biscay, and the works were completed by Riquet's two sons.

RISBECK, G., a Dutch historian, 1750-1786.

RISDON, TRISTRAM, a native of Devonshire, author of a 'Survey' of that county, 1580-1640.

RISLEY, T., a puritan divine, 1630-1716.

RITCHIE, JOSEPH, one of the victims of African discovery, was employed in an exploring expedition with Captain Lyon, and d. in Fezzan 1819.

RITSON, ISAAC, a medical pupil, distinguished as a professional and miscellaneous wr., 1761-89.

RITSON, JOSEPH, an English lawyer, disting. as a literary antiquarian and editor, 1752-1803.

RITTANGELIUS, or RITHANGEL, JOHN STEPHEN, professor of Oriental languages at Konigsberg, author of several books founded on his Judaical learning, died about 1652.

RITTENHOUSE, DAVID, a celebrated American astronomer and mathematician, 1732-1796.

RITTER, J. B., a German chemist, 1762-1807.

RITER, J. W., a Ger. philosopher, 1776-1810.

RITERSHUY, CONRAD, a native of Brunswick, dist. as a civilian and philologist, 1560-1618. His son, NICHOLAS, a genealogist, 1597-1670.

RITWYSE. See RIGHTWISE.

RIVARD, D. F., a Fr. mathematic., 1697-1778.

RIVAROL, ANTHONY, Count De, a French political writer, celebrated for his *bons mots* and his satirical spirit, b. in Languedoc 1754, d. 1801.

RIVAROLA, A., an Italian painter, 1607-1640.

RIVAULT, D., a French tactician, died 1616.

RIVAUTELLA, ANTONIO, a native of Piedmont, dist. as an archaeologist and bibliop., 1708-53.

RIVAZ, P. J. DE, a Fr. chronologist, 1711-72.

RIVE, JOHN JOSEPH, a French ecclesiastic and writer on literary history, who was remarkable for his turbulence during the revolution, 1730-1792.

RIVET, A., a French Calvinist, 1572-1651.

RIVET DE LA GRANGE, ANTHONY, a learned Benedictine, author of a 'Literary History of France,' 1683-1740.

RIVIERE, C. F., Duc De, an emigrant noble and officer in the army of Condé, who was governor of the young duc de Bourdeaux; born 1765, condemned to death as a spy of the Bourbons, but saved by Josephine, 1804, died 1828.

RIVIERE, L., a French physician, 1589-165. RIVIERE, MERCIER DE LA, a distinguished political economist, author of 'The Order, Nature and Essential, of Political Societies,' born abt 1720, died 1793, or 1794.

RIVIERE, P. J. H. LA. See LARIVIERE.

RIVIERE, ROCH LEBAILLIE, Sieur De La, cel. empirical physician and astrologer, died 160.

RIVINUS, the Latinized name of ANDRÉ BACHMAN, a Ger. phys. and philologist, 1600-5.

RIVINUS, AUGUSTUS QUIRINUS, but whose family name was Bachmann, an excellent botanist was born at Leipzig in 1652. He died in 1723. The son of a learned father, he soon became equally distinguished himself; and filled the chair of physiology and botany at the university of his native town. He was a correspondent of John Ray's, and published a classification of plants about the same time as he did. His system was founded on the flower, on the number, regularity and irregularity of the petals. He was the first to abandon the division of plants into trees, shrubs, and herbaceous plants, an arrangement which was still due to Tournefort and Ray. His controversy with the latter upon this subject, is the chief thing which has made Rivinus known to the botanists of the country; though the value of his works and his merits as a botanist, entitled him to higher consideration than he has hitherto received at the hands. Plumier has named a genus of plants after him, Rivina. [W.B.]

RIZI, J., a Spanish painter and art-writer, 1595-1675. His brother, FRANCIS, a painter and architect, 1608-1685.

RIZZIO, or RICCIO, DAVID, an Italian musician and linguist, who became private secretary to Mary queen of Scots, and was murdered at Holyrood House by Lord Ruthven, and the other accomplices of Darnley, 1566. It was pretended by the enemies of the queen that an improper intimacy existed between her and Rizzio, but all the probabilities are opposed to such a belief. The most recent work which throws any light on this subject is that of Miss Strickland.

ROA, M. DE, a Spanish historian, died 1637.

ROBBIA, L. DELLA, an Ital. sculptor, 15th et 16th c. ROBERT, earl of Annandale, father of Robert Bruce, who became king of Scotland, was related to the blood royal by his mother, Isabella of Scotland. He was the competitor of Baliol for the crown on the death of Alexander III. in 1285. Died soon after the battle of Falkirk, which was fought 22d July, 1298.

ROBERT I., king of Scotland. See BRUCE.

ROBERT II. and III. See STUART.

ROBERT, surnamed 'The Strong,' regarded as the stock of the Capet dynasty, died 866.

ROBERT, king of France, son of the preceding, received the crown at Soissons from the lords opposed to Charles the Simple 922, killed 928.

ROBERT, called 'The Devout,' king of France, shared the throne with his father, Hugh Capet, 988, succeeded him as sole king 996, died 1031.

ROBERT, emperor of Constantinople, 1219-28.

ROBERT, emperor of Germany, 1400-1410.

ROBERT, first of the name, duke of Normandy, called 'Le Magnifique,' and 'Le Diable,' succeeded his brother, Richard III., in 1027, or 1028. Having gone on a pilgrimage to the Holy Land, he

was poisoned at Nicæa in Bithynia, 1035. His natural son, WILLIAM THE CONQUEROR, succeeded him. ROBERT II., surnamed 'Short Shanks,' son of the latter, obtained the duchy of Normandy after his father's death, 1087, died, the son of his bro. Henry, at Cardiff castle, 1134. ROBERT, called 'The Old,' duke of Burgundy, son of King Robert, was invested with the duchy by his brother, Henry I., 1032, and died 1055. ROBERT II., succeeded his father, Hughes I., before his death 1272, and was married to Agnes, daughter of St. Louis, died 1305. ROBERT, count of Burgundy, reigned 1303-15. ROBERT, duke of Bar, reigned 1351-1411. ROBERT, count of Evreux, reigned 989-1037. ROBERT, the first of the name, count of Flanders, second son of Baldwin V., succeeded his nephew, Arnoul, 1072, died in Palestine 1093. ROBERT II., son and successor of the preceding, greatly distinguished by his exploits at Jerusalem, the crown of which was offered to him; died 1111. ROBERT III., reigned 1305-1322. ROBERT I., count of Artois, third son of Louis XI., and brother of St. Louis. Having accompanied the latter into Egypt, he was killed at the battle of Mansourah 1250. ROBERT II., a posthumous son of the preceding, was distinguished in the second crusade, and was killed in a battle with the Flemings near Courtrai 1302. ROBERT III., grandson of Robert II., born 1287, was mortally wounded in a battle with the French, and died in London 1343. ROBERT OF ANJOU, king of Naples, distinguished in the struggle of the middle ages between the Guelphs and Ghibellines, was the third son of Charles II., and succeeded that sovereign by a provision of the pope in 1309. It is not easy to cross the real principles at issue between those parties, but, in general terms, the Ghibellines were the friends of the ascendancy of imperial government, and the Guelphs were identified with the separate nationalities under the ascendancy of the Church of Rome. Hence, the Guelph sovereigns were often on the side of the popes, and were always opposed to the emperors of Germany and their allies. With the crown of Naples conferred on him to the prejudice of his nephew, Carobert, Robert of Anjou received the remission of all the debts of his father to the papal see, and, besides that, the lordship of several cities in Piedmont, and the alliance of the Guelph cities of Tuscany: the advantages which he offered in return being the combined resistance of Italy to the pretensions of Henry VII. The policy of Robert was to temporize, and hold his power in reserve rather than to fight a battle; and he was known to say that he never gloried in the title of poet and philosopher (which he had some claim) than in that of king. His championship of the church lasted from 1310 to 1324, when the Neapolitan and Roman armies were beaten, and Raimond of Cordova, who commanded them, taken prisoner. Robert, however, in the interval, had acquired Genoa, and defended his acquisition with some show of military talent against the Ghibellines of Lombardy, in 1318. In all his other projects he was disappointed. Two attempts to conquer Sicily failed, and his only son, Charles, after being defeated in his attempts to carry on the war, died in Tuscany 1328. Robert

endeavoured to sustain the fortunes of his house, by marrying his daughter, Joan, to Prince Andrew, son of his nephew, Carobert, who had become king of Hungary, with what result may be seen in another article (JOAN OF NAPLES.) He died, esteemed by his own subjects, 1343. [E.R.] ROBERT OF AUXERRE, a French monk, author of a Chronicle of that place, died 1212. ROBERT OF GENEVA, an antipope, elected under the name of Clement VII., in opposition to Urban VI., 1378, died 1394. It was this election which commenced the famous schism of the West. ROBERT OF GLOUCESTER, an old annalist, supposed to have been a monk, reign of Edward IV. ROBERT OF LINCOLN, bishop of that see, and one of the most learned men of his age, died 1253. ROBERT OF VAUGONDY, GILES, geographer to Louis XV., 1688-1766. DIDIER, his son and successor, 1723-1786. ROBERT, F., a French geographer, 1737-1819. ROBERT, the name of several French painters: —NICHOLAS, famous for his miniature animals and plants, 1610-1684. HUBERT, a painter of architecture and landscape, 1733-1808. LEOPOLD, a pupil of David, dist. for his groups, 1794-1835. ROBERTI, GIOVANNI BATISTA, Count, an Italian professor and philosopher, author of metaphysical and literary works, 1719-1786. ROBERTI, J., a learned Jesuit, 1569-1651. ROBERTIS, DENIS DE, an Italian ecclesiastic, professor of philosophy and theology at Paris, dist. as an orator, poet, and astrologer, died 1342. ROBERTS, B. C., an antiquar. wr., 1789-1810. ROBERTS, EMMA, an accomplished lady, known as the friend of Miss Landon, and authoress of 'Historical and Biographical Memoirs of the Royal Houses of York and Lancaster,' 'Oriental Scenes,' &c., died at Poonah, in India, 1840. ROBERTS, F., a puritan divine, 1609-1675. ROBERTS, P., a Welch divine, died 1819. ROBERTSON, JOSEPH, a minister of the Church of England, author of an 'Introduction to the Study of Polite Literature,' an 'Essay on Female Education,' and other works, 1726-1802. ROBERTSON, S. G., a Fr. aeronaut, died 1837. ROBERTSON, THOMAS, a dignitary in the church in the reigns of Mary and Elizabeth, author of some grammatical tracts in Latin, 16th ct. ROBERTSON, DR. WILLIAM, was born in 1721, at Borthwick, in Mid-Lothian, where his father was then the parish minister. He went through the usual education for the Church of Scotland, and in his twenty-second year became minister of the rural parish of Gladsmuir, in Haddingtonshire. He speedily displayed, in the ecclesiastical courts, that ability as a debater and orator, which afterwards, assisted by the weight of his literary reputation and his exemplary character, made him the leader of one of the two great parties in the church. In his retired manse he busied himself also with literature, associated with the men of letters who were then gathered in the Scottish capital, and in 1755-6 co-operated with Blair and Adam Smith in their attempt to establish an 'Edinburgh Review.' There, too, he wrote his first historical work, 'The History of Scotland during the Reigns of Mary and of James VI.' It was received with great favour, and appreciated by none more highly than by David Hume,

between whom and Robertson there was a cordial good-will, in spite of literary rivalry and serious differences of opinion. Both in this and in his other works, Robertson shows himself an admirable story-teller, writing with remarkable animation, and in a style which, though not possessing Hume's ease, is wonderfully correct; and he was also a conscientious and successful investigator of original authorities. In the year of his first publication he removed to Edinburgh, being appointed to one of the city churches; and in 1762 he became also Principal of the University. About this time he refused a proposal from the government to take orders in England, with a view to his being made a bishop; and in 1764 he was named historiographer-royal for Scotland. His literary industry was not checked, either by his success, or by his multifarious occupations and his close attention to his pastoral duties. In 1769 he published his most masterly work, 'The History of Charles V.' and two other productions less valuable followed; the 'History of America' in 1777, and 'An Historical Disquisition concerning Ancient India' in 1791. Of his pulpit eloquence, to which a warm tribute is paid by Dr. Erskine, his friendly colleague, though his opponent in the church courts, no specimen has been printed except one sermon. His death took place in 1793. [W.S.]

ROBERTSON, WILLIAM, an Irish divine, author of 'An Attempt to Explain the words Reason, Substance, Person, Creeds, Orthodoxy, Catholic Church, Subscription, and Index Expurgatorius.' For this publication he was rewarded by the university of Glasgow with the degree of D.D., and was afterwards master of the Wolverhampton grammar school, 1705-1783.

ROBERTSON, W., a grammarian, 1650-1686.

ROBERVAL, GILES PERSON DE, an eminent geometer, professor of mathematics in the College Royal of France, author of numerous memoirs, and party to a controversy with Descartes, 1602-1675.

ROBESPIERRE, FRANÇOIS JOSEPH MAXIMILIEN ISIDORE, the chief actor in the French revolution, was born at Arras in 1759. His father was of English origin, by profession an advocate, and though not rich, as few could be at a provincial bar, he was sufficiently well off to pay for the education of his children. Maximilien, therefore, was sent to Paris, and educated for the same profession, at the college of Louis le Grand, where Camille Desmoulins was his fellow-student. At the outbreak of the revolution he was but thirty years of age, yet he had already acquired a literary and professional celebrity in his native province, and possessed so much of the public confidence that he was sent as a deputy to the estates-general. Like many others in that assembly whose names, in the course of the next five years, filled every mouth in Europe, Robespierre was unknown and unmarked as a man of any likelihood, and was destined to remain so until the popular applause had been exhausted by a Necker, a Lafayette, and a Mirabeau. Of all those assembled, however, he was the only man who went with a predetermined conviction, with a design as complete as his own devotion to it proved to be constant, and with a nature so impassible that his heart would never prevent him from adopting whatever means might recommend themselves to

his conscience as necessary. His character was that of a man formed by study, whose sentiments were fashioned as of cold, polished steel, whose sense of justice, if it came warm from the heart in early youth, had hardened into marble, a man in its proportions, incorruptible in its nature, but statue-like in its frigid insensibility. It was Robespierre as he played his part on the stage of public events, yet this man apparently so sensible, had a brother whom he loved, and in return almost idolized him; a sister to whom he had given up the little independence he had inherited from his father; and all those cherished memories of a first love, to which the heart secret clings but the more fondly, as the outward features are moulded into indifference by disappointment. To state the whole truth, the friends of Robespierre, and his political colleagues, exhibited the utmost devotion for his person, and the object of a later attachment, on his part, could not comprehend the maledictions heaped upon his memory; he was so pure, so virtuous, so gentle she remembered him! These facts may be incomprehensible, but they are such as we find on record, and no public life can be understood if the private character and the circumstances created by it are insufficiently known. Robespierre's sense of justice, and his indifference to the means of accomplishing it, may account for his public influence; but they would leave the devoted friendship of Lebas, a St. Just, and of a brother well acquainted with his private life inexplicable unless there was some chord in his heart that responded to it. The secret of that devotion must be sought in the knowledge of his character, and their admiration of the perfect command that Robespierre possessed over his sensibilities, and the subjugation of the whole nature to a stern logic, working by mathematical rule, and resolved to extract the symmetrical order of his dreams out of the elements around him, regardless of all human feeling. For a long time this disposition remained unknown, and few could have supposed that his stern manners and his sickly countenance concealed real hero of the revolution. Such, however, was the fact. Robespierre was deeply read in the history of the Grecian and Roman republics, and to his admiration for the examples set by the states and heroes of antiquity, may be mentioned *Contrat Social* of Rousseau. These were the models according to which he had formed his ideal of a state, and whether a Mirabeau declaimed in the tribune, or a Necker and a Roland contrived in cabinet, he advanced stealthily, but with a determined certainty, towards his object. During the sittings of the estates-general, he was the observer of those who represented public opinion in that body, but said little himself; but when discussion of the constitution came on, he frequented the tribune, and grew bolder in the expression of his republican sentiments as he found them acceptable to the people. Trial by jury, enfranchisement of the slaves, the liberty of the press, the abolition of capital punishment, were among the special subjects advocated by him. It was on a question of very different import, however, that he was first recognized as the man of the people. We must here briefly review events. May, 1789, the states-general had assembled

ersailles. In June, the third estate or commons had virtually rebelled against the crown, and being named by some of the clergy and nobility, had assumed the title of a national assembly, against which the guards had refused to act. In July the castle was destroyed, the national guard enrolled under Lafayette, and the 'Rights of Man' promulgated as the basis of a constitution; the national assembly then changed its title to that of constituent assembly. In the course of the next three months the revolutionary journalism commenced, and the creation of clubs; the first of these was the *Breton's Committee*, which changed its name successively to *French Revolution Club*, *Club of*

[Hall of the Jacobins.]

Friends of the Constitution, and *Jacobin's Club*, called from its meeting in the hall of a Jacobite convent; it was definitively formed on the 6th of October, 1789. Soon after it the *Cordeliers*, a more violent body, agitated by Danton and Guille Desmoulins, was formed; and, in May, 1790, the *Club of Feuillants*, which was intended totally the constitutionalists against the Jacobins. None or other of these clubs all the characters who figured in the reign of terror rose to note, and most of the orators in the constituent assembly were in alliance with them. Chief of these was Mirabeau, who died suddenly in March, 1791, and with him expired the hopes of the court ever to come to an understanding with the people. Shortly after, therefore, in the month of June, the king as the royal family attempted to fly, and being arrested at Varennes, were brought back to Paris. This was Robespierre's opportunity. The people had lost their idol in Mirabeau, and were now in a state of the highest excitement and exasperation. The orator addressed the assembly in the dispassionate and well-studied periods customary with him, and demonstrated by arguments drawn from antiquity, and by quotations from the *Contrat Social*, that the king was responsible to the people as their chief magistrate, intrusted with certain executive functions, but himself forming no part of the national representation. From this moment Robespierre took the place up to which he had steadily advanced from the beginning, as chief of the revolutionary movement, and he now began to hint that the constitution was only a first step in the end to be achieved. Soon after, in September, 1791,

that document was completed and formally accepted by the king; and, the day following, the first biennial parliament, or legislative assembly, met for business; this body was composed wholly of new members by the advice of Robespierre, who was crowned with oak leaves, and being placed in a carriage, from which the horses had been detached, was drawn through the streets by the enthusiastic people, who proclaimed him the 'real defender of their rights.' In the June previous Robespierre had been appointed public accuser at the criminal tribunal of Paris, and he retained this function till April, 1792, when he resigned it in order to devote himself to the popular cause in the Jacobin's Club. He studiously preserved himself free from all taint of violence or inconsistency, and yet acquired such influence in this body that he was named one of the new municipality after the insurrection of August, and in this capacity had to bewail the prison massacres; on this occasion he betrayed more sensibility than on any other in the course of his history. The convention met in Sept., and Robespierre, supported by an immense popularity, became one of its members, and entered upon the last eventful stages of his political journey. The first event was an accusation commenced against him by Barbaroux, who accused Robespierre of an attempt to concentrate the public authority under his own hands in the Paris municipality; this, however, ended in words. The fate of the king was then decided on by the majority of all parties. Robespierre said little, but his words were, as usual, cold and decisive; there was no rational doubt that the king must die, though he said it with regret, in order that the republic might live. The temper and policy of Robespierre was that of reason incarnate, and the lives of men, or thousands of men, were admitted into his balance of probabilities, as so many figures in a mathematical problem. The fate of the king and the other members of the royal family hardly required the acceleration given to it by his hand; the real struggle for him, as he felt conscious, was with the two great parties who would resist the dictatorship at which he was determined to arrive; these were the *Girondins* and the *Montagnards*, the former including nearly all the respectability, talent, and eloquence of France; and the latter, the atheism and immorality. Robespierre's calculation of means was admirably ingenious, but it was still such as the circumstances dictated. The most scrupulous were to be sacrificed first, by aid of those less so; the effect of which would be to throw all the odium of the terror upon the last and worst class, whom the dictator would then, in the face of the admiring world, vanquish himself; thus Robespierre the Apollo, born of France the Latona in the midst of her terrors, was to vanquish the dreaded sea monster, and institute the new Pythian games. This programme was exactly followed. The struggle with the Girondins was terminated by the proscriptions of the 31st May and 2d of June, 1793; the Dantonists, who stood next on the roster, fell with their chief on the 5th of April, 1794; and there now remained the vile faction of Hebert and Chaumete. Perhaps Robespierre had not calculated on the remains of the vanquished parties forming a coalition with these scoundrels against him; such, however, was the case when he commenced

the last struggle, by calling the Jacobin leaders and proconsuls to account for their atrocities. The critical hour was the 27th of July, 1794, called, according to the Republican calendar, the 9th Thermidor. A month previous Robespierre had withdrawn from the Committee of Public Safety, and completely isolated himself from the men he had doomed to destruction; in this interval the committees of death (those of Public Safety and General Surety) had grown more insatiate of blood daily. In a speech of remarkable daring Robespierre apostrophized the men of violence, and, as he well knew, staked his life upon the issue of it in the convention. The conspiracy against him in that body instantly betrayed itself, and he proceeded to the club of Jacobins; their enthusiasm was immense, and they urged him to arrest the two committees, and march upon the convention. This he absolutely refused to do, as an act that would brand him with the name of tyrant, and the next day, repeating his visit to the national representatives, was arrested by that body in the midst of a tumultuous scene; the younger Robespierre, Lebas, St. Just, and Couthon, stood by him nobly, and became his fellow-prisoners. There might now have been a fierce struggle, but Henriot, mad with drunkenness, who should have headed the troops of the municipality, was arrested by the officers of the convention at the very moment when the prisoners were released and conveyed to the Hotel de Ville by Fleuriot, Pagan, and Coffinhal. Robespierre remained passive, and refusing to lend his sanction by word or gesture to any illegal act against the convention, was seized again by the soldiers of Barras, a small party of whom, conducted by Leonard Bourdon, forced their way into the *Salle de l'Egalité*. Here, it has been repeatedly said, Robespierre attempted to destroy himself, and was found with his jaw shot through; it is now proved, however, that it was the cowardly act of his enemies as they entered the room. He spoke no word and betrayed no emotion after his arrest, though he was subjected to every conceivable indignity and insult. The formalities at the bar of Fouquier Tinville soon gone through, Robespierre and his party were conveyed to the scaffold. His end is thus recorded: 'Before the knife was loosened the executioners pulled off the bandage which enveloped his face, in order to prevent the linen from deadening the blow of the axe. The agony occasioned by this drew from the wretched sufferer a cry of anguish that was heard to the opposite side of the Place de la Revolution; then followed a silence like that of the grave, interrupted, at intervals, by a dull sullen noise; the guillotine fell, and the head of Robespierre rolled into the basket. The crowd held their breath for some seconds, then burst into a loud and unanimous cheering.' It was the second day only after Robespierre had made his last desperate effort for the Republic in the National Convention, July 28th, 1794. [E.R.]

ROBESPIERRE, AUGUSTIN BON JOSEPH, called the *Younger*, brother of the preceding, was born at Arras 1764, and became a deputy to the convention 1792. He was the devoted friend of his brother, and came forward to share his fate in the convention on the 8th Thermidor: the previous year he had opposed himself with great

courage to the sanguinary proceedings of the consuls. When his brother was arrested, Lebas had shot himself dead, Augustin threw himself from a window of the Hotel de Ville, which, however, only broke his leg. He was executed with the elder Robespierre and his colleagues following day.

ROBESPIERRE, CHARLOTTE, sister of preceding, took up her abode at Paris when t became members of the convention, and had her admirer Fouché, who was no favourite of dictator. She was arrested on the 9th Thermidor but soon after set at liberty and pensioned. 'Memoirs' contain some interesting particulars. Died at Paris 1834.

ROBILANT, ESPRIT BEN NICOLAS DE, a French officer, engineer, and mineralog., 1724-18

ROBIN, JEAN, a French botanist, keeper the Garden of Plants, 1550-1597. His account the king's garden was published 1601. **VESLIAN**, a brother of Jean, was also a botanist.

ROBINET, J. B. R., a Fr. writer, 1735-182

ROBINS, BENJAMIN, an eminent mathematician and engineer of artillery, employed by East India Company. He wrote several works on gunnery and mathematics, and is said to have written the narrative of Anson's voyage, 1707.

ROBINS, J., an astronomer, died 1558.

ROBINSON, ANASTASIA, daughter of a trait painter, and pupil of Dr. Crofts in music distinguished as a vocalist and opera actor. quitted the stage on account of her marriage to earl of Peterborough; died 1750.

ROBINSON, MARY, a woman of great be known as an actress and miscellaneous writer, born at Bristol 1758. She was married w quite a girl to an attorney, and commenced career on the stage under the patronage of (rick, at Drury Lane theatre. She attracted attention of the prince of Wales in the chara of Perdita, in the 'Winter's Tale,' and became mistress for a short time. Her chief means support in after years was the produce of her as a novelist. Died 1800.

ROBINSON, RICHARD, archbishop of Arm and Lord of Rokeby, b. in Yorkshire 1709, d. 1

ROBINSON, ROBERT, a nonconformist miter, born at Swaffham in Norfolk 1735, d. convert to Socinianism 1790. He wrote on question which has again become the subject public discussion, concerning marriage with deceased wife's sister, a 'History of Baptism.'

ROBINSON, THOMAS, a minister of Church of England, author of 'Scripture Characters,' &c., born 1749.

ROBINSON, THOMAS, rector of Ousley, in Ch. berland, an. of works in natural history, died 1

ROBISON, JOHN, professor of natural philosophy at Edinburgh, was born at Boggall, in Shirlshire, 1739, and died in 1805. He is chiefly remarkable as the author of a book which attracted considerable attention at the close of the cent entitled 'Proofs of a Conspiracy against all Religions and Governments of Europe, carried in the Secret Meetings of Free Masons, Illuminati and Reading Societies.' This work ran through four editions in the course of a few months, but now only creates a smile. It contains some curious particulars, however, bearing on the French r

tion. Mr. Robison, when a youth, was attached to the royal navy, and was in the boat with General Wolfe when he landed on the heights of Abraham for the taking of Quebec. He is known as a writer in natural philosophy, and as a contributor to the 'Encyclopædia Britannica.' [E.R.]

ROBORTELLO, FRANCESCO, an Italian philosopher, and editor of Greek classics, 1516-1567.

ROB-ROY, or *Robert the Red*, the popular designation of a Highland freebooter, whose real name was ROBERT MACGREGOR. He was born out 1660, and was a dealer in cattle till the rebellion of 1715, when he joined the army of the pretender. Having lost his estates in this quarrel, he became an outlaw, and his daring adventures of a somewhat chivalrous character, have made him one of the heroes of Scottish romance. He died at an advanced age, probably soon after 1733. He took the name of Campbell in consequence of the Macgregors having been outlawed in the previous century.

ROBSON, G. F., a native of Durham, dist. as a water-colour painter and draughtsman, died 1833.

BOBY, JOHN, a banker of Rochdale, known to literature by his collections of the Traditions of Lancashire, perish. in the 'Orion' steam-boat 1850.

ROBARTI DI PERELADA, JUAN TOMASO, a general of the Dominicans, distinguished as a writer in favour of the papacy, b. in Spain 1624, d. 1699.

ROCCA, A., an Italian ecclesiastic, 1545-1620.

ROCHAMBEAU, JEAN BAPTISTE DONATIEN VIMEUR, Count De, a French marshal, commander of the French forces sent in aid of the Americans, author of 'Memoirs,' 1725-1807. His son, DONATIEN MARIE JOSEPH, born 1750, killed in the battle of Leipzig 1813.

ROCHE, E. DE LA, a Fr. mathematic., 16th cent.

ROCHE, J. DE., a French commander, of Swiss descent, famous for his defence of the castle of Nemont against the duc de Rohan in 1621. It is remarkable that his portrait, still in possession of the family, bears a striking resemblance to that of Oliver Cromwell.

ROCHE, J. B. L. DE LA, a doctor of the Sorbonne, au. of a panegyric of St. Genevieve, d. 1780.

ROCHE, P. L. LEFEBVRE DE LA, a French essayman and learned writer, about 1740-1806.

ROCHE, REGINA MARIA, an English novelist, au. of 'The Children of the Abbey,' &c., 1765-1845.

ROCHE, SOPHIE DE LA, a Ger. novelist, daughter of a physician named Guttermann, 1750-1807.

ROCHE-AYMOR, CHARLES ANTOINE DE LA, a cardinal and archbishop of Rheims, 1692-1777.

ROCHECOTTE, F. GUYON, Count De, a military general, b. 1769, shot as a conspirator 1798.

ROCHE-FLAVIN, BERNARD DE LA, a French jurist and historian of the parliaments, 1552-1627.

ROCHEFORT, W. DE, a Fr. writer, 1731-88.

ROCHEFOUCAULD, F. DE LA, bishop of Sens, cardinal and Rom. ambassador, 1558-1645.

ROCHEFOUCAULD, FRANCIS, Duc De La, au. of 'Marsillac,' a famous name in French literature, and in the troubles of the Fronde, 1613-20. Several others of the name have been distinguished at later periods of French history, and the last duke of this house was massacred at the Bayonne prison, in September 1792.

ROCHEJAQUELEIN, HENRI DE LA, a famous chief of La Vendée, who became generalissimo

at the age of twenty-two, and sustained a struggle with the republican troops for ten months with great skill and intrepidity, born 1773, killed at Nouaillé 1794.

ROCHELLE, B. LA, a Fr. actor, 1748-1807.

ROCHESTER, JOHN WILMOT, earl of, a profligate favourite and wit of the court of Charles II., born 1648, died prematurely, worn out with his debaucheries, 1680.

ROCHON, A. M. DE, a Fr. astron., 1741-1817.

ROCHON DE CHABANNES, MARC ANTOYNE JAMES, a French dramatic writer, 1730-1800.

ROCKINGHAM, CHARLES WATSON WENTWORTH, second marquis of, leader of a section of the Whig party, and prime minister, was born in 1730, and succeeded to the estates and dignities of his father in 1750. On the accession of George III. party feeling ran high, and was greatly aggravated by the intrigues of the sovereign with his favourite, Lord Bute. These circumstances rendered it difficult to keep a ministry together, and recourse was frequently had to politicians of very middling qualifications. Such was Lord Rockingham, a man of unostentatious integrity and sound constitutional feeling, but on the other hand, neither a great orator, nor a statesman of very brilliant parts. He became minister in July, 1765, when the Grenville ministry was turned out, during the debates on the regency bill, which had become necessary in consequence of the mental afflictions of the king. The first measure of the marquis of Rockingham was the repeal of the American stamp act, which had received the royal assent in the March previous, but he reserved to parliament the right of taxing the colonies, and proceeded quietly with some constitutional reforms, such as the prohibition of *general warrants*. He also encouraged trade, in the way of protection from competition, then, and till lately, the political fashion. The weakness of this ministry yielded place to that of Pitt, afterwards earl of Chatham, in June, 1766, and when the latter was succeeded by the administration of Lord North, the marquis of Rockingham went into opposition with the Whig chief. He became minister again after the fall of Lord North in March, 1782, but retired from office and from the world on the succeeding 1st of July. In this latter period Lord Rockingham appears to have been willing to sanction some measure of parliamentary reform, but it would be difficult to believe he was equal to any great emergency. A *jeu d'esprit* of the times runs thus:—

'Truth to tell, if one may without shocking 'em,
The nation's asleep, and the minister—Rockingham!'

[E.R.]

ROCOCLES, J. B., a Fr. historian, died 1696.

RODE, CHR. BERNARD, a German painter and engraver, 1725-1797. His brother, J. HENRY, an engraver, 1727-1759.

RODE, P., a French violinist, 1774-1833.

RODELLA, J. B., an Italian writer, 1724-94.

RODERIC, or RODERIQUE, last king of the Visigoths of Spain, killed in battle 711.

RODNEY, GEORGE BRYDGES, Lord, a famous British admiral, was son of a captain in the navy, and was born at Walton-on-Thames 1718. His principal services were the defeat of L'Etendiere's squadron, 1747; the bombardment of Havre, and the destruction of the stores intended for the

invasion of England, 1759; the capture of several islands in the West Indies, 1761; the defeat of a Spanish fleet under Langara, near Cape St. Vincent, and of the French near Martinique, 1780; and the victory over De Grasse, the best remembered of his achievements, 1782. For his long continued services to the nation, Rodney was rewarded with a baronetcy, and a pension, in the whole, of £4,000 per annum. Died 1792.

RODOLPH OF HAPSBURGH, first emperor of Germany of this name, was born 1218, and succeeded his father, Albert the Wise, as count of Hapsburgh 1240. In 1273 he was elected king of the Romans. In 1278 he defeated Ottocar, king of Bohemia, which enabled him to confer Austria, Styria, and Carniola on his son, Albert; died 1291. **RODOLPH II.**, born at Vienna 1552, was crowned king of Hungary 1572, king of Bohemia and king of the Romans 1575, and emperor on the death of his father, Maximilian II., 1576. He lost the kingdoms of Hungary and Bohemia by the revolt of his brother, Mathias, and died 1612.

RODOLPH I., king of Burgundy, shared the throne with his father, Conrad II., count of Auxerre 886, took the title of king 888, died 912. **RODOLPH II.**, his son and successor, made himself king of Italy 922, and, on renouncing this enterprise, founded the kingdom of Arles and Burgundy 933; died 937. **RODOLPH III.**, called the *Devout*, and the *Do-nothing*, grandson of the preceding, born 993, succeeded his father, Conrad, 994, died 1032.

RODOLPH, three dukes of Saxony:—**RODOLPH I.**, son and successor of Albert II., reigned 1298-1356. **RODOLPH II.**, son and suc. of Rodolph I., 1356-1370. **RODOLPH III.**, nephew of the latter, succeeded 1388, died a prisoner in Bohemia 1418.

RODOLPH, the *first* of the name, count palatine, succeeded his father, Louis II., 1294, declared against Albert, duke of Austria, in favour of Adolphus of Nassau 1300, died in England 1319. The *second* of the name, son of the preceding, succeeded his brother, Adolphus, 1327, concluded a peace with the emperor, Louis of Bavaria, 1329, d. 1353.

RODOLPH, count of Rheinfelden and duke of Suabia, elected king of Germany 1077, killed 1080.

RODON, or **DE RODON**, **DAVID**, a French professor of philosophy and reformer, died 1664.

RODRIGUEZ, **ALPHONSO**, a Jesuit of Valladolid, whose work on Christian Perfection ranks high in mystic divinity, and has been translated into all the European languages, 1526-1616.

RODRIGUEZ, **A. J.**, a theologian, 1705-1781.

RODRIGUEZ, **J.**, a Portug. missy., 1559-1633.

RODRIGUEZ, **V.**, a Sp. architect, 1717-1785.

RODWELL, **GEORGE HERBERT**, an English composer and writer, died 1851.

ROE, **SIR THOMAS**, a native of Essex, distinguished as a traveller and diplomatist, was born at Low-Layton about 1580, and was knighted by James I. in 1604, soon after which he was sent by Prince Henry to make discoveries in America. His public life commences in 1614, when he was sent ambassador to the Great Mogul, at whose court he continued till 1618. The remainder of his life was fully occupied with political embassies, and his parliamentary duties as member for Cirencester and for the university of Oxford; died 1644.

ROEBUCK, **JOHN**, a physician and experi-

mental chemist, born at Sheffield 1718, died, ruining himself by his projects, 1794.

ROEDERER, **COUNT**, a French statesman, professor of moral science and politics, 1754-1810.

ROEHL, **L. H.**, a Ger. astronomer, died 1771.

ROEL, **HERMANN ALEXANDER**, a protestant German divine and Cartesian philosopher, d. 1771.

ROELAS, **J. DE LAS**, a Sp. painter, died 1711.

ROELAS, **P. DE LAS**, a Spanish painter, taken by Titian, and regarded as the rival of Michelangelo, 1560-1620.

ROEMER, **O.**, a Danish astronomer, 1644-1718.

ROENER, **J. J.**, a Swiss botanist, 1761-1818.

ROEPEL, **C.**, a Dutch painter, 1679-1748.

ROESEL, **A. J.**, a German painter, 1705-1818.

ROESTRAETEN, **P.**, a Dutch portrait painter who distinguished himself in England, 1627-1718.

ROGER, the name of several European princes.—**ROGER I.**, count of Sicily, is known to us from 1058 to his death in 1101. **ROGER II.**, of the preceding, became king of Sicily 1130, died 1154. A cousin of the latter, **ROBERT, count of Apulia**, succeeded his father, Robert Guiscard 1085, died 1111. **ROGER I.**, count of Carcassonne, reigned 1130-1150. **ROGER II.**, whose reign was greatly disturbed by quarrels with Raymond, count of Toulouse, 1167-1194. **ROGER OF MONTGOMERY**, count of Alençon, nephew of William the Conqueror, succeeded 1070, and, having accompanied William to England, commanded his vanguard guard at the battle of Hastings, and created earl of Shrewsbury, died 1094.

ROGER, or **RICHARD**, of HEXHAM, a monk of that abbey, known as an historian, 12th cent.

ROGER OF HOVEDEN. See **HOVEDEN**.

ROGER, **A.**, a Dutch protestant, 17th cent.

ROGER, **E.**, a French missionary, 17th cent.

ROGER, **F.**, a French author, 1776-1842.

ROGER-MARTIN, a French mathematician and physician, mem. of the council of 500, 1741-1818.

ROGERS, **B.**, an English composer, 17th cent.

ROGERS, **C.**, an antiquarian, 1711-1784.

ROGERS, **D.**, a statesman, about 1540-1541.

ROGERS, **G.**, an episco. clergyman, 1741-1818.

ROGERS, **JOHN**, the first martyr of the reign of Queen Mary, was first known as chaplain at Antwerp, and afterwards as collaborateur of Coverdale in effecting a translation of the Bible. He preached against popery at St. Paul's Cross immediately after the accession of Mary, was burnt at Smithfield, February 4, 1555.

ROGERS, **JOHN**, rector of St. Giles's, Cripplegate, and a writer against Hoadley, 1679-1728.

ROGERS, **THOMAS**, chaplain to Bancroft, bishop of London, author of several works, 1568-1611.

ROGERS, **THOMAS**, an episcopal clergyman, author of 'Providence Displayed in the Conversion of King William and Queen Mary,' 1660.

ROGERS, **WOODS**, a famous naval commander and circumnavigator of the globe, died 1732.

ROHAN, a noble French family, numbering following eminent churchmen:—**ARMAND DE ROHAN**, cardinal and bishop of Strasburg, 1674-1741.

ARMAND, called the cardinal of Soubisse, grandson of the preceding, and holder of the highest dignities, 1717-1756. **ARMAND JULE**, his son, cardinal and archbishop of Rheims, 1695-1741.

LOUIS CONSTANTINE, brother of the latter, cardinal and bishop of Strasburg, 1697-1779. **LOUIS**

RENE EDWARD, Prince De Rohan, ambassador to Vienna, bishop of Strasburg, cardinal and grand-marshal of France, best known by the affair of the diamond necklace, 1734-1803. J. H. MERIADEC, prince De Rohan-Guéméné, elder brother of the eckle cardinal, born 1726, rendered himself notorious by his prodigalities, and by his failure for more than a million sterling in 1783. LOUIS RANCIS AUGUSTUS, Duc De Rohan-Chabot, and lieutenant-general in the French army, born 1733, as massacred at the Abbaye prison 1794. LOUIS RANCIS AUGUSTUS, Duc De Rohan-Chabot, prince of Leon, and cardinal, a descendant of the countmores by his mother, 1788-1833. Besides these, are the names distinguished in the religious wars, as follows:—

ROHAN, HENRY, Duc De, and prince of Leon, one of the most distinguished characters of his age, was born in Brittany 1579, and first acquired distinction at the siege of Amiens under Henry IV., when in the sixteenth year of his age. He came chief of the Calvinist party on the accession of Louis XIII., and acted a principal part in the insurrection of 1620, and all the ensuing wars. He was a great political writer, and has left memoirs which are highly valued by historians. Died of his wounds, received at the battle of Rheinfeld 1638. His wife, MARGARET DE BETHUNE, daughter of Sully, famous for her heroic defence of Castres against the Maréchal de Themines in 1625, died 1660. His sister, ANNE, distinguished her courage at the siege of Rochelle, and for great learning and capacity, 1584-1646. His brother, BENJAMIN DE ROHAN, lord of Soubisse, was also a Calvinist leader, and died in England, where he had taken refuge, 1630. TANCRED, a famous son of Duke Henry, was killed during the troubles of the Fronde, in the nineteenth year of his age, 1649.

ROHAN, LOUIS, Prince De, or *Chevalier de Rohan*, b. abt. 1635, executed for conspiracy, 1674.

ROHAULT, J. a Cartesian philos., 1620-1675.

ROHDICH, F. W., a Prussian general, 1719-96.

ROI, GILBERT, a French juriconsult, 16th cent.

ROKES, H., a Dutch painter, 1621-1682.

ROLAND, the supposed nephew of Charlemagne, popular hero of the romance of chivalry, killed at the battle of Roncevaux 778.

ROLAND, count of Savoy, died 1263.

ROLAND, P. L., a French sculptor, 1746-1816.

ROLAND DE LA PLATIERE, JEAN MARIE, born at Villefranche, in the neighbourhood of Lyons, 1732, was Inspector General of manufactures and commerce in that city when the French revolution commenced, and having embraced popular principles, became, in 1790, member of the Lyons municipality. In February, 1791, he was sent to Paris as deputy extraordinary, to defend the commercial interests of Lyons in the committees of the Constituent Assembly, and remained there seven months, accompanied by his wife-hearted wife, who is the subject of the following notice. This period dates from the contemplated flight of the king, just before the death of Mirabeau, to the dispersion of the assembly at the acceptance of the new constitution, and made the Rolands acquainted with the rising popularity of Robespierre and the Girondins, who were not yet divided into distinct parties. They

now returned home to La Platière for a short period, but in December returned to Paris: the office of inspector having been abolished, Roland had to claim a retiring pension; but he was also invited back by the patriots to take a part in the movement, for at this juncture the invasion of the emigrants was impending, and the veto of the king had brought the parliament to a stand-still. The practical philosophy, commercial knowledge, and strict simplicity of Roland, recommended him to men of all parties, and when the patriot ministry was formed in March, 1792, he was made minister of the interior. He kept his position till 13th June, when the royal veto upon the proposal to form a patriot camp around Paris, and upon the decree against the priests, provoked his celebrated letter to the king, written, however, by Madame Roland, and, as a consequence, his almost instant dismissal. This event was followed by the arrival of the Marseillaise in Paris, and the conflict at the Tuileries, on the 10th of August, when Roland was recalled, and Danton became minister of justice. The struggle between the Girondists and the municipality under the guidance of Robespierre filled up the period till the 31st May; the former party were then vanquished, and Roland was among the number who saved their lives by flight. He found an asylum with his friends at Rouen, but deliberately killed himself with his cane-sword on hearing of the execution of his wife, 15th November, 1793. His body was found by the road-side, and a paper in his pocket contained his last words, among which were these:— 'Whoever thou art that findest these remains, respect them, as those of a man who consecrated his life to usefulness, and who dies as he has lived, virtuous and honest. . . . On hearing of my wife's death I would not remain another day upon this earth so stained with crimes.' [E.R.]

ROLAND, MANON JEANNE PHILIPPON, MADAME, wife of the preceding, and herself the spirit of the Girondin party, was the daughter of a Paris engraver, and was born in that city 1754. She was the only child of nine left to the care of her father, who provided her with masters regardless of expense, and gave her a brilliant education; the best ground for which existed in her native talents, her firm spirit, her personal beauty, and her undoubted virtues. Antiquities, heraldry, philosophy, and, among other books, the Bible, made up her earliest studies; her favourite authors, however, were Plutarch, Tacitus, Montaigne, and Rousseau. She became the wife of Roland in 1779, and as her love for him was founded on his antique virtues and his philosophic spirit, she has been called 'The Heloise of the eighteenth century.' he was also twenty years her senior. She became the sharer in all his studies, aided him in editing his works, and during his two ministries acted as his secretary, and entered into all the intrigues of his party without debasing herself by their meanness. She was the angel of the cause she espoused, the soul of honour and the conscience of all who embraced it; while her boldness, her political sagacity, and her sarcastic eloquence were equally dreaded by their adversaries. After the flight of her husband, Madame Roland was arrested by order of the Paris commune, under the dictation of Marat and Robespierre, and consigned to the

Abbaye prison, from which, on the 31st of October, she was removed to a more wretched abode in the Conciergerie. When sentenced, at the bar of Fouquier Tinville, she was eager to embrace her fate, and rode to the guillotine clad in white, her glossy black hair hanging down to her girdle. She declared her conviction that her husband would not survive her. On the scaffold, this noblest victim of the cause in which she suffered, apostrophized the statue of liberty, and bowing her head before it exclaimed 'Ah Liberty! what crimes are committed in thy name!' The moment before, she had asked for pen and paper 'to write the strange thoughts that were rising in her,' a request which was refused. She was executed on the 8th of November, 1793. Besides her miscellaneous works, Madame Roland left *Memoirs* composed during her captivity, and a last affecting composition in the Counsels of a Letter, addressed to her little girl; the former, it is suspected, have been since tampered with. [E.R.]

ROLANDER, DANIEL, a Swedish naturalist and traveller, flourished about 1720-1776.

ROLANDINO, an Ital. chronicler, 1200-1276.

ROLANDO, L., an Ital. anatomist, 1775-1831.

ROLDAN, PETER, a Span. sculptor, 1624-1700.

LOUISA, his daughter and assistant, 1654-1704.

ROLLA, A., a French violinist, 1757-1837.

ROLLE, H., an English lawyer, 1589-1656.

ROLLE, M., a Fr. mathematician, 1652-1719.

ROLLI, P. A., an Italian poet, 1687-1767.

ROLLIN, CHARLES, a celebrated popular writer, historian, and Latin poet, b. at Paris 1661, d. 1741.

ROLLO, the leader of an adventurous band of Normans, who conquered the French province named after them in the 9th century, was the son of a Norwegian earl, named Ragnvald, whose father, again, was one of the petty chiefs or kings of Drontheim. This is the highest point to which his ancestry can be traced, notwithstanding the mistaken zeal of genealogists in honour of the English sovereigns descended from William the Conqueror. The circumstances which produced the expedition of Rollo, were briefly these. Harold Harfagra having, from 870 to 880, made himself master of all Norway, which had previously been divided into several petty states, caused many Norwegian chieftains to emigrate, who sought fresh homes in Iceland, the Orkneys, and the isles of Faro and Shetland, and infested the northern seas with their piratical excursions. One such was this Rolf, or Rollo, who, prohibited from ever returning to Norway by Harold, retired to the Hebrides, where many of the Norwegian nobility had taken refuge. His first attempts at the head of these adventurers were against England, but the order established by Alfred rendered his efforts fruitless. He then tried the security of the coast of France, and venturing up the Seine took Rouen, at that time called Neustria, from whence he proceeded to the siege of Paris. Charles the Simple, king of the Franks, was glad to purchase a peace by ceding the territory already conquered by Rollo, and which is supposed to have comprised that part of the ancient Neustria which corresponds to the department of the *Seine Inférieure*, and a portion of the department of the *Eure*. He also gave him his daughter, Giselle, in marriage. The bargain was concluded

at St. Clair in the year 912, soon after which Rollo, or Raoul I., as he was afterwards called was baptized by the archbishop of Rouen, in the cathedral of that city. He is said to have exhibited all the virtues of a religious, wise, and liberal prince; he was also intrepid as a warrior and of such a noble stature that no horse could carry him. Rollo died in 917, or, according to other accounts, in 932, and was succeeded by his son, William, surnamed Long-Sword. [E.R.]

ROLLOCK, R., a Scottish divine, 1555-1598.

ROLT, RICHARD, supposed to have been born at Shrewsbury 1724 or 1725, a miscellaneous writer and historian, time of Johnson, died 1770.

ROMAGNOSI, GIAN DOMENICO, a distinguished political economist, b. at Piacenza, 1761, d. 1832.

ROMAINE, WILLIAM, born at Hartlepool, the county of Durham, 1714; distinguished as a religious writer and divine of Calvinistic principle. After several curacies he was successively chaplain to the Lord Mayor, 1741; lecturer to the united parishes of St. George's, Botolph Lane, and St. Botolph's, Billingsgate, 1748; lecturer to St. Dunstan's-in-the-West, 1749; assistant morning preacher at St. George's, Hanover Square, 1755 and rector of St. Anne's, Blackfriars, 1761. About 1752, he was also appointed professor of astronomy in Gresham College, but is said to have resigned in consequence of his zeal for the doctrines of Hutchinson. His principal works are: 'Discourses upon the Law and Gospel,' 'The Law of Faith,' 'The Walk of Faith,' 'The Triumph of Faith,' 'Doctrine of the Sacrament,' and an enlarged edition of Calasio's Hebrew Concordance and Lexicon. He acquired considerable popularity by writing against the naturalization of the Jews, a measure then under discussion in parliament. Died 1795.

ROMAN, JOHN HELMICH, a Swedish musician, time of Ulrica Eleonora, 1694-1758.

ROMAN, J. J. T., a French writer, 1726-1797.

ROMANA, DON PETER CARA Y SUREDA, M.QUIS DE LA, a Spanish general, 1761-1811.

ROMANELLI, ABBE D., an antiquary and topographer of Naples, 1756-1819.

ROMANELLI, GIOVANNI FRANCESCO, an Ital. painter, 1617-1662. His son, URBAIN, 1638-1700.

ROMANINE, G., an Italian painter, famous as an imitator of Titian, 16th century.

ROMANO, ECCELINO, or EZZELINO, DA SERRAVALLE, an Italian warrior, distinguished in the second crusade under Conrad III. 1147, died soon after 1175. son, of the same name, succeeded to his father's lordship, and became a distinguished Ghibelline chief, died after 1235. The son of the latter, of the same name, born 1194, was invested by father, in 1215, with the principality of Bassano and greatly increased his power. Such was tyranny that Alexander IV., in 1256, proclaimed a crusade against him, and he fell at Cassano, September 16, 1259. His brother, ALBERT, ruled at Treviso, was hunted down and killed together with all his family, by the Guelphs, 1274.

ROMANO, GIULIO, the name by which GIOVANNI PIPPI, or rather DE GIANNUZZI, is commonly known, was born at Rome in 1499, and early distinguished himself as one of the ablest and favourite pupils of Raphael. He completed with Penni (see RAPHAEL) the frescoes of the *Stanza di Costantino* in

Vatican after the death of Raphael, in 1523, and in the following year entered the service of the duke Federigo Gonzaga at Mantua, where he succeeded in establishing a considerable school; the celebrated Primaticcio who carried the Italian principles of painting into France was one of his pupils. Giulio died at Mantua, November 1, 1546, aged only forty-seven, leaving extensive works in fresco and many admirable oil paintings to justify his fame as the principal of all Raphael's scholars. He was also a distinguished architect, and may be considered perhaps the ablest of the Italian ornamental decorators. His principal frescoes are 'The Fall of the Giants,' and the 'Story of Cupid and Psyche,' in the Palazzo del Té at Mantua. A specimen of his fresco painting has been recently presented to the National Gallery by Lord Overstone; as regards oil painting, he is supposed to have had a great share in at least the under painting of the principal of the later pictures of that class by Raphael.—(Vasari, *vite de Pittori*, &c., Ed. orig., 1846, seqq.; Gaye, *Carteggio Inedito d'Artisti*.) [R.N.W.]

ROMANOFF. See MICHAEL.

ROMANUS, a pope of Rome, 897-898.

ROMANUS I., emperor of the East, surnamed *capenus*, was an Armenian soldier, who became the associate of Constantine X., in 919; he was deposed by his sons, Stephen and Constantine, in 945, and died in a monastery, 948. ROMANUS II., died *The Younger*, succeeded his father, son of Constantine X., 959, and died of intemperance, 969. ROMANUS III., called *Argyros*, became emperor by marrying the princess Zoe, 1028; he was ordered by his wife and her paramour, Michael (Michael IV.), 1034. ROMANUS IV., surnamed *Diogenes*, was a condemned conspirator, who was married by Eudoxia, the widow of Constantine III., and associated with her on the throne, 1068. Died, after being deposed and mutilated by Michael (Michael VII.), 1111.

ROMANZOFF, PETER ALEXANDROVITCH, Count, a Russian general, born about 1730, succeeded Prince Galitzin as commander-in-chief against the Turks, 1770. He obtained many advantages, and concluded the treaty of Kainardji, 1774. Named general of the second army directed against the Turks, he threw up his command in 1779, in consequence of his disgust with Potemkin. Died 1796. His son and successor in the title, NICHOLAS, distinguished as a diplomatist, and for the devotion of his wealth to patriotic and benevolent objects, flourished 1753-1826. MICHAEL, Count, brother and heir of the latter, died 1838.

ROMBERG, A., a German violinist, 1767-1821.

ROMBOUTS, T., a Flemish painter, 17th cent.

ROME DE L'ISLE, JEAN BAPTISTE LOUIS, a French physician and mineralogist, 1736-1790.

ROMILLY, JOHN, a watchmaker, born at Geneva 1714, who wrote on horological subjects in the *Encyclopédie*, and in 1777 established the *Journal de Paris*; died 1796. His son, JOHN EUGENE, a Calvinist minister, and writer in the *Encyclopédie*, 1739-1770.

ROMILLY, SIR SAMUEL, was born in London on 1st March, 1757. His father traded as a retail jeweller, but was descended from a French refugee family of consideration, and Romilly when subsequently taunted in parliament about the obscurity

of his origin, could smile at the allusion as peculiarly inapplicable to him, were it even of importance. His education was versatile and undecided, and it was long ere it took its final professional direction, for it was first intended that he should follow his father's trade, and when this view was abandoned he was articulated to an attorney. He was called to the bar in 1783. By that time he had deeply studied his profession. He was at the same time master of a vast quantity of miscellaneous knowledge which, however vaguely and irregularly acquired, was subject to the mellowing influence of his own inquiring and deeply reflective mind. From early youth he was grave, earnest, and sensitive. He perhaps never in any of his sayings or writings approached nearer to wit or fancy than an occasional dry causticity bred of contempt, as when speaking of some complaints that a bill proposed by a very formal lawyer was not drawn like an act of parliament, he said that the writer had certainly defects of style, but that of being unlike an act of parliament was not one of them. He early and almost insensibly obtained a great share of chancery practice. Ever favourable to the progress of constitutional freedom, he naturally took a deep interest in the great questions arising in the land of his fathers. Coming in contact with Mirabeau and other celebrated men of the revolution, they in their turn brought him in alliance with Lord Lansdowne and the heads of the British Whig party. He declined a seat in parliament until he was made solicitor-general by the Whig ministry of 1806. The dissolution of that ministry in a few months concluded his tenure of office, but he cut out a career to himself by remaining in parliament as a law reformer. The main objects for which he fought were the removal of irregularities in the bankruptcy law, the subjection of land like other property to the attachment of creditors, and the institution of moderate and certain for sanguinary and uncertain punishments in the penal law. He was thus the practical experimenter in parliament of the jurisprudential views of Bentham, and the best testimony to their soundness is that they have now been the accepted law of the land for many years. He had married in 1798 a young lady whom he met at Bowood. His affection for her, originally very strong, deepened with advancing years, and her death in the autumn of 1818, so affected his then weakened nerves, that on the 2d of November he put an end to his own existence. [J.H.B.]

ROMNEY, G., an English painter, 1734-1802.

ROMULUS, the supposed founder and first king of Rome, 8th century B.C.

RONALDS, H., an agriculturalist, 1759-1833.

RONCAGLIA, CONSTANTINE, a learned theologian of the duchy of Lucca, 1677-1737.

RONCALLI, CAVAL CRISTOFORO, an Italian painter, b. at Pomarance in Volterra, 1552-1626.

RONDANI, F. M., an Italian painter, 15th ct.

RONDELET, F., a Fr. architect, 1743-1829.

RONDELET, W., a Fr. naturalist, 1507-1566.

RONSARD, P. DE, a French poet, 1524-1586.

RONSIN, C. P., a Fr. dramatist, 1752-1794.

ROOKE, SIR GEORGE, a famous British admiral, was born at his father's seat, near Canterbury, 1650, and was first employed as commodore on the accession of William III. in 1689. In 1692

he was vice-admiral of the blue, and greatly distinguished himself at the battle of Cape la Hogue, on which occasion he was knighted, appointed vice-admiral of the red, and received a pension of £1,000 a-year. In 1702 he destroyed the French and Spanish fleets in Vigo Bay, and on the 22d of July, 1704, assisted at the capture of Gibraltar. Died 1709.

ROOKE, LAURENCE, prof. of anatomy at Gresham College, and mem. of the Royal Soc., 1623-62.

ROOKER, M. A., a landsc. painter, 1743-1801.

ROOS, a family of German painters:—JOHN HENRY, a pupil of Adrian de Bie, 1631-1685. THEODORE, his brother, 1638-1698. PHILIP, second son of John Henry, commonly called Rosa da Tivoli, from his long residence there, a great painter of animals and landscapes, 1655-1705. JOHN MELCHIOR, brother of the latter, 1659-1731. JOSEPH, grandson of Philip, a painter and engraver, about 1728-1790.

ROOSE, NICHOLAS, whose proper name was LIEMACKER, a painter of Ghent, 1575-1646.

ROOSE, T. G. A., a Ger. anatomist, 1771-1803.

ROPER, JOHN, professor of philosophy, and one of the most learned theologians of Oxford, d. 1534.

ROPER, WILLIAM, attorney-general in the reign of Henry VIII., and son-in-law of Sir Thomas More. A Life of More, written by him, was published in 1712. His daughter, MARGARET, was a lady of great accomplishments, and translated Eusebius into English.

ROQUE, G. A. DE LA, a learned heraldist and genealogical writer of Normandy, 1597-1686.

ROQUE, JOHN DE LA, a French writer of his voyages and travels in the East, 1661-1745. His brother, ANTHONY, a journalist, 1672-1744.

ROQUES, PETER, a French divine, 1685-1748.

[House of Salvator Rosa.]

ROSA, SALVATOR, was born near Naples, July 21, 1615. In 1635 he visited Rome and met with much success, and finally settled there, where he died, March 15, 1673. His favourite subjects were landscapes, chiefly of wild and romantic scenery, and these works he executed with consummate mastery. Many of his best pictures are in this country.—(Passeri, *Vite de' Pittori*, &c.—the life of Salvator by Lady Morgan is a romance.) [R.N.W.]

ROSALBA CARRIERA, MADAME, a famous Venetian portrait painter, 1675-1757.

ROSAMOND, commonly called 'Fair Rosamond,' a famous name in our legendary history,

was a daughter of Walter Clifford, baron of Hereford, and mistress of Henry II. One of her sons by him became archbishop of York. The facts of her history are not well ascertained, but she is said to have perished, a victim of the jealousy of Queen Eleanor, about 1173.

ROSAPINA, FRANCESCO, an Ital. engraver, ce for his pictures from the old masters, 1762-1841.

ROSCCELLINUS, RUZELIN, or RUCELIN, an ecclesiastic and scholastic philosopher of Br tany, 11th century.

ROSCHID IBN. See AVERROES.

ROSCIUS, QUINTUS, a celebrated Roman actor and friend of Cicero, to whom he gave lessons of declamation, lived about 129-62 B.C. Another ROSCIUS, proscribed by Sylla, and accused of having slain his father, was like the former a client of Cicero, but little is known of him.

ROSCOE, WILLIAM, was born in 1753, and became an attorney in Liverpool. It was in little leisure left by active business that he acquired his fine and tasteful scholarship, and distinguished himself as one of the most accomplished and elegant writers of his time. He wrote pamphlets on the slave trade and in defence of the French Revolution; and in 1796 his literary celebrity was established by his first and best historical work, 'The Life of Lorenzo de Medici.' In 1805 appeared 'The Life and Pontificate of Leo X.,' and in the next year Roscoe, who had now become a partner in a Liverpool banking-house, was elected to represent the borough in parliament. He produced several minor works, both in prose and in verse, original and translated, and edited the works of Pope. In 1816 the warm sympathy of his fellow-citizens was excited towards this excellent and philanthropic man, by the failure of his firm. He died in 1831. [W]

ROSCOE, HENRY, youngest son of the preceding, was born in 1800, and called to the bar in 1826. He wrote the Lives of Eminent British Lawyers in Lardner's Cyclopædia, a Life of his father, and edited North's Lives; died 1836.

ROSCOE, W. S., eldest son of the historian, author of miscellaneous poems, and a translator of Klopstock's Messiah, left in M.S., 1782-1831.

ROSCOMMON. See DILLON.

ROSE, GEORGE, a statesman and political writer, was the son of an episcopal clergyman of Brechin, in Angus-shire, where he was born in 1744. He was brought up by an uncle who was a school in London; and after serving as purveyor to the navy, became keeper of the Exchequer through the interest of the earl of Marchmont. While in this office he superintended the publication of the Domesday Book, and completed the Journals of the Lords, in 31 vols. folio. In 1801 the ministry of Mr. Pitt he became president of the board of trade, and, with the exception of a retirement during the Grenville administration, retained this post till his death, in 1818. He wrote several valuable works on subjects connected with the revenue.

ROSE, J. B., a French divine, 1716-1805.

ROSE, H. J., a minister of the Ch. of England, dist. for his learning as a theologian, 1795-1841.

ROSE, SAMUEL, a lawyer, 1767-1804.

ROSE, WILLIAM, a French prelate, and a partizan of the catholic league, died 1602.

ROSEL, J. A., a German painter, 1705-1759.
 ROSELL, A. G., a Sp. mathematician, 1731-94.
 ROSELLI, A., an Ital. juriconsult, 1380-1466.
 ROSELLINI, IPPOLITO, professor of Oriental languages at Bologna, and a great master of Egyptian antiquities of the school of Champollion, whom he accompanied to Egypt. After the death of the latter, he was intrusted with the publication of the great work resulting from their joint labours, entitled 'Monuments of Egypt and Arabia,' 1800-43.
 ROSEN, FREDERICK AUGUSTUS, an eminent oriental scholar, was born at Hanover, 1805, and became professor of Oriental languages in the University of London. Died prematurely, after he had written or edited several important works, 1837.
 ROSEN, GREGORY, Baron, a Russian officer, distinguished in the wars of Napoleon, 1789-1832.
 ROSEN DE ROSENSTEIN, NICHOLAS, commonly called Dr. Rosen, a physician and professional writer, 1706-1773.
 ROSENHANE, SHERING, Baron De, a Swedish senator, diplomatist, and governor of Ostrogothia, 1609-1663. His descendant of the same name held title, secretary of state, and commander of the Order of the Polar Star, author of *Memoirs*, &c., 154-1812.
 GUSTAVE, of the same family, a meteorologist, date 1680-1681.
 ROSENMULLER, JOHN GEORGE, a German mathematician, and professor of theology, 1736-1815. His son, ERNEST FREDERICK CHARLES, a distinguished Arabic scholar, 1768-1835.
 JOHN CHRISTIAN, another son, professor of anatomy and surgery, author of professional works, 1771-1820.
 ROSIN, or ROSINUS, in German ROSZFELD, JONAS, a learned antiquarian, about 1550-1626.
 ROSINI, C. M., a Ital. archæologist, 1749-1837.
 ROSNY, A. J. N. DE, a Fr. novelist, 1771-1814.
 ROSS, ALEXANDER, a Scotch poet, 1699-1784.
 ROSS, ALEXANDER, a Scottish divine, who became chaplain to Charles I. and master of the free school at Southampton, 1590-1654. Ross was a man of considerable attainments in classical learning and philosophy, and made great pretensions to knowledge of the secrets of antiquity. Butler alludes to him:—

'There was an ancient sage philosopher,
 That hath read Alexander Ross over.'

'View of All Religions' is the work by which he is best known.

ROSS, D., an English actor, died 1790.
 ROSS, JOHN, a learned prelate, died 1792.
 ROSS, or ROUSE, JOHN, canon of Osney, an eminent writer on the civil and ecclesiastical antiquities of Warwickshire, died at Guy's Cliff 1491.
 ROSELLI, ANNIBAL, a friar of Calabria, author of a 'Commentary' upon Pimander, 1578.
 ROSELLI, COMO, a Florentine painter, 1416-1441.
 PIERO DE COSIMO, a pupil of Como Rossi, 1441-1484.
 MATTHEW, a pupil of Pagani Passegnano, 1578-1650.
 ROSELLI, COMO, a Florentine preacher, and eminent on the art of memory, died 1578.
 STEPHEN, a relation, an historian, 1598-1664.
 OSSET, F. DE, a Provençal poet, born 1570, died after 1630.
 JOSEPH, a sculptor, 1706-1786.
 ROSSI, the name of several Italians distinguished in art:—ANTONIO, a painter of the Venetian school, master of Titian, 14th century.

ANTONIO, a Bolognese painter, 1700-1753.
 ANGELO, a Genoese sculptor, 1671-1715.
 J. ANTONIO, an architect of Rome, 1616-1695.
 MATHIAS, a Roman architect, 1637-1695.
 MURIO, a painter of Naples, taught by Stanzioni and Guido, 1626-1651.
 PAQUALINO, a painter of Vicenza, b. 1641.
 PROPERZIA, a female sculptor of Bologna, b. 1495.

ROSSI, ADELAIDE HELEN JOSEPHINE CHARLOTTE, Countess De, Madame CELLIER, a French lady, author of numerous works connected with education, 1778-1822.

ROSSI, B. DE, an Italian critic, 16th century.

ROSSI, D. J. B., an Ital. Orientalist, 1742-1831.

ROSSI, IGNATIUS DE, a Heb. scholar, 1740-1824.

ROSSI, GIOVANNI V., in Latin *Janus Nicius Erythraeus*, a philologist and biographer, 1577-1647.

ROSSI, GIROLAMO, in Latin *Rubens*, a physician and historian of Ravenna, 1539-1607.

ROSSI, N., an Italian bibliophile, 1711-1785.

ROSSI, O., an Italian archæologist, 1570-1630.

ROSSI, PELLEGRINO, Count, a noble victim of the popular cause in Italy, was born at Carrara, in 1787, and being admitted to the profession of an advocate at Bologna, was practising at the bar in that city from 1809 till 1814. In the latter year he was obliged to fly the country, through his complicity with the false movement excited by Murat, who had deluded the patriots of Italy with a prospect of their independence, which it was out of his power to realize. Rossi, after the fall of Murat, escaped to Geneva, and there rose to such professional eminence that we find him, in 1819, professor of law; in 1820, a member of the council; and shortly after, a deputy to the diet, and an active party to the revision of the federal constitution. In 1833 he was induced to take up his residence in Paris, and, being naturalized, was appointed, in 1845, ambassador from the French court to Rome. Two series of circumstances would here require consideration in a more extended notice; the first, strictly biographical, exhibiting the formation of Rossi's political convictions in the atmosphere of the *doctrinaires* of the French chamber; and, the second, the state to which the abominable government of Gregory XVI. and the several factions of Italy had reduced that unhappy country. The brief facts are, that the Papal court had maintained an unremitting war against every shade of liberal opinion; the administration was wretchedly bad; no equality existed in the eye of the law; there was no statistics; an enormous public debt; education and religious instruction utterly inadequate to the needs of the people, and a censorship of the press as dark as the Inquisition of the middle ages: add to this, the rancorous opposition of the political sects, the constantly increasing persecution to which they were all alike subject, and the general perversion of the moral sense and political conscience resulting from these causes, and we have a faint outline of the state of Italy at the period of Count Rossi's mission. In the following year, 1846, Gregory XVI. died, and Pius IX. succeeded him with a disposition to grapple with the difficulties of the country, supported as he was by the French influence represented by Rossi, and with the countenance of England exhibited in the mission of Lord Minto and the famous letter of Palmerston. A general amnesty, and the progress of administrative reform, were suddenly enlivened

by the revolution of Naples and Paris in February, 1848, and the impetus given in Italy drove two distinct political movements to a sudden head; that of *Giovine Italia*, which had been fostered by Mazzini ever since the revolution of 1831, and that which the writings of Gioberti and Balbo had ripened under the sun of Carlo Alberto in northern Italy. The latter came to issue first. Carlo Alberto, with the chivalrous blood of the house of Savoy in his veins, proclaimed the independence of Italy under one native sovereign at 'Glorious Milan,' and Rossi warned the pope that if he did not grasp this sword, it would be turned against him; the weak old man, however, proffered his services to Austria and Charles Albert as a mediator for *peace*, and the latter was the sacrifice. This hope being disappointed, the next effort of Rossi, who had been deprived of his employments by the French republic and become prime minister in Rome, was to form a league of the separate constitutional states, with deputies from each sitting in parliament; and as this scheme acquired form and stability it became more and more distasteful to the republican party of Mazzini, by which, also, the efforts of Carlo Alberto had been paralyzed. All through these transactions there had been great tumults and some bloodshed apart from that of the war in Sardinia, and the demand which Mazzini and Giovine Italia opposed to the plan of Rossi, was that for a national convention. In fine the deputies were appointed to meet on the 15th of November, 1848, and Rossi himself represented Bologna. Precautions had been taken against an outbreak, and the carriages of the deputies went through masses of people into the court yard of the Vatican. As that of Rossi stopped at the portico, there was a cry for help, close at hand, and in the confusion created by it, the bystanders closed round the statesman, there was a momentary scuffle, and the quick flash of a dagger was seen; for a while it was hardly known what had occurred, but it was only the corpse of Rossi that the doors were closed upon.—The flight of the pope, and the establishment of the Roman republic, afterwards put down by French bayonets, which are still held at her throat, are matters of history, and too recent, perhaps, to be righteously judged. There is a serious question also, whether Rome, considering the geography of Italy and the requirements of commerce, can ever be the seat of government for a united Italy; whether the dominion, whatever its form, of that beautiful but hapless country must not occupy two seats—Milan perhaps in the north, and Naples in the south. [E.R.]

ROSSI, PIERO DE, a celebrated general of the 14th cent., chief of the Guelphs in Parma, d. 1357.

ROSSI, QUIRICO, an Italian poet, 1696-1760.

ROSSIGNOL, J. A., a republican general, commander in La Vendée, 1759-1802.

ROSSIGNOLI, BERNARDINO, an Italian Jesuit, who first produced the MS. of the 'Imitation,' bearing the name of J. Gersen, died 1613.

ROSSLYN, ALEXANDER WEDDERBURN, earl of, a Scottish lawyer and statesman, was born 1733, and first distinguished himself in parliament in opposition to the Grenville administration. He was successively solicitor-general 1771, attorney-general 1778, and chief justice of the Common Pleas, with the title of Lord Loughborough, 1780.

From 1793 to 1801 he served with Pitt as chancellor, and then retired with the title of earl Rosslyn. Died 1805.

ROSSLYN, JAMES ST. CLAIR ERSKINE, of, nephew of the preceding, and heir of peerage, was a distinguished peninsular officer and one of the most intimate friends of the duke of Wellington. Before succeeding to the peerage in 1805, he was many years in the House of Commons. In 1829 he became a member of parliament, and was its president under Sir Robert Peel in 1834. Died 1837.

ROSSO, DEL, called by the French *Maitre Ro*, a distinguished Florentine painter, died 1541.

ROSSO, J. DEL, an Ital. architect, 1760-1818.

ROSTAN, C., a French botanist, 1774-1833.

ROSTGAARD, FREDERICK DE, archivist of the k. of Denmark, and a great scholar, 1671-1741.

ROSTOPCHIN, FEODOR, Count, a Russian statesman and general, commander at Moscow the period of the French invasion 1812, 1763-1826.

ROSWEIDE, HERIBERT, a learned and valuable minor wr. in ecclesiastical antiquities, 1569-1625.

ROTA, B., a Neapolitan poet, 1509-1575.

ROTA, J. B., an Italian historian, died 1781.

ROTA, M., an Italian designer, 16th century.

ROTA, M. A., a Venetian physician, 1589-1658.

ROTA, V., an Italian dramatist, 1703-1781.

ROTARI, PIERO, Count, painter to the emperor of St. Petersburg, born at Verona 1707, died 1771.

ROTGANS, L., a Dutch poet, 1645-1710.

ROTHARIS, king of the Lombards, 636-652.

ROTHELIN, C. D'ORLEANS DE, a French statesman and man of letters, m. of the Academy, 1691-1751.

ROTENBOURG, FR. RODOLPH, Count, a Prussian general and diplomatist, 1710-1771.

ROTHENHAMER, or ROTTENHAMER, a painter of Munich, style of Tintoret, 1564-1634.

ROTHERAM, JOHN, rector of Houghton Spring, author of an 'Apology for the Athanasian Creed,' and of a much valued treatise on the 'Trine of Justification by Faith,' died 1788.

ROTHERAM, JOHN, an English physician, and writer on 'The Properties of Water,' d. 1711.

ROTHSCHILD, MAXER ANSELM, founder of the house by which the financial operations of Europe have been controlled since the commencement of the present century, was a native of Frankfort. He was educated for the priesthood but preferring the profession of a banker, acquired great credit and wealth at the period of Napoleon's occupation in Germany. Died 1812.

ROTHSCHILD, NATHAN MAYER, son of the preceding, and agent for his father in London, came to this country in 1800, and by the extension of his loan operations acquired immense influence as a contractor in that branch of public credit. He died in 1836, and was succeeded by his eldest son, the present Baron Rothschild.

ROTHOU, J. DE, a Fr. dramatist, 1609-1671.

ROTTENHAMER. See ROTHENHAMER.

ROTTECT, CHARLES VON, a native of Saxony, successively professor of history, and professor of politics and jurisprudence, in the university of Halle, his native city, author of numerous works which distinguish his name throughout Europe, 1775-1841.

ROUBANE, B. G., a Russian author, 1711-1781.

ROUBAUD, PETER JOSEPH ANDRÉ, a French economist and grammarian, 1730-1801.

ROUBILIAC, L. F., a French sculptor, known by several of his works in this country, 1725-1762.

ROUBIN, GILES DE, a French poet, died 1712.

ROUCHER, J. A., a French poet, 1745-1794.

ROUELLE, WM. FRANCIS, professor of chemistry to the Garden of Plants at Paris, 1703-1770. His brother, H. MARIANUS, a chemist, 1718-79.

ROUGEMONT, F., a native of Maestricht, kn. as a Chinese missionary and scholar, 1624-1676.

ROUGET DE LISLÉ, JOSEPH, the writer and composer of the *Marseillaise*, was a French officer of artillery, born at Lons-le-Saunier, among the Jura mountains, 1760. In the winter of 1791-1792 he was in garrison at Strasburg, and is said to have passed most of his leisure at the house of the mayor of that city, where his skill on the clavichord and his social qualities made him a welcome visitor. It was here the Republican Hymn was first composed and sung, at that particular juncture when the king's veto had stultified very act of the first constitutional parliament, and the country was threatened with the invasion of the migrants and their German allies. The resemblance between this marching song and Burns's Scots wha hae wi' Wallace bled, is most striking, and it would be difficult to believe that the one had not suggested the other if Lamartine had not given somewhat romantic account of the manner of its composition, which precludes the idea. The song as just become known when the departments were preparing to obey the call of Paris for a body of 20,000 patriot troops, and the band from Marilles were the first to chant its threatening measures as they traversed France; it afterwards made the round of Europe, and the downfall of Napoleon's troops as they scaled the Alps kept it to its wild notes. Rouget de Lislé's kindet was accompanied to the scaffold by this song, and the composer himself only escaped by the fall of Robespierre. He found no favour with succeeding governments, but carried his republican principles into private life and pursued the career of a lyrical composer and author. Died 1836. [E.R.]

ROUGNON, N. F., a Fr. physician, 1727-1790.

ROUILLE, P. J., a French Jesuit, 1681-1740.

ROUS, or ROUSE, FRANCIS, a native of Cornwall, distinguished for his zeal as a republican and member of Cromwell's privy council, 1579-1659.

ROUSE, or ROSS, JOHN. See ROSS.

ROUSSEAU, J., a French painter, 1630-1693.

ROUSSEAU, JEAN BAPTISTE, a dramatic author, and the most eminent of the lyric poets, born at Paris of humble parentage 1670, died 1741.

ROUSSEAU, JEAN FRANCOIS XAVIER, of the same family as the celebrated philosopher (following article), a man of letters, and consul in Persia, 168-1808. His son, J. B. L. XAVIER, consul at Aleppo, Bagdad, and Tripoli, 1781-1831.

ROUSSEAU, JEAN JACQUES, son of a watchmaker at Geneva, was born there on the 28th of June, 1712.—The first half of the extraordinary life of this extraordinary man, occupying thirty-three years, was spent in a succession of adventures, making the most painfully interesting part of his record he has himself bequeathed to us, a record exhibiting a hardy daring of self-inquisition, which (as he justly says) no other man ever ventured to communicate to the world. The history of this period in Rousseau's career was not only quite

unproductive of literary promise, but would have appeared to forebode little or nothing either of moral worth or of intellectual achievement in any path. —After learning something in a village school, he began life as the apprentice of an engraver; and, on being harshly treated, he became addicted to idleness, lying, and stealing. At length he ran away into Savoy, and, giving hopes of his conversion to catholicism, was received into an ecclesiastical school at Turin, where he read his recantation, but refused to prosecute his education for the priesthood. Being dismissed, he became a domestic servant: in one of his places he committed a theft, and charged a waiting-maid with it; from another he was dismissed for insolent insubordination. Now, when he was in his eighteenth year, he was received by Madame De Warens, a Swiss lady, residing at Annecy, and afterwards at Chambéry. His patroness sheltered him in her house for ten years, pardoned him for two elopements, induced him to study French writers, and supported him even when he disdained to retain employments which she more than once procured for him. The shameful issue is too well known. In 1741 he walked to Paris, having in his pocket fifteen louis, and a new scheme of musical notation, which was at once condemned by the musicians. He found his way, it is not clear how, into the society of men of science and letters, such as Marivaux, Fontenelle, and Diderot; and in 1743 friends obtained a place for him as a kind of secretary or clerk to the French ambassador at Venice. There he spent nearly two years, with no apparent improvement of morality, and with as little evidence of devotion to any pursuit either profitable or honourable. His dismissal by his master, and his return to France, closed his long period of aimless wandering.—Rousseau came to Paris in 1745. Hiring a room in an obscure lodging-house, the strange man conceived a liking for the servant-maid, Thérèse Levasseur, a vulgar, unattractive, and dull young woman of twenty-four. He took her to live with him as his mistress, and married her twenty years afterwards; the attachment of the fantastic dreamer to her was only strengthened by time; and Thérèse and her mother not only preyed on his narrow means, but aggravated his suspicious temper, and were continual mischief-makers between his friends and him. Five children born to the pair were coolly deposited in the Foundling Hospital; and their father appeared to receive with profound indifference the failure of an attempt which some of his patrons made to identify and recover them. In the year of his arrival in Paris, after an unsuccessful attempt at the composition of operatic music, Rousseau found a place as a clerk in the employment of a farmer-general, whose wife had laughed at him for making love to her some years before. About 1748 Diderot and D'Alembert engaged him to write musical articles for the *Encyclopédie*, which, as he said himself, he executed very quickly and very ill. He had great musical genius, but is pronounced to have never acquired more than a very middling knowledge of the science. Soon afterwards, being thirty-seven years old, he made the first attempt in authorship that indicated any true vocation for the pursuit. He read in a newspaper a prize-question proposed by the Academy

of Dijon:—‘Has the progress of the sciences and arts contributed to the corruption or to the purification of morals?’ It seemed to him as if a new world of thought had revealed itself to his mind; he dashed off a vehement denunciation of civilized life, sent it in, and obtained the prize. His indistinct visions soon began to assume shape and colour. He was, it is true, little qualified, either by knowledge of history, or by exact philosophical habits, for working out true results in the problem of social progress; but his meditations brooded eagerly over the task; his impregnable self-confidence satisfied him that he was able to perform it, and the power of passionate eloquence which lurked within, soon enabled him to impress the world marvelously with the representation he gave of his irregular conceptions. Rousseau was not great, either as a poet or as a philosopher; but he possessed, in an extraordinary degree, and with a felicitous proportion of the elements, that union of the two characters, which seems to be more powerful than anything else in commanding the sympathy and guiding the opinions of the world. In the works which he composed after the date now in question, he exercised this power with a success which no writer has ever surpassed. Meanwhile, however, he saw his way but dimly.—His musical reputation was raised by the success of his opera, ‘*Le Devin du Village*,’ and he wrote also a tragedy and three comedies, all of little worth. A second, but less successful prize-essay, ‘*On the Origin of Inequality among Mankind*,’ developed further his political speculations. He dedicated it to the magistrates of his native town, visited Geneva, was full of republican enthusiasm, and professed himself again a Calvinist. And here it is worth while to notice, that, so far as any fixed opinions can be attributed to such a mind, Rousseau was never either atheist or deist: he was a desponding sceptic, who felt himself compelled to reverence the morality of Scripture, little as he obeyed it in his life.—He had now given up his clerkship for a government appointment, which he immediately resigned in a panic; and henceforth, for a long time, his very narrow income was chiefly made up by copying music, in which his friends employed him as a delicate way of giving aid to a proud man. In 1756 he accepted the invitation of Madame D’Epinau to take up his residence on her estate, in the valley of Montmorency, at the retired country house called L’Hermitage. There he composed some of his most brilliantly eloquent writings. His touching but very equivocal novel, ‘*La Nouvelle Eloise*,’ appeared in 1759; ‘*Emile*,’ an acute but chimerical treatise on education, published in 1762, was condemned with reason, both by the archbishop and the parliament of Paris. Immediately afterwards, the ‘*Contrat Social*,’ the most systematic exposition of his dream of social equality, was received with still more serious disapprobation by the government, and Rousseau found it wise to take refuge in Switzerland. Thence, passing secretly through Paris, he departed for England in January, 1766, on the kindly invitation, and in the company, of David Hume, who found a friendly home for him at Wootton, in Derbyshire. There he wrote the first six books of his extraordinary ‘*Confessions*,’ published after his death. If Rousseau was sane before, he certainly was not so now:

his zealous and suspicious temper had become aggravated into a monomania; he treated both Hume and his Derbyshire host with ungrateful abuse, and quitted England in May, 1767. After a time of wandering through France, he was allowed to return to Paris in 1770, with a caution to shun publicity, which he took a pride in setting at defiance. His literary activity had now ceased. He mixed much in society, though he had formerly been shy to excess. But his rudeness of manner and suspicious testiness, were worse than ever, and his despondency seemed often to pass into despair. His health was failing, and his poverty becoming severe. The marquis De Girardin offered him, as his residence, a pavilion in the beautiful grounds of his chateau of Ermenonville, near Chantilly. There, after inhabiting it for a few weeks, he died on the 3d of July, 1778. [W.]

[Tomb of J. J. Rousseau]

ROUSSEAU, J. L. C., a Ger. chemist, 1724-1800.
 ROUSSEAU, P., a French writer, 1725-1795.
 ROUSSEAU, S., an Orientalist, died 1820.
 ROUSSEAU-DE-RIMOGNE, JEAN LOUIS, a Flemish mineralogist, 1720-1788.
 ROUSSEL, P., a Fr. physician, au. of ‘*Système Physique et Morale de la Femme*,’ 1742-1802.
 ROUSSEL, P. J. A., a Fr. writer, 1750-1810.
 ROUSSEL, W., a French *savant*, 1658-1710.
 ROUSTAN, A. J., a theologian and controversial writer of Geneva, 1734-1808.
 ROUTH, B., an Irish Jesuit, confessor to the Princess Charlotte of Lorraine, 1695-1768.
 ROUX, A., a French physician, 1726-1776.
 ROUYER, C. M., a French jurist, 1745-1810.
 ROVERE, DELLA, a noble family of Savoy, in the state of Genoa, two of whom were popes (Julius II. and Sixtus IV.) The other principal members are—JOHN, nephew of Sixtus IV. and brother of Julius II., prefect of Rome 1475. FRANCESCO MARIA, son of John, duke of Urbino and general of Julius II., in whose interest he conquered Romagna and Ferrara. He was deposed on the death of that pontiff 1522, died of poison 1538. GUIDO, his son and successor, a debauched and cruel character, died 1574. FRANCESCO MARIA, last duke of Urbino, an accomplished writer and patron of letters, 1551-1631. ROBALDO, son of the latter, was a dissolute debaucher, and died 1623.

Sir Peter Paul Rubens.

Lord William Russell.

Raffaele Sanzio.

Philip Le Roy.

ROVERE, J. S., a character of the French revolution, who acted as lieutenant of the infamous Jourdan Coupe Tête, 1748-1798.

ROVIGO. See SAVARY.

ROVIRA DE BROCANDEL, HIPPOLYTUS, a Spanish painter, taught by E. Munoz, 1593-1675.

ROWE, ELIZABETH, known as a moralist and religious writer, was the daughter of a dissenting minister named Singer, and was born at Ilchester, Somersetshire, 1674. In 1709 she became the wife of Thomas Rowe, who died in 1715. He wrote some poetical pieces, and a supplement to Lutarch's Lives. Mrs. Rowe then distinguished herself by publishing, in 1728, 'Friendship in Death, in Twenty Letters from the Dead to the living,' and soon afterwards 'Letters, Moral and entertaining, in Prose and Verse,' and 'The History of Joseph,' a poem. She died in 1737, and 70 years later Dr. Watts published her 'Devout exercises of the Heart.'

ROWE, NICHOLAS, a poet and dramatic writer of considerable eminence, was born at Little Brookfield in Bedfordshire, in 1673. His father, descended from an ancient family of that county, was serjeant-at-law, and having educated his son for the same profession, the latter was called to the bar; he paid little attention to the law, however, after the death of his father, but rather devoted himself to the cultivation of polite literature. He published his first play, 'The Ambitious Stepmother,' at the age of twenty-four; it was followed by 'Tamerlane,' intended as a compliment to King William; 'The Fair Penitent;' 'The Biker;' 'Ulysses;' 'The Royal Invent;' 'Jane Shore;' and 'Lady Jane Grey.' His original poems consist of some pathetic ballads: a version of Lucan's 'Pharsalia' is esteemed a masterpiece, but it is not his only classical production, as he also translated 'The Golden Verses of Pindar,' and the first book of 'Quillet's Calistocleia.' He also wrote a Life of Shakspeare. He became under secretary to the duke of Devonshire, when the latter was secretary of state, and on the accession of George I. he was appointed poet-laureate. Died 1718.

ROWE, THOMAS, a nonconformist minister, author of 'The Christian's Work,' died about 1715. See ELIZABETH ROWE (above).

ROWLANDS, H., a Welch antiquary, d. 1722.

ROWLANDSON, THOMAS, a famous caricaturist of London, well known by his 'Illustrations of the Tour of Dr. Syntax,' the 'Dance of Death,' and the 'Dance of Life,' 1756-1827.

ROWLEY. See CHATTERTON.

ROWLEY, WILLIAM, a dramatic writer and actor, of the age of Queen Elizabeth.

ROWLEY, W., an Eng. physician, 1743-1806.

ROWNING, J., an Eng. divine, au. of 'A Compendious System of Natural Philos.,' 1699-1771.

ROXANA, a Persian lady of great beauty, who became the wife of Alexander the Great, and was put to death by Cassandra, B.C. 311.

ROXBURGH, WILLIAM, a Scottish physician and botanist, superintendent of the botanic garden at Calcutta, author of a valuable work descriptive of the flora of India, and a great promoter of Indian agriculture, 1759-1815.

ROY, COUNT, a French statesman, 1764-1847.

ROY, JULIAN DAVID LE, son of a celebrated watchmaker, distinguished as an architect and

antiquarian, 1724-1803. PETER, his brother, a watch and chronometer maker, and writer on those subjects, died 1785.

ROY, P. C., a French satiric poet, 1683-1764.

ROYE, F. DE, a French jurist, died 1686.

ROYE, GUY DE, archbishop of Rheims, and partizan of the popes of Avignon, killed 1409.

ROYEN, A. VAN, a Dutch botanist, 1705-79.

ROYER, J. N. P., a Fr. musician, 1705-1755.

ROYER-COLLARD, ANT. ATHANASIU, prof. of medicine to the faculty of Paris, 1768-1825.

ROYER-COLLARD, PIERRE PAUL, one of the select class of philosophical thinkers produced by France since the era of the Revolution, was born at Sompuis, near Vitry-le-Français, 1763, and in 1789, when the Revolution commenced, was only obscurely known as an advocate of the parliament of Paris. In political sentiments he was a royalist and a friend of popular freedom; in philosophy he became a disciple of Reid, and one of the first to lead the reaction against the mere sensationalism of Cabanis and Condillac. From the end of the Terror till 1810, however, Royer-Collard was more active as a politician; especially as a member of the council established in France by Louis XVIII., consisting of himself, and Clermont Gallierande, the Abbé de Montesquieu, Becquey, Cuvier, and others. Most of this period he was, according to the prevailing fashion, a sensualist, but the works of Reid were destined to enlighten him; and, from 1811, when he was appointed professor of modern philosophy and history, he commenced reforming his opinions, and as he possessed great power as a logician and an orator, he soon began to be looked upon as the founder of a new school. On the restoration of the royal family, in 1815, Royer-Collard returned to political life, and his famous scholar, Victor Cousin, succeeded him as professor at the Sorbonne: he now joined the parliamentary opposition, and such was the reputation he enjoyed that, at the general election of 1827, he was returned for seven different places at the same time. The party in the chamber of representatives of which he was considered chief, is known to European fame as that of the *doctrinaires*, and its birth dates from the session of 1817; its history is marked by much philosophical pedantry, and its deficiency in momentum was shown by the helpless situation in which Guizot found himself at the revolution of 1848. What is the value, read by this light, of such namby-pamby dilettanteism in philosophy and politics as eclecticism signifies? Royer-Collard had the happiness to die, without reading that severe lesson, in 1845. [E.R.]

ROYOU, T. M., a French ecclesiastic and journalist, founder of the 'Ami du Roi' in 1790, 1741-1792. His brother, J. CORENTIN, a royalist, historian, and publicist, 1745-1828.

ROZCE, MADEMOISELLE, a Dutch lady, remarkable for her skill in copying historical pictures solely with silk floss, 1632-1682.

ROZIER, J., a French agriculturist, 1734-1793.

RUAR, M., a German Socinian, 1588-1657.

RUALT, J., a French *savant*, 1580-1636.

RUBBI, A., a Venetian poet, 1739-1810.

RUBENS, ALBERT, son of the great painter, distinguishing as a *savant* and numismatist, 1614-1657.

RUBENS, PETER PAUL, was born at Cologne, June 29, 1677, where he remained with his parents,

natives of Antwerp, until his father's death in 1587, when he removed with his mother to Antwerp. After receiving some preliminary instruction from two other masters Rubens was finally placed with Otto Venius, the most celebrated master of his time at Antwerp; he remained with Venius for four years, until 1600, when he went to Italy and entered the service of Vincenzo Gonzaga, as gentleman of the chamber, and copied several pictures for that duke, both at Rome and Venice. In 1605 he was sent by the duke on a mission to Philip III. of Spain, and while at Madrid, as previously at Rome, he was much occupied in portrait painting, but it is remarkable what a contrast the delicate and elaborately finished portraits of this early period, present, when compared with the bold masterpieces of his later years. This travelling, however, from one country to another, and thus early making himself acquainted with the various schools, was evidently of infinite advantage to him: the glorious works of the Venetians seem to have made the most lasting impression on him. His return home was hastened by the illness of his

[House of Rubens.]

mother in 1608, but he did not arrive at Antwerp until after her death.—The appointment of court painter to Albert and Isabella, in the following year, induced Rubens to give up his intention of returning to Mantua, and he decided upon settling at Antwerp. In 1610 he was married to his first wife, Isabella Brants, who died in 1626. In 1620 he visited Paris, by the invitation of Marie de Medici, and made there the sketches for his celebrated Luxembourg series of painting in honour of that princess, and her marriage with Henry IV., now in the Louvre. In 1628 he was sent by the Infanta Isabella a second time to Spain, on a diplomatic mission to Philip IV., and in the following year on a similar mission to Charles I. of England, who knighted Rubens in 1630, who appears to have presented the king with the picture of Peace and War, now in the National Gallery, on the occasion of this mission, when also Charles gave him the commission to decorate the ceiling of Whitehall palace, the pictures for which were afterwards executed in Antwerp. In 1630, also, he

married his second wife, Helena Forment, a beautiful girl, in her nineteenth year only. Rubens died at Antwerp, May 30, 1640, possessed of great wealth, and after one of the most remarkable careers recorded in the history of art. His success was, however, only commensurate with his ability. 'He was perhaps the greatest master,' says Joshua Reynolds, 'in the mechanical part of the art, the best workman with his tools, that ever exercised a pencil.' His works are extremely numerous, and prints alone after him amount to about 1,200; but the majority of his pictures were chiefly executed in large from his own sketches, and finished only himself; it is a physical impossibility that he could have executed entirely all the pictures that are accredited to him. His pupils were able and numerous, the principal were A. Vanduyck, A. V. Diepenbeck, J. Van Hoeck, F. Van Thulden, Segers, Jordaens, Snyder, and Erasmus Quellinus. He is still seen to the utmost advantage at Antwerp, but he is also gloriously represented in the Picture Gallery at Munich. His masterpieces generally considered the Descent from the Cross, the cathedral at Antwerp, but now sadly obscure there is, however, a fine old print of it by L. Vorsterman.—(Grimbergen, *Historische Levenschrijving van P. P. Rubens, 1774-1840*; Waagen, *Peter Paul Rubens, his Life and Genius*, trans. R. R. Nael, edited by Mrs. Jameson, London, 1840.) [R.N.V.]

RUBENS. See ROSSI, GIROLAMO.

RUBINI, P., an Italian physician, 1760-1819.

RUBYS, C. DE, a French historian, 1533-16.

RUCELLAI, BERNARDO, in Latin *Oricellari*, a Florentine historian and diplomatist, 1449-1515. His son, GIOVANNI, a poet and ambas., 1475-1515.

RUCHAT, A., a French theologian, 1680-17.

RUDBECK, JOHN, a Swedish prelate, chaplain of Gustavus Adolphus, and promoter of the publication of the Bible, called by his name, 1581-1636. OLOF, his son, a learned physician, botanist, and mechanician, 1630-1702. OLOF, son the latter, a botanist and philologist, 1660-1746.

RUDBORNE, THOMAS, warden and architect of Merton College, Oxford, died about 1442.

RUDDIMAN, THOMAS, a Scottish grammarian and critic, editor of a complete and valuable edition of the works of Buchanan, 1674-1757.

RUDENSCHOELD, COUNT, a Swedish statesman, who negotiated the marriage of the princess of Sweden with the sister of the king of Prussia in 1739, and was afterwards minister of foreign affairs and chancellor, 1698-1783.

RÜDING, ROGERS, an English divine, author of 'Annals of the Coinage of Great Britain,' 1751-18.

RUDOLPH, C. A., a Swed. natural., 1771-18.

RUE, CHARLES DE LA, a learned French Jesuit poet, and classical editor, 1643-1725.

RUE, CHARLES DE LA, a learned Benedictine of the congregation of St. Maur, editor of an edition of Origen, which was finished by his nephew, 1684-1739. The latter, VINCENT DE LA RUE, also a learned Benedictine, died 1762.

RUE, P. DE LA, a Dutch poet, 17th century. RUFFHEAD, OWEN, a miscellaneous writer, author of a 'Life of Pope,' &c., 1723-1769.

RUFFI, ANTHONY DE, a French lawyer and historian, 1607-1689. His son, L. ANTHONY, known as a man of letters, 1657-1724.

RUFFINI, P., an Ital. mathematic., 1765-1822.
RUFFO, D. F., a cardinal of Naples, 1744-1827.
RUFINUS, or **RUFFINAS**, sometimes called the surname **TORANIUS**, a celebrated Italian ecclesiastic and Scripture commentator, born at Avila about the middle of the 4th century. He embraced the monastic life about 371, and accompanied St. Jerome to the East; that father, however, afterwards wrote against him on account of a apology for Origen. In 410 he was condemned as a heretic by Anastasius, and soon after was even to take refuge in Sicily by an irruption of the Visigoths, where he died either that year or the following. Besides his original works, he translated from the Greek into Latin the works of Eusepius, Eusebius's Ecclesiastical History, the cognitions of St. Clement, and the works of Basil and Gregory Nazianzen.

RUFUS, surnamed 'the Ephesian,' a Greek physician and poet of the 1st century B.C.

RUFUS, CAIUS MUSONIUS, a Stoic philosopher, distinguished at Rome in the age of Tiberius.

RUFUS, PUBLIUS RUTILIUS, consul and tribune of Rome, time of Sylla.

RUGENDAS, G. P., a Ger. painter, 1666-1742.

RUGGIERI, C., an Ital. astrologer, 16th cent.

RUGGIERI, C., an Ital. philologist, 1714-1766.

RUGGLE, G., an Eng. dramatist, 1575-1622.

RUHL, PHILIP JAMES, a member of the French revolution, killed himself 1795.

RUHNKEN, D., a Greek critic, 1723-1798.

RUHS, F., a German historian, 1780-1820.

RUINART THIERRY, a Benedictine of St. Maur, distinguished as an ecclesiastical antiquary, 1657-1709.

RUISDAEL, JACOB. This celebrated Dutch painter was born at Haarlem about 1635, and died 1700, and was originally educated for the medical profession. With whom he studied painting is not known. His landscapes are numerous, and are all distinguished for a simple natural treatment, and a secluded, rugged scenery; generally of a cold and sombre character, but executed with great accuracy and selected with a true appreciation of the picturesque, of that character generally designated the romantic; they are further distinguished by their ordinary daylight, in contradistinction to the sunny effects of Cuyp or Berghem. Ruissdael's style has much of the character of the works of Peter Poussin and Salvator Rosa in colour and general effect, but is distinguished from the works of these great painters by a much more elaborate treatment of detail, and the chief portion of the picture by the special prominence of the foregrounds generally with Ruissdael. The peculiar scenery he represents rocky, and yet on a small scale, reminds much more of the neighbourhood of the Ardennes, than of Italy or Switzerland, both of which countries he is supposed to have visited, but very improbably; his favourite subjects are cascades. He sometimes painted marine pieces, and with great success; figures he never painted, though we find in his landscapes were introduced either by Ostade, Wouwerman, A. Vanderveelde, or Berghem. His brother, **SOLOMON RUISDAEL**, was also a good landscape painter, and being many years older than Jacob, was probably his instructor in the art; some of the pictures attributed to him may belong to Solomon, as considering his

moderately short life, the pictures of Ruissdael are very numerous; he also etched a few plates.—(Houbraken, *Groote Schonburgh der Nederlandsche Konstschilders*, &c. Amsterdam, 1721.) [R.N.W.]

RUIS-GONZALEZ, a Sp. painter, 1633-1709.

RULHIÈRE, CLAUDE CARLOMAN DE, a French historian, who acted as confidential secretary to the baron de Breteuil, and accompanied him in his embassy to Russia, author of historical works concerning the Revocation of the Edict of Nantes, the Revolution in Russia 1762, and the Assembly of Poland, 1735-1791.

RULMAN, ANNE, a French jurist, 1583-1639.

RUMFORD, BENJAMIN THOMPSON, commonly called Count Rumford, one of those practical geniuses and indefatigable workers in the cause of humanity by whom society will be carried to a far higher perfection than we know at present, was born at Rumford in New Hampshire, now Concord, 1753. He was married to a rich widow at nineteen, and had risen to some consequence when the American revolution broke out, but being a royalist was obliged to fly, and his wife soon after died in childbed. In 1776 he brought the news of Washington's success to the English court, and for his services to the crown received an appointment in the foreign office; this, however, he abandoned in 1782 to take up arms in the colony, where he organized a troop of dragoons, and commanded them himself with the rank of colonel. At the peace in 1784 Colonel Thompson received the king's permission to enter into the service of the king of Bavaria, and not only so, but was knighted on the occasion, and had half his military pay secured to him. In this service he rose step by step till the administration of the kingdom was in his hands, and he made such use of his power and influence that the face of things was entirely changed, and the country rescued from the abyss of squalid poverty into which it was sinking. It was for these services that he received among other honours the title of count taken from his native place. In 1802 he married the widow of Lavoisier, and afterwards lived at Auteuil, near Paris, devoted to researches in natural philosophy. Died 1814. [E.R.]

RUMPH, G. E., a German botanist, 1626-1698.

RUNCIMAN, ALEXANDER, a Scottish painter of subjects from Ossian, 1736-1785.

RUNEBERG, EPHRAIM OTTO, a Swedish surveyor, mapmaker, and engineer, 1722-1770.

RUNG, P., an English biographer, 1750-1823.

RUNIUS, J., a Swedish poet, 1679-1713.

RUNJEET-SING. See **SINGH**.

RUNNINGTON, CHARLES, an industrious writer on law, editor of several standard works, born in Hertfordshire 1751, died 1821.

RUPERT, a Flemish abbot, 1091-1185.

RUPERT, PRINCE, otherwise Prince Robert of Bavaria, a distinguished name in the history of Charles I., was the third son of Frederic V., elector palatine of the Rhine, by the princess Elizabeth, eldest daughter of James I., king of England. He was born in 1619, and though hardly of age at the commencement of the parliamentary wars, he offered his services to his uncle, who naturalized him, and advanced him to the dignity of a peer of England, and knight of the Garter. He exhibited little prudence in his conduct of military opera-

tions, but was remarkable for his impetuous gallantry and chivalrous bearing. He was in all the principal actions with the parliamentary forces, and led the charge at the battle of Naseby: soon after which he surrendered Bristol to General Fairfax, with little show of defence. For this luckless step the king hastily dismissed him his service, and ordered him beyond seas, and Rupert had no further share in events till the disaffection of part of the English navy in 1648, of which he took the command in the interest of Charles II. With these ships he harassed the English trade, until Admiral Blake compelled him to retire from the English seas, and he lost many of them by shipwreck. He was subsequently at the French court with Charles II., and after the restoration distinguished himself as naval commander in the Dutch war against De Ruyter and Van Tromp. His successes again were rather the reward of his daring courage than good management. They were such, however, as fully sustained the reputation won by the British navy under the great admiral whose outraged ashes were now reposing in St. Margaret's churchyard. Prince Rupert retired from warlike enterprise after the second Dutch war, 1672-4, and devoted his time to scientific pursuits, which had always indeed occupied his leisure. Chemistry and the arts were his favourite studies, and the composition of the well-known 'prince's metal,' is said to have been discovered by him. Died 1682. [E.R.]

RUPPRECHT, F. C., a painter, engraver, and architect of Bavaria, 1779-1831.

RUSBROCK, or RUYSBROECK, JEAN, a celebrated mystic writer, founder and reformer of the monastery of Groendal, au. of De Nuptiis, or Spiritual Marriage, and several other works, 1294-1381.

RUSCA, E., an Italian physician, 1801-1834.

RUSCA, F. D., a French general, 1761-1813.

RUSCELLI, J., an Italian *savant*, died 1566.

RUSH, BENJAMIN, an American physician and writer on the yellow fever, 1745-1813.

RUSHTON, E., a catholic writer, 1572-1586.

RUSHWORTH, JOHN, secretary of Fairfax, general of the parliamentary forces, distinguished for his valuable historical compilations connected with the period, 1607-1690.

RUSSEL, A., a Scotch physician, 1726-1805.

RUSSEL, G., a divine and poet, 1728-1767.

RUSSEL, W., a miscellaneous and historical writer, born in Mid-Lothian 1746, died 1793.

RUSSELL, a noble family which has given several illustrious names to English history. The first of any note is SIR JOHN RUSSELL, speaker of the House of Commons in the reign of Henry VI., and companion-in-arms of Henry VIII. in his French wars. He was created earl of Bedford, and enriched with the lands of the abbey of Tavistock and the monastery of Woburn; died 1555. WILLIAM, fourth earl, and first duke of Bedford, was made a knight of the Bath at the coronation of Charles I., and became a member of the 'long parliament' which met in November, 1640. At the battle of Edgehill 1642, he was general of horse for the parliament, but soon after that event he retired to private life, and appeared again at the restoration, when Charles II. created him a knight of the Garter. He survived to be present at the coronation of William and Mary, who created him

(1694) marquis of Tavistock and duke of Bedford, died 1700. LORD WILLIAM RUSSELL, second son of the preceding (next article.) EDWARD, cousin of duke William, and earl of Orford, an admiral distinguished at Cape la Hogue, 1651-1727. JOHN, duke of Bedford, lord-lieutenant of Ireland ambassador to France 1762-3, died 1771. FRANCIS, son of the latter, and his successor in the dukedom, chiefly distinguished as a patron of agriculture, 1765-1802.

RUSSELL, LORD WILLIAM, second son of the fourth earl of Bedford, was, according to the biography written by his descendant, born on the 29th of September, 1639. His wife, the worthy participant in his fame, to whom he was married in 1660, was a daughter of the earl of Southampton, and the widow of Lord Vaughan. He was not a man of brilliant qualifications, his temper and habits seem to have been adapted more to domestic repose than public life, and a strong sense of duty appears also to have caused his memorable connection with the history of the reign of Charles II. He was seriously listened to in the House of Commons, and he acquired as much influence there as it was perhaps possible for one independent man to have in an assembly so little influenced as it then was by the spirit which has usually guided the parliament of England. It is a question in historical criticism whether reliance ought to be placed on the documents which show that many distinguished members of the opposition were bribed by the king of France, but it is worthy of remark that Russell's name does not appear in the list. The explosion of the Rye-house plot, his trial and fate, are important mo-

[The Rye House.]

ments of history. Contemporary with the project for rescuing the constitution, there was an attempt for the assassination of the king and his brother, with which certainly Russell was not concerned, though he had some intercourse with contrivers. Yet it can hardly be said that he not intend to take up arms against the existing power, and that his fate, presuming that power to be a legitimate one, was a stretch of the law. His merit, in fact, consisted in, after serious and careful consideration, resorting to resistance as better than

mission to a government which had invaded the institution. And though he himself bore the penalty of the unsuccessful revolt, the country reaped the fruits of his martyrdom in the revolution. He was beheaded on the 21st July, 1683. [J.H.B.]

RUSSELL, LADY RACHEL, distinguished by her magnanimity at the trial of Lord William Russell, became his wife in 1667, and survived in forty years. She is known to literature by her much-admired 'Letters.' Died 1723.

RUSSELL, MICHAEL, bishop of Glasgow and Alloway, author of 'The Connection of Sacred and Profane Histories,' and a contributor to the *Cyclopædia Metropolitana*, 1781-1848.

RUSSELL, WILLIAM. See **RUSSEL**.

RUST, GEORGE, a learned prelate, died 1670.

RUSTICI, J. F., an Italian sculptor, died 1540.

RUTGERS, JOHN, a Dutch critic, 1589-1625.

RUTHARD, C., a Dutch painter, 17th century.

RUTHERFORD, DANIEL, a Scottish physician and professor of botany, Edinburgh, 1749-1819.

RUTHERFORD, J., a Sc. physician, 1695-1779.

RUTHERFORD, SAM., a dist. Scotch divine of the 17th c., professor of divinity in New College, Andrews, auth. of several controversial works.

RUTHERFORTH, THOMAS, professor of divinity at Cambridge, author of a 'System of Natural Philosophy,' a 'Discourse on Miracles,' and other works, 1712-1771.

RUTHVEN, WILLIAM, earl of Gowrie, a Scottish nobleman, whose name is famous in history as chief of the conspiracy formed in the reign of James VI., with the view of compelling that monarch to expel the duke of Lennox and the earl of Arran from the kingdom. He perished on the scaffold in 1584. His sons, **JOHN** and **ALEXANDER**, were massacred by the armed followers of James VI., under circumstances which have never been satisfactorily cleared up, in 1600.

RUTILIUS LUPUS, a rhetorician, 1st century.

RUTILIUS NUMATIANUS, CLAUDIUS, a native of Gaul, known as a Latin poet, and practitioner of Rome under Honorius, 5th century.

RUTLEDGE, JAMES, an English writer, who went to Paris and died there in prison, 1796.

RUTLEDGE, J., governor of South Carolina, a promoter of American independence, d. 1800.

RUTTZ, J., an Irish physician, 1698-1775.

RUVIGNY, H. DE, a Fr. general, 1647-1720.

RUYSCH, FREDERIC, M.D., F.R.S., a famous Dutch anatomist, born at the Hague, 23d March, 1638, and died in 1731 at the great age of ninety-two. He was an ingenious and indefatigable anatomist, and having discovered a method of arresting the decay of animal bodies by the use of a peculiar kind of injection, he collected a museum which for the beauty of the preparations was one of the wonders of the world. It was sold, in 1698, to the czar Peter, and was transported to St. Petersburg. At the age of eighty, Ruysch collected and arranged another, but the secret which he possessed died with him, and is no longer known; though it is now believed that the antiseptic element employed by him was arsenic. [J.M.C.]

RUYTER, MICHAEL, a famous Dutch admiral of the period of the English commonwealth, was born at Flushing in 1607, and having entered the navy in boyhood, became captain of a vessel as early as 1635. His first laurels were won in the

West Indian seas, where he was sent to co-operate with the Portuguese in opposition to the Spaniards, with whom the rising Dutch republic was now fighting the battle of their independence. These achievements, and his operations on the coast of Barbary, date from 1641 to about 1650, and such was the courage of Ruyter that, on one occasion, he entered the roadstead of Sallée in a single ship, when the passage was disputed by five Algerine corsairs of large size. The action was witnessed by the inhabitants of the city, who placed Ruyter on a finely caparisoned horse, and conducted him in triumph through the streets, with the commanders he had defeated led in sullen captivity. In 1652, when the war broke out between the English, and Dutch republic, Ruyter was appointed to the command of a squadron, ordered to convoy home a rich fleet of merchantmen, and he succeeded in his mission, notwithstanding two days' hard fighting with Sir George Ayscough off Plymouth. In October of the same year he was joined by De Witte, and the two commanders contended with Blake and Ayscough on the Flemish coast. During the remainder of the war he fought under Van Tromp, and it is difficult to say whether the English or the Dutch most distinguished themselves in the series of battles fought in the English channel: in the action off Folkestone, Ruyter compelled Blake to fly for safety to the Thames. The war lasted two years, and in the final action, near Scheveling, Ruyter and Van Tromp were opposed to the English under Monk and Lawson: success declared for the English, and Van Tromp being killed, Ruyter withdrew the wreck of the Dutch navy to the Meuse. The Dutch republic was now reduced to sue for peace; but Ruyter found immediate employment as commander of an expedition to Barbary, and in the recapture of the Dutch establishments on the coast of Africa; besides which, in 1659, he was sent to aid the king of Denmark, and obtained two victories over the Swedish fleets. In 1665 the commercial rivalry of the two nations induced the English government, under Charles II., to declare a fresh war with Holland, and Ruyter was matched with varying success against Monk duke of Albemarle, Prince Rupert, Sir G. Ayscough, duke of York, and the earl of Sandwich. In the course of two years several great actions were fought, and then negotiations for peace were entered upon. The preliminaries, however, were foolishly and insincerely protracted, and Ruyter taking advantage of the opportunity, sailed up the Thames as far as the Medway, and not only destroyed much shipping, but spread consternation as far as London. The peace of Breda, which immediately followed, lasted from 1667 to 1672, when Charles II. wantonly provoked fresh hostilities in gratification of the French alliance; that court having been at war with Holland, and Ruyter actively engaged in it, since 1671. The first great action, between an armament of about 150 vessels on both sides, the Dutch fleet commanded by Ruyter, was fought off Solebay, on the coast of Holland, and again the English and Dutch seamen dealt terrible destruction against each other without either side obtaining a decided advantage. Peace was concluded between England and Holland in February, 1674, and Ruyter was despatched to the

Mediterranean to carry on the war with the French. One object was to relieve Messina, which was occupied by French troops, and guarded by a fleet of thirty sail, under the Admiral Duquesne; the squadron of Ruyter numbered twenty-four sail, but it was reinforced previous to action by four Spanish vessels. These armaments encountered each other in desperate conflict off the eastern coast of Sicily, and Ruyter, almost at the beginning of the action, had both his legs shattered; he continued, nevertheless, to direct the battle, till there was no longer any probability of success, and then ordered a retreat into the port of Syracuse, where he died of his wounds on the 26th of April, 1676. [E.R.]

RUUVEN, PETER VAN, a Dutch painter of history, taught by Jordaens, and occupies high rank among the artists of his country. Many of his historical tableaux are in the chateau of St. Loo; he was employed on the embellishments at the Hague when it was visited by William III., 1650-1718.

RUZZINI, a doge of Venice, 1732-1735.

RYCKAERT, MARTIN, a Flemish landscape painter, 1591-1636. DAVID, his son and pupil, famous for his skill in the grotesque, was born 1615, and became director of the academy at Antwerp 1667, date of his death unknown.

RYCKE, J., a Flemish writer, 1587-1627.

RYCKEH, T., a Dutch philologist, 1640-1690.

RYDELIUS, ANDREIS, a Swedish theologian and philosopher, 1671-1738. His brother, MAGNUS, professor of history and theology, 1676-1712.

RYDER, SIR DUDLEY, a native of Yorkshire, born 1691, attorney-general 1736 to 1754, d. 1756.

RYFF, JAMES, a Swiss surgeon, 16th century.

RYLAND, J., a baptist minister, died 1792.

RYLAND, W. WYNNE, an engraver of London, born 1732, executed for forgery 1783.

RYMER, THOMAS, historiographer royal, and collector of a vast mass of public documents relative to the history of England and its connection with other states, was born in Yorkshire 1638 or 1639, and received his appointment 1692. The publication of his collections was commenced in 1704, but the greater part remains in MS. at the British Museum. Died 1713.

RYSBRACH, RYSBRAECH, or RYS BRECHTS, JOHN MICHAEL, an eminent Flemish sculptor, 1694-1770. His brother, PETER, a painter, 1657-1716.

RYVES, BRUNO, a dignitary of the Church of England, born in Dorsetshire, distinguished as a historical writer and annalist of the civil war, died 1677. His relation, SIR THOMAS RYVES, disting. civilian, advocate to Charles I., died 1651.

RZEWUSKI, WENCESLAS, a Polish nobleman and general, who underwent a long imprisonment in Russia for his opposition to the pretensions of that country. He was remarkable also for his extensive knowledge of literature, philosophy, and the arts, and distinguished himself as a dramatic author and poet, 1705-1779. His son, SEVERIN, born 1745, has the reputation of being a traitor to his country, and was hung in effigy 1794.

S

SAA, EMANUEL, a Portug. Jesuit, 1530-1596.

SAA DE MIRANDA, FRANCESCO, a Portug. poet, who ranks next to Camoens, 1495-1558.

SAAD ED DEEN MOHAMMED, called *Khodjah Effendi*, a Turkish historian, died 1600.

SAADI, a distinguished Persian poet, whose entire works were published in the original Persian and Arabic at Calcutta, 1791. His *Gulistan* (Garden of Roses) was translated into English by Gladwin and Ross, and into French by Duryer, D'Aligre, and Gaudin; flourished 1195-1296.

SAADIAS GAON, a celebrated rabbin, 892-941.

SAARFIELD, a Spanish general, 1795-1837.

SAAS, JOHN, a French bibliographer, 1703-74.

SAAVEDRA FAXADRO, DIEGO DE, a Span. histor. and diplomat., b. in Murcia 1584, d. 1648.

SABACON, an Ethiopian conqueror, who founded a new dynasty in Egypt, 8th cent. B.C.

SABAS, a sectarian of the 3d century.

SABATEI SEVI, a pretended Messiah of the Jews, born at Smyrna 1625, died in prison 1676.

SABATIER, A. H., a Fr. writer, 1726-1806.

SABATIER, ANTOINE, called *Sabatier de Castres*, from his birth-place, a French writer of the school of Helvetius, author of a Dictionary of Pagan Antiquity, Dictionary of Virtues and Vices, the Three Ages of Fr. Literature, &c., 1742-1817.

SABATIER, PETER, otherwise SABATHIER, and SABBATHIER, author of an edition of all the Latin versions of the Bible, 1682-1742.

SABATIER, R. B., a Fr. surgeon, 1732-1811.

SABBAGH, MICHAEL, an Orientalist and poet, b. of catholic parents at St. Jean D'Acre, 1784-1816.

SABATHIER. See SABATIER.

SABBATHIER, F., a Fr. compiler, 1732-1807.

SABBATI, L., an Italian botanist, last cent.

SABBATINI, two Italian painters:—ANDRE

DA SALERNO, a pupil of Raphael, 1480-1541.

LORENZINO DA BOLOGNA, died 1577.

SABBATINI, L. A., an Ital. composer, d. 1807.

SABELLICUS, M. A., an Ital. hist., 1436-1500.

SABELLIUS, was a presbyter of Ptolemais, city in Pentapolis—a province of Lybia Cyrenae and lived about the middle of the third century. Amidst the metaphysical attempts to explain the relation of the Persons in the Trinity, he struck out a peculiar system. In opposition to the prevalent Alexandrian theology, which taught the doctrine of subordination, he held that the three names in the Trinity not only referred to relation wholly co-ordinate, but that the epithets Father, Word, and Spirit, were but the designations of three separate phases or aspects of operations which the one Divine Essence had chosen to exhibit itself. He thus denied all immanent distinctions in the Godhead. The human and personal element in Christ was, according to him, only the fleeting form of a Divine manifestation and the Holy Ghost was merely a Divine energy in the hearts of believers. In fact, in his general doctrine of personality there is an approach to Pantheism, and the Arian heresy was its antagonistic product. The heresy of Sabellius was stoutly opposed by Dionysius of Alexandria, and Arianism laid hold of several of the orthodox bishops in extreme expressions. [J.]

SABIN, a king of the Bulgarians, 763.
SABINA, JULIA, wife of Adrian, by whom she was compelled to take poison, and died 138.
SABINIANUS, pope of Rome, 604-606.
SABINUS, AULUS, a Roman poet, 1st century.
SABINUS, GEORGE, whose proper German name was **SCHULTEN**, a Latin poet, 1508-1560.
SABINUS, JULIUS, a Gaulish nobleman, who assumed the title of Caesar during the contest between Vespasian and Vitellius, and was executed the year 70. His two children, and his wife, **ponina**, who had displayed the most unbounded devotion for him, were also put to death.
SABLIÈRE, ANTOINE RAMBOUILLET DE LA, French author, died 1680. His wife, Madeleine Hessein, better known as **MADAME DE SABLIÈRE**, is distinguished by her love for serious studies and the friendship of La Fontaine. She died 1693.
SABLIÈRE, C., a Fr. philologist, 1693-1786.
SABOLI, N., a Provençal poet, 1660-1724.
SABUNDE, R., a Spanish philosopher, d. 1432.
SACCCHETTI, F., an Ital. novelist, 1335-1410.
SACCCHETTI, G., an Ital. architect, died 1764.
SACCHI, three Italian artists:—**ANDREA**, a distinguished portrait painter of Rome, 1600-1661.
GIULIO, a painter and engraver of Pavia, 1616-1675.
PIERO FRANCESCO, renowned for his perspective, flourished at Pavia about 1460-1526.
SACCHI, J., an Italian musician, 1726-1789.
SACCHINI, F., an Italian Jesuit, who continued Orlandino's History of his Order, 1570-1625.
SACCHINI, A. M. G., a composer, 1735-1786.
SACHEVERELL, HENRY, a notorious high churchman and demagogue of the reign of Queen Anne, was born about 1672, at Marlborough, where his father was a poor clergyman; and in 1695 became preacher at St. Saviour's, Southwark, at the same time that he held the living of Cannock, in Staffordshire. The Toleration Act of 1689 had secured the free exercise of their religion to the protestant dissenters, then known under the three denominations of Presbyterians, Independents, and Baptists, but its operation was vigorously resisted by such men as Sancroft the bishop, and other conscientious non-jurors, including the mystic divine William Law, and **Cler**, the ecclesiastical historian. These were men of high principle, who held themselves aloof from the government they supposed were ruining the nation, being content to sacrifice their every hope of preferment in the cause. On the contrary, **Sacheverell** and his party made political capital of the general alarm, and were continually preaching abusive sermons against the Whig government and the dissenters. **Sacheverell** was at length brought to trial for two such discourses, in which he had abused Lord Godolphin, then his treasurer, under the scurrilous name of **Vane**. We live in times when the miserable reputation of a **Sacheverell** would only create an hour of amusement, but it was far otherwise then; he was seriously impeached, and being brought to trial before the peers, on the 27th of February, 1710, he occupied that high court nearly a month, and was then condemned to imprisonment for three years, and to have his sentence burnt by the hangman. The whole country was inflamed with resentment; **Sacheverell**

was escorted about by processions of horse and foot, the queen was everywhere followed by shouts for **Sacheverell**, and the dwelling-houses of eminent dissenters were shamefully plundered, and no one friendly to them could appear without being abused; in fine, the general election of the ensuing autumn was so much influenced by this movement, that the Godolphin ministry was overthrown. On the expiration of his sentence, **Sacheverell** recommenced his incendiary harangues, chiefly, perhaps, to save appearances, and he was presented by the queen, now under Tory influence, and always zealously attached to the Church of England, to the rich living of St. Andrew's, Holborn. He died in obscure retirement 1724, the last thing recorded of him being a bequest of £500 to Bishop Atterbury, his friend and representative among the prelates. [E.R.]

SACHS, HANS, a German poet, 1494-1578.

SACI, LOUIS ISAAC DE, whose proper name was **LEMAISTRE**, a learned Jansenist, 1612-1684.

SACKEN, BARON, a Russ. general, 1770-1837.

SACKVILLE, GEORGE, Viscount, third son of the first duke of Dorset, was born 1716, and was commander of the English and Hanoverian cavalry at the battle of Minden, 1759. Instead of bringing his troops into action when ordered, he was panic-stricken, and his pale looks and want of self-possession were marked by the other officers. He was tried by court-martial on the charge of cowardice, and not only dismissed the service, but had his name erased from the list of privy councillors. This man, however, became colonial secretary in the factious times of Lord North from 1775 to 1782, the period of the American war of independence. Died 1785. The affair of Minden is very fully discussed in the valuable history, now in course of publication, by Lord Mahon. [E.R.]

SACROBOSCO. See **HOLYWOOD**.

SACROVIRUS, JULIUS, the principal author and chief of the revolt of the Gauls under Tiberius, defeated at Autun by Silius, and slew himself, 21.

SACY. See **SACI**.

SACY, ANTOINE ISAAC SILVESTRE, Baron De, one of the most universal scholars of our age, and particularly renowned for his Oriental learning, was born at Paris 1758, and occupied the first rank as professor under every form of government in France, from 1795 to the reign of Louis Philippe. He is author of several original works, and of many highly valued translations from the Oriental languages. Died 1838.

SACY, LOUIS DE, a Fr. advocate, 1654-1724.

SADE, an illustrious Provençal family, one of whose lords is supposed to have been the husband of Petrarch's Laura. This family has given several statesmen and prelates to France since the 14th century. In recent times, two names distinguished in literature:—**JAMES FRANCIS PAUL ALPHONSO**, Marquis De Sade, author of Remarks on the Troubadours, and editor of an edition of Petrarch, 1705-1778. **DONATIAN ALPHONSO FRANCIS**, his nephew, a licentious novelist, 1740-1814.

SADEEL, A., a French Huguenot, 1534-1591.

SADELER, JOHN, a Flem. engraver, 1550-1610.
RAPHAEL, his brother and pupil, 1555-1616.
GILES, nephew and pupil of John, 1570-1629.

SADI. See **SAADI**.

SADLER, A., chaplain to Charles II., d. 1680.

SADLER, J., a political writer, 1615-1674.

SADLER, MICHAEL THOMAS, a philanthropist and member of parliament, distinguished by his exertions in favour of the poor factory children, author of 'Ireland, its Evils, and their Remedies,' and of a work against the Malthusian doctrine, entitled 'The Law of Population,' 1780-1835.

SADLER, SIR RALPH, a reformer and statesman, who acted as the principal agent of Queen Elizabeth in Scotland, and as gaoler of Mary Stuart, 1507-1587.

SADLER, W. W., a dist. aeronaut, 1796-1824.

SADOC, a learned Jew, principal founder of the sect of Sadducees, 3d century B.C.

SADOLETO, JACOPO, an Italian cardinal, famous as a philosopher and man of letters, at the period of the attempted reformation in Italy (see POLE), 1477-1547. His cousin, PAOLO, a Latin poet, 1508-1572.

SAEMUND, SIGFUSSON, an Icelandic priest and historian, by whom the poems of the Edda were collected, died 1135.

SAGE. See LE SAGE.

SAGE, B. G., a French chemist, 1740-1824.

SAGE, JOHN, a Scottish prelate, 1652-1711.

SAGITTARIUS, GASPARD, whose proper name was SCHUTZE, a Saxon archæologist, 1633-1694.

SAGREDO, GIOVANNI, a Venetian historian, who was elected doge in 1675. He resigned his office because not agreeable to the people.

SAHED-IBN-ABAD, a celebrated Persian vizier, historian, and literary *savant*, 940-995.

SAINCTES, CLAUDE DE, a French catholic theologian, and partizan of the league, 1525-1591.

SAINT-AIGNAN, FRANÇOIS DE BEAUVILLIERS, successively Count and Duke De, a French commander and statesman, remembered as a patron of learning, 1610-1687. PAUL, his son and successor in the dukedom, one of the most virtuous statesmen of the court of Louis XIV., governor of Burgundy, Anjou, and Berri, and a friend of Fenelon, 1648-1714. PAUL HIPPOLITE, brother and successor of the latter, a diplomatist and member of the Academy, 1684-1776.

SAINT-ALBAN. See SAINT-GILES.

SAINT-ALBAN, RICHARD DE BURGH DE, earl of Clanricarde, an Irish nobleman, who aided in extinguishing the rebellion of 1600, 1565-1635.

SAINT-AMAND, J., a French critic, d. 1754.

SAINT-AMANS, J. FLORIMOND BOUDON DE, a French agriculturist and botanist, 1748-1831.

SAINT-AMANT, MARK ANTONY GERARD, Sieur De, a French poet, 1594-1660.

SAINT-AMOUR, WILLIAM DE, a doctor of the Sorbonne, who wrote against the friars, d. 1272.

SAINT-ANDRÉ, J. B., a protestant minister and member of the French convention, 1749-1813.

SAINT-ANDRÉ, J. D'ALBON, Maréchal De, a famous commander of the catholic league, colleague of Guise and Montmorency, killed at the battle of Dreux, 1561.

SAINT-ANDRÉ, NATHANIEL, an anatomist, whose singularities of character are recorded by Nichols in his *Anecdotes of Hogarth*, died 1776.

SAINT-ANGE, ANGE FRANÇOIS FARIAU DE, a French poet and classical translator, 1747-1810.

SAINT-AUBIN, A., a Fr. engraver, 1736-1807.

SAINT-AUBIN, AUG. ALEXANDER D'HERBER, called, a French singer and actor, 1754-1818.

SAINT-AUBIN, C., a publicist, 1755-1820.

SAINT-AUBIN, G. C. See LEGENDRE.

SAINT-AULAIRE, FRANÇOIS JOSEPH I

BEAUPOIL, Marquis De, a Fr. poet, 1643-1742

SAINT-CHAMOND, CLAIRE MARIE MAZ

RELLI, Dame De, a learned Fr. writer, 1731-17

SAINT-CLOST, PERROS DE, or PIERRE

SAINT CLOUD, writer of a satirical allego called the *Romance of Reynard*, which consist of 2,000 verses, and has been translated into m European languages, 13th century.

SAINT-CONTEST, DOMINIQUE CLAUDE B. BERIE DE, a French statesman and diplomat 1668-1730. His son, F. DOMINIQUE, minister state for foreign affairs in 1751, under the influe of Madame de Pompadour, 1701-1754.

SAINT-CYR, ODET JOSEPH DE VAUX GRY, Abbé De, a Greek scholar, preceptor of dauphin, son of Louis XV., died 1761.

SAINT-CYRAN, JEAN DUVERGIER DE H. RANNE, Abbé De, a Jansenist theolog., 1581-16

SAINTE-BEUVE, JACQUES DE, a writer Grace and Predestination, 1613-1677.

SAINTE-CROIX, GUILLAUME EMMAN. JOSEPH, Baron De, a learned French histor author of 'Researches into the Mysteries Paganism,' 'Critical Examination of the Histo of Alexander the Great,' and other works of l value, 1746-1809.

SAINTE-CROIX, or SANTA CROCE, PI. PER DE, cardinal and papal nuncio, 1513-156

SAINT-EVREMOND, C. MARGUERITE St. DENIS, Seigneur De, a royalist and *protégé* Mazarin during the troubles of the Fronde, distinguished as an elegant writer, 1618-1703.

SAINT-FAL, S. M., a French actor, 1760-1

SAINT-FLORENTIN, L. PHELYPEAUX, C. De, son of Phelipeaux de la Vrillière, minist various functions for more than fifty years to l XV., and a debauched character, 1705-1777.

SAINTE-FOIX, GERMAIN FRANÇOIS POU. DE, a French writer and antiquarian, 1698-17

SAINT-GALL, THE MONK OF, an anonym Latin writer of the 9th century.

SAINT-GELAIS, OCTAVIUS DE, a poet bishop of Angoulême, and biographer of Louis I 1466-1502. MELLIN, his natural son, an ec astic, and au. of Latin and French poems, d. 1

SAINT-GENIES, J. DE, a Fr. poet, 1607-

SAINT-GENIS, A. N., a Fr. lawyer, 1741-3

SAINT-GEORGE, CHEVALIER DE, a mul born of a negress at Guadaloupe, greatly distinguished by his accomplishments at the Fr court, and especially for his skill as a swords He commanded a troop of horse at the begin of the revolution, 1745-1801.

SAINT-GERAN. See GUICHE.

SAINT-GERMAIN, COUNT DE, a sin character, some way connected with the *illust* of last century, and equally remarkable for extent of his knowledge and his communica with the French court, especially with Louis and Madame de Pompadour. He is said to died at Schleswig in 1784. The curious s compare with his pretensions the traditions o *Wandering Jew*, which are collected togeth the *Chronicles of Cartophilus* (so called), published by David Hoffman.

SAINT-GERMAIN, ROBERT, Count 1

esult and statesman, minister of war to Louis VI., author of *Memoirs*, 1708-1778.

SAINT-GERMAN, or SEINT-GERMAN, CHRISTOPHER, an Eng. lawyer of the 16th cent.

SAINT-GILES, otherwise *Joannes Anglicus*, *Jean de St. Albin*, a learned theologian, and doctor of medicine to Philip Augustus, king of France, died about 1255.

SAINT-HILAIRE. See GEOFFROY.

SAINTE-HUBERTI, ANTOINETTE CECILIA LAVAL, a French opera singer, 1756-1821.

SAINT-HURUGE, MARQUIS DE, a character the French revolution, about 1750-1810.

SAINT-HYACINTHE, HYACINTHE CORDONER, better known as *Themiseul de Saint Hyacinthe*, an ingenious French critic, 1684-1714.

SAINTE-HYACINTHE. See CHARRERIE.

SAINT-JOHN. See BOLINGBROKE.

SAINT-JORRI, PIERRE DUFAR DE, in Latin *trus Faber*, a learned French Jesuit, 1540-1600.

SAINT-JOSEPH, ISIDORE, a theologian and historian of the Carmelites of Italy, died 1666.

SAINT-JOSEPH, PIERRE MATHIEU DE, otherwise *Pierre Foglia*, an Asiatic missionary and botanist, born in Naples 1617, died 1691.

SAINT-JULIEN, L. G. BAILLET, Baron DE, miscellaneous writer, 1720-1780.

SAINT-JULIEN, PIERRE DE, a partizan of league, and historian of Burgundy, 1520-1593.

SAINT-JURE, J. B. DE, an ascetic, 1588-1657.

SAINT-JUST, ANTOINE, one of the most remarkable characters, all things considered, produced in the revolutionary epoch of France, was born at Nîmes in the Nivernais 1768, and was only twenty-two years of age when the revolution had grown to white heat in 1792-3. He was the son of a knight of St. Louis, descended from a distinguished family, and had passed through a brilliant career as student, when he became adjutant-major in a legion of the national guard; and in this position met the acquaintance of Robespierre. The alliance of these two men is one of the most interesting studies presented by the history of those times. The intelligence of St. Just was as cold, dry, and glassy as that of Robespierre, his character austere, his ambition as great, his personal courage, moral and physical, unsurpassed by any character known to history, and his enthusiasm *discretely sui generis*, for we are not only unacquainted with anything resembling it, but it appears as we see it, to contradict the word itself. Light, sparkling, and dauntless, in Camille Desmoulins, the character of mind strikes us as one common to all ages and to every cause; in St. Just, on the contrary, heated to the highest pitch, and star-like in brightness, it is yet fixed in preternatural duration, or if it ever stir, seems only to string up his nerves as by a magnetic tension to make the stronger and more resonant organ of the heroic spirit. In cold impassive reason, the two men St. Just and Robespierre, resemble each other, as the strict purity of their lives, but in this quality there is no comparison, and to explain St. Just we must suppose the wildest enthusiasm in the outward nature transfixed and bound down to the inner purposes by the gleam of the frigid intelligence in the inner. His almost feminine countenance, and his perfect devotion to Robespierre, obtained for St. Just this striking but profane

appellation: *the Saint John of the Messiah of the People*. He surpassed his master in impassibility as the terrible events of the revolution swept by, and on the night of the September massacres slept soundly in the same chamber where Robespierre paced up and down watching, as he expressed it, 'like remorse or crime.' At this time, the name of St. Just was almost unknown to the people, but he took his place in the National Convention, which met soon afterwards, with the air of one accustomed to be heard and obeyed as an oracle. He was the mask of the spirit of Robespierre, and so perfectly devoted to him, that the ideas of the one were uttered by the voice of the other, not in slavish subjection, but with more axiomatic and unanswerable simplicity, and with a more daring application to emergencies; it was, as if the soul of Robespierre had two bodies, the one more plausible in utterance, the other sharper and more remorseless. This devotion of St. Just was entirely due to the acquiescence of his reason in the sentiments of Robespierre, and to his solemn conviction that the republic could only triumph by those ideas: he was strictly *the minister of Robespierre the dictator*, and he embodied the conceptions of his master in those practical measures which could alone carry him to power. The overthrow of the Gironde and the Dantonists was only a step towards the concentration of every power of the state in the committees of the convention, formed to work under one head; the struggle which he directed, in fact, was that of a republic one and indivisible, opposed to the idea of a confederation which it was impossible to form in imitation of the United States that had been the natural growth of time and circumstances. After the fall of the Girondins, the triumvirate of Robespierre, Couthon, and St. Just, was formed definitely in the committee of *Salut Public*, and under the dictation of this body, at the time when France was menaced with destruction, no right, whether of life or property, was allowed to be pleaded in preference to the supreme right of the nation to save itself. The inexorable logic of this argument, put in force, became *the terror*, and they who look upon a Robespierre and a St. Just as mere spirits of darkness, and agents of iniquity, should consider well the sorrowful nights and days which this young man of twenty-five or six must have passed when he wrote in his diary: 'It is but a small matter to quit a life like this, a state of being so miserable that the only choice left us, is to become the accomplice of crime or the helpless witness of it.' The most striking proof of his heroism was given when the Austrians, reunited to the army of Condé, had forced the lines of Weissenbourg, and were advancing upon Strasburg. Sent there with Lebas, in the character of a proconsul, St. Just charged at the head of the Alsatian peasantry, hastily armed, and with an intrepidity that astonished the soldiers, rolled back the invaders, and saved his country. In this character he was the legal autocrat of the entire district, and in the emergency the lives and properties of all were at his disposal; was he therefore merciful or cruel when he saved 'thousands of heads,' as it is confessed, by sending one scoundrel to the guillotine? In short, there is only one honest way of judging these men, and that is by the exceptional character

of the times, and not as Christians, for such they were not, but as the heathen avengers of the crimes and errors of many generations of pretended Christians. St. Just, true to the last, accompanied Robespierre to the scaffold, and regarded with a disdainful air the crowd vociferating around him. He was executed on the 27th of July, 1794, or according to the republican style, on the 9th Thermidor, year 2. His poems and political writings bear witness to his literary talents. [E.R.]

SAINT-JUST, GODARD D'AUCOURT DE, a dramatic and miscellaneous writer, 1770-1826.

SAINT-LAMBERT, CHARLES FRANCIS, MARQUIS DE, a fabulist and philosopher, 1717-1803.

SAINT-LAURENT, BARON DE, a French artillery officer in the wars of Napoleon, 1763-1832.

SAINT-LEU. See **HORTENSE**.

SAINT-LO, A. DE, a Fr. missionary, d. 1638.

SAINT-LOUIS. See **LOUIS (IX.)**.

SAINT-LOUIS. See **PETER OF ST. LOUIS**.

SAINT-LUC, FRANÇOIS D'ESPINAY DE, a French commander, who distinguished himself against the Calvinists, and became a master of artillery under Henry IV., killed 1597. His son, **TIMOLEON**, ambassador to England and marshal of France, 1580-1644.

SAINT-MARC, C. H. LEFEBVRE, an editor, historian, and chronologist, 1698-1769.

SAINT-MARC, J. P. ANDREW DES ROSINS, MARQUIS DE, a poet and dramatist, 1728-1813.

SAINT-MARCELLIN, a natural son of the celebrated Fontanes, distinguished by his valour at the battle of Borodino, in the Russian campaign of 1812, and as an opera writer, 1791-1819.

SAINT-MARS, a French officer of quality, whose name has been preserved in history in connection with that most perplexing of all secrets, 'The Man in the Iron Mask.' Vague rumours of such a prisoner were all that existed till the publication of Voltaire's *Louis XIV.*, when for the first time they assumed due consistency. After all that has been written on the subject, it cannot be said that more is known at this hour than had been related by Voltaire, except some confirmations of the substantial accuracy of his account, and some additional traits of character, which may help to solve the riddle, if ever fresh light should be thrown upon it by the publication of hitherto unedited state documents. Briefly, the story is as follows:—Towards 1662, a state prisoner of noble stature, and the most accomplished demeanour, wearing a mask of black velvet, was consigned to the custody of Saint-Mars, at that time governor of the castle of Pignerol. In 1686, Saint-Mars was transferred to the Isle of Saint-Marguerite, in the sea of Provence, and he took his prisoner with him: he did the same when he became governor of the Bastille in 1690. This mysterious person was uniformly treated with the highest respect by the governor, who himself waited upon him, and the same deference was shown by the marquis of Louvois on occasion of a visit previous to his removal from St. Marguerite: his mask was so constructed with steel springs that he had perfect liberty to eat and drink; he was served in the richest manner, and was accustomed to entertain himself with books and music. Before his transference to the Bastille, he seized an opportunity to scratch some intelligence on a

silver plate, which he threw out near a fishing boat that he perceived moored to the shore; the fisherman, however, was unable to read, and he carried the plate to Saint-Mars, who would not allow him to depart until perfectly satisfied that no discovery had been made. In the end the prisoner died in the Bastille, and was buried in the parish cemetery of Saint Paul, by midnight November, 1703, under the evidently feigned name of Marchiali: the furniture of his room, the window casements, and every possible thing which he could have left any record, were then carefully burnt; the ceiling was pulled down and reduced to powder; finally, the Bastille records since perused, were found to contain only the obscurest allusions to him. The last statesman who possessed this secret was Chamillac, who, his deathbed refused to make a discovery of, though entreated by his son-in-law, the second marquis de Feuilleade, he said he had been bound by an oath. The medical attendant of the prisoner had never seen his face, but says that he informed him a few days before his death that he believed he was near sixty years of age; the registry of the burial, on the other hand, gives forty-five as the age of the pretended Marchiali, but this again may have been designed to baffle investigation. This strange history, it will be observed, commences about the period of Mazarin's death, and it covers the greater part of the reign of Louis XIV. It would be inconsistent within its limits to discuss the conjectures to which it has given rise—some of them sufficiently romantic. What surprises us is, that historians do not observe how little reason would be left for the careful preservation of the secret beyond the lifetime of the prisoner, if it could be proved he was any one of the persons hitherto supposed. [E.]

SAINTE-MARTHE, CHARLES FRANCIS, MARQUIS DE, a French fabulist and poet, 1717-1800.

SAINT-MARTIN, J. ANTOINE DE, cell. for researches into the history of Armenia, 1791-1800.

SAINT-MARTIN, J. DIDIER DE, a Christian missionary and writer in Chinese, 1743-1801.

SAINT-MARTIN, LOUIS CLAUDE DE, called by himself *le Philosophe inconnu* (which we may translate *philosopher of the unknown*), was born at Amboise of a noble French family, 1743, and is said to have commenced his metaphysical studies upon the publication of 'Art of Knowing One's Self,' written by J. A. Abbadie, a French protestant theologian. He was sometimes confounded with **MARTINEZ PASO**, who was the real founder of the sect of the *Martinists*, and the first teacher, but by no means the master, of Saint-Martin. The period when the two philosophical inquirers became acquainted was marked by a reaction against the scepticism of the encyclopedists, against which Saint-Martin launched the first and most valuable of his writings, entitled *Des Erreurs et de la Vérité*, published at Lyons 1775, between which period and 1778 the operations of the genuine Martinists in France had become extinct. The name, in fact, still remained. The *Chevaliers Bienfaisants* were formed under the name of *Philalethes*, and so on. They have embraced the doctrines of Saint-Martin. Swedenborg, invited the former to take the president's chair in 1784, but he refused the honour, as to Swedenborg, the writer has before him

original letter, written by a French disciple of his in 1785, utterly disavowing the connection, and charging these very Martinists, so called, with the pursuit of magic:—so much for the right of such societies to assume names, and for the sarcasm of Lamartine ('Girondins,' vol. i. p. 188), at 'The theosophists, disciples of the sublime but obscure Swedenborg, the Saint-Martin of Germany, pretended to complete the gospel, and to reform humanity,' &c. It is a point of some interest in the history of those times, for not only are the occult societies of Germany and France influential among the people, but the most distinguished princes were enrolled amongst them. It may be read in the article WEISHAUPF. Saint-Martin was neither faithful to one system or another, but coquetted with them all, Martinez, Squalis, Alchymy, Animal Magnetism, Swedenborg, and Jacob Boehmen, until he was cast more in the midst of the French revolution, and came, as he regarded himself, 'the Robinson Crusoe of spiritualism.' He possessed vast original genius and metaphysical insight, and as a thinker he digested and assimilated whatever he came to and to his taste; we should not be far from the truth, perhaps, in pronouncing that the principles of Boehmen had taken the deepest hold of his imagination and reason; and that much in his writings may be regarded as a modern reduction of them, tintured, however, by what he had acquired from Swedenborg, and by his experience in animal magnetism. The first of his works is mentioned above. It was followed by 'Tableau Naturel des Rapports entre Dieu, l'Homme, et l'Univers,' 1782, the principle of which is the explanation of *things* by *man*, and not of *man* by *things*. In 1790 he published 'l'Homme du Désir.' In 1792 the 'Ecce Homo,' intended to correct the rage at that time for magnetic prodigies, and to elevate the soul to sublime mysteries. In 1796 appeared 'Le Nouvel Homme.' In 1800, 'De l'Esprit des choses, ou de l'œil Philosophique sur la Nature des Êtres par l'Objet de leur Existence,' a work which has been denounced as 'a tissue of foolish positions,' on the strength of an extract, which is, notwithstanding, of great philosophic worth. In 1802 he ushered to the light of day 'Le Mystère de l'Homme Esprit,' with these remarkable words:—'Although the subject of this work possesses greater clearness than my others, it is so remote from ordinary ideas to let me hope of much success. I have often felt while writing that the result would be much as if I had played a collection of waltzes and contre-dances on my violin in the cemetery of Mont-Martre, where it would be fine to do with my bow, but really the masses lying there would neither understand my music nor dance to it!' Besides these and other works of his own, Saint-Martin translated into French the 'Three Principles,' and the 'Aurora,' of Jacob Boehmen. The Russian statesman, Prince Gitzin, is said to have been his convert, but we are not aware whether any connection exists between this fact and the rise of the Martinists in the vicinity of Moscow: a very insufficient account of the matter will be found in Pinkerton's translation of a work concerning the state of the Greek church, and the Scythian of Platon. Saint-Martin, like

so many others of the noblesse of France, suffered by the French revolution, and being implicated in a conspiracy, owed his life to the revolution of Thermidor. Died 1803. [E.R.]

SAINT-MARTIN, MICHEL DE, a religious founder and writer, 1614-1687.

SAINT-MAURICE, ALEX. MA. ELEONOR, Prince De Montbarey, minister of war to Louis XVI. from 1776 to 1780, au. of Memoirs, 1732-96.

SAINT-MAURIS, J. DE, a French juriconsult, statesman, and diplomatist, died 1555.

SAINT-MAURIS, PRUDENT DE, a juriconsult and ambassador, of another family, d. 1584.

SAINT-MEARD, FRANÇOIS JOURGNIAC DE, a journalist and chevalier of the order of Saint Louis, born at Bourdeaux 1745, and known at the period of the revolution as the editor of a royalist paper, entitled 'Journal de la Cour et de la Ville.' After the installation of the revolutionary leaders in the Paris Commune, by the insurrection of August 10, 1792, Saint-Meard was arrested and imprisoned in the 'Abbaye,' where he became an eye-witness of the September massacres. He has related his terrible experience in a brochure entitled, 'My Thirty-six Hours' Agony,' the thrilling interest of which carried it through above a hundred editions. After the 'terror' Saint-Meard continued to frequent the literary salons of Paris, and received the humorous title of 'President and General-in-chief of the Universal Society of Gobe-mouches.' Died 1827. [E.R.]

SAINT-MICHEL, A. DE, a Fr. wr., 1795-1827.

SAINT-MORYS, ET. BOURGVEIN-VIALART, Count De, a French general, known as a naturalist and miscellaneous writer, 1772-1817.

SAINT-NON, JEAN CLAUDE RICHARD, Abbé De, a celebrated amateur in the arts, 1727-1791.

SAINT-PALAYE, J. B. DE LA CURNE DE, the historian of French chivalry, 1697-1781.

SAINT-PARD, otherwise P. N. Van Blotaque, a French Jesuit and religious writer, 1734-1824.

SAINT-PAVIN, DENIS SANGUIN DE, a French poet and ecclesiastic, 1600-1670.

SAINT-PERAVI, J. N. M. GUERINEAU DE, a political writer and poet, 1732-1789.

SAINT-PHILIP. See BACCALAR Y SANNA.

SAINT-PIERRE, CHARLES IRENEE CASTEL, Abbé De, a political writer and philanthropist, who was educated as an ecclesiastic, and devoted himself theoretically and practically to the public good. Among his works is a 'Project for a Perpetual Peace,' conceived at the congress of Utrecht (1713), and pronounced by the cardinal Dubois 'the dream of a good man.' He was far in advance of his age; and being excluded from the French Academy for the courageous expression of his opinions concerning the government of Louis XIV., that body took more than half a century to revise their judgment of him; at length, in 1775, his eulogium was pronounced by D'Alembert. The French are indebted to him not only for his philosophical 'dreams,' but for that expressive word *bienveillance*, which he introduced into the language. [E.R.]

ST. PIERRE, EUSTACE DE, a patriotic citizen of Calais, who distinguished himself when Edward III. of England besieged that place in 1347.

SAINT-PIERRE, J. H. BERNARDIN DE, a celebrated French writer, well known in this coun-

try by his beautiful romance of 'Paul and Virginia,' was born at Havre 1737, and passed some time in the Isle of France, where the scene of his story is laid, as an engineer. He was a friend of Rousseau, and author of works making altogether twelve volumes, recommending a higher virtue than that exhibited in his own life. Died 1814.

SAINT-PRIEST, F. E. GUIGNARD, Count De, an ambassador and partizan of the Bourbons, 1735-1821. His son, **G. EMMANUEL**, a general who served against France, 1776-1814.

SAINT-PRIEST, or **SAINT-PRET, JEAN YVES**, an archivist and historian, died 1720.

SAINT-RAMBERT, GABRIEL DE, a Cartesian philosopher and friend of Rousseau, died 1720.

SAINT-REAL, CESAR VICHARD, Abbé DE, a controversialist and historian, 1639-1692.

SAINT-REMY, PIERRE SURIREY DE, a French officer and writer on artillery, died 1716.

SAINT-SAPHORIN, A. F. L. DE MESTRAL DE, a diplomatist employed by the Danish court, a great connoisseur in art, 1738-1805.

SAINT-SILVESTRE, J. L. DU FAURE, Marquis De, a commander under Turenne, 1627-1719. **C. F. DU FAURE**, of the same family and title, an historical writer, 1752-1818. **N. H. MAURICE DU FAURE**, called president St. Silvestre, a magistrate and political writer, died 1811.

SAINT-SIMON, C. F. DE ROUVROY SANDRICOURT, a learned French prelate, and collector of a valuable library, 1727-1794. His brother, **LOUIS DE ROUVROY, Duc De Saint-Simon**, a statesman and diplomatist during the regency of the duke of Orleans, author of *Memoirs of the highest value towards the history of his times*, 1675-1755.

SAINT-SIMON, CLAUDE HENRI, Count De, founder of a school of social science and rational doctrine named after him, was born at Paris 1760. Member of an illustrious family which traced its origin, through the counts of Vermandois, to Charlemagne, he had the best education that his country could then afford, and one of his teachers was the great encyclopedist D'Alembert. He entered the army, according to the prevailing fashion with the young nobles, in 1777, and though he hated war, he embarked, two years later, for America, and served under Washington, thinking only of some vast social design that would be promoted by the emancipation of America. In 1783 he returned to France, and quitting the military career, he was known at the period of the revolution as a speculator, conjointly with a count de Redern, in the national domains: his object was to acquire property as a means of realizing his ideas, and he regarded the convulsions which then agitated society as nothing more than the preparatory destruction of the old order of things. During the Terror, St. Simon was arrested in mistake for another of the same name, and only recovered his liberty after the revolution of Thermidor, 27th July, 1794. His time and fortune were now devoted with apostolic enthusiasm, to what he considered his mission, and, in 1807, he gave his ideas to the world in his 'Introduction to the Scientific Labours of the Nineteenth Century.' This work was intended as a supplement to the reports demanded by Napoleon on the progress of science since 1789, and in connection with Saint-Simon's other works, may be said to contain the

germ of all that is valuable in Comte's posit philosophy. It declares the time arrived when the whole body of science with a view to social progress, and lays down the principle that useful labour is the proper destiny of all men. It was followed in 1808 by Letters addressed to the Institute; in 1810, by a 'Prospectus of a New Encyclopædia;' in 1814 by the 'Re-organization of European Society;' and nearly every year, in short, by some fresh development of his philosophical speculations. The sum of his meaning may be expressed somewhat in these terms: as Newton reduced astronomy to a positive law when he covered gravitation, so may all the sciences and speculations of men be brought, practically, to a positive doctrine; chemistry and the other branches of experimental philosophy come first; metaphysical and theological knowledge follow in order of their remoteness from demonstration; and social science as the most complex of all complex the encyclopædia of human knowledge and experience. Newton, it is argued, laid the foundation of this temple of science by demonstrating the law of gravitation; and Locke proved that it could be carried to completion by demonstrating the perfectibility of the human spirit. This, we say, is the fundamental conception of Saint-Simon's, and has become more recently of Comte's, philosophy it is to be regretted that, in the carrying out of this idea, they are both deficient in the sense of what constitutes religion, and in any true, or even tolerable recognition, of revealed truth; the church and its doctrines are at best a kind of spiritual police force, easy to be dispensed with when positive theism is reached. These works, however, are valuable political studies, they point to the results at which society must arrive, and suggest a valuable method of reviewing history and philosophy: to be safely used they must be treated like crude ore, from which the true metal is only to be extracted by a severe process. Saint Simon exhausted his resources to such a degree that he passed a severe winter without fuel, almost without food. He once attempted suicide, but the pistol-shot only deprived him of the use of one eye. He died at Paris May 19, 1825, these last words on his lips 'L'Avenir est à nous' (the future is ours). He left a small, but devoted body of disciples at his death, who had for their organ a periodical entitled 'Le Producteur;' then leader died of a broken heart, and his party being scattered by the interference of government his successor, M. Enfantin, became an active promoter of railways and other objects of immediate utility.

SAINT-SIMON, MAXIMILIAN H. DE, a botanist, tactician, and historian, 1720-1799.

SAINT-URSIN, M. DE, a medical physician in the French army, 1763-1818.

SAINT VINCENT. JOHN JERVIS, earl of Vincent, and admiral of the British fleet, was born 1734, at Meaford in Staffordshire. He entered the navy at the age of ten, under Admiral Rodney, served in 1759 in the expedition against Quebec, and had risen to the rank of post-captain when the American war broke out. He distinguished himself greatly in the course of this war, and was knighted; and early in the next great war against revolutionary France he was made an admiral.

1797 he had the command of the Mediterranean fleet, and was specially employed in watching the ports of Spain, which country was in alliance with France against England. The Spanish admiral last put to sea with 27 large ships of the line, and was brought to action by Sir John Jervis, who had only 15 ships of much inferior size and weight of metal. This glorious battle was fought off Cape St. Vincent, 14th February, 1797, and ended in the complete defeat of the Spaniards and the capture of four of their ships. The English admiral was rewarded for this victory by the title of Earl St. Vincent, and received a pension of £3,000 a year. In 1800, Lord St. Vincent was placed in command of the channel fleet, and in 1801 he was the first lord of the admiralty, from which station was removed when Pitt returned to power in 1804. Lord St. Vincent was a stern reformer of abuses, having no respect to persons, and visiting the misdeeds of men in rank and authority as severely as he dealt with the faults of the humblest man in the fleet, or the meanest artizan in the yard. England is indebted to him not only for splendid services in action against the enemy, but for the improved discipline and spirit, which he introduced into every department of our navy, among officers as well as men, and for the noble example of devotion to duty which he always set in his own person. He saw and brought forward into notice the abilities of Nelson, Duckworth, Strachan, Lubbock, Parker, and many more of our best officers during the war; and he was as firm a friend of honour and merit, as he was an unflinching foe of dishonesty and incompetency. Earl St. Vincent died 15th March, 1823. [E.S.C.]

SAINT-VINCENT, GREGORY DE, a French mathematician and writer on comets, 1584-1667.

SAINT-VINCENT, PAUL DE. See **PAUL**.

SAINTE-YVES, C., an oculist, 1667-1738.

SALTER, D., an Austrian painter, 1674-1705.

SALA, ANGELO, an Italian physician and hermetic chemist; died 1639.

SALA, N., an Italian composer, 1710-1800.

SALA, V., an Italian painter, 1803-1835.

SALADIN, otherwise **SALAH - ED - DEEN**, sultan of Egypt and Syria, one of the most enlightened and chivalrous of Saracen princes, was born at the castle of Tecrit, on the Tigris, of which his father was governor in 1137. His family had many warriors to the princes of Mesopotamia and Aleppo, and Saladin was about thirty years of age when he accompanied his uncle, Shiracoh, in an expedition to Egypt; on whose death, in 1168, he became commander of the forces. Like Mehemet Ali in recent times, he possessed power and action sufficient to render himself independent; and to omit details of his wars, we find him master of Syria and Egypt in 1183, so far at least as to be in dread of opposition from the native princes. Christian knights, however, had carried their arms to the East, and Saladin had been defeated several years before by Reginald De Chatillon, grand-master of the Templars, who was now in possession of Jerusalem, and in the habit of committing outrages upon the Saracens. Saladin wisely vindicated his own authority before attacking the invaders; and among his national improvements may be mentioned the foundation of colleges and hospitals, and the fortification of his cities,

especially of Cairo. In 1187 he gave battle to the Christian army of 80,000 men on the plain of Hittin, or Tiberias, and having completely vanquished them, he slew Chatillon with his own hand, and took Guy of Lusignan, the Christian king of Jerusalem, prisoner: soon afterwards he captured the Holy City, and though he put the templars and knights hospitaliers to the sword, the other Franks had the alternative of becoming slaves or paying ransom. News of these disasters arriving in Europe, produced the second crusade, in which Richard Cœur de Lion took part in alliance with Philip Augustus of France; preceded a year or two by the emperor Frederic Barbarossa, who died before their arrival, and an immense host of combatants. The key of Syria, then, as it is now, was the fortress of St. Jean D'Acre, and the siege endured two years, 1189-1191, in which interval prodigies of valour were performed on both sides; the fortress at length surrendered, and the crusade was concluded by another year's truce between Saladin and Richard, after which the latter embarked for England. Neither of these remarkable characters were destined to survive their acquaintance with each other very long. Saladin was seized with a bilious fever at Damascus, and died there at the moment he was contemplating an extensive programme of conquests, in 1193.—Christians and Saracens have vied with each other in writing panegyrics on the justice, valour, generosity, and political wisdom, of this prince, who possessed the art, not simply of acquiring power, but of devoting it to the good of his subjects. Seventeen sons and a brother survived him to share his power, and his conquests were presently divided into several states. [E.R.]

SALADIN II., great-grandson of the preceding, assassinated after a vain attempt to recover the dominion of Egypt, 1229-1261.

SALADIN, J. B. M., a Fr. politician, d. 1810.

SALARIO, A., a painter of Milan, died 1559.

SALAZAR Y MARDONES, P. DE, a Spanish historian of the emperor Charles V., died 1570.

SALAZAR Y MENDOZA, P. DE, a Spanish historian of that monarchy, 17th century.

SALDEN, W., a Dutch divine, died 1694.

SALE, A. DE LA, a French writer, 1398-1462.

SALE, GEORGE, an Oriental scholar, best known by his translation of the Koran, was born in 1680, and died in 1736. But little is known of his personal history. He contributed the cosmogony, and a small portion of the other matter to the 'Universal History,' and his MSS. in the Radcliffe Library, comprise some valuable articles from Arabic, Persian, and Turkish literature.

SALE, SIR ROBERT HENRY, an illustrious name in the annals of Anglo-Indian warfare, was born in 1782, and entered the army as ensign in the 36th Foot 1795. He was just in time to take a subordinate part in the achievements at the close of last century, which secured that magnificent country to the British crown; his name was more distinctly marked, however, in the Burmese war of 1824-6, in the course of which he was commissioned as lieutenant-colonel. From that period till the commencement of our enterprises in Afghanistan, there was little opportunity for reaping other laurels; but events were ripening, which soon demanded the soldier's prowess, and were

destined to tax the utmost resources of our commanders. These circumstances date from 1835, commencing with the mission of Alexander Burnes, the envoy of Lord Auckland, whose object was to negotiate for consolidating the government of Dost Mahomed, as a bulwark against the designs of Russia and Persia. There appears to have been much insincerity, and certainly a good deal of procrastination and timidity in these overtures, so that eventually Dost Mahomed, instead of becoming our ally threw himself into the arms of our enemies. In 1838 Sale was appointed to the command of the 1st Bengal brigade in the impending war, and his troops formed the advance throughout the whole Afghanistan campaign; finally, in September, 1840, he defeated Dost Mahomed at Purwandutrah, and compelled him to surrender to Sir William M'Naghten. In 1841 the war was renewed, and Sale commanded the brigade which stormed the Khoord Cabul Pass, but was compelled to retreat upon Jellalabad, followed by the army of Akhbar Khan. Shut up in this place, Sale and his gallant troops were closely besieged from the 12th of November, 1841, to the 7th of April, 1842, on which day he made a grand attack upon the besieging army, and so completely routed it, that he captured the guns, the ammunition, and the camp. In 1845 the Sikh army, commanded by Sirdar Tej Singh, crossed the Sutlej, and Sale was now with the British forces under Sir Hugh Gough, as quartermaster-general; the two armies met in deadly conflict at the battle of Moodkee, Dec. 18, and victory being declared for the British, Gough pushed on, and, four days later, fought the decisive battle of Ferozeshah. In the first action Sir Robert Sale had his left thigh shattered by a grape shot, which proved mortal to him; he was then in the sixty-fifth year of his age. The principal works illustrating this series of events are a 'Narrative of the War in Afghanistan in 1838-9,' by Capt. H. Havelock, 2 vols., 1840; 'A Memoir of India and Afghanistan,' by J. Harlan, 1842, and 'The History of the War in Afghanistan,' by J. W. Kaye, 2 vols., 1851. A curious little work was also published, by H. T. Prinsep, in 1844, entitled 'Note on the Historical Results deducible from Recent Discoveries in Afghanistan.' We may add that our Sikh enemies are the representatives of a religious reformation preached in India by a contemporary of Luther. [E.R.]

SALERNE, F., a French naturalist, died 1760.

SALES, ST. FRANCIS DE. See **FRANCOIS.**

SALES, LOUIS, Count De, brother of St. Francis, a soldier and diplomatist, famous for his defence of Savoy against the Spaniards, and of the city of Annecy against Louis XIII.; he also negotiated the treaty of Dôle, 1577-1654. **CHARLES**, his son, governor of St. Christopher, 1625-1666.

SALFI, F., a French dramatist, 1759-1832.

SALGAR, a Turcoman chief, founder of the dynasty named after him, died 1171.

SALIAN, J., a French Jesuit, 1557-1640.

SALICETTI, G., an Italian physician, died 1250.

SALICETTI, CHRISTOPHER, a native of Corsica, who promoted the union of that country to France, and was successively deputy to the constituent assembly, member of the convention, and the council of 500, and finally minister of war at Naples under Joseph and Murat, 1757-1809.

SALIEVI, A., an Italian composer, 1750-18

SALIMBEIN, CAVALIERE VENTURA, Italian painter of sacred subjects, 1557-1613.

SALINAS, FRANCIS DE, a Spanish scholar and writer on musical theory, 1518-1590.

SALIUS, HUGUES DE, a French physician and antiquary, 1632-1710. His brother, **JEAN B. TISTE**, a writer on the wines of Burgundy, 1704.

SALISBURY. See **Cecil, JOHN.**

SALISBURY, W., a Welch lawyer, first translator of the liturgy into that language, died 12

SALLE, J. A., a French Jesuit, 1712-1778.

SALLE, J. B. DE LA, a French priest founder of a religious order, 1631-1719.

SALLRE, P. DE LA, a designer, 1723-1804.

SALLENGRE, A. H. DE, a Dutch writer and counsellor to the prince of Orange, 1694-1723.

SALLO, DENIS DE, a French writer, the founder of modern periodical criticism, 1626-1669.

[Sallust—From an Antique Bust.]

SALLUST, (CAIUS SALLUSTIUS CRISPUS) Roman historian, was born at Amiternum, a town of the Salimines, to the north-east of Rome, in 86 B.C. Though a member of a plebeian family he was educated for the service of the state, and entered upon public life during the struggle between aristocracy and the democracy which ended in the subversion of Roman liberty. About the year twenty-seven he obtained the quaestorship; in the following year, tribune of the people in B.C. 52, he took an active part in connection with the outrages which resulted in the murder of Claudius and the banishment of Milo, identifying himself with the popular party and thereby incurring the deadly hatred of the nobility. Two years after the expiry of his tribuneship he was expelled from the senate by the accusers on the ground of immoral conduct; it is quite possible that his greatest offence was his attachment to the cause of the people, which the judges belonged to the opposite faction. After his degradation, he seems to have repaired to a camp in Gaul, and to have accompanied his friend in his invasion of Italy. By Caesar's intercession he was restored to his seat in the senate, and to the office of praetor B.C. 47, in which year he accompanied his patron to Africa, and took part in the conclusion of the war, was left as governor of Numidia. While invested with this im

not he is said to have enriched himself by plundering the country placed under his charge; and the allegation is to some extent confirmed by the fact of the immense wealth which he afterwards possessed, and which he profusely expended in forming splendid gardens on the Quirinal hill. On his return from Africa Sallust withdrew from public affairs, and spent the remainder of his life in his luxurious retreat, engaged in the composition of his historical works which he left behind him. His death took place B.C. 34. His historical works consisted of—1. The *Catilina*, or History of the conspiracy of Catiline in B.C. 63, of the events of which he was a spectator. 2. The *Jugurtha*, or History of the War maintained by the Romans against Jugurtha, king of Numidia, from B.C. 111 to 106, the materials for which he had probably collected during his residence in that country; and 3. The *Historia*, or histories, in five books, which are said to have comprised the period from the death of Sulla, B.C. 78 to B.C. 66. The first two works have come down to us entire, of the last we have only fragments; and the loss of it is the more to be regretted, as it must have contained an account of one of the most important periods of Roman history, respecting which our information is very vague and unsatisfactory. Of Sallust's character, as a politician and historian, very contradictory opinions have been expressed both by the ancients and the moderns. As a devoted partizan of Caesar, he was exposed to the censure of the party of Pompey; and it is therefore probable that the charge of immorality, though not unfounded, was somewhat exaggerated by party malevolence. The allegation of extortion in his province appears to rest on a firmer foundation. His philosophical inclusions have been blamed as misplaced, and containing opinions with which the writer did not sympathize, charges which must perhaps be to some extent admitted. His two works, however, must be judged as historical essays, illustrations of great political facts, and thus admitting a larger degree of latitude on the part of the writer, than would be admissible in continuous narrative. His style, though elaborate and artificial, is generally concise and perspicuous, but is occasionally marred by the use of archaic words, and by a love of brevity which is obviously the result of imitation. He is, however, entitled to the credit of being the first Roman who wrote what is regarded as history. [G F.]

SALLUSTIUS, a Platonist of the 4th century.
 ALMANAZAR, a king of Nineveh, 8th c. B.C.
 ALMASIUS. See SAUMAISE.
 ALMERON, A., a Span. theologian, 1515-85.
 ALMERON, E. G., a Spanish statesman, d. 1832.
 ALMON, F., a French priest, 1667-1736.
 ALMON, J., otherwise *Maigret* or *Macrinus*, a Latin poet, teacher of the children of René of Anjou, 1490-1517. His son, CHARLES, a Latin poet, massacred on Bartholomew's day, 1572.
 ALMON, NATHANAEL, a non-juring divine, known as an antiquary and extensive writer of history, died 1742. THOMAS, his brother, a theologian and historian, died about 1750.
 ALMON, R., an Eng. mechanician, 1763-1821.
 ALMON, U. P., a Fr. mineralogist, 1767-1805.
 ALMON, W., a miscellaneous wr., d. abt. 1700.
 ALOME, a Jewish princess, died 72.

SALOMON, J. P., a Ger. musician, 1745-1815.
 SALONIUS, a French prelate, 5th century.
 SALT, HENRY, a traveller and philologist, author of an 'Essay upon Hieroglyphics,' d. 1827.
 SALTER, S., a learned divine, died 1773.
 SALTMARSH, JOHN, an Antinomian minister, chaplain in the army under Fairfax, died 1647.
 SALUTATO, L. COLUCCIO PIERIO, a Latin poet and chancellor of Florence, 1330-1400.
 SALVA, F., a Spanish physician, 1747-1808.
 SALVATOR ROSA. See ROSA.
 SALVERTE, ANNE JOSEPH EUSEBIUS BACONNIERE, a member of the French chamber of deputies, to which he was first returned in 1828. He was a liberal in politics, and wrote an 'Historical Essay upon the Names of Men and Places,' and a work on the 'Occult Sciences.' In the latter he ascribes all the mysteries of antiquity to the knowledge possessed by the priests in natural philosophy, and, that failing them, to trickery and imposture, 1771-1839.
 SALVI, N., an Italian architect, 1699-1751.
 SALVI, TARQUINIO, an Italian painter, 16th cent.
 GIAMBATISTA, his son and pupil, 1605-85.
 SALVIANI, H., an ichthyologist, 1514-1572.
 SALVIATI, F. ROSSI DE, an Italian painter, 1510-1563. For Salvati 'the Younger,' see PORTA.
 SALVIATI, GIOVANNI, an Ital. cardinal, dist. as a great protector of arts and letters, 1490-1553.
 SALVINI, A. M., a learned Italian, 1653-1729.
 SAMBUCUS, JOHN, a learned Hungarian physician, antiquary, and historian, 1531-1584.
 SAMERIUS, H., a German Jesuit, 1540-1610.
 SAMMES, A., an English antiquary, died 1679.
 SAMPSON, H., a nonconf. divine, died 1705.
 SAMPSON, THOMAS, an eminent reformer and companion of the refugees at Geneva, nephew by marriage to Latimer, 1517-1589.
 SAMSON, OLE JOHAN, a Danish dramatist and author of Scandinavian Tales, 1759-1796.
 SAMSON, a judge of Israel, 12th century B.C.
 SAMUEL, the last judge of Israel, and one of their prophets, supposed date 1132-1043 B.C.
 SAMUEL, a king of Bulgaria, 971-1014.
 SAMWELL, DAVID, surgeon of the *Discovery* when Captain Cook was murdered, died 1799.
 SANADON, N. S., a French Jesuit, 1676-1733.
 SANCERRE, L. DE, constable of France, distinguished in arms against the English, 1342-1402.
 SANCHES, ANT. NUNEZ RIBEIRO, a Portuguese physician in the Russian army, 1699-1783.
 SANCHEZ, F., a Portug. philoso., 1562-1632.
 SANCHEZ, FRANCISCO, in Latin *Sanctius Brocensis*, a Spanish grammarian, 1523-1601.
 SANCHEZ, G., a Spanish Jesuit, died 1628.
 SANCHEZ, PETER ANTHONY, a learned Spanish ecclesiastic and philanthropist, 1740-1806.
 SANCHEZ, T., a Spanish casuist, 1550-1610.
 SANCHEZ, T. A., a bibliographer, 1732-1798.
 SANCHO, IGNATIUS, a negro slave, remarkable for his attainments in polite literature, author of a 'Theory of Music,' 'Letters,' &c., 1729-1780.
 SANCHONIATHON, a Phœnician historian, regarded as the most ancient writer of the heathen world, is supposed to have been a native of Berytus, but as the age to which he is referred is beyond the historical epoch, nothing certain can be related of him. Even the authenticity of the fragments attributed to him has been disputed, but it only

requires an ordinary acquaintance with the understanding of those remote ages to be convinced that they are genuine remains of a very high antiquity, whether written by Sanchoniathon or any other. The history attributed to him was composed in the Phœnician language, and its materials collected from the archives of the Phœnician cities, and from the registers preserved in the Phœnician and Egyptian temples. It was translated into Greek by Philo Byblius, in the reign of Hadrian, and the existing fragments of it preserved by Eusebius amongst the citations of his 'Evangelical Preparation.' One fragment is called 'The Cosmogony,' professedly derived from Tautus, Thoth, Athothis, or Hermes. Another, and by far the larger, is called the 'Generations'; it presents many interesting points of comparison with the Mosaic Scriptures, and professes to be the real history of those times stripped of allegory. 'All these things, the son of Thabion, the first Hierophant of all among the Phœnicians, allegorized and mixed up with the occurrences and accidents of nature and the world, and delivered to the priests and prophets, the superintendents of the mysteries, and they, perceiving the rage for these allegories increase, delivered them to their successors and to foreigners; of whom one was Isiris, the inventor of the three letters, the brother of Chna, who is called 'the first Phœnician.' The third and last fragment is a few lines preserved from Sanchoniathon's history of the Serpent. The whole will be found in Cory, who suggests that Sanchoniathon's omission of any direct notice of the flood, in which he differs from all other ancient writers, may be accounted for by his determination to reject whatever was allegorical. [E.R.]

SANCROFT, WILLIAM, archbishop of Canterbury, one of the prelates sent to the Tower by James II. in 1688, for refusing to order the public reading of the king's declaration of indulgence in favour of the Catholics, 1616-1693.

SANCTIUS. See **SANCHEZ**.

SANCTORIUS, SAUCTORIUS, whose true name was Santori Santorio, an Italian physician of considerable distinction, was born at Capo D'Istria, in 1561, and died at Venice in 1636, aged seventy-five. He was the founder of what is called the Statical School in Medicine, and in 1612 published a treatise entitled, *Ars de Medicina Statica*, in which he endeavoured to estimate the loss of weight that the body undergoes by the various excretions, particularly by insensible transpiration, to which he attached much importance. [J.M.C.]

SAND, CHRISTOPHER VAN DEN, in Latin *Sandius*, a German Socinian, 1644-1680.

SAND, C. L., a German student, member of a secret society, and assassin, of Kotzebue, 1795-1818.

SANDBY, P., an English artist, 1732-1809.

SANDE, JOHN VAN DEN, a Dutch juriconsult and historian, died 1638.

SANDEMAN, ROBERT, founder of the sect who took from him the denomination of *Sandemanians*, was a native of Perth, in Scotland, where he was born 1723. He was educated at the university of Edinburgh, and having married a daughter of the Rev. John Glass, became a follower of his opinions and an elder in one of his churches. The subject of controversy which led to the formation of this party, was a particular view

of the nature of justifying faith, but they differed also, from other communions in the matter discipline and church fellowship, especially in the administration of the sacrament of the Holy Supper. Their fundamental tenets are Calvinist. Sandeman died at Danbury, aged forty-eight, 1771.

SANDEN, H. DE, a Ger. physician, 1672-17. **SANDER, ANTHONY**, in Latin *Sanderus*, Flemish topographer and antiquary, 1586-1666.

SANDERS, NICHOLAS, a Roman Catholic theologian and controversial writer, 1527-1580.

SANDERS, R., a miscellaneous wr., 1727-17. **SANDERSON, ROBERT**, an English Catholic, historian of Henry V., &c., 1660-1741.

SANDERSON, ROBERT, bishop of Lincoln, distinguished for his extensive antiquarian, scholarly and historical information, known as a casuist polemical writer, 1587-1663.

SANDERUS. See **SANDER**.

SANDES. See **SANDYS**.

SANDFORD, SIR DANIEL KEYTE, professor of Greek at Glasgow, son of Dr. Sandford, a late of the Scottish Episcopal Church, died 18. **SANDFORD F.**, a heraldist, 1630-1693.

SANDINI, A., an Italian historian, 1692-1.

SANDIUS. See **SAND**.

SANDOVAL, F. P. DE, a Sp. histor., 1560-1.

SANDRART, JOACHIM VON, a native of Frankfurt, disting. as a painter and art-writer, 1606.

SANDWICH. See **MONTAGU**.

SANDYS, or SANDES, EDWIN, a dignitary of the church, who was vice-chancellor of Cambridge on the accession of Queen Mary, and suffered detention and imprisonment as a partizan of Jane Grey. In the reign of Elizabeth he was successively bishop of Worcester and London, archbishop of York, and had a share in the translation known as the Bishops' Bible, 1519-1643. **SIR EDWIN**, his second son, a traveller and diplomatist, to whom some sacred poems have been attributed, 1561-1629. **GEORGE**, brother of the latter, and seventh son of the archbishop, a scholar and classical translator, 1577-1643.—declared that English poetry owed much of its beauty to the translations of George Sandys, who was highly esteemed by his contemporaries for his learning and virtues.

SANE, A. M., a French writer, 1773-1818.

SANGALLO, GIULIANO GIAMBERTI, an Italian artist and architect, son of Francesco Giamberti, 1443-1517. **ANTONIO**, his brother, employed by Alexander VI. to convert Hadrian's mausoleum into a fortress, now the castle of Angelo, died 1534. **ANTONIO**, nephew of the preceding, and the most distinguished architect of his family, a pupil of Bramante, 1482-1546. **ANTONIO BAPTISTA GOBBO**, brother of the latter, a translator of Vitruvius. His nephew, **BASTIEN**, a painter, decorator, and architect, 1481-1550.

SAN-GIORGIO, BENVENUTO DA, an Italian historian and diplomatist, 1450-1525.

SANMICHELLI, MICHELE, an Ital. architect, friend of Bramante and Michelangelo, 1484-1559.

SANNAZARO, J., an Italian poet, 1458-1528.

SAN-SEVERO, RAYMOND DE SA, a Neapolitan, eminent for his mechanical inventions and as an amateur of the arts, 1711.

SANSON, NICHOLAS, a French geographer, 1687-1755.

minent for the accuracy and number of his maps, 1600-1667. His three sons, NICHOLAS, WILLIAM, and ADRIAN, were remarkable in the same art. His cousin, JAMES, a genealogist and ecclesiastical historian of Abbeville, 1596-1665.

SANSOVINO, JACOPO TATTI, called, an Italian sculptor and architect, 1479-1570. FRANCESCO, his son, a grammarian, 1521-1586.

SANTA-CRUZ, ALVAREZ DE BASSANO, Marquis De, a Spanish admiral, died 1587.

SANTA-CRUZ DE MARZENADO, ALVAR, Marquis De, a Spanish general, diplomatist, and politician, b. 1687, k. by the Moors at Oran, 1732.

SANTEN, L. VAN, a Dutch poet, 1746-1798.

SANTERRE, ANTOINE JOSEPH, an actor in the French revolution, a brewer, of Flemish descent, was born at Paris 1752. He was by no means the rude character sometimes represented, but well educated, and the possessor of a large fortune, acquired in trade. His familiarity with the workmen in his employ, and his extreme generosity for in famine time, he gave away nearly £12,000 (worth of meat and rice) made him popular in St. Antoine, and he became commander of the battalion of that quarter. He displayed great courage and presence of mind at the storming of the Bastille, and would deserve remembrance if it were only for one other act about the same time, that of saving the invaluable Bibliothèque du Roi from destruction by the mob. In May, 1792, he became commander of the national guard, and on the 20th of June, when the Marseillaise had arrived, and the palace was invaded by the populace, he thrust his fellow patriots out of the queen's chamber and protected Marie Antoinette and her children from further outrage; it is said that from this time may be dated the secret understanding that the queen had with the agitators of the faubourgs. Many other instances of the good nature of this Ajax of the Parisian populace might be mentioned, as that of causing the drums to cease beating for a few moments when Louis was on the scaffold; this gave the king the opportunity of addressing a few words to the people, and so provoked the Marseillaise that they would have commenced firing and not the drums instantly struck up again by order of another general. Santerre possessing little talent, but a vast deal of courage, often run immense risk to save life and property, and there is no wonder that he miscarried, when despatched to La Vendée, in command of an army, to oppose Bossignol. For this mischance, however, he was thrown into prison, and did not recover his liberty until after the fall of Robespierre. His good-natured, and useful, though not very brilliant part in this strange drama of history was now at an end, and he died in obscurity 1809. [E.R.]

SANTERRE, J. B., a Fr. painter, 1651-1717.

SAUTEUIL, or SANTEUL, JOHN DE, in Latin *Santolius*, a French ecclesiastic and Latin poet, 1630-1697.

SANTORIO. See SANCTORIUS.

SANTOS, J. DOS, a Portug. mission., d. 1622.

SANUDO, MARCO, a Venetian general who galvanized himself in the army of crusaders who overthrew the Greek empire, 1153-1220. ANGELO, son of the preceding, and his successor as duke of the Archipelago, 1195-1254. MARCO, son of Angelo and third duke, died 1263. GULI-

ELMO, son and successor of Marco, 1284. NICOLO, son and successor of the latter, distinguished against the Genoese and the Turks. GIOVANNI, brother of Nicolo, sixth and last duke, married his daughter to the prince of Negropont, who became prince of Naxos.

SANUTO, LIVIO, a Venetian noble, distinguished as a poet, historian, and geographer, 1530-1586.

SANUTO, MARINO, a Venetian traveller in the East, author of a curious work, 14th century. His relative, of the same name, historiographer to the state of Venice, au. of valuable Diaries, 1466-1531.

SANZIO, J. DE, an Italian painter, 15th cent.

SAPOR I., king of Persia of the Sassanide dynasty, succeeded his father, Artaxerxes, 240. He invaded Mesopotamia 242, and having conquered Armenia, Syria, and Cilicia, he put to death the emperor Valerius with great cruelty.

He was defeated by Odenatus 269, and died 271. SAPOR II., a posthumous son of Hormisdas II., was proclaimed 310, before his birth. He became an active and warlike prince in conflict with the Romans, and was a great enemy to Christianity, died 380. SAPOR III., succeeded Artaxerxes II., 384, he kept peace with the Romans, died 389.

SAPOR, a king of Armenia, 420.

SAPPHO, a lyric poetess of old Greece, born at Lesbos, and supposed to have flourished about 610 B.C. Nothing certain is known of her life, but she is represented as a woman of dissolute morals, and is said to have drowned herself in consequence of the neglect of a youth with whom she had become enamoured. The invention of the *Sapphic verse* is attributed to her, but there only remains of her writings a 'Hymn to Venus,' and an 'Ode to a Young Female,' which have been rendered into English by Ambrose Philips. The contradictory traditions concerning her life have led to the supposition that other celebrated women of the same name must have lived at different epochs.

SARABIA, J. DE, a Span. painter, 1608-1669.

SARAVIA, H. A., of Spanish origin, but reckoned among English divines, was a professor of divinity and friend of Hooker, 1531-1613.

SARAZIN, J., a French sculptor, 1590-1660.

SARAZNO, J., a French marshal, 1770-1824.

SARBIEWSKI, MATTHIAS CASIMIR, in Latin *Sarbievius*, a Polish lyric poet, 1595-1640.

SARCHIANI, GIUSEPPE, an Italian economist, archivist of Tuscany during the revol., 1746-1821.

SARCOMASIUS. See SCHURTZFLEISCH.

SARDANAPALUS, the name of several princes of Assyria, the most celebrated of whom was the last sovereign of the first Assyrian empire. His reign dates from 836 to 817 B.C., when he was dethroned by Arbaces and Belesis, at the head of a revolt of the Medes, Persians, and Babylonians. In the last extremity, Sardanapalus, who had withstood a siege for three years in Nineveh, placed himself, his treasures, his wives, and his eunuchs on a funeral pile, which he fired with his own hand. He had ceased to exist when the city was taken, and that event was followed by the dismemberment of the Assyrian empire. The above date is only an approximation to the true one, as authorities vary. [E.R.]

SARPI, PIETRO, called *Fra Paolo*, a Venetian historian, and defender of the republic against the pope, Paul V., 1552-1623.

SARRABAT, N., a French botanist, 1698-1737.
 SARRASIN, J. A., a Fr. physician, 16th cent.
 SARRASIN, J. F., a French poet, 1603-1654
 SARRASIN, M., a naturalist, 1659-1786.
 SARTI, G., an Italian composer, 1730-1802.
 SARTO, ANDREA VANNUCCI, called DEL, the most dist. painter of the Tuscan school, 1488-1580.
 SASSI. See SAXI.

SAUL, the first king of the Israelites, perished in combat with the Philistines B.C. 1040.

SAULI, the apostle of Corsica, 1585-1592.

SAUMAISE, CLAUDE, in Latin *Salmasius*, a native of Burgundy, eminent for his learning as a critic, commentator, Orientalist, and archæologist. He was born in 1588, and having retired to Holland on account of his protestantism, succeeded Scaliger as professor of history at Leyden in 1631. In 1649 he wrote a Latin memorial in defence of Charles I., which was answered by Milton for the parliament. In 1650 he visited the court of Sweden by invitation from Queen Christina, and is said to have suffered from the climate, so that he never recovered, but died in 1658. His father, BENIGNE DE SAUMAISE, was a Greek scholar, and counsellor to the parliament of Burgundy, 1560-1640.

SAUMAREZ, JAMES, Lord De, a British admiral, who was born in Guernsey 1757, and first signalized himself in the naval service during the American war. In 1797 he was in the action off Cape St. Vincent, and was second in command to Nelson at the battle of the Nile, fought soon after. In 1801 he was named rear-admiral of the blue, and appointed to the command of the squadron off Cadiz. With this little fleet he won a signal victory, for which he received the thanks of both houses of parliament, and a pension of £1,200. He became vice-admiral in 1831, died 1836.

SAUNDERS, SIR E., an Engl. judge, d. 1683.

SAUNDERS, J. C., a dist. oculist, 1773-1810.

SAUNDERS, W., a medical writer, 1743-1819.

SAUNDERSON, NICHOLAS, a native of Thurstleton, in Yorkshire, who distinguished himself as a mathematician, though he was deprived of his sight by small-pox when only twelve months old. He was born in 1682, and succeeded Whiston as professor of mathematics at Cambridge university in 1711. The account of Saunderson's experience, the quickness to which his senses of hearing and feeling were heightened, and his surprising acquisitions, is one of the most interesting in biographical literature. Died 1739.

SAURIN, ELIE, a French protestant minister, 1639-1703. JOSEPH, his brother, a natural philosopher and mathematician, remarkable for his independent spirit, and for his controversies with Rolle, Huyghens, and Rousseau; he also abjured Calvinism, 1659-1737. BERNARD JOSEPH, son of the latter, a dramatic writer, 1706-1791.

SAURIN, JAMES, one of the most eminent protestant ministers of France, was the son of a lawyer at Nismes, and became pastor of the Walloon church in London, and afterwards to the protestant nobles who had sought refuge at the Hague. He is the author of some theological and critical works, 1677-1730.

SAURIN, RIGHT HON. WILLIAM, an Irish lawyer, and attorney-general, 1767-1840.

SAUSSAY, A. DU, a Fr. theolog., 1689-1675.

SAUSSURE, H. B., a Swiss natural and philo-

sopher, disting. for his valuable observations made while exploring the glaciers of the Alps, and for improvements in scientific instruments, 1740-99.

SAUSSURE, NICHOLAS THEODORE DE, born at Geneva, October, 1767; died April, 1845; son of the preceding. He accompanied his father in his travels, and assisted him in many of his researches. He afterwards devoted himself to physiological chemistry, and contributed many important papers to this department of science. Priestley has shown that plants absorbed carbonic acid; Saussure confirmed this observation, and proved that a small proportion of this gas in the atmosphere favours vegetation, but that a larger amount asphyxiates plants. He likewise devoted much time to a subject originally broached by Kirwan, viz., the connection between the inorganic constituents of plants and the soils on which they grow, and established Kirwan's view that inorganic food is necessary for vegetation. He likewise made numerous researches on the composition of the air, at Geneva, particularly on the proportion of carbonic acid which is present in different conditions of the atmosphere; and obtained results which have been confirmed by the experiments of more modern chemists with all the delicate appliances of recent discovery. He was one of the first persons to point out the identity of sugar of starch and of grapes; and to invent modes of analyzing organic substances so early as the beginning of the present century. [R.D.T.]

SAUVADE, D., a French historian, 1520-1588.

SAUVAGES, F. BOISSIER DE, a French botanist, 1706-1767. His brother, P. AUGUSTIN, philologist, 1716-1795.

SAUVAL, H., a French historian, 1620-1670.

SAUVEUR, JOSEPH, a French physician and mathematician, who created the science of music acoustics, 1653-1716.

SAVAGE, HENRY, chaplain to Charles II., and historian of Balliol college, 1604-1672.

SAVAGE, JOHN, a facetious divine, supposed author of a 'Collection of Letters,' &c., died 1744.

SAVAGE, RICHARD, has very little claim to remembrance as a poet. Yet he threw off son happy lines and phrases, and, among others, the often-quoted verse, 'The tenth transmitter of foolish face.' His best poems, too, 'The Wanderer' and 'The Bastard,' have, especially the latter, the interest which belongs to strong feeling vented in real facts. The history of this unfortunate man was a tragic romance; and it has preserved its name by having been related in one of the most impressive of narratives. His biographer, Samuel Johnson, who became acquainted with him when the two were alike destitute and hopeless, speaks of him with an affection which, amidst all the unlucky man's faults, must have been justified by some good points in his character. From Johnson's 'Life of Savage' the facts may be learned. He was born 1698, the illegitimate child of two persons of rank, was persecuted by his mother, narrowly escaped execution for murder and, after a miserable life of forty-five years, died a prisoner for debt, in 1743. [W.S.]

SAVARON, J., a French writer, 1550-1622.

SAVART, F., a French physician, 1791-1841.

SAVARY, A. C., a French physician and pupil of the physiologist Bichat, 1776-1814.

SAVARY, JAMES, farmer of the revenues of the French crown, and a writer on commercial law, 1622-1690. His two sons, **JAMES** and **PHILEMON**, compiled 'The Universal Dictionary of Commerce,' published 1723.

SAVARY, NICHOLAS, a French traveller and Orientalist, 1750-1788. **JULIAN**, his brother, historian of the wars of La Vendée, 1824.

SAVARY, RENE, a distinguished French general. He was a native of Ardennes, and was appointed colonel of gend'armes by the first consul for his bravery, but perhaps more for his ready obedience in executing the sentence against the unfortunate Duke D'Enghien. He was created **DUKE OF ROVIGA** for his services in Prussia, and commanded the army in Spain until the arrival of Joseph; he succeeded the duke of Otranto as minister-general of police. After the restoration he lived in retirement; but at the revolution in July, 1831, he was appointed commander-in-chief of the African army, 1774-1833.

SAVERIEN, ALEXANDER, a French mathematician and writer on naval tactics, 1720-1805.

SAVIGNY, C. DE, a French writer, born 1540.

SAVILLE, SIR HENRY, a native of Yorkshire, distinguished as an elegant Greek scholar, mathematician, and patron of learning, founder of two professorships at Oxford, 1549-1622.

SAVILLE, GEORGE. See **HALIFAX**.

SAVIOLI, L. V., an Italian poet, 1729-1804.

SAVOLDO, G., an Italian painter, 16th cent.

SAVONAROLA, J. M., a physician of Padua, 1384-1462. His grandson, **GIROLAMO**, next article. **RAPHAEL**, of the same family, a compiler, 1646-1730. **INNOCENT RAPHAEL**, nephew of the latter, and an author, 1680-1748.

SAVONAROLA, GIROLAMO, or **JEROME**, was born at Ferrara, 12th October, 1452. He enjoyed a religious education, and was in some respects a precocious youth. Though originally intended for his father's profession, as a physician, he secretly became a Dominican monk in 1474. After teaching philosophy for a season, he devoted his whole attention to preaching, and produced a great sensation by the pointedness and vehemence of his pulpit oratory. In 1489 he removed to Florence, lived in the convent of St. Marco, and declaimed with extraordinary freedom and daring, and with unusual success, against every form of hypocrisy, vice, and unbelief. His unbounded influence and constitutional ardour, seem to have heated his imagination, and he ventured on occasional predictions, at once novel and startling, and published them in the form of authentic oracles, and under the impression that they were genuine revelations to himself from heaven. With characteristic boldness and energy, he interfered with the politics of Florence, inculcated democracy, and opposed the ascendancy of the Medici, so that when they were expelled, he became a leader of the triumphant party. These victors formed a vast deliberative council, and discussed with great pomp the affairs of state, while Savonarola was exalted by them into a kind of prophetic and judicial president of the republic. His enemies, in the meantime, accused him to the pope, Alexander VI., as an impostor and a heretic. His holiness summoned him to Rome, but the reformer refused to obey the citation. On this refusal he was ex-

communicated and forbidden to preach. But this sentence only excited him to more terrible denunciations, in which the pope himself was styled a usurper. A Franciscan inquisitor was sent to challenge and confront Savonarola, but the citizens interfered and sheltered him. The popular tide at length turned, when he shrank, after some vacillations, from subjecting his cause to an ordeal by fire. His antagonists entered the convent, dragged him out, placed him on the rack, and extorted some ejaculations from the unhappy victim, which their malignity easily construed into confessions of guilt. On being ultimately condemned to death with two of his associates, he was first strangled, then his body was tossed into the flames, and his ashes were thrown into the river, 23d May, 1498. The most of Savonarola's writings were in Italian, and only a few in Latin. He left behind him about 300 sermons and 50 tracts. His 'Triumphus Crucis,' is a work of some power, but his genius is principally seen in those sermons in which the errors of Romanism are unsparingly condemned, and many evangelical truths illustrated and enforced, and which are also distinguished and filled with peculiar unction and piety. The opinions of Roman Catholic writers vary widely as to the character of this hero-martyr, some holding him to be a saint, and others branding him as a heretic. Burned by one pope, he was tacitly canonized by another. Over the room he inhabited in the convent of St. Mark, still stands an inscription with the epithet—'*Vir Apostolicus*.' Savonarola was in many things in advance of his age, and was a reformer before the reformation. Eloquent, sincere, and devout, he laboured with heart and soul for his church and country, and met with that fate which the patriot and apostle have so often received from a fickle people, and an alarmed and vindictive despotism. [J.E.]

SAVOT, L., a French numismatist, 1579-1640.

SAWYER, SIR ROBERT, one of the chief counsel for the seven bps., reign of James II., d. 1692.

SAXE, CHRISTOPHER, in Latin *Saxius*, a German philologist and literary historian, 1714-1806.

SAXE. COUNT MAURICE of Saxony, better known in history as Marshal Saxe, was the natural son of Augustus II., king of Poland, and elector of Saxony. Maurice was a soldier, and saw actual service at the siege of Lisle, when he was only 12 years old. He was at Malplaquet in 1709; and he afterwards served under Prince Eugene against the Turks. In 1720 he was introduced to the Regent Orleans, who persuaded him to enter into the French service, and gave him the rank of marshal. Though a married man, he was as notorious for the frequency of his love adventures, as for his military abilities. He obtained the Duchy of Courland in 1726, through the fondness of the Duchess Anna for him, but he soon lost his new principality. He alienated the duchess by his inconstancy, and thus lost also the chance of becoming emperor of Russia, when Anna succeeded to the throne of the czars in 1730. When the war broke out between France and Austria in 1733, Marshal Saxe solicited and obtained employment in the French armies. He distinguished himself greatly at the siege of Philipsburg; and when peace was made in 1736 he devoted some time to the study of the art of

war, and to the composition of a treatise on that subject, which is still cited by military writers. It was in the general European war, which began in 1740, that he gained the triumphs by which he is best known. He commanded the French army at Fontenoy in 1745, and won a memorable victory over the English and their allies, which was followed by the conquest of all Belgium. At the commencement of the campaign of that year, Marshal Saxe was lying ill at Paris, with his constitution utterly ruined by the dissolute life which he had long led, and suffering under a severe attack of dropsy. His physicians told him that if he left Paris for the army they could not answer for his life. His answer was, 'The question now is not how I am to live, but how I am to go,' and he went and conquered accordingly. He was obliged to be tapped only five days before the battle was fought; and he was carried about in a litter during the engagement. The victory of the French was due mainly to his skill and energy, and to the valour of the Irish brigade in the French service. In 1747 he gained a second victory over the English and their allies at Laffelt. He survived the conclusion of the war about two years, and died in 1750, loaded with honours by the French, who were indebted to him for the two chief of the very few successes which they have ever had in fair pitched battles against the English. [E.S.C.]

SAXE-COBOURG. See COBURG.

SAXE-GOTHA, ERNEST, duke of, a commander in the German wars of Gustavus Adolphus, 1601-1675. **ERNEST II.**, a great patron of the sciences and letters, 1745-1804.

SAXE-GOTHA AND ALTENBERG, E. LEOPOLD, duke of, distinguished as a poet and musician, 1772-1822.

SAXE-TESCHEN, ALBERT, duke of, son of Augustus II., king of Poland, and brother of the dauphiness, mother of Louis XVI., known as an enemy of the French republic, 1738-1822.

SAXE-WEIMAR, BERNARD, duke of, one of the most celebrated generals of the protestants during the thirty years' war, 1600-1639.

SAXI, or SASSI, GIUSEPPE ANTONIO, an ecclesiastical historian of Milan, 1675-1751.

SAXO, called **GRAMMATICUS**, on account of his learning, a Danish historian, 12th century.

SAY, J. B., a French economist, 1767-1832.

SAY, SAMUEL, a dissenting minister, known as a poet and essayist, died 1743.

SCACCHI, F., an Italian *savant*, 1573-1643.

SCACCIA, J., an Italian engineer, 1778-1833.

SCÉVOLA, MUTIUS, one of the heroes of Roman story, said to have conspired with 300 others against Porsenna. He saved his life by an act of heroism, of which the record will be found in Livy.

SCALA, BARTOLOMMEO, gonfalonier of Florence, and the historian of his state, 1430-1495. His daughter, **ALESSANDRA**, wife of the poet Marullus, celeb. for her great learning, died 1506.

SCALA, DELIA, a famous Ghibelline family of Ferrara, principal of whom are **MASTINO**, elected podesta about 1260, assassinated by the Guelphs 1277. **ALBERT**, his brother, who avenged his death and governed after him from 1277 to 1300. **CAN FRANCESCO**, called 'The Great,' the most illustrious of the family, grandson of Mastino, podesta from 1312 to his death in 1329. Dante,

who found a refuge at his court, has immortalized him in verse. A second **MASTINO**, nephew of the latter, reigned 1329-1351. He was followed by **CAN II.** and **CAN III.**, both his sons, the latter of whom died 1375. **ANTONIO**, a natural son of Can III., reigned with his brother, Bartolommeo and had him put to death 1381. He afterwards lost his estates, and died 1388.

SCALA, D. DE LA, a physician, 1632-1677.

SCALIGER, JULIUS CÆSAR, called the 'Elder,' a famous classical scholar and commentator, was born at Padua or Verona in 1484, and being naturalized in France, died at Agen in 1558. His history is disputed, as he is not believed to be the person he represented himself, but rather a *Guili. Bordone*, son of Benedetto Bordone, a Paduan who followed the profession of an illuminator at Vienna. His inordinate vanity is supposed to have prompted him to pretend to a relationship with the Scalas of Verona. He acquired great reputation in France by his skill in polemics.

SCALIGER, JOSEPH JUSTUS, son of the preceding, and the creator of the chronological science was born at Agar in 1540, and in 1593 became professor of polite literature at Leyden. He far surpassed his father in learning, and drew largely upon his stock of words in all languages to abuse his learned contemporaries, with many of whom like his father, he entered into angry controversies. The merit belongs to him of inventing the Julian period. Died 1609.

SCAMOZZI, V., an Ital. architect, 1552-1616.

SCANDERBEG, or BEY ALEXANDER, celebrated Albanian chief, whose proper name was George Castriotto. His father, Prince John of Albania, gave him in hostage to Amurath I. The sultan had him educated in the Mahommeda faith, and at the age of eighteen gave him the command of a body of 5,000 troops, which he led against the Servians. His father dying in 1438, he resolved to acquire possession of his hereditary principality. Being a man of great prowess and energy of character, he soon effected his purpose having previously renounced the Mahommeda faith and allegiance to the sultan, by deserting to the Christians and joining Hunniades, general of the Hungarian army. Becoming chief of the Albanians, a protracted and harassing war followed, with various fortune, until, by repeated successes, he completely consolidated his power and preserved the independence of his country. He was a great terror to the Turks, who style him the 'White Devil of Wallachia,' and the Albanians still celebrate him in their national song. After his death, however, his country soon again submitted to Mussulman rule, 1404-1467.

SCANDIANESE, whose proper name was **TITUS GANZARINI**, an Italian dramatist, 1518-81.

SCAPULA, J., a Germ. lexicographer, 16th c. **SCARAMUCCIA, L. PELLEGRINI**, a Milanese painter and engraver, 1616-1680.

SCARBOROUGH, SIR CHARLES, physician to Charles II., known as a mathematician, 1616-98.

SCARDONA, J. F., an It. physc., 1718-1800.

SCARLATTI, ALESSANDRO, the founder of the Neapolitan school of music, 1650-1725. His son **DOMENICO**, a composer and harpist, 1683-1751. **GIUSEPPE**, son of the latter, an opera composer 1718-1776.

SCARPA, A., an Italian anatomist, 1747-1832.
 SCARRON, PAUL, famous in French literature as a burlesque writer and comic poet, was born at Paris in 1610. Having wasted his fortune in debauchery, he commenced writing for the theatres, and received a pension from Anne of Austria, which was withdrawn on the appearance of his 'Mazarinade.' In 1652 he persuaded the Mademoiselle D'Abigne, afterwards the famous Madame de Maintenon, to marry him, and fortunately for her, departed this life in 1660. The best of his works is the 'Roman Comique,' translated by Goldsmith.

SCARSELLA, SIGISMUND, surnamed *Modino*, an Italian painter, 1530-1614. His son, IPPOLITO, surnamed *Scarlepino*, a painter, 1551-1621.

SCARS GILL, W. P., an English wr., d. 1836.

SCAVINI, J. M., an Ital. physic., 1770-1825.

SCHAAF, C., a Germ. Orientalist, 1646-1719.

SCHAARSCHMIDT, ANTONY and SAMUEL, distinguished surgeons and anatomists, the former 1720-1791, the latter 1709-1747.

SCHABOL, J. R., a Fr. agricultur., 1690-1768.

SCHADOW, Z. R., an Ital. sculp., 1786-1822.

SCHADOW, J. G., a Germ. sculp., 1764-1850.

SCHAEFFER, G. H., a Ger. Hellenist, 1764-1840.

SCHAEFFER, J. C., a German naturalist, 1718-1790. His brother, J. GOTTLIEB, a physician, 1720-1795.

SCHALKEN, G., a Dutch painter, 1643-1706.

SCHALL, J. A., a Ger. missionary, 1591-1659.

SCHANK, JOHN, a native of Ffeshire, distinguished as a naval officer and engineer, 1740-1823.

SCHANNAT, J. F., a Ger. historian, 1683-1739.

SCHARD, S., a German compiler, 1535-1573.

SCHARFENBERG, G. L., a German entomologist, duchy of Saxe-Meiningen, 1746-1810.

SCHARROK, R., an English philosopher of the school of Hobbes, 17th century.

SCHATTEN, N., histor. of Westphalia, 1608-76.

SCHATZ, G., a German poet, 1763-1795.

SCHAUFLEIN, J., a Dutch painter and engraver, taught by Albert Durer, 1487-1550.

SCHÉDE, P., a German poet, 1539-1600.

SCHÉDE, E., a Germ. antiquarian, 1615-1641.

SCHEDONE, or SCHIDONE, BARTOLOMEO, Italian painter, style of Correggio, 1570-1615.

SCHÉELE, CHARLES WILLIAM, a native of Sweden, born 19th December, 1742, at Stralund, Sweden; died 21st May, 1786, at Köping Lake Moeler. This distinguished Swedish chemist, the son of a tradesman, was educated at private academy in his native town, and afterwards at a public school, and then served his apprenticeship as an apothecary at Gotheborg. He subsequently acted as assistant to apothecaries at Almo, Stockholm, and Upsala. There his genius attracted the attention of the professors at this celebrated university, who encouraged him in his pursuits; but it is remarkable that the Swedish government, although aware of his talents, overlooked, perhaps the ablest man which that country has produced, ultimately to end his days as a humble apothecary in a village on the banks of Lake Moeler. To him we owe the discovery of boric, chlorine, and of molybdic, tungstic, uranic, lactic, gallic, tartaric, oxalic, citric, malic, hippuric, and saccharic acids, glycerine and oxygen. He ascertained the nature and the consti-

tuents of ammonia and prussic acid, the characters of barytes and manganese, and the elements of the atmosphere. Few men of his century, with the exception of Priestley, can be compared with him as a discoverer. The last act of his life exhibits his character in a highly honourable phase. When in 1777 he bought the apothecaries' shop at Köping, he formed the intention of marrying the widow of his predecessor, and only delayed for the purpose of saving so much property as to make such an alliance desirable on her part. While labouring under a mortal rheumatic affection he declared his intention of marrying her in March, 1786; but his disease increasing rapidly, it was not till the 19th May that the ceremony was performed. On the 21st he left her all his property, and on the same day he breathed his last. [R.D.T.]

SCHHEELS, R. H., a Dutch *savant*, 1622-1664.

SCHIEFFEL, C. S., a Ger. physic., 1693-1763.

SCHIEFFER, JOHN, a German archaeologist and literary *savant*, professor at Upsala, 1621-1679. His grandson, HENRY THEOPHILUS, a Swedish chemist and botanist, 1710-1759.

SCHIEBE, J. A., a Ger. composer, 1708-1776.

SCHIED, E., a Dutch Orientalist, 1742-1795.

SCHIEDT, BALTHAZAR, a German theologian and Orientalist, 1624-1670. His son, VALENTINE, a physician, 1651-1731.

SCHIEDT, CHR. L., a legist and historiographer to the king of Denmark, 1709-1761.

SCHIEINER, C., a Ger. astronomer, 1575-1650.

SCHELHAMMER, CHRISTOPHER, a Dutch botanist, 1620-1652. His son, GONTHIER CHRISTOPHER, a physician and botanist, 1649-1716.

SCHELLER, E. J. G., a German lexicographer and philologist, 1735-1803.

SCHELLING, FREDERICK WILLIAM JOSEPH; born at Leonberg in Wirtemberg, 27th January, 1775: his philosophical career seems closed, but Schelling still lives in honoured retirement near Berlin. We shall certainly not attempt to give a critical account of the speculations of this remarkable man. It must suffice if we can point out his place, in the history of recent German philosophy, and define his practical influence over his contemporaries: nor do we undertake even this, unless under concession of the license to employ such general language as alone may convey to the reader of notices like these, some distinct conception of the character of an obscure and difficult theme.—The order of recent German speculation, as marked by its authors, is the following—KANT, FICHTE, SCHELLING, HEGEL. In the article devoted to him, we have explained pretty fully the peculiar achievements of KANT, which were briefly these;—living in an age when the pure sensational philosophy had arrived at its lowest stage, denying activity and even personality to Mind,—he re-established by irresistible criticism, that Mind is an essential Energy and Force; and farther unfolded the specific Laws according to which that Force acts. He showed that whatever the external Universe on which the Mental Force acts, our Substantive Knowledge depends, for its form and nature, wholly on these Mental Laws. Nay—overlooking to a large extent the possible power of INTUITION properly so-called (article LEIBNITZ)—he went so far as to say that, of the External Universe itself, we can know nothing save that it

exists, or rather that an obscure *something*—called the NOUMENON—exists. It is evident wherein Kant's merit lies; he established the prime Reality of Subjective or Mental Laws.—Next, came FICHTE. Can it be alleged, said he, that Philosophy is complete, so long as it recognizes, on the one hand, a Subjective Force, and opposite to it that hidden and impenetrable Externality called the Noumenon? Let us look deeper into things! What necessity for this Noumenon? Do we in reality know anything except the movements of Mind itself; and is not the thing we term Externality, only our sense of obstacles in the way of the Mind's efforts to develop itself? Hence his pure SUBJECTIVE IDEALISM:—he rejected the existence of everything except his *Ego*; and it cannot be denied that he had several logical advantages over Kant.—When Fichte's philosophy—sustained by his wonderful ardour and eloquence—promised to become supreme, SCHELLING arose, and ventured a loftier flight. On first entering the philosophic arena, he was quite young; and a Temperament essentially poetic, warm with the Enthusiasm of early years, possessed as its companion and fellow-worker, an Intellect, which—whatever its degree of incompleteness—must, by all the world, be confessed to have been endowed with extraordinary powers. With Fichte, Schelling rejected Kant's *dualism*—the first and fatal step of both, (article HAMILTON.) The ultimate principle of Philosophy, he said, must be One, or the Absolute. Now this Absolute cannot be in the *Object* or in *Externality*; for that is not perceived or known to exist unless by a Mental Force distinct from itself; neither in the Mental Force of Kant, which needs a *Noumenon* to stir it to action; nor in the *Ego* of Fichte, which only develops itself under the experience of *obstacles*. What then, is that, which all Philosophy seeks—the One of PARMENIDES, the *Substance* of SPINOZA,—that Absolute and Transcendent Reality, which is the foundation at once of all existence and all knowledge; and, for Itself, has no foundation except Itself? It will be observed how nearly this Inquiry touches on the thought of all Religious Philosophy,—so near is it, that the solution might appear contained in the Idea of a SUPREME MIND, in whom we live, move, and have our Being. And Schelling actually finds it, in an Idea closely analogous—the Idea of an *Absolute Subject*—of an *Ego*, not *special* like Fichte's, but Absolute and Transcendent, characterized by perfect unity, by liberty, reality, absolute substantiality,—cause imminent, infinite, indivisible, immutable. The correspondence, however, is not more than apparent: at least, there is soon a widest divergence. From this Absolute, according to Schelling, all things flow, or rather they are only its developments: Material Creation is an expression of its Infinite Reality, its positive manifestation within the limits of the Finite; and Mind is the act of its Self-consciousness, it is the act or power by which its Laws and Ideas are directly seen and felt. No use then, he exclaims, of a *Pre-established Harmony* between the realms of Thought and Existence; for they are the SAME: the actual World is only the representation of Ideas, and Mind is the type of the Universe. The SUBJECT and OBJECT, are thus not only, mere harmonious

Opposites: they are IDENTICAL.—There are two distinct aspects under which this extraordinary and daring *Philosophy of Identity*, must be regarded: a few remarks on each will enable us to comprehend the nature and limits of Schelling's influence.—I. And, *first*, on that point of loftiest moment as to the character of any Philosophy—the place it assigns to the Nature and Duties of MAN. Now, it cannot be doubted, that whatever the glowing and gorgeous account it gives of the attributes and dignity of the Reason, attaining in its high Inspirations, identity with the Absolute itself—Schelling's philosophy is open to that fatal objection already alluded to under the article HEGEL—it builds upon Ideas obtained through our human Consciousness, and finally demonstrates that these Ideas are untrue! We should despair of success in an attempt to communicate here, anything of a distinct account of the conceptions of this remarkable German, as to the position of the individual *Ego*; but it is plain that there is no room among them either for our Human Personality, or our Human Liberty. His writings, indeed, are full of impressive reference to Moral Liberty; but he tells us, when narrowly questioned, that Liberty, as a power of independent action, is incompatible with the idea of the Absolute. Neither on Schelling's system, a personality of any kind inhere in the individual Mind. If we understand him aright, the soul is nothing more than an Idea of the soul of God. Its Individuality perishes with the body of which it is the living principle; although, as an Idea, must live for ever, within the Thought of the Absolute, to which it returns. If, as has been alleged, this Pantheism is the most gorgeous of similar schemes that Philosophy, ancient or modern, has evolved; certainly it is also one of the least disguised. It was understood that at silence during those twenty years, within which the system of Hegel rose, flourished, and fell, Schelling had undertaken to state his Philosophy anew, and to supplement it, so that Human Dignity and Responsibility should be saved. For this, in 1841, he reappeared, in possession of the Chair at Berlin; but after occupying that distinguished place for three years, he has finally retired, without affording the world assurance of his success. Turning from the views of Schelling regard *Man*, to those which inspire his conceptions of the External Universe, we pass from darkness to light. Considering this vast scheme of Material Nature, not as a mere collection of dead forces held together by external relationship; but a development now and for ever—a development incessantly unfolding, of the attributes of the SUPREME INTELLIGENCE—how profound, how impressive the Thought! It is no exaggeration that this exalted and most true Idea, has infiltrated alike into the Science, Art, and Literature of the age; many, the greater portion of that loftiness and heroic life, which has stamped it with the impress of Immortality. The Universe, said Schelling, is not merely an existence, it is a *becoming*, *about-to-be*. It is not a *mechanism*, but a *gigantic ORGANISM*: and on this ground OKEN and many of his compeers wrought out those wonderful prophetic views, which—even now—to elaborate and discern in their details, is perhaps the highest

lory of our own illustrious OWEN.—II. We must aspen, however, with a few and brief remarks, on the second main feature of this singular Scheme. Schelling's philosophy is a Philosophy of IDENTITY. He does not deny either Mind or Matter—*e.*, either the *Ego* or the *non-Ego*; but he declares them variations in *form* only, and that they are the *same*. The Mind is in one sense a mirror of the external universe; the Ideas of the former, are the Laws of the latter:—hence, every true philosophy of Nature must aim at discerning the identity of these Laws with these Ideas; for the discovery of such Identity is its ultimate triumph. Likewise from this essential aspect of Schelling's system, much error, and much of highest value have flowed. His own systematic '*Natur Philosophie*,' is certainly very strange; and no one in his country can recognize any accuracy in its *method*. Undervaluing the guidance of Induction, he institutes a description of *a priori* inquiry,—starting from the Mental Pole; and, laying down what he finds there, as a sort of *a priori* schema, sets about constructing Laws of Nature, in correspondence with it. Nothing can well be conceived farther from truth than his actual results; though even amid that extraordinary medley of curious germs and indications, lie hid—shavings of unquestionable genius. But the general Idea has not been unproductive. It has inspired many of the noblest productions of GOETHE; and we can trace its influence through German poetry since Schelling first wrote. His greatest achievements, however, lie in the philosophy of Art. It has raised Art, from being mere imitation or copy of Nature, to a high research after ARCHETYPAL IDEAS,—a research conducted in the main by that mysterious and profoundest Faculty belonging to our Human Spirit—the Faculty of IMAGINATION.—The English reader will find many conceptions drawn from Schelling, scattered through the prose writings of COLERIDGE, whose remarkable mind with a philosophy was especially calculated to fertilize.—Of his successor HEGEL, we have already endeavoured to speak. See also article SCHOENHAUSEN.

sel, and partizan of the doctrines of Wolfe, d. 1778.

SCHILL, FERDINAND VON, a Prussian officer,

dying in the war against the French, 1773-1809.

SCHILLER, FRIEDRICH, is the only German

poet who can contest the supremacy of Goethe.

His range of thought is incomparably narrower; his imagery not only wants the inexhaustible variety of Goethe's, but also fails in reaching his romantic cast of refined ideality; and his tone of feeling is less purely and abstractedly poetical. But his poetry, while its richness of imagination within its own sphere is magnificent, and while it is ruled by a very high sense of art, glows with a flame of intense and elevated moral emotion, which is irresistibly and delightfully impressive. It communicates the spirit which prompted it, and which governed the character of the warm-hearted and conscientious poet,—the spirit of love and reverence, of love for mankind, and reverence for all that is truly great and noble. It was accident and emulation, rather than innate aptitude, that led him to put forth his strength most frequently on the drama; and his greatest works are less excellent in their portraiture of character (which is monotonous and often unreal), than in their deep passion, their moral purity and dignity, and their beautiful array of imaginative adornment. Many of his smaller poems, his odes and ballads, are as fine as those of Goethe; and he was not only an animated and eloquent historian, but also an acute expounder of the laws of philosophical criticism.—The short life of Schiller, beginning at a time whose literary character for Germany has been noted in the memoir of Goethe, is distributed, by his biographer Carlyle, into three periods.—The first of these reaches from his birth, on the 10th of November 1759, to 1783, when he was in his twenty-fourth year. This was the time of his irregular youthful aspirations, a stage in his history which was in some points like the youth of Goethe. His father, a retired army surgeon, was still in the service of the duke of Würtemberg; and the poet was born at Marbach, in that duchy. After shifting from school to school, he was, in 1783, by the command of the duke, placed for six years in a college recently founded at Stuttgart, and administered with a military formality of discipline, which proved highly irksome to the pupil. He had contemplated being a clergyman. He was now compelled to study law; and it was only as a change of evils that he accepted, after two years, the permission to betake himself to medicine. His favourite books were the critical and philosophical works of Lessing; the '*Goetz*,' lately published by Goethe, which prompted a juvenile tragedy; and, among other poems, the '*Messias*' of Klopstock, which tempted him to an imitation in his fourteenth year. In his nineteenth year he began to write '*The Robbers*,' an irregularly impressive monument of youthful fantasy, an exaggerated picture of human passion and error, drawn by one who, in his own words, had '*presumed to delineate men two years before he had met one*.' In 1780, having been appointed a regimental surgeon, he was able to print his tragedy: it caused universal excitement and much alarm, and brought on the author a ducal censure. In October, 1782, he absconded from Stuttgart to seek freedom and fame. In 1783 he published two other prose tragedies, '*Fiesco*' and '*Cabal and Love*.' Both are remarkable works, and the latter is deeply interesting; but neither is worthy to have been anything more than a youthful essay-piece of Schiller.—The second period of his life opens here. Becom-

ing, for subsistence, 'poet' to the theatre at Mannheim, he produced, besides small poems, the 'Philosophical Letters,' which show the continuance of his chaotic and unsettled state of mind; and, in the 'Thalia,' a periodical devoted to criticism, and chiefly written by himself, he printed, in 1784, the first three acts of the noble 'Don Carlos,' his earliest dramatic piece in verse. In the spring of 1785 he gave up his place in the theatre, and went to live in the pretty village of Gohlis, in the woodland meadows near Leipzig. There he wrote, in a more cheerful vein than hitherto, his beautiful 'Song to Joy.' 'Don Carlos,' completed in 1786, made him celebrated as one of the first of all German poets; but he was weary of dramatic writing, and occupied himself much with lyrical and narrative ballads, like 'The Song of the Bell,' 'The Walk to the Forge,' 'Knight Toggenburg,' and 'The Cranes of Ibycus.' About this time also, he printed his extraordinary prose romance (never finished) called 'The Ghost-Seer.' He was next busied much with historical studies, and printed in part a 'History of Remarkable Conspiracies and Revolutions.' Soon afterwards he visited Weimar, where he became acquainted with Herder and Wieland, and afterwards with Goethe, between whom and him there was at first much dryness, giving place by degrees to cordial esteem. In 1788 appeared the first volume of his admirable 'History of the Revolt of the Netherlands,' which procured for him what he had long panted for, a quiet and independent social position.—His attainment of this object begins the third and last period of his life. In 1789, being in his thirtieth year, he was appointed to the professorship of history at Jena, a few miles from Weimar; and in the beginning of the next year he married happily. He retained his professorship for ten years, removing, in 1799, to Weimar, where he lived on a pension from the duke, and on the fruits of such literary labour as he was able to undertake. He had been threatened with a disease of the chest as early as the time of his settlement at Jena; and the air of that place was pronounced too keen for him. The physicians indeed ordered, without effect, a total abstinence from intellectual exertion. Among the earliest fruits of this period were 'The History of the Thirty Years' War' (1791), regarded as his best work of this kind; and several treatises on the Philosophy of History, taken from or prompted by his lectures. Afterwards, studying the philosophy of Kant, he endeavoured to apply its principles to Literary Criticism in several singularly interesting essays, among which may be noted the 'Letters on the Aesthetical Education of Mankind' (1795). A good many critical and other papers were furnished to periodicals; and large additions were made to the stock of his minor poems. But, amidst all these exertions, and with a disease which he knew to be killing him, Schiller composed also the last and finest series of his long Poems. He contemplated writing an historical epic: but the design was never executed, and he fell back on the drama. His last historical work suggested the idea of 'Wallenstein;' and this fine play, or series of plays, which has with justice been declared to be 'the greatest dramatic work of the eighteenth century,' appeared in 1799. The tragedy of 'Maria Stuart' was published in 1800; the admirable 'Maid of

Orleans' in 1801; in 1803, in the beautiful but imperfect tragedy of 'The Bride of Messina,' Schiller tried how far the forms of the Greek drama could be accommodated to modern ideas; and, in 1805, the career of an illustrious poet was worth closed by the animated and poetical drama, 'Wallhelm Tell.' That year, at Berlin, where he in his last play acted, Schiller's disease brought him to the brink of the grave. He recovered sufficient to return to Weimar, and died there on the 9th of May, 1805. [W.]

SCHILLER, J. G., father of the great poet, known as an agriculturist, 1723-1796.

SCHILLING, F. A., a Ger. novelist, 1766-1818.

SCHILTER, J., a Ger. juriconsult, 1632-1701.

SCHIM, H., a Dutch poet, 1695-1742.

SCHIMMELMANN, ERNEST HENRY, Count Von, a statesman and patron of letters, died 1818.

SCHIMMELMANN, HENRY CHARLES, Count Von, a Danish minister of finance, 1724-1782.

SCHIMMELPENNINCK, RUTGER JOHN, Dutch statesman and revolutionist, 1761-1825.

SCHINNER, or SKINNER, MATTHEW, known in history as the *Cardinal of Sion*, legate of pope Julius II., and chief of the intrigues opposed to the pretensions of the French, died 1521.

SCHINDLER, V., a learned German, d. 1611.

SCHLEGEL, JOHN ELIAS, a German poet and dramatic writer, some of whose plays are acted in his native country, ancestor of the distinguished brothers of that name, 1718-1780.

JOHN HENRY, his brother, professor of history, 1724-1780.

JOHN ADOLPHUS, a third brother distinguished for his literary talents as a theologian and poet, and particularly for his eloquence as minister of the Lutheran church, 1721-1780.

CHARLES AUGUSTUS, eldest son of the latter, officer in the service of the English East India Company, and a student of Sanscrit literature, died young. His other two sons are the subjects of the following articles.

SCHLEGEL, AUGUST WILHELM VON, son of a Lutheran clergyman, was born at Hanau in 1767. At Göttingen, where he was first educated for the church, he passed to philosophical studies, and distinguished himself by contributions both prose and verse to the leading periodicals. In 1797 he began to publish his excellent translations of Shakspeare, which, after some years, he left to be completed and improved by Tieck. In the same year he obtained a professorship at Jena. He married a daughter of Michaelis; but, soon separated from her, and resigning his office, he spent several years at Berlin. He there published the first two volumes of poems, which, with his classic tragedy 'Ion,' were for a time highly estimated, and he also translated Calderon. But his chief occupation was the contribution of critical and other papers to periodicals, in which, with his brother Frederick and Ludwig Tieck, he succeeded in inculcating those views of literature which make up the system, called by the Germans 'Romantic.' In 1805 he became acquainted with Madame de Stael, whom he taught pretty nearly all she ever learned of German literature, attended during her travels for several years. His eloquent and striking 'Lectures on Dramatic Art and Literature,' which have made his name popular in England, were delivered at Vienna

1808, and printed the year after. On the fall of Napoleon he went to Coppet, and resided there till Madame de Staël's death in 1818. Next year he was appointed professor of history at Bonn, an office which he held till his death. Here he married a daughter of the theologian, Paulus; and this marriage, like the other, soon ended in a separation. His ambition now, besides some minor objects, aimed mainly at skill and fame as an Orientalist; aided by his essays, translations, and teaching, he did very much for the study of the Sanscrit language. He died in 1845. [W.S.]

SCHLEGEL, FRIEDRICH VON, the younger brother of Wilhelm, possessed both greater exactness of knowledge, and greater power of philosophical thought: but he was obscure and mystical, and carried completely away by that dream of reverence for the middle ages, which his brother, Tieck, Novalis, and others, laid the foundation of their so-called Romanticism. He was born at Hanover in 1772, and died in 1829. Classical literature was the theme of his earliest works. In 1796 he and his brother set on foot the 'Athenæum,' the first organ of their peculiar critical opinions. His history afterwards exhibits a constant changing of place, and an industrious and versatile series of literary works; while his pursuits were further varied by political and official employment. The seriousness and consistency with which he carried out his admiration of the mediæval period showed themselves, in him as in some of the poets and poets, by a change of religion: he and his wife, a daughter of Moses Mendelssohn, became Roman Catholics in 1801. The same turn of mind made him act, with sincerity but much unpopularity, as a zealous abettor of the political system of the Prussian government. The works of his which are best known in this country are the 'Lectures on the History of Ancient and Modern Literature,' (1815), and the 'Philosophy of History,' (1829). [W.S.]

SCHLEGEL, T., a Ger. philologist, 1739-1810.
SCHLEGEL, T. A., a Ger. physician, 1727-72.
SCHLEIERMÄCHER, FREDERIC DANIEL JUST, an eminent German divine, was a native of Breslau, where he was born in 1768. His education was obtained in the Moravian institution at Niesky, and on leaving that academy in 1787 to pursue the study of theology, to which he had resolved on dedicating his future life, he repaired to the university of Halle. Having received his degree, he was in 1794 appointed assistant preacher at Landsberg, on the Wartte; and afterwards master of the charité, a large hospital in Berlin. In that situation he continued six years, and during his incumbency published a variety of little works, such as a German translation of Fawcett's Sermons, the Monologues, Letters of a Minister out of Berlin, and various contributions to religious and literary periodicals. His translation of Plato began at an early period; and as that was a great undertaking, comprising several large volumes, his publication extended over a series of years. Having been appointed to a situation at Stolpe, he left Berlin, in 1802, and settled in that curacy, where he published a volume of sermons. He had, however, been a year resident at Stolpe, when he was chosen professor extraordinarius of divinity

at Halle and preacher to the university. On the separation of Halle from Prussia, in 1807, he returned to Berlin as a public lecturer, and in two years after was appointed first minister of Trinity church, and afterwards professor ordinarius of the new university in that city. At this period he published his celebrated 'Study of Theology,' and in consequence several literary honours were conferred on him, for he was elected a member of the Royal Academy of Sciences, and secretary to the Philosophical Society. It must be acknowledged, that, however eminent his literary and philosophical acquirements, he brought at this part of his career a spirit of rash theoretical speculation to the discussion of theological subjects, that was deeply deplored by all simple hearted believers in the Gospel. Among his productions of this character must be ranked his 'Essay on the Gospel of Luke,' which was published in 1817; his 'Body of Divinity' (Christliche Glaube) was given to the world in 1822. This remarkable work, it is difficult to describe, for its plan is altogether unique, consisting of a regular consecutive series of philosophical propositions, the elucidation of which by turns astonishes the reader with its profundity, perplexes him with its intricacy, and delights him with the ardent piety that pervades it. In 1828, Schleiermacher accepted an invitation to come to London, to preach on the re-opening of Dr. Steinkopff's German church of the Evangelical Lutheran School. His text on that occasion was taken from Ephes. iv. 23, and the sermon, amid much that was of an eminently devotional and impressive strain, produced a great sensation by its novel and startling peculiarities. He was the author of several volumes of sermons, besides his last work on 'The Doctrine of the Christian Faith.' He died 12th February, 1834, in the full enjoyment of the comforts of the gospel. A posthumous portrait of him soon after his death was published, accompanied by an admirable hymn of Claus Harms, or 'Heaven as the Christian's Fatherland,' and under the picture the following inscription, 'Happy end of a celebrated Divine.' The early writings of this eminent man abounded in a strain of sentiment, that led to his being extensively classed with the Neologian divines of Germany. Nay, the bold and startling opinions he announced in his larger works gave rise to impressions still more unfavourable to his theological soundness, for he has been characterized by various writers as a Sabellian, Hegelian, Fatalist, and even a Pantheist. Those who are most intimately conversant with his works, regard all such epithets as entirely unwarranted at any period of his life. There can be no doubt, however, that as he advanced in life his views became more scriptural and orthodox, and he must be considered as the great leader in that happy movement, which broke up the old school of German theology,—as occupying a midway place between a Hegel and a Hengstenberg, between a dead Rationalism and a living Evangelism. He was a person of the most active habits. He preached every Sabbath, without notes, to a crowded audience, and his lectures at the university during the week attracted as great a crowd of admirers as his sermons in the church. He exercised an immense influence over the intellectual, and especially the religious character of his countrymen. [R.J.]

SCHNURRER, C. F., a German theologian and Orientalist, 1742-1822.

SCHOBER, G., a Germ. physician, 1670-1739.

SCHOEFFER, PETER, one of the inventors of printing, was a native of Gernsheim in Darmstadt, and in early life followed the trade of a copyist at Paris. He was connected with Guttenberg and Faust from about the year 1450, and the daughter of the latter became his wife. He is supposed to have died in 1502.

SCHOEPF, J. D., a Ger. naturalist, 1752-1800.

SCHOEPFLIN, J. D., a German historian and publicist, professor at Strasburg, 1694-1771.

SCHOLARIUS, a patriarch of Constantinople, who was secretary to John Palæologus, and changed his name to Gennadius, died 1460.

SCHOMBERG, A. C., a divine, 1756-1792.

SCHOMBERG, ARMAND FREDERIC DE, descended from a German family, was born of an English mother of the house of Dudley in 1619, and began his military career in the army of Gustavus Adolphus. From 1661 to 1685 he was in the service of France, and became marshal, but in the last mentioned year he retired to Brandenburg in consequence of the revocation of the edict of Nantes, and became Prussian commander-in-chief and prime minister. In 1688 he joined the prince of Orange, and was shot at the battle of the Boyne, 15th July, 1690.

SCHOMBERG, HENRY, Count De, and marshal of France, distinguished as a statesman, ambassador, and commander, was born of an ancient family of Misnia, established at Paris, 1583, died 1632. His son, CHARLES, a marshal of France, and governor of Languedoc, 1601-1656.

SCHOMBERG, ISAAC and RALPH, two sons of a Jewish physician of Cologne, who died in London 1761. ISAAC was a graduate of Leyden and

Cambridge, but was refused a fellowship in the College of Physicians, and died 1780. RALPH practised as a physician at Yarmouth and Bath, defrauded a public charity, and published a stolen Life of Mæcenas as his own, died 1792.

SCHOMBERG, ISAAC, a naval commander and historian, who distinguished himself in the fleet of Rodney, and in the victory of Howe 1794, d. 1811.

SCHONER, J., a Ger. mathematic., 1477-1551.

SCHOOCKINS, M., a Dutch critic, 1614-1691.

SCHOORL, SCHOREL, or SCHOREEL, JOHANNES, a Dutch painter of the Italian school, 1495-1556.

SCHOOTEN, F., a Dut. mathematic., 17th cent.

SCHOPENHAUER, JOHANNA, a popular German authoress, who lived at Weimar, and enjoyed the friendship of Goethe, 1770-1838.

SCHOPP, CASPAR, in Latin *Scioppius*, a learned German, called the 'Grammatical Cur,' 1576-1640.

SCHOTANUS, C., a Dutch historian, 1603-1679.

SCHOTT, AND., a learned Flemish Jesuit, 1562-1629.

FRANCIS, his br., an author, 1548-1622.

SCHOTT, GASPARD, the pupil and friend of Father Kische, famous for his discoveries in natural and experimental philosophy, 1608-1660.

SCHOTTE, J. P., a Ger. physician, 1744-1791.

SCHRADE, J., a Dutch *savant*, 1721-1788.

SCHREIBER, J. F., a surgeon, mathematician and prof. of anatomy at St. Petersburg, 1705-1771.

SCHREVELIUS, CORNELIUS, a laborious Dutch critic and lexicographer, Haarlem, 1615-1683.

SCHROECH, L., a Ger. physician, 1646-1717.

SCHROECKH, J. M., a native of Vienna, author of a History of the Church, 1733-1803.

SCHROEDER, C., an Austr. general, d. 1811.

SCHROEDER, JOHN JOACHIM, a German Orientalist, 1680-1756. His son, PHILIP GEORGE, a physician and medical writer, 1729-1772.

SCHUBART, C. F. D., a Germ. poet, 1736-1797.

SCHUBERT, F., an Austr. musician, 1795-1828.

SCHRYVER, PETER. See SCRIVERIUS.

SCHULEMBOURG, J. MATHIAS, Count, a companion-in-arms of Prince Eugene, 1661-1711.

SCHULTENS, ALBERT, a German Orientalist and biblical commentator, 1686-1750. His son, JOHN JAMES, an Orientalist, and successor of his father as professor at Leyden, 1716-1778. His son, ALBERT, son and successor of the latter, 1741-1801.

SCHULTET, ABRAHAM, in Latin *Sculteti*, eminent protestant divine of Germany, 1566-1640.

SCHULTING, A., a German jurist, 1659-1721.

SCHULTING, C., a D. theologian, 1540-1611.

SCHULTZ, BARTHOLOMEW, in Latin *Scultus*, a Ger. mathematician, who was employed by Gregory XIII. in reforming the calendar, 1540-1601.

SCHULTZE, E. C. F., a Ger. poet, 1789-1840.

SCHULZE, BENJAMIN, an Orientalist and Lutheran missionary to India, died 1760.

SCHULZE, G. E., a Ger. philosopher, author of a work opposed to Kant and Reinhold, 1761-1830.

SCHULZE, J., a German philosopher, author of the doctrines of Kant, 1739-1805.

SCHULZE, P. H., a Ger. physician, 1687-1751.

SCHUMACHER, HEINRICH CHRISTIAN, distinguished professor of astronomy, born at Stein 1780, died 1850.

SCHURER, J. L., a Ger. physician, 1734-1801.

SCHURMANN, ANNA MARIA DE, a native of Cologne, remarkable for the extent of her ledge in the arts and sciences, 1607-1678.

SCHURTZFLEISCH, CONRAD SAMUEL, in Latin *Sarcmasius*, a German *savant*, 1641-1708.

SCHUSTER, G., a Ger. physician, 1701-1785.

SCHUTZ, C. G., a Ger. philologist, 1747-1832.

SCHWAB, J. C., a German mathematician and philosopher, opposed to Kant, 1743-1821.

SCHWANTHALER, an eminent German sculptor, 1802-1848.

SCHWARTZ, BERTHOLD, otherwise CONSTANTINE AUCLITZEN, a German monk, to whom the invention of gunpowder has been attributed. He was preceded, however, by Roger Bacon, who died 1292. Cannon were first used by the Venetians in 1300, and were employed by the English at the battle of Cressy 1346.

SCHWARTZ, C., a Germ. painter, 1550-1594.

SCHWARTZ, C. T., a Ger. *savant*, 1675-1751.

SCHWARTZENBURG, CHARLES PHILIP, prince Von, an Austrian field-marshal and diplomatist, born at Vienna 1771. He negotiated the marriage between Napoleon and Maria Louisa in 1809, commanded the Austrian contingent in the campaign of Russia 1812, and was general of the troops which entered Paris after its capitulation 1814; died 1819.

SCHWARZENBERG, PRINCE, the celebrated Austrian statesman, succeeded Metternich as prime minister in November, 1848, when the Austrian empire was almost in ruins; 1800-1852.

SCHWEDIAUR, or SWEDIAUR, F. X., a French physician and naturalist, 1748-1824.

SCHWÉRIN, CURT CHRISTOPHER, Count Von, field-marshal in the service of Prussia, companion-in-arms of Marlborough and Prince Eugene, born 1694, killed at the battle of Prague 1757.

SCIAYONI, M., an Italian painter, 1522-1582.

SCILLA, AUG., an Italian painter, 1639-1700.

SCINA, D., an Italian physician, 1765-1837.

SCIOPIUS. See SCHOPP.

SCIPIO, the name of several illustrious Romans:

1. PUBLIUS CORNELIUS, general of cavalry and consul, 393 B.C.
2. LUCIUS CORNELIUS, surnamed *Barbatus*, consul 297 B.C.
3. LUCIUS CORNELIUS, consul 259 and censor 258 B.C. The inscription on his tomb, discovered in 1780, is one of the oldest monuments of the Latin tongue.
4. CNEIUS CORNELIUS, surnamed *Asina*, twice consul, 260 and 254 B.C.; he distinguished himself against the Carthaginians in Sicily.
5. PUBLIUS CORNELIUS, consul 218 B.C., in which year he lost the battle of Picinnus, which left Hannibal master of northern Italy; he went as proconsul to Spain, and was killed there in the contest with Hasdrubal 212.
6. CNEIUS CORNELIUS, surnamed *Asina*, brother of the preceding, filled the same offices, and reaped his laurels and his death in Spain about the same time.
7. PUBLIUS CORNELIUS, surnamed *Africanus the Elder*, son of PUBLIUS CORNELIUS and nephew of the preceding (next to Scipio).
8. CNEIUS CORNELIUS and LUCIUS (or LULIUS) CORNELIUS, sons of Scipio Africanus, who hold little place in history; the latter, however, memorable as an historical writer, and for his edition of the second Africanus.
9. LUCIUS CORNELIUS, surnamed the *Asiatic*, son of the PUBLIUS CORNELIUS, was killed in Spain, and companion-in-arms of his brother, Africanus. He was consul 189 B.C., defeated Antiochus, king of Syria, but afterwards died in obscurity.
10. PUBLIUS CORNELIUS,

surnamed *Nasica*, son of the Cneius Cornelius killed in Spain; he is remembered as a man of the rarest public virtue, distinguished himself as a jurisconsult, defeated the Lusitanians, and was consul 200 B.C.

11. PUBLIUS CORNELIUS SCIPIO NASICA, surnamed *Corculum*, son of the preceding, consul 162 B.C.

12. PUBLIUS CORNELIUS, surnamed *Serapion*, son of the preceding, was consul 138 B.C., and became sovereign pontiff by the choice of his fellow-citizens, without presenting himself at the election. He suppressed the sedition of Tiberius Gracchus, his cousin, at the cost of three hundred lives, B.C. 133, and was then sent on a mission to Asia, where he died 131.

13. His son, PUBLIUS CORNELIUS, was consul 112 B.C., and died the same year.

14. SCIPIO NASICA, son of the latter, known, in consequence of his adoption, as *Metellus Scipio*, and the enemy of Caesar, exercised great influence at the declining period of the republic; he killed himself after the defeat of Thapsus B.C. 46.

15. His son, PUBLIUS CORNELIUS, was consul in the reign of Augustus B.C. 15, and was exiled for his incestuous intercourse with Julia.

16. The last of the Scipios known to history, grandson of the preceding, was a vile character of the reigns of Tiberius, Claudius, and Nero. He distinguished himself, however, as a soldier.

SCIPIO AFRICANUS THE ELDER (*Publius Cornelius Scipio Africanus Major*), the greatest man of his age, was born B.C. 234. He was the son of P. Cornelius Scipio who encountered Hannibal on the banks of the Ticino (B.C. 218); and perished in Spain B.C. 211. When only seventeen years old, Scipio saved the life of his father in the battle of the Ticino; two years after (B.C. 216) he fought at Cannae as a military tribune; and, being one of the few officers who survived that fatal carnage, was principally instrumental in preventing the Roman nobility from leaving Italy in despair. The distinction which he had thus acquired secured his unanimous election to the ædileship in B.C. 212; and in B.C. 210 he was sent as proconsul to Spain, nearly the whole of which country had reverted to the possession of the Carthaginians. Here his remarkable talents first displayed themselves; his military skill defeated the enemy in the field of battle, while his personal influence, his humanity and courtesy, gained for him the affections of the inhabitants of the country. Returning to Rome in B.C. 206, he was unanimously elected consul for the following year, and obtained the province of Sicily, with power to cross over into Africa, if he should deem it necessary for the interest of the state. The senate resolutely refused him an army, thus rendering his command worthless; but the celebrity of his name soon attracted volunteers from all the towns of Italy; and having obtained a prolongation of his command, he proceeded as proconsul to Africa (B.C. 204), where, in conjunction with Masinissa, king of the Numidians, he obtained some advantages over the enemy. The Carthaginians in the meantime had collected a powerful army under the command of Hasdrubal, the son of Gisco, and were aided by Syphax, a Numidian prince, who brought with him a numerous force. In the early part of B.C. 203, Scipio made an unexpected attack upon the two encampments, burnt them to the ground, and destroyed

nearly the whole army. The two generals, who escaped, soon returned with a fresh force, but were again defeated with great slaughter. The Carthaginians now becoming alarmed by these repeated disasters, resolved to recall Hannibal from Italy; and at the same time opened negotiations for peace, during which they obtained a truce for forty-five days. Before the specified time expired, the Carthaginian populace, who had never been desirous of peace, plundered some Roman ships which were bringing provisions for Scipio's army, and insulted the Roman envoys who were sent to demand reparation. Hostilities were resumed on the arrival of Hannibal, who soon collected an army far superior in number to that of Scipio. Hannibal, however, foreseeing that the loss of a battle would be ruinous to Carthage, was anxious before it was too late, to conclude a peace; and Scipio, fearing lest his enemies at Rome might succeed in supplanting him in the command, was not unwilling to put an end to the war; but the terms which he offered were such as the enemy could not, without entire submission, accept, and Hannibal was thus forced to continue to act on the defensive. Scipio now resolved to hazard a decisive battle, which his opponent cautiously avoided, till on the Roman army feigning a retreat, Hannibal followed with his cavalry, and was defeated in the neighbourhood of Zama. The decisive battle was at last fought on the 19th of October, B.C. 202, not far from the city of Zama. Scipio's victory was complete; 20,000 of the Carthaginians were slain, and an equal number taken prisoners. The negotiations which ensued were concluded during the following year, when Scipio returned to Rome, and was received with the greatest enthusiasm. He entered the city in triumph, and obtained, in honour of his victories, the surname of Africanus. The rest of his life was passed in comparative quiet. He was censor in B.C. 199, and consul a second time in B.C. 194. He served as a legate in Greece under his brother, Lucius, who was consul B.C. 190; and having on his return been accused of receiving bribes from Antiochus, king of Syria, he quitted Rome and retired to his country seat at Liternum, where he spent the remainder of his days in the cultivation of his estate. He is believed to have died B.C. 183, leaving two sons and two daughters, the younger of whom was the mother of the Gracchi. Scipio, as a general, was second to none but his great opponent Hannibal; as a Roman citizen he does not deserve equal praise; he disregarded the laws of the constitution whenever these stood in the way of his own views and passions. [G.F.]

SCIPIO AFRICANUS THE YOUNGER, (*Publius Cornelius Scipio Æmilianus Africanus Minor*) was the younger son of Lucius Æmilius Paullus, the conqueror of Macedonia, and the adopted son of Publius Scipio, the elder of the sons of the great Africanus. Scipio must have been born B.C. 185, as he took an active part, at the age of seventeen, in the battle of Pydna (B.C. 168), in which his father defeated Perseus, king of Macedonia. From his earliest years he appears to have devoted himself to the study of literature; and even his arduous duties as a military commander did not prevent him from embracing every opportunity of extending his knowledge of Greek letters

and philosophy. The historian Polybius, whom he probably became acquainted in Greece, was his intimate friend, and accompanied him nearly all his campaigns; and the poets Lucilius and Terence, at a later period of his life, enjoyed his friendship and patronage. His fondness for Greek literature and refinement excited feelings of uneasiness in the minds of his friends; but to Scipio added the virtues and patriotism of a genuine Roman. He first attracted notice in B.C. 194, when, in consequence of the disasters which befallen the Romans in Spain, great difficulty was experienced in raising troops, which he at once moved by offering his services. As military tribune in the army of Lucullus he distinguished himself by personal courage, while his disinterested integrity gained the affections of the barbarians as well as his own countrymen. On the breaking of the third Punic war in B.C. 149 he went to Africa still holding the rank of military tribune, and distinguished himself so much by his courage, prudence, and justice, as to gain the unlimited confidence of all with whom he came in contact. B.C. 148 he returned to Rome, accompanied by the wishes of all the soldiers that he might soon be sent back as their commander; and such was the impression produced by his character and achievements that, when he offered himself a candidate for the ædileship for B.C. 147, he was elected consul, though he had not attained the legal age, and had Africa assigned to him as his province. On his arrival in the Roman camp he speedily re-established discipline, and commenced a series of operations which ultimately confined the Carthaginians to their capital. In the spring of the following year he attacked the devoted city, which was defended from street to street, and from house to house, after a struggle of three days, razed it to the ground. When the arrangements necessary for reducing Africa to the form of a province were completed, Scipio returned to Rome, where he obtained a splendid triumph, and also the surname of Africanus. He was censor in B.C. 142. Meanwhile the war continued to rage in Spain, the inhabitants of Numantia still continuing to refuse to acknowledge the supremacy of Rome. Scipio accordingly appointed consul a second time in B.C. 134, and succeeded in reducing them to submission (B.C. 133) after they had suffered the most dreadful extremities of hunger. For this victory he received the surname of Numantinus. During his command in Spain, Tiberius Gracchus, to whose father, Sempronius, he was married, had fallen a victim to his efforts in favour of an Agrarian law; the conqueror of Numantia, on his return to Rome in B.C. 132, became the leader of the aristocracy in preventing the law from being carried into effect. He thus sacrificed the favour of the people. On making a violent speech in the Forum, in which he a second time publicly avowed his approval of the death of Tiberius Gracchus, he went home the evening, accompanied by the senate and a large number of the allies, and retired to his bed-room with the intention of preparing a speech for the following day. Next morning he was found in his bed-room; and a general opinion prevailed that he had been murdered. Suspicion fell on various persons; and among others, upon his wife Sempronius, and her mother, Cornelia. [C.]

SCLATER, W., an English divine, died 1647.
 SCOPAS, a Greek sculptor, 4th century B.C.
 SCOPOLI, GIOVANNI ANTONIO, a naturalist and mineralogist of Tyrol, 1723-1787.
 SCORZA, S., a Genevese painter, 1589-1631.
 SCOTT, a family of dissenting ministers, the incipal of whom was DANIEL, a writer of much arning on the Trinity, died 1759. THOMAS, his lf-brother, author of Sermons, died 1746. The n of the latter, of the same name, published a rasion of the book of Job in 1774; and his second n, JOSEPH NICHOL, both a minister and physian, died about 1774.
 SCOTT, DAVID, a Scottish historian, and par-an of the Stuarts, 1675-1742.
 SCOTT, DAVID, was born at Edinburgh in the onth of October, 1806. His father, Robert Scott, oughit him up to his own profession, that of an en-aver, but this pursuit being extremely distasteful the younger Scott, he eventually took to paint- in 1827, after the expiration of his apprentice- p. Having made several preliminary studies d efforts in Edinburgh, and attended the ana- nical lectures of Dr. Monro, he considered him- f sufficiently prepared for an Italian tour. He rted in the autumn of 1832, and spent the ater portion of 1833 in Rome, where he painted large unintelligible picture, which he called 'Discord,' or 'Household Gods Destroyed;' a com- itation recalling Flaxman's Prometheus Chained, in this case absurdly applied; it suggests, if hing, Samson awaking after the treachery of ilah. He returned to England in the spring of following year, to find 'the colouring of Eng- pictures of the day, white and vermilion, asy, raw, unnatural, and sketchy,' in common oublet with many other travellers on the con- ent some years back. David Scott came home devoted victim to the *grand style*, as fore- dowed in his 'Discord,' but to the poetic or ic, rather than the religious; like Michelangelo, was a lover of the abstract, but wanting the pious devotion which certainly pervaded the d conceptions of that extraordinary man. t now exhibited a long succession of pictures the Royal Scottish Academy, of which he was member, of varied merit, but all of an unusual racter and subject, classic and other history, ever, gradually asserting its claim to share ention with abstract aesthetics, generally too ruse to be felt at all by Scott's public; but in e instances the work was a compromise be- en the two, as in his 'Paracelsus,' or 'Alchy- t,' and in his truly magnificent work, indeed masterpiece, 'Vasco de Gama encountering the rit of the Cape,' now placed in the Trinity House eith. His perseverance in this unbeaten path pite of an almost constant succession of dis- ointments as regards the more substantial ards of art, gradually undermined his consti- tion, and he sunk at last into a premature grave ch 5, 1849, in his forty-third year. With all ill-timed abstractions, and moral peculiarities, they are abundantly shown in the very inter- ng memoir of him by his brother, Scott was uestionably a very superior artist, and may n the martyr's branch with far more justice n Haydon. Most of his works show a high lectuality, and many as pictures are vigorously

drawn and even gorgeously coloured, as for instance his admirable 'Triumph of Love,' in the possession of his brother, a subject offering a delightful spot of sunshine among the usually prevailing gloomy abstractions of his pessimist philosophy. Among his unquestionably good works, also, either for sentiment of execution or both, are:—Queen Elizabeth in the Globe Theatre; Peter the Hermit; Jane Shore; Richard III.; Achilles addressing the Manes of Patroclus. To these must be added some series of designs, as those illustrating the Pilgrim's Progress; and his very remarkable and admirable series on 'The Ancient Mariner,' fully worthy of that extraordinary poem. For further details the reader may consult the *Memoir of David Scott, R.S.A., containing his journal in Italy, notes on art and other papers, with seven illustrations*, by William B. Scott, an ably planned work, and calculated to afford, if anything can, an invaluable lesson to all inordinately ambitious young artists, suffering under an impatient morbid hankering after the praise of those collectively, whose judgments individually they invariably profess to despise when unfavourable to themselves. [R.N.W.]

SCOTT, G. L., a mathematician, died 1780.

SCOTT, HELENAS, the son of a Scottish minister, practised as a physician at Bombay, and wrote 'The Adventures of a Rupee,' died 1821.

SCOTT, JAMES, an episcopal divine, celebrated as a preacher and political writer, 1733-1814.

SCOTT, JOHN. See ELDON.

SCOTT, JOHN, a Quaker poet, 1739-1783.

SCOTT, JOHN, a miscellaneous writer, who commenced the publication of the 'London Magazine' in 1820, and was killed in a duel arising out of a literary quarrel 1821. His works are 'A Visit to Paris in 1814,' and 'Paris Revisited in 1815 by Way of Brussels, including a Walk over the Field of Waterloo.'

SCOTT, JOHN, a learned minister of the Church of England, author of 'The Christian Life from its Beginning to its Consummation in Glory,' and of some critical and casuistical works, 1638-1694.

SCOTT, SIR MICHAEL, generally reputed a magician, was a native of Scotland, remarkable for his learning and skill in the occult sciences. His works are 'The Secrets of Nature,' 'The Sun and Moon,' 'Mensa Philosophica,' an edition of Aristotle, and a translation of Avicenna's History of Animals from the Arabic into Latin; died 1293.

SCOTT, MICHAEL, a Scottish merchant, author of the well-known sketches entitled 'Tom Cringle's Log,' which first appeared in 'Blackwood's Magazine.' Born in Glasgow 1789, died 1835.

SCOTT, REYNOLD or REGINALD, a gentleman of Kent, remarkable for his work written against the common belief in witchcraft, which was replied to by Casaubon, Glanvil, and James I.; d. 1599.

SCOTT, SAMUEL, an English painter, d. 1772.

SCOTT, THOMAS, rector of Aston Sandford, author of a 'Defence of Calvinism,' 1747-1821.

SCOTT, THOMAS, otherwise *Rotherham*, from his birth-place in Yorkshire, a prelate and statesman, died 1500.

SCOTT, SIR WALTER, had a pedigree, his sense of which affected materially both the spirit of his writings and the events of his life. From the great border-family, now represented by the

dukes of Buccleuch, there came in the fourteenth century, as an offshoot, the family of Harden, the heads of which are barons of Polwarth. The poet's great grandfather was a younger son of Scott of Harden; his grandfather, poorly provided for, became a farmer in Roxburghshire; and his father, Walter Scott, was a writer to the signet or attorney in Edinburgh, and married the daughter of a medical professor in the university. Walter, the fourth child of this couple, was born in the Old Town of Edinburgh, on the 15th of August, 1771. He was a sickly infant, and became incurably lame in his second year; and, after this, till he was about eight years of age, his childhood was principally spent at his grandfather's farm-house of Sandyknowe, where he became lovingly familiar with the scenery and traditions and ballads of the border. In this stage he was fond of reading; but, on being placed at the High School of Edinburgh, towards the end of 1779, he failed to distinguish himself in the regular studies of the class. He was, however, eminent for his historical and miscellaneous knowledge, for his skill in story-telling, and for his personal courage. In his twelfth year his love of ballad-poetry was ineradicably established, by the delight with which he perused Percy's 'Reliques.' In the winter of 1783 he entered the university of his native city, attending only one session, with little or no apparent profit. He never understood Greek beyond the elements, and had but a loose scholarship in Latin; and the acquaintance, which he obtained in early manhood, with French, Italian, Spanish, and German, was very superficial. In May, 1786, when he was nearly fifteen years old, he was articled to his father, and attended regularly in chambers for about four years. For literary avocations he was making, undesignedly, full preparation, by devouring romances, novels, histories, and old plays; while he continued to distinguish himself by telling and inventing stories. His father's intention, as well as his own, was, that he should come to the bar; and his attendance in the debating-club, called the Speculative Society, was one of his steps of training, while it gave occasion for his writing of essays, exhibiting his turn for antiquarian and poetical studies. In 1792 he was admitted as a member of the Scottish Faculty of Advocates.—In 1796 he published translations, in verse, of Bürger's German ballads, *Lenora*, and the *Wild Huntsman*; and he contributed to Lewis's *Tales of Wonder*. In 1798 appeared his translation of Goethe's prose drama, '*Goetz Von Berlichingen*;' and in 1799 he wrote, and made known to his friends, the earliest of his considerable efforts in original poetry, the ballads of '*Glenfinlas*,' '*The Eve of St. John*,' and '*The Grey Brother*.' Still he had gained no high literary reputation; nor was literary composition more than an occasional employment for him. He paid an average amount of attention to his profession, and was desirous to secure an independent livelihood from some source other than literature. In the end of 1797 he married Miss Carpenter, the daughter of a French emigrant, whose small fortune added something to his income: his father's death next gave him a moderate patrimony; and, in 1799, the patronage of the duke of Buccleuch and Lord Melville, to whose politics he steadily and warmly adhered, bestowed on him the

sheriffship of Selkirkshire, an easy office, with salary of three hundred pounds. In the same year his poetical taste, both in rhyme and in diction, not in more important matters,) received a new impulse and direction from hearing unpublished poems of Wordsworth and Coleridge, especially '*Christabel*.' Now, likewise, easy in circumstances and occupying a good position in society, Scott sufficiently independent of professional labour devote himself more and more to less unceasing pursuits; and he gradually made authorship his main business of his life.—The brilliant period of Scott's literary career extends from 1802, when he was in his thirty-first year, to 1825, when he was in his fifty-fourth. In the first of those years he published the first and second volumes, and in the next year the third volume, of '*The Minstrel of the Scottish Border*.' This publication gave him at once a distinguished reputation. The old ballads were excellently edited; the annotations showed great sagacity, good sense, and varied knowledge; and there was undeniable promise in the few ballads of his own that were inserted in the collection. In 1802, likewise, he had begun to write what he called, in a letter to Ellis, 'a kind of romance of border-chivalry, in a light-horse sort of stanza.' This piece, insensibly swelling in dimensions, soon became too bulky for the '*Minstrel*,' and was reserved to be the foundation stone of Scott's celebrity as an original poet. It was circulated among his friends, and warmly proved by Jeffrey, Wordsworth, and others; while the author was editing the ancient romance of '*Tristram*.' It appeared at length, in 1805, under the title of '*The Lay of the Last Minstrel*.' Its success was immediate and unexampled. It surprised, doubtless, aided the result: the poem appeared when genuine poetry had long been unpopular with the public, unless in the earliest volume of Crabbe and Campbell; and it was also the vigorous poetical narrative that had been produced in England for more than a century. But, further, it was the earliest poem which was inspired by animation and eagerness of the age that gave birth. The '*Lay*' was not, any more than its predecessors, the effort of a poet aiming at the high effects of his art: but it was a work of genius and originality; and, if inferior to some of Scott's later poems in mechanism, and less in strikingly poetical passages, it was more faithful than any of them to his design, of reconstituting the chivalrous romance in a shape accordant to modern sympathies. '*Marmion*,' coming, in its description of the battle, one of the spirited passages in the whole range of our poetry, appeared in 1808; the beautiful metrical romance of '*The Lady of the Lake*' in 1810; in 1811 the '*Vision of Don Roderick*,' indicating a decay of strength, which showed itself next year in '*Rokeby*;' in 1815 was published '*The Lady of the Isles*;' and the list of the metrical romances closes with '*The Bridal of Triermain*,' and '*The Dauntless*,' published respectively in 1817 and 1818, and both of them anonymously. In the course of this period, also, the poet edited the works of Dryden and Swift, contributed for a time to the *Edinburgh Review*, and in 1808 was zealously in establishing its formidable rival, the *Quarterly*. He wrote also biographical and

al prefaces, and performed much of other miscellaneous labour. To such work he was led by those commercial engagements which he now formed, and which exercised in the end so disastrous an influence on his fortune. His school-fellow, James Ballantyne, having been the editor and printer of newspaper in Roxburghshire, was assisted by Scott setting up a printing-house in Edinburgh; and he poet, after having lent money to the firm, came really a partner of it in 1805. Not long afterwards, his connection with trade became yet closer. He quarrelled with his bookseller, Constable; he desired to obtain facilities for giving to the world literature of a higher stamp than that on which publishers are likely to venture; and, not very consistently with his desire, he entertained sanguine hopes of profit from a publishing business guided by a man of knowledge and influence to himself. Accordingly, in 1808, John Ballantyne, a brother of James, was placed at the head of a new publishing firm; but here, as in the former case, Scott was a partner to the extent of a third. All these arrangements were kept profoundly secret; in the eyes of the public, and even his most intimate associates, Scott was merely the patron and friend of the Messrs. Ballantyne.—A few years after the formation of these partnerships, Scott entered on the second stage of his literary progress. He was one of the first to discover the rising popularity of his poetry; and he cheerfully set himself at work to regain his laurels on a new field. He wished for fame: he wished also for fortune. He had long cherished the ambition of territorial possession; and this ambition he could not hope to gratify speedily from his ordinary means, though his appointment as one of the principal clerks of the Court of Session in Scotland (an honorable and very easy post), added, from about 1812, fifteen hundred a-year to his income. From this position arose many of the rash adventures which finally ruined the publishing firm; hence also, in small degree, arose the eager industry with which, when his prose works proved so profitable, he poured forth volume after volume. In 1805, while he was engaged on *Marmion*, he had begun to write a novel: in three weeks during the summer of 1814 he added two volumes to it; and it was published anonymously in July of that year, bearing the name of 'Waverley, or, 'Tis Sixty Years since.' For a dozen years afterwards, the *Waverley* novels, popular beyond example, admired by critics as well as devoured by the public, were showered in ceaseless succession; and, although a few of the earliest are decidedly the most vigorous and like-like, it was not till towards the close of the series that the falling off was steady or remarkable. The dates are, in themselves, enough to prove marvellous activity and fertility, and indomitable steadiness of working. From '*Waverley*' in 1815 to the '*Tales of the Crusaders*' in 1825, eighteen novels appeared within eleven years.—This was the last year of Scott's prosperity, or rather the last year during which the world was allowed to believe him prosperous. The extraordinary success of the novels had enabled him to assume, more rapidly than he could have hoped, that place among the landed gentry, which it was his fatal weakness to value so immensely. Purchasing, in 1811, a house on the banks of the Tweed, naming it Ab-

botsford, and building a cottage on it, he acquired land around it till he possessed a considerable estate. He erected the baronial castle which we now behold, filled it with antiquarian nick-nacks and ornaments, planted and improved his grounds, and dispensed hospitalities which the most distinguished men in Europe were proud to partake. In 1820 he received a baronetcy; and in the following year he figured as the director of the whimsical pageantry which celebrated the visit of George IV. to Scotland.—Even before this time both firms of Ballantynes were tottering; and they were brought to the ground in the beginning of 1826, by the failure of Constable's house, with which they were deeply involved. The mortifying disclosure of Sir Walter's concealed partnership followed of course; and his liabilities were found to amount to a sum not much short of £150,000. He acted like a man of courage and a high-minded gentleman. He refused to offer to the creditors any composition, or to accept from them any discharge; he pledged himself to devote the whole labour of his subsequent life to the payment of the debt; he fulfilled the pledge, and died before his time through the toil which it cost him. A great part of the debt was satisfied during his lifetime; and the balance of the principal was paid by his executors. One main aid in effecting the result was the collected edition of his works, with the personal notes which he condescended to furnish to it. But he produced likewise a new series of writings, which, although the later are distressingly indicative of decay, and the best of them are not of a very high order, must be looked on with the respect due to the motive which prompted them.—In 1826 he published his novel of '*Woodstock*,' written while his pecuniary anxieties and humiliation were at their height; afterwards appeared the '*Life of Napoleon*,' (partly written before the bankruptcy), the '*Tales of a Grandfather*,' the first and second series of the '*Chronicles of the Canongate*,' '*Anne of Geierstein*,' a '*History of Scotland*' for Lardner's *Cyclopædia*, two Dramas, and '*Letters on Demonology*.' In 1831 the failure of the active intellect was shown

[Dryburgh Abbey.]

unequivocally by '*Count Robert of Paris*,' and '*Castle Dangerous*.' In 1830 Sir Walter had been attacked by paralysis, which recurred acutely more than once: and, prevailed on at last to pause from labour, he set out, in September, 1831, for the

continent, of which, in his better days, he had seen very little. Naples was the farthest point he reached; the mind gave way completely; he was hurried home, and reached Abbotsford in July, 1832. There, after some days of unconsciousness, he died on the 21st of September. He was buried in Dryburgh Abbey. [W.S.]

SCOTT, WILLIAM. See STOWELL.

SCOTTI, C. G., an Ital. dramatist, 1759-1821.

SCOTTI, J. C., an Italian Jesuit, 1602-1669.

SCOTTI, MARCELLO, a learned ecclesiastic, born at Naples 1714, member of the legislative commission of the Neapolitan republic 1799, executed by the counter-revolutionists 1800.

SCOUGAL, H., a Scottish divine, 1650-1678.

SCRIBANI, C., a Flemish Jesuit, one of the twelve apostles commissioned by that body in Flanders, known as a controversial wr., 1561-1629.

SCRIBONIANUS, a Roman commander, proclaimed emperor in Dalmatia, and assassinated 42.

SCRIBONIUS, a Roman physician, 1st cent.

SCRIVERIUS, the Latinized name of PETER SCHRYVER, a Dutch philologist and historian, 1576-1660.

SCRIMZEOR, H., a Scotch writer, 1506-1571.

SCROGGS, SIR W., an English judge, 1623-88.

SCROPE, WILLIAM, a writer on sporting subjects, 1772-1852.

SCUDDER, H., a presbyterian writer, 17th cen.

SCUDERI, GEORGE DE, a French poet, novelist, and dramatic writer, 1601-1667. His wife was equally celebrated in epistolary composition. His sister, MADELEINE, eminent for her wit and writings as a novelist, 1607-1701.

SCULTETUS. See SCHULTET, SCHULTZ.

SCULTETUS, or SCULTZ, JOHN, a writer on surgery, born at Ulm 1595, died 1645.

SCUPOLI, L., an Italian ascetic, 1530-1610.

SCYLITZES, J., a Greek historian, 11th cent.

SEAMAN, L., an English divine, died 1675.

SEARCH, EDWARD. See TUCKER.

SEBA, ALBERT, a Dutch naturalist and pharmacoplist, Amsterdam, 1665-1736.

SEBASTIAN, king of Portugal, son of the Infant John by Joanna, daughter of the emperor Charles V., was born 1554, and succeeded his grandfather, John III., 1557. In 1578 he led the flower of his nobility into Africa on a wild expedition against the Moors, and perished in battle with nearly all his followers. Sebastian's fate being long uncertain, and having no issue to succeed him, gave occasion to many impostors to assume his name and title, and eventually to the annexation of Portugal to Spain.

SEBASTIANI, FRANCIS HORACE DE, a celebrated French marshal, distinguished during the republic, empire, and the monarchy, 1772-1851.

SEBASTIANO, DEL PIOMBO, the name by which SEBASTIANO LUCIANI is commonly known, from his office of the pope's keeper of the leaden seals. He was born at Venice in 1485, and was one of the pupils of Giovanni Bellini. He went to Rome about 1512, by the invitation of Agostino Ghigi, and soon contracted a friendship with Michelangelo, by whom, as an oil painter, he was pitted against Raphael. The large picture of the Raising of Lazarus, in the National Gallery, was painted by Sebastiano, in which he is said to have been assisted by Michelangelo, in rivalry with the Trans-

figuration of Raphael. They were both painted Giulio de Medici, the bishop of Narbonne, were exhibited together in Rome, and are not unequal as to make the choice a matter of course. Sebastiano found his advocates. Sebastiano created Frate del Piombo by Clement VII. It was the duty of this officer to fix the leaden seal to bulls, &c. A salary was attached to it, and Sebastiano del Piombo was no longer the painter. Sebastiano Luciani had been: his ease made lazy, Michelangelo reproved him for idleness; was a great portrait painter. He died at Rome 1547.—(Vasari, *Vite dei Pittori*, &c.) [R.N.]

SEBER, W., a German philologist, 1573-16

SECHELLES, J. MOREAU DE, a French statesman and financial administrator, 1690-1760.

SECKENDORF, GUY LOUIS VON, a German statesman, divine, and ecclesiastical historian, 1616-1692. His nephew, FREDERICK HENON, Count von Seckendorf, a field-marshal and diplomat in the interest, successively, of Prussia, Poland, and Austria, 1673-1763. LEON, Baron de Seckendorf, a poet, of the same family, 1773-1809.

SECKER, THOMAS, archbishop of Canterbury, a great promoter of religion and ecclesiastical learning, author of Sermons, 1693-1768.

SECOUSSE, D. F., a Fr. historian, 1691-1

SECUNDUS. See EVERARD.

SEDAINE, M. J., a Fr. dramatist, 1719-1

SEDANO, JOHN JOSEPH LOPEZ DE, a learned Spanish writer and numismatist, 1729-1801.

SEDGWICK, three puritan divines:—OBADIAH, preacher of St. Paul's, Covent Garden, &c., member of the Westminster Assembly, 1600-1701. WILLIAM, called the apostle of Ely, dates unknown. DOOMSDAY SEDGWICK, so called from preaching the approaching end of the world, died about 1701. SEDILLOT, J. J. EMMANUEL, a French naturalist and astronomer, 1777-1832.

SEDLEY, SIR CHARLES, a dramatic writer, courtier, and wit of the court of Charles II., afterwards promoted the revolution of 1688, at Aylesford, in Kent, about 1639, died 1701.

SÉDULIUS, CÆLIUS or CÆCILIUS, an Irish Scotch priest, known as a Latin poet, 5th cent.

SEED, JEREMIAH, a learned divine, died 1

SEEGERS, or SEGHERS, GERARD, a Flemish painter of altar-pieces, 1589-1651. His brother, DANIEL, a flower painter, 1590-1660.

SEELLEN, J. H. DE, a German philologist, 1687-1762.

SEEMILLER, SEBASTIAN, a Bavarian Orientalist and bibliographical writer, 1752-1798.

SEETZER, ÜLRIC JASPER, a Dutch traveller in the East, supposed to have perished 1811.

SEGAR, SIR WILLIAM, garter-king-at-arms, author of 'Honour, Civil and Military,' died 1

SEGAUD, W. DE, a French Jesuit, 1674-1

SEGHERS. See SEEGERS.

SEGNER, J. A., a Hungarian mathematician and philosopher, 1704-1777.

SEGNERI, PAOLO, an Italian Jesuit, distinguished as a preacher and theologian, 1624-1694. His nephew, PAOLO, a Jesuit and preacher, 1678-1

SENI, B., an Italian historian, died 1559

SEGRAIS, J. R. DE, a French poet, 1624-1

SEGUIER, J. F., a learned botanist and numismatist, allied to the noble family of that name, whose names occur in the next article, 1703-1

SEGUIER, PETER, a French diplomatist, whose talents were opposed to the policy of Pope Julius I., 1504-1580. His son, **ANTHONY**, a lawyer and ambassador, 1552-1626. **PETER**, grandson of the first of that name, chancellor of France, and one of the founders of the French Academy, 1588-1672. **ANTHONY LOUIS**, of the same family, a royalist at the period of the revolution, 1726-1791.

SEGUR, a noble family of Guienne, principal of whom are—**HENRY FRANCIS**, Count De Segur, and lieutenant-general, 1689-1751. **PHILIP HENRY**, his son, Marquis, a marshal of France, minister of war in 1780 before Brienne, 1724-1801. **LOUIS PHILIP**, son of the latter, companion-in-arms of Lafayette in America, known also as a diplomatist and historian, 1758-1832. **JOSEPH ALEXANDER**, second son of Philip Henry, a dramatic and miscellaneous writer, 1756-1805.

SEILER, G. F., a Ger. philosopher, 1733-1807. **SEISSEL**, or **SEYSSEL, CLAUDE DE**, a French historian and political writer, translator of Euseas, and historian of Louis XII., 1450-1520.

SEJAN, N., a French composer, 1745-1819.

SEJANUS, LUCIUS AELIUS, a praetorian general at Rome, a favourite of the emperor Tiberius, put death for aiming at the supreme authority 31.

SELDEN, JOHN, a famous scholar, antiquarian, and political character, time of Charles I. He was born at Salvington, in Sussex, and educated for the law. He entered the House of Commons in 1624, and in 1640 represented Oxford in the long parliament. He afterwards became archivist of the tower and a commissioner of the admiralty. His whole life was devoted to learning, and he bears the character of a sincere Christian and a true patriot; 1584-1654.

SELEUCUS, surnamed *Nicator*, founder of the line of Syrian princes called *Seleucidae*, was one of the generals of Alexander the Great, and, on the death of that prince, was governor of Media and Bablyonia. He extended the dominion of his arms to a policy as far as the Indus, and in 280 B.C. was acknowledged king of Macedon, Thrace, and Asia minor. He reigned only a few months, and was assassinated by Ceraunus 279 B.C. **SELEUCUS II.**, named *Callinicus*, succeeded Antiochus II. 247 B.C., and after losing many of his provinces by the invasion of Ptolemy III. 242, was taken prisoner by the Parthians. He died in captivity B.C. 225.

SELEUCUS III., surnamed *Ceraunus*, son and successor of the preceding, was assassinated B.C. 222.

SELEUCUS IV., surnamed *Philopator*, was son of Antiochus the Great, to whom he succeeded B.C. 175, poisoned by his minister, Heliodorus, 174.

SELEUCUS V. was son of Demetrius II., and was proclaimed king with Antiochus Grypus B.C. 125.

He was killed by order of his mother, Cleopatra, 121.

SELEUCUS VI., son of Antiochus Grypus, became king over a part of Syria in 97 B.C., and took the remainder from his uncle, Antiochus Grypus, 94. He was killed the year following in a contest which ensued with the son of the latter.

SELM, three emperors of the Turks:—SELM son of Bajazet II., born 1467, dethroned his father and killed his two brothers 1512, defeated the Shah of Persia 1514, conquered Syria and Egypt 1516-1517, died 1520. **SELM II.**, succeeded his father, Soliman II., in 1566, took Cyprus from the Venetians 1570, and Tunis from

the Spaniards in 1571. In the same year he lost the great naval battle of Lepanto; died 1574. **SELM III.**, son of Mustapha III., was born 1761, succeeded his uncle, Abdoul Hamid, 1789, sustained a disastrous war against Russia and England, which was terminated by the peace of Jassi in 1792. He was afterwards the ally of England against France at the period of the expedition to Egypt, and signalized his reign at the conclusion of hostilities, by introducing our European civilization into his states. He was dethroned in 1807, and strangled the following year by order of Mustapha IV., who succeeded him.

SELIS, N. J., a French writer, 1737-1802.

SELKIRK, ALEXANDER, upon whose adventure the story of Robinson Crusoe was founded by Daniel Defoe, was a native of Largo, in Fifeshire, where he was born about 1680. He was left on the island of Juan Fernandez in 1704 by a Captain Stradling, to whom he had given some cause of offence. He was rescued by Captain Wood Rogers in 1709, and is said to have related his adventures to Defoe, with a view to their publication.

SELLE, C. T., a German physician, 1748-1800.

SELLER, A., an English divine, 1647-1720.

SELLIUS, ADAM BUCKHARDT, a Russian monk and writer, originally of Denmark, d. 1746.

SELLIUS, GODFREY, a native of Dantzic, known as a naturalist and historian, died 1767.

SELLON, BAKER JOHN, known for many years as a police magistrate, author of a standard law-book, entitled 'Analysis of the Practice of the Court of King's Bench and Common Pleas,' born in London 1762, died 1835.

SELVES, J. B., a Fr. juriconsult, 1757-1823.

SEMERY, A., a French theologian, 1630-1717.

SEMRAMIS, a queen of Assyria, of whom we have little certain historical knowledge. She is generally regarded as the wife of Ninus, and is said to have put him to death. The traditions agree that she reigned forty-two years after Ninus: she was called *Rea* on account of her atrocities.

SEMLER, J. S., a German divine, 1725-1791.

SEMPRONIA, two Roman ladies:—1. The wife of Scipio Aemilianus, a sister of the Gracchi, who is accused of having contributed to the death of her husband. 2. A lady concerned in the conspiracy of Catiline.

SEMPRONIUS, a name of frequent occurrence in Roman history. The principal who have borne it were the **GRACCHI** (see that article); besides these may be mentioned—**SEMPRONIUS ASELLIO**, a military tribune of Rome, distinguished in Spain B.C. 137. **SEMPRONIUS LONGUS**, consul of Rome B.C. 217, distinguished in the field against Hannibal. **SEMPRONIUS TUDITANUS**, a Roman tribune and commander, who was consul B.C. 203, and defeated Hannibal at Crotona. The others of the name are of less mark.

SENAULT, J. F., a Flem. ecclesiast., 1599-1672.

SENDIVOG, M., a Polish alchymist, 1566-1646.

SENEBIER, JOHN, a protestant minister of Geneva, known as a natural philosopher and historian, 1742-1809.

SENECA, LUCIUS ANNAEUS; born at Cordova in the second year of our era; put to death at Rome by order of Nero in the sixty-sixth. A literateur, rhetorician, and philosopher, whose practical life is marked by all the singular contra-

dictions that abound in his writings. At first a stern self-denying Stoic; then the ambitious politician intriguing with ladies at the court. Banished at the instance of Messalina, he writes his famous work on *Consolations*; the next production of his

[Seneca—From an Antique Bust.]

restless pen being a new *Consolation*, addressed to Polybius, a freedman—a mean and miserable flattery intended for the ear of Claudius. Recalled by Agrippina, we find him installed, in company with Burrhus, as preceptor and guardian of Nero; labouring avowedly during a few years, along with his firmer colleague, to restrain the passions of that disgrace of humanity; boldly defending Burrhus in defiance of Nero,—winking, meanwhile, at his pupil's worst excesses; even prompting to evil, for if we can credit antiquity, Seneca suggested that revolting and most monstrous parricide—all the while preaching the austerities of Stoicism: lastly, rising into the vigour of his best days, and, if with some ostentation, still meeting death as becomes a brave man!—Seneca, is perhaps the type and ideal, alike in action and thinking, of that large class of minds, possessed by a lively and restless fancy, and of remarkable quickness in appreciating, who have yet no steadiness either of heart or intellect, and are totally deficient in that invaluable power—the *Faculty of Belief*. High and low, large and small, in all grades of society and manners of life, we meet with such persons; and although never consistent, they are yet in one sense always sincere—i.e., they are ruled by the plan or opinion which is authoritative for the hour. Having no real Originality—that which cannot be divorced from ability to penetrate towards Truth—Seneca's literary writings are worthless: nor are his moral speculations stamped with the *Tower-mark*. In theory he is a copyist, and a bad one, for he seldom reaches the positive ground of any theory: and although in his practical writings he always displays great acuteness, and expresses himself clearly and pleasantly—qualities much increased by his large acquaintance with the surface of the world,—even the best of his maxims are tarnished by the vice of exaggeration. Generally, the *colour* is of Gold, but the *ring* of the true metal is wanting.

[J.P.N.]

SENECAI, SENECAI, or SENECE, ANTOY BAUDERON DE, a French poet, 1643-1737.

SENEFELDER, ALOYS, a native of Munich, inventor of the art of lithography, 1771-1834.

SENKENBERG, H. C., Baron DE, a jurist, consultant, and aulic counsellor of the emperor, 1701-1768. His brother, J. CHRISTIAN, a physician and founder of an hospital at Frankfort, 1701-1772. R. CHARLES, son of the first named, juriconsult and German and Latin poet, d. 1741.

SENNACHERIB, king of Assyria, B.C. 712-7.

SENNERT, DANIEL, physician to the elector of Saxony, 1572-1637. His son, ANDREW, Oriental scholar, 1606-1689.

SEPTIMIUS. See SEVERUS.

SEPULVEDA, JUAN GINES DE, a learned Spaniard, who was historiographer to the emperor Charles V., and wrote his Life, 1490-1573.

SERAIN, P. E., a Fr. agriculturist, 1738-1818.

SERAO, F., an Ital. archaeologist, 1702-1791.

SERAPION, a physician of Alexandria, supposed to have written against Hippocrates, 3d century B.C. A *second* of the name was a Syriac physician, author of two works still existing, or 9th century. A *third*, called SERAPION JUNIOR, was an Arabian physician and medical writer of the 11th century.

SERARIUS, NICHOLAS, a learned Jesuit, called 'the luminary of the German church,' 1555-1610.

SERASSI, P. A., an Ital. biographer, 1721-1800.

SERENUS, A. L., a Roman poet, 1st century B.C.

SERGARDI, L., an Italian satirist, 1660-1718.

SERTEL, J. T., a Swedish sculptor, 1740-1818.

SERGIUS, the *first* of the name, pope of Rome, of Justinian II., 687-701. The *second*, whose pontificate Italy was invaded by the Saracens, and Louis II. was consecrated king of Italy, 844-847. The *third*, one of Marozia's lovers, father by her of John X., 904-911. The *fourth* said to be the first who changed his name on assuming the tiara, 1009-1012.

SERGIUS, a patriarch of Constantinople, 610-638.

SERIEYS, A., a French compiler, 1755-1818.

SERIMAN, Z., a Venetian writer, 1708-1783.

SERLIO, S., an Italian architect, 1475-1553.

SEROUX D'AGINCOURT, JOHN BAPT. LOUIS, a Fr. historian and antiquary, 1730-1818.

SERPILIUS, G., a Hungarian ecclesiastic, controversial writer and poet, 1668-1723.

SERRA, A., an Italian economist, 16th century.

SERRA, M., an Italian painter, 1658-1728.

SERRANO, T., an Italian Jesuit, 1715-1783.

SERRAO, J. A., an Italian prelate, 1731-1783.

SERRE, HERCULES, Count DE, a French statesman attached to the party of Richelieu, 1777-1818.

SERRES, JOHN DE, in Latin *Serranus*, learned French Calvinist and historiographer, 1515-1598. His br., OLIVIER, an agriculturist, 1539-1618.

SERRES, OLIVE, a lady who claimed to be princess of Cumberland, as the legitimate daughter of Henry Frederick, duke of Cumberland, by sister of the Rev. Dr. Wilmot; she was born Warwick in 1772, and made a fruitless effort to obtain the recognition of her claims on the death of George III., previous to which she had been married to Mr. Serres, the king's marine painter. Died 1834.

SERRONI, H., an Ital. theologian, 1517-1583.

SERRY, J. H., a French theologian, 1659-1718.

SERTORIUS, QUINTUS, a partizan of Marius the civil war between the plebeians and the senatorial oligarchy, headed by Sylla, was born in Italy about 121 B.C. He reaped his earliest laurels in the war against the Cimbri and Teutones, on the Gaulish frontier, and there also became acquainted with the chief of the people. When Sylla triumphed in Italy, Sertorius retired to his praetorial government in Spain; and though he was continually harassed by Metellus, he virtually rendered that country independent under his command, and deavoured to give it the benefits of a paternal government. He was assassinated at a banquet to which he had been invited by the Roman general Perpenna B.C. 72. [E.R.]

SERVETUS, or SERVEDE, MICHAEL, was born at Villa Nuova in Arragon, A.D. 1509. From his birth-place he assumed the cognomen of Vilovanus; and the surname Reves, which he put on the title-page of his books, appears to be a slight transposition of the first two syllables of Servetus. His father was a lawyer, and wishing his son to study for his own profession, sent him to that purpose to Toulouse. But literature and theology occupied his attention and engrossed his leisure. On returning to Spain he attached himself to Quintana, confessor to the emperor Charles V. and accompanied him first into Italy and then Germany. In the year 1550 he took up his residence at Basle, and often conferred with Oecampadius on matters of theology. His mind now began to evolve its peculiar speculations, all in antagonism to the current beliefs. In 1531 appeared his first work at Hagenau, 'De Trinitatis erroribus,' in which the notion of a Trinity was not only discussed, but caricatured. The emperor ordered the book to be suppressed, and the year following Servetus published apologetic dialogues, condemning the juvenility of the work, but still maintaining the same doctrines. In 1533 he went to France, studied at Paris, afterwards removed to Orleans, and resided for two years as director of the press at Lyons, busying himself with the study of medicine. In 1537 he returned to Paris, and took the degrees of master of arts and doctor of medicine. Leaving Paris, after his accusation by the Sorbonne, he settled ultimately at Vienne, and for a series of years practised medicine. He had been a considerable time composing a book on Theology, and under the title of 'Christianismi Restitutio,' it appeared at Vienne in 1553, but without author's name or date. The book produced a great sensation—suspension, in consequence of some Genevan correspondence with a French refugee called De Trie, fell on Servetus, and he was imprisoned by the inquisitors. During the process he contrived to escape and fled at once to Geneva, where he lay in concealment for a month, waiting an opportunity to set out for Naples. After his flight from Vienne he was burned there in effigy, having been previously condemned as an outlaw, and he would have been burned in person, if he had not opportunely made his escape. As he was about to leave Geneva for Zurich he was discovered, and the suggestion of Calvin he was at once apprehended, on the 13th August, 1553. The accuser of the Spaniard was Nicholas de la Fontaine, a Frenchman, but Calvin himself framed the eight-

and-thirty articles of charge, as we learn from one of his own letters. At the first hearing of the case Servetus made explanations, and at the second hearing Calvin himself attended. In the meantime the council of Geneva wrote to Vienne, with information that Servetus was in custody, and resolved as the trial went on to send communications to several of the cantons. The council of Vienne demanded back the prisoner, but with tears in his eyes he entreated the Genevan syndics to retain him, and assist him before their own tribunal. The Genevan magistrates stood upon prerogative, or the burning of Servetus would have happened at popish Vienne, and the protestant syndics were proud to rival a catholic city in severity of penalty. His prosecution was now given to the attorney-general, and the charge of sedition was specially pressed against the accused; for politics superseded theology in the discussion. Servetus replied at some length, and in his subsequent petition one of his principal endeavours is to clear himself from the charge of being a disturber of society. Calvin and he were confronted—they had maintained a correspondence some months previous, and Servetus actually craved an indictment to be preferred against the reformer. Calvin, in the meantime, had quarrelled with the council in a case of discipline; the Libertine or anti-Calvinist party were growing in power, and Servetus hoped apparently to turn the tables on his principal antagonist. The opinion of the churches in Switzerland had now been asked, and they unanimously condemned Servetus, though they differed as to the amount of punishment which should be inflicted on him. Toward the end of the protracted investigation the influence of Calvin was little felt, and on the 26th of October, the unhappy Servetus was doomed to the stake the following day. Calvin interfered for a more lenient form of punishment, but his request was not granted. Servetus was greatly affected when he heard his sentence, though he gradually resumed his composure. Farell attended him, but seems to have made no impression upon his mind. The next day the sentence was carried into effect in all its cruel barbarity. The sufferer, during the half-hour of his consciousness amidst the flames, cried repeatedly—'Jesus, thou Son of the Eternal God, have mercy on me.'—This execution of Servetus has acquired an adventitious eminence from its circumstances. Had he been burned at Vienne, the deed would have been known only as one of thousands inflicted by papal mandate. But the scene of the martyrdom in the protestant republic of Geneva, and the theological notoriety of Calvin, have given it an extraordinary and a polemical celebrity. Much has been said and written about it: it has barbed many a declamation: and the harsh and vindictive spirit of Calvin has been often reprobated. But the fact is, that only in the year 1842, were the original records of the trial discovered and employed in the account. M. De La Valayre in 1842 made good use of those documents, and so did Billiet in 1844, in his 'Relation du Procès Criminal Intenté à Genève en 1553 Contre Michel Servet,' &c.—The result throws a better and more faithful light on the whole transaction. It is proved that while Calvin approved of the punishment of death according to a theory

then commonly entertained, yet that he had little or no direct influence with the council during the latter portion of the trial. (See CALVIN). The union between religion and politics in the government of Geneva, led its rulers to believe themselves invested with the power of punishing heresy as a sin against God and a crime against the state. Nay, at the very same period Berthelier, a citizen, had been excluded from the church by Calvin, but the council declared him capable of receiving the communion. In 1547 Gruet, a leader of the Libertine party, had been beheaded for sedition, though religious opinion formed a special charge against him. In the document which contains the sentence against Servetus, assaults on Calvin and the Genevan ministers are not mentioned at all. Servetus himself held the same theoretic views, and in his indictment against Calvin he puts the alternative—'Till the cause be decided for his death or mine.' So that had he obtained supremacy in Geneva, he would not have scrupled to burn Calvin. What a miserable misconception of human right and Divine enactment! And it was certainly a sad and inconsistent thing for reformers to deny to others the toleration which they had claimed and gained for themselves. The career of Servetus was peculiar. Born in the land of the *Auto-da-Fé*, he was sent out of it to study, his father being afraid that his son's free speculations and pugnacious propensity would place him within the grasp of the inquisition; and yet he perished neither in Spain nor France. Coleridge has said, that 'if any poor fanatic ever thrust himself into the flames, that man was Servetus.' We cannot use these words in all their latitude; yet, certainly Servetus, with all his acknowledged talents and gifts, was ambitious and arrogant, was, in short, what Mosheim calls a 'semifanatic.' But surely such a character did not merit so awful a penalty, and we may read in the flames of Servetus that man is responsible to God alone for his belief, that truth does not suffer by toleration, for fire is not able to extirpate what argument cannot overthrow. A passage is found in the 'Restitutio' of Servetus, which has been understood by some as anticipating by seventy years, Harvey's famous discovery of the circulation of the blood. While we admit the boldness and eloquence of Servetus, his rare acquirements and restless industry, we are compelled to add that the equivocations made by him on his trial, both at Vienne and Geneva, do not place his moral character in the same favourable light. [J.E.]

SERVIEZ, JACQUES ROERGAS DE, a French historian, 1679-1727. His grandson, EMMANUEL GERVAISE, a soldier and writer, 1755-1804.

SERVIN, LOUIS, a French juriconsult, who died suddenly when in the act of remonstrating with Louis XIII. against his tyrannical acts, 1626.

SERVIVS, MAURUS HONORATUS, a Roman grammarian and commentator upon Virgil, 5th c.

SERVIUS, SULPITIUS RUFUS, a Roman jurist and statesman, died in Antony's camp, B.C. 43.

SERVIUS TULLIUS, the sixth king of Rome, succeeded his father-in-law, Tarquin the Elder, B.C. 578. Murdered at the instigation of Tullia and her husband, B.C. 534. See TARQUIN.

SESSA, an Indian mathematician, the reputed inventor of the game of chess, 11th century.

SESTINI, D., an Ital. antiquarian, 1750-1832.
SESTO, CÆSAR DA, called the Milanese, an Italian painter of the 16th century.

SETTALA, LODOVICO, in Latin *Septalius*, an eminent Milanese physician, 1552-1633. His son MANFRED, an able mathematician, 1600-1680.

SETTLE, ELKANAH, known as a poet and dramatic writer, born at Dunstable 1618, d. 1724.

SEUME, J. T., a German writer, 1763-1810.

SEVERINUS, a pope of Rome, 640.

SEVERUS, three Roman emperors:—1. LUCIUS SEPTIMIUS SEVERUS, the most important, was born on the African coast 146, and having commanded the legions of Illyria, was proclaimed on the death of Pertinax 193. He made many conquests in the East, and in 208 came to this island where he built a wall between the Forth and the Clyde, as a check against the Picts. He died at York in 211. 2. FLAVIUS VALERIUS SEVERUS, killed Maximian, after a short indulgence in power, 305. 3. VIBIUS SEVERUS, proclaimed by the legions in Illyria 461, died 465. 4. See ALEXANDER.

SEVERUS, founder of a Christian sect, 2d cent.

SEVERUS, A., a Greek rhetorician, 5th cent.

SEVERUS, C., a Roman epic poet, 1st cent.

SEVERUS, S., a Christian poet, 4th century.

SEVIGNE, MARIE DE RABUTIN CHANTAL, Marchioness De, celebrated for her fine understanding and epistolary talents, was born at the chateau de Bourdilly, in Burgundy, 1627. After the death of the marquis de Sevigne, she lived in widowhood twenty-five years, devoted to the education of her children. Her famous letters were addressed to her daughter, Madame de Grignan. Died 1696.

SEVIN, F., a French philologist, 1682-1741.

SEWARD, ANNA, a once popular writer, known as the friend and biographer of Dr. Darwin, was the daughter of the Rev. T. Seward, rector of Eyam, in Derbyshire, where she was born 1771. Her publications were the poetical romance, *Louisa*, 1782; a *Collection of Sonnets*, 1799; and *the Life of Darwin* in 1804. She died in 1819, since which her Literary Remains and Correspondence have appeared.

SEWARD, W., a biographical writer, 1746-9.

SEWELL, GEORGE, a native of Windsor, was settled as a physician at Hampstead, and known to fame as a poet and miscellaneous writer by his tragedy of 'Sir Walter Raleigh,' a 'Vindication of the English Stage,' &c.; died 1726.

SEWELL, WILLIAM, son of a surgeon at Amsterdam, whose father was an English refugee known as a Quaker historian, 1654-1720.

SEXTIUS, a Pythagorean philosopher, 1st cent.

SEXTIUS-EMPIRICUS, a Greek philosopher and physician, time of Commodus.

SEYBOLD, D. C., a Ger. philologist, 1747-1810.

SEYDLITZ, FREDERIC WILLIAM, Baron, was a companion-in-arms of Frederick the Great, distinguished in the seven years' war, 1722-1778.

SEYMOUR, ARABELLA. See ARABELLA.

SEYMOUR, EDWARD, duke of Somerset, uncle to Edward VI., was brother to Queen Jane Seymour, and on his sister's marriage to Henry VIII. in 1536, was created Viscount Beauchamp. He distinguished himself in the Scottish French wars, and in the struggle for power after the death of Henry, became governor of the yo

Gaspar de Crayer.

John Thurloe.

*Edward Seymour
Duke of Somerset.*

*Algernon Percy.
Earl of Northumberland.*

ing and protector of the realm. In 1548 he was created duke of Somerset, and took the functions of lord-treasurer and earl-marshal; in the same year he headed the troops in Scotland, and won the battle of Musselburgh. His power was at last broken by the intrigues of the earl of Warwick, afterwards duke of Northumberland, and he was beheaded on Tower Hill, 22d January, 1552.

SEYSEL. See **SEISSEL**.

SFORZA, a noble Italian family founded by **COMO ATTENDOLO**, a peasant of the Romagna, who was born at Cottignola in 1369, and enlisting in company of soldiers that passed through the ranks, rose gradually to the rank of general. He was called *Sforza* on account of his great vigour. He was drowned in effecting the passage of the river Pescara, in the service of Joan of Naples, 1460. **FRANCESCO ALESSANDRO**, duke of Milan, was a natural son of the preceding. He was born in 1401, and rose to distinction in the service of his father, afterwards as general of the Milanese troops; he was created duke by the leaders of a revolt in 1450, died 1466. The descendants of the latter possessed the duchy through several generations. The principal of them was **MAXIMILIAN**, who figured in the events that followed the league of Cognac, and died at Paris, in the reign of Francis I., 1530. See **VISCONTI**.

SFORZA, BONA, daughter of J. G. Sforza, one of the preceding dukes, and of Isabella of Arragon, became queen of Poland by her marriage with Sigismund I. in 1518; she died 1557.

MADWELL, SIR LANCELOT, a judge and member of parliament, born 1779, vice-chancellor 1831, died 1850.

MADWELL, THOMAS, a dramatic writer, and professor of Dryden as poet-laureate and historiographer, was born of a good family in Norfolk 1694. He followed in the wake of Ben Jonson as writer of comedy; died 1692. **CHARLES**, supposed to be his son or nephew, also a playwright, died 1726.

SHAFTESBURY. The first earl of Shaftesbury was the brilliant but inconsistent statesman of Charles II.'s reign. His son, the second earl, was the father of **ANTHONY ASHLEY COOPER**, the third earl, the subject of this notice. He was born in London in 1671, and educated under the superintendence of his grandfather. He travelled some years on the continent, and in 1693 entered the House of Commons, where he acted energetically with the Whig party. His health being threatening to fail, he went abroad in 1698, and studied in Holland under the advice of Bayle and de Clerc. Next year his father's death called him to the House of Lords; but, early in the reign of Anne, his premature infirmities forced him to retire altogether from public life. Thenceforth he occupied himself exclusively with philosophy and literature, till he died at Naples in 1713.—In 1711 he collected his writings into a series, which was entitled 'Characteristics of Men, Manners, Opinions, and Times.' The most important pieces in the collection are, the 'Inquiry concerning Virtue and Merit,' first published in 1699; and the Platonic dialogue, called 'The Moralists, a Philosophical Apodyssey,' whose first appearance was in 1709. Not as a philosopher and as a writer, Shaftesbury encountered extremes, equally undeserved,

of admiration and of censure. His style is elaborate, artificial, affected, and studded all over with foreign and pedantic terms of his own invention; and he very seldom puts off his offensive air of foppish condescension. But there is hardly a page of his volumes in which we are not struck by the elements of fine writing; and some passages of his, with their lofty thoughtful eloquence, and their exquisite music of rhythm, are among the most beautiful things in the English language. The moral elevation and purity of the sentiments are always worthy of the amiable and irreproachable character of the author. The great defect in Shaftesbury's philosophical thinking is its indistinctness: he merely throws out hints, in a manner not unlike his master and model Plato, and often gives reason for believing that he himself had apprehended very obscurely the ideas he strives to express. Inconsistency, real or apparent, is a natural accompaniment of this mistiness of thought; and the vacillating uncertainty of opinion betrays itself most of all when questions of religion are directly handled. His mind had received a wrong bias through the scorn he felt for the Toryism and Jacobitism then rampant in the Church of England; and the tendency was augmented by his observation of the popularity possessed, among the clergy as elsewhere, by the philosophy of Locke, which Shaftesbury believed to contain the germ of evil religious consequences. Although, likewise, no thinkers could be more unlike than the cold and sceptical Bayle and the enthusiastic and aspiring Shaftesbury, the intercourse of the two did not improbably affect in some degree the opinions of the young Englishman. Accordingly Shaftesbury gives vent, especially in 'The Moralists,' to expressions and assertions, which fully justified Leland in uttering a warning against him in his 'View of Deistical Writers;' while elsewhere he contradicts such passages directly, or neutralizes them by fine trains of devout meditation.—In the philosophical system (if such it can be called) of the author of the 'Characteristics,' there are two or three peculiarities calling for hasty commendation. First, in Metaphysics he strenuously vindicated the possibility of *a priori* notions against the sensualistic philosophy of Locke; and his views on this great question, while they called forth the warm admiration of Leibnitz, and accorded with the opinions of that great thinker, were likewise a foretaste of the creed taught afterwards in fragments by Reid and systematized (not in all points safely) by Kant and his disciples. In the second place, Shaftesbury's Ethical doctrines placed him, at two points, in opposition to systems then prevalent in England. He combated eagerly and convincingly the Selfish theory of Hobbes: he directed thinkers into a psychological track that had recently been neglected, when, refusing to confine himself exclusively (like Cudworth and Clarke) to the region of Reason or Intellect, he indicated Feeling as an essential element in all Facts of Conscience or operations of the Moral Sense or Faculty. [W.S.]

SHAH-ABBAS. See **ABBAS**.

SHAKSPERE, WILLIAM, 'born at Stratford-upon-Avon, married and had children there; went to London, where he commenced actor, and wrote poems and plays; returned to Stratford, made his will, and died.' 'This,' says Stevens, 'is all that

is known, with any degree of certainty, about Shakspeare.' We should have cared very little about the birth and marriage, the will, or the death, of this native of a petty country-town in the sixteenth century, but for the one other certainty, 'he wrote poems and plays.' That fact renders the minutest incident in the life of this son of a Warwickshire yeoman a matter of interest to the whole human

(Birth-place of Shakspeare.)

race; for out of the cottage in which he was born, has gone forth a voice which is the mightiest in modern literature; which has had no small influence in forming our national character; and which, in connection with the higher teaching from above, is refining and humanizing wherever its sound is heard.—Steevens was in a great degree right, as far as regards a mere biographical notice of Shakspeare. His real biography lies in a critical estimate of his writings, as compared with others of his time, and in his relation to the age in which he flourished. The documentary biography, beyond that furnished by the facts that tell us the dates of his several works, lies in a very narrow compass.—William Shakspeare was born in 1564. His baptism was registered in the parish church of Stratford, on the 26th of April, in that year. It was usual to baptize within three days of birth, and, therefore, his birth-day is held to be the 23d of April, the St. George's day of England. The probability, though not the certainty, is that he was born in the town of Stratford. The old house there, in which he is said to have been born, was unquestionably the property of his father, John Shakspeare. His father was married and living in Stratford in 1558. His mother was Mary Arden, of the ancient family of the Ardens. The course of John Shakspeare may be traced by the parochial and municipal records, from the office of juryman of the court leet in 1556, to that of bailiff, or chief magistrate, in 1568. He has been held to have been a butcher, or a wool-stapler, or a Glover. In an age when there was little subdivision of occupations, the yeoman cultivating his land, might have sold the carcasses of his sheep, dressed their wool, and prepared their peltries. The occupier of grazing land had no large separate markets for such commodities. There was a free grammar school at Stratford. We have no record that William Shakspeare went to that school; but why should we doubt that he was educated there; it was the natural place of his education. Some

persons have endeavoured to show that there is a tincture of grammar school studies in his writings; that he was essentially unlearned. Such a belief is now wholly abandoned, except by those pedant if there be any left, who think that there can be no learning without a constant parade of it. It has been stated by Rowe, that John Shakspeare had 'a large family, ten children in all.' There were other Shaksperes in Stratford. The registers distinctly show that the father of the poet had five children who survived the period of infancy. We have no trace how William Shakspeare was employed in the interval between his school-days and manhood. Some hold that he was an attorney's clerk. The tradition is that he was a wild young fellow stealing deer. The certainty is that he was treasuring up that store of knowledge, and cultivating that range of genius, which made him what he became.—At Shottery, a pretty village within a mile of Stratford, is an old farm-house, divided into several tenements, where dwelt a family of the name of Hathaway; and this property remained in the possession of their descendants. Anne Hathaway became the wife of William Shakspeare in 1582. The marriage-bond and license are preserved in the Consistorial Court at Worcester. By this marriage there were three children, Susanna, Hamnet, and Judith. Hamnet, the only son, died in 1596. The two daughters survived their father, and inherited his property. Soon after his marriage William Shakspeare became connected with the Blackfriars' Theatre, in London. In 1589, when he was only twenty-years of age, he was a joint proprietor of the theatre, with four others below him in the list. The players of the Blackfriars' were the Lord Chamberlain's company, those who acted under royal patronage. We know nothing of the date of the production of his first play. We can absolutely assign very few dates to any of his plays, except by the following table, which has been given by Mr. Knight, of the positive facts which determine dates previous to which they had been produced:—

Henry VI., Part I.....	Alluded to by Nashe in 'Pierce Pennilesses.'
Henry VI., Part II.....	Printed as 'The First Part of the Contention.'
Henry VI., Part III.....	Printed as 'The True Tragedy of Richard Duke of York.'
Richard II.....	Printed.....
Richard III.....	Printed.....
Romeo and Juliet.....	Printed.....
Love's Labour's Lost.....	Printed.....
Henry IV., Part I.....	Printed.....
Henry IV., Part II.....	Printed.....
Henry V.....	Printed.....
Merchant of Venice.....	Printed 1600. Mentioned by Meres.....
Midsummer Night's Dream.....	Printed 1600. Mentioned by Meres.....
Much Ado about Nothing.....	Printed.....
As You Like It.....	Entered at Stationers' Hall.....
All's Well that Ends Well.....	Held to be mentioned by Meres as 'Love's Labour's Won'.....
Two Gentlemen of Verona.....	Mentioned by Meres.....
Comedy of Errors.....	Mentioned by Meres.....
King John.....	Mentioned by Meres.....
Titus Andronicus.....	Printed.....
Merry Wives of Windsor.....	Printed.....
Hamlet.....	Printed.....

elfth Night.....	Acted in the Middle Temple Hall.....	1602

cles.....	Printed.....	1609
Tempest.....	Acted at Whitehall.....	1611
Winter Tale.....	Acted at Whitehall.....	1611
ry VII.....	Acted as a new play when the Globe was burned.....	1613

The thirty-seven plays of Shakspeare, the excellence of thirty-one is thus defined by contemporary words. The six which are not so defined, are *Upheline*, *Macbeth*, *Timon*, and the three Roman plays.—There are not many instances of the mention of Shakspeare, during his lifetime, by writers of his period; but one writer, Francis Meres, gives many of his more important plays, in 1598. His poems carry their own dates, 'Venus and Adonis' was published in 1593; 'Lucrece' in 1594; the 'Sonnets' in 1609. Meres had mentioned, in 1598, Shakspeare's 'sugered sonnets amongst his private friends.'—Shakspeare became connected in connection with the theatres. He purchased the principal house in Stratford in 1597, parcels of land in that parish. He became the owner also by purchase. It is supposed he ceased to be connected with the theatres in 1600, for there is a valuation of his property in that year for which he asked £1,433 6s. 8d. His father died in 1601; and it is more than probable that the best of poets succeeded him as a practical farmer in his native place. He had his actions in a bailiff's court for corn sold and delivered. He looked up to by his neighbours, as there is evidence in letters. His eldest daughter, in 1607, married Dr. Hall, an eminent physician residing in Stratford. Judith married Thomas Quiney, a man of substance, in February, 1616. The sister of Stratford has another register two years afterwards. On the 25th April, William Shakspeare was buried in the parish church. Anne, his wife, survived till 1623. She was amply provided for by the laws of her country; for the greater part of Shakspeare's property was freehold, the widow was entitled, for her life, to the one-third. The bequest to her of the best bed was one of affection, and not neglect. The best bed was always an heir-loom. His eldest daughter, Susanna, died in 1649. Judith died in 1662. Neither left any heir-male. His grand-daughter of Shakspeare, Elizabeth, inherited the bulk of his property. By her second marriage she became the wife of Sir John Dard. In half a century the family estates were all scattered, and went to other races; with the exception of two houses in Henley-Street, which were bequeathed to her kinsman, Thomas, the grandson of Shakspeare's sister, Joan. The houses were purchased by the nation, in 1844, of the descendants of the Harts. [C.K.] SAMMAI, a Jewish rabbi, president of the Sanhedrin; at first a disciple of Hillel, but afterwards

dissented from his master, and set up a new college; 1st century B.C.

SHANFARAH, an Arabian poet, 6th century. SHARP, ABRAHAM, an astronomer and mechanic, who became assistant to Flamsteed at the Royal Observatory, 1651-1742.

SHARP, JAMES, the victim of his intemperate zeal for imposing the system of the Anglican Church upon Scotland, was a native of Banffshire, where he was born in 1618. He was first an advocate of the presbyterians, but after the restoration became a tool of the court party, and was rewarded with the archbishopric of St. Andrews. The wanton cruelties which followed provoked the bitterest hatred against him, and, on the 3d of May, 1679, he was dragged from his coach, and murdered in the presence of his daughter. This event occurred about three miles from St. Andrews.

SHARP, JOHN, grandfather of the celebrated Granville Sharpe (see below), was a learned prelate and theologian. He was born at Bradford, in Yorkshire, 1644, and distinguished himself by preaching against popery in the reign of James II. After the revolution he was successively dean of Canterbury and archbishop of York; died 1713. His son, THOMAS, archdeacon of Northumberland and prebendary of Durham, was a master of Hebrew learning; born about 1693, died 1758.

SHARP, RICH., a gentleman of great wealth, well known in the literary world, and once a member of parliament, au. of 'Letters and Essays,' 1759-1835.

SHARP, S., a writer on surgery, died 1778.

SHARP, WILLIAM, this eminent engraver was born in London, January 29, 1749. His father, who was a gunmaker, early apprenticed him to a bright engraver, and he commenced his career by engraving such works as door plates, &c., his first effort being on a pewter pot; but in 1782 he completely resigned this business, and commenced as a line engraver, executing plates after Stothard and others, for the booksellers, but he soon acquired a great reputation, and engraved many considerable works from the old and modern masters, and such is the delicacy and precision of his lines, that some of his plates are considered, both in this country and abroad, the finest specimens of line engraving extant; as for instance, the portrait of John Hunter, after Sir Joshua Reynolds, or his 'Lear,' after West. Sharp died at Chiswick of dropsy in the chest, July 25, 1824. He was a member of the academies of Munich and Vienna, but had declined the honour of 'Associate Engraver' in the Royal Academy of his own country, considering the exclusion of engravers from the full honours of the academy, an affront to the profession. This exclusion is now (1853) suspended. Sharp is reputed latterly to have resigned his mind to the reveries of Richard Brothers, Joanna Southcote, and Emanuel Swedenborg. That he may at one time have had faith in all these is possible, but not simultaneously. To confound the sublime morals and doctrines of Swedenborg with the reveries of Brothers, or the delusions of Joanna Southcote, is not less ridiculous than to assume that an orthodox Mahometan could at the same time be a good Christian. [R.N.W.]

SHARPE, GRANVILLE, was born in 1734 at Durham, and was apprenticed in trade, but, having a strong turn for literature, he abandoned the

uncongenial pursuit of business. His friends having procured him a situation in the Ordnance Office, he continued for some time discharging the duties of that department until the declaration of war against America, and entertaining strong conscientious objections to the policy and justice of that measure, he resigned his place. Being possessed of some means, he now resolved to dedicate his life to study and to the duties of active benevolence. He instituted the society for the abolition of the slave trade, and distinguished himself by his zeal in devising measures for the extensive distribution of the Bible. He was the author of various literary works. Besides several pamphlets on slavery, he published Tracts on the Hebrew language, and Remarks on the Definite Article in the Greek New Testament. Mr. Sharpe died on 6th July, 1813. [R.J.]

SHARPE, GREGORY, a philosophical divine and Orientalist, born in Yorkshire 1713, died 1771.

SHARROCK, ROBERT, a dignitary of the Ch. of England, and a writer on morality, 17th cent.

SHAW, C., a Yorkshire poet, 1739-1786.

SHAW, G., a disting. naturalist, 1751-1813.

SHAW, SIR JAMES, a native of Ayrshire, who rose from the position of a merchant's clerk to the high office of chamberlain in the city of London. He was born in 1764, and became alderman in 1798, sheriff in 1803, and lord mayor in 1805. The same year he was returned to parliament by the city, and continued one of its representatives till 1818. In 1831 he was elected chamberlain, and died highly respected at the age of eighty, 1843.

SHAW, JOHN, an English divine, died 1689.

SHAW, PETER, a medical writer, 1695-1763.

SHAW, SAMUEL, a divine and schoolmaster, author of miscellaneous works, 1635-1696.

SHAW, STEBBING, rector of Hartshorne, in Staffordshire, known as a topographical writer, and originally tutor of Sir Francis Burdett, 1762-1802.

SHAW, THOMAS, a native of Kendal, who became chaplain to the English factory at Algiers, and wrote an account of his travels, 1692-1751.

SHEA, DAVID, professor of Oriental languages at Haileybury College, and translator of Mirkhond's History of the Early Kings of Persia, born in Dublin 1772, died 1836.

SHEBBEARE, JOHN, a physician and political writer, pensioned by the earl of Bute, 1709-1788.

SHEE, SIR MARTIN ARCHER, second only to Sir Thomas Lawrence as a portrait painter, was born in Dublin 1769. He exhibited his first picture at the Royal Academy in 1789, and at his death, in 1850, was senior member and president of that institution. He is author of several poetical productions on art, and was in other respects a highly accomplished man.

SHEFFIELD. See BUCKINGHAMSHIRE.

SHELBURNE, WILLIAM PETTY, Lord, and first marquis of Lansdowne, born 1737. Became president of the Board of Trade in 1763, and joined Lord Chatham's administration in 1766. After the dissolution of that ministry he was a zealous oppositionist till 1782, when he was appointed secretary of state for foreign affairs. He became head of the cabinet on the death of the marquis of Rockingham, which position he retained till the coalition of Lord North and Mr. Fox; afterwards he was created marquis of Lansdowne, died 1805.

SHELDON, GILBERT, a munificent prelate succeeded Juxon in the primacy, and besides expending above £66,000 in charitable objects remained at his post in the midst of the affliction during the plague of London. Among the works executed at his expense is the theatre which bears his name at Oxford. Born at Stanton, in Staffordshire, 1598, died 1677.

SHELLEY, G., a writing-master, died 1786.

SHELLEY, PERCY BYSSHE, a poet of admirable genius, was, in the words which he applied to himself, 'a power girt round with weakness.' There is something marvellous in the richness of his imagination, and the ideal loveliness of forms which it pours forth. But his figures float in the air without touching earth; he wants the practical strength of sympathy and intuition, human character; and, while always wedded to thought with fancy, he thinks so obscurely that attempts at narrative fail completely, while the those lyrical flights which are his best efforts are often mystical or unintelligible. This ambitious turn of speculation, ill-directed and uncontrolled, caused the unhappiness of his life as well as the chief faults of his poems. With the utmost gentleness and amiability of personal demeanour, united an extreme confidence in his own opinion on abstract questions; and, setting himself up, with the presumption of youth, in opposition to received principles which he did not understand, he made himself voluntarily an outcast, and remained throughout life a martyr to his own indistinct chimeras.—**SHELLEY**, the son of a wealthy baronet in Sussex, was born in that county in 1792. His school-days were made uncomfortable by his sensitive and reticent temper; and he was not distinguished as a scholar. But he laid the foundation of good Greek scholarship, and wrote two novels before he was sixteen. In 1808 he was sent from Eton to Oxford. He, with very slight philosophical reading, became entangled in metaphysical difficulties, and, at seventeen, was pleased to publish, with a direct appeal to the heads of colleges, a pamphlet entitled 'Necessity of Atheism.' He was immediately expelled. Soon afterwards he printed his poem 'Queen Mab,' in which singular poetical beauties are interspersed through a wild mass of speculative absurdities. His alienation from his family was completed when, at the age of eighteen, he married the daughter of a person who had kept a coffee house. After three years of misery to both parties, the ill-assorted marriage issued in a separation; and not very long afterwards Shelley was agitated into temporary derangement, by learning that his wife had destroyed herself. His children were taken from him by a decree of the Court of Chancery, on the ground of the atheism which he had avowed, and which he was too proud to retract by compulsion. Already, among his various wanderings, he had, in 1816, become acquainted with Lord Byron, and lived near him on the Lake of Geneva. There, and by the Lake of Como, he began to write poetry very sedulously, having for some time written oftener in prose. He studied and admired Wordsworth and Coleridge; he was familiar with the Greek dramatists, from whom he made many fine translations; but probably no models influenced him so much as Goethe and Calderon. Not long after his wife's death he married the daughter

Madwin, a lady well known as the authoress of 'Frankenstein' and other novels. They resided for a few months in Buckinghamshire, where they made themselves beloved by their charity to the poor; and Shelley's generosity had been remarkable even in the poverty which he had more than once suffered. During this time, Shelley wrote his exquisite 'Alastor,' and the gorgeously obscure 'Revolt of Islam.' In the spring of 1818 he and his family removed to Italy, where they at length settled themselves at Pisa. In that country, with health already failing, Shelley produced some of his principal works, in a period of about four years. Each were the beautiful though dreamy lyrical drama called 'Prometheus Unbound'; the gloomy tragedy of 'The Cenci'; the mysterious but attractive 'Epipsychidion'; 'Julian and Maddalo,' in which he portrays himself and Byron: and many singularly fine small pieces, lyrical and reflective.

July, 1822, when he had not quite completed his twenty-ninth year, he was drowned in a storm which he encountered in his yacht on the Gulf of Spezia. In obedience to his own desire, his body, when thrown ashore, was burned, under the direction of Lord Byron and other friends; and the ashes were carried to Rome, and buried beside the grave of Keats in the Protestant cemetery beneath the shadow of the pyramid. [W.S.]

[Tomb of Shelley.]

HELLEY, MARY WOLSTONECRAFT, wife of the poet, was b. in 1797, and acquired great reputation for 'Frankenstein.' Among her other works is an edition of her husband's poems; died 1851.

SHENSTONE, WILLIAM, was born in 1714, in Shropshire, where his father owned the small estate of the Leasowes. He spent his youth, at Oxford and elsewhere, in literary idling and verse-making. At his thirtieth year he succeeded to the family property; and his principal employment afterwards was the execution of those operations in landscape gardening, which made the Leasowes one of the show places of England, but involved the owner in pecuniary embarrassment. Shenstone was a pleasant but not vigorous writer, both in verse and in prose. His 'Pastoral Ballad' is one of the best pieces we have of its artificial kind, and

contains some fine touches, both of description and sentiment; and his 'Schoolmistress,' a semi-burlesque imitation of Spenser's diction and stanza, has a spirit and originality which he never elsewhere showed. He died in 1763. [W.S.]

SHEPREVE, or SHEPERY, JOHN, one of the most learned men of his age, professor of Hebrew at Oxford about 1538, and author of Latin poems, &c., died 1542.

SHERARD, or SHERWOOD, WILLIAM, a learned botanist and antiquarian, who became British consul at Smyrna, and devoted much time in exploring Natolia and Greece; born in Leicestershire 1659, died 1728. His brother, JAMES, born 1666, cultivated a fine botanical garden at Eltham, in Kent, died 1737.

SHERBURNE, SIR EDWARD, clerk of the ordnance in the time of Charles I., known as a poet and classical translator, 1618-1702.

SHERIDAN, THOMAS, grandfather of the dramatist (next article), was born in the county of Cavan about 1684, and though of poor parentage became a clergyman in the Irish Church. He was a friend of Dean Swift, and an incorrigible wit, a genuine Irish sloven, a 'quibbler, a punster, and a fiddler,' died in extreme indigence 1738. His son, THOMAS, born at Quilea in 1721, went upon the stage in 1742, and was very successful as a tragedian; he wrote a 'Life of Swift,' 'Lectures on Elocution,' and an 'Orthoepical Dictionary of the English Language,' died 1788. FRANCES, wife of the latter, and grand-daughter of Sir Oliver Chamberlane, acquired considerable repute as a novelist, especially by her delightful romance of 'Nourjahad,' 1724-1767.

SHERIDAN, RICHARD BRINSLEY, was born at Dublin in 1751. His grandfather, Dr. Sheridan, a clergyman and schoolmaster in Ireland, was an improvident wit, and a friend and coadjutor of Swift; his father, Thomas Sheridan, was well known as an actor and a teacher of elocution, and as the author of a Pronouncing Dictionary; and his mother, a remarkably amiable and accomplished woman, wrote, besides other pieces, the fairy tale of 'Nourjahad.' Richard, an idle and mischievous boy, passed at school for a hopeless blockhead. But, though he had not learned to spell English when he left Harrow, at the age of eighteen, he was ambitious enough to join his friend, Halhed (the Orientalist), in publishing a translation from the Greek. He professed to study law in the Middle Temple; but his prospects were very hazy indeed, when, being barely of age, he made a runaway marriage with Miss Linley, a beautiful and accomplished singer. He refused to allow his wife to perform in public; and a small fortune she brought him was speedily dissipated by that careless way of living, which he practised at all stages of his life.—His career falls into two periods, exhibiting an alternation such as few men have gone through. The comic play-writer and theatrical manager transformed himself successfully into a statesman and orator.—His earliest comedy, 'The Rivals,' appeared in 1775, when the author was not much more than twenty-three years old. This humorous and lively play was succeeded next year by the commonplace farce of 'St Patrick's Day,' and the witty and clever little opera of 'The Duenna.' In 1777, was played his celebrated

comedy 'The School for Scandal,' an inimitable picture of the surface of society as seen on its weak side, and fuller of sparkling wit than any English play except those of Congreve. Sheridan's course of play writing may be said to have closed in 1779, with his witty and ill-natured farce 'The Critic.' While engaged in bringing out his earliest plays, he became one of the proprietors of Drury Lane Theatre; and, acting as manager, he conducted his affairs with his usual carelessness. The wit which he exhibited in society was even more remarkable than that which glittered in his comedies; but the one as well as the other was really gained (as his biographer, Moore, amusingly shows) by careful premeditation, and owed very much to unscrupulous and dexterous borrowing.—Becoming intimate with Fox and Burke, and impressing these eminent men with a strong belief in his political and oratorical talents, he obtained a seat in parliament in 1780. He worked hard for the House of Commons, and was, in his great efforts, one of the most showy and striking of parliamentary orators. Of his famous speech on the trial of Warren Hastings, no record has been preserved that at all accounts for the extraordinary impression which it unquestionably made. Losing his wife in 1792, he married again, in 1796, a lady with whom he received five thousand pounds; and with this money and fifteen thousand pounds from shares in the theatre, he purchased an estate, and dreamt of living in splendour. But his affairs were already deranged beyond retrieval; and his sottish habits were becoming more and more confirmed. The last dozen years of his life were spent in continual difficulties, which made it the more honourable to him that he adhered steadfastly to the Whigs, even when his patron and boon-companion, the Prince Regent, deserted them. He was treasurer of the navy during the short ministry of Fox and Grenville; but after 1812 he was no longer able to speak in the house. Abandoned by friends, hunted by bailiffs, and sunk in habits and feelings, the wit and orator died in 1816. Those who had not offered to cheer his deathbed, gave him a grave in Westminster Abbey. [W.S.]

SHERLOCK, R., an English divine, 1613-1689.

SHERLOCK, WILLIAM, an episcopalian divine, was born in London, 1641, and received his education at Eton. Having distinguished himself at the university by his talents and acquirements, he obtained rapid preferment in the church, for, in 1669, he was appointed rector of the parish of St. George's, London; in 1681, prebendary of Pancras, St. Paul's cathedral; master of the Temple, and rector of Therfield; in 1691, dean of St. Paul's. His best known works are a 'Practical Treatise on Death,' 'A Discourse on Providence,' and 'The Future Judgment.' He died in 1707. [R.J.]

SHERLOCK, Dr. THOMAS, son of the preceding, and a clergyman of the Church of England also. He was born in 1678, and having repaired in due time to St. Catherine Hall, Cambridge, to prosecute his education, he became eventually master of that college. He afterwards succeeded his father as master of the Temple; and it may be stated, as somewhat remarkable, that both father and son held this situation for the long period of seventy years. In 1728 he was elevated to the bench as bishop of Bangor, and thence, in 1734,

he was translated to the see of Salisbury. A still higher promotion was put in his offer, for he was urged, in 1747, to accept the primacy. But the high honour he was obliged to decline on account of his bodily infirmities. He was prevailed on, however, in the year following to accept the see of London. His death took place in 1761. He was a popular and voluminous author. His 'Sermons' his 'Use and Intent of Prophecy,' and his controversial writings on the Bangorian Controversy for the chief of his published works. [R.]

SHERWIN, JOHN KEYSE, an eminent engraver and designer, born in Sussex of humble parents, about 1750, died 1790.

SHERWOOD, MRS., a popular English novelist and writer of juvenile books, 1775-1851.

SHIEL, RICHARD LALOR, born in Dublin 1793, and best known as a parliamentary orator was called to the Irish bar in 1814, when he had already distinguished himself as a speaker at public meetings. His connection with politics dated from 1822, when he became an active supporter of the Catholic Association; and his career in parliament from 1829, after the passing of the Catholic Relief Act. In 1850 he went as her majesty's minister to the court of Tuscany; d. there 1851.

SHIELD, WILLIAM, an eminent English composer, was born at Smalfield in the county of Durham, in the year 1749. He was apprenticed to a boat-builder at North Shields, during which period his musical talents began to develop themselves in such an extraordinary manner that he was induced to devote himself wholly to the study of the science. Shield first appeared as a dramatic composer in 1778. In rapid succession he produced music to the 'Flitch of Bacon'; 'Rosin'; 'The Poor Soldier'; 'Robin Hood'; 'Fontainebleau'; 'Marian'; 'Oscar and Malvina'; 'The Woodman,' &c. In 1807 he made a tour of the continent, and soon after his return home published his 'Introduction to Harmony,' which reached its second edition in 1817. He published also volume of glees, and 'The Rudiments of Thorough Bass.' In 1817 the prince regent (George IV.) appointed him to the situation of master of the band of musicians in ordinary to the king, in which situation he conducted the musical services at the coronation of George IV. He died in 1829. [J.]

SHIPLEY, JONATHAN, a prelate and poet writer, one of whose daughters became the wife of Sir William Jones, born about 1714, died 1788.

SHIRLEY, SIR ANTHONY, a famous East India traveller, who became the ambassador of the Abbas to various courts of Europe, and Spanish admiral in the Levant; born at Weston, in Sussex 1565, supposed to have died in Spain about 1616. His brother, SIR THOMAS, travelled with him, published an account of Turkey. A third brother, SIR ROBERT, was also his fellow-traveller, like Sir Anthony, acted as ambassador of the shah, 1570-1623.

SHIRLEY, JAMES, a well-known poet and dramatic writer of the Elizabethan age, was born in London about 1594, and educated at Oxford and Cambridge. After taking a curacy in the Church of England he became catholic, and made an unsuccessful attempt to establish a grammar school, commenced writing for the stage. He was rendered destitute by the great fire of London,

both he and his wife were so affected with grief and terror at this event, that they died within twenty-four hours of each other, 1666.

SHIRLEY, THOMAS, a relation of the traveller of that name, known as a medical writer, 1638-78.

SHIRLEY, WALTER AUGUSTUS, bishop of Sodor and Man, born at Westport, in Ireland, 1797, died 1847.

SHLOEZER, A. L., a Ger. writer, 1737-1809.

SHORE, JANE, the wife of a wealthy jeweller, in Lombard-Street, who became the mistress of Edward IV., and is represented as a woman of extraordinary beauty. In 1482, after Edward's death, she was punished on an accusation of witchcraft by the duke of Gloucester, and deprived of her house and fortune, but it is unknown where she died. There is proof that she was living in the reign of Henry VIII., at which time she is spoken of in high terms by Sir Thomas More.

SHORT, J., a Scotch optician, 1710-1768.

SHORT, T., a physician and professional writer, author, among other works, of a 'Natural History of Mineral and Medicinal Waters,' died 1772.

SHOVEL, SIR CLOUDESLEY, a British admiral, born of humble parentage near Clay, in Norfolk, about 1650. In 1674 he served under Sir John Narborough, and greatly distinguished himself in the attack on Tripoli. His other principal actions were the victories of Cape la Hogue and Malaga. He was drowned by shipwreck on the Scilly islands, 22d October, 1707.

SHOWER, SIR BARTHOLOMEW, an eminent lawyer and recorder of London, died 1701. His brother, JOHN, a puritan divine, 1657-1715.

SHRAPNEL, HENRY, lieutenant-general in the royal artillery, inventor of the deadly case-shot, named after him 'Shrapnel shells,' died 1842.

SHUCKFORD, S., a learned divine, died 1754.

SHUTE, J., a divine and royalist, died 1643.

SHUTER, E., a popular comedian, died 1776.

SHUTTLEWORTH, PHILIP NICHOLAS, bishop of Chichester, author of a 'Discourse on the Consistency of the Whole Scheme of Revelation with itself and with Human Reason,' and of a work against Puseyism, entitled 'Scripture not Tradition,' 1782-1842.

SIAUVE, S. M., a Fr. antiquarian, died 1812.

SIBBALD, SIR ROBERT, a Scottish physician, naturalist, and political writer, 1643-1712.

SIBBS, R., a puritan divine, 1577-1635.

SIBILET, M., a French poet, 1512-1589.

SIBTHORP, JOHN, regius professor of botany at Oxford, author of 'Flora Oxoniensis,' 1758-96.

SIBYL, daughter of Amaury I., king of Jerusalem, and successively wife of William Longsword, by whom she was mother of Baldwin V., and of Guy of Lusignan. With the latter she mounted the throne of Jerusalem 1186, the year preceding his death by the hand of Saladin.

SICARD, an Italian prelate and historian, author of a 'Chronicle,' published by Muratori, died 1215.

SICARD, C., a French Jesuit, 1677-1726.

SICARD, ROCH AMBROSE CUCURRON, a French abbé, born at Fousset, near Toulouse, 1742, succeeded the abbé L'Épée as master of the deaf and dumb school in Paris 1789, died 1822. He had two narrow escapes during the revolution, at which epoch he joined Jauffret in publishing the 'Religious, Political, and Literary Annals of

France.' He wrote several works on the interesting subject which chiefly occupied his attention, and in 1800 established a printing press for the use of his scholars.

SICHEM, C. VAN, a Dutch engraver, d. 1580.

SIDDONS, MRS. HENRY, daughter of a comedian named Murray, became the wife of Mr. H. Siddons, son of the great actress (next article.) That gentleman dying in 1814, the brother of his widow undertook the management of the Edinburgh theatre in her interest, where, for many years, she excelled in genteel comedy and the gentler parts of tragedy. Died after 1830.

SIDDONS, SARAH, the most eminent of English actresses, was the eldest daughter of Roger Kemble, and was born at Brecknock in South Wales, 14th July, 1755. Notwithstanding her father's connection with the theatre, there seemed at first small chance of her becoming an actress, as her parents placed her out as lady's-maid in the family of Mrs. Greathead of Guy's Cliff, near Warwick, and in that position the incipient queen of tragedy remained for two years. They resorted to this measure for the purpose of separating her from Mr. Siddons, a member of her father's company, for whom she had an attachment; but to whom, notwithstanding such opposition, she was married in 1773. Two years afterwards she made her appearance in London, 29th December. Her *début* had been procured by Lord Bruce, afterwards earl of Aylesbury, who had recommended her to Garrick, but the result was not flattering. The character, perhaps, was ill chosen—*Portia*, in 'The Merchant of Venice.' In the summer of next year we find her at Birmingham playing with Henderson, and subsequently at Bath with increasing success, in such parts as *Euphrasia*, *Alicia*, *Rosalind*, *Matilda*, and *Lady Townley*. On her next appearance at Drury Lane, 10th October, 1782, the actress proved triumphant. The part was better suited to her powers—*Isabella*, in 'The Fatal Marriage.' This was followed by *Jane Shore*, *Euphemia*, *Calista*, *Belvidera*, and *Zara*, in 'The Mourning Bride.' In Dublin and Cork, in the following year, she enjoyed a repetition of her metropolitan triumph. On her return to London she attempted another *Isabella*, that of Shakspeare in the difficult play of 'Measure for Measure.' This was in November, 1783. To the same year belong also her appearances in *Constance*, *Volumnia*, and *Lady Macbeth*; and to the following, the memorable circumstance of Sir Joshua Reynolds painting her portrait in the character of the tragic muse, of which he was so proud that he traced his name on the hem of the muse's garment. Her fame now became prerogative, and her profits large. At Edinburgh she received a thousand guineas for performing ten nights, with many presents, among them a magnificent silver urn, inscribed 'A Reward to Merit.' Mrs. Siddons owed much of her success to her personal beauty and dignity; her voice was remarkably melodious, and her mental endowments were extraordinary. On her brother, John Kemble, becoming manager of Drury Lane in the spring of 1788, she appeared for his benefit as *Katharine*, in 'The Taming of the Shrew.' In the same theatre, also, she played *Juliet* in 1790, and *Lady Macbeth* in 1794. She transferred her

talents to Covent Garden theatre, on her brother's taking a share in it (1801), and continued to reign there until its conflagration in 1808, with a short interregnum, during which Master Barry shone as a meteor. On the opening of the new theatre, 18th September, 1809, she appeared as *Lady Macbeth*, but in consequence of the O. P. riots, did not appear again until 24th April, 1810. In the following season she repeated all her principal characters, and on 29th June, 1812, retired altogether from the stage, in the part of *Lady Macbeth*, her greatest effort; reciting on the occasion a poetical address written by Mr. Horace Triss, her nephew. After her retirement from the stage, she gave a course of public readings from Shakespeare at the Argyll Rooms, to which afterwards she added public readings from Milton's 'Paradise Lost.' Between 1812 and 1817 she likewise appeared on two or three occasions; but a new style of acting had then set in, which rendered her further appearances inexpedient. Her death took place 8th June, 1831, at Upper Baker-Street, London; and she was buried in a vault at Paddington church. Her style of acting was grand, noble, and natural; somewhat cold and classical, but free from the formality which distinguished that of her brother. [J.A.H.]

SIDMOUTH, HENRY ADDINGTON, Viscount, a statesman of the party of William Pitt, eldest son of Dr. Addington. He entered parliament in 1784, and was admitted to the office of speaker as early as 1789. This honourable post he retained twelve years, and then resigned it to take the more responsible position of prime minister, in which he succeeded Pitt in March, 1801. He remained at the head of affairs till May, 1804, and in 1805 became president of the council under the great leader of his party. In 1813 Lord Liverpool became premier, and Viscount Sidmouth home secretary. In 1823 he retired to private life, and passed the remainder of his years at his official residence as manager of Richmond Park; 1787-1844.

SIDNEY, ALGERNON. See SYDNEY.

SIDNEY, Sir HENRY, an English statesman, descended from a noble family in Surrey, and knighted by Edward VI. He held several state offices, and in 1562 was sent to Ireland as lord-deputy. He married Mary, eldest daughter of John Dudley, duke of Northumberland, and sister of Robert Dudley, the favourite of Elizabeth; d. 1585.

SIDNEY, MARY, countess of Pembroke, and daughter of the preceding, bears a distinguished name in English literature, both as the sympathizing friend of her brother, Sir Philip Sidney, and as the possessor of similar talents. She was married to the earl of Pembroke in 1572, and having survived her husband twenty years, died at her house in Aldersgate-Street, 1601. She wrote an *Elegy on her brother*, and other poems, including translations of the Psalms from the Hebrew. She also translated Mornay's 'Discourse of Life and Death,' and the 'Tragedy of Antioch.'

SIDNEY, Sir PHILIP, son of Sir Henry Sidney of Penshurst, in Kent, was born there on the 26th November, 1554. He made while young the tour of the greater part of Europe, and, in 1575, returned to England, where he became one of the brightest ornaments of the court of Queen Elizabeth. His learning was unusually ample and

varied, his natural genius was brilliant, and he was pre-eminent in all the martial accomplishments and courtly graces which our great countrymen so dearly prize. He was a generous patron of Spenser and others of the literary band who graced the Elizabethan era. Sir Philip's own productions both in poetry and prose, though one burdened by the pedantic conceits which the conventional taste of the court delighted in, show an extraordinary amount of pathos, and an exquisite sense of natural beauty. The queen had restrained him from joining Drake's expedition in 1585, and also from seeking the elective crown of Poland, 'refusing' as Camden says 'to further his advancement out of fear that she should lose the jewel of a times.' But in 1586 he obtained the command of the cavalry in the auxiliary army which Leicester led to the Netherlands against the Spaniards. Sidney fell in a skirmish near Zutphen, 22d September, 1586, at the early age of thirty-two. He had headed three successful charges of his squadron against the enemy, when he was struck through the thigh with a musket ball. The ball shattered the bone, and Sidney in great agony was carried off the field by his followers. As they bore him along he asked for water, and a bottle of it was found and brought to him. He raised it to his lips, but as he saw at that moment a poor soldier, who lay mangled on the ground, 'ghastly casting his eyes at the bottle,' Sir Philip removed the untasted draught from his own lips, and held it to the dying man, saying 'Thy necessity is greater than mine.' Sidney's wound proved mortal, and he died at Arnheim, after eighteen days' severe suffering. He was buried in old St. Paul, deeply regretted by his countrymen of every rank. A general mourning was observed for him, an honour then without precedent in England. [E.S.C.]

SIDONIUS, CARUS SOLLUS APOLLINARIUS MODESTUS, a Fr. poet and orator, Lyons, 428-48.

SIEBENKEES, JOHN PHILIP, prof. of philosophy and Oriental languages at Altdorf, 1756-98.

SIEYES, Count EMMANUEL JOSEPH, commonly called the ABBE SIEYES, a politician of the French revolution, was born at Frijs, 1748. In him, mainly, Bonaparte was indebted for the opportunity of assuming the supreme authority, in the interest of Sieyes' history terminates with the event. At the period of the American revolution he occupied the post of grand-vicar in the diocese of Chartres, but soon after abandoned his ecclesiastical expectations for the arena of politics. The prospect of the estates-general meeting towards 1789 gave occasion to his first publications, the principal of which, 'Qu'est-ce que le Tiers Etat' (What is the Third Estate), contributed greatly to the formation of a sound public opinion of government, though a most threatening one under the circumstances. It exhibited more than 25,000,000 of men governed without law or reason by about 200,000 of the privileged order consisting of the clerical and lay noblesse. Sieyes returned to the estates-general by the election of Paris, powerfully seconded Mirabeau on occasion of the *Séance Royale*, 22d June, 1789, and the assembly being declared national, he immediately devoted himself, with his extensive knowledge of the former history of France, to the erection of a constitution. We may say a word here to the

then and readers of histories of those times.—It is one thing to judge of the probability of success in such a labour when the results have been long known, but quite another to pronounce on it before the event: add to which the paralytic condition of Sieyès, for that period, was an insuperable hindrance to the foresight and logical clearness of his views. In one point he went beyond Mably, but, namely, of the royal veto, the principle laid down by Sieyès was that of making the king's veto purely magisterial, and giving him no right to interfere with the will of the nation as expressed by its representatives; a point which is now regarded as secure in the English constitution for so long the sovereign really possesses the veto, it is truly treated as obsolete. It would occupy too much space to follow the Abbé Sieyès through the details of the constituent assembly; it is well known that the ideas of the Girondins prevailed, and as this became more evident, Sieyès grew alarmed, and finally retired from public affairs for a long season. In this interval the Jacobin outbreak of 10th August occurred, the national convention was summoned, and Sieyès reappeared as one of its members: the first question was that of the king's fate, now a prisoner in the Temple, and he gave his vote by simply repeating the words "no," (*non*), and to the questions of delay or appeal, "no;" it is denied in the *Biographie Contemporaine* that he used the words "in my own phrase." In the height of the Jacobin persecution, Sieyès cautiously opposed the party of despotism in convention, from which he retired after the fall of the Girondins, and only resumed his place some months after the fall of despotism; at this period he narrowly escaped an attempt at assassination, and soon afterwards acted as ambassador to Prussia. While there we had the notice of him in the recently published Memoirs of the Duke of Buckingham; it occurs in letter from Mr. T. Grenville, then at the court of Berlin.—"I have seen Sieyès at court with his hat and cravat. What Lavater would say of it features I know not, but I have seldom seen a countenance of so bad impression. His manners, voice, and appearance here, have produced nothing but disgust in all that are not of the lower ranks of life, but it is to those that his mission is considered as being chiefly addressed, and he said to have both means and agents enough to work through upon the lower classes down here." At this very time, as fallacious as opinion, lies was intriguing not with the lower orders, but with Buonaparte, then in Egypt, to whom he is supposed to have intimated of the state of affairs near the Directory. In fine, Napoleon suddenly crossed, and concerted with Sieyès the coup d'état of the 18th Brumaire, which resulted in the appointment of Sieyès, Ducos, and Napoleon, as provisional consuls. The part of Sieyès was little played out when he had placed the crown of Charlemagne within reach of the successful soldier, and great must have been his disappointment when the latter grasped his scepter, and absorbed all his power and merit of building them in a lower person. It is probable that Sieyès could not understand such a result, and in the character of Senator, he often made vain efforts to dissuade his master. On the restoration of Louis Bour-

bons, he became an exile, but the revolution of 1830 enabled him to return to his country where he died, at the advanced age of eighty-eight, in 1836. [E.E.]

SIGALON, E., a French painter, 1790-1867.

SIGAUD DE LA FOND, Jean Louis, a French physician and natural philosopher, during a the discoverer of new methods in chemistry, 1740-1811.

SIGEBERT, two kings of France, the first born about 550, was the third son of Clotaire I., king of the Franks whom he succeeded as king of Austrasia, or Metz, 611. He was assassinated at Trier, at the instance of Fredegunde, mistress of his rival, Chlotaire, 613. The second of the name, son of Dagobert I., succeeded in the kingdom of Austrasia 634, died 645. Several Anglo-Saxon kings of this name are also mentioned.

SIGEBERTUS, a monk of Gembloux, in Brabant, a daring historian and astronomer, 1030-1112.

SIGISMUND, a king of Burgundy, 630-644.

SIGISMUND, emperor of Germany, son of Charles IV., and brother of Wenceslaus, was born 1368, became margrave of Brandenburg, 1374; king of Hungary, in virtue of his marriage with Mary, daughter of Louis, 1386; and emperor in 1410. Between the last two dates he had to contend with the Turkish emperor, Bajazet, and, after becoming emperor, with a revolt in Bohemia, headed by Ziska, and occasioned by the disgraceful burning of John Huss. He became master of events, and was crowned at Prague in 1436, died 1457. His second wife is called the Messalina of Germany.

SIGISMUND, three kings of Poland—**SIGISMUND I.**, called the Great, son of Casimir IV., was born 1466, and succeeded his brother, Alexander, in 1497, died 1548. **SIGISMUND II.**, surnamed Augustus, born 1532, was son of the preceding and succeeded him in 1548, died 1572. **SIGISMUND III.**, surnamed the Pious, born 1593, was son of John III., king of Sweden and of Catherine, the daughter of Sigismund I. He was elected king of Poland in 1597, and succeeded to the crown of Sweden in 1632. Being a catholic, his uncle, Charles, duke of Sudermania, easily undermined his authority in Sweden, and he lost that kingdom in 1632. In 1650, he succeeded in placing his son, Thaddeus, on the throne of Russia, but was afterwards obliged to surrender, and besides that, was involved in the war with Gustavus Adolphus. Died 1632.

SIGNORELLI, Luca, was born at Cortona in 1445, and was the pupil of Piero della Francesca. He was one of those extraordinary geniuses like the Pisani, Giotto, Masaccio, and some few others, whose works have formed eras in the history of art. It is hardly too much to say, that Signorelli anticipated Michelangelo's grandeur of design; he constitutes the connecting link between Masaccio and Michelangelo, as Filippino does between Masaccio and Raphael. Signorelli's great works are in the chapel of the Madonna di San Irenio in the cathedral of Cortona, where he has represented in extensive frescoes, the History of Antichrist, the Resurrection of the Dead, Hell, and Paradise. These frescoes were commenced in 1499, in continuation of the unfinished series begun by Fra Giovanni da Fiesole; the ceiling was finished in 1500. The whole of the frescoes were finished

about 1503, and are sufficiently new and vigorous in style to account for the extraordinary progress in design generally displayed in the famous cartoon by Michelangelo exhibited in 1506. Such indeed is the extraordinary vigour displayed in these frescoes that Vasari and many others have indicated Signorelli as the immediate precursor of Michelangelo, who, says Vasari, always expressed the highest admiration for his works, and Vasari adds, that all may see what use he made of the inventions of Luca in his great work of the Last Judgment, in the Sistine chapel, especially in the forms of the angels and demons, and in the arrangement. The fact is indisputable, some of the best figures are little more than transcripts from Signorelli. Luca died at Arezzo in 1524, whither he had retired, and where he lived, says Vasari, more after the manner of a nobleman than an artist. —(Vasari, *Vite de' Pittori*, &c. Ed. Flor., 1846, seqq.) [R.N.W.]

SIGONIUS, C., a learned Italian, 1520-1584.

SIGORGNE, P., a Fr. philosopher, 1719-1809.

SIGWART, G. F., a Germ. anatomist, 1711-95.

SILANION, an Athenian sculptor, 346 B.C.

SILHON, J., a French philosopher, died 1666.

SILHOUE, STEPHEN DE, a French statesman, dist. as a miscellaneous writer, 1709-1767.

SILIUS ITALICUS, CAIUS, a Roman pleader, and author of poems on the Punic war, was born A.D. 16, and became consul under Nero, 68. He was afterwards proconsul of Asia; died 100.

SILVA, D., a learned Milanese, 1690-1779.

SILVA, J. B., a French physician, 1682-1748.

SILVERSTOLPE, A. G., a Swedish statesman, historiographer, and philologist, 1772-1824.

SILVERIUS, a pope of Rome, 536-538.

SILVESTER. See SYLVESTER.

SILVESTRE, ISRAEL, a French designer and engraver, 1621-1691. His son, LOUIS, a painter, and member of the Academy, 1675-1760.

SIMEON, a Jewish rabbi who flourished about the year 120, and through fear of the Romans retired to a cave, where he lay in concealment twelve years, and composed the *Zohar*, a cabalistic work.

SIMEON, CHARLES, fifty-three years rector of Trinity Church, in the university of Cambridge, author of valuable theological works, published entire in 21 vols. 8vo, 1832. These consist of Discourses, forming a commentary upon every book of the Old and New Testament, born at Reading 1759, died 1836.

SIMEON OF DURHAM, an English historian of the Saxon and other kings from 616 to 1130. He probably died soon after the latter of these dates.

SIMEON, J. J., a Fr. jurisconsult, 1749-1842.

SIMEON, surnamed METAPHRASTES, an ecclesiastic of Constantinople, who lived in the tenth century, author of 'Lives of the Saints.'

SIMEON OF POLOTSK, a Russian preacher, ecclesiastical writer, and dramatist, 1628-1680.

SIMEON, surnamed STYLITES, a Christian fanatic who acquired immense fame by passing the last forty-seven years of his life upon the tops of ruined pillars. He flourished, if such a word is at all applicable to him, from 392 to 461. A second saint of the name dwelt on his pillar sixty-eight years, but the former was the original inventor of this pastime.

SIMEONI, G., an Italian writer, 1509-1570.

SIMI, N., an Italian astronomer, 1530-1564.

SIMLER, JOSIAS, a Swiss divine, 1540-1576.

SIMMONS, S. F., a learned physicc., 1750-1818.

SIMMONS. See SYMMONS.

SIMNEL, LAMBERT, an impostor of the reign of Henry VII., who gave himself out for the duke of York, second son of Edward IV. He was defeated at the battle of Stoke 1487, and was punished by promotion to an office in the king's kitchen.

SIMON. See MONTFORT.

SIMON, E. T., a French writer, 1740-1818.

SIMON, J. F., a French antiquary, 1654-1711.

SIMON, RICHARD, a French Hebraist or theologian, who sustained a controversy with Bossuet and the Port Royal savants, 1638-1711. Another of the same names, published a Dictionary of the Bible in 1703, which was superseded by that of Calmet.

SIMON, V., a French dramatist, 1753-1820.

SIMONET, E., a French theologian, 1662-1738.

SIMONETTA, GIOVANNI, a learned Sicilian author of a History of Francesco Sforza, in whose service he was, died about 1491. Others of the family were also writers.

SIMONIDES, a Greek poet, 558-468 B.C.

SIMONIN, S., a poet and ascetic, died 1668.

SIMPLICIUS, a Greek philosopher of the time of Justinian, in the 6th century, author of Commentaries on the works of Aristotle and Epicetus.

SIMPLICIUS, two saints of the Roman calendar:—the earliest, a bishop of Autun about 370; the latter, a pope, who suc. Hilary 467, died 474.

SIMPSON, EDWARD, rector of Eastling, Kent, dist. as a divine and chronologist, 1578-1636.

SIMPSON, JAMES, an Edinburgh lawyer known as a writer on education, died 1853.

SIMPSON, THOMAS, the son of a poor weaver who rose through difficult circumstances to professor of mathematics at the Royal Academy of Treatises on Fluxions, Chance, Annuity, Algebra, and other subjects, born in Leicester 1710, died 1761.

SIMS, JAMES, a physician and professional writer, most distinguished as a botanist, d. 1818.

SIMSON, R., a Scotch mathematic., 1687-1730.

SINCLAIR, CHARLES GIDEON, Baron, a Scotch general and writer on military tactics, 1730-1818.

SINCLAIR, SINCLAIRE, or SINCLAIR, GEORGE, an engineer and professor of philosophy at Glasgow, author of works on hydrostatics, the principles of astronomy and navigation. He wrote also a popular book on witches and apparitions, entitled 'Satan's Invisible World Uncovered.' Died 1696.

SINCLAIR, SIR JOHN, an eminent politician and miscellaneous writer, philanthropist, member of parliament, was born at Thurston castle, in Caithness, 1754, and admitted to English bar in 1775. Five years after, he became member for his native county, and soon acquired that celebrity as a public character which connected his name with the stirring events at the commencement of the present century. He was the author of a 'History of the Revenue of Great Britain,' and a 'Statistical Account of Scotland.' Died 1835.

SINDHYAH, SINDIAH, or SCINDIA, HADJI, a Mahratta prince, who invaded Hindo

in the fall of the Great Mogul in 1770, and became master of Delhi, 1741-1794.

SINGH, MAHA RAJAH RUNJEET, the despot of Lahore and Cachemire, was born in 1779, and was first known as a captain of banditti. His career is one of the most remarkable among the numerous instances of success which mark the possession of genius and an iron will, in states of society, which, however magnificent, may still be called barbarous. His troop of marauders swelled to an army, which he brought into the highest state of skill and subordination, until it was sufficient to give him the command of millions of people. He died in the sixtieth year of his age, after a protracted illness, in 1839, and his funeral pyre was honoured by the voluntary death of four of his princesses and seven slave-girls. A portrait, and some particulars concerning this extraordinary man will be found in Mr. Princep's work on the origin of the Sikh Power. [E.R.]

SINNER, J. R., a Swiss *savant*, 1780-1787.

SIRANI, J. A., an Italian painter and engraver, 1610-79.

ELIZABETH, his daughter, was also an artist, and was poisoned at the age of twenty-six.

SIRI, V., an Italian historian, 1608-1685.

SIRICIUS, a pope of Rome, 385-399.

SIRLET, F., a German engraver, died 1737.

SIRMOND, JAMES, a learned French Jesuit, 159-1651. **JOHN**, his nephew, historiographer royal, 1589-1649. **ANTHONY**, brother of the latter, Jesuit preacher and theologian, 1591-1643.

SISMONDI. JEAN CHARLES LEONARD SISMONDI, divided his life, as he himself says, between history and political economy. His works in the latter department are confessedly cillating, hypothetical, and unsatisfactory; but his historical writings are very valuable, both for their matter and their liveliness of composition; and he did good service also as a critic of Italian and French literature. He was the last of a noble family, which, driven from Pisa into France by republican dissensions in the fourteenth century, was again (being protestant) forced into Switzerland by the revocation of the Edict of Nantes. He was born 1773, at Geneva, where his father was a clergyman. After completing the usual education in his native place, he was compelled, by losses of his father on the bankruptcy of the French funds, to become a mercantile clerk at Lyons. The revolutionary disturbances drove the family about for several years, in the course of which they spent twelve months in England; and for five years, from 1795, Sismondi directed the cultivation of a small estate which his father purchased in Tuscany.

1801, the family having returned to Geneva, he published his sensible and useful '*Tableau de l'Agriculture Toscane*.' He had also made much preparation for his historical work on Italy; but his speculations in political economy were the first to be completed. In 1807 appeared the earliest of his excellent '*Histoire des Républiques Libres*,' which was completed, in sixteen vols., in 1818, and augmented in a subsequent edition. A series of Lectures which he delivered at Geneva, and published in 1813, and is well known in England by a translation: '*Historical View of the Republics of the South of Europe*.' In 1819 he went to England, to marry a sister-in-law of Sir James Mackintosh. His principal employment

afterwards, was the composition of his largest and most laborious work, '*L'Histoire Des Français*.' The first volume appeared in 1821; and he did not live to carry it farther than the reign of Louis XV. In 1822 he published '*Julia Severa*,' a short but heavy historical novel of the Fall of the Roman Empire; and a history of that period appeared in 1835. In the last year of his life he made himself unpopular at Geneva by advocating the expulsion of Prince Louis Napoleon from Switzerland. He died in his native city in 1842. [W.S.]

SISMONDI, UGILINO, called *Buzzaccherino*, a Pisan admiral, celebrated by his naval victory over the Genoese in 1241.

SIVERS, H. J., a German naturalist, 1709-58.

SIX, JOHN, a Dutch dramatic writer, known also as the friend of Rembrandt, 1618-1700. He had a relation of the same name, who translated the Psalms into Dutch verse.

SIXTUS, or XYSTUS, the name of several popes, of whom the most remarkable was Sixtus Quintus, the subject of the following article: the preceding four are—**SIXTUS I.**, of uncertain date, say 119-128. **SIXTUS II.**, like the former, a martyr of the Christian religion, 257 or 260. **SIXTUS III.**, the successor of Celestine, 435, died 440, since which his name has been enrolled with the saints. **SIXTUS IV.**, a member of the noble family of Rovere, in Savona, succeeded Paul II. 1471. He took an active part in the conspiracy of the Pazzi against the house of the Medici dukes of Florence, and ranks among the most unprincipled occupants of the papal chair. He wrote some ascetic works, and founded the Vatican library; died 1484.

SIXTUS QUINTUS, one of the most celebrated of the popes of Rome, was descended from Sclavonian parents who had fled to Italy at the period of the Ottoman conquest of their country. His father, Pereto Peretti, was a vine-dresser in the humblest circumstances, but so hopeful of the fortunes of his son that he named him **FELIX** or **FELICE**. This child was born in 1521, and educated by his uncle, Fra Salvatore, who had fortunately joined the Franciscan order of friars: before passing under his care, however, the young Felix had acted as swine-herd, or in any field occupation by which a scanty addition could be made to his parents' income. Felix Peretti made great progress in scholarship and dialectics, and being ordained priest acquired a valuable reputation by his oratory as Lent preacher in Rome, in the year 1552. His firmness in the catholic faith at this time—under trying circumstances—procured him also the friendship of the grand inquisitor, and the now rising churchman attached himself to the severe party of Ignatius and others, whose influence was then beginning to be felt. In quick succession he became commissary-general at Bologna, inquisitor at Venice, and procurator-general of his order; and these steps gained, by dint of a pushing and resolute ambition, he is said to have assumed the greatest humility, and affected the infirmities of old age; the truth of such statements, however, is denied by Ranke, who justly observes that the highest dignities are not to be won by such means. It is much more probable that Peretti's energy as a reformer of his order, and the discriminating friendship of the pope, Pius V., marked him out as the man for the epoch, and we

know that he stood firmly by his favourite, whom he clothed with the purple in 1570. The son of the vine-dresser was now ranked with the princes of Italy by the title of Cardinal Montalto, and he still varied his public labours by rural occupations. We are not informed of all the circumstances attending his election to the papacy, but he succeeded Gregory XIII. in 1585, and at once commenced the administrative and social reforms in Italy that he had so long contemplated. Unlike a recent example, he carried his measures with a high and firm hand, and so vigorously enforced justice, that the instances often read more like cold-blooded cruelty: his measures had the desired effect, however, of extirpating the bandits who had so long overrun the country, and of bringing some show of order out of the general lawlessness of society. We cannot enumerate here his great enterprises in administrative reform, or the magnificence of his public works, but they all mark his passion for order and completeness. His foreign policy was of the same trenchant description; no half measures or vaporings were to be tolerated; for examples of this spirit, it may be sufficient to name the great catholic league, and the invasion of England by the Spanish Armada. Still more surprising and gigantic were his conceptions as he grew old, as his rigid financial system enabled him to amass a large public treasure in the vaults of Saint Angelo. His designs now were sufficient to prove that he had perfected the government of his own states, and improved the discipline of the church, as an instrument of a more universal dominion than the papacy had ever reached; even the Greek church and the empire of Mahomet were destined to be transformed under his hand. Sixtus Quintus breathed his last amid these visions of grandeur on the 27th of August, 1590. A storm burst over the palace of the Quirinal at the moment of his death, and it became an article of the popular faith that he had achieved his enterprises by a compact with the evil one, which had then expired. [E.R.]

SIXTUS OF SIENNA, a preacher and theologian, born of Jewish parents, 1520-1569.

SIXTUS OF VESOUL, JEAN PARIS, called Le Pere, a French Capuchin and Orientalist, 1736-92.

SKELTON, JOHN, one of the early poet-laureates of England, when that office was conferred as a degree at the university, was born towards the close of the 15th century. He was known to be curate of Trompington and rector of Dip, in Norfolk, in 1507, and is understood to have garnished his sermons with a good deal of invective against persons in authority. His poetical satires brought down upon him the displeasure of Wolsey, who ordered him to be arrested; Skelton, however, was protected in the sanctuary of Westminster by the abbot, Islip, and d. there 1529.

SKELTON, P., an Irish divine, 1707-1787.

SKINNER, S., a philologist, 1622-1667.

SKYTTE, J., otherwise SCRODERUS, a Swedish senator, originally the preceptor of Gustavus Adolphus, 1577-1645. His nephew, LAURENCE, known as an ecclesiastical writer, died 1696.

SLATER, or SLATYER, WILLIAM, an elegiac poet, rector of Otterden, in Kent, 1587-1647.

SLEIDAN, JOHN, whose proper name was PHILIPSON, a celebrated Ger. historian, 1506-66.

SLINGELANDT, PETER VAN, a famous Dutch painter, taught by Gerard Dow, 1640-1691.

SLINGELANDT, SIMON VAN, grand pensionary and treasurer-general of the United Provinces, died 1736.

SLOANE, SIR HANS, Bart., a celebrated botanist and promoter of natural history, was born in Ireland in 1660. He died in 1752. He studied medicine, but being fond of natural history, he devoted much attention to that science, and, in 1687, accompanied the duke of Albemarle to Jamaica. His short residence in that island enabled him to collect an immense number of plants, and other objects of natural history, with which he returned to England and commenced the practice of his profession. In this he succeeded admirably, soon acquiring a high reputation, and becoming president of the College of Physicians, and physician to George II. His love for the natural sciences continued throughout his life. He was the friend and correspondent of John Ray and most of the celebrated naturalists and philosophers of his time; and filled, with great distinction to himself and advantage to the Society, first, the office of secretary; and, next, the death of Sir Isaac Newton, that of president of the Royal Society. He is the author of many valuable works and treatises, amongst which a his catalogue of the plants of Jamaica, written in Latin; and his voyage to, and natural history of that island. He accumulated an immense stock of objects of natural history, art, and antiquities, which, along with his library, consisting of 50,000 volumes and MSS., he bequeathed to the British nation, upon condition that they would pay to his family a sum of £20,000 sterling. Parliament agreeing to this condition, secured the collection and having already become possessors of the Hebraean manuscripts, and the Cottonian library, deposited them in the fine old mansion, Montagu House, which they purchased for the purpose, and thus laid the foundation of the British Museum. [W.F.]

SLODZ, SEBASTIAN, a sculptor, founder of a family of distinguished French artists, originally Antwerp, 1655-1726. His son, P. AMBROSE, designer, and professor of painting to the French Academy, died 1758. RENE MICHAEL, brother the latter, a sculptor and designer, 1705-1764.

SMALBROKE, RICHARD, bishop of St. David distinguished as a controversialist, 1672-1749.

SMALRIDGE, GEORGE, bishop of Bristol known as a theologian and Latin poet, 1666-1711.

SMART, CHRISTOPHER, an elegant classic scholar and poet, born at Shipbourne, in Kent 1722; d., the victim of a settled melancholy, 1771.

SMEATHMANN, HENRY, an English naturalist and traveller in Africa, 1750-1787.

SMEATON, JOHN, a man of rare talent, who occupies a most conspicuous place in the history of civil engineering. He was amongst the first who styled himself 'civil engineer,' and to no name more unimpeachable character or higher talent of members of the profession point as its type. Smeaton was born in 1724, at the dawn of the epoch of Britain's first display of commercial and manufacturing vitality. As a mere boy he showed bent to the mechanical pursuits. In 1742 he came to London, to attend the courts of law in Westminster, in pursuance of his father's design

ke him an attorney like himself; but, in 1750, find him established as a philosophical instrument maker in Great Turnstile, Holborn. The pling had taken its bent, and nature was too long for any effort of authority to give the tree other form. In 1752 and 1753, he made the experiments 'concerning the natural powers of water wind to turn mills, and other machines dependent on circular motion,' from which resulted the most valuable improvements in hydraulic machines, which remain to this day a standard of the philosophical process of inquiry into practical questions. For this essay Smeaton received the Copley gold medal of the Royal Society in 1759, which he had been made a member in 1753, in acknowledgement of previous contributions to its transactions. In 1754, Smeaton travelled in Holland and the Netherlands, and there no doubt acquired a most important part of the engineering education, which qualified him to occupy the conspicuous position he afterwards did as standing counsel of his profession. In 1756, Smeaton commenced the great work which more than any other to be looked upon as a lasting monument of his skill—the Eddystone lighthouse. Two light-houses had been erected on the Eddystone Rock before Smeaton's admirable structure, of which the first was swept away in a storm, and the second, which was of timber, was destroyed by fire in December, 1755. The cutting of the rock, for the foundation of the building, was commenced August, 1756. The first stone was landed June 12, 1757. The building was finished October, 1759, and the lantern lighted for the first time on the 16th of that month. In all, there were 421 days' work on the rock. This, Smeaton's first work, was his greatest: probably the epoch of its erection, at other circumstances considered, it was the most glorious undertaking that has fallen to the lot of an engineer to execute, and none was ever more successfully accomplished. And now having been battered by the storms of nearly 100 years, Smeaton's work stands unmoved as the rock it is built on—a proud monument to its great author. Robert and Allan Stevenson have erected the Bell Rock and the Skerry-Vor lighthouses since, but distinguished as is the merit due to these men, they have readily testified as to who taught the first great lesson, and what was their example and standard of excellence. Smeaton's reports on the works he executed or advised to be carried out, were published in 1812, under the supervision of the Society of Civil Engineers, founded in 1771 by Smeaton and his friends. These reports are a mine of wealth for the sound principles they unfold and the able practice they exemplify, both alike based on close observation of the operations of nature, and affording examples of cautious sagacity in applying the instructions she gives by means within the reach of art. Smeaton perfected the atmospheric steam engine, but lived to see the far greater improvements of the steam engine by James Watt employed into extensive operation. Smeaton dedicated his spare time to philosophical study and investigation, and had an astronomical observatory at Athorpe near Leeds, his birth-place. Here, on the 16th September, 1792, while walking in his garden, Smeaton was seized with an attack of palsy, and on the 28th Oct. he died. [L.D.B.G.]

SMELLIE, WILLIAM, a Scotch physician, author of a complete course of midwifery, died 1763.

SMELLIE, WILLIAM, a printer of Edinburgh, translator of Buffon's Natural History, and author of a work entitled the 'Philosophy of Natural History,' 1740-1795.

SMIDS, LUDOLPH, a German poet, 1649-1720.

SMIRKE, ROBERT, a native of Carlisle, famous as a painter of historical and imaginative subjects, member of the Academy, 1752-1845.

SMITH, ADAM, a very great name in Scottish Literature; distinguished even amid those of our best writers and philosophers; and which will recall to all ages, as it now does to every civilized nation, the Man who by the authority of Reason laid the foundations of the Freedom of Industry, and of unfettered Commerce among States. Smith was born at Kirkcaldy in Fifeshire on 5th June, 1723: in 1737 he entered the university of Glasgow, where he studied under Hutcheson: from Glasgow he passed to Balliol College, Oxford, returning to Edinburgh in 1748. In 1751, he obtained the Chair of Logic in his Alma-Mater; and in the subsequent year he was nominated to the professorship of Moral Philosophy. It is unnecessary to record that his genius threw around this ancient University the greatest splendour of which it yet can boast,—an assertion not to be modified, even although his successor was REID. Resigning his chair in 1763, he accompanied the young duke of Buccleuch to the continent—meeting in Paris, along with his old companion HUME, the distinguished Economist and Statesman, Turgot and the celebrated QUESNAY. Probably first moved thereto by his intimacy with Hume—who, some time previously had published his exquisite *Political Essays*—Smith had long turned his thoughts to the momentous subject which afterwards engrossed them; and his interest in it must have been greatly deepened by intercourse with the founders of that famous French School, which first aimed to reduce all Problems concerning the Public Riches, into the form of a Science. At all events, on his return to Scotland in 1766, he retired to his native town; and after ten years of undisturbed meditation, he produced his imperishable work, '*On the Nature and Causes of the WEALTH OF NATIONS.*' In just tribute to the extraordinary deserts of the Author of the '*Inquiry*,' Government bestowed on Smith a lucrative and not laborious Fiscal Office. He fixed his residence thereafter in Edinburgh, where he died on 8th July, 1790. As a Man, Smith left behind him the truest testimony to his worth—viz., the best minds of his country mourning for their lost friend. He was simple and sincere, earnest in his beliefs, indefatigable in work; nor do many of the odd anecdotes that still circulate regarding his *absence* and abstraction, fail to do their part in enabling us to complete a picture of him. Besides his great works, the *Theory of the Moral Sentiments* and the *Wealth of Nations*, he left a few philosophical Essays, among which is a precis of the early History of Astronomy, most exact, penetrating, and beautiful. He had been engaged for many years on another work, that promised to be of higher moment than even the *Wealth of Nations*—viz., a Treatise of Civil and Political Law—meaning to trace at once the History and the

Theory of Law, from their obscure commencements, in the infancy of Society and in the Human Reason, up to their highest developments. It is only the student of Smith's actual works, who can conceive the amount of detriment to Science involved in the loss of such a Treatise. No fragments of it remain.—We hasten to offer a brief account of the two great and completed investigations whose titles are as above.—I. Disciple of Hutcheson, the Author of the *Theory of Moral Sentiments*, is in clear revolt against the moral doctrine of HOBBS—viz., that the foundation of Morality is the feeling of Self-interest, and also against the somewhat broader scheme of Utility, as propounded by Hume. Concurring with his Master, that we must seek that foundation in disinterested sentiment, he does not concur with him, that the required sentiment is *Benevolence*. In Smith's view the foundation of Morals is in *Sympathy*: we feel, he says, that conduct right on the part of another, with which we sympathize; and we hence infer that such acts on our own parts, alone can be right, with which others sympathize. However narrow and singular this principle may seem as a basis, the skill, clearness, feeling and eloquence, with which the theory is developed, will ever attract admiration. nor perhaps is any portion of its development more ingenious and striking, than where Smith shows, how *Reason*—working on the ground of primal feeling—gradually forms the *rules of Morality*,—*involuntarily*, almost, classifying the *virtues*; and so impressing on the mind those rules and classifications, that, in acting, we seldom or never require to recur to consideration of the *fundamental sentiment*. Amidst the pleasure, however, with which we go along with these deductions, one very important question cannot fail to occur,—May not something of the same kind be established, with regard to any other supposed foundation of morality? If—accepting *sympathy* as that foundation—we really *act* through rule, and a direct sense of the obligation of the several virtues, and *not because of any immediate feeling of sympathy*; can it justly be averred against the moralists who claim Utility or Self-interest, as the simple or ultimate basis, that they are ever acting *with direct eye to Self-Interest*? There is a truth here which sadly damages the scaffolding beneath certain declamatory criticisms!—The errors of Smith's system are two. *First*, deriving the sense of right from sympathy with others, it pronounces, that no one can have a sense of right unless through intercourse with others; and that the quickness of that sense must be proportionate to the extent of such intercourse. The Author of the Theory, adopts this conclusion, and ingeniously but vainly defends it. The feeling of right, has sanctions in the Human Soul, which transcend everything that concerns intercourse with our fellows. *Secondly*, Like Hutcheson's scheme of Benevolence, and the doctrine of Utility itself, the Moral Theory of Sympathy, is quite too narrow; mistaking an important moral *motive*, for the Supreme Faculty which weighs all motives, and determines Moral Action. This Supreme Faculty has been termed *Conscience*: we prefer to designate it with Kant—the PRACTICAL REASON: it is the Energy through whose unchallengeable supre-

macy, the philosopher of Königsberg first discerned that REALITY, which is the awful counterpart of the Subjective IDEA of GOD.—II. 'Inquiry into the Nature and Causes of the Wealth of Nations,' stands to the Science it created, in relation held by the labours of Lavoisier, to Chemical Science, or the combined discoveries and vestigations of Copernicus, Kepler, and Newton Astronomy. Previous to the era of Adam Smith all Economic Theories rested on some abstract principle, demonstrated by no induction, merely assumed as true; in other words, a principle expressive of the common notions of the time. It was reserved for the great Scotchman to apportion its foundations, to Observation, and Experience, analyzed by Reason; to apply in this case the strictest rules of Philosophic Induction; and the basis so discovered, to rear a permanent structure. It is not requisite now, neither would available space permit us, to follow Smith in this scientific research. It is matter of common knowledge, how clearly he discerned, and how firmly he established, the truths that all things covered by men are the produce of labour, and that quantity of labour employed in their production is the real measure of value: nor have we leisure to trace, the fine and continuous reasoning which led him from these simple and indubitable, but form unnoticed Principles, to the ultimate Laws which determine the economic prosperity of Nations. His achievements were indeed exhaustive, as bare contents of his Treatise suffice to show. It consists of five sections. In the first he discusses the general causes of the formation, increase, decline of Public Riches, and of their distribution among the various classes of men, who make up modern Society. Next he analyzes the nature of Capital, explaining the mode in which it gradually accumulates, and the nature of its efficacy in the production of Wealth. The third and fourth sections are occupied in examining the various theories or abstract doctrines in Political Economy that have successively prevailed at different epochs of History and among various Nations; and in terminating their influence—good and evil—on the development of the arts and agriculture, industry and commerce. Finally, we have searching glance at the nature of Public or State Revenue, and inquiries concerning the best and justest means of raising it by taxation. It is the peculiarity of Smith—indeed of every serious thinker on such subjects—that at every step only of his inductive, but also of his deductive processes, he looks far around him over Society well as deeply into the nature of Man; so that what he writes may be sustained alike by experience and principle: and few men have ever possessed in so remarkable a degree, the power to analyze experience—to separate the causes of complex phenomena, and assign to each the portion of the result which is due to it. So rich in Historic criticism and illustration, that the Wealth of Nations is admitted by every reader to possess a charm belonging to scarcely any work of the same kind, that either preceded or has followed it. With the exception of one very rare Thinker, who possesses at once an amount of political and historical knowledge and power of discernment, not inferior to Smith's, the Eng-

iters on this subject, since the publication of the classic Treatise, have rather been keen logicians and observers: and perhaps the highest compliment that can be paid to the Wealth of Nations, is in the fewness and comparative unimportance of its modifications, which any of its conclusions have undergone, even from the scrutiny of such men as Ricardo, Malthus, and James Mill.—Smith in his lifetime reaped a deserved celebrity. On its first publication, the Inquiry was hailed as the canon of a new Science, and rapidly translated into every language within civilized Europe. And ever since, it has been adding triumph to triumph; prejudices, one after another, falling before its force; and men and nations, in proportion as they acknowledge its worth, becoming more and more bound in brotherhood. Is then, its remarkable monument complete;—shall Smith's doctrines, unmodified, continue to govern the policy of States? A question not lightly to be answered! The relations of the classes within Society are changing; and sentiments practically unknown in Smith's time, are pressing upward into sway. There is one great Element, even towards the production of the Wealth of a People, which, in this memorable work, one misses twice. Among Machines, what one is equal in output or productiveness to the Human Brain? And how fares this, under the stern and withering action of the *Division of Labour*? It is foolish to throw aside questions of this sort, under the pretence that they smell of *Socialism*. The man would be daring who should deny, that under an organization permitting the culture and employment by every one, of all his Human Faculties, no action could fail to increase immeasurably in wealth, as assuredly it would in Dignity and happiness.

[J.P.N.]

SMITH, ANKER, an Eng. engraver, 1759-1819.

SMITH, CHARLOTTE, wife of a West India merchant, who, in a period of reverse, had recourse to her pen as a means of support, and became a distinguished novelist and poetess; born in Sussex, of parents named Turner, 1749, died 1806.

SMITH, EDMUND, a dramatic wr., 1668-1710.

SMITH, ELIZABETH, a young lady of remarkable accomplishments in ancient and modern languages, polite literature, and mathematics, author of a new translation of Job, and of the Life of Joseph; born at Burnhall, near Durham, 1776, died prematurely of consumption 1806.

SMITH, G., a landscape painter, 1714-1776.

SMITH, HENRY, a Ch. of England divine, whose sermons rendered him highly popular, 1550-1600.

SMITH, HORACE, joint author, in connection with his brother, JAMES, of the famous 'Rejected Addresses,' was born in London in 1779, and became a member of the Stock Exchange. These popular writers formed their literary partnership at the establishment of the 'Pic Nic' newspaper, by Colonel Greville, in 1802, and were soon highly esteemed as periodical writers. The 'Rejected Addresses' appeared in 1812, on the re-opening of the Surrey Lane theatre, and have continued popular till the present time. Horace was afterwards distinguished as a novelist by his well-known works, 'Love and Mesmerism,' 'Brambletye House,' &c., and died 1849. JAMES, who was younger by four years, and followed his father's pro-

fession of a solicitor, made no further effort to keep his name in remembrance; he died in 1839.

SMITH, SIR JAMES EDWARD, an English physician, founder and first president of the Linnæan Society, disting. as a naturalist, 1759-1828.

SMITH, JAMES, a native of Glasgow, whose name has become cele. in connection with agricultural and manufacturing improvements, 1789-1850.

SMITH, JOHN, a physician, 1630-1679.

SMITH, JOHN, a learned divine, author of 'Ten Discourses on Theological Subjects,' 1618-1652.

SMITH, JOHN, a mezzotinto engraver, abt. 1700.

SMITH, JOHN, known as CAPT. JOHN SMITH, or SMYTH, a military officer and traveller, whose life is intimately connected with the history of New England, 1579-1631.

SMITH, or SMYTHE, JOHN, an ambassador, traveller, and writer on military weapons, 16th c.

SMITH, JOHN, an English divine and antiquarian, editor of an edition of the Venerable Bede, 1659-1715. His son, GEORGE, who completed the latter work, was author of a book entitled 'Britons and Saxons not Converted to Popery,' 1693-1756.

SMITH, JOHN, a native of Glenorchy, in Argyllshire, and a minister of the Scotch Kirk, famous as an antiquarian and Celtic scholar, 1747-1807. His works are Alleine's Alarm, Catechism of Dr. Watts, and other small works, translated into Gaelic; 'Essay on Gaelic Antiquities, concerning the History of the Druids,' 'Ancient Poems, translated from the Gaelic,' 'A Dissertation on the Authenticity of the Poems of Ossian,' a 'Life of St. Columba,' a 'Commentary on the Prophets,' &c.

SMITH, JOHN, a London banker, and member of parliament in the Whig interest, 1767-1842.

SMITH, DR. JOHN PYE, was a native of Sheffield, where he was born in 1775. His father was a bookseller, and young Smith, from his facility of access to books, early acquired a strong taste for reading, which furnished him even in boyhood with a large stock of miscellaneous knowledge, though from the nonconformist principles of his family, it was chiefly directed to the works of the Puritan divines. Having shown a decided bias for the ministry as his future profession, he was entered a student of the Dissenting college, at Rotherham, under the superintendence of the able and learned Dr. Williams. He was, on the completion of his term of study, appointed classical master of that institution; and so much satisfaction did he give in the performance of his academical duties, that he was transferred in a few years to the higher and more important college of Homerton, first in the classical and ultimately the theological chair. At an early period of life, he determined to produce a work on one of the leading doctrines of the Christian religion. And the influence of Priestley's writings having been productive of much evil in shaking the faith of many as to the divinity and atonement of Christ, he set himself to the composition of a work which should furnish a full answer and refutation of the Socinian heresy. This book, which he entitled 'The Scripture Testimony to the Messiah,' was hailed by all denominations as a most valuable contribution to theological literature; and by the acuteness and force of its reasoning, as well as by its extensive erudition, raised the author to the foremost rank of British divines. He was complimented through Dr. Dwight of Yale college,

America, with the honorary degree of D.D. A supplementary volume was published in 1818, consisting of 'Four Discourses on the Priesthood of Christ.' Dr. Smith was led to direct his researches into various departments of the great field of science, especially into that of geology, and being deeply interested in the bearing of that new science on the truth of the Mosaic Record, he published in 1839 a treatise entitled, 'The Relation between the Holy Scriptures and some parts of Geological Science.' Dr. Smith, after discharging the duties of the theological chair at Homerton for the long period of fifty years, resigned his professorship in 1850, and at a public breakfast to which he was invited, he received from his friends a most gratifying and honourable testimonial in the form of £2,600 subscription for the aid of students in divinity to be called the Smith Scholarship. His death took place early in the following year in Southwark. [R.J.]

SMITH, JOHN STAFFORD, a famous composer of glees, anthems, and madrigals, died 1836.

SMITH, JOHN THOMAS, keeper of the prints and drawings in the British Museum, a miscellaneous and antiquarian writer, 1766-1833.

SMITH, MILES, a learned prelate, one of the ministers employed in translating the Bible, 1568-1624.

SMITH, RICHARD, a Roman Catholic divine and professor at Douay, born in Worcestershire 1500, died 1563. The principal circumstance recorded of him is his attendance at the burning of Ridley and Latimer.

SMITH, RICHARD, a Roman Catholic divine and controversial writer, 1566-1655.

SMITH, R. A., a Scotch musical composer, whose works, sacred and secular, bear testimony to his high genius and prolific industry. His compositions are likely to maintain their place among the national music of Scotland, 1780-1829.

SMITH, ROBERT, distinguished as a writer on optics and musical sounds, 1689-1768.

SMITH, ROB. PERCY, brother of the Rev Sydney Smith, a barrister and man of letters, 1770-1845.

SMITH, S., a presbyterian writer, born 1588.

SMITH, SIR SIDNEY SMITH, born at Westminster in 1764, was the son of Sir John Smith, a veteran general of the seven years' war. Young Sidney became a midshipman at the age of twelve, and served in several of the naval actions of the American war. He then entered the Swedish service and distinguished himself in the short war of 1788-1790 between Sweden and Russia. He was honoured by the Swedish king with the knighthood of the order of the sword. He returned to the English service in the war between the French republic and this country, and signalized his courage and skill under Lord Hood in the operations at Toulon in 1793. He next commanded the Diamond frigate in the channel fleet, and drew the attention of both friends and foes by the arduous enterprises which he undertook against the French coast and harbours. He was captured at Havre de Grace in 1796 in a desperate attempt to cut out a privateer that was moored in the Seine. Sir Sidney was taken to Paris and imprisoned in the Temple, where he was treated with peculiar and unjustifiable rigour, till he effected his escape, and succeeded in reaching England in 1798. He now was appointed captain of the Tiger, 84 gun-

ship, and sailed to the Mediterranean. In 1799 when Buonaparte had marched his army from Egypt to Syria, Sir Sidney Smith saved the important fortress of St. Jean d'Acre, and thereby defeated the whole scheme of the French expedition. The Turkish commandant, Djizzar Pacha, was able to evacuate Acre and abandon it to the victorious French army, that was advancing along the coast from Jaffa, when Sir Sidney Smith arrived in the bay, and decided the Turks on resisting. Sir Sidney had under his command the Tiger of 84, the Theseus of 74 guns, and some smaller vessels. He landed seamen and marines, guns, and ammunition, and co-operated zealously with the Pasha strengthening the works during the interval of ten days, that elapsed before Buonaparte's army arrived. He was also fortunate enough to capture the French flotilla that was conveying heavy guns and stores for the siege, and these were now arrayed in defence of the place. The French appeared before the walls on the 17th of March, and a siege commenced which Buonaparte urged on for two months with unremitting violence, and which the Turkish garrison and their English confederates resisted with equal firmness. At last, after having lost 4,000 of his best troops, Napoleon raised the siege and retreated to Egypt. He always referred with the utmost bitterness to this disappointment, as spoke of Sir Sidney as the man who made him misjudge his destiny. Sir Sidney continued to serve off the Syrian and Egyptian coasts, and co-operated in 1800 with the English expedition which General Abercromby led to expel the French from the East. Sir Sidney not only as a naval officer protected the disembarkation of the English troops, but he landed himself and took part in the operations of the troops on shore. He was wounded at the battle of Alexandria, in which Abercromby was killed. Sir Sidney was made an admiral in 1805, and distinguished himself under Sir John Duckworth in forcing the passage of the Dardanelles in 1807. He afterwards commanded on the South American station; and at the close of the war, he was second in command in the Mediterranean. He died 1841. [E.S.C.]

SMITH, SYDNEY, was born in Essex, in 1776 and educated at Winchester and Oxford. About 1796 he became a curate on Salisbury Plain, whence two years afterwards, he removed with a pupil to Edinburgh. There he became intimate in the circle of energetic young men who afterwards became famous; and he receives the credit of having suggested the idea of the 'Edinburgh Review.' He long continued to furnish that celebrated periodical with papers, which, though displaying neither great knowledge nor great power of thinking, are irresistibly diverting and most effective, through the writer's unscrupulous and biting sarcasm, his flashes of eccentric fun, and his unsurpassed skill in the art of quizzing. Sydney Smith's wit was yet more celebrated in society, and established him as one of the most brilliant talkers in the Whig circles of London. He migrated thither from Edinburgh in 1803: in 1806 he received from Lord Erskine a rectory in Yorkshire, where he resided for some years, and wrote his famous and stirring Letters on the Catholic Question in the name 'Peter Plymley.' In 1829 he was presented to another living by Lord Lyndhurst; and in 1841

Grey made him a canon of Saint Paul's. In 19 he published a collected edition of his works; he died in London in 1845. [W.S.]

MITH, THOMAS, chaplain to the English embassy at Constantinople, author of an Account of the Turks, a Life of Camden, &c., 1638-1710.

MITH, THOMAS, a landscape painter of Derby, d. 1769. His son, JOHN RAPHAEL, celebrated his crayon portraits and mezzotinto engravings, died 1812.

MITH, SIR THOMAS, secretary of state in the reigns of Edward VI. and Elizabeth, author of 'The Commonwealth of England,' 1514-1577.

MITH, W., rector of Trinity church, Chester, author of poems and translations, 1711-1787.

MITH, WILLIAM, a heraldist, died 1618.

MITH, or SMYTH, WILLIAM, a learned preacher, founder of Brasenose College, Oxford, the first of which he concerted with his friend, Sir R. B. died 1514.

MITH, WILLIAM, many years member of the House of Commons, in which he supported liberal measures, and advocated the dissenting interest, d. 1756, first entered parliament 1784, d. 1835.

MITH, WILLIAM, an eminent geologist, was born at Churchhill, in Oxfordshire, in 1769, and followed the profession of a land surveyor. He is the author of many valuable works, the character of which may be briefly described by the terms in which the Geological Society of London awarded him the Wollaston medal in 1831:—"In consideration of his being a great original discoverer in English geology; and especially for his being the first in this country to discover and to teach the identification of strata, and to determine their succession by means of their imbedded fossils." d. 1839.

SMOLLETT, TOBIAS, was the grandchild (by a younger son) of Sir James Smollett, of Bonhill in Leicestershire, and was born in that county in 1721. He was educated in Glasgow for the medical profession; but he attended more to literature, and in a tragedy in his eighteenth year, and soon afterwards, by his grandfather's death, was left to his own resources, and sought his fortune in London. Being appointed, in 1741, a surgeon's mate in the navy, he was present in the unfortunate expedition to Carthage, spent some time elsewhere in the West Indies, and returned to England in 1746. He threw himself perforce on literature for livelihood, married a lady whose fortune proved to be disappointingly small, and destroyed any chances he might have had as a play-writer by quarrelling with managers. 'Roderick Random,' his earliest novel, appeared in 1748, and 'Peregrine Pickles' in 1750. He next attempted medical practice in Bath; but, being quite unsuccessful, returned to London, and became an author for the first time. His time thenceforth was chiefly employed in the performance of task work, relieved only at intervals by the composition of his later novels, and a few pieces in verse, insufficient to give him any considerable rank as a poet. He was haughty and quarrelsome, but good-hearted and benevolent; and his union of qualities fitted him equally ill for making money out of the precarious gains of authorship, and for enjoying comfort in the stormy vocation of a political partizan and literary critic. The best known of his miscellaneous works are two:

the indifferent translation of 'Don Quixote;' and the very careless 'History of England,' of which the portion extending from the Revolution to the death of George II. has repeatedly appeared as a sequel to Hume. For a long time after 1756 Smollett edited, with great ability, but not less acrimony, the 'Critical Review,' established as an advocate of the Tory and High Church party; and Wilkes's famous 'North Briton' owed its existence and its name to his paper 'The Briton,' in which he defended the administration of Lord Bute. His novel of 'Count Fathom' appeared in 1753; and 'Sir Lancelot Greaves' was written in 1756, while the author was undergoing imprisonment for a libel. Visiting the continent in 1763 and 1764, when his circumstances and health were shattered, and his spirits sunk by the death of his only child, he published, on his return, his clever but peevish 'Travels through France and Italy.' His ill-humour vented itself anew in 'The Adventures of an Atom,' (1767). After having applied unsuccessfully for a consulship in the Mediterranean, he was again compelled to seek for health in a warm climate; and, in 1770, he left England, never to return. He died near Leghorn in the autumn of 1771, having just completed 'Humphrey Clinker,' which is not only the liveliest of his works of fiction, but breathes often a kindlier and more gentle spirit than the rest. Hazlitt, in his 'Lectures on the English Comic Writers,' and in the 'Edinburgh Review,' has excellently described Smollett's novels, and contrasted their coarse and vigorous pictures of externalities with the fine dissection of character which is presented by Fielding. [W.S.]

SMYTH, J. C., a Scotch physician, 1741-1821.

SMYTH, WILLIAM, well known as the friend of Henry Kirke White, professor of modern history at Cambridge, and author of historical works and poems, 1764-1849.

SNAPE, ANDREW, an English divine, d. 1742.

SNAYERS, H., a Flemish engraver, born 1612.

SNAYERS, P., a Flemish painter, 1593-1670.

SNELL, RODOLPH, in Latin *Snellius*, a Dutch mathematician and philologist, 1547-1613. His son, WILLEBROD, a mathematician, 1591-1626.

SNEYDERS, or SNYDERS, FRANCIS, a Flemish painter of hunting and battle-pieces, who frequently executed the animals and fruits in pictures of Rubens, 1579-1657.

SNORRO-STURLESON, an Icelandic historian and mythologist, au. of the Edda, 1178-1241.

SOANE, SIR JOHN, a metropolitan architect, was born at Reading, where his father was a small builder, 1753. He became errand boy in the office of an architect, and rising to the position of a pupil was finally sent to Italy to pursue his studies by the Royal Academy. Died 1837.

SOANEN, J., a Jansenist prelate, 1647-1740.

SOBIESKI, JOHN, king of Poland, famous in the wars which marked the last efforts of the Turks to extend their dominions in Europe, was born in Galicia 1629. His father, James, was governor of Poland, and his military distinction was acquired in the Polish army, in the time of those weak kings, Casimir V. and Michael. In 1667, with only 20,000 men, he defeated an army of Cossacks and Tartars numbering 100,000, who left as many dead on the field as the whole number of Sobieski's troops. Casimir dying the year follow-

ing, might have been succeeded by Sobieski, had he made any effort, but he permitted the election of Michael, and only acted upon the dictates of ambition, when the latter had proved his incapacity. A desolating civil war now threatened the country, as the adherents of Sobieski and of Michael were encamped against each other, but a new invasion of the Turks numbering 150,000 combatants, under Mahomet IV., suddenly announced a new danger. At this crisis Michael and his army took to flight, and the partizans of Sobieski, upon whose head a price had been fixed, swore to defend him: he then led them against the Turkish hosts, and in another great battle put 15,000 of them to the sword, recovered the spoils they had taken, and set 80,000 prisoners at liberty. While Sobieski was reaping these laurels in one part of the kingdom, Michael in another had concluded the shameful treaty of Budchaz, by which he bartered away a part of his dominions on condition of being supported in arms against his rebellious general; against this treaty Sobieski appealed to the diet, and falling upon the Turks once more, beat them at Kotzin (1674), and took the fortress till then deemed impregnable, at a loss to the enemy of 20,000 men. On the day of this battle Michael breathed his last, and Sobieski commenced his reign under the title of John III.; but he had hardly felt the weight of the crown before a new invasion of 200,000 Turks and Tartars summoned him to the field. Once more he led his brave Polanders against this redoubtable enemy, whom he charged with the inspiring battle-cry of 'Christ for ever;' his successes, however, produced no better result than an honourable treaty of peace, which had little more effect than a truce. In 1683 Sobieski was persuaded by the pope to enter into a defensive alliance with the emperor Leopold, and in July of that year the grand vizier, Kara Mustapha, led a vast army of 300,000 men against Vienna. The capital of the Austrian empire had no prospect but submission, when Sobieski, yielding to the entreaties of a sovereign who had refused him the title of 'majesty,' placed himself at the head of a small but devoted army of less than 20,000 men and proceeded to the seat of war by forced marches. On his way, he was joined by some of the German princes, whose reinforcements swelled his army to 75,000, and with this force he came in sight of the Turkish encampment, which he viewed from the ridge of the Kalemberg overlooking the Austrian capital. From these heights Sobieski rushed down upon the enemy, and obtained a victory with the praises of which all Europe resounded. For the evil return rendered to this hero by the emperor Leopold, and consummated by the peace of Moscow in 1686, we have no space. He died at Warsaw, June 17, 1696, and years afterwards Charles XII. paused in his headlong course to visit his tomb, and drop a tear to his memory. [E.R.]

SOBRY, F., a French writer, 1743-1820.

SOCINUS, FAUSTUS, nephew of Laelius Socinus, and a descendant of the illustrious house of the Sozini, was born at Sienna, in December, 1539. His family being suspected of heresy, Socinus at the age of twenty took refuge in France for a season, but returned to Italy on his uncle's death, and spent twelve years at Florence in the service of the grand duke. In 1574 he retired to Basle,

and four years afterwards was invited by the court physician, George Blandrata, to Transylvania, where opinions similar to his own had been for some time professed. Francis Davidis held, as a legitimate deduction, that if Jesus be mere man, or a creature, it is idolatry to offer a religious service to him. The arguments Socinus failed to convince him, and the refractory divine was thrown into prison, where he died after six years of close confinement. In 1579 Socinus visited Poland, but the unitarians of that country had scruples about admitting him into their communion. He left Cracow, after a residence of four years, and soon after married the daughter of a nobleman, who was his patron and protect, and on whose estate he lived in retirement. He gradually obtained influence in the country, a many persons of rank and wealth were led to espouse his creed. In 1598 the mob subjected him to a cruel maltreatment, dragged him through the streets, and burned his papers. Socinus died at a village in the neighbourhood of Cracow, March, 1604. The vague and floating anti-Trinitarian opinions on the person of Christ, which for some time been abroad, were reduced to a system. He denied the Supremacy of Deity of the Saviour, affirming that he had noistence till he was born of the Virgin—denied the Holy Spirit is a person—excluded the atonement from his 'scanty creed,' regarding the death of Jesus only as a martyrdom—denied the personality of Satan—and refused the doctrine of original sin and that of eternal punishment. In short, he impugned all that in every age has been held distinctive of evangelical theology. His views of his uncle, Laelius, seem to have first pressed his mind with those ideas, and though he discards all fanaticism, yet he indicates that of that uncle's interpretations, was all but a secret revelation to him from Christ himself. Opera, vol. ii. 505. The works of Socinus consist of numerous exegetical and polemical tracts, and letters; a long account of an argument with Francis Davidis, the 'Responsio pro Reviensibus,' replies to Pucius and Solanus, a cellany of disputations, with a variety of antagonists, and a life of the author prefixed by a Poet knight. [J.]

SOCINUS, LAELIUS, a celebrated heretic, uncle of the preceding, born at Sienna in 1499, but quitted Italy to join the reformation party in Switzerland, where he died in 1563.

SOCRATES, born at Athens in the year 470 B.C.; suffered the punishment of death for impiety at the age of seventy.—How arduous an approach with a view to represent them as Just of the Earth! To analyze a speculative system is comparatively easy; even to trace one's self to the position of its Framer, and discern it—as alone it can be discerned—from its origin is still a task chiefly for the Intellect: more difficult, but also, quite within reach of impartial search, to estimate the illustrious Statesman who overcame the obstacles he overcame, and comprehend the space and duration of his influence: if the Inquirer be earnest and endowed with a portion of Imagination, need he shrink from attempting to accompany the military Hero, to

vel his complex operations, and even to participate his ardour amid the clangours of War. at Socrates! The most just, the most exalted, the completest type of Humanity to which classic antiquity with its wonderful creations, ever gave birth—the nearest of all who preceded, to a Being whose name not here—who, without ambition, or pretence, or external advantage, but, through the simple force of Moral and Intellectual greatness, took unrelaxing hold at once of the Heart and mind of the Ancient World,—to think or write of him—even those few broken paragraphs which we now undertake—*this*, demands preparation of a different order, and much rarer moods. The Parents of Socrates were of no mark or note in the Athenian State; nor was their son gifted with any of those personal distinctions, which were indifferent account nowhere in Greece. A face a reverse of beautiful, flattened nose, protruding ears, the entire physiognomy anything but attractive to a passer by, he made no attempt to veil or compensate deficiencies, by ordinary solicitudes: a coarse tattered cloak, and oftenest unsanctified, Socrates strolled through all Public places, the observed, however, of all observers; frequently listened to by multitudes; and greeted by the hearts of the choicest Youth of Athens, whenever he appeared. Closer inspection of the only representations we have of him, goes, indeed, a certain length in explaining this latter remarkable power of fascination. A massive head in contact with authority, a broad although rugged brow, and that aspect of self-possession which indicates a Man to whom mastery appertained too much of right, to permit him to feel conscious of not a vestige accordingly of repellent affectation, or assumption, or reserve; but, on the contrary, the light of the most genial Humour ever beaming like sunshine among his singular features. Qualities, of all others, the surest to win way for their possessor to the respect and likings of the cheerful and frank; but one higher, was needed to obtain for Socrates that devoted and enthusiastic attachment, which even a spirit unneable as ALCIBIADES, could not refuse. To lead the gulf usually sundering Youth from Age, and depriving Age of its authority as Counsellor, and to bestow the blessings of guardianship: but the reverence springs less from the inconstancy and impulsiveness of Youth, than from the rigidity of Age. As Life advances, bonds multiply and tighten around most of us. Custom governs, as second nature: that is, we bend before social and conventional moralities, beliefs, and expectations; and forget the modes of less fettered existence. No tyranny of Custom, however, had subjected Socrates. Ever increasing in Knowledge and Wisdom; to his latest hour he was youthful as at first: we marvel, therefore, though young men clustered around him—hailing him as best companion as well as Sir. Something like a mask of the inextinguishable quality now spoken of, is not uncommonly seen—springing from mere lack of thought, and sluggishness of temperament. But it belonged to Socrates, because, through his moral and intellectual force he lived freely and consciously among those primary INTUITIONS, which Youth—when its path is healthy—simply obeys. He had descended to the roots of that rich Nature, of which

our actual Men are but stunted and fractional developments; and thus, were his sympathies so full and sincere. Hence too, that unaffected solemnity which often mingled very touchingly with his most humorous moments. He could not conceal from his own Soul, that he had gone deeper than Sense; and that the Voices to which he listened came from beyond the World. It was not for an Intellect so masculine, to get entangled with unmanageable theories concerning the nature of the INTUITIONS: he simply felt their presence, and reverently bowed himself down:—like Pythagoras, he said he had a Heavenly guide, and owed his safety to his '*Dæmon*.'—Turning from the Man to his mission, one might at first fall into something akin to disappointment at its apparent simplicity; and because it had so little to do with the founding and promulgation of arduous Speculation. Yet the functions which Socrates appropriated, are just the most important that can fall to Mortal: and the methods he took to fulfil them, show by their nature, how profound and universal his objects were; for these methods, without one tittle of modification, are as applicable now as in long gone Athens, and will abide so through all time. *Πρὸς τὸν λαόν.* Before acting or speaking, know what you propose. If you speak, know what you speak: if you believe, know what you believe: no Ignorance is so shameful as an assumed knowing or believing, what one knows not. Ascertain what your Mind, in verity is, and be that. Surely a simple message! Do we marvel, that the delivery of it consumed the Existence of one of the greatest of Men? CIRCUMSPICE! It can scarcely require to be mentioned, that Socrates wrote nothing, and was not a professed Doctor. His plan was much more direct and practical. He seized on some one whom he met in his walks; and, by searching conversation, constrained him into contact with the foregoing truths. For the most part he laboured to bring men to recognize two grand sources of evil—two all prevailing and always prevailing detriments to Sincerity and Truth. *Foremost*, the careless, unconscientious use of words. A *Word*: observe what it is, what realities it ought to represent! First, it stands for a certain definite Thing—a fact or form in Nature about which there can be no dispute; and secondly, by every one of its derivative meanings, it represents some actual analogy among Things, and certain equally definite laws of the Mind. To understand a word, then, implies no slight knowledge; and the use of it requires proportional care. Do men really thus comprehend the words they employ? Take up any common or received proposition, and question a man who says he stands by it;—ask, if he comprehends its terms? We fear it is as certain now, as Socrates demonstrated it to be, in Athens, that—no matter how momentous the proposition, no matter although some entire system of Morals, Politics, or Theology may hang on it—aye, that ninety-nine in a hundred even of so-called intelligent persons, would not come clear through the scrutiny! The power to construct language is an especial distinction of Humanity; and the right and conscientious use of it, is the means by which alone we connect the past with the present, and discern through Nature and History, those grand and serene principles of Order

which reveal a Supreme Government: employ it otherwise, and it *veils reality*; it is an excuse for not looking at Things; the Mind becomes its instrument; Truth gives way to Dogma, and we are False without a blush. Would that every generation had its Socrates! Again, Socrates, rejoiced to force on collisions with the professional Teachers of his time,—the class of men who had assumed the title of SOPHISTS. It is now well and generally understood, that the once prevalent conception, that these Sophists were avowed and conscious teachers of Fallacies, is quite erroneous. They had no such distinction. Mere representatives in Athens, of the ordinary professional Teachers of almost every age, they were men who expounded Theories they had never bottomed; and undertook, for fees, to prepare Young men, by the teaching of Oratory and Philosophy, for the daily work of Athenian public Life. Certainly Socrates did not spare their presumptuous profession of Theories; and he rejoiced to do then, what, if he had lived on Earth for ever, he might have done every day and anywhere—to reduce them, by his keen interrogations as to the significance of their propositions, to the embarrassed avowal of Ignorance. But his antipathies were equally strong against the whole system of acquiring Knowledge—as it was termed—*for use*. The thing to be accomplished, he said, is to become *true Men*, and the *uses* will follow. Does the Oak of centuries send out its strong arms that they may cast a shadow? On the contrary, it ascends and spreads, through the vigour of its inner Life; and then, tribes and nations sit down within the grateful covert. This, indeed, is no idle distinction. Knowledge attained with chief view to specific uses, never forms the Man, and is not true Knowledge. Truth, in itself is not yet represented by conventional institutions and requirements: and the Mind which seeks in the first place to subserve these, must be satisfied to miss Truth. First and last, it was the counsel of Socrates—*Be Men—Γινεσθαι ανθρωποι*! For thus alone can you become true citizens of Athens, or worthy to worship the Gods.—The teaching of Socrates, in so far as we have sketched it, was *critical* only; although his interrogations seldom failed to point the way to some momentous positive Truth. Concerning his own positive conclusions, we refer to the article PLATO,—desiring rather, in our remaining space to view him as a practical *Citizen*. And surely, Athens had never a better or a nobler one. Inferior only to his love of Truth and Justice, was his ardent love of his natal soil, his desire for its prosperity, and his obedience to its Laws. When exigencies demanded, a willing patriot and brave soldier: he fought at Delium, Potidæa, and Amphipolis—a pattern of endurance even to rank and file; and he bore himself without ostentation, or the wish for notice. If he spoke in public, it was to defend the innocent; and he cared not then, whether before an excited People or the Thirty Tyrants. During his whole long life, he never broke a Law—refusing in his own case to sanction disobedience, by an easy escape from the consequences of one of the most unjust sentences recorded in History. Observe too, his careful treatment of the national Mythology—his respect for the Gods. It is not easy to define precisely the

position of Socrates towards the Grecian Olymp. It is clear he had penetrated far deeper than Antipomorphism, and discerned a moral Deity, the guardian and father of Man. But he would not distill the Laws: partly, it may be, through his practical sense of the necessity of Order to all Progress; mainly through the Motive, which in a later prompted Spinoza to reply to his simple Hostess, '*Your religion is good; you ought to seek no other, nor doubt that it will assure your salvation, if you stimulate your piety, it helps you to lead a tranquil and virtuous life.*' What then, in pathos of wonderment we ask—what had been done by most illustrious of the Greeks, that the State of Athens could not be safe unless he should perish by Hemlock? What fault, indeed, could there be in him? 'Yet they only cried out more, "*Not this man, but Barabbas!*"' Excuse of course, there is none, although there is explanation. Athens was confessedly tolerant; but the case of Socrates was just that one, for which toleration has existed nowhere or at any time. As Mr. Maurice acutely intimates, the new Teacher had only announced some new theory, how antagonistic to those already afloat, no one would have hated him—not even would he have been blamed. By proposing his particular Theory, he would virtually have classed himself with other Teachers, and been a new Doctor. Socrates did not do this; he did not propose a sect: he proved that the *methods* of all sects were unworthy, and their pretensions hollow; he was at war on the very profession of Sophist. The experience of the Ages, bears but one witness to the certainties in such a case. 'If,' says Mr. Maurice, 'a Teacher of this kind is right in what he says, he must be regarded as a public benefactor; the city must honour him above all its citizens.' And for such a claim, why expect to be an exception from those who are wise in their generation? Isolation, was the seal of the greatness of Socrates, but it likewise caused and permitted the error that destroyed him. Glorious, indeed, that his noble Life: neither did he die in vain. All that are gone, and ages yet to come, will live over Plato's admiring and affecting narrative. Conversations of that last evening still warm hearts, and subdue our souls. We hear him, the majestic old Man; amid the afflicted group, alone unmoved—discoursing of duty, and resignation, and immortality—an Immortality which showed him Death as a mere incident amid Life, not any sudden disruption or critical change, the opening of a pathway towards worlds where duty still exists, and wherein the Good and the Good who preceded him, surely for ever dwell. Wisdom he had sought here; Wisdom he would seek for there; only he should discern more clearly and live more purely. The final moment came. It may be, that through that humour which clung to him, or with other and now obscure intent,—'*Crito*,' he said, '*forget not the Cock I vowed to Esculapius.*' Socrates then departed *εὐφρανόμενος*! 'The last,' cried Plato, 'of our friend, the best of all men of this time, the wisest and the most just of all men!' [J.P.]

SOCRATES, surnamed SCHOLASTICUS, a Greek philosopher, professor of the law, and pleader at the bar in Constantinople, about the middle of the

century, author of an ecclesiastical history which continues that of Eusebius from 309 down to 440. This work is in much esteem as one of those original documents which can be relied on for accuracy and dispassionate judgment.

SODERINI, J. A., a Venetian antiquarian, numismatist, and Eastern traveller, 1640-1691.

SOLANDER, DANIEL CHARLES, an eminent naturalist, was born at Nordland, in Sweden, where his father was minister, in 1736. He studied under Linnaeus, and became the companion of Sir Joseph Banks in Captain Cook's first voyage round the world. The objects of natural history collected in this expedition, which terminated in 1771, are now in the British Museum, as are the MSS. of Solander. In 1771 he received the degree of D.C.L. from the university of Oxford, and in 1773 became assistant librarian at the British Museum. Died 1782.

SOLANO, F., a Spanish physician, 1685-1736.

SOLARI, two Italian painters:—ANDREA, surnamed *del Gobbo*, born at Milan about 1480; ANTONIO, called *Zingaro*, 1382-1455.

SOLARI, J. G., an Italian poet, 1737-1814.

SOLDANI, A., an Ital. naturalist, 1736-1808.

SOLDANI, J., an Italian poet, 1579-1641.

SOLDANI, M., an Italian sculptor, 1658-1740.

SOLE, ANTONIO DAL, a famous Italian landscape painter, 1597-1684. His son, GIOVANNI GUIPPE, a painter in the style of Guido, 1654-1719.

SOLIER, F., a French Jesuit, ascetic writer, and historian of Japan, 1568-1638.

SOLIMAN. See SOLYMAN.

SOLIMENA, FRANCESCO, surnamed L'ABATE CIO, an eminent painter of Naples, 1657-1747.

SOLINUS, CAIUS JULIUS, a Latin writer of the 3d century, author of 'Polyhistor,' a poor compilation taken without acknowledgment from Pliny.

SOLIS, ANTONIO DE, a Spanish historian and poet, author of a 'History of Mexico,' 1610-1686.

SOLIS, F. DE, a Spanish painter, 1629-1684.

SOLIS, J. D. DE, a Spanish navigator, 16th c.

SOLIS, V., a German engraver, 1514-1570.

SOLLIER, J. B. DE, a Fr. Jesuit, 1669-1740.

SOLOMON, the son and successor of David as king of the Jews.

SOLOMON, a king of Hungary, 1045-1100.

SOLON, born at Salamis in the 638th year before Christ, whence he early removed to Athens:—he one of the Seven Sages of Greece, of whom, at this long distance of time, we can frame the faintest picture. Known in his youth as a poet, as well for his personal qualities, as because of the station and repute of his family, highly esteemed in Athens, we find him at an early age inducing his fellow-citizens, to rescind by acclamation, the shameful decree, which, on account of previous defeats, had threatened death to any Athen who should propose to renew expeditions against the revolted Salamis. Appointed commander, Solon returned victorious, only to undertake and accomplish a far harder task. The relations in Attica were in confusion: instead of Government, Sects raged. The inhabitants of the hill country demanded a government of the plain; those of the plain wished a monarchy; those on the sea shore a mixed monarchy. Draco's Laws—so profuse in death-punishments, and therefore so destructive of the best

sanctions of authority—still prevailed; and that plague which afterwards so often threatened the extinction of Rome, viz.: the oppression of debtors by creditors, under the letter of harshest laws, had spread through Athens, widely and deep, the spirit of the worst kind of revolutions. To remedy these latter evils was comparatively easy, inasmuch as each could be extirpated by one positive decree; and Solon, now intrusted with the supreme power, annulled Draco's Laws, altered the laws of creditor and debtor, and removed the hardships of existing relations, by an artifice not unknown to modern statesmanships—an artifice never excusable unless under pressure of imperative and inevitable necessity—viz., a sweeping *depreciation of the currency*. But the work of adjusting political relations, or of framing a practical constitution for the State, was not so easy. Solon executed it in a way that enforced the assent, and even gained him the applause of all his countrymen; nor through all their subsequent and frequent vicissitudes, did the wisest of the Athenians ever cease to revert with longing regret to his wise Laws. In outline Solon's constitution was this:—He divided the citizens into four classes, according to their wealth:—the fourth class, containing the *masses*. To this class he refused access to any magistracy; but that no man within the domain of Athens, might be excluded from the rights, duties, and dignity of citizenship, he constituted a public assembly of the whole citizens, before which, all decisions of the higher courts might be brought in review: a privilege apparently restricted, but which soon convinced the Athenian *plebs*, that, in the last resort they were really masters of the Laws. Acting on that principle of *checks*, which—however easily discredited by abstract logic—has been found invaluable in experience, from the time of Athens and Rome, down to our own day, Solon sought security against haste or excess of the popular Assembly, *first* in the Council of the Areopagus, of which all who had been Archons were members, and which he invested with the general guardianship of the Laws; and again in a second Council or Senate, charged with the *initiative* of every law, and the discussion of it, previous to its being questioned in the Assembly:—each of the four classes sending one hundred members to that Senate. Add to which, that to secure justice and aid the weakness of the poorer classes, he authorized any one to bring before the tribunals a transgressor against the person or property of any other: this he considered the most effective police: under Solon's laws, there were no processes as to *competence*. Wiser than Lycurgus, Solon expected no perpetuity for his enactments; he ordained them, therefore, merely for a century. Alas! the Instability of Human affairs! On returning from his travels, the Legislator found Athens again in confusion, and on the eve of the splendid but absolute monarchy of Pisistratus! Want of success in Statesmanship is often good proof of deficiency in true Wisdom; and their speedy failure might have thrown discredit on Solon's Laws. But in modern times, we can interpret more soundly: we have learnt the surpassing difficulty of planting in an old country, a new Tree. Surely, the sad experience of France, establishes how inestimable

the privilege and imperative the duty, to prune the branches, and clear the roots—so that it decay not nor fall—of that umbrageous Oak under whose shade our forefathers lived!—Solon, we have said, was a poet; he was more,—the fragments that have reached us, prove him a master in Greek song. He felt too, the dignity and power of the Art; and he consecrated it to the same noble purposes to which he gave all his life—the inculcation of high morals and philosophy, and the elevation of the Athenian people. We omit here, because they are universally known, those touching personal anecdotes related of him by *Herodotus*. [J.P.N.]

SOLVYNS, FRANCIS BALTHASAR, a Flemish artist who accompanied Sir Home Popham to the East, and published a picturesque description of the Hindoos, their Manners, Customs, and Religious Ceremonies, 1760-1824.

SOLYMAN, caliph of Damascus, 715-717.

SOLYMAN, emir of Cordova, 1009-1016.

SOLYMAN, three emperors of Turkey:—**SOLYMAN (TCHELEBI) I.**, proclaimed emperor after the defeat and capture of his father, Bajazet, by Timour, 1402; dethroned by his brother, Mousa, during a revolt of his subjects, and soon after killed, 1410. **SOLYMAN II.**, next article. **SOLYMAN III.**, brother of Mahomet IV., succeeded on his deposition, 1688, having previously acquired the most effeminate habits by a forty years' residence in a seraglio, died 1691.

SOLYMAN THE GREAT, second Turkish emperor of that name, was born in 1494, and succeeded his father, Selim, in 1520, being then in the twenty-seventh year of his age. The circumstances of the period were such as to call forth the highest qualities that any statesman or sovereign could possess. The arms of Selim had been the terror of Christendom, and the next destination of his fleet, at the moment of his death, immediately after his conquest of Egypt, was a subject of the most anxious solicitude. A general league among the Christian princes was in agitation, and it was only their own mutual jealousies, and the designs of Francis I. in Italy, that prevented its realization; added to which was the enmity of the haughty and warlike Mamelukes in Egypt, and the similar precarious state of many conquests on European territory. The situation of Solymán was much the same as that of the grand duke of Russia would be, if the throne of Nicholas, at the present crisis, were suddenly vacant; but with this difference, that his enemies were anxious for war, and eager to observe the least indication of weakness, and take advantage of it to destroy the infidel. It was the critical period of the consolidation of the Turkish power, and Solymán, without the ferocity of his father, instantly proved himself equal to the emergency. We have not space to enumerate his conquests, but the Mamelukes were put down, the Hungarian army defeated, and Buda taken; he even besieged Vienna, but was compelled to retire with the loss of 80,000 men; at the same time he improved the administration of his dominions, encouraged literature, opened roads, erected caravansaries, hospitals, and libraries, and exhibited the most enlightened regard for the welfare of the vast populations ruled by him. The titles bestowed upon Solymán indicate

his high qualities, for while his own countrymen designate him 'the Conqueror' and 'the Legislator,' he is called by Europeans 'the Great' and 'the Magnificent;' he was also a poet, and he contributed greatly to form the present Turkish language by the happy fusion of the Arabic and Persian tongues, promoted by his example and polity. He perished of fever in a new expedition against Hungary, while encamped before the walls of Sziyeth, two days before its capture, 8th September, 1566. [E.R.]

SOLYMAN, two pachas of Bagdad:—**SOLYMAN I.**, of Georgian parentage, reigned 1750-1776; **SOLYMAN II.**, succeeded 1780, and reigned during a period troubled by the incursions of the Wahabees, and the ravages of Timour Pacha, in Mesopotamia; he repulsed the latter, and died 1802.

SOLYMAN, emperor of Persia, 1666-1694.

SOLYMAN, a general and minister of the Sultan Selim I., governor of Egypt 1526-1538, governor of Zemen 1538-1541; after which he became grand vizier. He enriched Egypt with many public monuments, and caused a general survey of the country to be made.

SOMEREN, CORNELIUS VAN, a Dutch physician, 1593-1649. His son, **JOHN**, a magistrate and poet, 1622-1676.

SOMEREN, J. VAN, a Dutch jurist, 1634-1700.

SOMERS, JOHN, Lord, born at Worcester where his father was an attorney, in 1650 or 1651, died 1716. He united the study of literature with that of the law, and became known as political writer in the time of Charles II., and 1688 was one of the counsel for the seven bishops. The success of the revolution now opened the path to honour, and in 1695 Somers had become 1st high chancellor of England, with the title of Lord Somers, Baron Evesham. In the reign of Queen Anne he was one of the commissioners for effecting the Union of Scotland, and in 1708 became president of the council.

SOMERSET. See **SEYMOUR**.

SOMERVILLE, WILLIAM, a gentleman of Warwickshire, who ranks with the inferior class of poets, author of 'The Chase,' a didactic descriptive poem, in blank verse, 1692-1742.

SOMMIER, J. C., a Fr. theologian, 1661-1717.

SOMNER, WILLIAM, a Saxon scholar and antiquarian, who held the office of clerk to ecclesiastical court of Canterbury, 1606-1669.

SONNERAT, P., a Fr. naturalist, 1745-1810.

SONNIN, E. G., a French architect, 1709-1810.

SONNINI, C. N. SIGISBERT MANON, COMTE DE, a French naturalist and traveller in West Africa, Egypt, Greece, Wallachia, and Moldavia, of works of travel, and of an edition of Buffon with a continuation, in 127 vols. 8vo, 1751-1810.

SOPHIA, empress of Constantinople, niece of Theodora, and wife of Justinian II., with whom she shared in the government of the state. At the death of that prince in 578, she conspired against Tiberius Constantine, who had been raised to the throne by her advice, and, being defeated by him, was compelled to live in privacy.

SOPHIA, half-sister of Peter the Great, czariness of Russia, was born 1667, and in 1702 placed herself at the head of the revolt of the Strelitzes. Having succeeded in her ambitious designs, she reigned over the Muscovites under

names of her brothers, Peter and Ivan. The former, however, finally possessed himself of the sole power (Peter the Great), and Sophia died a prisoner in a convent 1704.

SOPHIA-CHARLOTTE, queen of Prussia, daughter of Ernest Augustus, elector of Brunswick-Lüneburg, and second wife of Frederick I., 1668-1705. She contributed to the foundation of the Academy of Sciences at Berlin.

SOPHIA-DOROTHEA, queen of Prussia, daughter of George I., king of England, wife of Frederick William I., and mother of Frederick the Great, 1687-1757.

SOPHOCLES, was a native of Colonus, a beautiful village in the immediate vicinity of Athens, where he was born B.C. 495, being thus thirty years younger than Æschylus, and fifteen years older than Euripides. His father, Sophilus, being a man of good family, and possessed of considerable wealth, gave him a liberal education in all the literary and personal accomplishments of his age; and these were still further enhanced by a person eminently handsome, which had been moulded and trained by the exercises of the palestra. His proficiency in the knowledge of poetry and music, he having been instructed in the latter art by the famous Lamprus, is attested by the fact that, when a countrymen, after the battle of Salamis (B.C. 480), assembled to celebrate, around the trophy raised by their valour, the glorious victory which they had achieved, he, though a youth of sixteen, was selected to play an accompaniment on the lyre to the pæan, in which the chorus of youths sung their country's triumph. It is besides probable that he also composed the words of the pæan. The commencement of his career as a dramatist took place under circumstances peculiarly interesting. Æschylus had for thirty years been an undoubted master of the Athenian stage, and was now to contest the palm with a youthful competitor of the age of twenty-seven, whose great accomplishments and personal graces had excited unusual interest in his favour. The festival of the Dionysia was, on this occasion, rendered still more imposing by the return of Cimon from the island of Scyros, bringing with him the bones of Theseus. The people accordingly flocked to the theatre of Bacchus; and when Cimon and his colleagues entered the theatre to offer the customary libations to the god, the chief Archon, in the person of Cimon, instead of choosing judges by lot, named the ten generals at the altar; and, after administering to them the usual oath, constituted them the judges between the rival tragedians. Before this tribunal Sophocles exhibited his first tragedy, and by their award obtained the first prize. His subsequent career fully justified the opinion of the judges. From this epoch (B.C. 468) he maintained the supremacy till B.C. 441, when the formidable rival Euripides was preferred to him, and gained the first prize. For sixty-three years Sophocles continued to compose and exhibit; and during that period he twenty times obtained the first prize, still more frequently the second, and never descended so low as the third—an amount of success which far exceeded that of his great rivals. In B.C. 440 he exhibited the *Antigone*, the earliest of his extant dramas, a play which gave such satisfaction to the Athenians that they appointed

him as a colleague of Pericles and Thucydides in the war against the inhabitants of Samos. He seems to have won no laurels in his military capacity. Several offices of honour and respectability were conferred upon him in his old age; he was made priest of Halon, a native hero; and after the disastrous termination of the Syracusan expedition (B.C. 413) he was, in his eighty-third year, appointed one of the committee of public salvation; in which capacity he consented (B.C. 411) to the appointment of the council of Four Hundred. The last years of his life were disturbed by family dissensions. In consequence of his partiality for a grandson, his eldest son endeavoured to deprive him of the management of his property on the ground of incapacity and dotage. The only defence offered by the aged dramatist was to read in presence of his judges a passage from the *Œdipus* at Colonus which he had just written; on hearing which the judges dismissed the case, and rebuked his son for his undutiful conduct. Sophocles died B.C. 405, after completing his ninetieth year. He is believed to have written 113 plays, of which only seven, along with some fragments, have descended to us. His private character seems to have been, on the whole, amiable; the blemishes attributed to it being those of the age rather than the individual. In the hands of Sophocles the Athenian tragedy reached its highest degree of perfection. His language is pure and majestic, avoiding on the one hand the daring and sometimes rash flights of Æschylus, and on the other never descending to the common-place diction of Euripides. [G.F.]

SOPHRANI, R., a Genoese biographer, 1612-72.
SORANUS, two physicians of Ephesus, the earlier of whom dates about the reign of Trajan.

SORANZO, J., a doge of Venice, 1312-1328.

SORBAIT, P., an Italian physician, died 1691.

SORBIERE, SAMUEL, a French physician, philosopher, and historiographer royal, 1615-1670.

SORBIN, A., a French prelate, 1532-1606.

SORBONNE, ROBERT DE, a doctor in theology, who was the chaplain and confessor of Louis IX., and founded the college that bears his name, was born at Sorbon, a village in the diocese of Rheims, in 1201. His object was to found a society of learned theologians, who should live in common, and deliver lectures gratuitously, and this design he began to execute in 1253, by assembling a body of professors and scholars, whom he lodged near the Luxembourg palace. He died in 1274, and left the bulk of his property to render his benefaction permanent. The Sorbonne formed one part only of the faculty of theology in the university of Paris, but its name became so famous that it was often given to the whole, and graduates were proud to name themselves of the Sorbonne, rather than the university.

SOREL, AGNES, a maid of honour to the queen of Charles VII. of France, who has acquired a name in history by the influence she acquired over that monarch when she became his mistress, 1409-1450.

SOSIGENES, an astronomer of Alexandria, who went to Rome in the time of Julius Cæsar, and was employed by him in reforming the calendar, B.C. 45.

SOSTRATUS, the architect of the renowned Pharos, or lighthouse, of Alexandria, 3d cent. B.C.

SOTER, a bishop of Rome, 168-176.

SOTHEY, W., an English poet, 1756-1833.

SOTHERON, FRANK, a British admiral, employed in the defence of Naples, 1767-1839.

SOTO, DOMINGO, a Span. ecclesiast., 1494-1560.

SOTO, FERDINAND DE, a Spanish adventurer and navigator, of whom an interesting account may be read in Bancroft's History of the United States, died 1552.

SOTO, PETER, a Spanish divine, 1500-1563.

SOUBISE, CHARLES DE ROHAN, Prince De, marshal of France, and minister of state to Louis XV. In the earlier part of his career he distinguished himself in the field, but in his later years became implicated in the Dubarry intrigues, so disgraceful to that court; he was brother to the cardinal of Soubisse (see ROHAN), 1715-1787.

SOUFFLOT, J. G., a Fr. architect, 1714-1781.

SOULT. NICOLE JEAN DE DIEUX SOULT, Duke of Dalmatia and Marshal of France, was born in 1769, at St. Amand. His father was a notary. Sout entered the ranks of the army in 1785; and in 1791 he attracted the favourable notice of Marshal Lukner, and received a lieutenant's commission. He rose rapidly under Custine, Hoche, and Marceau, and particularly signalized himself in the victory of Fleurus. In 1799 he acted under Massena in Switzerland, and in 1800 he served under the same commander in the defence of Genoa. Sout was wounded and taken prisoner in a sally in the early part of this siege, but was set at liberty after Napoleon's victory at Marengo. Napoleon, who heard of Sout's bravery and skill, now employed him under his own eye; and Sout's promotion went forward till he had reached the highest station. He was the first of the marshals whom Napoleon created in 1804, and he was the first marshal whom Napoleon made a peer. He was the chief organizer of the great army which was assembled at Boulogne for the invasion of this country; and when the 'army of England' was countermarched into Germany against the Austrians, Sout led the main column, and participated largely in the glories of the campaign of Ulm and Austerlitz. He took in the next year a distinguished share in the victory of Jena; and showed consummate firmness as well as daring in the desperate struggle at Preuss Eylau. In 1808 Sout was sent into Spain. He defeated the Spaniards at Reynosa, and subsequently commanded against Sir John Moore, whom he engaged at Corunna. He next occupied the north of Portugal, but was surprised and defeated by Wellington at the Douro, and retreated with great loss and difficulty into Spain. In 1809 he gained the great victory of Ocaña over the Spaniards, and subdued all the south-west of Spain, except the city of Cadiz. He lost in 1811 the hard fought battle of Albuera against Beresford. Sout was recalled to aid Napoleon after the Russian campaign; but in the July of 1813, he was sent back to Spain to stem if possible the advance of Wellington after the English triumph at Vittoria, and to save the south of France from invasion. Sout did his duty nobly though unsuccessfully. He found the wreck of the French armies of Spain driven in disorganization upon Bayonne; the spirits of the men were damped by repeated defeats, and their discipline had suffered proportionally. Against him the English and their allies were coming on, flushed

with success, in the highest state of efficiency, and with Wellington to lead them. Sout restored order and spirit among his men, and in a fortnight from the time of his arrival at Bayonne he led them boldly again into the Spanish territory against the British. A series of engagements in and near the Pyrenees followed, in which Sout showed strategic abilities of very high order, and gained several partial successes, though ultimately he was driven back into France. He now defended the native country against the invaders with indomitable courage, and an inexhaustible fertility of resources. Repeatedly engaged, and almost constantly defeated, he still presented an unbroken front against his assailants, and kept his retreating army ready to dispute every tenable post, and seize any favourable chance of attack that fortune might offer. The final battle of Toulouse was contested by him with undiminished skill and courage; and though, on the whole, the English were successful, Sout had the advantage on several points of the battle; 5,000 of his enemies had fallen; and he led his army safely out of the city ready for further operations when the news arrived of the emperor's first abdication. In 1815 Sout joined Napoleon and fought at Waterloo, where he acted as one of the emperor's major-generals. At the second return of the Bourbons, Sout was for some time proscribed, but was ultimately restored to all his dignities. After July, 1830, he was much trusted by Louis Philippe, who employed Sout's talents in the war office, and also twice made him president of the council. He was present at the queen's coronation in 1838, as representative of France, and was received with warm favour by the English nation. The old marshal died at chateau of Sout-Berg, 26th Nov., 1851. [E.S.]

SOUSA. See SOUZA and FARIA.

SOUTH, ROBERT, rector of Islip, in Oxfordshire, distinguished as a theologian, more especially in the controversy with Sherlock on the Trinity, born at Hackney 1633, died 1716.

SOUTHCOTT, JOANNA, was born about 1747 at Gittisham, in Devonshire. Her parents were in humble circumstances, and, until her name became celebrated, she obtained her living as a domestic servant. Her case is a very curious one both in the history of psychology, and of religious enthusiasm. From her mother, who lived to the age of 100, Joanna had reached the age of womanhood, she received the most exalted religious ideas, the excellence of which her father often felt himself called upon to check: she was still, however, a sober member of the Church of England. At length she joined the early morning and evening meetings of the Wesleys, and, in 1792, associated exclusively with that body. The religious exercises to which Joanna was thus introduced seem to have produced, as exciting causes, her remarkable visions and dreams, which soon took the form of prophecies, and commanded universal attention. Some of her predictions received a remarkable fulfilment, especially that which she published immediately after the conclusion of the peace of Amiens in 1801; for she then derided the joy of the nation, and gave the solemn assurance that the calamitous series of wars were about to break the events of which would be more terrible than any on record; at a later period, she as solemnly

asserted that Napoleon would never land in England, and that his power would be overthrown. The visions which formed the ground of these prophecies are often very striking as dramatic pictures, and the rude doggerel of her prophetic chants as frequently becomes picturesque, if once the cultivated mind can overcome the disgust first excited by their uncouthness, and their deficiency in common grammatical correctness. She began the publication of her prophetic pamphlets in 1794, and about 1804 was brought up to London, and lodged at the west end by some of her admirers, many of whom were persons of consideration in society. Soon after this event, an old man, named Thomas Dowland, and a poor boy, named Joseph, also had visions, and a paper manufacturer named Carpenter—in whose employ they were—finally published many of them: we mention them here, however, because this Carpenter, conceiving himself to be the ‘Right Man’ of Joanna’s prophecies, finally took her place as the chief of the sect who followed her, having first led the secession when she was believed by the more enlightened of her followers to have fallen under a delusion. That delusion consisted in the belief that she was destined to bring forth Shiloh, the Messiah, and its origin is explained by Carpenter as the result of her believing that she was to be church or bride itself, instead of its shadow or representative. We may here mention, that previous to its arrival at this idolatrous pitch, which is still painful to contemplate, Joanna had occupied a year in ‘sealing’ her followers, generally but most unjustly regarded as a mere trick to make money. The old man Dowland expired in 1804, ten years after the commencement of his, Joseph’s, and Joanna’s prophecies, and 1814 was reckoned upon by her for the birth of Shiloh. We omit the details of the amazing increase of her followers, and the magnificent preparations made for this event, to state the simple fact, that she was deceived by appearances, and expired on the 17th of December, in that year—having previously declared her conviction that, ‘If she was deceived, she had, at all events, been the sport of some spirit, good or evil.’ The whole case, like many others of the kind, may be explained by the daily ascertained laws of psychology. Females have been known, in states of temporary derangement, to go out naked into the streets: the voice coming told them that if they would put off their clothes they would be invisible. Such are the mis only into which the spiritual language falls, in clothes, in the symbolic tongue, are bodily states, and these are what must be put off in order that the spirit may enter a life unseen by mortal eyes. We throw out the hint, because many such illusions are abroad, and it may serve to show how the sincerity of such a woman as Joanna, ignorant of spiritual laws, may be insufficient to preserve her from the grossest errors. We omitted to say that the appearance which Joanna mistook for pregnancy was the result of a diseased condition, explained when her body was opened. The prevailing thought of her writings is the redemption of man by the agency of woman, the supposed cause of his fall. [E.R.]

SOUTHERN, THOMAS, a dramatic writer of the time of Charles II., born at Oxmantown, near Dub-

lin, 1660, died 1746. His tragedy of ‘Isabella, or the Fatal Marriage,’ is deeply pathetic, and Dryden places him in the same rank as Otway. The principal of his other productions are ‘Oroonoko,’ and the ‘Spartan Dame.’

[Birth place of Southey.]

SOUTHEY, ROBERT, was born in 1774 at Bristol, where his father was a linen-draper. In 1792, the means being furnished by his uncle, the English chaplain at Lisbon, with a view to Southey’s becoming a clergyman, he was admitted at Balliol College, Oxford. He had already gone through much miscellaneous reading, had planned epics, and written plays. His studies at the university became still more diversified: Rousseau and Godwin, and the contagious enthusiasm of the French Revolution, made him, for a time, a republican in politics, and in religion a doubter or unitarian. Southey was the most unlikely of all men to become a minister in a church whose creed he did not cordially accept. He abandoned his clerical views, began to study medicine, but gave it up in disgust, and left Oxford in 1794. The principal fruit of the extreme opinions he then held was his drama of ‘Wat Tyler,’ never published by himself. In 1794 he made acquaintance with Coleridge; and, having already published poems in conjunction with his friend Lovell, he now, with his new ally, wrote ‘The Fall of Robespierre,’ and ‘Joan of Arc.’ In 1795 Southey married, at Bristol, Edith Fricker, the sister of Mrs. Coleridge and Mrs. Lovell; but, compelled by poverty, the pair immediately separated, the poet accompanying his uncle to Lisbon. On his return he published, in 1797, his ‘Letters from Spain and Portugal.’ He was still reluctant to embrace literature as a profession. The study of law was now commenced in London, but never zealously pursued, and gradually deserted altogether for literary study and composition. His circumstances were made easier by the friendship of Mr. W. W. Wynn, who allowed him an annuity of £160 till he obtained the Laureateship. His youthful extravagances of opinion were already, to all appearance, quite extinct; if he was not even far on the way towards that admiration of aristocratic principles and of the hierarchy of the church of England, which, oddly mixed up with liberal hobbies of his own, he entertained and expressed so vehemently in the later stages of his life. In 1803 he settled himself in a house called Greta

Hall, near Keswick; and there he resided for nearly forty years, labouring at his desk with the steadiness of an attorney's clerk, and dividing his time, easily and regularly, between the tasks by which he made his bread, and the undertakings by which he hoped to gain immortality. In 1813, his 'mania of man-mending,' as he called it, being completely cured, he was appointed Poet-Laureate, chiefly through the influence of Sir Walter Scott, who himself declined the place; and the hundred a-year which it gave him was his only certain income till 1835, when Sir Robert Peel conferred on him a pension of three hundred pounds. Out of the gains of his industry, the prudent and kind-hearted man of letters supported one of his sisters-in-law for some time in his house, and the other for many years; while he brought up his family in respectability, and left at his death several thousand pounds in cash and insurances, and a large and valuable library. His sheet anchor was writing for periodicals, a kind of composition in which he was particularly skilful. The 'Annual Review' received his first contributions; he wrote the historical sections of the 'Edinburgh Annual Register' for the years 1808, 1809, and 1810; and he was a constant contributor to 'The Quarterly Review' from its commencement in 1808 till he ceased to be able to write at all. But his separate publications amounted to forty-five, of which by far the greater number were works of his own in prose and verse, his share in the others being that of editor and critic.—In his later years he relied for lasting fame on his historical works and his speculations on politics and society. But he was neither a deep or exact thinker, nor possessed of the highest requisites for historical narrative; and the only permanent popularity he gained in this field was through his *Lives of Nelson and of Wesley*. 'The Doctor,' begun to be published anonymously in 1834, has much that is clever, and a great deal that is amusing; but it contains rather the collections of a reading man than the inventions or observations of a man of genius. All Southey's prose is excellent in style, easy and idiomatic, tasteful and clear, though wanting in point and tending to verbosity. His poetical merits have been matter of keen controversy. He was a better artist than poet, lofty and just in his theory of poetical art rather than spontaneously imaginative or passionate in execution. Yet, since he deserves high honour for the constancy with which he aimed at deliberate and symmetrical performance, in a time when most other poets worked from inconsiderate impulse only, it is satisfactory to find in his best poems so much that gives pleasure to the real lovers of poetry. 'Madoc' indeed is heavy and vague; but 'Thalaba' (1801) and 'The Curse of Kehama' (1810), in spite of their extravagance of theme and their unwise experiments in rhythm, are very fascinating to imaginative readers; and in 'Roderick the Last of the Goths,' (1814), he has come nearer than any other man of our century to the tone of the epic. In 1837 the death of Mrs. Southey, after long affliction, deeply depressed her husband, already worn out by his many years of honourable toil. In 1839 he found an affectionate companion for his decline, by marrying Miss Bowles, herself a well-known authoress. After this time his memory and other powers failed rapidly; and he had been

quite imbecile for a good while before his death which took place in March, 1843. [W.S.]

SOUTHGATE, RICHARD, an antiquarian, and minister of the Church of England, 1729-1795.

SOUTHMAN, P., a Dutch painter, 1580-1646.

SOUTHWELL, N., an Eng. Jesuit, died 1676.

SOUTHWELL, ROBT., an English Jesuit, said to be descended from an ancient family of Norfolk or Suffolk, was born in 1560, and entered the order at Rome in 1578. Having come as a missionary to England, his design was discovered, and he was executed at Tyburn, February 21, 1595. He suffered with great courage. He is the author of several religious works and poems.

SOUVARROF. See SUWARROW.

SOUVIGNY, G. DE, a Fr. Hellenist, 1598-167

SOUZA, JOHN DE, a Portuguese Orientalist and state secretary, 1730-1812. See also FARIA.

SOUZA-BOTELHO, DON JOSE MARIA, a Portuguese diplomatist and man of letters, 1736-1825. His wife, known as a novelist, died 1836.

SOWERBY, JAMES, originally a drawing-master, known as a writer on botanical and mineral gical subjects, illustrated by himself, 1766-1822.

SOYE, P. DE, a Dutch engraver, 1588-1575.

SOZOMEN, HERMIAS, an ecclesiastical historian, known as a pleader at Constantinople in the 5th century. The portion of his history now extant dates from 323 to 439.

SOZOMENO, an Italian historian, 1387-1450.

SPADA, J. B., an Italian cardinal, 1597-167

SPADA, J. J., an Ital. naturalist, 1680-1774.

SPADA, L., an Italian painter, 1576-1622.

SPAENDONCK, GERARD VAN, a Dutch painter, fam. for his flowers and miniatures, 1746-18

SPAGNOLETTI, the name by which GIUSEPPE DE RIBERA is generally known in Italy. He was born at Xativa, near Valencia, in Spain, January 12, 1588. He went early to Italy, and so identified with Naples that he is commonly enumerated among the painters of that school. Dominici indeed asserts that he was born in Gallipoli, in the province of Lecce, in Naples, and that his father, a Spanish officer, married there Dora Caterina Indolli, a lady of Gallipoli, where Giusepe was born, in 1593; but according to Ceano, Ribera was born in 1588, the lady, the place, and the date, are all three wrong. As Dominici is a great authority on Neapolitan painters, nothing short of documents can supplant his account; these, however, Ribera professes to speak from, though he does not give them. He was at first the pupil of Francesco Ribalta in Spain, he then studied in Rome, eventually with Michelangelo da Caravaggio in Naples, and he not only adopted the natural style of this painter, but even surpassed him in his own manner. Lo Spagnoletto was a painter of prodigious power and facility, but of co-ordinate jealousy and arrogance. He was a prominent member of the infamous Cabal of Naples, the triumvirate headed by the Greek Belisario Corenzio, the 4th being Giambattista Caracciolo. These men were reported to have resolved to expel or poison every painter of talent who should attempt to settle in Naples: Domenichino is said to have been the victim, and they succeeded in expelling Antonio Caracci, the Cav. D'Arpino, and Guido. Spagnoletto terminated his great but scandalous career in a remarkable manner. In 1648 his beau-

daughter, Maria Rosa, became the mistress of Don Juan of Austria, and accompanied that prince to Palermo; this had such a powerful effect on the proud Spaniard that he disappeared from Naples and was never heard of more, leaving his wife and family with his large fortune at Naples. Cean Bermudez says he died at Naples in 1650, but in which he appears simply to have copied Palomino; he gives no authority. Luca Giordano was the most distinguished of Spagnoletto's scholars. — (Dominici, *Vite dei Pittori, Scultori, ed Architetti Napoletani*; Cean Bermudez, *Dizionario Historico*, &c.) [R.N.W.]

SPAGNUOLI. See MANTOVANO.

SPALDING, JOHN JOACHIM, an eloquent Swedish clergyman, author of several religious works, 1714-1804. His son, GEORGE LUDWIG, editor of an edition of Quintilian, 1762-1811.

SPALLANZANI, LAZARO, an eminent physiologist and naturalist, was born at Scandiano in the duchy of Modena, in 1729. He died in 1799. He studied at Reggio and Bologna, and he soon acquired such a great reputation for learning, that the university of the former town invited him to become professor of logic, metaphysics, and Greek. During the six years he remained there his leisure time was devoted to the prosecution of those physical researches that have rendered his name so celebrated. He became afterwards professor at Modena, and ultimately filled with great honour to himself and credit to the university, the chair of natural history at Pavia. At this latter place he had the superintendence of the cabinet of natural history belonging to the university; and with the view of raising it from the low state into which it had fallen, he travelled through various countries, as far as Constantinople and Asia Minor, and made great collections of objects in all the departments of nature, with which he enriched it. While at Vienna, on his return home, he heard that some of his colleagues, enemies of his reputation, had accused him of stealing some of the objects from the museum. His innocence, however, was clearly established; it was proclaimed by an imperial edict, and he returned to Pavia with the greatest honour and éclat. Spallanzani's writings are numerous, and he had procured for him an universal reputation as a physiologist and naturalist. His experiments on the reproduction of animals; his researches into the circulation of the blood; his works on the physiology of animals and vegetables; and his interesting accounts of the infusoria and other microscopic animals, are full of new and interesting matter, and have added much to our knowledge of the subjects of which they treat. [W.B.]

SPANGENBERG, A. T., a Moravian prelate, author of a *Life of Luxendorf*, 1704-1792.

SPANHEIMS, FREDERIC, a German theologian, professor of philosophy at Geneva, and author of several works, 1600-1649. His son, EZEKIEL, a learned wr. and statesman, 1629-1710. FREDERICK, brother of the latter, a theologian, 1632-1701.

SPARFVENFELDT, J. G., a Swedish philologist, author of a Slavonic dictionary, 1655-1727.

SPARK, T., an English divine, 1655-1692.

SPARKE, T., a puritan divine, 1548-1616.

SPARRE, ERIC, a Swedish senator, who conspired to place Sigismund III. on the throne of Poland, and was beheaded by Charles IX. 1600.

SPARRMANN, ANDREW, an eminent Swedish naturalist, was born in the province of Upland about 1747, and was instructed in botany by Linnæus. In 1765 he made a voyage to China, and again in 1772 and 1775, to South Africa. He returned from these travels laden with specimens of natural history, both plants and animals. He died at Stockholm, where he had become keeper of the museum, in 1820.

SPARROW, A., bishop of Norwich, died 1685.

SPARTACUS, a native of Thrace, who became a soldier in the Roman army, and, having deserted, was sold as a slave, and finally numbered with the gladiators condemned to destroy each other for the amusement of the people of Italy. In the year 73 B.C., about the period when Italy was overrun with bandits and its seas infested by pirates, the period of anarchy and social ruin attending the decline of the ancient republic, Spartacus with about seventy of his companions in bondage effected their escape, and resolved that, since they were to die, the scene of their struggle should be a larger one than the blood-stained arena, and that they would fall as brothers. They were joined by fugitive slaves, and others of the oppressed classes, till their numbers swelled to an army, of which Spartacus became the commander. The details of the struggle are related by Livy, Plutarch, and Appian. Spartacus had no hope of conquering the whole power of Rome, but was resolved on escaping into Germany, and bearing away with him the spoils of the cities of his late masters. He gained three great victories in succession over Lentulus, Genlius, and the consul of the preceding year, Manlius, and his course was now open to the Alps, but dazzled by these splendid successes he led his troops southward again, and the next year, B.C. 71, he was defeated by Crassus. He performed prodigies of valour, before meeting with his death in this last action, and many of his companions in arms, who became prisoners, were crucified, and set up at intervals on the road between Rome and Capua. [E.R.]

SPARTIANUS, ÆLIUS, a Latin historian, of very indifferent repute, 4th century.

SPEED, JOHN, an English historian and antiquary, was born at Farrington, in Cheshire, 1552, and was originally a tailor. His talents coming under the notice of Sir Fulk Greville, procured him an allowance which enabled him to abandon his business, and devote his time to literature. His works are—'The Theatre of the Empire of Great Britaine, presenting an exact Geography of the Kingdomes of England, Scotland, and Ireland, and the Isles adjoining;' 'The History of Great Britaine, from Julius Cæsar to James I.;' and 'A Cloud of Witnesses, or the Genealogies of Scripture,' prefixed to a new translation of the Bible in 1611. Died 1629.

SPEGEL, HAQUIN, archbishop of Upsala, known as a poet and philologist, 1645-1714.

SPELMAN, SIR HENRY, an English historian and antiquary, born at Congham, in Norfolk, 1562, died 1641. His works are considered highly valuable. His son, SIR JOHN, an archæologist and historian of Alfred the Great, dates unknown. His great-grandson, EDWARD, a classical scholar and antiquarian, died 1643.

SPENCE, JOSEPH, an accomplished scholar

and professor of poetry at Oxford, author of an 'Essay on Pope's Odyssey,' and an 'Inquiry into the Agreement between the works of the Roman Poets, and the Remains of Ancient Artists;' born 1698, accidentally drowned 1768.

SPENCER, JOHN, a learned divine and critic, author of an erudite Latin treatise on the Hebrew Laws and Rituals, born in Kent, 1630, died 1695.

SPENCER, JOHN CHARLES, Earl, formerly VISCOUNT ALTHORPE, and known as a Whig statesman at the period of the Reform Bill, was born in 1782. From 1806 to 1834 he was member for the county of Northampton, and soon after the accession of William IV. became chancellor of the exchequer. He was most remarkable for the zeal with which he devoted himself to agricultural improvements. Died 1845.

SPENER, P. J., a German divine, 1635-1705.

[Kilkoman Castle, the residence of Spenser.]

SPENSER, EDMUND, was, with one illustrious exception, the greatest of those poets whose genius brightened the last generation in the long reign of Elizabeth. Closing his life when Shakspeare was in the midst of his career, he was the earliest of the poetical stars that rose in that dazzling firmament. Indeed, although English literature had undergone great development as well as great changes during the two centuries that had intervened since the death of Chaucer, yet the long period gave birth to no poet of a very high order; and, in this view, there was truth in the assertion made by Spenser himself, that he was 'the shepherd boy, who after Tityrus his lay first sang.' The spirit of his inventions was caught from the older poetry of England, the irregular minstrelsy of the middle ages, with its chivalrous ideas, its fantastically gorgeous pictures, and (above all) its saturation in allegory. His forms, on the other hand, were prompted by those Italian studies, in which he was so well versed, and which, introduced earlier by Surrey and others, exercised so strong an influence over all the Elizabethan poetry. Spenser, without forgetting to emulate the lyrical and meditative effusions of Petrarch and his followers, aimed, in his greatest work, at doing for English literature that which Ariosto and Tasso had recently done for the literature of Italy. He designed to construct, out of the undigested elements of mediæval song, a polished and elaborate

work of art, which should resuscitate the world of chivalry, in a shape not unacceptable to a generation farther advanced in knowledge, and familiar with models higher than the old romances. The design was executed, in his 'Faerie Queene,' with a marvellous affluence of imagery at once romantic and natural, and with a delicate feeling of the beautiful such as hardly any poet has ever surpassed. If his symbolic meanings sometimes press themselves on us so closely as to cool our poetic mood, they are as often embodied in scenes and figure which, with or without regard to their hidden signification, entrance us by a spell as powerful as those of the enchanters and elves amidst whom we are brought to wander. And, though the plan of the work is too vast; though the half of it, which is all that we possess, contains Six Books, each of which is as long as most epics: yet these deal successively with successive characters and events which are sufficiently independent of one another to allow of their being studied separately, without detriment either to our comprehension of them, or to the æsthetic effect they produce. The 'Faerie Queene' is a great work, a work fairly comparable to the most illustrious of the narrative poems that grace the continental literature of Europe. And when we think of it as belonging to our Elizabethan age, we should remember, also, that it is the only work of the very highest class, excepting only the dramas of Shakspeare, which that age, with all its fertility and energy, was fortunate enough to produce. Nor did it exercise, on succeeding generations immediately succeeding the poet's time, much less of influence on the non-dramatic poetry of England, than the masterpieces of the immortal dramatist exercised on his successors. The characteristic stanza which Spenser invented for his romantic epos, was the very smallest of the points in which following poets were led, consciously or unconsciously, by the example he had set them. The events of Spenser's life, though less obscure than those of Shakspeare's, are yet known so imperfectly, that his biographers can do little more than tantalize the curiosity of their readers. He was born in London, probably in 1553, but perhaps earlier. He was descended of a good family, probably some offshoot from the house of Althorpe, and a few circumstances in his early history have suggested the supposition, that his father may have been one of the Spensers or Spencers of Hurwood in Lancashire. He was admitted of Peterhouse Hall, in Cambridge, as a sizar, in 1569, and took his degrees of B.A. and M.A. in 1573 and 1576. This is all that we know with certainty regard to his youth. In the north of England, he wrote his first considerable work, which is a set of twelve pastorals, called 'The Shepherd's Calendar,' published in 1579. These pieces are unacceptable to ordinary readers, not only by fondness for old words and phrases which always clung to the author, but by a frequent excessive rustic familiarity both in sentiment and in expression. Yet some of them in whole, and passage all of them, justify to the full the reputation gained for him. About the same time he was tempted into giving some countenance to the tempt of the learned physician Gabriel Harvey, to naturalize in England the hexameters and other prosodial forms and laws of the classical tongue.

He was already engaged in composing his epic; and, in his correspondence, mention is made of the comedies which he had written before 1580. He had become acquainted with Sir Philip Sidney, whose friendship he has commemorated in verse; and he was patronised, in early manhood, by Sidney's uncle, the all-powerful earl of Leicester. In the year last named he went to Ireland, as secretary to Lord Grey of Wilton, then appointed viceroy, and immortalized by the poet under the character of Arctagal, the personification of justice. Lord Grey's government was very short; but, while it lasted, the poet was made clerk of the Irish Court of Chancery, and received also a lucrative lease (which he sold) of abbey-lands in the shire of Oxford. In 1586 he received another grant, containing three thousand acres of land in the county of Cork, on which stood his castle of Kileolman. His residence must have been chiefly in Ireland for several years; and, on his Irish domain, by his loved stream Mulla, his great poem was principally composed. In 1590, the poet being then in England, were published its first Three Books, which are also by universal consent the finest. The allegorical design, explained in an introductory letter to Raleigh, was set forth in the title-page: 'The Faerie Queene, disposed into Twelve Books, shewing Twelve Moral Virtues.' In the Three legends which now appeared, were allegorized Chastity, Temperance, and Chastity. In 1591 appeared a volume of his minor poems, quaintly titled 'Complaints.' Its most noticeable pieces are 'The Ruins of Time,' 'The Tears of the Muses,' and a long satirical fable called 'Mother Hubbard's Tale.' Spenser was addicted to complaining; and, though he had received so much from his patrons, and showed himself attentive and shrewd in matters of business, he was poor in the latter part of his life, whether through improvidence or by reason of the disturbed state of Ireland. In the same year in which the 'Complaints' appeared, the queen bestowed on him a pension of fifty pounds per year. In 1595 he published 'Colin Clout's Come Home Again,' a poem not only very beautiful, but interesting for its many allusions to the poet's personal history. In the same year appeared a large volume of Sonnets, and the exquisite 'Epithalamion,' in which he celebrates his recent marriage. In 1596 Spenser brought to England, and published, the Fourth, Fifth, and Sixth Books of 'The Faerie Queene.' They are the Legends of Friendship, Justice, and Courtesy. All that we possess beyond these is a fragment containing Two Cantos 'Of Mutability.' The Six Books required for working out the design are traditionally said to have been lost in a voyage from Ireland; but there is great reason for doubting whether the poem was ever in reality completed. The only other work of the poet that calls for notice is his prose treatise, 'A View of the State of Ireland,' written or finished in 1596, but never published till 1633. It is a precious book, and an excellent and vigorous specimen of old English prose. In September, 1598, he was appointed sheriff of Cork. Perhaps his office caused the tragical catastrophe which hastened his end. The rebellion of Tyrone broke out immediately, Kileolman castle was burned, and a new-born child of the owner perished in the flames. He and his wife escaped, and sought

shelter in London. He died there, on the 16th January, 1599. According to Ben Jonson he perished of want; and the fact may have been so, although it seems improbable. His funeral, at all events, was splendidly celebrated by the earl of Essex; and his grave is in Westminster Abbey, next to that of Chaucer. [W.S.]

SERLING, OTTO, a physician and naturalist of Hamburg, 1602-81. His son, of the same name, professor of jurisprudence and history, 1634-1715.

SPIEGEL, H., a Dutch poet, 1549-1612.

SPIELMANN, JAMES REINHOLD, an eminent professor of chemistry at Strasburg, 1722-1783.

SPIGELIUS, or VAN DEN SPIEGHEL, ADRIAN, a Flemish medical writer, 1578-1625.

SPIILBERG, J., a Dutch painter, 1619-1690.

SPIILLER, JOHN, a sculptor of promising talents, who studied under Bacon, and executed the statue of Charles II. for the Royal Exchange, born in London, 1763; died of consumption, 1794.

SPINCKES, N., a nonjuring divine, 1654-1727.

SPINELLI, F. M., prince of Scala, and a philosopher of the Cartesian school, 1686-1752.

SPINELLI, M., an Italian historian, 1230-68.

SPINELLI, N., a Jesuit of Naples, 14th cent.

SPINELLI, or SPINELLO, a family of Italian artists who flourished in the 14th and 15th centuries, one of whom is said to have painted a figure of the devil so hideous, that it haunted him in his dreams, and occasioned a singular conference with the presumed original. This singular story is related by Vasari.

SPINOLA, AMBROSE, MARQUIS DE, descended from a noble family originally of Genoa, was born in 1571, and entered into the military service of Spain at the period of the war in the Netherlands. His first great exploit was the reduction of Ostend, on the 14th September, 1604, after a siege of more than three years, and the loss of 130,000 men under previous commanders. This victory was rendered the more remarkable by the circumstance, that Maurice of Nassau, at the head of an equal number of troops, had made repeated efforts to raise the siege, and Spinola, before his last successful assault on the city, had sustained fifteen terrible combats with him: such an achievement caused his name to resound through Europe, and he was soon after appointed commander-in-chief in the Netherlands. For the next twenty-six years the name of Spinola appears always foremost in the annals of that protracted struggle, as the hero of the catholic party, and the house of Austria. We may mention among his exploits the capture of Juliers 1622, and of Breda in 1625. He was recalled from this command in 1628 through the influence of intrigues at Madrid, and was subsequently employed in Italy against the French. His death was hastened by grief at the shameful manner in which his glory was betrayed in this new enterprise, and he expired at Castel-Nuova di Scrivia, Sept. 25, 1630. [E.R.]

SPINOLA, FREDERICK, brother of the preceding, and commander of the Spanish fleet of the Low Countries, killed in a naval action 1603.

SPINOZA, BARUCH, or BENEDICT, born in Amsterdam, 24th November, 1632; died in his solitary apartment at the Hague, 24th February, 1677:—it will astonish many to observe that this illustrious Thinker, whose name is the mark of an Epoch in Philosophy, and whose reputation is

once more in the ascendant in a country like Germany, attained no greater age than forty-five. But paucity of years, was not the sole obstacle, of which—in estimating Spinoza—the just critic requires to take account. His parents were Portuguese Jews, rich and of weight in the synagogue; and the young Inquirer had to bear their frowns, as well as that terrible excommunication of the Rabbis—the formula *schammatha*. Disasters so grievous could not drive him from his Integrity, but they naturally disturbed very sadly the course of his meditations, depriving him of leisure, and inflicting nearly the keenest of anguish. The greatest and the wisest of his time, however, loved him: he enjoyed the respect of VAN ENDE and the DE-WITTS: and it may be imagined, how inestimable, in such circumstances, the solace of such affection! Spinoza acted like the bravest of men. Resolute to live with meditation, he acquired the art of polishing lenses, that so—like St. Paul—he might supply, by the labour of his hands, his material wants: and, thus raised above the farther shock of circumstance, he rented a single chamber from Van den Spuyk, an honest burgher of the Hague, wherein he henceforth lived and meditated, and produced the wonderful works which so stunned all Europe. To that little room the student must needs go back if he would discern Spinoza: and he must further add, that the feeble, emaciated, and sickly form he sees writing there, had learned so well the value of independence, and had so felt the delight of searching for Truth, that, although sustaining nature on some such sum as our twopence or threepence a-day, he declined to be drawn from his retirement by munificent offers of patronage—resisting the solicitations even of the world-renowned PRINCE of CONDE.—In proceeding with the arduous endeavour to explain the system of Spinoza, we bespeak the forbearance of scientific readers, and the gravest attention of all others: forbearance, because we must write popularly; and attention, because the writings we are about to analyze are the true source of so much subsequent Philosophical History. We shall divide our exposition into several distinct sections.—I. Like his early and only master Des Cartes, Spinoza recognized the necessity of first laying down his Method of Inquiry, or determining by prior investigation the road which alone seemed likely to lead to Truth. There are, he says, three kinds of *knowledge* commonly so called;—the *First*, consisting of mere hearsay, and of vague experiences and impressions passively received—making up those indiscriminate beliefs, and confused images, which are represented by the opinions and prejudices of the vulgar. Of such *knowledge*, the philosopher makes no account.—The *Second*, is of a higher aim; it arises when we seek the relations of things or of phenomena; when after comparing objects and classing them by their resemblances, we ascend to the general Law expressing their apparent place and function in the Universe. But this knowledge is also vitiated and incomplete; *vitiated*, because we rarely discern or apprehend an object precisely as it is—being misled by the imperfection of our Senses: *incomplete*, because although it may lead us to a Law, it does not explain or account for Law itself.—The *Third* kind

of knowledge alone possesses absolute certainty and alone is worth the pursuit of the philosopher. It is born when we discern some Absolute Principle, from which, by rigorous deduction, the character of the Universe, the phenomena of Mind and Matter, the nature of Man and God, can be made to flow. Then we are superior to sense and illusions; Experience with its deceits and phantasms, and Reasoning merely discursive, which can never lead to the absolute goal, are banished from the domain of Metaphysics. If, indeed, it belonged to the Human Faculties to obtain this primary and all-comprehending principle, Spinoza would be right; but he has not brought out the *Organ* by which these Faculties ever reach that elevation from which he demands that Inquiry start. His method is thus defective at the outset, and immeasurably inferior to that of Des Cartes, who—not thinking of the desirable, but of the real and practicable—lays down the moveable axiom, that Philosophy must ever begin in the certainties of *Consciousness*.—II. Search for the adequate primary Principle of Philosophy. Spinoza quickly and easily reaches the Idea of *Existence in itself*, or as it is termed by him the Idea of SUBSTANCE—that which *stands under* phenomena. What is this Idea? How can we define Substance? It is infinite, it is perfect else it were limited and determined by something else, and would not be the ultimate principle of Existence. But it must have attributes, or intelligible characteristics? Spinoza speaks of two *Extension and Thought*, and the discussion of these occupies his system. It was suggested by LEIBNITZ afterwards, that our Idea of Substance involves also the Idea of *Cause*, or of *Force* or *Activity*—a criticism whose propriety is unquestionable, and which of itself goes far to invalidate those terrible fatalistic conclusions, which, as we shall see, inhere in the philosophy we are expounding. But apart from objections like these, this is the fundamental one—whence drew Spinoza his knowledge of this Idea of Substance and its attributes? By what process, or in what manner can he convince any one of his right to that stupendous *postulate*? Can he indicate any process different from an *appeal to Consciousness*? Alas! yet, the system reared on that postulate, denounces and over-rides every other truth of which *Consciousness* testifies! In this is the weakness of such efforts; and it is the ruin of all merely empirical as well as of *a priori* schemes. The Materialist who owns no mental phenomena except what he can gather from external nature, or explain by its schemes and appearances, seldom reflects that—seduced by seeming clearness—he is really employing *derivative* and *secondary* certainties (if the expression allowable) for the purpose of invalidating the *primary* one.—III. Let us contemplate now, the Fabric reared on this postulate by Spinoza: not where certainly, even in the strictly deductive sciences, is the reasoning more impregnable and complete. Allow the postulate, and before you a mailed combatant, whose armour opens not to the thrust of your arrows! This was the triumph of Spinoza's massive intellect, as well as the secret of that power by which he so easily crushed opponents.—SUBSTANCE—this infinite substance or reality of all things—must, because

ts infinity, have an infinite number of Attributes or Qualities,—else were it not infinite. Of these, however, *two* only are known, or manifested to us by the Universe, viz.:—*Extension and Thought*. But each Attribute of an Infinite Substance, must in itself be Infinite—infinite in *energy*, though limited in *quality*: Extension, as Extension, can have no bounds; and Thought, as Thought, must have the faculty of Infinite expansion, owning no limits either in Space or Time. Such the attributes that we define Substance; if such attributes did not exist, or were not cognizable, the Infinite Absolute Substance, would be a mere negation, unknown and unknowable. Turn now to the separate attributes. Through what is *Extension* cognizable? Not in itself:—Infinite Space, is a word, a term without meaning, a simple negation. But as Substance has attributes, so Extension as an attribute, has *modes* or manifestations. The modes or manifestations of Extension—manifestations, through which alone we know—are the forms which crowd it, and the motions which diversify it. Each of these is Finite: they are therefore multiple; and by the infinity of their numbers, they come, in their totality, to equal the infinite attribute they represent. This will at once make plain the 16th proposition of the *Ethics*, '*It is the nature of Substance to develop itself necessarily by an infinity of attributes, which also are infinitely modified*.' Again with regard to *thought*. Has not Thought its modes? For otherwise how could it be known? As Space is shown forth through Form, Thought is manifested through Ideas. Ideas are its modes, and they too are in number infinite. The VARIETY of Things, therefore, is no longer a mystery: *it even belongs to their UNITY*: so that the problem of philosophy is solved. Before us, is this ineffable, and unapproachable infinite and absolute SUBSTANCE, unfolded through its Infinite attributes, which again are themselves unfolded and rendered apprehensible by that infinitude of modes—Forms and Ideas—which make up the Universe. The student will not fail to detect the true parentage of much of the scheme of SCHELLING. Spinoza further declares, that as every mode of Extension must correspond to a mode of Thought, *the order and connection of IDEAS, is necessarily the same as the order and connection of THINGS*,—surely a pretty close anticipation of the *Philosophy of Identity*.—IV. It now only remains, that we state accurately the conclusions accepted by Spinoza and inseparable from his system, regarding MAN and GOD. It is easy to see, that the remorseless logic of Spinoza, could admit no Deity, apart from his Absolute Substance. God, according to this philosophy, must in essence be that Substance; they are convertible Names, with the same Attributes. But in justice to that great Thinker, the student must be warned, not to attach to the word *substance*, conceptions of Inertness, absence of understanding, or of Will. If Spinoza has said that deity is void of understanding, he meant only deity absolutely, just as he would have so spoken of Substance,—that is, treated without regard to its Attribute. We are dealing, it must never be forgotten, with a consummate logician, whose deductive method has no flaw; and he necessarily begins first with the most abstract conception—

passing down by regular steps, from almost inaccessible heights. Rather, the World, all Things are God; the Material Universe, but also Intelligence: every firmament that shines, every thought that pierces the serene, every emotion that agitates the heart, every virtuous and heroic aspiration that raises humanity above circumstance and the grave—these, ay, and manifestations, which human eye nor ear has either heard or seen—these, are *fulgurations* of Divinity—gleams of the character of that Essence which is All! Surely we have no *Atheism* here; but a loftiest, however mistaken, *Pantheism*. It is said quaintly by NOVALIS that Spinoza was 'intoxicated with God!' As to MAN, the conclusions are too sorrowful. His Understanding is a mere succession of these modes of *Thought*; his Soul a more exalted or comprehensive Mode: and, as to every mode of Infinite Thought there is a corresponding mode of Extension, each soul has a body which it animates, or of which it is the Idea. No *personality* here; not a shred of human Liberty: Body and Soul, each a mere expression, impersonal and transient, of one phase of that huge all-comprehending Development! Spinoza saves, indeed, that form of Morality within which he lived himself. Part of the Infinite, let us recognize our blessedness. To live, to enjoy in plenitude, we must concentrate our desires around one aspiration—the longing to possess God, which means to love Him, and thereby to live in Him.—How poorly, this bare outline represents Spinoza! Has the student who peruses these lines, ever, under the dark vault of Heaven, or at the hour of midnight, experienced perplexity alike of Head and Heart, as he questioned the Mystery of Things? So, likewise, did the young and heroic Jew of whom we write; and the foregoing was his solution. It must in nowise be forgotten that the Philosophy of which, through mere exercise of Intellect, we give an account, was dug by this remarkable man, from the mine of his profound Nature; what we describe, he created; it is for us to examine and contemplate only, but he *believed*; it gave him dignity and integrity through Life, and did not impair his courage at a lonely Death. [J.P.N.]

SPIRITI, S., an Italian historian, 1712-1776.

SPIRITO, L., an Italian poet, born 1436.

SPITTLER, BARON VON, a minister of state and historian of Wurtemberg, 1752-1810.

SPITZNER, J. E., a Ger. naturalist, 1731-1806.

SPIZELIUS, T., a Lutheran divine, 1639-1691.

SPOFFORTH, R., an Eng. musician, 1768-1826.

SPOHN, FREDERIC AUGUSTUS WILLIAM, professor of philosophy and ancient literature at Leipzig, born 1792, died prematurely when preparing to publish a work on hieroglyphics, 1824.

SPOLVERINI, HILARION, a Italian painter, famous for his battle-pieces, 1657-1734.

SPOLVERINI, MARQUIS, an Italian administrator and writer of poetry, 1695-1763.

SPON, CHARLES, a French physician and Latin poet, 1609-1684. His son, JAMES, a physician, antiquarian, and traveller, 1647-1685.

SPONDE, HENRY DE, in Latin *Spondanus*, a learned French prelate and ecclesiastical historian, 1568-1643. His brother, JOHN, a classical scholar and editor, 1557-1585.

SPONTINI, GASPARO, a composer of sacred

music and operas, was born at Majolatti, in the Roman states, 1778, and educated at Naples. He visited Paris in 1803, and in 1807 became director of music to the empress Josephine. This was followed in 1810 by his appointment as director of the Italian opera, which he exchanged in 1820 for that of chapel-master at Berlin, where he remained till 1842. Died in Italy 1851.

SPONTONI, C., an Italian historian, 1552-1610.

SPORENO, J., an Italian historian, 1490-1560.

SPOTSWOOD, or SPOTTISWOOD, JOHN, archbishop of St. Andrews, descended from an ancient Scottish family, was born in the county of Edinburgh 1565. He accompanied James VI. to England, who raised him to the primacy, and made him one of the privy council for Scotland the same year. He laboured greatly to bring the Church of Scotland to the episcopal discipline, and became chancellor of that kingdom in 1665, two years after he had crowned Charles I. at Holyrood. Died 1639. SIR ROBERT, his second son, wrote a History of the Scottish Church, and was put to death by the Covenanters.

SPRAGGE, SIR EDWARD, a naval commander, who distinguished himself against the Dutch admirals, Ruyter and Van Tromp, and was accidentally drowned 1673.

SPRANGHER, BARTHOLOMEW, a Flemish painter, whose principal work is *The Last Judgment*, 1546-1623.

SPRAT, THOMAS, a learned English prelate, one of the first fellows of the Royal Society of London, of which he wrote a History; he was also the friend and biographer of the poet Cowley; born in Devonshire 1636, died 1713.

SPRENGEL, K., a Germ. botanist, 1766-1833.

SPRENGEL, M. C., a Germ. hist., 1746-1803.

SPRENGER, B., a German agriculturist and writer on the Cultivation of the Vine, 1724-1791.

SPRENGER, P., a Germ. historian, 1735-1806.

SPURSTOW, WILLIAM, minister of Hackney, near London, at the period of the civil wars, author of religious works, and of attacks on episcopacy, published under the name of *Smectymnus*; d. 1666.

SPURZHEIM, JOHN GASPARD, a famous name in the history of phrenological science, was born at Longwich, near Treves, in 1776, and became acquainted with Dr. Gall at Vienna, where he studied medicine. From 1805 till 1813 he was the constant companion of Gall in his travels and scientific researches, and subsequently became an active promulgator of the new doctrine in England and France. He died in 1832, a few months after his arrival in Boston, United States. One of his distinct claims is that of having demonstrated the fibrous structure of the brain; but his works are too well known to require particular description.

SQUARCIONE, FRANCESCO, a painter of the Venetian school, and virtuoso of art, 1394-1474.

SQUIRE, S., a learned prelate, 1714-1766.

STAAL, MARGUERITE JEANNE CADIER DE LAUNY, Baroness De, the daughter of an artist of Paris, and, previous to her marriage, the attendant and the confidential friend of the duchess of Maine. Her faithfulness to the latter led to her own imprisonment in the Bastille, on emerging from which she married M. de Staal, an officer of the Swiss guard. The interesting *'Memoirs of Her Life'* were written by herself; 1693-1750.

STABEN, H., a Flemish painter, 1578-1658.

STACE, P. P., or STATIUS, a Latin poet, 61-96.

STACKHOUSE, JOHN, nephew of the celebrated divine, distinguished as a botanist, d. 1819.

STACKHOUSE, THOMAS, a minister of Shropshire, author of *'A General View of Ancient History, Chronology, and Geography,'* dates unknown.

STACKHOUSE, THOMAS, a well-known religious writer and theologian, was born in 1680. He became minister of the English Church at Amsterdam, and finally rector of Benham Valence in Berkshire, where he died in 1752. His principal work is a *'History of the Bible.'*

STADION, PHIL., Count, a diplomatist in the service of Austria, time of Napoleon, 1768-1824.

STADIUS, J., a Flemish astronomer, 1527-79.

STADLER, M., a Ger. mus. compos., 1748-1860.

STAEL, ANNE LOUISE GERMAINE DE, was born in 1766 at Paris, where her father, M. Necker, afterwards the celebrated minister of France was then a banker's clerk. At the age of twenty she became the wife of the Baron De Stael-Holstein, the Swedish ambassador at Paris; and took strong literary turn which she had already exhibited, now developed itself still further, and produced, the course of her life, a series of works embracing almost every sort of composition in prose or verse. At first sanguine in the cause of the revolution she soon became warmly interested in the sufferings of its victims, especially the queen, whom she had the courage to defend in print. In 1800 she entered on the course of speculation, in which she was afterwards strongest, by publishing her essay *'De La Littérature, considérée dans ses rapports avec les Institutions Sociales,'* and her very equivocal novel *'Delphine'* appeared in 1802. In the year her husband died. Madame De Stael was much too independent to be acceptable to Napoleon who banished her from Paris, and afterwards ordered her to confine herself to her chateau Coppet on the Lake of Geneva. From 1803 to 1815 she travelled much in Germany, Italy, in England, and visited Sweden and Russia. Her *'Corinne,'* in form a novel, and the most eloquent of all tributes to the antiquities and scenery of Italy, appeared in 1807. Her most ambitious work, *'De L'Allemagne,'* printed at Paris in 1810 was seized by the police, and only published in London some years later. After the second restoration she lived chiefly in Switzerland, where she contracted a secret marriage with M. De Roess. She died in 1817. After her death, useful contributions were made to the history of the times, the publication of her *'Considérations sur la Révolution Française,'* and her *'Dix Années d'Exil.'* [W.S.]

STAEL-HOLSTEIN, ERIC MAGNUS, Baron De, a Swedish diplomatist, born 1725, minister plenipotentiary at the court of France from 1770 to 1799, died 1802. He married the celebrated daughter of Necker in 1786, and assisted passively in the French revolution till his recall.

STAFFORD, a noble family belonging to the Norman aristocracy of England. The principal historical names are:—HUMPHREY, a partisan of Henry VI., created duke of Buckingham 1447. HENRY, his grandson, a favourite of Richard II. beheaded 1483. EDWARD, beheaded on an accusation of treason by Henry VIII. 1521.

STAFFORD, ANTHONY, a learned writer, author of 'The Life and Death of Henry, Lord Stafford,' died 1641.

STAFFORD, WILLIAM HOWARD, earl of, who received the title by marriage with the heiress of that house in 1640, was the second son of Thomas, duke of Norfolk. He was executed in connection with the gunpowder plot 1680.

STAHL, G. E., a German chemist, 1660-1734.

STAINER, or STAYNER, SIR RICH., a naval officer, time of Cromwell and Charles II., d. 1662.

STAIR. See DALRYMPLE.

STALBENT, A., a Flemish painter, 1580-1660.

STALHENS, J., a Fr. theologian, 1595-1681.

STANCARI, F., an Ital. Hebraist, 1501-1574.

STANCAIRI, V. F., an Italian mathematician and man of letters, 1678-1709.

STANBRIDGE, JOHN, a learned schoolmaster and grammarian, known from 1481 to 1522.

STANDISH, FRANK HALL, a gentleman of fortune, known as an elegant writer and connoisseur in the arts, author of a 'Life of Voltaire,' 'The Shores of the Mediterranean,' 'Notices on the Northern Capitals of Europe,' 'Seville and its vicinity,' and 'Poems,' 1798-1840.

STANHOPE, a noble English family, principal of whom are:—JAMES, the first earl, who distinguished himself both as a diplomatist and military officer in the wars of William III., born in Hertfordshire 1673, died 1721. CHARLES, grandson of the preceding, and third earl, born 1753, was distinguished as a man of science by several valuable inventions, among which are the printing press, known by his name, a calculating machine, vessel to sail against wind and tide, locks for canals, a method for securing buildings from fire, and a monochord for tuning musical instruments. At the period of the French revolution he openly avowed republican sentiments, and even laid aside the insignia of the peerage. By his first wife, daughter of the great earl of Chatham, he had three daughters, one of whom is the subject of the following notice; his second wife, daughter of Mr. Henry Grenville, bore him three sons; died 1816.

STANHOPE, LADY HESTER, whose remarkable life in Mount Lebanon may be numbered among the most interesting romances of history, was born 1766. Her father was the celebrated Lord Stanhope, and her mother a daughter of the great Earl of Batham, consequently she was niece to William Pitt, in whose house she resided, acting as his private secretary, and sharing in all his confidences. Biographers are silent on the causes which influenced her fate, after the death of her uncle, but they were principally two:—First, the disgust of her high nature for European society, created by her knowledge of the secrets of diplomacy, and the blow deceitful life of all around her; and secondly, the mystic influence which prevailed for about ten years at that period, and of which history takes little note. It is certain, however, that from 1794 to the death of Pitt, startling announcements were continually made by private letters to the minister, and prophecies were actually fulfilled both in his country and France: it is probable that these circumstances, exaggerated by her unrestrained imagination, and her longing for the free simplicity of nature, finally determined Lady Stanhope to leave England. William Pitt having recom-

mended his niece to the care of the nation, she received a pension of £1,200 per annum, with which, after his death, she commenced a life of great state in the East, and acquired immense influence over the Arabian population. Her manner of life, and romantic style are well known; we will only add, therefore, that it is unfair to judge her character from the reports of English travellers, for she was one of those high-souled women who not only refused allegiance to the empty mannerisms she had cast off, but was well able to answer every fool who forced his way into her presence according to his folly. She never married, but adopted the habit of an Arabian cavalier, and under those bright skies, rode and dwelt where she pleased, virtually queen of the deserts, and mistress of the ancient palaces of Zenobia. Her permanent abode was in Mount Lebanon, about eight miles from Sidon, where she died in 1839. [E.R.]

STANHOPE, P. D. See CHESTERFIELD.

STANISLAUS, a bishop of Cracovia, k. 1079.

STANISLAUS, AUGUSTUS, the last king of Poland, was a son of Count Stanislaus Poniatowski, and of the princess Czartoryska. He was born in Lithuania in 1732, and was advanced to the throne by the intrigues of Catharine of Russia, aided by another of her favourites, the Polish traitor, BRANESKI, in 1764. It is hardly necessary to mention that the crown of Poland was elective, and that the people had been kept in a state of serfdom under a powerful aristocracy,—circumstances exceedingly favourable to the Russian designs, and productive at last of the infamous partition of Poland, and the virtual effacement of that ancient kingdom from the map of Europe. The first partition of Poland between Russia, Prussia, and Austria, took place in 1773, and the second, after a long struggle, in 1792, when Kosciusko was defeated by the Russian general, Suwarrow. Stanislaus abdicated his vain title in 1795, and took up his abode in Russia, where he died, in receipt of a pension, the proper reward of his career, in 1798. [E.R.]

STANLEY, EDWARD, bishop of Norwich, a younger son of Sir John Thomas Stanley of Alderley, in Cheshire, born 1770, author of a 'Familiar History of Birds,' published in 1835. He had been upwards of thirty years rector of Alderley, when he was elevated to the see of Norwich through his connection with the Whig party in 1837; d. 1849.

STANLEY, JOHN, a musical composer, 1713-86.

STANLEY, THOMAS, the name of three accomplished men of letters, the first of whom, SIR THOMAS STANLEY, of Laytonstone, in Essex, wrote poems, and was knighted by Charles I. The second THOMAS, and most famous of the three, was his son; he was a master of philosophy and polite learning, and a friend of William Fairfax, the translator of Tasso; his works are 'The History of Philosophy, and Lives of the Philosophers,' and some original poems, and translations from the Greek, born 1625, died in London, 1678. The third of the name was a son of the latter, who translated when very young the Histories of Ælian.

STANLEY, WM., a dignitary of the church, author of 'The Devotion of the Church of Rome compared with the Devotion of the Church of England,' 1647-1731.

STANSEL, V., a German astronomer, 1621-90.

STANYHURST, RICHARD, an Irish clergyman, known as a poet and historian, 1546-1618.

STANZIONI, M., an Ital. painter, 1585-1656.

STAPEL, JOHN BODÆUS A., a Dutch physician and botanist, honoured by Linnæus, d. 1636.

STAPLETON, SIR ROBERT, a native of Carlton, in Yorkshire, who fought in the interest of Charles I. at the battle of Edgehill, 1642, and adhered steadfastly to the royal cause; he wrote several dramatic pieces, and translations of the classic poets, died 1669.

STAPLETON, THOMAS, Roman Catholic professor of divinity at Louvain, known as a learned controversial writer, 1535-1598.

STARCK, SAMUEL, a native of Pomerania, distinguished as a theologian and Oriental scholar, 1640-1697. His grandson, JOHN AUGUSTUS, a theologian, Orientalist, and historian, professor at St. Petersburg, 1741-1816.

STARK, W., a London physician, died 1769.

STARINA, J., an Italian painter, 1354-1406.

STAROWOLSKI, SIMON, a Polish ecclesiastic and historian of his country, died 1656.

STASZIC, S., a Polish patriot, 1755-1806.

STATIUS, PUBLIUS P., a Roman poet, 61-96.

STAUNTON, SIR GEORGE LEONARD, an Irish physician, who rose to the post of attorney-general in Grenada, and having attached himself to Lord Macartney in the character of secretary, was afterwards known as a diplomatist, and his intimate adviser; his principal services were displayed in the arrest of Major-general Stuart, commander-in-chief of the Madras army, in treating with Tippoo Sultan, and in the embassy to China; of the latter he published an interesting account in 2 vols. 4to, 1797. Born in Galway, 1737; died 1801.

STAUPITZ, J., a German theologian, d. 1527.

STAVELEY, T., a learned antiquary, d. 1683.

STEBBING, HEN., a friend of Bishop Sherlock, known as a writer in the Bangorian controversy, and the attack on Warburton's Legation, d. 1763.

STEDMAN, J. G., a Scotch officer in the Dutch East India service, author of an interesting narrative, 1745-1797.

STEELE, SIR RICHARD, was born in 1671 at Dublin, to which his father had gone from England as secretary to the Lord-Lieutenant. At the Charterhouse School in London, he formed a life-long intimacy with Addison. Steele next went to Oxford, but, bent on being a soldier, and discouraged by his family, eloped and enlisted in the Horse Guards. His officers, knowing him to be a gentleman, and becoming aware of his attractive social qualities, procured an ensign's commission for him; and, in the gay company of the mess, he exhibited and cherished his good-hearted liveliness, his inclination for dissipated extravagance, and the sanguine flightiness which in later life made him a rash and unsuccessful speculator. Intervals of repentance for his follies gave birth, while he was in the army, to his tract 'The Christian Hero;' but he dealt more in play-writing, and produced lively and popular comedies, which had the merit (rare on the English stage for some time previously) of being morally correct. His first piece, 'The Funeral, or Love A-la-mode,' was acted in 1701, 'The Tender Husband' in 1703, and 'The Lying Lover' in 1704. His only subsequent drama

('The Drummer' being really Addison's) was 'The Conscious Lovers,' which did not appear till 1722. In 1709, by starting 'The Tatler,' he had the great merit of striking out a new kind of literary composition; and his large share in this first periodical, the active part he took in the 'Spectator,' and his still more active authorship in 'The Guardian,' place him second only to Addison among the Essayists. Before commencing 'The Tatler' he had become useful as a political pamphleteer on the Whig side, and was appointed 'Gazette' writer, and afterwards a commissioner of stamps. On the fall of the Whig ministry in 1710, the Tories, anxious to obtain the aid of his pen, allowed him to keep his place. But Steele, honourable true to his party, refused to write for their enemies, and, not content with silence, he insisted in 1711 on attacking the ministry in 'The Guardian,' and resigned his commissionership. He was then brought into the House of Commons, but expelled for matter relating to the succession to the crown contained in 'The Englishman' and 'The Crisis.' After the accession of George I., he again sat in parliament, was knighted, and appointed a commissioner for the forfeited estates in Scotland. He continued to write on politics. His 'Whig Examiner' has been noticed in the memoir of Addison. In his latest years he was poor and embarrassed and he died in Wales in 1729. [W.S.]

STEEN, F. VAN, a Flemish painter, born 1600.

STEEN, JAN, a Dutch painter, 1636-1689.

STEENWYCK, HENRY VAN, a Flemish painter, remarkable for his skill in delineating the interiors of churches and temples, 1550-1604. His son, of the same name, distinguished in the same line of art, was a friend of Vandyck, who introduced him to Charles I. He was born in 1589, and died in London at an unknown date. Another STEENWYCK, celebrated as a painter of still life, was born at Breda about 1640.

STEEVENS, GEORGE, the well-known commentator on the works of Shakspeare, was born Stepney 1736, and first appeared as an editor of the immortal dramatist in 1766. In 1770 he associated his labours with those of Johnson, and the joint edition appeared in 10 vols. 8vo, 1773. In 1793 it was reprinted in 15 vols., the criticisms of Malone having appeared in the interval. Steevens died in 1800.

STEFANI, P. DE, the earliest sculptor of the Neapolitan school, about 1228-1310. His brother THOMASO, a painter, was b. at Naples abt. 1230.

STEFANO, called *Il Fiorentino*, an Italian painter, grandson and pupil of Giotto, 1301-1370. THOMASO, his supposed son, called, from his style, *Il Giotto*, 1324-1356.

STEFFANI, AGOSTINO, a musical composer, claimed by the Germans as a native of Leipzig, and by the Italians as a countryman of theirs, was born in 1665, and was first known as a chorist at St. Mark's at Venice. He composed several operas, but the most celebrated and numerous of his works are his chamber duets. Died 1729.

STEFFENS, HEINRICH, a naturalist, miscellaneous wr., and patriot of Copenhagen, 1773-1815.

STEIBELT, D., a Germ. composer, 1760-1815.

STEIGUER, N. F. DE, a Swiss patriot, 1729-1800.

STEIN, CHRISTOPHER GODFREY DANIEL, a geographer and compiler, prof. at Berlin, 1771-1815.

Sir Richard Steele.

William Shakespeare.

Titian.

Sir Anthony Vandypke.

STEIN, G. W., a Germ. accoucheur, 1737-1803.
 STEIN, H. F. KARL, Baron Von, a Prussian statesman and enemy of Napoleon, was born at Cassau 1757, and became minister of finance and trade at Berlin on the death of Struensee 1804. Having been exiled from Prussia by the influence of the dictator of Europe he retired to Prague, and in the disastrous year 1812, was with the emperor Alexander at St. Petersburg. He lived in privacy after the peace till 1827, when political circumstances recalled him to public life; died 1831.

STEINBART, G. S., a Ger. philos., 1738-1809.
 STELLA, a family of French artists:—FRANCIS, painter of altar-pieces, 1563-1605. JAMES, the most eminent of the family, a painter, designer, and engraver, 1596-1657. FRANCIS, brother of the latter, 1603-1647. ANTOINE, their nephew, painter and engraver, 1630-1682. CLAUDE, sister of Antoine, 1634-1697. FRAUCOISE, a second sister, dates unknown. ANTOINETTE, a third sister, an engraver, 1635-1676.

STELLA, F. A., a Venetian writer, 1757-1833.
 STELLA, J. C., an Italian poet, 16th century.
 STELLINI, J., an Italian moralist, 1699-1770.
 STELLUTS, F., an Ital. naturalist, born 1577.
 STENBOCK, MAGNUS, Count, a Swedish general and patriot, period of Charles XII., was born in 1664, and first bore arms under the princes of Valdeck and Baden, in the coalition against Louis XIV. He joined the army of Charles XII. at the commencement of his campaigns, and in 1701 participated in the glorious victory of Narva. He then followed Charles in his meteor-like progress through Poland, and when, in 1707, the Swedish hero halted in Saxony, meditating where next he should lead his veterans, Stenbock was made governor of Scania; in which post he gained the confidence of the people by his firm administration of justice. In 1709 Charles was defeated by Peter the Great at the battle of Pultowa, and soon found himself shut up in Bender, on Turkish territory. The Danes, who had been defeated by Charles at the beginning of his career, took advantage of this crisis to break through their engagements, and send an invading army against Scania, where they took the town of Helsingburgh. Stenbock rushed to the field at the head of the Swedish militia, consisting partly of undisciplined peasants assembled in haste, and rivalling his absent sovereign in glory, gave the Danes a bloody defeat; he even followed the enemy into Germany, captured their cities, and gained a second great victory over the combined Saxon and Danish army. This, however, was the limit of his success. Listening to perfidious counsels, he penetrated into Holland, and the Russians having now joined his other enemies, he was at last compelled to capitulate. Stenbock became the prisoner of the Danes in 1712, and died in a miserable confinement in 1717. [E.R.]

STENGEL, L., a German physician, 1523-87.
 STENO, M., a doge of Venice, 1400-1413.

STENO, NICHOLAS, in Latin *Stenonius*, a famous anatomist, author of professional and theological works, born at Copenhagen 1638, died 1687.

STEPHANUS ATHENIENSIS, a Greek physician and professor of Christianity, 7th century.

STEPHANUS BYZANTINUS, a Greek grammarian and lexicographer, 5th century.

STEPHEN, the name of several saints:—
 1. *The Jewish martyr*, stoned shortly after the crucifixion of the Saviour, as recorded in Acts.
 2. *The first pope* of the name. 3. *The first king of Hungary* of the name. 4. *Stephen of Muret*, founder of a religious order in France, died 1124. 5. *An English abbot*, surnamed Harding, founder of several monasteries, died 1134.

STEPHEN, several popes of Rome:—STEPHEN I., reigned 253-257. STEPHEN II., died four days after his election, 752. STEPHEN III., successor of the latter; in his time Pepin was invited into Italy to subdue Astolphus, king of the Lombards, and the foundation was laid for the temporal sovereignty of the papacy, died 757. STEPHEN IV., reigned 768-772. STEPHEN V., who crowned Louis, son of Charlemagne, emperor, reigned seven months only, 817. STEPHEN VI., reigned 885-891. STEPHEN VII., remarkable chiefly for his disgraceful treatment of the corpse of Boniface V., succeeded that pontiff in 896, and was strangled by his predecessor's friends 897. STEPHEN VIII., predecessor of John, son of Marozia, 929-931. STEPHEN IX., another pope of the period in which Marozia figured, 939-942. STEPHEN X., an advocate for the marriage of the priests, and distinguished by his efforts to unite the two churches, reigned only a few months, 1057-1058. Sometimes only nine popes of this name are reckoned, Stephen II. being omitted.

STEPHEN, four kings of Hungary:—STEPHEN I., introduced Christianity into that country, and published a body of laws; he is numbered with the saints, and gives his name to the famous crown, reigned 997-1038. STEPHEN II., reigned 1114-1131. STEPHEN III., succeeded 1161; he aided the emperor, Manuel Comnenus, against the Venetians, and was twice dethroned for short periods, first by his uncle, Ladislas, and afterwards by Stephen, a brother of Ladislas; he died 1173. STEPHEN IV., reigned two years only, but gained an illustrious name by his victories over Ottocar, king of Bohemia, 1270-1272.

STEPHEN, king of Poland, surnamed BATHORI, was a noble Hungarian, born 1532, elected prince of Transylvania 1571, succeeded to Henry of Valois as king of Poland 1575, died 1586.

STEPHEN, king of England, was the third son of Adela, fourth daughter of William the Conqueror, and of Stephen, count of Blois. He was born in 1105, and was invited to the English court by his uncle, Henry I., who enriched him with estates and honours, and finally promoted his marriage with Matilda, heiress of the county of Boulogne, and niece to David, king of Scotland. On Henry's death in 1135, Stephen, who was then in France, hastened to England, and was crowned king to the prejudice of Henry's daughter, Matilda, empress of Germany; this event, however, was an advantage to the English nation, for he was a man 'noble and hardy, of passing comely favour and personage, excelling in martial policy, gentleness, and liberality towards all men, and though he had continual wars, yet did he never burthen his commons with exactions.' In such an age, there could be no question between a character thus described, residing at the seat of government, and a woman connected by the nearest ties to a distant land, and if many of the barons kept aloof from Stephen, it was probably far more from

a sense of the privileged despotism they might have retained in the latter case, than from any regard to the welfare of the state. It would seem, in fact, that Stephen's principal difficulties arose from his regard for the old Saxon population at a period when the barons were rising into importance, and to the disgust excited by it among the chivalrous aristocracy introduced by his grandfather; the insolence of whose bearing, and their followers infesting the highways, could not but be galling to the peaceful burgher. The intestine troubles produced by these causes were commenced by David of Scotland, to whom Matilda was more nearly related than Stephen. Invading England in the spring of 1136, that prince was induced to retire by the cession of Cumberland; but returning again, in the year following, was defeated at the battle of the Standard, fought on Cutton Moor, August 22, 1138. Then followed, in September, 1139, the arrival of Matilda, supported by the earl of Gloucester, and the disaffected barons, to whose forces Stephen was compelled to yield: the triumph of Matilda lasted from February to September, 1141, when the king recovered his liberty, and his rival took refuge in Normandy. Nor yet was Stephen allowed to wear the crown in peace, for Matilda having resigned her pretensions to Henry Plantagenet, her son, that chivalrous prince landed an army at Wareham, in 1153, and met the forces of Stephen at Wallingford. The threatened bloodshed, however, was now avoided by an armistice, for at this juncture the son of Stephen expired, and he was easily prevailed upon to conclude a treaty recognizing Henry as his successor, who had only just arrived at the age of manhood, and could afford to wait a few years: the interval was brief indeed, for Stephen died the year following, aged forty-nine, 1154. The foreign troops drawn by Stephen from Brittany and Flanders, and the fortresses erected by the barons in their contests with him, were alike harassing to the people during his troubled reign, and besides all this he maintained a difficult struggle with the papal clergy. [E.R.]

STEPHEN, JAMES, a lawyer and political writer, who suggested and arranged the system of continental blockade, by which Napoleon was so greatly embarrassed during the late war; he was first known as a reporter on the 'Morning Chronicle,' but attracted the attention of government by his anonymous pamphlet, entitled 'War in Disguise, or the Frauds of Neutral Flags,' soon after which he became member for Tralee. Mr. Stephen was connected by marriage with Wilberforce, and having resided some years at St. Christophers, he was well acquainted with the colonies, and proved himself a valuable adherent in the cause of negro emancipation. Died 1832.

STEPHEN, JOHN, a Danish hist., 1599-1650.

STEPHENS, ALEXANDER, a miscellaneous writer, born at Elgin, in Scotland, 1757; died 1821. His works are 'A History of the War of the French Revolution,' 'Memoirs of Horne Tooke,' 'Public Characters.' Besides these he was a contributor to the 'Annual Obituary,' and the 'Monthly Magazine.'

STEPHENS, HENRY, the first of a family of French printers, the most distinguished in those early times, when the most learned men devoted themselves to the perfection of the new art; he

was born at Paris about 1470, began printing 1503, and died 1520. FRANCIS, his eldest son, is known to have carried on the business from 1537 to 1547. ROBERT, the brother of Francis and second son of Henry, born at Paris 1503, was protected by Francis I., but after that monarch's death had a severe struggle with the doctors at the Sorbonne; their enmity drove him to Geneva in 1552, and he died there in the Calvinist faith 1559. CHARLES, brother of the latter, carried on the noble work in which his family had embarked their fortunes, from 1555 to 1564. HENRY, son of Robert, one of the most learned men and finest spirits of his age, was born at Paris 1538, he ruined himself in the cause, and died in the hospital of Lyons 1506. Several others of the family are mentioned, the last, ESTIENNE ATOINE, born at Geneva 1594, ended his arduous career at the hospital Hôtel Dieu 1674.

STEPHENS, J., a learned divine, 1592-1665.

STEPHENS, JOHN, an officer of the army James II., who maintained himself by his sword after the success of the revolution, and wrote several works for the booksellers, died 1726.

STEPHENS, R., an Eng. antiquary, died 1717.

STEPHENS, W., an English divine, died 1717.

STEPHENSON, GEORGE, a civil engineer and extraordinary genius, not only in his art but in affairs in general. As the names of Brindley and Smeaton are connected with our canal system, that of Arkwright with mechanical spinning; Watt with the steam engine; of Fulton with steam navigation; so is that of George Stephenson connected with our railway system, and we may say with the railway system of the world. Born to humble parents at Wylam, in the county of Durham, about nine miles west of Newcastle-on-Tyne, in April, 1787, he seems to have been left to his own resources for education. His first job was picking turnips at twopence per day. As a boy he was a 'trapper' in the coal workings; and there, in the lonely hours he spent with the few of the men in the pit depending on his attention to the *air trap* which he had to open and close, germinated the idea which, long after matured, entitled him to be classed among the great benefactors of mankind. When he was fourteen or fifteen years of age he worked at Water-row pit as brakesman on the waggon-way between Wylam and Newburn. He, therefore, became early experienced in the working of and laws of motion of waggons and railways. As he often referred to this experience in later years, and to actual experiments made that time, we have another proof to add to many more that genius will always declare itself as early as the special subject of its delight is presented for contemplation. About 1805 Stephenson left his father's roof and went to Killingworth, the centre of the collieries worked by the 'grand alliance' of Lords Ravensworth and partners. He went to Killingworth still a brakesman; but soon afterwards got the charge of the steam engine, an advancement which arose from the circumstance of his having successfully remedied defects in the valve gear of the engine, after several ineffectual attempts had been made to do so by a then celebrated Geordy Dobbins, whose actual business it was. Stephenson had before this acquired a reputation among his fellow-workmen as a repairer of clocks and watches. A

pointed *engineer* in consequence of this success, he married, and a son was born, an only child, Robert, who was early associated with his father in the glorious career tracked by the name of Stephenson, father and son. Between 1807 and 1815 Stephenson's attention was much drawn to the subject of locomotive engines, many attempts having been made during that period to introduce them on to the tramways and edge railways of the Northumberland and Durham coal districts, with but very partial success. After various trials and modifications of his designs, George Stephenson started a locomotive on the Killingworth railway on the 6th of March, 1815, which embodied every essential part of the locomotive of the present day, with the exception of the tubular boiler and expansion gear. This was not the starting point of Stephenson's public career, however, although it was about this period that from his genius having been turned in another, for the moment, more important direction, he actually did come prominently before the public. It was as an inventor of the miners' safety lamp that Stephenson's pre-eminent merit was first recognized. As an independent inventor of a safety lamp, depending on the same principles as that of Sir Humphrey Davy's lamp, Stephenson was presented by a number of the leading coal owners of the north with one thousand pounds and a piece of plate. On that occasion the chairman, Mr. Charles John Brandling, said:—‘A great deal of controversy, and he was sorry to say of animosity, had prevailed upon the subject of the safety lamp; but this he trusted, after the example of moderation that had been set by Mr. Stephenson's friends, would subside, and all personalities cease to be remembered. As to the claim of that individual to testify their gratitude to whom they were that day assembled, he thought every doubt must have been removed in the mind of unprejudiced persons by a perusal of the evidence recently laid before the public. He begged Mr. Stephenson's acceptance of this token of their esteem, wishing him health long to enjoy it, and to enable him to employ those talents with which Providence had blessed him for the benefit of his fellow-creatures.’ Stephenson in acknowledging the gift, gave the following pledge, which was nobly redeemed during the subsequent part of his valuable life.—‘I shall ever reflect with pride and gratitude that my labours have been honoured with the approbation of such a distinguished meeting; and you may rest assured that my time and any talent I possess shall hereafter be employed in such manner as not to give you, gentlemen, any cause to regret the countenance and support you have so generously afforded me.’ Though men of Stephenson's scope and frame of mind are in a great measure independent of education, they most thoroughly understand the advantages of it. George Stephenson, therefore, took special care to secure his son's receiving every advantage in this way, and was well rewarded even in the beginning; for Robert Stephenson carried off mathematical and philosophical prizes from Edinburgh university. The first locomotive railway, for the purposes of travelling according to the present principle of action, was constructed between Stockton and Darlington. Stephenson was engineer. The safety-lamp testimonial had enabled him, in partnership

with certain capitalists and his son, to establish the now world-renowned engine factory in Newcastle. On the opening of the Darlington railway, in 1825, Stephenson's engines travelled with a speed of ten miles an hour; but his ideas and anticipations of the capabilities of this mode of transit, both as to speed and the effect it would produce when generally adopted, as he foresaw it must be ultimately, were such as he did not then even dare to express for fear of being pronounced insane! With the engineering of the Liverpool and Manchester railway, Stephenson entered upon the field of his great fame; and from 1825 to 1847 he occupied the foremost position of all railway engineers, whether in Britain or on the continent. His son, and his pupils and assistants, spread the fame of his name and the principles of his practice from one end of the world to the other, and continue to do so. Stephenson was a man of iron frame of body and mind, of plain manners, ardent temperament, eminently social habits; too confident of his powers and too sure of his position to be ambitious; he unflinchingly pursued his own ends by all means, and seldom if ever failed in accomplishing his objects. He amassed great wealth, partly from his profession; but he was also an extensive coal proprietor, and it is no small portion of his renown that he mainly, on his own account, established the inland coal trade to the metropolis. He died at Tapton house near Chesterfield, aged sixty-seven, on the 12th August, 1848.

[L.D.B.G.]

STEPNEY, GEORGE, an English poet and ambassador of the reign of James II., 1663-1707.

STERBEECK, F., a Flemish botanist, 17th ct.

STERLING, JOHN, one of the most independent and true-hearted thinkers of this age, generally known as an essayist and critic, was born at Kames castle, in the Isle of Bute, in 1806. His father, Captain Edward Sterling, was a native of Waterford in Ireland, but was descended from a Scotch officer—one of those who acquired military distinction in the army of Gustavus Adolphus. Captain Sterling also was a political writer, and editor of the *Times* newspaper. From 1810 to 1814 he resided in Glamorganshire, where his son became deeply imbued with that love of nature, and the ‘metaphysical and religious’ value of its scenes, which is so conspicuous in his letters and essays. On the fall of Napoleon in 1814 the family went to reside in France, and barely managed to effect their escape in the following year, when the exile of Elba returned to reassert his rights; the family then settled in London. In 1824 John Sterling was sent to Trinity College, Cambridge, and remained there till 1827, when he left without taking a degree, but returned for that purpose in 1833, on resolving to enter the Church of England. Here he studied the classics under Archdeacon Hare, and though he did not become a thorough scholar, it is pleasant to read the confession of his old teacher that he was ‘something better’ in the mastery which he obtained over the spirit of the old Greek poetry and philosophy. In the interval between leaving college and taking orders, Sterling became a contributor to the *Athenæum* and other periodicals, and pursued his literary avocations in London, under the influence of such men as Coleridge and Wordsworth, not to

forget his friends Carlyle and Frederick Maurice; in 1830 he married the sister of the lady who became the wife of the latter. The connection of Sterling with the church as curate of Herstmonceux, of which place his friend, Archdeacon Hare, was rector, lasted no more than about six months, but in this period he devoted himself with religious zeal to all the arduous duties of a country curate; his health meanwhile giving way, and his convictions gradually ripening towards a more universal faith than that of the church articles. Before taking the curacy he had resided some two years at St. Vincent, in the West Indies, and after leaving it he once more travelled under more genial skies than those of England, a measure rendered necessary by his tendency to consumption. These travels extended, by easy stages and long halts, from the south of France to Italy and Madeira, and were varied by his occupations as an author, but still more by the restless energy of his mind as a thinker, engaged in the deep problems opened up by the study of German literature and the Bible—no longer to him a mere historical narrative but a great symbol, the interpretation of which none of his masters could furnish. About 1841 he published his tragedy of 'Strafford,' which had been to him a labour of love, the one in which his genius 'swam the lightest,' but it fell still-born from the press. In 1843 his sensitive frame, already weakened by the malady which consumed him, received a severe shock from the death of his mother and his wife within a day or two of each other, and he breathed his last, kindly watched in his last illness by Mrs. Maurice, in the spring of 1844. Having appointed Archdeacon Hare and Mr. Carlyle his literary executors, the former published a collection of his works, to which a memoir was prefixed, in 1848; and the latter his picturesque and affecting 'Life of John Sterling,' in 1851. We need not dwell on the distinction between these two works,—the one lamenting his earnest strivings towards the truth as a deplorable fall, and the other so graphically sketching the 'victorious believer and the victorious doer.' We may add, however, one pregnant sentence from the pen of Sterling himself:—'The quantity of inwardness, faith, and power, which has come before me in my own generation, cannot, I think, pass away into the Invisible without helping towards some great outward revolution. But O! how perilous will be the position of any man who may stand forth as the leader and standard-bearer in such a movement! For how small and weakly charged were the "lofts of storied thunder" even in Luther's time, which the prince of this world could set loose against him, compared with those of modern civilization and philosophy, which would be just as fierce in their way as were, of old, the papacy and the empire.' [E.R.]

STERN, J., a Bavarian painter, 1698-1746.

STERN, T., a Dutch engraver, 17th century.

STERNE, or STERNE, JOHN, a learned Irish physician, nephew to the famous Usher, at the time of his birth bishop of Meath, was born in that county 1622, and died 1669. He was better known as a theologian than a physician, and has left some learned works. His son, JOHN, successively bishop of Down and Clogher, died 1755.

STERNE, LAURENCE, though born in 1713 at Clonmel, owed his Irish birth, and the passing of

his childhood in Ireland, to the fact that his father the younger son of a Yorkshire squire, was then lieutenant in a marching regiment. Laurence was educated by his father's kinsmen; and about 1741 a clerical uncle obtained for him a prebend in York Cathedral, and the living of Sutton, in the East Riding. In addition to these preferments after his marriage in 1741, his wife's family presented him to the parish of Stillington. Thereafter the two parishes being adjacent, he continued to perform duty in both, residing at Sutton, amusing himself (in his own words) with 'books, painting, fiddling, and shooting,' publishing a couple of sermons, quarrelling with his clerical brethren, and collecting, by observation and reading, the materials on which his literary fame was to be built. He became celebrated immediately on publishing his first two volumes of 'Tristram Shandy' in 1759, and his reputation increased till the appearance of the ninth and last volume in 1766. The 'Sentimental Journey,' which came out in 1768, was undoubtedly inferior, but is still the favourite with many readers. His way of life soon ceased to be even outwardly, respectable. His publication of two volumes of Sermons in 1760 was a pecuniary speculation. In the same year he obtained another Yorkshire living; but his clerical duties seem to have occupied from this time very little of his attention. He wandered about, enjoying his noisome life in London, and making two continental journeys, the one into France, the other into Italy. The lightmindedness so evident in his works, was not least so in the posthumous 'Letters,' edited by his daughter, led him into dissolute habits, which impropriety was the least serious. He died, in lodgings in London, in 1768, leaving a family quite unprovided for. The moral tendency of Sterne's writings is unquestionably low; his freedom of plagiarism, especially from Rabelais and Molière, is audacious; but his airy and graceful humour is admirable, and some of his characters are among the most natural and original of comic portraits. [W.]

STERNE, RICHARD, a native of Mansfield, Nottinghamshire, who attended Laud at his execution in the character of chaplain, and after the restoration became archbishop of York. He wrote a treatise on Logic, and some Latin poems, besides his share in Walton's Polyglott Bible; 1596-1668.

STERNHOLD, THOMAS, an English scholar and poet, whose principal claim to remembrance is his share in the versification of the Psalms, d. 1533.

STESICHORUS, a Greek poet, 640-560 B.C.

STETTEN, PAUL VON, a Ger. historian, 1717-1786. His brother, of the same name, 1731-1801.

STEUART-DENHAM, SIR JAS., a Scottish economist, grandson of the lord advocate of this name, born at Edinburgh 1712, died 1770.

STEVENS, A., an English architect, died 1725.

STEVENS, GEORGE ALEXANDER, a satirical and humorous writer, originally known as a singing player, author of 'The History of Pope John,' a novel, 'Lectures upon Heads,' and a number of songs, the most popular of which was 'The Storm,' died 1784.

STEVENS, R. J. S., a composer, 1753-1833.

STEVENS, WILLIAM, a tradesman of London, cousin to Bishop Horne, and distinguished by his theological writings, 1732-1807.

STEVENS, W. B., a divine and poet, 1755-1800.

STEVENSON, SIR JOHN ANDREW, a famous musical composer, born in Ireland 1759, died 1833. His most popular work is the arrangement of the Irish melodies, adapted to the words of Moore, and executed in conjunction with him. He also wrote for the stage, and composed many anthems and glees.

STEVENSON, JOHN HALL, a clever satirist and humorous writer, described by Laurence Sterne, who was his intimate friend, in the character of *Eugenius* in *Tristram Shandy*, author of 'Crazy Tales,' 'Fables for Grown Gentlemen,' 'Lyric Epistles,' and 'Moral Tales,' 1718-1785.

STEVENSON, ROBERT, a civil engineer, the chief points of whose character were great sagacity, fortitude, and perseverance. In private life he was a man of sterling worth, who consecrated to beneficial ends every talent committed to his trust. Born at Glasgow in June, 1772, the son of a West India merchant, he was, while yet an infant, left fatherless, and circumstances conspired to render the widow and her only son, Robert, by no means well provided for. But the mother's energy overcame these difficulties, and Robert Stevenson received a good elementary education. About 1787 his mother married Mr. Thomas Smith, an ingenious man, who had commenced life as a finsmith in Edinburgh, but who afterwards successfully improved the mode of illuminating lighthouses, by substituting oil lamps with parabolic mirrors for the open coal fires which formerly served as beacons for the mariner. Stevenson was at the early age of nineteen intrusted by his step-father with the superintendence of the erection of the lighthouse on the Little Cumbrae in the Frith of Clyde, and through this connection became, about 1797, engineer to the Northern Lighthouse Board, an office which he resigned in 1843, after having filled its arduous duties for about half a century. The great work of Stevenson's life, that upon which his reputation as an engineer principally rests, is the Bell Rock lighthouse. To him is due the honour of conceiving and executing, a tower of masonry on the Bell Rock, a situation, undoubtedly, from the level of the rock, which is covered at every tide, of much greater difficulty than the Eddystone. His zeal, ever alive to the possibility of improving on the conceptions of his great master, Smeaton, led him to introduce some advantageous changes in the arrangements of the masonry of the tower, suggested by the facility of procuring stones of greater dimensions than Smeaton had been able to get from the granite quarries of Cornwall. Stevenson may, with the strictest propriety, be said to have created the lighthouse system of Scotland, and brought about its present state of perfection. In no country has the caloric system of illuminating lighthouses been carried out so perfectly as in Scotland; and whether we consider the accuracy and beauty of the optical apparatus, the arrangements of the buildings, or the discipline observed by the light-keepers, we cannot fail to recognize the impress of that energetic and comprehensive cast of mind which directed the whole. In works of general engineering Stevenson was very extensively engaged in every part of Britain, and takes rank with Rennie and Telford in the annals of the profession. Mr. Stevenson died

on the 12th July, 1850, in the seventy-ninth year of his age. [L.D.B.G.]

STEVENSON, W., an antiquarian, died 1821.

STEVENSON, WILLIAM, a clerk in the record office, known as a miscellaneous writer, 1772-1829.

STEVIN, SIMON, in Latin *Stevinus*, a Flemish mathematician, teacher of Prince Maurice, and inspector of the dykes in Holland, died 1633.

STEWART, DUGALD, born in Edinburgh, 22d November, 1753; died at his seat on the Frith of Forth, 11th June, 1828:—the eloquent disciple of Reid, and chief expounder of the Philosophy of the Scottish School. Appointed, at the early age of twenty-one, to succeed his father in the Mathematical Chair in the University of Edinburgh,—an office honourably filled by him for five years; he was on the retirement of Dr. Fergusson, elected Professor of Moral Philosophy. The charm of his style and manner was so great, and such the clearness of his exposition, that in a brief time his class-room was crowded by rising Youth from all quarters of the United Kingdom; and it is not to be denied that in conjunction with PLAYFAIR and other celebrated men then in Edinburgh, he contributed powerfully to confirm that generous liberality of Thought prevailing in our northern metropolis, when Horner, Lansdowne, Brougham, Russell, &c. lived there as young men. This peculiar influence of his teaching too, was strengthened by personal intercourse with him. Of easy access, a kindly gravity, and much openness, he possessed every quality necessary to attach his pupils: and it is not rare even at this late day, to hear him spoken of with more than admiration. Stewart retained his office until 1810, when, on his retirement, Dr. Thomas Brown was instituted to the Chair.—We wish it were possible to account as highly the Metaphysician, as we require to account the Man. His works, indeed, are voluminous, and few authors ever had the gift of a warmer, more perspicuous or persuasive style. Whatever idea he touches, he unquestionably adorns: nevertheless it cannot be asserted either that Stewart has done much to advance Speculation, or that he had personally attained an adequate grasp of the History of Philosophy, and the place it has occupied in the long development of Humanity. REID and he, it must be remembered, stood in very different positions. Reid was essentially a Discoverer. Whatever the merit or defects of his system, it was a system framed by himself. Stewart, on the other hand, received it as a *work accomplished*: and, had he possessed the ability of his Master, the Philosophy of the Scottish School would have grown greater under his hands, and passed on towards the condition of a Science. Undoubtedly he improved its phraseology, for instance, for the term 'Principles of Common Sense,' he substituted 'Laws or Elements of Belief;' he strengthened some of its weaker parts, and gave precision to others; and he enriched Reid's account of the Faculties, by much felicitous and apposite illustration—witness his elaborate account of the Laws of Association: but, beyond Reid, he did not advance one hair's breadth: with him, as with his master, Philosophy confined itself to a statement or examination of some fundamental ideas of the Reason; neither attempting to account for them, nor to ascend to their origin, nor to follow them to

their applications. He left the Scottish School in all vital respects, in the condition in which he found it,—‘having,’ in the words of Cousin, ‘a commencement in psychology, but no regular logic, neither a metaphysic, nor a theodicea, nor a cosmology—a little of morals and politics, but no system.’ Stewart’s best work—that in which alone we discern marks of scientific Thought—is his *Philosophical Essays*; and his worst, is the most famous, viz., the *Historical Dissertation* in the *Encyclopædia Britannica*. It may seem a harsh and presumptuous deliverance, but we have no dread of its being gainsaid—that in our higher Philosophical Literature, it would be difficult to find a less adequate treatment of so great a theme. From the absence of coherence—the absence of any trace of unity or comprehensive principle, the *Dissertation* is liker the expansion of a commonplace book, than an effort to contemplate the continuous flow of Human Thought. It evinces too, an extraordinary defect of sympathy with the whole progress of speculation in modern continental Europe; Stewart manifestly knew nothing of KANT; and he did not think it necessary to take notice of SPINOZA! A singular illustration, surely, how strictly *insular*, we Scotchmen have been as Thinkers, until within these recent years: and therein a promise that brighter lights, in many ways, will break over our future.—Let us conclude in the spirit in which we began, and pay to the memory of Stewart, the tribute owing to a benevolent, upright, and liberal man of undoubted talent—one of the most polished writers of his day, and as fascinating a Teacher as ever occupied a chair in our Metropolitan University. [J.P.N.]

STEWART, MATTHEW, D.D., born at Rothsay in 1717; died in 1785. A pupil of Robert Simson in the College of Glasgow, he early evinced great mathematical talent; and, having given ample evidence alike of his tastes and power, he was called from the living of Roseneath to succeed Maclaurin in Edinburgh in 1747. He discharged the duties of this important office until 1772, when his son, the well-known Scottish metaphysician, began to assist him. Like all our British mathematicians of that period, Dr. Stewart was strongly attached to Geometrical Methods; and he evinced his singular command of them in the discovery, while at Roseneath, of the propositions published under the title ‘Geometrical Theories,’ by his ‘Tracts, Physical and Mathematical,’ and his ‘Propositiones More Veterum Demonstratæ:’—the latter set of propositions, however, having been discovered by analytical methods, although demonstrated synthetically. The subsequent introduction of the Continental analysis into Britain, greatly diminished the interest at one time attached to such exertations: but if we mistake not, the discovery of new, general, and very powerful methods in Geometrical treatment, is about to produce a useful revival of old Tastes. [J.P.N.]

STEWART, ROBERT. See CASTLEREAGH.

STEWART-DENHAM. See STEUART.

STIFEL, MICHAEL, in Latin *Stifelinus*, a Lutheran divine and mathematician, died 1567.

STILES, EZRA, an American divine, president of Yale College, and author of a curious history of three of the regicides who fled to America at the period of the restoration, 1727-1795.

STILICHO, FLAVIUS, a Vandal of great genius and bravery, who distinguished himself at the declining period of the Roman empire and was advanced to the highest dignities of the state by Theodosius the Great. After serving in the war he represented that sovereign and sustained the dignity of the Roman name at the court of Persia then ruled by Sapor III., and on his return was rewarded with the hand of Serena, the emperor adopted daughter, besides being intrusted, in 393, with the guardianship of his two sons, Arcadius and Honorius. On the division of the empire Stilicho became virtual governor of the West, the character of first minister to Honorius, while the same power in the East was exercised by Rufinus, under Arcadius, the other emperor. The military genius of Stilicho, after this period, was exhibited in the reduction of Africa, which had been led into a revolt by Eutropius, the successor of Rufinus at the Eastern court, and subsequently in the great contests with Alaric and Radagaisus. In the year 403 he routed the former near Verona and in 406 put the hosts of the latter to flight, and killed their commander. While Stilicho lived sustained the fortunes of the Roman name, but was accused of having a secret understanding with Alaric, and treacherously put to death in 408. The wives and children of 30,000 Germans who were in his service were massacred at the same time. [E.F.]

STILL, JOHN, bishop of Bath and Wells, author of one of our vile old plays, died 1607.

STILLING, JOHN HENRY, or JUNG-STILLING, a native of Florenburg, in Nassau, where he was born in 1740, remarkable as a philosopher and miscellaneous writer. Though brought up in humble circumstances, he became, by the force of his natural talents, a physician and professor at the university of Strasburg, where he died in 1801. Author of ‘Theory of the Human Spirit,’ &c.

STILLINGFLEET, DR. EDWARD, was born, 1635, at Cranborn, Dorsetshire. Being destined for the church, he was entered a student of John’s College, Cambridge, and being ordained in 1657, was immediately presented to the rectory of Sutton, Nottinghamshire. During his residence in this place, he published his ‘Origines Sacre,’ an apology or defence of revealed religion—a treatise manifesting so rare a combination of natural talent and acquired learning, that his reputation as a divine spread far and wide. A shower of preferment was rained upon him. He was first appointed preacher of the Rolls’ chapel, then to the rectory of St. Andrew’s, Holborn, lecturer at the Temple and chaplain in ordinary to king Charles II. In 1685 he published his ‘Antiquities of the British Church.’ In 1688, immediately subsequent to the revolution, he was promoted to the see of Worcester; but, instead of reposing in the indolent enjoyment of his dignity, he engaged with increased ardour in the pursuits of theological literature, particularly in the composition of some controversial works against the Socinians, as well as a metaphysical discussion with Locke. He died in 1701. His works are comprised in 6 vols. folio. [R.]

STILPO, a Stoic philosopher, 306 B.C.

STIRLING, J., a mathematician, 18th century.

STIRLING, WILLIAM, earl of, a Scottish diplomatist and poet, whose descendant is the present

claimant of lands in Nova Scotia, granted to his ancestor by Charles I., 1580-1640.

STOBÆUS, J., a Greek writer, 5th century.

STOCKADE, N., a Flemish painter, 17th cent.

STOCCHI, F., an Italian astrologer, 1599-1661.

STOCK, SIMON, an English monk, who became general of the Carmelites, and is known as an ascetic writer, died 1265.

STOCKDALE, P., a Scotch poet, 1736-1811.

STOCKVICH, H., a Dutch painter, 1761-1818.

STOFFLER, or STOEFFLER, JOHN, a German astronomer, born of poor parents, 1452, died 1531.

STOFFLET, N., a Venetian general, 1751-1796.

STOKE, E., a Dutch chronicler, 14th century.

STOLBERG, FREDERIC LEOPOLD, Count, a German diplomatist and man of letters, 1750-1819.

STONE, EDMUND, a Scottish mathematician, whose father was gardener to the duke of Argyll; he was patronised by the duke when a discovery was made of his self-acquired learning, but died in poverty 1768.

STONEHOUSE, or STONEHOUSE, SIR JAMES, an infidel physician, who became a convert to Christianity, and a religious writer, 1716-1795.

STORACE, S., an eminent composer, 1763-96.

STORCH, A., a German theologian, 1501-1557.

STORCH, H. F. VON, a celebrated political economist and statistician, b. in Riga 1766, d. 1835.

STORCH, NICHOLAS, founder of the religious doctrines of the anabaptists, was born at Stolberg in Saxony, towards the close of the fifteenth century, and was therefore a young man when Luther commenced preaching the doctrines of the reformation. He went much farther than Luther in proscribing ancient authorities, for he denounced all external documents and traditions whatsoever, and accepting no book but the Bible, he taught his disciples to renounce the study of literature and theology, and trust to the Spirit of God to enlighten their understandings. He insisted, also, on the necessity of re-baptism, when that ceremony had been performed in infancy, on the principle, that it was an act of faith, and could not otherwise be valid. Neither Calvin nor Luther could tolerate these doctrines, and they became still more hateful to the princes of Germany, when political ends, and the doctrine of the community of goods was associated with them. For years past the poor half-starved and half-naked serfs of Germany had been accustomed to assemble in great numbers, and with 'Bread and Cheese' inscribed on their banners, had threatened the complete overthrow of the existing state of society. This state of things glanced at in another article (LEYDEN) and it led to much bloodshed: at length the elector of Saxony, at the pressing instance of Luther, banished their spiritual guide, in addition to executing their political in the person of Munzer, 1525. Storch as a man of the most amiable disposition, but the opponents of the present day deny all connection with his party, to avoid the odium belonging to these scenes of turbulence. He died in his retreat at Munich, 1530. [E.R.]

STORCK, A., a Dutch painter, 1650-1708.

STORY, JOSEPH, an American judge and master of jurisprudence, author of 'Commentaries on the Conflict of Laws,' 1779-1845.

STOSCH, P., a German antiquarian, 1691-1757.

STOTHARD, THOMAS, a distinguished painter

and designer, whose beautiful compositions have become familiar to the public by the engravings of Collins, Heath, Parker, Cronick, and Medland. He was born in London 1755, and exhibited the earliest proofs of his talent in Bell's edition of the British Poets. The subjects graced by his pencil since then amount in number to many thousands, and they are often marked by that beauty of form and sense of human happiness, which are the highest recommendations of the pictorial art to the popular taste. The 'Procession of the Flitch of Bacon,' the 'Canterbury Pilgrimage,' and the 'Wellington Shield,' are well known; died 1834. His son, CHARLES ALFRED, an antiquarian draughtsman, author of 'Monumental Effigies of Great Britain,' was born 1787, and accidentally killed 1821.

STOW, JOHN, one of our most valued antiquarian writers, was the son of a merchant tailor of London, and was born in Cornhill about 1525. He quitted his trade when in his fortieth year, and being patronised by Archbishop Parker and Robert Dudley, earl of Leicester, devoted his time to antiquarian studies. His first work, published 1565, was 'The Summary of the Chronicles of England,' which was published in an enlarged form, under the title of 'Flores Historiarum,' in 1600. His famous 'Survey of London' appeared in 1598. Stow lived to beg his daily bread in his eightieth year, and died 1605.

STOWELL, WILLIAM, SCOTT, Lord, brother of Lord Eldon, civilian and member of the privy council, was born in Durham, 1745. His father was a coal factor in Newcastle, and that town was in hourly expectation of the rebels when his mother approached her confinement; she was lowered from the walls in a basket, therefore, and conveyed to the other side of the river, at great hazard, where she gave birth to the subject of this notice, and his twin sister Barbara. Having completed his education at Oxford, Scott was admitted a fellow of that university in 1765; in 1772 he became bachelor of civil law, and in 1773, after his admission as a bencher of the Middle Temple, was elected by the members of convocation to the office of Camden's reader of Ancient Histories. He held this appointment till 1785, and in the interim took the degree of doctor in civil law; he also made the acquaintance of Dr. Johnson, whom he accompanied to Edinburgh. He now rose from one post of distinction to another, until in 1798, he was appointed judge of the High Court of Admiralty, and a privy councillor. In 1790 he entered parliament as member for one of the pocket boroughs, but in 1801 took a more honourable seat as representative of the university of Oxford, where his exertions had insured a high degree of prosperity and efficiency to the Bodleian Library. He continued to represent the university till he was raised to the peerage on the coronation of George IV. in 1821; the office of admiralty judge he retained till 1828, a period of thirty years, honourably illustrated by the Reports of his decisions, which have been published by Dr. Robinson. Lord Stowell died January 28th, 1836. He was twice married, the second time to a daughter of the famous Admiral Earl Howe. [E.R.]

STRABO, a Greek historian and geographer, author of one of the most valuable relics of antiquity, being a description of nearly every part of

the world known in his time, namely, the first century of the Christian era. This work is indispensable to the elucidation of ancient history.

STRADA, FAMILIAR, an Italian priest, historian of the 'Wars in the Netherlands,' 1572-1649.

STRADA, J., a Flemish painter, 1536-1605.

STRADELLA, ALESSANDRO, a Neapolitan, who flourished about the year 1650. He was an excellent composer, singer, and performer on the violin. The romantic incidents in the life of Stradella have often been narrated, and some years since they were selected as the subject of an opera, the music of which was composed by Von Flotow. He died from wounds inflicted upon him by the stilettoes of two Venetian assassins, somewhere about the year 1670. His compositions were chiefly of a miscellaneous character. [J.M.]

STRAFFORD, THOMAS WENTWORTH, earl of, victim of his efforts to establish the arbitrary power of Charles I. in England, was the son of Sir William Wentworth, of Wentworth-Woodhouse in Yorkshire, and was born in Chancery Lane, London, in 1593. He was the eldest of twelve children, and having succeeded to the estates of his father, was soon after appointed *custos rotulorum* (keeper of the archives) for the West Riding, and in 1621 became member of parliament for his native county. At the commencement of the reign of Charles I., during the arbitrary administration of Buckingham, Wentworth stood nobly by the rights of the people—he even bore imprisonment, the deprivation of his offices, and his tyrannical exclusion from parliament: he was among the foremost promoters of the famous Petition of Right: for, said he, 'We must vindicate—what? New things? No,—our ancient, legal, and vital liberties, by setting such a seal upon them as no licentious spirit shall hereafter dare to infringe.' It may seem strange that a man whose political life commenced thus, should leave his party and become the first sacrifice on the altar of freedom, but there are two considerations which explain all such anomalies—those of *character* and *circumstance*. Strafford was a man of pre-eminent genius, haughty, audacious, and fond of power—of that stamp who mingle with their nobler qualities a reserved ambition, and ever hold themselves in readiness, like the couchant lion, to make a magnificent spring upon the object they mark out. Circumstances are the determining cause in such a case, and had Wentworth lived a few years later he might have anticipated the actions of a Cromwell, without his strict virtue; as it happened, the critical death of Buckingham, who fell by assassination, before the popular cause had gained strength enough to promise much grandeur of success, following quick on recent overtures from the court, provoked the lion to make his spring on what he deemed nobler quarry than the cause he had so long waited on. It was no mean ambition, or obscure contest in which his promotion now involved the renegade, for the smouldering zeal of England for her ancient liberties, began to spread in bright flame, and Pym warned him of his fate, when he attempted to justify his conduct; with *him*,—beyond all question, the greatest spirit that the king had won to his cause,—the question of a manly despotism on the one hand, or a free commonwealth on the other, was now to be debated, and his head was but the first stake in the

game. We shall not consider it necessary to follow this great statesman and daring innovator from one employment to another, or note the measures which brought him to ruin; all this is matter of history. In 1640, eight years after his appointment as lord-deputy of Ireland, he was rewarded with the earldom, and his style changed to that of lord-lieutenant, but he was now constrained by the king to await the meeting of parliament. Charles, at the same time, solemnly assuring him that 'not a hair of his head should be touched.' The popular party meanwhile, headed by Pym, had prepared their accusation of Laud and Strafford, and the impeachment was carried up to the bar of the House of Lords, on November 18, 1640. The accumulative evidence, and the well-known character of Strafford's designs, could leave no doubt of his intention to accomplish what the indictment charged him with: 'to subvert the fundamental laws of the realm,' as construed by the parliament; but the *necessary legal evidence* under the law of treason, completely failed them, and Strafford made such a defence that the committee abandoned that mode of procedure, and framed a bill of attainder. Abandoned to his fate by Charles, Strafford was executed in pursuance of this sentence on the 12th of May, 1641. His *Letters*, which make two folio volumes, were published by Dr. Knowles in 1739. It is remarkable that Whitlocke, chairman of the committee in which the impeachment was conducted, thus testifies to the bearing of Strafford when on his trial: 'Certainly,' he says, 'never any man acted such part, on such a theatre, with more wisdom, constancy, and eloquence, with greater reason, judgment, and temper, and with a better grace in all his words and actions, than did this great and excellent person; and he moved the hearts of all his auditors, some few excepted, to remorse and pity.' [E.R.]

STRANGE, SIR JOHN, an English lawyer and author of Reports, 1696-1754. His son, JOHN, naturalist and antiquarian, 1732-1799.

STRANGE, SIR ROBERT, one of the most eminent historical engravers of Europe, was born at Pomona, one of the Orkneys, July 14, 1721. After attempting various pursuits, he joined the Pretender in 1745, and was present at the battle of Culloden. He afterwards lived by drawing portraits in Edinburgh, till he married in 1747, when he went abroad, and resided first at Rouen and subsequently at Paris, where he commenced the study of engraving under Le Bas, and he finally settled as an historical engraver, in London, in 1751. His reputation soon extended beyond the limits of his own country: he has no superior as a line engraver generally; he went again abroad in 1760, and though formally excluded from the English Royal Academy, when established in London in 1768 he was successively elected a member of the academies of Rome, Florence, Bologna, Parma, and Paris. He was knighted by George III. in 1787, and died July 5, 1792, bequeathing to posterity many exquisite engravings from some of the most celebrated Italian pictures. But the plates of Strange are far too elaborate to be numerous; they do not amount to sixty altogether: the Bonnesse masters appear to have been his favourite, but one of his most celebrated works is a fu-

length of Charles I., after Vandeyck. Strange is unsurpassed in the representation of flesh: a fine example is the Venus of the Tribune, after Titian. The question of the exclusion of engravers from the academy was one taken up very warmly by Sir Robert, he assumed the whole to be personal to himself. Certainly, in the original scheme for the foundation of the academy in 1753, it was designed that two out of the whole number of twenty-four should be engravers. It is gratifying to be able to state, that this standing cause of contention among English artists has at length been removed: the height to which the dispute was carried at one time, may be seen in a statement published by Sir Robert Strange himself, '*An Enquiry into the Rise and Establishment of the Royal Academy of Arts. To which is prefixed a letter to the Earl of Bute.*' London, 1775.—(Le Blanc, *Le Graveur en taille douce*, Part II., Leipzig, 1848; Longhi, *La Calceographia*, Milan, 1830.) [R.N.W.]

STRATO, a Greek epigrammatic poet, presumed contemporary of Septimius Severus, from 193-211.

STRATO OF LAMPUSACUS, a Greek philosopher, surnamed the *physician*, or *naturalist*, from the materialistic character of his system. He was the successor of Theophrastus, and taught Ptolemy Philadelphus in Egypt.

STRAUCH, F. K., a Sp. theologian, 1760-1823.

STRAUCH, J., a Ger. jurisconsult, 1612-1679.

STRAUCHIUS, EGIDIUS, a German mathematician and controversial divine, 1632-1682.

STRAUSS, JANS JANSZON, otherwise JOHN STRUYS, a Dutch traveller, author of *Memoirs of his Life*, and of his journeys through Muscovy, Tartary, Persia, and the East Indies. His travels date from 1647 to 1673. Died 1694.

STREATER, R., an English painter, 1624-80.

STRICKLAND, E., distinguished as a traveller and naturalist, grandson of Sir George Strickland of Baynton, in Yorkshire, and of the celebrated Dr. Cartwright, was born in Yorkshire 1811. His travels in Asia, followed by the publication of papers on geology and ornithology, date in 1835. In 1847 he began his editorial labours upon the zoology and geology of Professor Agassiz for the Ray Society. He succeeded Dr. Buckland as professor of geology at Oxford, and was killed by a railway accident in September, 1853.

STRIGELIUS, VICTORINUS, a Ger. divine and philosopher, period of the reformation, 1524-1569.

STROEMER, MARTIN, a Swedish professor of natural philosophy and astronomy, 1707-1770.

STROGONOFF, COUNT ALEXANDER VON, the Mæcenas of arts and letters at St. Petersburg, born about 1750, died 1811. His nephew, PAUL, a military officer and statesman, died 1814.

STROZZI, a Florentine name, which has been illustrated by many noble characters as statesmen, warriors, and men of letters. The *savants* and poets are—PALLAS, chief of the university, and a devoted friend of learning, 1372-1462. TITO VESPASIANO, a Latin poet and statesman, 1422-1501. ERCOLE, his son, author of a poem on the Greek language, and a friend of Bembo, born 1471, assassinated 1508. FRANCISCO DI SOLDI, a translator of Xenophon and Thucydides, known from 1550 to 1563. CIRIACO, or CHIRICO, professor of philosophy and Greek at Bologna, 1504-1565. LAURENTIA, his sister, a nun, and author

of festival hymns in Latin, 1514-1591. GIAMBATTISTA, an elegant writer, who was invited to Rome by Urban VIII., and had apartments in the Vatican, died 1634. GUILIO, author of a fine epic poem on the origin of Venice, died 1630. PIETRO, secretary of briefs under Paul V., and afterwards professor of philosophy at Pisa, 1575-1640. BERNARDO, surnamed *Il Cappuccino* and *Il prete Genovese*, a painter, 1581-1644. NICOLO, a tragic writer, died 1654; and GIACOMO, a poet and dramatist, flourished at Venice, 1583-1660. The public characters are those following:—

STROZZI, FILIPPO, a Florentine senator, born 1488, and allied to the Medici by his marriage with Clarice, niece of Leo X., famous in history for his attempt to expel that family from the republic. He was taken prisoner, and anticipated the public death reserved for him by self-destruction, 1538. His sons went to France, and engaged in the service of that state against Charles V., who protected the Medici. PIETRO, general of the French galleys and marshal, was killed at the siege of Thionville 1558. LEO, his brother, was chief of the forces sent to the aid of Mary Stuart; he was killed in Italy 1554. FILIPPO, son of Pietro, born at Venice 1541, became colonel of the French guards, and distinguished himself at Montcontour and Rochelle; he was wounded in a fight with the Spanish fleet off the island of St. Michael, and was then thrown overboard, though living, by order of the admiral, Santa Cruz, 1582.

STRUDEL, P., a Tyrolese painter, 1660-1717.

STRUENSEE, ADRIAN, a theologian and ascetic writer, minister at Halle, in Saxony, 1708-1791. His eldest son, CARL AUGUST VON STRUENSEE, a distinguished economist, tactician, mathematician, and statesman, 1735-1806. His younger son is the subject of the following notice.

STRUENSEE, JOHN FREDERIC, Count, whose fate is connected with that of the hapless princess, Matilda Caroline, sister of George III., was born at Halle in 1737, and became physician to Christian VII., king of Denmark, in 1768. The marriage of Christian had disappointed the ambitious hopes of the queen dowager, Julia Maria, who had hitherto been able to retain her influence at court, and had calculated on the succession of her son, Prince Frederic; she became, therefore, the mortal enemy of Matilda, who found herself neglected by the king, and after a long pleasure excursion, in which he was accompanied by Struensee, virtually separated from him. The first circumstance leading to any intimacy between Matilda and Struensee was the inoculation of her child, from which time she appears to have concerted with him the counter intrigues which led to the ruin of both. He first became governor of the prince, then counsellor of the conferences and reader to the king; his friend and firm coadjutor, at the same time, Count Brandt, being appointed director of the court spectacles. The imbecility of the king favoured any enterprise, however rash, and Struensee, once in action, contemplated nothing short of a complete revolution in the state, by which the aristocracy was to be abased, and the people gratified with a free press and many useful reforms. All this was accomplished in 1771, and the adventurer became secret minister with the title of count; having, however, a powerful party

of the nobles, headed by the queen dowager and Count Rantzau, opposed to him. This party began by blackening the character of Matilda, who had been reconciled to the king by the influence of Struensee, and as scandal is always palatable to those whose conduct would most merit its envenomed shafts, the press was set in motion against the authors of its freedom. In fine, the same deplorable weakness that had enabled Struensee to effect his rash enterprise, was now used to his destruction. Late one night in January, 1772, the conspirators suddenly forced their way to the king's apartment, persuaded him that he was about to be assassinated, and procured his order for the arrest of Struensee, his friend Brandt, and the queen. The latter was sleeping in her chamber at four in the morning, when Rantzau entered without ceremony and made her his prisoner, and it is well known that her life was only saved by the presence of the English fleet, by which she was conveyed to Germany. The charge against them was that of conspiracy against the state, aggravated by adultery. Struensee and Brandt were beheaded on the 28th of April, 1772, and four years after Matilda, not then twenty-five years of age, expired in Zell. [E.R.]

STRUTT, JOSEPH, an artist and antiquarian writer, born at Springfield, in Essex, 1749, died in London 1802. Having been apprenticed to Ryland, the engraver, he united the study of antiquities to his profession, and produced the following valuable works:—‘The Regal and Ecclesiastical Antiquities of England,’ 1773; ‘Manners, Customs, Arms, Habits, &c., of the English, from the Arrival of the Saxons to the Reign of Henry VIII.,’ 1774-1776; ‘Chronicle of England,’ 1777-1778; ‘Biographical Dictionary of Engravers,’ 1785-1786; ‘A Complete View of the Dresses and Habits of the People of England,’ 1796-1799; and that most favourite of all his works, ‘The Sports and Pastimes of the People of England,’ 1801.

STRUVE, GEORGE ADAM, in Latin *Struvius*, a Ger. jurisconsult, 1619-1692. His son, BURKHARD GOTTHELF, professor of history, 1672-1738.

STRUYS. See STRAUSS.

STRY, A. VAN, a Dutch painter, 1755-1824.

STRYPE, JOHN, an indefatigable compiler of works relating to ecclesiastical history and biography, was born at Stepney, of German extraction, 1643, and became rector of Low Layton, in Essex, about 1669. It was here, during a sixty years' incumbency, that he compiled his valuable works, the chief of which are his ‘Ecclesiastical Memorials,’ the publication of which was completed in 1721; his ‘Annals of the Reformation,’ published from 1709 to 1731; and his ‘Lives of the Archbishops Crammer, Parker, Grindall, and Whitgift.’ In the latter part of his life he became lecturer at Hackney; died 1737.

STUART, the royal house of Great Britain after the union of Scotland. The first of the name was the only child of Walter, the Steward of Scotland, and his wife Marjory, daughter of King Robert Bruce; he was born 1316; commanded the second division of the Scottish army at the battle of Halidon, 19th July, 1333; concluded the treaty of Perth with Edward III., 1335; succeeded David II. under the title of Robert II. 1371, died 1390. His son, ROBERT III., reigned after him, and con-

tinued the peace till 1399, when the succession of Henry IV. to the throne of England led to the renewal of hostilities; died 1406. He was succeeded by his son, JAMES, whose successors all bore the same name,—the fifth of the line becoming father of the unhappy Queen of Scots. See JAMES, MARY. The other kings of this house were James the Sixth of Scotland and First of England, Charles I., Charles II., and James II. by whose deposition in 1688 the Stuarts were finally expelled the throne. The son of the last named, JAMES FRANCIS EDWARD, called the Elder Pretender, was acknowledged king by Louis XIV., under the title of James III., in 1701, and in 1719 married the daughter of John Sobieski king of Poland; he made some vain attempts to recover the kingdom, and died at Rome in 1766. He resigned his pretensions to his son, CHARLES EDWARD, born 1721, who fought gallantly for the throne of his ancestors, and was defeated at Culloden 1746; died at Rome 1788. The last of the Stuarts was his brother, HENRY BENEDICT, who entered the church after the disasters of 1745, and became titular cardinal of York; on the death of Prince Charles, however, he assumed the vain title of Henry IX. The invasion of Italy by the French republic soon after, compelled him to seek safety in Venice, and he was there supported by a pension from the English crown. Died 1807.

STUART, ARABELLA. See SEYMOUR.

STUART, SIR CHARLES, fourth son of Lord Bute, the favourite of George III., employed as military officer beginning of last war, 1753-1801.

STUART, DANIEL, brother-in-law of Sir James Mackintosh, many years editor and proprietor of the ‘Morning Post’ and the ‘Courier,’ 1766-1841.

STUART, GILBERT, a Scottish historian and miscellaneous writer, Edinburgh, 1742-1786.

STUART, JAMES, descended from the house of Moray, and known as a partizan of the Whigs, was born at Dunearn in 1776, and became a writer to the signet in 1798. The chief event in his career was a fatal duel with Sir A. Boswell, son of the famous biographer and friend of Dr. Johnson, which took place in 1822. Stuart being the victor, was tried for murder, but acquitted.

1835, when Lord Melbourne became premier, he was in London editing the ‘Courier’ newspaper and was rewarded for his supporting the government by the office of inspector of factories; d. 1841.

STUART, JAMES, commonly called ‘Athenian Stuart,’ was born in London, of Scotch parents, 1713, and prosecuted his famous pedestrian travels in the period from 1742 to 1755. His ‘Antiquities of Athens,’ a work of high value for its painstaking research and truthfulness, appeared 1762; died 1788.

STUART, JOHN, a Scottish antiquarian and professor of Greek at Aberdeen, author of an ‘Account of Marischal College and University,’ ‘The Sculptured Pillars in the Northern Counties of Scotland,’ and ‘Observations upon the Various Accounts of the Progress of the Roman Arms in Scotland,’ 1761-1827.

STUBBE, H., a learned writer, 1631-1676.

STUBBS, G., an English divine, 17th century.

STUBBS, G., a disting. painter, 1724-1806.

STUBBS, or STUBBE, JOHN, a sturdy puritan and political writer, lived about 1541-1600.

Charles Edward Stuart.

*Thomas Wentworth.
Earl of Strafford.*

*Max. de Béthune.
Duke of Sully.*

Algernon Sidney.

STUCKIUS, J. W., a Swiss divine, 1542-1607.

STUKELEY, WILLIAM, a famous antiquarian, born at Holbech, in Lincolnshire, 1687, died 1765. His works are 'Itinerarium Curiosum,' or an 'Account of the Antiquities and Curiosities on his Travels through Great Britain,' published 1724; 'Palaeographia Sacra, or Discourses on the Monuments of Antiquity that Relate to Sacred History,' 1736; an 'Account of Stonehenge,' 1740, and some others.

STURE, STENO, called 'the Elder,' administrator of the government of Sweden, was the son of the statesman, Gustavus Anundson Sture, by Bridget, half-sister of Charles Canuteson. The historical events in which all the Stures figured mark the period of the union of the three kingdoms, Norway, Denmark, and Sweden, as effected by Margaret of Waldemar. Charles Canuteson, installed king in defiance of Christian I. of Denmark, expired in 1470, and Steno Sture, already known for a 'skilful, cautious, and free-minded lord, and therewithal prosperous in his designs,' received the government at his death, with the counsel never to strive after the regal title, the assumption of which, by Charles, had brought many disasters upon the kingdom. Steno Sture was the man of the people, and the chief votes for his election were those of the peasants and burgesses; few of the lords followed his banner. In the middle of 1471, Christian appeared at Stockholm with a fleet of seventy ships, and Steno advanced to the relief of the capital with about ten thousand men; the strength of the Danish army was about the same, and it was posted on a sandy height, called the Brunkeberg, outside the town. Here the battle for the independence of Sweden was fought, on the 11th of October, and the Swedes gained a hard won victory, as may be judged from the fact that no less than five hundred of the enemy fell around the Danebrog or standard of Christian, who quitted Sweden, and made no further attempts against it. The wise administration of the kingdom by Steno Sture now secured to Sweden a long succession of happy years, and in 1477 he founded the university of Upsala. His later years were disturbed by the invasion of Finland by Russia, the accidental burning of Stockholm, the plague, the failure of crops, and finally, by the revival of the Danish claims under King John. All these circumstances combined to deprive Steno Sture of his power in 1497, but he regained it in 1501, and again carried matters with a high hand. He died by poison, probably administered by the physician of the Danish queen, in 1503. [E.R.]

STURE, SUANTO NILSON, successor of the preceding, was joined in the government of Sweden by a warrior priest named Hemming Gadd, who was 'oftener seen at the head of an army or a fleet than at the altar.' Suanto is described as a valiant warrior of a bounteous and cheerful disposition. It was said of him proverbially that no one was admitted into his service who was observed to wink before the blow of a battle-axe, and that he would rather strip himself of his clothes than suffer a fellow-soldier to go unrewarded. He seems to have been 'hail fellow, well met,' with the peasantry, and made a gallant stand with them against the pretensions of John, king of Denmark.

He was marching against Prince Christian, son of John, when he expired suddenly in 1512. His administration had been one prolonged warfare with the Danes, and he succeeded in drawing into his alliance the Hanse Towns of Germany. His death was followed, a year later, by that of King John, who was succeeded by the cruel tyrant, Christian II. [E.R.]

STURE, STENO SUANTESON, son and successor of the preceding Suanto Sture, and 'the noblest and most chivalrous of his family,' was elected administrator in defiance of the Danish faction, one of whom was run through at the feast in the castle of Stockholm, on that occasion. In 1516, the ambitious prelate Gustavus Trollé, connived at the revival of the Danish claims under Christian, and that invader was defeated by Sture at the battle of Brenn-Kirk, near Stockholm, 22d July, 1518. In this battle the Swedish banner was carried by a young noble, GUSTAVUS VASA, destined to be the avenger of his country, and the founder of a dynasty of kings. In the beginning of 1520, the Danish army made a new invasion, and a battle was fought on the ice of lake Assundun in West Gothland. Steno was mortally wounded, and being carried out of the battle, died in his sledge while hastening across the ice to Stockholm, where his wife, Christina Gyllenstierna, continued the resistance with great heroism. The Swedes, however, were routed, and the coronation of Christian was celebrated by that 'massacre of Stockholm,' which makes one of the bloodiest chapters of history. Such were the results at which the policy of Margaret of Waldemar had arrived; aggravated, however, by the bigotry of a dark and ambitious superstition assuming the name of religion. These events possess more than the interest of old annals. The Stures of Sweden carried on the battle of freedom and the Christian faith till the Gustavuses arose, to whose great victories we owe at this hour the peaceful possession of the Bible in Europe. [E.R.]

STURGEON, WILLIAM, a great discoverer in electro-magnetism and galvanism, was born at Whittington, in Lancashire, 1783. He was apprenticed to a shoemaker, and his career exhibits a striking example of the distinction that is sometimes reached under the most difficult circumstances, arising from a deficient education and social position. His experiments and works having led to his general recognition as a man of high science, Mr. Sturgeon was appointed professor of experimental philosophy in the military academy at Addiscombe; died 1850.

STURGES, JOHN, a theologian, died 1807.

STURM, JAMES, a German diplomatist, whose protest against the exclusion of the deputies of the reformed from the diet of Spires, in 1519, led to the appellation of 'Protestants,' was born at Strasburg 1489. He was employed in several embassies, and contributed materials towards Sleidan's History of the Reformation; died 1555.

STURM, JOHN, in Latin *Sturmius*, called on account of his great learning the German Cicero, author of several original works and translations, Strasburg, 1507-1589.

STURM, or STURMIUS, JOHN CHRISTOPHER, professor of mathematics and natural philosophy at Altorf, author of several works in physics,

1635-1703. His son, **LEONARD CHRISTOPHER**, an engineer and writer on architecture, 1669-1719. To the same family belongs **CHRISTOPHER CHRISTIAN STURM**, a pastor at Hamburg, one of whose works has been translated into most European languages; and is known in English under the title of 'Reflections on the Works of God,' born at Augsburg 1740, died 1786.

STÜRT, JOHN, a London engraver, 1658-1730.

STURZ, H. P., a German writer, 1736-1776.

STYLE, W., a writer on law, 1603-1679.

SUARD, JEAN BAPTISTE ANTOINE, an elegant writer, secretary to the Fr. Academy, 1733-1817.

SUAREZ, F., a Spanish theologian, 1548-1617.

SUAREZ, J. M., an Ital. antiquary, died 1677.

SUBLEYRAS, PETER, a French painter, taught by his father, Matthew, and by Rival, 1699-1749.

SUBTERMANS, or SUSTERMANS, JUSTUS, a portrait and hist. painter of Antwerp, 1597-1681.

SUCHET, LOUIS GABRIEL, duke of Albufera, one of Napoleon's generals, was born at Lyons 1772, and rose to distinction in the wars waged by the republic in Italy. In 1800 he was major-general, and in 1805 began his career in the Spanish peninsula, where he rose to the command of one division of the army, and obtained his ducal honours. He became a peer of France after the restoration, and died 1826.

SUCKLING, SIR JOHN, a poet and courtier of the period of James I., was born at Whitton, in Middlesex, in 1609, and became the friend and companion of such men as Falkland and Devereux. At the period of the rebellion he displayed his loyalty and love of show by spending £12,000 in equipping a troop of one hundred horse, who proved too fine to be good for much in the field. Another trait of his character was exhibited by his endeavour to rescue Strafford, for which he was obliged to fly to France, where he died prematurely in 1641. He was an elegant writer, an accomplished scholar, and a great wit.

SUDAN, J. N., archivist of Lyons, 1761-1827.

SUE, JEAN JOSEPH, father and son, French surgeons, the former 1710-1792. **PIERRE**, a nephew of the elder, author of a 'History of Galvanism,' 1739-1816.

SUENO, three kings of Denmark, the first reigned 985-1014. The second, his grandson, received the crown of that country to the prejudice of Harald, king of Norway, 1047, died 1074. The third, usurped the throne after assassinating Canute V., 1147, and was killed in battle with Waldemar, 1157.

SUERKER III., king of Sweden from 1192-1210.

SUETONIUS, CAIUS TRANQUILLUS, a Roman advocate, who obtained the office of tribune through the influence of his friend, Pliny the Younger, and was afterwards secretary to Trajan. He is now known as an historian and miscellaneous writer, by his 'Lives of the Twelve Cæsars,' and his 'Notices of Grammarians, Rhetoricians, and Poets,' still extant.

SUETONIUS-PAULINUS, a Roman general, who became governor of Britain, and vanquished Boadicea, queen of the Iceni, 59.

SUETI, RICHARD, a low comedian of great humour, and supposed to be inimitable in his line. He was a native of London, and a choir boy in St. Paul's cathedral. He made his first appearance

on the stage at the Haymarket theatre, while very young; but afterwards sought practice in the provinces, and particularly at York, where he acquired some reputation. In 1781 he appeared at Drury Lane, and became famous in comedy and broad farce. Among the parts for which he was celebrated were *Robin, Endless*, and *Dick Gossip*. He died in 1805 at the age of forty-seven, habits of intemperance having led to his early death. [J.A.H.]

SUEUR, EUSTACHE LE, was born at Mont Didier in 1617, and became the pupil of Simon Vouet at Paris, but by the aid of some of Marcantonio's prints after Raphael, and some of the pictures of that great painter in France, he developed a style superior to that of any of his contemporaries. His celebrated series of twenty-two large pictures, from the life of St. Bruno, now in the Louvre, was painted before his thirtieth year; the were originally painted on wood in the cloister of the Carthusians at Paris, but were transferred to canvas in 1766. Le Sueur died in 1655, in the thirty-eighth year of his age. Considering his comparatively short life, his works are very numerous and most of them are on a large scale: they have been well engraved by the Massards, G. Andran and the two Picarts. His style was grand in design and he excelled in composition, but he was deficient both in colour and in chiaroscuro. The more showy style of Lebrun obscured the reputation of Le Sueur during his lifetime, but he now holds deservedly a much higher place than his more successful rival. He is sometimes styled the French Raphael. In composition, in character, and in the disposing of draperies, he was equal to the greatest of the Italians.—(Felibien, *Entretiens sur les vieilles des plus excellents Peintres*, &c.; D'Argenville, *Abrégé de la vie des Peintres*; Supp. to Penn Cyclopædia.) [R.N.W.]

SUEUR, J. LE, a French protestant, d. 1681.

SUEUR, PETER LE, a French wood engraver, 1636-1716. **NICHOLAS**, his nephew, 1690-1764.

SUFFREN, J., a French Jesuit, 1565-1641.

SUFFREN SAINT-TROPEZ, PETER ANDRE, one of the most dist. naval officers produced by France, served under De Grasse, 1726-1788.

SUGER, the Abbé, a French statesman, tin of Louis VII. and Louis Le Gros, 1082-1152.

SUHM, P. F., a Danish historian, 1728-1798.

SUICER, or SCHWEITZER, JOHN GASPAR, a Swiss theologian and Hellenist, 1620-1688. His son, **J. HENRY**, a theologian and commentator on the Bible, 1644-1705.

SUIDAS, a Greek lexicographer, who is supposed to have lived about the 11th century. His work is highly valuable for its details of literary history, and its excerpts from lost authors.

SULLA. See **SYLLA**.

SULIVAN, SIR RICHARD JOSEPH, a member of parliament, and employé of the East India Company, author of 'Analysis of the Political History of India,' died 1806.

SULLIVAN, JOHN, an American general and member of Congress, afterwards a judge of New Hampshire, 1741-1795. His brother, **JAMES**, governor of Massachusetts, author of 'Observations on the Government of the United States,' and 'Dissertation on the Constitutional Liberty of the Press,' 1741-1808.

SULLY, H., an English watchmaker, d. 1728.

SULLY, MAURICE DE, bishop of Paris, celebrated as a preacher, and for having laid the first stone of the cathedral, 1160-1196. EUDES, his successor, 1197-1208.

SULLY, MAXIMILIEN DE BETHUNE, duke of Sully, born 13th December, 1560, was the second son of Francis de Bethune, baron of Rosny, a French protestant noble of high lineage, but impoverished patrimony. Young Maximilien Rosny was taken at the age of twelve to the court of Henry of Navarre, (afterwards Henry IV. of France,) then in his twentieth year, and was solemnly commanded by his father to live and die with the royal master, to whom he was then assigned. Rosny accompanied Henry to Paris and narrowly escaped perishing in the massacre of St. Bartholomew. When the young king of Navarre escaped from Paris, and renewed the armed resistance of the Huguenots against their catholic persecutors, young Rosny was with him, and became, while yet in boyhood, a captain of proved courage and skill. During the nineteen years of civil war, which elapsed before Henry was acknowledged king of France, Rosny rendered him the most eminent services, not only by valour and conduct in the field, but by his honesty and candour as an adviser, and also by the genius, as a financier and a statesman, which developed itself in the young noble, during the struggles and vicissitudes of this stormy portion of his chivalrous master's career. When the civil wars were at last ended, and Henry obtained undisputed possession of the crown, the internal affairs of the kingdom were in the most deplorable condition. There was the bitterest animosity of sect against sect. Agriculture, trade, and foreign commerce had suffered equally from the lawless violence of the contending factions; the finances of the crown were deeply, and as it seemed irretrievably embarrassed; and the resources of the state were dilapidated and apparently destroyed. Rosny now acted as the king's chief minister in reorganizing the kingdom out of the shipwreck of intestine strife and national bankruptcy. He was indefatigable in searching out and redressing the abuses that had grown up in every department of the administration; he investigated the origin and proper character of each branch of the revenue, and he personally examined the productive and commercial capabilities of the various districts and towns. He studied the modes of collecting the taxes and other imposts, that might be most lucrative to the crown, and least oppressive to the subject. The schemes, which he thus cautiously and wisely framed, were put into execution by him with equal firmness and skill; and having found, when he undertook the management of the French finances in 1597, an empty treasury, an increasing national debt, and an over-burdened and discontented population, he left in 1611 a surplus revenue, a large accumulation of treasure, and satisfaction and prosperity in every class of the community. It was not only as a financial reformer that he served his king and his country. He was Henry's counsellor in all the king's great measures of the reign with regard to foreign affairs, and also in those by which liberty of conscience and full rights of citizenship were guaranteed to the Huguenots, and by which the effective administration of the law and

the maintenance of order and tranquillity were secured. He was liberally rewarded by his sovereign with wealth and honours, and in 1606 was made duke de Sully, and a peer of France. After Henry's assassination in 1610 Sully retained his offices for a short time under Louis XIII., but finding his influence decline and his counsels slighted, he retired from the court. Part of the occupation of Sully's after life was the composition of his well-known and valuable Memoirs. He died December 22, 1641. [E.S.C.]

SULPICIA, a Roman poetess, 90 B.C.

SULPICIUS, GALLUS. See GALLUS.

SULPICIUS-LEMONIA-RUFUS, SERVITIUS, a Roman lawyer, and friend of Cicero, 106-43 B.C.

SULPICIUS, RUFUS, a Roman orator, born 124 B.C., became tribune 88; he was decapitated by Sylla, as a partizan of Marius.

SULPICIUS-SEVERUS, an ecclesiastical historian of the 5th century, author of a 'Life of St. Martin of Tours,' and an 'Ecclesiastical History.'

SULZER, J. G., a Swiss writer, 1720-1779.

SUMAROKOFF, ALEXANDER PETROWITSCH, a dramatic wr., poet, and fabulist of Moscow, considered the founder of the Russian drama, 1727-77.

SUMMONTE, J. A., a Neapolitan historian of the city and kingdom of Naples, who was rewarded for his labours by a persecution, and died 1602.

SURITA, or ZURITA, JEROME, a Spanish historian and secretary to the Inquisition, 1512-80.

SURIN, J. J., a French Jesuit, 1600-1665.

SURIUS, L., an ascetic writer, 1522-1578.

SURREY. See HOWARD.

SUSARION, an ancient Greek actor, supposed to be the inventor of comedy.

SUSON, B. H., a French ascetic, died 1366.

SUSSEX, AUGUSTUS FREDERICK, duke of, sixth son of George III., was born 1773. He married the Lady Augusta Murray, second daughter of the earl of Dunmore, in defiance of the royal marriage act, and though the marriage was pronounced void, they continued to live together till the lady's death in 1830. The children of this marriage were SIR AUGUSTUS D'ESTE, since dead, and a daughter, who became the wife of Sir Thomas Wilde, Lord Truro. The duke died in 1843, and was buried, by his own will, at Kensall Green Cemetery.

SUSSMITCH, J. P., a Germ. divine, 1705-67.

SUTCLIFFE, or SOUTCLIFFE, MATTHEW, dean of Exeter, and founder of a learned establishment at Chelsea, which proved the origin of the present military asylum, 1582-1629.

SUTTON, RICHARD, one of the founders of Brazenose College, Oxford, and steward of Sion monastery, near Brentford, known 1490-1522.

SUTTON, THOMAS, founder of the Charterhouse, was an accomplished English gentleman, and merchant, born at Knaith, in Lincolnshire, 1532. In 1569, being already secretary to the earl of Warwick, he was appointed master-general of the ordnance at Berwick, and greatly distinguished himself in the northern rebellion, which broke out under the earls of Northumberland and Westmoreland. In 1573, he commanded one of the batteries which compelled the castle of Edinburgh to surrender to the English; and the same year went to the assistance of the Regent Morton as one of the chiefs of a body of 1,500 men, sent

into Scotland by Elizabeth. In 1582, Sutton married a relative of the earl of Warwick, and soon after commenced those speculations as a contractor, merchant, and armed privateer, by which he acquired his immense fortune. This was greatly augmented, however, by the value of the coal discovered in two manors which he had purchased of the bishop of Durham. After the loss of his wife in 1602, Sutton began to change his manner of living, and being deeply impressed with a sense of religion, he finally purchased the dissolved monastery of the Charterhouse, which he endowed most nobly with the bulk of his property: the purchase money alone was no less than £13,000, in those times a much greater sum than at present. He died at Hackney, in 1611, and his remains were deposited in a vault prepared for them under the chapel of the Charter-house. After his death, the nephew of Sutton, though munificently provided for, sought to invalidate the foundation of this charity, and the history of his attempt is supposed to implicate Lord Bacon as a *particeps criminis*. Like many of our noble charities, the administration of the Charter-house is said to have been marked by great abuse. The augmented value of the endowment being much more largely shared in by the officials and the school than the needy brethren; very recently, however, a vindication has been published by the present master, Archdeacon Hale, entitled, 'Some Account of the Early History and Foundation of the Hospital.' [E.R.]

SUVEE, J. B., a Flemish painter, 1743-1807.

SUVENHUSIUS, WILLIAM, professor of Hebrew and Greek at Amsterdam, editor of an edition of the Mishna, with Notes, and a Latin version, published 1703.

SUWARROW, or SOUVAROFF, PETER ALEXIS VASILIEVITCH, Count, a Russian general, remarkable for his headlong valour and barbarian energy of purpose, was born at Suskoi, in the Ukraine, 1730, and commenced his military career in the campaign against Sweden in 1747, shortly followed by the seven years' war. In 1762 he returned to his country, but took the field again in 1768, and obtained those successes in Poland which led to its first partition between Russia, Austria, and Prussia, the events of which date from 1768 to 1771. In 1773 he led the Russian hordes against Turkey, and captured in succession Tourtakaye and Hirsout. In 1782 he defeated the Tartars of the Crimea, and obliged them to take the oath of submission to Russia: the next year he was appointed general-in-chief and governor of that country. The Turks having renewed the struggle in 1787, a desperate battle was fought at Kinburn, where Suwarrow was severely wounded, and compelled to seek repose in his litter; his troops were soon after thrown into confusion, but the general mounted his horse, and reproaching them with their cowardice, threw himself almost into the midst of the enemy, and retrieved the fortunes of the field. The crowning victory in this campaign was the capture of Ismail, a fortress of Bessarabia, near the mouth of the Danube, in December, 1789. In 1794 the brave Poles took the field under Kosciusko, to fight once more the battle of their independence, and in two months the Vistula was crimsoned with the blood of the patriots: on the

4th of November, Suwarrow captured Praga, and on the 9th he made his solemn entry into Warsaw. Much has been written about the excessive cruelty practised on this occasion, but there is really nothing to show that it exceeded the usual practice—fiendish as it is—of a victorious army; and it is recorded that Suwarrow's eyes filled with tears when the keys of Warsaw were presented to him, at the remembrance of what had occurred. He was, in some respects, a man of almost barbarian character; of this no denial can reasonably be admitted; but we are disposed to believe that his method of leading the Russians to victory was as merciful as any method *could* be, and it is from the Russian side of view that we ought to estimate the character of her commanders; to measure them by the higher standard applicable to our own countrymen, is manifestly absurd. Suwarrow's eccentricities enter largely into all the narratives of his career, but we can hardly find space for his personal portrait, or for those traits of character which properly belong to biography. In height he barely exceeded five feet, he was miserably thin, had a large mouth, a wrinkled forehead, and a few patches of grey hair on his head. His contempt of dress could only be equalled by his disregard of every form of politeness, and some idea may be formed of both from the fact, that he was washed in the morning by several buckets of cold water thrown over him, and that he often drilled his men in his shirt sleeves, with his stockings hanging down about his heels; like his men also, proudly dispensing with the use of a pocket handkerchief. His favourite signal of attack was a shrill cock-crow: 'To-morrow morning,' said he, previous to the storming of Ismail, 'I mean to be up an hour before daybreak, I shall then dress and wash myself, then say my prayers, then give one good cock-crow, and capture Ismail.' His despatches announcing victory were equally singular, and were generally in doggerel rhyme. One of these, in his campaign of 1773, is literally rendered thus—I was addressed to Prince Romanzoff:—

'Glory to God—glory to thee,
Tourtakaye's taken and taken by me!'

The most remarkable points in his character as a soldier were his contempt of strategy, and his devoted courage: his motto was 'Forward and strike,' 'Nothing to be thought of but the offensive—quick marches—energy in attack—the naked steel.' With these qualities he won the hearts of his soldiers, and obtained his great victories over the Poles and Turks. They were unsuited, however, to the atmosphere of a court, and after the death of Catharine, Suwarrow disgusted her successor, Paul I., and retired to his estate of Khant schansk, where he remained till 1799. The wish of his heart to take a command against the French was then gratified, and he was sent into Italy: the head of 30,000 Russians, to co-operate with the archduke Charles of Austria. No exigence or respect of persons could induce this stalwart of kern to alter his principles: asked for his plan by the emperor, he protested he had none, or, if he had, that he should not disclose them: presented with propositions for defensive operations, he would not hear of them; 'Tell my lord, the prince, that I know nothing of the defensive; I can only attack. I shall advance when it seems good to me to do

so; and when I do, I shall not stop in Switzerland. I shall go, according to my orders, into Franche-Comté. Tell him that at Vienna I am at his feet, but that here I am at least his equal. He is a field-marshal, so am I; he serves a great emperor, so do I; he commands an army, so do I: he is young, and I am old. I have acquired experience by successive victories, and I receive neither counsel nor advice from any one: I trust alone in God and my sword.' It is not surprising that he was defeated by Massena at Zurich, and that a campaign thus conducted against the generals of the rising star of Napoleon, should have had an unsatisfactory termination, yet Suwarrow was never, at any moment, unworthy of his laurels. He was at length ordered to return, and died, neglected by the emperor, at St. Petersburg, May 18, 1800. [E.R.]

SUZE, HENRIETTA. See COLIGNI.

SUZE, H. DE, archbishop of Embrun, 1250-71.

SWAAN, J., a Dutch chemist, 1774-1826.

SWAMMERDAM, JEAN, a celebrated anatomist and entomologist, was born at Amsterdam in 1637. He died in 1680. His father was an apothecary, and possessed a collection of objects in natural history. Engaged while a mere boy in cleaning the articles in this museum, the young Swammerdam soon acquired a taste for the study of nature, and became an especial lover of entomology. He studied medicine at Leyden, and took his degree there in 1667. He prosecuted his anatomical researches with great zeal and success, and was the first to discover the art of injecting the arteries and veins, which has proved of such use in dissections. A severe attack of a quartan ague obliged him to intermit his studies for a time, and upon his recovery he relinquished his human anatomy, and devoted himself almost entirely to that of insects. In 1669 he published his 'General History of Insects,' in which he attempts a classification of them, according to their structure and the metamorphoses they undergo. From this work he acquired great reputation, but in consequence of over-exertion in study, his health gave way. He fell soon afterwards into an extremely hypochondriacal state, scarce deigning even to answer a question addressed to him, and at length became unfit for entering into society. In this sad state of mind he was struck with the peculiar tenets of an extraordinary woman of that time, Antoinette Bourignon, and soon became plunged into the depths of her mystical devotion. He fancied that he would offend the Deity by continuing his anatomical pursuits, and throwing away the scalpel, he followed his fanatical leader to Holstein. He returned some time afterwards to Amsterdam, but his mortifications and mystical studies had reduced him to the state of a living skeleton. In one of his fits of melancholy, he burned all the manuscripts he could lay his hands upon; but fortunately some time previous to this, his limited means had compelled him to sell a portion of them, which ultimately coming into the hands of Boerhaave, were published by him many years after the unfortunate author's death. [W.B.]

SWANEVELT, HERMANN, called *Hermann of Italy*, a Dutch landscape painter, 1620-1690.

SWARTZ, OLAVUS, an excellent botanist, was born at Norkeping in Sweden, in 1760. He died in 1817. At the age of eighteen he was sent to study at

the university of Upsal, and attended the lectures of the younger Linnæus. Soon becoming his own master he devoted himself to travel and collecting plants. While only twenty-three he undertook at his own expense a voyage to the West Indies and South America. He explored the botany of Jamaica, St. Domingo, and the other islands; and after visiting the coast of America returned to Europe by way of England. In London he made the acquaintance of Sir Joseph Banks, Sir Hans Sloane, &c., and returned to his native country with great acquisitions in both knowledge and collections. He was soon afterwards elected a member of the Academy of Stockholm, and the year after made its president. He was called to the chair of botany at the medico-chirurgical institution of that town, and was decorated by his sovereign with the orders of Vasa and the Polar Star. He taught botany with much success at Stockholm, and continued a great upholder of the Linnæan system. He established many new genera of plants; described with clearness and conciseness an immense number of species; and paid particular attention to cryptogamic botany. Schreber has called a genus of plants after him, *Schwartzia*. [W.B.]

SVEDBERG, or SWEDBERG, JESPER, bishop of Skara in Westrogothia, was born on his father's estate near Fahlun in Sweden, 1653, and was many years chaplain in a regiment of cavalry, and superintendent of the Swedish mission established in England and America. He was raised to the see of Skara in 1702 by Charles XII., and three years later became doctor of theology at Upsala. In 1719 the family was ennobled, and the name of Swedenborg adopted by his son, Emanuel, as mentioned in the following article. Bishop Swedberg was a great writer, and among the fruits of his pen is an autobiography still in MSS. His children are the subjects of some curious notices, among which occurs the following:—'I have kept my sons to that profession to which God has given them inclination and liking; and I have not brought up one to the clerical office, although many parents do this inconsiderately and in a manner not justifiable, by which the Christian Church, and also the clerical order, suffer not a little, and is brought into contempt. I have never had my daughters in Stockholm, where many reside in order to learn fine manners, but where also they learn much that is worldly and injurious to the soul.' This good old man died in 1735. [E.R.]

SWEDENBORG, EMANUEL, in an eminent sense *The Philosopher of Christianity*, was born at Stockholm, 29th January, 1688. His parentage is shown in the preceding article, and as the events of his life were few and simple, we shall here limit ourselves to a sketch of his literary career, and a justification of the above title. In 1709 Emanuel Swedberg, afterwards Swedenborg, completed his education at the university of Upsala, and published his academical dissertation, consisting of moral sentences from the writings of Seneca, Publius Syrus, and others, illustrated with notes from the old Latin authors. From 1710 to 1714 he was journeying abroad, according to the custom in those days, sometimes writing heroic verses, epigrams, or love pieces in the Latin tongue to relieve his toils at the various seats of learning that he visited. In 1716 he commenced the publica-

tion of papers on the mathematics and physical sciences in his 'Dædalus Hyperboreus,' and was received into public employment as the colleague of the famous Count Polheim; soon afterwards he was appointed assessor in the Metallic College by Charles XII., who honoured him with his personal friendship. In 1718, besides continuing the 'Dædalus,' Swedberg published a work on algebra, which included, among the higher rules of mathematics, the integral and differential calculus: the year following he assumed the style of nobility by favour of Queen Ulrica Eleonora, and from that period had a seat with the nobles of the equestrian order in the triennial assemblies of the states. From 1719 to 1722, his professional avocations introduced him to the study of the fusibility and structure of metals, and, gradually, to the geometrical principles of chemistry, for the farther study of which, and the knowledge of mines, he journeyed some fifteen months through the German states. The titles of his works in this period indicate very clearly the progress of the *Thinker* proceeding steadily through the physical sciences towards a philosophy of nature: the chief of them are 'Arguments derived from Appearances in Sweden in Favour of the Depth of the Waters, and Greater Tides of the Sea in the Ancient World;' 'Specimens of a Work on the Principles of Chemistry;' 'Observations on Iron and the Elementary Nature of Fire;' and 'Miscellaneous Observations about Natural Things, especially Minerals, Fire, and the Strata of Mountains.' In 1734 he completed *one stage* of this onward march by publishing his 'Principia,' contained in the first of three folio volumes, which were issued at Dresden and Leipzig at the expense of the duke of Brunswick, and to publish which, Swedberg undertook another journey. This work explains the production and nature of the elements, the formation and laws of the solar vortex, and the sublime analogy between the starry heavens and the magnetic sphere, it will be found to ante-date many important discoveries, especially in the co-relation of magnetism, electricity, light, gravitation, and all the physical forces; while the practical part on mineralogy has been pronounced, in Cramer's 'Art of Assaying Metals,' 'magnificent and laborious.' While this work was passing through the press, its author made the acquaintance of Wolff's Ontology, and having found that his own theory of the elementary world agreed with it, his ambition took wing, and he resolved to try the experiment of applying his principles to the deep subjects glanced at by that philosophy. His prompt reasoning flashed through all difficulties like a sabre-cut—nature is all mechanism—the soul is in nature—these principles of his, with Wolff's seal on them, are the exponents of nature—why, then, not demonstrate the nature of the soul with as much precision as that of the elementary world? With Swedberg to *think* was to *do*; hence arose his Philosophy of the Infinite, a '*Prodromus*,' as he calls it, written immediately after the perusal of Wolff in 1734: in strict relation with all that preceded it, this little work was but a plank thrown across the gulf which separated one field of thought from another,—it carried Swedberg from the dead mechanics of metals and elements to the *living*. Treating of the soul had set

him thinking about the body; he is curious to know what the learned are doing—whether they have found the same key as himself; now, therefore, he buries himself for a few days in the library at Dresden, reads the 'Bibliothèque Italique' which contains an account of the learned men of the day, and finds to his extreme satisfaction, a new and wide field open before him. The learned men are divided into parties—some affirming and others denying the animation of the brain; others, again, with the microscope searching the body through and through to decide these contests. It is the same with the question of the atomic constitution of the blood—the existence of the animal spirit in the nerves—the growth of the embryo in the womb—the cause of the circulation and all the kindred topics. Ruysch, Bianchi, Leeuwenhoeck, Borelli, Lancisi, Morgagni, Malpighi are here with all the treasures of art and learning with anatomical preparations and models of the human frame hardly equalled by anything in our own times, and finally, with the doctrines of geometry and analogy already pressed into the service. Discovery and art had anticipated all the requirements of the philosopher. It was only for *Reas* to take up the thread of demonstration at a point where all confessed that nature was seen to work most distinctly and perfectly. Swedberg, short, reverting to his attempted demonstration of the connection between soul and body on mathematical principles, resolved to pursue his inquiry from this fresh plane of induction. Obligated to turn for a season to his professional avocations, he carried this high purpose along with him, and in 1736 obtained leave of absence again for the purpose of writing and publishing a great work. Space is not allowed us to follow him step by step as we might do, in the conception and publication of his works on the 'Animal Kingdom.' The years were occupied abroad in collecting and digesting his materials, and in 1740 'The Economy of the Animal Kingdom, Considered Anatomically, Physically, and Philosophically,' appeared. Amsterdam, followed in 1744 by 'The Animal Kingdom,' and in 1745 by 'The Worship and Love of God,'—the latter, apart from its philosophy, acknowledged by competent judges for one of the most gorgeous specimens of Latinity in existence. The works completed the *Thinker's second stage*; and among the doctrines contained in them are discoveries of high importance in physiology awaiting an adequate criticism, or courting addition: such are the author's demonstration of the animation of the brain, and of its coincidence with formation with the systole and diastole of the heart, and after birth with the respiration of the lungs—of the beautiful provision for muscular action derived from the respiration, exhibiting the function of the lungs in distributing and regulating motion throughout the entire system—of the law of man and society among the organs—and of many others which it would be inconsistent with our limits to enumerate, but tending upwards to a rational psychology. Through the whole of his career up to this point, Swedberg's labours had grown, one task after another, like a tree; the goodly proportions of excellent fruit of which, placed him in the high rank of scientific men; he was not yet, however, the *Philosopher of Christianity*. In after years

recognized these labours as his preparation; and they who know him best, are well aware that they are nothing more, and that their results enter no farther into his revelations than the words of a new language into the thoughts of an older one. It was in the year 1745, as he drew near the utmost limits of his philosophical inquiries concerning the soul, that he declares his eyes were opened to see spirits, and that, warned by a divine appearance, he abandoned his uncompleted labours and worldly honours, and devoted himself to the new office to which he was called. This is a subject we cannot discuss in a notice which is necessarily limited to information in matters of fact, but we may remark that the case of Swedenborg is essentially different from that of the visionaries of all ages who have discoursed with spiritual beings. Distinctly, his claim is this:—not that he saw spirits only, but that he actually lived with them *as a spirit*, seeing all things in the spirit world as one of themselves, and only existing here in the body, in order to use it as an instrument for publishing the facts, and digesting in a rational form the conclusions to be derived from them. It is, then, on the nature and value of these conclusions that we dare to rest the whole weight of his claims to our regard and to the title we have assigned him,—not as one of many Christian philosophers, but as the veritable philosopher of the Christian faith; as much the instrument of Providence in this age as Paul in a former, and doing precisely that for present habits of thought that Paul did for the spirit of his age, grounded in Judaism or in idolatry. We do not say indeed that the systems of the Scotch and German philosophers have nothing in common with Christianity, but they stand, as their warmest partizans will admit, on ground *apart* from it, and the attempt to reconcile religion and philosophy has never been cordially acknowledged as successful on either side. Theologians have clearly perceived that no system of philosophy has taken up, *as essential to it*, the Christian doctrine of Regeneration, the only pretensions of this nature in the course of eighteen weary centuries being discoverable in the writings of the mystics—more especially in those of Jacob Boehmen, and his eloquent exponent in this country, the nonjuring divine, William Law. These latter have become *obsolete*, not because the problem could ever cease to engage human attention, but for this very sufficient reason—that the science they embraced had become in many essential particulars inconsistent with our actual knowledge of things, and the most they could do was to keep alive the spirit of earnest piety, and the expectation of a future great development which had always been looked for. Swedenborg, it will be observed, wrote after Newton and Locke, with whose works he was acquainted, and no man living was better informed on the progress of science in his own day, and with the richer harvest it promised in the future; step by step all the great problems that had hitherto engaged attention were brought under his review, and whatever was significant of life or death in nature, seems to have passed before him as the animals were brought to Adam to see what he would call them. Such was the man destined by Providence to furnish the nineteenth century with the Christian development of philosophy; and here we will endeavour to state

in what this consists, and in what it does *not*. Certainly, it is not a mere dialectic, for what, after all, is that, but a logical instrument, fashioned, if possible, to reconcile the self-sufficient reason with faith; and what does the insufficiency of the German schools consist in except this, that the very process of reason by which the understanding and the Word are sought to be reconciled, does but strengthen the former? Besides, the true Christian Philosophy cannot, by the very conditions which call for it, be a bare *method*: like Christianity itself, it must be a *result*, and a final one. In this consists the supereminence of the mental philosophy contained in the theological works of Swedenborg. It groups the thoughts round the affections, and it gives the latter a mighty power both to raise and to lower the former, so that the regenerate man, or him whose affections have been purified by the procedure of a pure love through them, is altogether another, *even as a reasoning man*, for he becomes the little child who has entered into the kingdom of God. This hint of the real nature of Swedenborg's philosophy is all we can here give; and now a word or two on the two great subjects of development in which it is embodied: these are his *doctrine of the Bible*, and his *doctrine of the spiritual world*. The former has never been represented by him as an invented allegory, but as a perfectly unique divine symbol, *such as the supreme wisdom becomes when it is breathed through the human mind, the self-intelligence meanwhile not interfering with its appropriation of images and figures*. Let not these expressions be read carelessly, but deeply pondered, for they will be found to consist with a great law of intercourse between higher and lower intelligences; they point, in short, to the marvellous fact, that the Word is the open gate between the world and heaven, which it links together by a correspondence of thoughts and ideas: this can now be brought to the test of *objectiveness* through some states of clairvoyance, while its *subjective* test is open to all who know what Christian experience is. But the statements of Swedenborg concerning the spiritual world, are after all perhaps, the first and greatest difficulty that his readers have to encounter, and even when these are not altogether discredited, the similarity between spiritual and natural things is regarded as offensive. In the first place this similarity is apparent only, and belongs to a superficial acquaintance with his meaning; the real similarity being not that of *identity* but *correspondence*, and arising from the universal law that the ideal is nothing, even in things spiritual, till it finds repose and form in the real or substantial. We have already alluded to the preparation of Swedenborg, as consisting in the mathematical discipline of his mind and his acquaintance with the sciences, two distinct courses of which he went through—the elementary, in which all nature is reviewed as a mechanism, even to the intercourse between soul and body, and what we may term the concrete, which views the soul or living form in nature; the one a study of the laws which unite the atomic parts of bodies, from the grain of salt up to the scattered stars of the firmament; the other a study of organization from the least living part of the body, up to the rational soul dwelling in its whole order by influx and correspondence. This double course of prepara-

tion, it may now be apprehended, was absolutely necessary if spiritual laws were ever to become subjects of study: and even if we grant, in any case, that Swedenborg has brought them down to a too rigid formula, the form is but the net needful to catch these winged thoughts, or rather, the artist's stationary figure representing his ever living and varying model; the life, the actual motion, cannot be drawn, but only one phasis of it, from which infinite variety and living beauty may be inferred. We hold it no disparagement of Swedenborg, therefore, that when he had arrived at his spiritual manhood, he was still as a child who had never left his mother nature—that his 'umbilical cord was never cut,' as Emerson expresses it: had it been, we should have had another great mystic, another Boehmen, Bonrignon, or Peter Poiret, but we should still have awaited the Newton of the unseen universe. We have not space to substantiate these hints as we could wish, by reviewing ever so briefly the mass of writing to which they apply; yet we cannot conclude without a word or two on the principal of these works. The series commences with the '*Arcana Cælestia*,' published in London from 1749 to 1756. This work, a model of literary method and precision of language, is really the text-book of all that followed it, and is remarkable for the increasing depth of its meaning as we pass from volume to volume. The very heart of its contents, if we may dare trust ourselves to express so much in one sentence, is a psychological disclosure of the struggle between the Divine and the human natures in the experience of the Saviour; and it is in course of this development—sometimes expressed in terms applicable to Him alone, sometimes in the lower phraseology of all Christian experience—that Swedenborg has evolved his philosophy, and established his doctrine of the Word. We may here repeat, therefore, what we have already intimated, that it is in vain to look for either of these in the set terms of a *creed*; it is a study which frees the mind of all formularies, and the deeper it is pondered, the more confidently may the spirit take wing in the pure ether: *terms*, we have indeed, precise and beautifully fashioned forms of thought in these writings, which are as the nests in the branches, to which the tired thoughts will always return for repose and security, and the more gratefully the longer they have been on the wing: anything more than this Swedenborg would be the last among theologians to contemplate. That he speaks as a master is most true, but as one whose constant anxiety it is to place his disciples on the same intellectual footing as himself, to lure them gently on, whether by persuasion or authority, till they may look at the same divine things that he gazed upon, less by prerogative than the constitutional right which belongs to all. In a word, if there is any truth in Swedenborg's revelations at all, their pre-eminent value consists in this, that they unite the *understanding* and the *Word*; as the poet attracts the eye and the heart to nature—not by a painted *mirage*, or a crowd of stilted figures to be taken for it, but by awakening instincts, and touching the chords which really unite them within the *human consciousness*; they are, therefore, speaking within the bounds of coolest reason, the very complement and last necessity of Protestant free-

dom, for no church can claim dogmatic authority over any man who has once possessed himself of this key to the Scriptures, and no philosophy can have any dangers for him: all the stronger, therefore, becomes the *moral authority* of the church, for it thus grounds itself in the reason and freedom of man.—After the *Arcana*, Swedenborg published in 1758, a small tract 'Concerning the Last Judgment and the Destruction of Babylon,' another 'On the White Horse of the Apocalypse,' a third 'On the Earths of our Solar System, and some of the Earths of the Starry Heavens,' and a summary view of his position in theological form entitled 'The New Jerusalem and its Heavenly Doctrine:' he added to these, as his labour of the year, his account 'Of Heaven and its Wonders accompanied with an 'Account of Hell.' Why now is that Last Judgment and the Destruction of Babylon, manifested, as he says, among spirits in 1757? Why the announcement of the commencement of a new age, almost instantly followed speaking historically, by the earthquake of 1763, the French revolution, the commotion begun by which is still spreading from land to land, and threatens to tremble under the feet of many generations? A question surely not answerable in these days: the final judgment upon all things by the contemporaries regard hitherto paid to it. Why also, we may ask, this revelation of the Word coincided with its publication in all the known languages of the world? That White Horse—what is it but the free human spirit, the illuminated understanding, proceeding by which, through ages and nations, the Eternal Wisdom, as a crowned warrior, subdues all that is contrary to its dominion? It may be easy to doubt one figure, even while admiring its beauty and universality, but what if this figure take a consistent place in the grand epic of the Scriptures and of human history, as it marches in due order with a thousand others equally grand and universal? We can but ask these are some of the questions that the reader of Swedenborg must be prepared to encounter, and by these glimpses at his meaning we are far from intending any eulogy: they are simply designed to supply the place of a more elaborate description. Swedenborg continued his development of the Word and of Spiritual Laws during the whole remainder of his life—a period, reckoned from 1745, when his spiritual sight commenced, of twenty-seven years. The principal works published by him after those mentioned above were his 'Doctrine of the Lord,' 'Doctrine of the Sacred Scripture,' 'Doctrine of Life,' and 'Doctrine of Faith,' all in 1763; his 'Angelic Wisdom, concerning Divine Love and Wisdom,' and 'Concerning Divine Providence,' in 1763 and 1764. In 1765, 'Apocalypse Revealed,' 1766; 'The Delights of Wisdom concerning Conjugal Love,' 1768; and 'The True Christian Religion,' 1771. None of these works were published in his own country where the press was not free, but in London or Amsterdam; for this reason he made several journeys backwards and forwards, which were the only changes that marked his external life in the whole period. He died in London, in the eightieth year of his age, 29th March, 1772. [E.F.]

SWEERT, E., a Dutch botanist, 17th century.
SWEERT, F., a Flemish historian, 1567-162

SWIETEN, G., a Dutch physician, 1700-1772.

SWIFT, DEANE, grandson of Godwin Swift, eldest of the uncles of the celebrated writer (next article), and a descendant by the mother's side from Admiral Dean, a naval commander of Cromwell's time; author of an *Essay upon the Life, Writings, and Character of Dr. Jonathan Swift*; died 1783. His son, THEOPHILUS, a miscellaneous writer, died 1815.

SWIFT, JONATHAN, though Irish by birth, was of English descent. His grandfather was a clergyman in Herefordshire, and married a cousin of the poet, Dryden; his father, who was steward of the Irish inns of court, died very poor in 1667; and Jonathan was born at Dublin in November of the same year. The widow was thrown for support on her own relations, by whom her son was educated at the school of Kilkenny, and at Trinity College, Dublin. He was a careless student, and irregular in his conduct. Even then, however, he had worked in his vocation as a satirist, having sketched the 'Tale of a Tub' before he came across to England. This migration, occurring in 1688, opens the first of the four stages in the career of this singular and celebrated man. While he was always a polemic, and always strongest in satire, the opinions which he advocated, and the victims whom he attacked, were very different in the different periods of his activity. During the first of these periods, extending from his twenty-first year to his forty-third, he was a zealous Whig; for three years more he was engaged in supporting the politics and party of the English Tories; and in his third epoch, the longest and most creditable of all, and reaching from his forty-sixth year to his sixty-ninth, his efforts were chiefly directed, always earnestly though not always wisely, towards improving the treatment and condition of Ireland. The closing period of his long life, lasting nine years, was spent in total inactivity, enforced by the decay of his faculties.—On coming to England, Swift was received into the family of the accomplished Sir William Temple, whose wife was a kinswoman of his mother. During this first residence at Moor Park he studied hard, acted as secretary of his patron, became a favourite of William III., and refused the king's offer to give him a troop of horse. He wrote Pindaric odes, which, being printed, compel an acquiescence in the unpalatable opinion expressed to him by Dryden: 'Cousin Swift, you will never be a poet.' But his practice of serious verse-making, was useful in training him for the production of those comic and satirical rhymes, which, though they want all the elements of poetry, abound so much in his characteristic humour and his apt vigour of diction, as to be among the best of his works, and the most curious monuments of his time. In 1694, having become discontented with his patron, he crossed to Ireland, took orders, and went to be a country pastor in Antrim, on an endowment of a hundred a-year. Perhaps this retirement was only a feint; perhaps he found it to be a mistake. On receiving a friendly recall from Temple, he benevolently obtained a transference of his living to a poor curate in the neighbourhood, and returned to Moor Park in 1695. He had already begun his course of coquetry with ladies, by coming to a breach with his 'Varina,' in Ireland. He now began his tutor-

ship and admiration of the unfortunate 'Stella,' who was a Miss Johnson, the daughter of Sir William Temple's steward, and then no more than thirteen or fourteen years old. During his second residence at Moor Park, he was led by his patron's share in the controversy between Bentley and Boyle, to write his 'Battle of the Books'; and probably the 'Tale of a Tub' also was now completed. These early works, while they fly at game higher than his political satires, are as characteristic as anything he ever wrote; and they are as full of talent, though not so well fitted for popularity, as the satirical romance which is his masterpiece. As a writer of plain, pure, vigorous, idiomatic English, Swift has no equal; and he has hardly any superior as a satirist, uniting extraordinary force with extraordinary humour, tremendously powerful in invective, and yet more formidable for the biting dexterity with which he wields the lash of irony. In reading his works we are never allowed to forget that he was ill-tempered, nor to suspect that, notwithstanding some good points, he was essentially bad-hearted and selfish; but we are impressed by his strength even when he uses it in defence of error, and diverted by his wit even when it plays on things true and sacred. The intellectual characteristics of his writings were equally prominent in his conversation: when in good humour he was a marvellous talker, full of lively anecdote and jest; and he was always ready to throw back a stinging retort on an adversary. On Sir William Temple's death in 1699, Swift edited his posthumous works in London, and then accompanied Lord Berkeley, who was sent to Ireland. Misunderstandings occurred as usual; but, on his patron's recall next year, Swift was left in possession of livings yielding nearly four hundred a-year.

[Laracor Church.]

He took up his abode at his vicarage of Laracor, in the county of Meath, made himself beloved for the charitable disposition which was one of his redeeming virtues, and discharged his duties as a parish clergyman with all the assiduity allowed by visits to England. These, however, took place every year, and sometimes lasted for several months. In 1704 the 'Tale of a Tub' and 'Battle of the Books' were published together, and, though anonymous, were attributed by the public to the right author. The former of the two was generally disliked by the clergy; and it was used as the means of infusing

into the mind of Queen Anne an aversion to Swift, which made it impossible for his friends in the ministry to gratify his eager desire for ecclesiastical preferment in England. The effect was not removed, either by his serious and manly 'Project for the Advancement of Religion,' or by the fine irony exhibited in the very title of 'An Argument to Prove that the Abolishing of Christianity in England may, as things now stand, be attended with some Inconveniences.' As early as 1708, when the latter of these pieces appeared, Swift was edging off from his political party. A real dissent from their opinions was indicated in more than one of those occasional pamphlets of his, which cannot here be so much as named. He was a vehement high churchman, and wrote against all relaxation of tests. In other points, such as his advocacy of annual parliaments, his doctrines would now make him be classed as a Radical. But his chief reasons for dissatisfaction with the Whigs themselves were two. They wounded his self-love by resisting demands of the Irish clergy, who had chosen Swift as their organ; and, above all, they could not, or would not, make him a bishop.—In the autumn of 1710, when the Tories had just come into power, a second mission from the Irish prelates introduced him familiarly to Harley and St. John: Godolphin, the Whig leader, treated him haughtily: and he enlisted in the cause of the new ministry with an envenomed alacrity. The most valuable service he rendered them was performed in the seven months ending in June, 1711, during which he wrote 'The Examiner.' Later in the same year he assisted the negotiations for peace by his tract 'The Conduct of the Allies:' and, the discreditable treaty of Utrecht having been concluded, his defence of it grew into the 'History of the Four Last Years of the Queen.' Still his new friends contented themselves, even more than the old, with rewarding him by flattering attentions. He proudly refused to be Harley's chaplain: and the minister, though he must have seen that he was hardly a safe man for the episcopal bench, made the attempt to raise him. But the royal obstinacy proved insurmountable. As a last resource, the deanery of St. Patrick's Cathedral, in Dublin, was secured for Swift in the spring of 1713: and, accepting this fairly lucrative appointment as a sentence of exile, he departed, resolving, as he says in one of those bitter letters which are among the most vigorous of his compositions, to forget everything in England, and never see it again, 'if they have no further service for me.' He was speedily recalled to write one or two pamphlets, and to see the displacement of the Tories on the accession of George I. He then returned to Ireland, and ceased to have any concern in English politics.—Soon after 1714, when his residence was fixed in Dublin, he became involved, further than the world was allowed to suspect, in troubles arising out of his strange and unmanly flirtations. Stella, under the protection of a widowed lady, had come to live near him on his settlement at Laracor: and she now removed to Dublin, where she unexpectedly found a rival. This was Miss Vanhomrigh, the 'Vanessa' of Swift's verses, who had become acquainted with him in London much in the same way as Miss Johnson, and who now with her sister followed

him to Dublin. Stella's jealousy caused stormy scenes, which the Dean thought to terminate by marrying her secretly in 1716. The pair were never more than friends, before the marriage or after it; a state of affairs for which various reasons have conjecturally been assigned. But, in 1723, Vanessa chose to write to Stella, demanding explanations; and Stella exhibited the letter to Swift. He rode off with it in a paroxysm of rage, presented himself to Vanessa, threw it on her table, and departed without saying a word. The shock killed her in a few weeks. Nor did his other victim long survive. He was called away from his last visit to England, in the end of 1727, to attend her on her deathbed. In the meantime he had continued to write with his usual frequency. In 1726 he lived with Pope in his villa at Twickenham, and contributed to the first draught of 'Martinus Scriblerus:' and then, also, he published the bitterest, most ingenious, and most amusing of all satires on human nature, the 'Travels of Lemuel Gulliver.' Lilliput and Brobdingnag will always preserve the name of Dean Swift. Nor was any practical occasion trifling to call forth his cynical wit: he never was stronger than in his 'Polite Conversation,' and his mock 'Directions to Servants.' Irish affairs, however, were now his chief object; and the interests of the nation were embraced with a fiery zeal, which, in its denunciations of wrongs inflicted by England, forgot all distinctions of political party. The 'Drapier's Letters,' published in 1723, to expose a patent granted for copper coinage in Ireland, raised Swift, whom no one hesitated to hold as the writer, to the summit of a popularity, which was augmented both by many acts of private kindness, and by an incessant series of masked attacks on the government, and on prevalent abuses. Some of the best of the Dean's pamphlets are dressed in his favourite ironical garb. One of them is a plan for paying off the national debt, by the very simple process of confiscating and selling the church lands. In another, he offers at once to increase capital in Ireland, and to diminish the surplus population: the little children are to be carefully fattened, and sold to the London butchers: the plan is recommended by a grave array of statistical calculations; and objections are answered in a series of the most tremendous sarcasms on Irish misery and English misgovernment. That Swift's energy was unabated in 1735, when he was in his sixty-eighth year, is proved by one of his best rhymed pieces, 'The Legion Club,' a libel on the Irish House of Commons, who had resisted claims of the clergy. But his last public efforts were made, in the same cause, during the succeeding year.—Giddiness, and other symptoms, had long portended danger. His memory now began to fail; and terror of worse evils made him miserable, till the other powers gave way likewise. After having lingered for three years in peaceful idiocy, he died of hydrocephalus in October, 1745. He bequeathed his property, amounting to about £10,000, for the formation of an hospital in Dublin for lunatics and idiots. [W.S.]

SWINBURNE, H., a civilian, died 1624.

SWINBURNE, HENRY, the descendant of an ancient Roman Catholic family, known as the

accomplished writer of Narratives of his Travels in Spain and the Two Sicilies, died in Trinidad 1803.

SWINDEN, JOHN HENRY VAN, a learned Dutch physician, professor of philosophy, logic, and metaphysics at Franeker, and of astronomy at Amsterdam, 1746-1823.

SWINDEN, TOBIAS, rector of Cuxton, in Kent, author of a book strangely entitled, an 'Inquiry into the Nature and Place of Hell,' died 1720.

SWINNOCK, G., a rector of Buckinghamshire, author of 'Heaven and Hell Epitomised,' d. 1673.

SWINTON, JOHN, chaplain to the English factory at Leghorn, author of papers on Etruscan, Phœnician, and Eastern Antiquities, and a contributor to the Universal History, 1703-1777.

SWITZER, E., an Eng. horticulturist, last cent.

SYBRECHT, J., a Flemish painter, 1625-1703.

SYDENHAM, CHARLES WILLIAM POULETT, Lord, successor of the earl of Durham as governor-general of Canada, was born in London 1793, and continued the mercantile business of his father, J. Poulett Thompson, till 1830. Four years previously he had become a member of parliament, and when the Whig administration was formed, he took office as vice-president of the board of trade and treasurer of the navy. In 1834 he became president of that board, and in 1839 was appointed to the government of Canada, having previously been raised to the peerage. He was killed in Canada by a fall from his horse, 1841.

SYDENHAM, FLOYER, an Oxford scholar and translator of Plato, whose death, through indigence and imprisonment for debt in 1788, gave rise to the Literary Fund.

SYDENHAM, THOMAS, M.D., a distinguished physician of the seventeenth century, and sometimes called the English Hippocrates, was born in 1624, at Windford Eagle, Dorsetshire, where his ancestors had been settled for many generations. Nothing whatever is known of the history of his boyhood, though it may be concluded from the condition of his family that his early education was not wholly neglected; but we find that in 1642, at the age of eighteen, he entered Oxford as a commoner of Magdalen Hall. His stay there, however, could not have been of long duration, for he shortly afterwards, probably in that very year, joined the army of the parliament, in which two of his brothers were then serving—William, who attained to the rank of a colonel, and was ultimately governor of the Isle of Wight; and Francis, who was a major of horse, and was killed in 1644. How long Thomas Sydenham, who is only known to posterity as the most eminent physician of his time, continued to act as a soldier, or what exploits he performed in that capacity, are points which it is impossible now to ascertain, but he himself speaks of his military career as having extended to several years, *aliquot annos*; and Sir Richard Blackmore described him as a 'disbanded officer who entered upon the study of medicine for a maintenance and without any preparatory learning.' He seems to have re-entered Oxford in 1646, where he acquired a fellowship in All Souls, and he graduated there in 1648, as M.B. (Bachelor of Medicine). When he settled in London is unknown, but he was certainly there before 1661, as he describes the epidemics of that year. In 1663 he became a licentiate of the College of Physicians, and in 1666 he pub-

lished his first medical work, which he entitled *Methodus Curandi Febres*. In 1676 he took the degree of M.D. (Doctor of Medicine) at Cambridge, though not otherwise connected with that university, and in this year the first edition of his *Observationes Medicæ* appeared. In 1680 the first edition of the *Epistolæ Responsariæ* was published, and in 1683 the *Tractatus de Podagra et Hydrope*; and in 1685, the collected edition of his works known as the *Opera Universa*. Sydenham had been long afflicted by gout, which at length undermined his constitution, and he died of that distemper, combined with other maladies, at London on the 29th of December, 1689, in the sixty-fifth year of his age. [J.M.C.]

SYDNEY, ALGERNON, the second son of Robert, earl of Leicester, was born about the year 1621. In early youth he fought in the ranks of the parliamentary forces. Whatever sentiments influenced many of the other opponents of Charles I., his opinions, founded on the spirit of Roman republicanism, were inimical to all monarchy, and he proved them in his disgust at the ascendancy of Cromwell. He was abroad at the time of the restoration, and wandered about for some years scattering bitter sarcasms around against the objects of his political enmity. He was haughty and imperious in his own nature, and seems by no means to have courted the literary and social distinction which his genius might have achieved. His 'Discourses concerning Government,' was a posthumous work. It is full of powerful rhetorical arguments—as when in answer to the proposition of Salmasius, that kingly government is typed in the superiority of one kind of animal over another, he answers that this is nothing but the superiority of brutish violence and injustice, and that the type, 'Though it should prove to be in all respects adequate to the matter in question, could only show, that those who have no sense of right, reason, or religion, have a natural propensity to make use of their strength to the destruction of such as are weaker than they—and not that any are willing to submit, or not to resist it if they can—which I think will be of no great advantage to monarchy.' He was permitted to return to England in 1677. Though he had probably deeper ultimate views, his connection with the Ryehouse plot, for which he suffered, was the same substantially as that of Lord William Russell, already referred to. Sydney met his fate with iron firmness, and was beheaded on the 7th of December, 1683. [J.H.B.]

SYEN, ARNOLD, a Dutch botanist, 1604-1667.

SYKES, ARTHUR ASHLEY, a dignitary of the Church of England, and partizan of Hoadley in the famous Bangorian controversy, 1684-1756.

SYLBURG, F., a German philologist, 1536-96.

SYLLA, LUCIUS CORNELIUS, whose bloody proscriptions have passed into a proverb, was descended from a branch of the famous Cornelian family. He became quæstor when about thirty years of age, B.C. 107, and after obtaining military renown under Marius in Africa, became chief of the aristocratic party in the social war, and vanquished his old companion-in-arms in Italy; he was then, B.C. 88, elected consul. Sylla had marched to his victory over Marius from the field of battle in which Mithridates had succumbed to

him, and the latter having renewed the war, he led another expedition against him B.C. 87. The success to which he had now become accustomed still attended the arms of Sylla, and his operations were one long series of victories, often, however, dearly bought; it was in these wars that he captured Athens, and the victory was such a fearful one that the blood is said to have run out from the city gates into the fields; the most splendid monuments of Athenian art were also doomed to destruction. While these events were taking place in the East, Marius and his party had recovered the dictatorship in Rome, and Sylla, hastily returning at the head of his victorious legions, gained a second great victory over the Plebeians, and entered Rome in triumph in the year 82. He was now absolute master of the lives, liberties, and property of the citizens of Rome, and he used his power as the head of an unprincipled faction, cradled in the blood and crimes of the expiring republic, may be supposed to have done. Sylla governed under the title of perpetual dictator, and strenuously applied himself to the reconstruction of the aristocratic constitution. His contempt for the people may be judged from the instance in which he addressed an assembly of them, on occasion of certain complaints reaching him: he recited this apologue:—‘A labourer when at plough was annoyed by vermin, and he twice stopped from his work and pulled them off his jacket. But finding himself bitten again, to spare himself any further trouble, he threw the jacket into the fire. Now I advise those whom I have twice conquered, not to oblige me, a third time, to try the fire.’ The wholesale nature of his confiscations may be judged from the number of his soldiers, namely, 115,000 men, whom he rewarded with settlements in Italy; finally, he enfranchised 10,000 slaves to increase the number of his partizans, and enrolled them among the free citizens. In a manner as extraordinary, he abdicated all power, B.C. 79, chiefly, we may presume, from his subsequent conduct, that he might exchange the cares of state for the licentiousness of private life. This fact is a sufficient answer, one might suppose, to all that can be urged in behalf of his desire for the public good. No man who is unprincipled and licentious in private life, can deserve credit for any real virtue in his public acts. Sylla died of a disgusting malady B.C. 77, having previously written his ‘Memoirs.’ [E.R.]

SYLVESTER, or **SILVESTER**, *first* of the name pope and saint of Rome, reigned 314-323. The *second*, who was one of the most extraordinary men of his age as an astronomer, mathematician, and man of practical science, succeeded Gregory V. 999, and died 1003. Some of his writings are

extant. The *third* Sylvester was an antipope set up in 1044.

SYLVESTER, **JOSHUA**, one of our inferior poets, translator of Du Bartas’s ‘Divine Weeks and Works,’ born in London 1563, died 1618.

SYLVESTER, **MATTHEW**, a Church of England minister, ejected for nonconformity, 1662.

SYLVIVS, **F.**, a French grammarian, d. 1530.

SYLVIVS, **FRANCIS DELABOE** or **DUBOIS**, a Dutch physiologist and chemist, 1614-1672.

SYLVIVS, **LAMBERT**, otherwise **VANDEN BOSCH**, a Dutch biographer and poet, 1610-1688.

SYMES, **MICHAEL**, an English officer and East Indian diplomatist, author of an ‘Embassy to the Kingdom of Ava,’ died 1809.

SYMMACHUS, a pope of Rome, 498-514.

SYMMACHUS, **QUINTUS AURELIUS**, a prefect, pontiff, and augur of Rome in its declining age, remarkable for his eloquent appeal against the ruin threatened by the triumph of Christianity; he is the author of ‘Epistles’ still extant, and became consul under Theodosius in 391. His descendant, **QUINTUS AURELIUS MEMMIUS**, was a senator in the time of Odoacer 485, and was put to death by Theodoric 525.

SYMMACHUS THE SAMARITAN, a learned Christian of the sect of Ebionites, 2d century.

SYMMONS, **CHARLES**, a dramatic writer, and friend of literature, b. at Cardigan 1749, d. 1826. His daughter, **CAROLINE**, a poetess, 1788-1812.

SYNCELLOS, **GEORGE**, a monk of Constantinople, author of a Chronography, which contains an account of Egyptian kings, and corrects the Chronicon of Eusebius, died 800.

SYNESIUS, a bishop of Ptolemais, in Africa, in the 5th century, who had the advantage of pursuing his philosophical studies under Hypatia. Author of Epistles and other writings.

SYNGE, **E.**, an Irish prelate, 1659-1741.

SYPHAX, kg. of Western Numidia, d. 201 B.C.

SYRIANUS, a philosopher of the school of Neoplatonists at Athens, died 450.

SYROPULUS, **SILVESTER**, a Greek ecclesiastic, historian of the Council of Florence, 15th c. **SYRUS**. See **PUBLIVS**.

SZALKAI, **ANTHONY**, a Hungarian poet and dramatic author, author of the first regular drama composed in his native tongue, died 1804.

SZEGEDI, **JOHN BAPTIST**, a learned Hungarian Jesuit, historian, and jurist, 1699-1760.

SZENT-MARTONII, **IGNATIUS**, a Jesuit and astronomer of Portugal, who suffered a long imprisonment on the suppression of his order in that country, 1718-1793.

SZTARAY, **ANTONY**, Count De, an Austrian general, opposed to Dumouriez, period of the French revolution, died 1808.

T

TABARI, an Arabian historian, 839-925.

TABAREANI, **PIETRO**, an Italian physician, and author of Anatomical Observations, 1702-79.

TABERNEMONTANUS, **JAMES THEODORE**, a German physician and botanist, 1520-1588.

TABOE, **J. O.**, a Ger. jurisconsult, 1604-1674.

TABOUE, **J.**, a French historian, 17th cent.

TABOUE, **J.**, a French poet, 1547-1590.

TACCA, **P. J.**, an Italian sculptor, died 1640.

TACCOLI, **N.**, an Italian historian, 1690-1768.

TACHARD, **GUY**, a French Jesuit, known as a missionary to Siam and India from 1680 to 1694.

TACITUS (**CAIUS CORNELIVS**), the Roman historian. Tacitus was probably born in the reign of Nero, but neither the place nor the exact time of his birth is known. It appears from a letter of

the younger Pliny, who was born A.D. 61, that Tacitus was about the same age with himself, but a little older; he may, therefore, have been born in A.D. 58 or 59. His parentage is veiled in the

[Tacitus—From an Antique Gem.]

same obscurity; but it is not improbable that his father was Cornelius Tacitus, a Roman knight, who is mentioned by Pliny as a procurator of the emperor in Belgic Gaul. We thus know nothing of the training which he underwent in youth, preparatory to the literary labours which he afterwards so ably performed. He has himself recorded a few facts illustrative of his career after he had attained the age of manhood; and these form the only authentic history of his life. He owed his first promotion to Vespasian, and was indebted for further favours to his sons and successors, Titus and Domitian. In A.D. 77 C. Julius Agricola, who was then consul, betrothed to him his daughter, whom he married in the following year. He was one of fifteen commissioners appointed to superintend the celebration of the secular games in A.D. 88, and held in the same year the office of prætor. He was not in Rome when his father-in-law died there A.D. 93, nor does he state the reason of his absence. In A.D. 97 he was elected consul to supply the place of Virginus Rufus, who died during his year of office; and pronounced over the deceased the funeral oration. In A.D. 99 he was appointed by the senate, along with Pliny, to conduct the prosecution of Marius, proconsul of Africa, who was impeached for malversation in his province; and, on the testimony of his associate and friend, made a most eloquent and dignified reply to the arguments advanced in defence of the accused. The time of his death is unknown; but it may perhaps be inferred that he survived Trajan, who died A.D. 117. The extant works of Tacitus are—1. The Life of Agricola, his father-in-law; 2. A Treatise on the Manners and Customs of the Germans; 3. Histories; 4. Annals; 5. Dialogue on Orators, or the Causes of the Decline of Eloquence. The Life of Agricola is one of the earliest works of Tacitus, and must have been written after the death of Domitian B.C. 96. It has been much and justly admired as a specimen of Biography; and is certainly an affectionate tribute to the memory of an able administrator and a good man. His description of ancient Germany and its people is not of much value as an historical document, though there can be little doubt that it contains the hearsay accounts which were prevalent in the age of the

author. The histories, of which only the first four books and a part of the fifth are extant, comprehended the period from the accession of Galba (A.D. 68) to the death of Domitian (A.D. 96). The Annals comprised the period from the death of Augustus (A.D. 14) to the death of Nero (A.D. 68). Of these a part of the fifth book is lost, and also the seventh, eighth, ninth, tenth, the beginning of the eleventh, and the end of the sixteenth, which is the last. The style of Tacitus is concise, vigorous, and expressive; occasionally obscured by elaborate condensation, but always such as to impress the reader with a high opinion of the reflective powers of the writer. [G.F.]

TACITUS, MARCUS CLAUDIUS, successor of Aurelian as emperor of Rome 275, died 276.

TACQUET, A., a Flem. mathematic., 1611-1707.

TADJ-EDDYN, an Arabian historian, d. 1275.

TAFFI, A., an Italian artist, 1218-1294.

TAFURI, J. B., an Ital. biographer, 1695-1760.

TAGLIACCOZIO, TAGLIACCOZZI, or TAGLIACOTIUS, GASPARD, an Italian surgeon, famous for his method of curing wounds of the lips and nose, 1556-1599.

TAHUREAU, J., a French poet, 1527-1555.

TAILLASSON, JOHN JOSEPH, a French painter and writer on art, 1746-1809.

TAILLE, J. DE LA, a French poet, dramatist, and historian, 1540-1595. His brother, JAMES, a poet and author of several tragedies, 1542-1562.

TALLEPIED, NOEL, a French biographer, antiquarian, and historian of the Druids, 1540-89.

TAISAUD, P., a French jurist, 1644-1715.

TAI-TSOU, emperor of China, 951-954.

TAIE-TSOUNG, emperor of China, 977-997.

TALBERT, F. X., a French priest, 1728-1803.

TALBOT, CHARLES, successively earl and duke of Shrewsbury, descended from the famous warrior of that name (next article), was born in 1660. He held the office of lord chamberlain to James II., but actively promoted the revolution of 1688, and became viceroy of Ireland and lord treasurer, d. 1717.

TALBOT, JOHN, earl of Shrewsbury, called 'The English Achilles,' renowned in the French wars, was the second son of Richard, Lord Talbot, and was born at Blechmore, in Shropshire, 1373. Shakspeare calls him 'The Terror of France' with historical correctness, his name at the time having really become proverbial in that country. The history of Talbot commences with his call to parliament by Henry IV., after which, in 1412, he was appointed lord justice in Ireland, and in 1414 lord-lieutenant. He first went to France in the reign of Henry V., 1420, and nine years later, under the regent Bedford, his exploits had rendered his name a word of terror. At this time, however, the Maid of Orleans (see JOAN OF ARC) turned the fortunes of war against him, and Talbot became the prisoner of Charles VII. from 1429 to 1432, when he recovered his liberty by ransom. Under date 1433, the French chronicler, Monstrelet, informs us how 'Messire Jean de Thallebot' came into France, where he conquered many cities and fortresses; on this occasion, in fact, he reasserted the English dominion in that country, and for his services was created marshal of the kingdom; at a later period, 1442, the earldom of Shrewsbury was conferred on him. We next hear of him in an embassy for peace 1443, and then,

1446, in his old lieutenancy in Ireland,—our affairs in France meanwhile going to ruin. In 1449 we read in old Monstrelet's annals, how valiantly he led three hundred men to the assault of Rouen, and planted the English flag on the battlements. He seems then to have returned to England again, and in 1451 went back to Aquitaine as lieutenant-general with extraordinary powers: once more he led the 'noble English' to victory, and, at the head of less than five thousand combatants, recovered Guienne, aided, indeed, by the treason of Lesparre and others. Twice did Charles, and twice did Talbot, recover Bourdeaux,—the latter, on the first of these occasions, becoming prisoner, when he was treated with great courtesy on account of his valour, and presented by Charles with gifts of horses and gold and silver. In 1453 he marched to the relief of Castillon, then besieged by the French, and was killed by a cannon ball in the eightieth year of his age; one of his sons also fell with him on the field of battle, and the English, no longer sustained by his heroic arm, were soon after expelled from France. [E.R.]

TALBOT, P., an Irish Jesuit, 1620-1680.

TALBOT, R., an English antiquary, died 1558.

TALBOT, WILLIAM, successively bishop of Oxford, Salisbury, and Durham, 1659-1730. His son, CHARLES, Lord Talbot, brought up to the bar, was born 1684. In 1719 he entered parliament, became solicitor-general in 1726, and lord chancellor in 1733; died 1797. CATHERINE, only child of Edward, his second son, author of several elegantly written works, 1720-1770.

TALFOURD, THOMAS NOON, the author of 'Ion,' was born at Reading in 1795. He was educated there at the Dissenters' grammar school, and instructed in classical literature by Dr. Valpy. In 1821 he was called to the bar, and first wore the serjeant's gown in 1833. Two years later Serjeant Talfourd became a member of parliament, and published his famous tragedy, followed at intervals by 'The Athenian Captive,' 'Glencoe,' and the 'Castilian.' In 1849 he was appointed a judge of the Common Pleas, and was on the bench at Stafford, apparently in good health, when he suddenly breathed his last on the 20th March, 1854. 'Ion' is acknowledged to be a fine classical production, abounding in passages of remarkable beauty. The character of Talfourd also was well worthy of his literary fame; perhaps no man was more beloved in his own circle for kindness of heart, and all the virtues of social intercourse. His prose works are a 'Life of Charles Lamb,' 'Vacation Rambles,' and a biography of Mrs. Radcliffe.

TALIESIN, otherwise PEN BIERDD, which signifies 'chief of the bards,' one of the most ancient British or Welch poets, between 520 and 570.

TALLART, CAMILLE D'HOTUN, Duc De, a Fr. marshal, defeated by Marlborough, 1652-1728.

TALLENTS, F., a nonconf. divine, 1619-1708.

TALLEYRAND, a younger branch of the family of the counts of Perigord, the first of whom known to history was HELIE DE TALLEYRAND, who lived about 1100. After him we find HELIE DE TALLEYRAND PERIGORD, an influential cardinal and statesman, 1301-1364. H. DE TALLEYRAND, count of Chalais, minister and favourite of Louis XIII., who was out-generaled by Richelieu, and perished on the scaffold 1626. ALBERT ANGE-

LIQUE, cardinal and peer of France at the period of the revolution, fled with the emigration, but returned with the Bourbons, and in 1819 became archbishop of Paris, 1786-1821.

TALLEYRAND-PERIGORD, CHARLES MAURICE DE, the character of his house who fills by far the largest space in history, the prince of diplomatists, was born at Paris in 1754, and educated for the church. His course of life was not very consistent with this profession, but the wish of his dying father prevailed with Louis XVI., and he was named, in 1788, bishop of Autun, a rural diocese in the Bourbonnaise. The connection, studies, and manners of the young prelate were still such as invited him to preserve his place in society, and he frequented not the less the gay salons of Paris, studying, if anything, Voltaire and Fontenelle, and drawing more closely to Mirabeau and the other stirring spirits of that period. In May, 1789, the states-general met, and Talleyrand took his place with the clergy, and, adopting popular principles, actively engaged himself in the reorganization of the state, upon which that body so resolutely entered; he even proposed the confiscation and sale of the church property, and when that measure was carried, zealously applied himself to the creation of a constitutional clergy. For these and similar misdeeds, he was excommunicated by Pius VI. some six months after he had given the sanction of the church to the people's cause by celebrating high mass on the 'altar of the country.' On leaving the church, Talleyrand at once assumed the character by which he is known to history, and went as ambassador to England with M. Chauvelin, with whom also he was suddenly expelled from London by the ministry of Pitt; he then fled to America, his name being compromised in the discoveries of the iron chest, so soon followed by the ruin of the monarchy. He remained in his transatlantic asylum till after the fall of Robespierre, thus escaping the whole period of the reign of terror, and then, returning to Paris, became a member of the newly-founded National Institute, and minister of foreign affairs under the directory. It is at this point that the European interest of his history commences, for he now conspired against his masters, and promoted the revolution which carried Napoleon to the summit of power. Here the question occurs, therefore, What were his convictions? *Faith*, in what any single party might understand by *principles*, Talleyrand had not; yet, he possessed some rare quality of mind which, to him, supplied the place of such a faith, and which has been aptly designated a 'supernatural indifference,'—an indifference not to his own fate, but to whatsoever event might befall the men or the institutions surrounding him, so that his own schemes remained buoyant. Napoleon's summary judgment of him is perhaps nearer the truth than any more laboured criticism, and his words are these:—'Talleyrand was always in a state of treason, but it was a treasonable complicity with fortune herself; his circumspection was extreme; he conducted himself towards his friends as if, at some future time, they might be his enemies, and towards his enemies as if they might become his friends!' This, after all the apologies we have read for him, really seems to be the sum of the matter; and however admir-

able such a character might be as a minister of foreign affairs, there is surely too much of the Mephistopheles element in it to satisfy any lover of honesty; it is a judgment, also, by no means *ex parte* in character, for the fact stated is implied in the very apologies for him. What else is the argument that he shifted from one party to another, lest he should partake in the threatened corruption of the body of which he foresaw the decay, except another way of stating his *treasonable complicity with fortune*; and what would any cause be worth if all its supporters were in this state of perennial treason towards it? What, again, is the moral worth of that man, however great his capacity, who supports a cause on condition of its success? We should be doing injustice to the memory of Talleyrand, not to add that he earnestly desired peace, and the alliance of France and England in a progressive policy; his great misfortune was an overweening reliance on the shifts of diplomacy, his too great willingness to adopt that expedient of abominable cunning—though the expression came from a nobler head than his—‘tell a lie and find it truth!’ Talleyrand remained foreign minister under Napoleon till 1807, when he was created prince of Benevento, and became grand-chamberlain, with the titular rank of vice-grand-elect of the empire. In 1809 he began his opposition to the policy of Napoleon, and being deprived of his office of chamberlain, retired to Valençay, where it would appear he conspired against the emperor. The year 1814 found him acting openly with the allies, and he next appears as minister under Louis XVIII. In the latter years of the opposition which ended in the revolution of 1830, Talleyrand took no part in public business, but on the accession of Louis Philippe, as citizen king, he became ambassador once more in England. This appointment he held till January, 1835, when his great age caused him to resign it, and he was succeeded by General Sebastiani. To him, more than any other man, Louis Philippe was indebted for the creation of his peace policy, maintained, say the French, ‘at any price,’—a matter this which must yet await, some time, a righteous judgment. Died 1838. [E.R.]

‘TALLIEN, JEAN LAMBERT, a Jacobin of the French revolution, chief agent in the fall of Robespierre, was born at Paris 1769, and was successively clerk to an attorney, and in one of the government offices. At the epoch of the revolution he became secretary to one of the deputies, and at the declining period of the Legislative Assembly was editor of the ‘*Ami des Citoyens*,’ one of the journals by which the populace were goaded to anarchy; he also actively assisted in organizing the insurrection of August 10, 1792, on the success of which he was appointed recording secretary of the Paris Commune. From this time Tallien ranked with the most active members of the mountain, and aided in the destruction of the Girondins; he was also implicated in the massacres of September, and became president of the Assembly on the day of the king’s execution. In the beginning of 1794 he was sent with Ysabeau to the city of Bourdeaux to crush the remnant of feeling remaining in favour of Girondism, and place the republican government on a secure basis: here he struck terror into the population by his remorseless use

of the guillotine, at the same time that he revelled in the proconsular splendour and debauchery of which several other cities of France at that time presented a like example. One of the most beautiful and highly spirited women of that age was a Madame de Fontenai, daughter of the count de Cabarrus, a Spanish grandee, of French extraction; she was detained at Bourdeaux *en route* for Spain by the arrest of her husband, and was accustomed to address the clubs, where her appearance excited the greatest enthusiasm. Easily moved to pity by the terror around her, and fond of adventure and notoriety, this woman resolved to conquer the heart of the dreaded Tallien, and she succeeded so well that his greatest pride was to exhibit her in his splendid equipage, clothed in Grecian costume, to represent the goddess of liberty—a parade of Oriental luxury and vice, which disgusted Robespierre beyond expression, while it amused the people and was the salvation of many of them, for whom this modern Thais was never tired of interceding. Being recalled to Paris as the last struggle between Robespierre and these corruptors of the people drew nigh, Madame de Fontenai was arrested, in the expectation that she would lend her assistance in the fall of Tallien, and, at all events, that she might not embarrass the action of Robespierre and Saint Just. She, however, proved true to her lover, and privately conveyed a note to him, in which she reproached him with cowardice if he suffered her now to perish on the scaffold. Thus exasperated, and certain that his own head would fall next, Tallien acted that daring part in Convention, on the 9th Thermidor, which proved the destruction of Robespierre: he was then elected to the Committee of Public Safety, and became president of the Convention; now, also, Madame de Fontenai became his wife. He played a considerable part in subsequent events, and was elected on the Council of 500; the ascendancy of Buonaparte, however, soon threw men of his stamp into the shade, and Tallien died, without ever recovering the undeserved importance he had once enjoyed, in 1820. His beautiful colleague, for such Madame de Fontenai really was, procured a divorce during his absence in Egypt, whither he had gone with Napoleon, and in 1805, was married to the count Joseph de Caraman, afterwards prince of Chimay; she died in 1835. Tallien, we ought to say, admitted his ‘errors’ as he called them, but pleaded the delirium of the times, a fact surely of some significance; ignorant of what the future may have in store for us, let us ponder these circumstances, and consider well what monstrous births might yet be brought forth among the millions who know nothing of Christianity but the name, and little of civilization but its corrupting influences. [E.R.]

TALLIS, THOMAS, the master of William Byrd, one of the greatest of English musicians, was born early in the reign of Henry VIII. The most curious and extraordinary of his works which is still extant was his song of forty vocal parts. This great effort of musical science is carried on in alternate flight, pursuit, attack, and choral counterpoint to the end. This many-voiced piece of Gothicism is terminated by twelve bars of full harmony. Tallis died in 1585, and was buried in the old parish church of Greenwich. [J.M.]

TALMA, FRANCIS JOSEPH, the Garrick of the French stage, was born at Paris about 1770, but a great portion of his boyhood was passed in London. He was educated at a boarding school in Lambeth, and then articled to a surgeon; but soon joined an amateur French company, under Sir John Gallini, at the Hanover Square Rooms, and appeared as *Count Almaviva*, in Beaumarchais' comedy of 'The Barber of Seville,' and other characters. His taste was formed by witnessing the performances of Kemble and Siddons, and on visiting Paris as an actor, and making his *début* on the boards of the theatre Français, he ventured on the new style of acting, but as might have been expected, it was not immediately acceptable. An accident caused, at length, the acknowledgment of his merits. A tragedy by M. Chenier, entitled Charles IX., being accepted, and the part refused by the chief performer, M. Saintfil, who accompanied his refusal with the sneering recommendation that it should be given 'to young Talma;' the recommendation was literally adopted, and Talma, by sedulous study of the part, and an adoption of proper costume, won a decided triumph by the performance. The advantage of his English education was in this apparent; but still more conspicuously in the next occurrence. M. Ducis had undertaken a translation of Shakspeare's 'Othello,' with a catastrophe more suitable, as he thought, to the prejudices of a French audience; but Talma, enlightened by what he had observed of the English stage, insisted on the Shaksperian conclusion. The result was a marvellous success, which placed Talma at the summit of his profession. He won a large fortune by his exertions, a high position in society, and the favour of the emperor Napoleon. He died at Paris, 19th October, 1826, having previously published (1825) 'Reflexions' on the histrionic art, distinguished by much truth and research. He was interred, according to his own directions, in the cemetery of Père la Chaise, without any religious ceremony, but funeral orations by Jouy and Arnault were delivered at the grave. To change, it is alleged, his resolution on this score, the archbishop of Paris had sought an interview, but in vain. Talma's conduct, it is supposed, proceeded from his resentment at the excommunication pronounced by the Roman Catholic Church against actors. A short time before his death, he embraced his theatrical friends, Jouy, Arnault, and Duvilliers, but refused to see Madame Vanhove, his wife, from whom he had been long separated. At the funeral a magnificent hearse conveyed his remains, and was followed by fifteen mourning coaches, besides Talma's own, and several empty carriages, with a great number of literary and theatrical persons on foot, and a multitude exceeding four thousand individuals. A large concourse of citizens also filled the cemetery and surrounded the tomb. Such was the respect shown to the great actor—not excessive, though so significant, for to the artist reverence is always due, and the art of acting is one in which the characteristics of all the other arts are united. [J.A.H.]

TALMONT, A. P. LA TREMOILLE, Prince De, a royalist chief in the war of La Vendée, executed at his castle of Laval 1793.

TALMONT, GABRIELLE DE BOURBON, Prin-

cess De, wife of Louis II. of La Tremouille, author of works of devotion still in MS., died 1516.

TAMBRONI, JOSEPH, a learned Italian poet and historian, 1773-1824. His sister, CLOTILDA, professor of Greek at Bologna, 1758-1817.

TAMBURINI, PIETRO, a famous Italian moralist and writer on jurisprudence, 1737-1827.

TAMERLANE, sometimes called 'Timour the Tartar,' one of those grand old heroes who have in past times disputed the empire of the world, was born at Kesh, a town south-east of Samarcand, in 1335. He was a descendant on the mother's side of the Mongol emperor Genghis Khan, and became sovereign of Tartary after the defeat of Houssein, his competitor, in 1369 or 1370. Saluted emperor, with the surname of *Sahab Karan* (Master of the World), he commenced to make good his title by invading Persia, and in a short time, 1380, took possession of Herat and the whole of Khorassan. It was the age of the capture of Constantinople by the Turks, and all the races of the East were more or less engaged in the struggle for empire. The feeling of Tamerlane was thus distinctly expressed: 'The earth ought to have but one master, as there is only one God in heaven; and what (he asked) is the earth, with all its inhabitants, for the ambition of a great prince?' The barbarian grandeur of resolve thus announced is greatly preferable, if only on the score of manly sincerity, to the same end sought by the tricks of corruption and diplomacy, fearful as it is to contemplate the progress of such a scourge, the cities destroyed, and the pyramids formed of thousands of human heads, which were all that Tamerlane left to mark the spot where they had once flourished. These are scenes it is unnecessary to depict in detail, enough to state that the conquests of Tamerlane had reached from Moscow on the one hand, to Delhi in India on the other, before he marched against his last and greatest foe, the Sultan Bajazet. The eventual battle which decided the question whether the Osmanlis or the Tartars should be masters for the present was fought at Angora, on the 20th July, 1402, the number of combatants on the side of Tamerlane being 200,000 men, having twenty-six elephants, and on the part of Bajazet 300,000 men, with ten elephants. The conflict raged with fury six hours, and after 40,000 of the Turks were laid dead on the field, and 10,000 of their adversaries, Bajazet became the prisoner of his conqueror, who retained him captive, though he treated him with great generosity, till his death in the year following. Tamerlane then, in 1404, returned to his capital, and insatiate of conquest, immediately organized an army of elite troops, numbering 200,000 men, destined to act against China, but he was seized with a violent fever, and died, soon after taking the field, 18th February, 1405. This extraordinary man is supposed to be the author of a book of 'Institutes, Political and Military,' which has been translated from the Persian into French and English. His portrait represents a warrior armed *cap-a-pie*, of lofty stature, with a noble countenance, framed on the Greek model, and a head massive as that of Hercules. While extensive conquests, and the foundation of empires, are rendered necessary by the ignorance and vice of whole masses of population, such a man must be numbered among the great of his kind; the

history of all such, however, proves by accumulated instances, that their successes are only as so many judgments upon society, as grand, and it may be as beneficial in their results as the storms of the atmosphere. If it be so, the sudden rise of empires, and the recurrence of the experiment from age to age, whether under an Alexander, a Caesar, a Tamerlane, or a Napoleon, can but be for a temporal purpose; instead of pointing to universal dominion as the end of society, every fresh attempt does but prove the impossibility of such a result; the master mind seems but the electric spot to which the clouds gather from all sides, till the heavens are black, and the portent explodes in thunder, or dazzles the world with its fires. The end of Providence is not to arm frail man with his thunders, but to render the air free and pure around him: so long as ignorance prevails, so long as the darkest passions continue to ferment and clash with each other, these scenes must recur. After all, we may hope, will come those peaceful communities, of which the policy of our own country and the spirit of its history afford the likeliest promise the world has yet seen. [E.R.]

TAMMEAMEA, a king of the Sandwich Islands, to whom the merit belongs of beginning the civilization of his country, died 1819.

TANCRED, a chief of the crusades, who headed a vast army collected from Apulia and Calabria, and founded the principality of Galilee on Lake Tiberias. He is one of the heroes of Tasso, and his exploits date from 1096 to 1112.

TANDY, JAMES NAPPER, one of the leaders of the 'United Irishmen,' was born in 1757, and became secretary of the Catholic Association at Dublin, where he was a merchant, in 1791. Having escaped to France at the commencement of the government prosecution, he was commissioned as general of brigade in the expedition directed against Ireland under General Rey in 1798. After the failure of this attempt he took refuge in Ham-
burgh, but was delivered up to the English government, and condemned to death. The sentence, however, was not executed, and Napper Tandy, liberated after the peace of Amiens, died at Bour-
deaux, a colonel in the French service, 1803.

TANNAHILL, ROBERT, a Scottish lyric, and author of some of the most popular songs which have been written since the time of Burns. He was born in 1774, in humble life, and followed the handicraft of a weaver. His education, as might be expected, was of the most ordinary character, and the necessity of daily toil necessarily restricted his means of improvement. But the love of song was strong within him, and on the loom he frequently composed his sweet but simple strains, having attached to it a small desk, to enable him to put down his thick-coming fancies as they arose. Though his muse was not of a high-rate character, and never continued long on the wing, there is a gentle pathos, and wild thrilling music in such pieces as 'Jessie the Flower of Dumblane,' 'Gloomy Winter's noo awa,' 'Loudon's bonny Woods and trees,' and some others, which have embalmed them in the hearts and memories of his countrymen. Tannahill was indebted to a Mr. R. A. Smith, a popular composer of his day, for setting several of his pieces to music, and which contributed to their early and permanent notoriety. Like

others of the tuneful tribe, this unfortunate son of song was subject to fits of melancholy, which terminated in mental derangement, under the impulse of which he committed suicide in 1810, by drowning himself in a deep pool of the Paisley canal, leaving behind him a name and reputation, second to few of our minor and popular song-writers. [T.D.]

TANNER, A., a German ascetic, 1572-1632.

TANNER, B., a German writer of the 17th cent.

TANNER, MATHIAS, a Bohemian Jesuit and historian of his order, about 1630-1700.

TANNER, THOMAS, bishop of St. Asaph, author of 'Notitia Monastica,' an account of all the religious houses in England and Wales, 1674-1735.

TANSILLO, L., an Italian poet, 1510-1568.

TANTARANI, M. EDDYN AHMED, an Arabian poet and professor at Bagdad, 11th century.

TANUCCI, BERNARDO, Marquis of, a celebrated statesman of Naples, 1698-1783.

TAPLIN, WILLIAM, a veterinary surgeon author of works on farriery and horses, died 1807.

TAPPER, R., a French theologian, 1487-1559.

TARGAGNOTA, J., a native of Gaeta, author of a 'Universal History,' died 1566.

TARDIF, W., a French translator, 1449-1480.

TARDY, C., a French physician, 1607-1670.

TARGA, L., an Italian physician, 1730-1815.

TARGE, J. B., a French historian, 1720-1788.

TARGIONI-TOZETTI, GIOVANNI, an eminent Italian physician and naturalist, 1712-1783.

TARIN, J., a French *savant*, 1586-1666.

TARIN, P., a French anatomist, died 1761.

TARLTON, or TARLETON, RICHARD, a celebrated actor and wit, author of a dramatic piece, entitled 'The Seven Deadly Sins,' died 1589.

TARNOWSKI, called 'the Great,' an illustrious Polish general and tactician, 1488-1571.

TARQUIN, two kings of Rome:—1. **TARQUINIUS PRISCUS**, fifth in the line of kings, succeeded Ancus Martius 614 B.C., and was assassinated by the sons of Ancus 576 B.C. He contributed much to the fortification and embellishment of the city, and signally defeated the Sabines and Latins: he is considered one of the most illustrious of the Roman kings. 2. **TARQUINIUS SUPERBUS**, seventh king, grandson of the preceding, obtained the throne by the murder of Servius Tullius, whose daughter, **TULLIA**, he had married. He was an able warrior and statesman, but cruel and unprincipled in his conduct; he was dethroned, and a revolution effected, by Junius Brutus, provoked by the outrage offered to Lucretia. The history of Tullia is one of the most atrocious on record, she having murdered her first husband in order to espouse Tarquin, and afterwards driven over the mangled remains of her father in the streets of Rome.

TARSIA, G. DE, an Italian poet, 1476-1530.

TARSIA, P. A. DE, a Span. historian, d. 1670.

TARTINI, GIUSEPPE, was born at Pisano in Istria, in 1692. Tartini was first meant for the law, but music compelled him to follow her bidding, and thus the world gained a great violinist. The story of his dream in which he thought he had made a compact with the devil is well known. The result of this nocturnal vision was his 'Devil's Sonata' still extant and which is esteemed as his greatest work. His life was full of struggles and adventures. He fought several duels, and married

a cardinal's niece against the consent of both her father and uncle. He afterwards took sanctuary in a monastery, where he remained for two years. Tartini became the founder of a school of violinists, of which Nardini, Pugnani, Viotti, and Baillot were celebrated disciples. He died at Padua in 1770. [J.M.]

TARUFFI, J. A., an Italian poet, 1722-1786.

TASKER, WILLIAM, a translator and poet, rector of Iddesleigh, in Devonshire, died 1800.

TASMAN, ABEL JANSSEN, was born at Hoorn in North Holland, about the year 1600. The skill and judgment which he displayed at an early period of his life in the service of the Dutch East India Company, brought him under the notice of its distinguished governor-general, Anthony Van Diemen. His first commission on a voyage of discovery was received from his patron in 1642. For some years previously the Dutch had been vigorously prosecuting geographical researches in the western Pacific; and had already traced a large part of the Australian coasts; but the southern and south-eastern limits were still undetermined. To ascertain these was the object of the expedition put under the command of Tasman in 1642, by the governor-general and council of Batavia. He sailed from that port on the 14th August, and directed his course, first to Mauritius; and then S.E. and E. across the Indian ocean, till on the 24th November, he discovered a country, which he named Van Diemen's Land, in honour of the governor; and which he considered to be a part of the great 'terra australis,' already in great measure surveyed. On the 2d December he doubled its southern limit; and thus proved that it did not extend to a great distance south, as had been before supposed. Tasman now turned northwards; but meeting unfavourable winds, directed his course towards the east; and, in a short time, was so fortunate as to discover New Zealand. Having traced a portion of its coasts, and made many other discoveries in the adjoining seas, he returned to Batavia, after a prosperous voyage of nine months, during which he made many important additions to geography, and cleared up many doubtful points. The results of a second voyage, undertaken in 1644, for a further examination of the same regions, are not certainly known; but, judging from the instructions furnished to him, as given in 'Flinders's Voyages,' and from the circumstance that his own name, those of the governor-general, and his daughter Maria—to whom Tasman was attached,—and of two of the council who signed the instructions, are applied to places on the north coast, there seems no doubt that this portion of Australia was carefully examined by him. Nothing is known of the after life of Tasman, or of the time and place of his death. An account of the first voyage is given in the collections of Thévenot, Correa, and Callender; and with considerable fulness in the Penny Cyclopaedia, *sub nom.* [J.B.]

TASSEL, R., a French painter, 1588-1666.

TASSET, J., a French musician, 1732-1820.

TASSINS, L., a French surgeon, died 1687.

TASSIN, R. P., a learned French Benedictine, author of 'The Literary History of the Congregation of Saint Maur,' 1697-1777.

TASSO, A., an Italian painter, 1566-1643.

TASSO, BERNARDO, father of the great Italian poet, secretary to the duke of Mantua and other Italian princes, and author of several poems, chief of which is the romance of 'Amadis de Gaul,' born at Bergamo 1493, died 1569.

[Residence of Tasso.]

TASSO, TORQUATO, one of the most celebrated and most unfortunate among all men of genius was the son of Bernardo Tasso, himself noted in the roll of Italian poets. Bernardo, noble but poor had passed, from his native town, Bergamo, into the service of the prince of Salerno; and his son was born in 1544, at Sorrento, on the southern shore of the Bay of Naples. We cannot in any degree understand even the soluble questions in the middle of Tasso's life, without remembering what his character was. It exhibited such a preponderance of imagination and feeling, and such a consequent tendency both to ideal dreaming and to timid and irritable sensitiveness, as must probably in any circumstances have unfitted him for active business and made it certain that his happiness and safety could not have been secured otherwise than by the most watchful tenderness and protection. Placed in a situation of uncertainty and dependence overawed by haughty and capricious patrons, and thwarted by the jealousy or contempt of rival worldlings, such a man was necessarily miserable nor can we wonder that the fine mind at length lost its balance under the shocks which it had to sustain.—Tasso studied at Padua, devoted himself to poetry in spite of the warnings of his father, and published 'Rinaldo,' a romantic poem, at the age of eighteen. There are still preserved three cantos of his greater work, written only a year later and he began to remodel and continue it in 1566 when he entered the service of the cardinal D'Este, brother of the duke of Ferrara. The reading of parts of it at court, and beautiful lyrics published by the young poet, made his name famous throughout Italy; and he became yet better known by his pastoral drama, the 'Aminta.' In 1575 the 'Gierusalemme Liberata,' one of the few great epics which the world has seen, was completed. But its illustrious author had not the courage to publish it. Obscure stories are told of unfortunate love what we know is, that the poet was already in a state of incipient derangement. He put himself as a heretic, into the hands of the inquisitors of Bologna, who wisely dismissed him as a hypocrite.

thondriac; he returned to Ferrara, escaped from a convent in which he was placed, wandered on foot to his sister's house at Sorrento, and thence, in 1579, came back to Ferrara. He is said to have now become violent: at all events, the duke shut him up in a madhouse, the hospital of Sant' Anna, where he was imprisoned for more than seven years. The 'Jerusalem' was printed repeatedly in 1581, in spite of his angry prohibitions. It is a chivalrous and Christian epic, displaying a beauty of poetic fancy which had not been reached by any one since Virgil, and a melting tenderness of feeling which has not been equalled in any other great narrative poem. In the meantime, its unhappy author was, by turns, seeing consolatory angels or tormenting demons, and subsiding into intervals of calmness and sanity. He wrote in his dungeon some of his best pieces, both in prose and in verse. He was released in 1586, and soon afterwards published his tragedy 'Torrismondo.' In 1592 he showed evident decay of judgment by issuing an altered and spoiled edition of the 'Gierusalemme.' His life was now one of wandering. He was invited to come to Rome from Naples, and he crowned a poet as Petrarch had been. He obeyed the call, but said, truly, that he went only to die. The applause of crowds, and the honour paid to him by the papal court, shed some consolation over his last days. The time had been fixed for his coronation, when he felt his end approaching, retired to the convent of Sant' Onofrio, on a hill overlooking the Eternal City, and there expired calmly, in the spring of 1595. [W.S.]

TASSONI, A., an Italian poet, 1565-1635.

TASSONI, A., an Ital. ecclesiastic, 1749-1818.

TASTE, L. BERNARD DE LA, bishop of Bethleem, author of Theological Letters on the subject of Convulsaries, 1692-1754.

TATE, FRANCIS, an English lawyer, author of interesting antiquarian works, 1560-1616.

TATE, NAHUM, successor of Shadwell as poet-aureate, author of Poems, and of a metrical version of the Psalms, 1652-1715.

TATIAN, a Platonic philosopher who became a convert to Christianity, and is numbered among those early writers of the church who are charged with heresy. He was born in Syria about 130, and taught in Mesopotamia about 172.

TATIUS, a king of the Sabines, who was put to death at Lavinium about 742 B.C.

TAUBE, F. W. DE, a Fr. geographer, 1724-78.

TAUBMAN, FREDERIC, an eminent Ger. philologist and critic, born in Franconia 1565, d. 1613.

TAULER or THAULER, JOHN, in Latin *Taulerius*, a famous name among the mystic divines, was born at Strasburgh, as nearly as can be ascertained, about 1290, and died there in 1361. He was a monk of the Dominican order, and in several respects one of the most remarkable men of his age, &c., indeed, he may not rightly be regarded as the forerunner of Luther, who, as well as Melancthon, and our own Henry More, highly esteemed his works. His external history possesses little interest beyond that which arises from the circumstances attending his spiritual experience; the brothers of his order having greatly derided, and even persecuted him. The peculiarity which exposed him to this treatment was the slight esteem in which he held their superstitious observances,

his earnest love of truth, and his devotion to the welfare of the people, especially shown by preaching to them in their native German instead of Latin as had previously been the custom. Here also may be mentioned the influence of his style upon the German language, to which he gave a smoother rhythm, a more exact meaning, and a richer vocabulary than it had previously borne; a circumstance which has given him a distinguished place in the history of German prose writers. His sermons are admitted to be models in this respect, but of all his writings we can only notice his famous 'Institutions,' commonly known as 'The German Theology,' a work which has been frequently translated into Latin and French, and exercised as much influence as any other single book on the development of religious thought. Wesley was at first captivated by it, but it went too deep for him, and he finally rejected it, and adopted those methodical religious exercises which acquired so great popularity. The sum of the 'Institutions' may be thus stated:—1. The most rigid performance of mere ceremonials amounts to nothing; it is all but the conceit of form, mere imagery; the beginning of the spiritual life is profound abasement of heart and mind before God. 2. God must be loved above all things, and the neighbour as one's self; this supposes a resignation of all sensual pleasures and external satisfactions, so far as they are not produced from the internal state towards God; in like manner of all self-intelligence, conceit of the understanding, and pleasure of the imagination; this internal self-annihilation is more difficult than mortification of the body, because in the latter case the acts of piety may really be agreeable to the spirit and fall in with its humour. 3. The state to be reached is that of conjunction with God essentially, not under images, or by way of reflection; He then becomes the effective good of the soul and illuminates the sacred shade with which man has surrounded himself.—These are the vital principles treated methodically in the Institutions, and Tauler himself was called *The Illuminated Doctor*, from the visions and spiritual voices that reached him. [E.R.]

TAUNAY, A., a French sculptor, 1768-1824.

TAUNAY, N. A., a French painter, 1755-1830.

TAURELLUS, N., a German philosopher, whose endeavour was to establish a fixed demarcation between theology and philosophy, 1547-1586.

TAURI, D., a French anatomist, 1669-1701.

TAWSEN, TAUSSEN, or TAGESEN, JOHN, called the Luther of Denmark, one of the earliest promoters of the reform in that country, 1494-1561.

TAVANNES, GASPARD DE SAULX DE, a French marshal, and one of the most eminent of their commanders, distinguished in the wars of Italy, and in the religious wars which ended in the massacre of St. Bartholomew, 1509-1573.

TAVELLI, J., an Italian theologian, 1764-84.

TAVERNER, RICHARD, clerk to the signet in the reign of Edward VI., author of religious and theological works, born in Norfolk 1505, died 1575.

TAVERNIER, JEAN BAPTISTE, a celebrated Eastern traveller, born in Paris 1605, died at Moscow 1686. He made an immense fortune in trading with diamonds; his 'Travels,' published in 6 vols., 1679, are highly valued.

TAYLOR, BROOK, a natural philosopher and

mathematician, author of *Experiments on Magnetism*, and other works, born at Edmonton, in Middlesex, 1685, died 1731.

TAYLOR, HENRY, a rector of Hampshire, known as an Arian divine, died 1788. His son, JOHN, well known as a writer of humorous verse by his 'Monsieur Tonson,' and similar pieces, and proprietor of the 'Sun' newspaper, died 1832.

TAYLOR, HERBERT, Lieut.-General Sir, secretary to the duke of York while engaged in the French wars, and private secretary to George III. and Queen Charlotte, 1775-1839.

TAYLOR, JANE, who distinguished herself as a poetical and prose writer for youth, was born in London, where her father exercised the profession of an engraver, 1783. She afterwards removed with him to Colchester, where he became minister to a dissenting congregation. She published her first work, 'The Beggar Boy,' in 1804. The principal of her other productions are 'Essays on Rhyme, on Morals, and Manners,' 'Original Poems for Infant Minds,' 'Rhymes for the Nursery,' a prose tale entitled 'Display,' &c., died 1823.

TAYLOR, DR. JEREMY, an eminent bishop of the episcopal Church of England. He was the son of a barber, who resided in Cambridge, and in that town Jeremy was born in 1613. His father having resolved to educate him for the church, he was sent first to the grammar school and afterwards to Caius College in his native town. His brilliant career procured him the patronage of Land, then chancellor of the university, and from being private chaplain to his patron, he was appointed to the rectory of Uppingham. Through the same influence, he was nominated to the office of chaplain in ordinary to Charles I., to whom on the outbreak of his troubles, Taylor rendered important aid by accompanying him on several of the royalist campaigns, as well as by writing in defence of the English hierarchy. During the reign of the parliamentary party Taylor lost his benefice, and retired into Wales, where he supported himself by teaching a school, till he was taken by Lord Carbury into his house in the capacity of domestic chaplain. It was during his residence with that nobleman, that Taylor composed most of those brilliant discourses that have long ranked him among the most eloquent of British divines. Cromwell's spies kept a vigilant eye upon him, and he twice suffered imprisonment during the Protectorate. At the restoration his steadfast loyalty was rewarded by his appointment to the bishopric of Down and Connor, and the vice-chancellorship of Trinity College, Dublin. Besides his far-famed sermons, Taylor was the author of various other works of great repute—the chief of which are 'Ductor Dubitantium, or Rule of Conscience,' 'Liberty of Prophesying,' and 'Holy Living and Dying.' Bishop Taylor died in 1667. [R.J.]

TAYLOR, JOHN, commonly called 'The Water Poet,' was born at Gloucester, in 1580, and for a long time followed the occupation of a waterman on the Thames, after which he kept a public house in Phoenix Alley, Long Acre. Living at the period of the rebellion he was a staunch royalist, but his manifestations of opinion were rather eccentric than dangerous. He died in 1654, and was buried in the churchyard of St. Paul's, Covent Garden. His works, published in folio, 1630, possess little

interest beyond that which attaches to the quaint conceits and manners of a past age.

TAYLOR, JOHN, a learned dissenter, who became successively minister of a congregation at Norwich, and tutor in divinity at the then newly-founded Warrington academy. He is author of several works on theology and moral philosophy, and is understood to have been of unitarian principles; born in Lancashire 1694, died 1761.

TAYLOR, JOHN, a dignitary of the Church of England, whose father was a barber at Shrewsbury, where he was born 1704. He was a distinguished Greek scholar and civilian, and wrote some valuable works; died 1766.

TAYLOR, JOHN, an English oculist, known by his travels, of which he wrote a narrative, last cent.

TAYLOR, SIR ROBERT, the son of a London stone-mason, who became a famous architect and sculptor, and served as sheriff, 1714-1788.

[Martyr's Stone at Hadleigh.]

TAYLOR, ROWLAND, rector of Hadleigh, in Suffolk, burnt alive in the reign of Mary, 1555.

TAYLOR, SILAS, an antiquarian writer, keeper of the government stores at Harwich, 1624-1678.

TAYLOR, T., a puritan divine, 1576-1632.

TAYLOR, THOMAS, usually called 'the Platonist,' was born in London, 1758, and became clerk in a banking-house, afterwards assistant secretary to the 'Society for the Encouragement of Arts, Manufactures, and Commerce.' He devoted all his leisure to the study of Greek literature and the revival of the Platonic philosophy, for which he was eminently qualified by his keen philosophical insight, the richness of his imagination, and the graces of his diction. He was fortunate enough to find two munificent patrons in the duke of Norfolk and a retired tradesman named Meredith, the latter of whom settled upon him a pension of £10 a-year, while they both supplied him with the expenses of publishing his valuable editions of Plato and other masters of the Grecian philosophy. Mr. Taylor was not simply a translator, though translator of such works would need to possess rare talents and indefatigable industry; he was also a commentator upon his originals, and carried on the war against Locke, in behalf of the Platonic doctrine of ideas, which regard the soul, not as *tabula rasa*, but as a plenitude of forms. One of his concise arguments may here be cited: 'If the soul possess another eye different from that of sense (and that she does so the sciences sufficiently evince) there must be, in the nature of things, species accommodated to her perception different from sensible forms. For if our intellects speculate things which have no real subsistence, such as M

Locke's ideas, its condition must be much more unhappy than that of the sensitive eye, since this is co-ordinated to beings, but intellect could speculate nothing but illusions. Now if this be absurd, and if we possess an intellectual eye which is endowed with a visual power, there must be forms correspondent and conjoined with its vision; forms immovable, indeed, by a corporeal motion, but moved by an intellectual energy.' We cannot give the catalogue of Mr. Taylor's editions and commentaries, as it would occupy more space than his notice, but they all tend to a representation and development of the Grecian theology and of its entire history. Died 1835. [E.R.]

TAYLOR, WILLIAM, author of 'English Synonyms,' and a 'Survey of German Poetry,' was the son of a merchant at Norwich, where he was born 1765. He became an intimate friend of Southey at the close of the century, and editor of a local paper, the 'Norwich Iris,' after which he distinguished himself in the metropolis as a reviewer and critic, died 1836.

TAYLOR, WILLIAM COOKE, a miscellaneous writer in high repute for his indefatigable industry, the versatility of his talents, and the accuracy of his works, was born at Youghal, in Ireland, in 1800, and died of the pestilence which ravaged that country in 1849. Among his works are 'The Life and Times of Sir Robert Peel,' 'Manuals of Ancient and Modern History,' 'History of Mohammedanism,' 'Revolutions of Europe,' and 'The History of the House of Orleans.'

TAYLOR, ZACHARY, president of the United States, was born in Orange County, Virginia, 1790, and was descended from an English family who settled in that state in 1692. His father, Colonel Richard Taylor, was a companion-in-arms of Washington, and bore a name dreaded in Indian warfare; his mother, as usual in the case of men who in any way distinguish themselves, was a woman of high spirit and intelligence. The military life of Zachary Taylor, who was always noted for his hardihood, commenced at the outbreak of the war with England in 1807, when he was commissioned as lieutenant, and sent to defend the borders against the Indians: his great exploit on this occasion was the defence of Fort Harrison on the Vabash, at the head of a garrison numbering only fifty-two men. He rose from grade to grade till he became general in the subsequent Indian wars of Florida and Arkansas, but acquired his great popularity in the invasion of Mexico, 1846, when he crossed the Rio-Grande, and gained in succession the battles of Palo-alto, Resaca-de-la-Palma, Monterrey, and Buena-Vista. His character is very well expressed by the nickname of 'Rough-and-ready,' given to him, according to a very prevalent fashion of honouring their great men, by his countrymen. General Taylor was elected president in November, 1848, and entered upon office in March, 1849. He was carried off suddenly, before completing his term, by an attack of cholera, July, 1850, and was succeeded by Vice-president Tyler. [E.R.]

TEDESCHI, N., an Ital. canonist, 1389-1445.

TEGEL, ERIC, a Swedish historian, died 1638.

TEGNER, E., a Swedish poet, 1782-1847.

TEIA, last king of the Ostrogoths in Italy, conquered by Narses, and killed 553.

TEIGNMOUTH, JOHN SHORE, Lord, an Oriental scholar and administrator, connected with the Indian government in the time of Warren Hastings, afterwards closely allied with the philanthropists of this country, and first president of the Bible Society; born in Devonshire 1751, died 1834. We are indebted to him for the complete edition of the life of Sir William Jones.

TEISSIER, ANTHONY, a French protestant advocate, who became historiographer to the Prussian court, and wrote several works, 1632-1715.

TEKELI, EMERIC, Count, a patriot of Hungary, who headed the revolt of that country against Austria in 1676, died in exile 1705.

TELEMANN, GEORGE PHILIP, a great composer of overtures, time of Handel, 1681-1767.

TELESIO, ANTONIO, otherwise *Thiletius*, or *Tilesius*, an Italian professor of literature and Latin poet, 1482-1533. BERNARDINO, his nephew, a philosopher and mathematician, 1509-88.

TELFORD, THOMAS, a celebrated civil engineer, a striking instance of the many on record of men who have by the force of natural talent—unaided save by uprightness and persevering industry—raised themselves from the lowly estate in which they were born, to take rank among the master spirits of their age. Telford's father was a shepherd of Eskdale in Dumfriesshire, where Thomas, his only son, was born in August, 1757. His father died when he was an infant, and thus the care of Telford's early years devolved upon his mother, for whom he cherished an affectionate regard, and evinced true filial piety. He had the immense advantage peculiar to Scotchmen at that time, of the *parish school* education; but at the age of fourteen he was apprenticed to a mason in Langholm. The construction of small bridges, farm buildings, Scotch churches and manse, were the opportunities afforded him of obtaining practical knowledge. In his autobiography he has expressed his sense of the value of this humble training, observing, that although convenience and usefulness only are studied in such buildings, yet, 'as there is not sufficient employment to produce a division of labour in building, he was under the necessity of making himself acquainted with every detail of procuring, preparing, and employing every kind of material, whether it be the produce of the forest, the quarry, or the forge; and this necessity, although unfavourable to the dexterity of the individual workman who earns his livelihood by expertness in one operation, is of singular advantage to the future architect or engineer, whose professional excellence must rest on the adaptation of materials, and a confirmed habit of discrimination and judicious superintendence.' In 1780 Telford went to Edinburgh, and enlarged his field of observation during two years' employment there, on the splendid improvements of that city then commenced. He then went to London, and was employed in the works of the quadrangle of Somerset House, where he says he 'obtained much practical information.' He was afterwards engaged as superintendent on various buildings at Portsmouth Dockyard. In 1787 he removed to Shrewsbury, to superintend alterations on Shrewsbury castle. Here he erected the new gaol, finally, in 1793, became county surveyor, an office which he continued to hold as long as he

lived. Telford's first bridge was over the Severn at Montford, consisting of three elliptical stone arches, one of 58 feet, the others of 55 feet span. In 1795 he erected the Buildwas iron bridge of 130 feet span. Henceforward his attention was almost solely devoted to civil engineering.—The Ellesmere canal, with its magnificent Christie and Pont-y-Cysylte viaducts, occupied him chiefly from 1795 to 1805. In 1801 Telford was deputed by government to report on the works desirable for the improvement of the internal and external intercourse and trade of Scotland. In consequence of his reports the Highland roads and bridges were made, the Caledonian canal cut, and many ports and harbours made and improved, all of which works he superintended. The Caledonian canal was opened in 1823. It was a gigantic work for the period; but has not proved of much use, or to have been very perfectly executed.—In his extensive practice in bridge building he improved the general practice of engineers of this country, by adopting the important principle of making the spandrels hollow, and supporting the roadway upon slabs laid upon longitudinal walls, instead of filling up the haunches with a mass of loose rubbish, which may press injuriously upon the arch, and often proves of serious inconvenience when the masonry of the bridge needs any repair. Telford improved the Macadam system of road-making, and carried it into effect on the Holyhead roads, for which he was long engineer under the commissioners. The Menai suspension bridge on this road is a noble example of Telford's engineering skill and boldness in design, and even now in juxtaposition with the Britannia Tubular bridge, fairly divides with that great work the admiration of the intelligent observer.—The St. Katherine docks, London, are from Telford's design, and were executed under his direction. There are innumerable happy details in the engineering, for an account of which we must refer to the plates attached to his autobiography. The work of civil engineering, on the success of which Telford seems to have looked with greatest self-complacency, is the improvement of the outfall of the Seine river, by which the drainage of about 30,000 acres of richest sea land was secured, and that of some 80,000 acres greatly improved. This was finished in 1830. He was employed by Swedish governments in the construction of the Gotha canal, and often consulted by the Russian government.—Before leaving Eskdale Telford had acquired some distinction as a poet, and corresponded with Burns, recommending him to take up other subjects of serious nature similar to the Cottar's Saturday Night. He is said to have taught himself Latin, French, Italian, and German. He has left valuable contributions to engineering literature in the articles architecture, bridge, civil architecture, inland navigation, in Brewster's 'Edinburgh Encyclopædia,' and in his autobiography. He was F.R.S.L. and E. Telford became president of the Institution of Civil Engineers in 1820, and remained so till his death in 1834.—In all the relations of life he commanded respect and esteem. He was of athletic form, and reached the age of seventy without any serious illness. It was only late in life that he had any fixed residence. Even in London he lived in an hotel, for many years in

the Salopian at Charing Cross, (now the 'Ship') but from 1825 he resided in 24 Abingdon-Street, where he died on the 2d September, 1834, at the age of seventy-seven. His mortal remains were interred in Westminster Abbey. [L.D.B.G.]

TELL, WILLIAM, the popular hero of Swiss independence: his story is open to grave doubts but the facts certainly known are these. In the time of Albert, archduke of Austria, Switzerland was divided into small baronial fiefs, and independent cities having a democratic form of government; and these free districts, being surrounded nearly by the imperial domains, were objects of great jealousy to the house of Austria, by which at last their subjugation was resolved upon. Already the archduke possessed the right of appointing bailiffs for administering the criminal jurisdiction in all these places, and such a functionary was Gessler, the tyrant of the legend concerning Tell. When the purpose of the Austrians became known, the natives of Uri, Schveitz and Unterwalden, formed the nucleus of an association to defend their country; and three patriot Furst, Melchal, and Staffacher, led them to victory January 13th, 1308, when the baronial castle were attacked and the oppressive barons driven out of the country. The legend of William Tell supplies the circumstance which gave the sign for this sudden rising. Gessler, it is said, appointed governor or bailiff of Uri, caused a plumed cap to be elevated on a pole in a public place at Ältorf, and required the peasantry to render the same homage to it as to himself: the probability is, that it was raised as a standard rally his partizans, and discover the disaffected William Tell, supposed to have been the son-in-law of Walter Furst, treated this symbol with contempt and was ordered under arrest by the enraged governor: the story adds, that his liberty was offered to him on condition of striking an apple, placed on the head of his child, with a bolt from his crossbow;—it relates that he struck the apple, t

[Tell's Chapel on the Lake of Waldstatten.]

having reserved an arrow, destined, as he avowed for the heart of the governor had his child received any injury, he was still detained in custody.

loaded with irons. Gessler had reason to fear that the friends of Tell would liberate him if confined in the prison of Altorf; he resolved therefore to convey him across the lake of Waldstatten to his own castle of Kupnacht. On the passage a violent storm arose, and Tell was released from his bonds as the only person capable of managing the boat, which he shoved towards a flat shelf that jutted out into the lake; on this he suddenly leaped, at the same time snatching up his cross bow, and pushing the boat from shore with his foot as he took the spring: he afterwards lay in wait for Gessler, and shot him as he passed through a mountain defile. It was at this juncture that the peasantry flew to arms at the call of Tell and his fellow-patriots, as already related; and there can be no doubt that his story is *substantially* true, though the embellishment of the apple seems to have been borrowed from a legend of Denmark. Not yet, however, had the Austrians given up all hope of conquering the 'audacious rustics,' as they styled the Swiss peasantry, and in 1315 the mountain passes were invaded by an army of 20,000 men, under the archduke Leopold. This immense force was totally routed by a little band of fourteen hundred Swiss, in the pass of Morgarten, and Tell is believed to have been present in the battle. He is said to have perished in the river Schachen, during a great flood, in 1350. [E.R.]

TELLER, W. A., a Ger. theologian, 1734-1804.

TELLEZ, BALTHAZAR, a Portuguese Jesuit, and historian of his order and of Ethiopia, 1595-1675.

TELLEZ DE SILVA, DON MANUEL, marquis of Aleyrete, a Portuguese historian, 1682-1736.

TELLIER, MICHAEL LE, secretary of state and chancellor of France in the time of Mazarin; he was the chief instrument in procuring the revocation of the edict of Nantes, the order for which he signed, and died a few days after, 1603-1685. His son, FRANCIS MICHAEL, marquis of Louvois, minister of war, and the enemy and successor of Colbert, 1641-1691. CHARLES MAURICE, brother of the latter, archbishop of Rheims, and an active mover in all ecclesiastical affairs at that time, 1642-710. CAMILLE, fourth son of Francis, known as the Abbé de Louvois, a famous doctor of the Sorbonne, 1675-1718.

TELLIER, MICHAEL, a bigoted Jesuit, confessor to Louis XIV., and promoter of the bull *Unigenitus*; his enmity to the Jansenists was so great, that he demolished the very buildings of the Port Royal, 1643-1719.

TEMANZA, T., an Italian architect, 1705-89.

TEMPELHOF, G. F., a Prus. artillery officer and musician under Frederick the Great, 1737-1807.

TEMPESTA, ANTONIO, a Florentine painter of landscapes and battle-pieces, 1555-1630.

TEMPESTA, PETER. See MOLYN.

TEMPLE, a well-known name in the history of English statesmanship, was first borne by SIR WILLIAM TEMPLE, secretary to Sir Philip Sidney, who died in his arms; he afterwards accompanied the earl of Essex to Ireland, and became provost of Trinity College, died 1626. His son, SIR JOHN, became master of the rolls and privy councillor in Ireland in the reign of Charles II., and was an eyewitness of the Irish rebellion, of which he wrote a history, published in 1641. SIR WILLIAM, son of the latter, was the statesman and diplomatist who

played such an important part in the period of William and Mary, and is also known as a miscellaneous writer, 1628-1700.

TEMPLEMAN, PETER, a physician of London, who became keeper of the reading-room in the British Museum, author of several works, 1711-69.

TENIERS, DAVID, the elder, a celebrated Flemish painter, pupil of Rubens, 1582-1649.

TENIERS, DAVID, the younger, was born at Antwerp in 1610; died at Brussels in 1694, and was buried at Pesth, a village between Antwerp and Mechlin, where he had purchased an estate. Teniers is one of the most distinguished of the Flemish painters, though in subject he belongs more to the Dutch school: his pictures are very numerous, and generally represent fairs, markets, merry-makings, guard rooms, beer houses, and other interiors. His execution is remarkably free, but thoroughly true and masterly in every respect. —(Houbraken, *Groote Schouburgh*, &c.) [R.N.W.]

TENISON, THOMAS, archbishop of Canterbury, author of 'The Creed of Hobbes Examined,' 'Remains of Sir Francis Bacon,' and 'Sir Thomas Browne's Tracts,' 1636-1715.

TENNANT, SMITHSON, professor of chemistry in Cambridge, and a discoverer in that branch of science; born at Selby, in Yorkshire, 1761, d. 1815.

TENNANT, WILLIAM, a Scottish poet and philologist, professor of Oriental languages at St. Andrews, author of 'Anster Fair,' died 1843.

TENNHART, JOHN, a native of Saxony, remarkable for his alleged visions and writings, dictated by the 'interior voice,' 1661-1720.

TENON, J. R., a French surgeon, 1724-1816.

TENTERDEN, CHARLES ABBOT, Lord, an eminent lawyer, who succeeded Lord Ellenborough as lord chief justice of the King's Bench, was born at Canterbury, where his father was a hair-dresser, 1762. He acquired an extensive practice as a barrister in the Oxford circuit, on which he entered in 1775, and in 1802 he distinguished himself by the publication of a work since recognized as a standard on Maritime Law. His appointment as judge dates from 1818; died 1832.

TENTZEL, or TENZEL, WILLIAM ERNEST, a German historian and antiquary, 1659-1707.

TERAMO, GIACOMODI, archbishop of Florence, and author of an ascetic romance, 1349-1417.

TERBURG, G., a Flemish painter, 1608-1681.

TERCIER, J. P., a Fr. diplomatist, 1704-1767.

TERENCE, the short name of *Publius Terentius*, a celebrated author of Comedies in the Latin tongue, supposed to have been born at Carthage about 194 B.C. He was carried to Rome as a slave, and brought out his first play, the 'Andria,' in 166, and the others now extant between that period and 160 B.C. Shortly afterwards he went on a literary journey to Greece, and having translated the plays of Menandez, is supposed to have died on his voyage home, about 146 B.C. An English translation of Terence was executed by the elder Colman.

TERENTIUS, T., an Italian Jesuit and missionary, who went to China in 1581 and died there.

TERPANDER, a Greek poet of Lesbos, said to have improved the lyre, 7th century B.C.

TERRASSON, JOHN, a French ecclesiastic, known as a moralist and philosophical critic, 1670-1750. ANDREW, his elder brother, an eloquent

priest of the oratory, 1668-1723. GASPARD, a third brother, a priest of the oratory, and author of a work censured by the Sorbonne, 1680-1752. MATTHEW, cousin to the preceding, a famous jurisconsult, 1669-1734. ANTHONY, son of Matthew, author of a 'History of Roman Jurisprudence,' completed by order of the chancellor D'Aguesseau, 1705-1782.

TERRIN, C., a French antiquarian, 1640-1710.

TERRY, D., an English comedian, 1780-1828.

TERRY, E., an English traveller, 17th century.

TERSERUS, J., a Swedish theologian, b. 1605.

TERTULLIAN, QUINTUS SEPTIMIUS FLOR-
ENS, was the son of a pagan centurion, and was born at Carthage, probably about A.D. 160. His original profession was that of a pleader, or lawyer, and he rose to eminence in the courts. On his being converted to Christianity, he was ordained a presbyter in the church of Carthage. At the end of the second century he became a Montanist. (See MONTANUS). These peculiar views he illustrated with constitutional ardour and keenness. Even in his writings, composed prior to his conversion to Montanism, there are traces of that peculiar temperament which predisposed him to the change. He is supposed to have died about the year 220. The fathers give Tertullian a very high character, and he stamped the impress of his spirit to some extent on the African churches. His works are great favourites of Cyprian, and in asking for any one of them, he used to say to his attendants, *Da magistrum*,—hand me my master. Among the Latin fathers Tertullian occupies a very distinguished place. He had not the sound sense of Augustine, nor the milder graces of Cyprian, but he was inspired with unconquerable zeal, and his style burns with the fervour of his heart. His erudition was extensive, and his acuteness was seldom baffled. His writings exhibit on every page the skill and the defects of a rhetorician. Figures swell into absurd hyperbole, and the language is so twisted as often to be obscure. His arguments are frequently edged with satire, and loaded with severe vituperation. Tertullian's works consist of thirty treatises, apologetical, doctrinal, and ascetical. In the first he combats Jews and pagans, in the second he deals with heretics, and in the third he defends the rigid austerities of his peculiar creed. The best known of his works are his 'Apologeticum,' his 'De Præscriptione Hereticorum,' and his treatise against Marcion. His works were published in two folio volumes by Da Cerdà, Paris, 1624; by Rigaltius, at the same place, in one folio, 1634; by Moreau, in three folios, Paris, 1657-58; twice at Venice, 1701-1744; by Semler, at Halle, in five volumes, 8vo, 1769-73, reprinted in 1827-29 in six 12mos. Leopold's edition occupies four volumes in Gersdorf's 'Bibliotheca Patrum.' But the last and most complete edition is in three large volumes 8vo, Leipzig, 1854, edited with care, elegance, and copious indexes by Oehler, the third volume containing the most important of the dissertations by preceding editors and historians on the life, character, times, and writings of Tertullian. Several of his tracts have been translated into English by Chevallier, Betty, Lord Hailes, and Dr. Pusey. [J.E.]

TESMAN, J., a Germ. diplomatist, 1643-1693.

TESSIER, H. A., a French physician, agriculturist, and member of the Institute, 1740-1837.

TESSIN, NICODEMUS, crown architect of Sweden, and the designer of several great public edifices, 1619-1688. His son, NICODEMUS COUNT TESSIN, also a great architect, senator and marshal to the court, 1654-1728. CHARLES GUSTAVUS, son of the latter, completed the palace of Stockholm, designed by his father, and was afterwards an ambassador and statesman, 1695-1779.

TESTA, PIETRO, an Italian painter, 1611-1651.

TESTI, FULVIO, Count, an Italian poet, who died in prison for a political offence, 1593-1646.

TETENS, J. N., a Germ. politician, 1757-1807.

TETZEL, JOHN, a Dominican monk, who was appointed in 1517 to sell the papal indulgences, which excited the first movements of the reformation; he was a man of bad morals himself, and sold indulgences for the most shameful crimes past or future; died of the plague 1519.

THAARUP, T., a Danish poet, 1749-1821.

THAIS, a Greek courtesan of remarkable beauty who accompanied Alexander to Asia, and became one of the wives of Ptolemy.

THALES, born most probably in the year 636 B.C.: according to Herodotus he was a citizen of Miletus, although by descent a Phœnician. We shall not enter on any of that mere gossip regarding Thales, which has floated downwards from Antiquity; but endeavour rather to discern something, however little, that may be considered sure index to his pursuits and character. That is the opinion of the Greeks he occupied a most distinguished place, cannot be doubted; for the unanimously place him at the head of their list of seven sages; and in so far as we know, he is entitled to claim the origination of Greek Philosophy. He was evidently a close observer of a material nature: it may be said that the Ionian School sprung from him. He had made himself master of all existing Astronomical lore, whether it be a fact or a myth that he predicted the Eclipse of the Sun which occurred during the battle between the Lydians and the Medes. Supposing it a fact, it were quite wrong to endow him with familiarity with any form of scientific process applicable to the calculation of Eclipses; but he must have been well acquainted with the Cycle period comprehending the order of Eclipses. His searching culture of Physics, is, however, more emphatically evinced by his cardinal maxim that 'Water is the ground or primal element of all Things'—a maxim not to be confounded with mere fantastic conjecture, for it was evidently the result of a discriminating observation of the immense and essential influence of that element on all forms of Matter and Life, as well as of its singular transformations. That was no infantile Mind, which at so early an epoch, led the way in generalizing on the ground of Observation. But Thales went farther: his thoughts were not confined within the sphere of Physics. He taught also, that the 'World has a soul, is full of dæmons.' His specific views are lost; but it is clear, even from so slight an intimation, that he led the way in those perilous questionings of the Unseen and the Infinite, which afterwards so distinguished Greek speculation. Thales, besides, was a practical worker among men. He is said to have

accomplished feats of Engineering, to have been skilful in business, and to have taken part in guiding the State. Could we reproduce him thoroughly, it cannot be doubted, that we should discern a Potentate all worthy of the admiration of Greece. [J.P.N.]

THALIUS, J., a German botanist, 16th cent.

THAMAR, a queen of Georgia, 1184-1206.

THEAULON, S., a French poet, 1744-1780.

THEAULON, S., a Fr. dramatist, 1787-1841.

THEDEN, J. C. A., a Ger. surgeon, 1714-1797.

THELWALL, JOHN, an orator of the London Corresponding Society, who was tried with Hardy and Horne Tooke for high treason, afterwards a miscellaneous writer and lecturer, 1764-1834.

THEMISON, a Syrian physician, 1st century.

THEMISTIUS, a Greek philosopher and critic, prefect of Constantinople in 362.

[Themistocles—From an Ancient Bust.]

THEMISTOCLES, an Athenian statesman and general, of the period when Greece was menaced by the Persian empire, was born of obscure parentage in the latter half of the 6th century B.C. His public career was contemporaneous with that of Aristides, and the rivalry between them became a subject of the highest public importance soon after the battle of Marathon (see **MILTIADES**). The character of Aristides seems to have been that of a sturdy republican Tory, resolute to stand upon the good old ways; that of Themistocles was more suited to the exigencies of the period, and he possessed far greater political foresight, not unminged with the duplicity so characteristic of statesmanship in more modern times. Greece was threatened with a partisan warfare between these leaders, when the dispute was terminated by the banishment of Aristides, B.C. 483, and Themistocles was left at liberty to pursue his policy. His great object was the creation of a navy, able to cope with that of the Persians, and to the success of his design may be attributed not only the salvation of Greece, but the supremacy of Athens over the other Grecian cities. He had great difficulties, both material and political, to encounter, and even the Delphian oracle was at first opposed to him: a second response, however, though ambiguous, was interpreted in favour of his design, and Themistocles soon found himself at the head of the Greek armies, and well provided with ships. By a

master stroke of policy, he fairly tricked both the Greeks and Persians into fighting the great naval battle off Salamis, in which he totally defeated Xerxes, B.C. 480: he then took the necessary measures for securing the supremacy of Athens by internal defences, the works of which were carried on in defiance of Sparta. In B.C. 466, the jealousies excited by his great power, led to his banishment by Ostracism, and he retired to the Persian court, where, it would appear, he forgot his patriotism, and plotted against his country. It is related by Plutarch, however, that he poisoned himself rather than yield to the overtures of Artaxerxes. His death, from whatever cause, took place at Magnesia in Asia Minor, B.C. 470, or 472. [E.R.]

THEOBALD. See **THIBAUT**.

THEOBALD, LEWIS, the hero of Pope's 'Dunciad,' known as a miscellaneous writer and commentator on Shakspeare, died 1744.

THEOCRITUS, a Greek pastoral poet, some of whose 'Idyls' and 'Epigrams' are still extant, time of Ptolemy Philadelphus, B.C. 284-247.

THEODATUS, king of the Ostrogoths in Italy, defeated by Belisarius, and killed 536.

THEODEMIR, a prince of the Visigoths in Spain, who reigned over an independent state in New Castile, beginning of the 8th century.

THEODORA, three empresses of the East:—The *earliest* was the wife of Justinian, originally a dancer and courtesan, who ascended the throne with her husband in 527; she occasioned the disgrace of Belisarius, in revenge of her quarrels with his wife, Antonina; died 548. The *second* was the wife of Theophilus, who was left a widow in 842, and ruled as regent for her son, Michael III., till 857, when she was deposed and imprisoned in a monastery; died 867. The *third* was daughter of Constantine VIII., and reigned a short time with her sister, Zoe, in 1042, and alone, after the death of Constantine IX., from 1054 to 1056. She was the last of the Macedonian dynasty. Another Theodora was wife of the Armenian emperor, Leo V.

THEODORE, two popes of Rome:—The *first* reigned 642-649. The *second* survived his election, in 898, three weeks only, and was succeeded by John IX.

THEODORE, a king of Corsica, 1696-1756.

THEODORET, a learned ecclesiastical writer and historian, born at Antioch about 386, d. 457.

THEODORIC, two kings of the Visigoths in the south of France:—**THEODORIC I.**, son of the famous Alaric, was elected on the death of Wallia in 419; he was at war with the Romans some years, but afterwards entered into a league with them against Attila; he was killed in the great battle with the latter on the plains of Châlons 451. **THEODORIC II.**, son of the preceding, acquired the throne by putting to death his elder brother, Thorismund, in 453; he extended the empire of the Visigoths to the foot of the Pyrenees, and was assassinated by his brother, Euric, in 466.

THEODORIC, surnamed 'The Great,' king of the Ostrogoths, and founder of their dominion in Italy, was born in 457, or 459. He was descended from the royal race of that people settled in Pannonia, and his father is supposed to have been one of three brothers who had divided the sovereignty over them, but this point is uncertain.

Sent as a hostage to Constantinople in his childhood, he had the advantage of an education in the politics, philosophy, and jurisprudence of the Greek empire, and was restored to his father, now become sole ruler of the Ostrogoths, at the end of ten years. Italy at this time was swayed by the Heruli and Rugians, two branches of the Gothic stock, acknowledging Odoacer as their prince, whose authority was hated at Rome, and gave occasion to the interference of the Eastern emperor, Zeno, in the affairs of Italy. With the formal consent of the latter, Theodoric went to the conquest of his future kingdom, and having defeated and slain Odoacer, was saluted king of Italy by the army in 493. He now assumed the Roman purple, and made Ravenna his capital; a few years later he married Amalofleda, sister of Clovis, the Frank king. Schlegel's brief notice is sufficiently descriptive of his reign:—'He was highly esteemed in Rome, and by all the Germanic nations; his name, like that of Charlemagne after him, was celebrated in the heroic songs of the Germans, while political writers and historical critics commend alike his talents and his virtues. His rule was generous and noble, he loved and honoured the arts and sciences which his age still possessed, and the last of Roman writers, Cassiodorus, and Boethius, were the ornaments of his reign.' The latter, indeed, and his father-in-law, Symmachus, were allowed by Theodoric to become the victims of false accusations, and his own death was hastened by the melancholy it induced upon him; the shade of Symmachus is said to have haunted him incessantly. Theodoric, like the Goths in general, was an Arian; he died at Ravenna in 526, and was succeeded by his son, Athalaric, who died in 534. The mother of this prince, Amalasontha, then became the wife and victim of Theodoric's nephew, Theodatus, who usurped the throne. These circumstances led to the interference of the emperor Justinian, and produced the expedition of Belisarius in Italy. [E.R.]

THEODORIC, an Italian surgeon, died 1298.

THEODORUS, POPE. See **THEODORE**.

THEODORUS, or **DIODORUS**, bishop of Tarsus in 394, distinguished against the Arians.

THEODORUS LASCARIS. See **LASCARIS**.

THEODORUS PRISCIANUS, a medical writer of the empirical sect, in the 4th century.

THEODOSIUS, called of *Tripolis*, or of *Bithynia*, a Greek mathematician and astronomer, of uncertain date, the age assigned to him varying from 50 B.C. to the 3d century.

THEODOSIUS, called the *Grammarian*, a writer of Syracuse, 9th century.

THEODOSIUS THE GREAT, emperor of the whole Roman world, was the son of a distinguished general of that name, who was executed at Carthage by order of Gratian in 376. The young Theodosius, then about thirty years of age, retired to Galicia, which, according to some accounts, was his native place; but in the third year after he was recalled by Gratian, and proclaimed his colleague in Illyricum and the eastern provinces of the empire. Theodosius now proved himself the worthy successor of **CONSTANTINE**, and delivered the empire from the irruption of the Visigoths, both with the strong arm of the warrior, and the hardy head of the politician; he resembled him also as

the champion of orthodoxy, and eventually completed the work that Constantine had only begun, by extinguishing idolatry, and strengthening the bulwarks of orthodoxy against Arianism. In 383 Gratian became the victim of a rebellion, and Maximus, usurping the western empire, was defeated by Theodosius, who gave him battle on the banks of the Drave in Pannonia. His triumphant entry into Rome took place in 389, but before and after this period he had the arduous task of suppressing continual seditions in the great cities. The most threatening of these broke out at Thessalonica, and Theodosius, yielding to his anger, and to the advice of Rufinus, sent a commission to punish the inhabitants, some thousands of whom were put to the sword, though Theodosius, too late, had countermanded his orders. For this measure of severity he was boldly deprived of Christian communion by Ambrose, archbishop of Milan, who turned him back from the church porch, and only consented to his reunion after a repentance of months. The abolition of paganism dates in 391, and the undisputed sovereign authority of Theodosius in 394, when he defeated Arbogastes, and the pretender Eugenius. He now divided his dominions between his sons Honorius and Arcadius, and expired at Milan the year following, 395. [E.R.]

THEODOSIUS II., grandson of the preceding, succeeded his father, Arcadius, as emperor of the East, in 399. He was a feeble prince, but a body of laws is named after him, the 'Theodosian Code,' and he had to sustain a war with Persia, and a series of religious quarrels; died 450. **THEODOSIUS III.** was proclaimed emperor on the deposition of Anastasius II. in 715; he yielded the government in his turn to Leo III. in 716, and d. in a monastery.

THEODOTIUM, or **THEODOTUS**, an Ebionite of Ephesus, translator of the Bible into Greek, 2d c.

THEODULF, bishop of Orleans in the time of Charlemagne in 781, died in exile 821.

THEOGNIS, an elegiac Greek poet, 6th c. B.C.

THEON, a Greek painter, 4th century B.C.

THEON, a celebrated mathematician and Platonic philosopher of Smyrna, 2d century.

THEON, the father of Hypatia, and himself a learned mathematician, and master of the ancient doctrines of the Alexandrine school, flourished 365. He wrote a work still extant.

THEOPHANES, a Lesbian poet, and historian of the wars of the Romans in the time of Pompey the Great. He was first attached to Mithridates, afterwards to Pompey, and at length to Cæsar. Only some fragments of his history are now extant, but it was made use of by Plutarch.

THEOPHANES, **GEORGE**, a Greek historian of the Eastern empire, died in exile 818.

THEOPHANES, **PROKOPOVITCH**, a Russian historian and archbishop of Novogorod, 1681-1726.

THEOPHILE VIAU, or **DE VIAU**, a French satirist and epigrammatic poet, 1590-1626.

THEOPHILUS, a saint and bishop of Antioch, who is reckoned among the fathers of the church; he was the first Christian writer to use the word Trinity; flourished in the 2d century.

THEOPHILUS, patriarch of Alexandria, and an enemy of Chrysostom, 385-412.

THEOPHILUS, a Greek jurisconsult, one of those employed on the Justinian Code, 527-565.

THEOPHILUS, emp. of Constantinople, 829-42.

THEOPHRASTUS, a celebrated Greek philosopher and botanist, was born at Eresos (or Erisium) in the island of Lesbos, in the year B.C. 371. He died about the year B.C. 286. He studied under Plato and Aristotle, and was nominated by the latter as his successor in the school of the Lyceum. He taught there with such increasing reputation, that he had at one time collected round him a number of pupils amounting to 2,000. He was distinguished for his engaging manners and great eloquence, which it is said procured for him his name Theophrastus, or the Divine speaker. He was the author of many works on various subjects, of which Diogenes Laertius enumerates 200. Several of them have been preserved, and amongst them two on botany, which prove him possessed of a comprehensive genius, and show him to be a diligent inquirer into nature. The many new observations offered in his 'History of Plants,' and in his work on the 'Causes of Plants,' his large views and the deep knowledge displayed by him of the secret laws of organization have given him a great reputation, and caused him to be looked up to as the father of botany. [W.B.]

THEOPHYLACTUS, a Greek historian of some of the Byzantine emperors, 7th century.

THEOPOMPUS, a Gr. historian, B.C. 380-308.

THEOS, or THEOT, CATHERINE, one of those singular characters who acquired a strange notoriety at the period of the French revolution, by pretensions to supernatural authority. She was born in 1725, and had been known many years before the revolution as the claimant of a mission to regenerate the human race; she had fallen into obscurity however till the events of 1794, when she took the place of Labrousse, another of these prophetesses, who had become a prisoner at Rome. The chief disciple of both these women was Dom Gerle, who formed the link between Catherine Theos and whatever connection existed on the part of Robespierre; and, besides this, acted as the high priest of the new religion that was founded upon her prophecies, and to which thousands of the populace attached themselves. A worship, with supernatural claims, initial rites, and certain spirit manifestations was really instituted, the phenomena of which are to be explained, not by naked imposture, but by the marvels of clairvoyance and animal magnetism *misunderstood and blasphemously misappropriated*. Unhappily, many noble and virtuous names became implicated by a series of misadventures in the reunions around this pythoness, and among others the lovely Madame de Sainte-Amaranthe and her family, who were suddenly arrested, to the number of sixty-two, by order of the Committee of General Surety, and charged with conspiracy. Catherine Theos died in prison; the rest were executed shortly before the fall of Robespierre, 1795. [E.R.]

THERAMENES, an Athenian statesman and general, who took a leading part in the subversion of the democracy, was born in the Isle of Cos, about the middle of the fifth century B.C. He was the colleague of Antiphan and Phrenicus, and all three laboured in the political designs of Pisander. The hope of this party was an alliance with Persia, which could not be brought to pass with a democracy, failing, as it would, to supply a sufficient number of traitors having a political interest in

Persian supremacy. The conspiracy dates about 411 B.C., and resort being had to terror, it was eminently successful: the orators of the people were disposed of singly by assassination, and finally, by a sudden display of military power, the senate was dissolved, and an oligarchy of 400 established in its stead. Soon, however, the conspirators quarrelled among themselves, and Alcibiades was recalled at the instance of Theramenes and Critias, who pretended to moderation; the 400 were then dispersed by flight, and some of them were put to death on the accusation of the minority. The restoration of the democracy was followed by the most remarkable events of the Peloponnesian war, and Theramenes frequently distinguished himself as a commander; at the naval battle of Arginuse, B.C. 406, he commanded the right of the Athenians. Soon after this, Athens was blockaded by sea and land, and the remnant of the 400 returned as victors, under the standards of Lysander, with whom Theramenes conspired to re-establish an oligarchy this time, consisting of a smaller number, generally called the *thirty tyrants*: among the principal of this body were Theramenes and Critias. A struggle now commenced between the treacherous moderation of the former, and the cruel determination evinced by the latter, the result of which was the condemnation of Theramenes. He was taken from the altar where he had fled for refuge, and on the cup of poison being presented to him, he drank, with bitter irony, 'To the health of the good Critias.' This event took place in 403 B.C. [E.R.]

THERESA, SAINT, a mystic writer and reformer of the Carmelite order, 1525-1582.

THEROIGNE DE MERICOURT, a character of the French Revolution, is a name we should hardly admit into these pages, but for the sake of a word or two we have at heart, and cannot well find utterance of elsewhere. She was born at the village of Mericourt near Liège, where her family lived in opulence as farmers, was highly educated, and being remarkable for her beauty was seduced at the age of seventeen by the young lord of a neighbouring chateau. The period of the Revolution found her at Paris, passing from one master to another among the great, and finally enrolling herself in the mass of courtezans, but all the while playing an influential part in secret politics, and as a club orator. At last, Theroigne became first in every scene of tumult; clothed in a scarlet riding habit, and a plumed cap, she headed the most desperate attacks, and decided on the life and death of the victims of the faubourgs by a nod. After the excesses of the 10th of August this amazon inclined towards the moderate counsels of the Girondins: perhaps she had sufficiently avenged her dishonour, and the original cause of it had fallen among many others, vainly asking his life at her hands. Whatever the cause of her change, it gave offence to the furies of the guillotine, who, on meeting her one day, stripped her naked, and publicly whipped her on the terrace of the Tuileries. This outrage turned the miserable creature's brain, and she passed the remainder of her life, nearly twenty years, in a madhouse—one of the saddest pictures of humanity, totally brutalized, that imagination ever conceived. Enough of her! but how many thousands of similar victims, prepared for a like career, if circumstances admitted.

it, may be counted in the streets of our great cities? What a work it would be, in an age of noble endeavour like the present, to trample out this plague spot, this foulest image of hell upon earth, this crying disgrace of a Christian land! In other days the youth of a nation have engaged in crusades and chivalrous fellowships, with objects in view that shed a far less glory upon them, than a conquest such as this would confer on the age and nation that accomplished it. Here is a work of more genuine heroism than ever inspired the imagination of Jesuit or Paladin—a work most truly Christian and full of promise, and one which most of all requires united action and persevering enthusiasm for its accomplishment. [E.R.]

THESPIS, the inventor of tragedy, was a Greek poet, born at Xarxa, in Attica, and became famous about 540 B.C. His stage was the chariot in which he drove about Greece, and his invention consisted in the introduction of a person who conversed with the chorus, and represented different characters by means of masks.

THEUDIS, king of the Visigoths, 531-548.

THEUDISELUS, successor of Theudis as king of the Spanish Visigoths, 548-549.

THEVENARD, A. J. M., a French admiral, naval engineer, and administrator, 1735-1815.

THEVENOT, MELCHISEDEC, a French traveller, author of several curious descriptive works, 1620-1692. His nephew, **JOHN**, also a traveller and writer, 1633-1667.

THEVET, A., a French traveller, 1502-1590.

THEW, ROBERT, an Eng. engraver, 1758-1802.

THIBAULT, J. T., a Fr. painter, 1757-1826.

THIBAULT, N., a deputy of the clergy to the estates-general, and an active politician, died 1812.

THIBAUT, **THIEBAUT**, or **THEOBALD**, brother of Ladislaus II., king of Bohemia, remarkable for his uprightness as protector of his brother's kingdom during the crusade of 1147.

THIBAUT, six counts of Blois:—**THIBAUT I.**, count of Troyes, Beauvais, and Meaux, and first count of Blois, from 924 to about 978. **THIBAUT II.**, reigned 995-1004. **THIBAUT III.**, count of Blois, Tours, and Chartres, 1037-1089. **THIBAUT IV.**, a party to all the leagues formed against Louis le Gros; he became master of Champagne in 1125; 1102-1151. **THIBAUT V.**, called 'the Good,' son of the latter, succeeded 1152, and became grand seneschal of France; he died at the siege of Jean d'Acre 1190. **THIBAUT VI.**, last count of his house, succeeded Louis 1205, d. without issue 1218.

THIBAUT, five counts of Champagne, the first two of whom are the same as the *third* and *fourth* of Blois. The *third* (or the *fifth*, according to the line of Blois) succeeded his brother, Henry II., 1197, died 1199. **THIBAUT IV.**, famous as one of the earliest troubadours, was born 1201, and added the kingdom of Navarre to his paternal dominions by a marriage in 1234. In 1235 he embarked in the crusades; died 1253. **THIBAUT V.**, or **THIBAUT II.**, as king of Navarre, was the son and successor of the preceding, died 1270.

THIBAUT, two dukes of Lorraine:—the first of whom reigned 1213-1220; the second, 1304-12.

THIBAUT, two counts of Bar:—the first of whom reigned 1191-1214; the second, 1239-1296.

THIBAUT, ANTON JUSTUS FRIEDRICH, a famous jurist, professor at Heidelberg, 1792-1840.

THICKNESSE, ANNE, an accomplished lady, daughter of John Lord, solicitor and clerk of the arraigns, and third wife of Philip Thicknesse, lieutenant-governor of Landguard fort; author of 'Biographical Sketches of Literary Females of the French Nation,' 1737-1824. Mr. Thicknesse, by his second wife, was father of George Touchet, Baron Audley, and wrote some curious Memoirs reflecting on his son, 1720-1792.

THIELEN, JOHN PHILIP VAN, lord of Couwenberg, a Flemish painter, 1618-1667.

THIERRI, or **THEODORIC**, the name of four French princes, two of whom are reckoned kings of France:—**THIERRI I.** (king of Mentz), eldest son of Clovis I., succeeded 511, and having extended his kingdom at the expense of Theodoric, king of the Ostrogoths, died 534. **THIERRI II.** (king of Orleans, Burgundy, and Austrasia), son of Childebert II., succeeded 596, and died of poison, leaving six natural sons, none of whom succeeded him, in 613. **THIERRI III.** (or **Thierry I.**, king of France), third son of Clovis II., and brother of Clothaire III. and Childeric II., was placed on the throne of Neustria and Burgundy by Ebroin, maire du Palais, in 670. He was defeated by Pepin of Heristal in 687, and possessed no real power; died 692. **THIERRI IV.** (or **Thierry II.**, king of France), only son of Dagobert III., was taken from a monastery and placed on a pretended throne by Charles Martel, in place of Childeric, 720; died 736 or 737.

THIERRI, J., a French philosopher, died 1660.

THIERS, JOHN BAPTIST, a learned French theologian, remarkable for his curious choice of subjects, generally tending to reform, 1636-1703.

THIERY, N. J., a French botanist, 1739-1780.

THIRLBY, STYAN, a learned writer, editor of an edition of Justin Martyr, 1692-1753.

THISTLEWOOD, ARTHUR, chief of a conspiracy for murdering the cabinet ministers and exciting an insurrection during the administration of Lord Sidmouth, was born near Lincoln, where his father was a respectable farmer, in 1772. He was a man of education, and had squandered a considerable fortune before embarking in his criminal enterprise; executed May 1, 1820.

THOM, JAMES, a native of Ayrshire, celebrated as a sculptor, was born in 1799, and died at New York, where he had gone twelve or fourteen years previously, in 1850. He rose from the condition of an obscure stone-cutter by his own unaided genius, and acquired a famous name in London for his execution of busts and groups in Scotch graystone. The well-known group of 'Tam O'Shanter' is from his chisel.

THOM, JOHN NICHOLLS, leader of the Canterbury riots in 1838, was a native of Cornwall and first became known about the period of the Reform Bill. He assumed the name of Sir William Courtenay, knight of Malta, and, exhibiting his fine person to the people, often graced by rich costumes, completely fascinated them by his singular talents. In 1833, he became a candidate for Canterbury, and polled nearly a thousand votes, after which he was confined four years in Maidstone lunatic asylum. Having escaped from the custody of his friends, he reappeared in Kent in the spring of 1838, and, claiming a divine mission persuaded nearly 100 of the most resolute characters to join him. The immediate object of

Thom was to establish himself as lord of Kent, and the standard he raised was a loaf elevated on a pole, with a flag of white and blue, emblazoned with a lion rampant. This band really took the field at Boughton, on the 28th of May, and sustained a conflict with the military at Bossenden wood, on the 31st. Thom, and eight of his party, fell before the fire of the soldiers at the first onset, and many others were seriously wounded: the disclosures at the trial of the remainder, afforded the most painful evidence of the ignorance prevailing among our peasantry; and also marks of that noble faith in supposed greatness, which has animated the martyrs and heroes of the greatest events in the world's history,—a singular proof that human nature is still the same as in past ages, and that only leaders are wanted for any cause, whether it be good or evil. This little episode in the peaceful annals of recent years, ought to be read as a lesson by our educators, and especially by the clergy. What has been may be again, so long as so many thousands of our countrymen are doomed to poverty and ignorance. The affair of Thom caused some discussion in parliament at the time. [E.R.]

THOM, WILLIAM, known as the poet of Inverury, was born at Aberdeen in 1788. He soon gave indications of poetic genius in some pieces which appeared in the Aberdeen newspapers; and afterwards published two volumes, full of poetic feeling, which were well received by the public. In 1845 he visited London, where he was *feted*, and had substantial gifts conferred on him, but notwithstanding he died in deep poverty, in Dundee, in 1848.

THOMAS, the apostle, whose name in Greek, signifying a *twin*, is written *Didymus*, was probably a Galilean like his fellow-labourers, but his history is almost unknown. He is supposed, with good reason, to have travelled far East, even to China and India, in the course of his mission. The churches of Malabar have preserved some traditions of his martyrdom.

THOMAS AQUINAS. See AQUINAS.

THOMAS, count of Savoy, 1188-1233.

THOMAS, ANTHONY LEONARD, professor of the college of Beauvais, author of an 'Essay on the Character, the Manners, and the Understanding of Women,' 1732-1785.

THOMAS, A. J. B., a Fr. painter, 1791-1833.

THOMAS, ELIZABETH, a writer of the times of Dryden and Pope, the latter of whom placed her in the Dunciad, author of Poems and Letters, and of a Memoir of her own Life, 1675-1730.

THOMAS, J. E., a German painter, 1588-1653.

THOMAS, JOHN, a Flem. painter, 1610-1673.

THOMAS, JOHN, bishop of Rochester, 1712-93.

THOMAS, R., a medical writer, 1753-1835.

THOMAS, WILLIAM, bishop of Worcester, author of an 'Apology for the Church of England,' 1613-1689. His grandson, of the same name, rector of St. Nicholas, in Worcester, and an antiquarian writer, 1670-1738.

THOMAS, WILLIAM, a Welch divine, known as a learned writer, and supposed to have been concerned in Wyatt's rebellion, ex. at Tyburn 1553.

THOMASIN, or TOMASIN, called *Tinkeläse*, *Clir*, or *Zerkler*, a German poet, 13th century.

THOMASIVS, JAMES, a professor of Leipzig, among whose pupils was numbered the celebrated Leibnitz, author of 'The Origin of Philosophical

and Ecclesiastical History,' 1622-1684. His son, CHRISTIAN, a jurisconsult and philos., 1655-1728.

THOMASSIN, three French engravers:—PHILIP, died at Rome end of the 16th century. His relation, SIMON, died 1732. H. SIMON, the son and pupil of the latter, 1688-1741.

THOMASSIN, L., a Fr. engineer, 15th century.

THOMASSIN, LOUIS, a priest of the French oratory, known as a writer on ecclesiastical discipline, 1619-1695. His cousin, CLAUDE, also an oratorian and writer, 1613-1692.

THOMOND, T., a French architect, 1759-1813.

THOMPSON. See RUMFORD.

THOMPSON, EDWARD, a miscellaneous writer and friend of Churchill the poet, famous for his sea-songs, born at Hull about 1738, died 1786.

THOMPSON, WILLIAM, dean of Raphoe, in Ireland, known as a poet, died about 1766.

THOMSON, ALEXANDER, a miscellaneous writer and poet, born 1762, died at Edinburgh 1803. He was the author of 'Whist,' a poem in two cantos, 1791; 'The Paradise of Taste,' 1793; 'The German Miscellany, consisting of Dramas, Dialogues, Tales, and Novels, translated from that Language,' 1796; 'The British Parnassus at the Close of the Eighteenth Century,' and some others.

THOMSON, ANDREW, a doctor and eloquent preacher of the Scotch Kirk, 1779-1831.

THOMSON, ANTHONY TODD, a Scottish physician and professional writer, was born at Edinburgh in 1778. In 1806 he commenced practice at Chelsea, and in 1826 became professor of medical jurisprudence and the *Materia Medica*, at the London university. The professional works written by him are his 'Conspetus,' 'London Dispensatory,' 'Materia Medica,' and a 'Treatise on Diseases of the Skin.' Besides these, he translated Salvart's 'Philosophy of Magic,' and edited an edition of Thomson's 'Seasons.' Died 1849.

THOMSON, JAMES, was born in 1700, at Ednam in Roxburghshire, of which his father was then the parish minister. To the images of agricultural life, with which this beautiful district furnished his childhood, were afterwards added scenes of another cast, in the pastoral parish of Southdean, to which his father removed. After having passed through the borough school of Jedburgh, he studied for several years at the university of Edinburgh. He was intended for the church, and is said to have been diverted from the profession by the censure of a theological professor on one of his exercises. At any rate, he had already written verses, and was ambitious enough to hope for fame by writing more; and, without any fixed view beyond literary employment, he started for London with his poem of 'Winter' in his pocket. David Mallet, whose own literary reputation is long since eclipsed, conferred eminent service on literature by smoothing the way for Thomson, whom he had known at college. The author of 'Winter,' being without money to buy a new pair of shoes, congratulated himself when a bookseller gave him three guineas for his poem. It was published in 1726, and became rapidly popular when one or two literary men had called attention to it. Thomson, provided for in the meantime as tutor in the family of Lord Binning, published 'Summer' and 'Spring' in the next two years; and in 1730, 'Autumn' being added, the four poems were printed together,

under their common title 'The Seasons.'—The appearance of the series was a phenomenon more remarkable than we are apt to suppose. The raw young Scotsman, meditating among the Cheviot hills and by the banks of the Tweed, had struck out a vein of poetry which had not been worked in England since the restoration. When his poem appeared, the artificial school of Pope was in the

[Arbour in Thomson's Garden]

ascendant; and the fashionable poets of the day were alike distant from simplicity and nature in the themes they selected, and in the form with which they invested them. Thomson was far from being pure in taste: his tone of sentiment, too, is very often mawkish, and his diction almost everywhere pompous and pedantic. But the closeness with which he observed external nature has hardly ever been surpassed; and the poetic intuition with which he apprehends the features of a landscape, and the moral associations which clothe it with the finest part of its beauty, is as keen and exquisite as that of Wordsworth himself.—While the parts of his great work were in progress, Thomson produced, among other things, his unfortunate tragedy of 'Sophonisba.' In 1731 he travelled in France, Italy, and Switzerland, as a tutor; and the father of his pupil, on becoming the Lord Chancellor Talbot, gave him a sinecure place in his court, which was lost on the patron's death. This event drove him again to write for the stage. There is very little merit even in 'Tancred and Sigismunda,' the last and most successful of his plays. A pension from the prince of Wales raised him just above penury; and in 1745 his friend Lord Lyttleton, coming into power, made him surveyor-general of the Leeward Islands, an office yielding him three hundred a-year. He had long worked on his 'Castle of Indolence,' which he published in 1748. This beautiful poem shows a wonderful improvement in taste, and betrays a love of Old English poetry which was hardly felt by any other person of the time. The poet did not long enjoy the ease in which he was placed. Living in a cottage at Kew, he caught cold in sailing up the Thames, and died of fever in 1748. He was a friendly, shy, and indolent man. [W.S.]

THOMSON, JOHN, a Scottish minister and landscape painter, born in Ayrshire 1778, d. 1840.

THOMSON, THOMAS, M.D., born at Crieff, Perthshire, 12th April, 1773; died at Glasgow, 2d July, 1852. Dr. Thomson was educated at the

parish school of his native place until his fourteenth year, when he was placed under the tuition of Dr. Doig, rector of the borough school of Stirling, and author of 'Letters on the Savage State,' a work which attracted much notice at the time of its publication. His master, an eminent classical scholar, speedily imbued him with a love of literature, which afterwards enabled him to apply numerous improvements to his favourite science. On the conclusion of his scholastic studies he gained a bursary by public competition at the university of St. Andrews, where he remained for three sessions. In 1796, while pursuing his literary and scientific studies at the university of Edinburgh, he succeeded his brother, afterwards the Rev. Dr. James Thomson, minister of Eccles, as one of the editors of the 'Encyclopædia Britannica.' His attendance on the lectures of the celebrated Dr. Black, during the sessions 1795-96, imparted to him an intense interest in the science of chemistry, which never deserted him during his subsequent career. He entered on this study with devotion, and wrote the articles Chemistry, Mineralogy, Vegetable Substances, Animal Substances, and Dyeing Substances, which all appeared before the 10th December, 1800, and formed the groundwork of his celebrated 'System of Chemistry,' which soon became the text-book of the science in almost every country in Europe. In 1800-1 he gave his first course of lectures in Edinburgh with fifty-two pupils; a second course in the summer of 1801 was attended by thirty-nine students. On the appearance of the first edition of his Chemistry his winter class swelled to ninety-six members. He continued his lectures till 1810, in the lawyer's metropolis of his native country, attended usually by the most select of the Scottish and English students, as his roll-book contains such names as James Mill the historian, James Wardrop, Charles Badham, Henry Cockburn, James Ballantyne, the distillers Haigs and Steins, George Ballingall, John Abercrombie, Benjamin Traversa, John Thomson, Andrew Rutherford, Sir James Sutcliffe, Sir Thomas Kirkpatrick, &c. &c. His lectures formed, however, but a secondary portion of his employment, his time being principally taken up with the preparation of new editions of his System, conducting an extensive series of researches upon brewing for the excise, a work which laid the basis of the Scottish legislation on this subject, and in various chemical consultations. During this period, also, he invented the system of symbols which are now in universal use, as modified in some respects by subsequent discovery, and introduced the use of Greek and Latin numerals to designate the various degrees of oxidation, &c. of which bodies are susceptible, and which are also in general use. He likewise first opened in this country a laboratory for practical manipulation. In 1810 he published his 'Elements of Chemistry.' In 1812 he visited Sweden, and published his travels in that country. In 1813 he commenced the 'Annals of Philosophy,' and continued to edit this journal for several years. In 1817 he was elected lecturer on chemistry in the university of Glasgow, a position which was endowed as a professorship in 1818. In 1825 he published 'An Attempt to Establish the First Principles of Chemistry by Experiment,' 2 vols. 8vo, comprising the results of many thou-

sand experiments to determine the atomic weights of bodies; the most important of which have been confirmed by subsequent experiments. In 1830-31 he published the 'History of Chemistry,' in 2 vols. In 1836 'Outlines of Mineralogy and Geology,' 2 vols. 8vo, being a portion of the seventh edition of his 'System of Chemistry.' His last work was 'On Brewing and Distillation,' 8vo, 1849. Dr. Thomson's discoveries were exceedingly numerous, including chlorocromic acid, hyposulphurous acid, hydrosulphurous acid, potash oxalates of chromium, potash chromate of magnesia, chloride of sulphur, called Thomson's liquor, and an immense number of salts, &c. &c., and above fifty species of minerals. Dr. Thomson invented Allan's Saccharometer, which is used by the Scottish excise, from which the idea of Bate's instrument, used in England, was taken; the original inventor being thus deprived of the proper reward of merit. Dr. Thomson as a chemical teacher was most distinguished. He has left behind him a numerous band of chemists, who occupy as teachers, manufacturers, and physicians, some of the most prominent positions in the country. [R.D.T.]

THOMSON, WILLIAM, a Scottish minister who settled in London as an author, and became editor of several periodicals, an. of 'The Man in the Moon,' and 'Memoirs of the War in Asia,' 1746-1817.

THORE, J., a French physician, 1762-1823.

THORER, A., a Swiss Hellenist, 1489-1550.

THORESBY, RALPH, a merchant of Leeds, kn. as an antiquary and topographer, 1658-1725.

THORILD, THOMAS, a Swedish poet, philosopher, and critic of taste, remarkable as a writer on the beautiful in nature, professor at Greifswalde and Upsala, 1759-1808.

THORNDIKE, HERBERT, a dignitary of the church, and a great wr. on church principles, d. 1672.

THORNHILL, SIR JAMES, an eminent English painter, was born at Weymouth in Dorsetshire, 1676. He was a nephew of Dr. Sydenham, the celebrated physician, who placed him under the tuition of an artist in London. Having painted the dome of Saint Paul's, he became history painter to Queen Anne, and executed some allegorical subjects for her at Hampton Court. His masterpiece is the refectory and saloon of the hospital at Greenwich. He died after receiving the honour of knighthood from George I., in 1734. His son, **JAMES**, inherited much of his genius, and he had a daughter, who became the wife of Hogarth.

THORNTON, BONNEL, a humorous periodical writer, and boon companion of the elder Colman, born in London 1724, died 1768.

THORNTON, JOHN ROBERT, a famous botanist, younger son of Thomas Thornton, (below), was born about 1758, and became a physician in London. His works are 'The Philosophy of Medicine,' 'The Philosophy of Politics,' and that on which his fame chiefly rests, 'The Temple of Flora, or Garden of the Botanist, Poet, Painter, and Philosopher.' Died 1837.

THORNTON, SAMUEL, a well-known member of parliament, director of the bank of England, and governor of Greenwich hospital, 1755-1838.

THORNTON, THOMAS, a militia officer of West Yorkshire, author of several sporting works, and father of the celebrated botanist, died 1823.

THORPE, JOHN, a physician of the county of Kent, author of professional and antiquarian works, 1682-1750. His son, of the same name, also an antiquarian, 1713-1792.

THORWALDSEN, BERTEL, (*Albert*) was born at Copenhagen, November 19, 1770. His father, Gottschalk Thorwaldsen, a carver of wood, being a native of Iceland: his mother was of a Danish family. Bertel attended the Danish academy, and soon made such progress as to undertake the carving of figure-heads for ships. In 1793 he obtained the principal gold medal of the academy, which gave him the privilege of studying abroad at the expense of the government. He set out for Italy, May 20, 1790, in the Danish frigate *Thetis*; he landed at Naples, and arrived at Rome, March 8, 1797, and he did not return to his native country until 1819, after an absence of twenty-three years. His first important commission was from Mr. Thomas Hope, in 1803, and it was owing to the liberality of this distinguished patron of the arts that Thorwaldsen was enabled to remain and prosecute his profession in 'the Eternal City.' In 1812, on the occasion of Napoleon's expected visit to Rome, Thorwaldsen greatly distinguished himself by a sketch of the 'Triumphal entry of Alexander into Babylon,' which he completed with such expedition that the frieze, in plaster, was fixed up in one of the halls of the Quirinal palace within three months of the date of the commission. It is a composition of great extent, measuring 160 Roman palms (the palm is about nine inches) in length, and five in height; it has been twice executed in marble since, and is well engraved by Amsler of Munich. His principal works, however, were executed after his visit to Denmark; he returned to Rome at the close of 1820, and acquired the highest European fame by the following works:—*Christ and the Twelve Apostles*; *St. John Preaching in the Wilderness*; and the monuments to *Copernicus*, *Pius VII.*, *Maximilian of Bavaria*, *Prince Poniatowsky* and others. The *Christ and the St. John* were for the church of our Lady at Copenhagen, where they are now placed. He again visited Denmark, in 1838, but finding the climate disagree with him, returned to Rome in 1841, but again visited Copenhagen in 1842, and died there suddenly in the theatre, March 24, 1844, of disease of the heart, aged seventy-three. Thorwaldsen bequeathed all works of art in his possession to the city of Copenhagen, to form a distinct collection, and the city now boasts of a great art museum, containing specimens of many classes of art, besides books, &c., known as the Thorwaldsen Museum; he left sufficient funds to endow it, and enable it to constantly add to its collection, foreign as well as Danish works. Thorwaldsen was never married, but left a natural daughter in Rome well provided. There is a cheap edition of outlines after all the works of Thorwaldsen, now in course of publication.

—(H. C. Andersen, *Bertel Thorwaldsen eine biographische skizze aus dem Dänischen übertragen von Julius Reuscher*; and the writer's notice in the *Supplement to the Penny Cyclopædia*.) [R.N.W.]

THOU, JAMES AUGUSTUS DE, in Latin *Thouanus*, a celebrated French historian and Latinist, whose father and grandfather were both presidents of the parliament of Paris, 1558-1617. De Thou inherited the talents of his ancestry for

statesmanship, and was employed as ambassador and finance minister. His son, FRANCIS AUGUSTUS, born at Paris about 1607, was beheaded on account of his privy to the conspiracy of Cinquars against Richelieu, 1642.

THOUARS. See PETIT-THOUARS.

THOUIN, A., a Fr. horticulturist, 1747-1823.

THOURET, J. W., one of the most celebrated members of the French constituent assembly, born in Normandy 1746, executed 1794. His brother, MICHAEL AUGUSTUS, a distinguished physician, 1748-1810. W. F. ANTHONY, son of the deputy, author of an Encyclopædia, died 1832.

THOYNARD, NICHOLAS, a French scholar, author of a Harmony of the Gospels, 1629-1706.

THRASYBULUS, one of the great names of ancient Greece, period of the Peloponnesian or civil war between Sparta and Athens, was the son of Lycus, and was born at Steiria in Attica. He was commander of the infantry at Samos, when the Four Hundred was established on the ruins of the Athenian democracy (as noticed in the article **THERAMENES**), B.C. 411. He immediately swore his soldiers not to recognize the oligarchy, and united with Theramenes and Alcibiades to effect their destruction: at the same time he continued his part in the Peloponnesian war, and to him belongs the chief honour of the Athenian victory at Cyzicus. That dubious struggle being closed by the victory of Lysander, and the government of the humbled Athenians vested in the thirty tyrants, Thrasybulus took refuge in the Theban territory, where the patriots of the democracy once more rallied to him. After the death of Theramenes, Thrasybulus might have occupied his seat among the thirty, but he preferred the liberties of his country, and advancing at the head of the patriots, a thousand in number, he surprised the camp before Phyle, on the frontier of Bœotia, and after repeated successes became master of the government. In the second of the battles fought on this occasion fell Critias, at whose instance Theramenes had been compelled to drink the poisoned chalice. The despotic Thirty were now replaced by a council of ten representatives, and Thrasybulus exhibited the highest magnanimity towards his enemies. At length, having generously taken the field in aid of the Thebans, menaced by the yoke of Sparta, he was massacred in his tent while encamped in Cilicia, B.C. 389.

[E.R.] **THRELKELD, CALEB**, an English physician and naturalist, settled in Dublin, 1676-1728.

THROSBY, J., a topographer, 1740-1803.

THUANUS. See THOU.

THUCYDIDES, the historian, was an Athenian citizen, and belonged to the Attic borough Halimus. The date of his birth, which is not quite certain, was, perhaps, B.C. 471. Being of a good family, and living in a city which was the centre of Greek civilization, he received the highest education which the time afforded; and this, superadded to great ability, manifested itself in the 'eternal possession' which he bequeathed to posterity. He is said to have studied rhetoric under Antiphon of Rhammus, the most distinguished orator of the time, and to have received instruction in philosophy from Anaxagoras. The well-known story of his having been moved to tears of emulation by hearing Herodotus recite his history at the Olympic

games, is generally admitted to be without foundation. At the commencement of the Peloponnesian war (B.C. 431), he entered the military service of his country, and in B.C. 424, held the command of a fleet of seven ships which lay off Thasos, when

[Thucydides—From an Ancient Bust.]

Brasidas, the Lacedæmonian commander, invested Amphipolis, a city on the Strymon, belonging to the Athenians. Thucydides hastened to the assistance of his countrymen; and though he arrived too late to prevent a capitulation, he saved Eion, a seaport at the mouth of the river. In consequence of this failure, he was banished by the Athenians, or found it prudent to retire into voluntary exile, and passed the next twenty years of his life as a refugee. The accounts as to the places of his residence during his exile, are various and conflicting; we may only infer, that he could not live with safety in any place which was under Athenian dominion. He himself states, that he spent much of his time either in the Peloponnesus, or in places under the Peloponnesian rule; and his minute description of Syracuse and the neighbourhood, leads to the belief that he visited these localities. It may, at least, be confidently affirmed that, during this eventful period, he was an attentive observer of the great struggle, collected the materials for his history as the events proceeded, and to some extent, reduced them to the form in which they have commanded the admiration of all succeeding generations. When peace was concluded with the Lacedæmonians in B.C. 404, a decree was passed, permitting the return of all exiles; in consequence of which, Thucydides was restored to his country in the following year. According to the united testimony of the ancient writers, he came to a violent end, having died by the hand of an assassin; but the time and place of his death are not known. There was a tomb erected to his memory at Athens; and he probably died there. The History of Thucydides was designed to comprise a complete account of the events of the Peloponnesian war (B.C. 431-404), but breaks off in the middle of the twenty-first year (B.C. 411). It is divided into eight Books, the last of which, in consequence of the absence of

speeches, and a supposed inferiority of style, has, without any good reason, been held by some critics as not genuine. Thucydides has always been placed first in the first rank of philosophical historians. His moral reflections are searching and profound; his speeches abound in political wisdom; and the simple minuteness of his pictures is often striking and tragic. His style is concise, vigorous, and energetic; every word has its appropriate meaning, and not a clause is inserted which is not necessary for his narrative. Hence, he is sometimes harsh and obscure; his sentences are occasionally very involved, and the connection and dependence of the several parts difficult to perceive. [G.F.]

THUGUT, F., an Austrian statesman, and party to the coalition against France, 1739-1818.

THUILLIER, J. L., a Fr. botanist, died 1822.

THULDEN, C. A., a Ger. historian, 17th cent.

THULDEN, or TULDEN, THEODORE VAN, a painter and engraver, taught by Rubens, 1607-76.

THUMMEL, M. A., a Ger. writer, 1738-1817.

THUMMIG, L. P., a Germ. philos., 1697-1728.

THUNBERG, CHARLES PETER, a Swedish traveller and botanist, prof. at Upsala, 1743-1828.

THUNBERG, D., a Swedish engineer, d. 1788.

THUNMANN, J., a Swiss antiquarian, 1746-78.

THURLOE, JOHN, secretary of state during the protectorate of the two Cromwells, and the chief agent in detecting the plots of Harrison and the fifth monarchy men, born at Abbots-Reding, in Essex, where his father was rector, 1616, died 1668. His state papers, published in 1742, form a valuable mass of historical documents.

THURLOW, EDWARD, Lord, chancellor in the reign of George III., was born at Little Ashfield, near Stowmarket, in Suffolk, where his father was rector, in 1732. He was called to the bar in 1758, and entering parliament as member for Tamworth in 1768, became a distinguished supporter of the administration of Lord North. He succeeded Dunning as solicitor-general in 1770, and became attorney-general, after Sir William de Grey, in 1771. On the 3d of June, 1778, he was appointed lord chancellor, and raised to the peerage: on the retirement of Lord North, and the accession of the marquis of Rockingham in 1782, he still retained the seals by express favour of the king, though he neither supported the ministry, nor was much liked by the premier. On the coalition ministry of Fox and North being formed, he was compelled to retire; but he came to office again under Mr. Pitt, and, still pursuing his inconsistent course of action, was obliged to withdraw in 1792, from which time he took no part in public affairs. Lord Thurlow bears the character of an arrogant, factious politician, rather than a bully than the debater in parliament, but yet a man of keen understanding: his character has been delineated by Lords Brougham and Campbell, and slightly sketched by the recent editor of the Rockingham papers. From the latter we cite the following: 'To Thurlow in his private relations no praise may be fairly awarded. He was a scholar, and a good and ripe one. He was an affectionate parent, and sometimes an active and perishing patron. He had a kind of rough generosity, which moved him occasionally to take good part a blunt remonstrance, and to prefer

one who thwarted, rather than one who fawned upon him. He befriended Johnson and Crabbe—the one when the shadows of evening were closing upon him, the other when the trials of poverty pressed most heavily. In worse times there have been worse chancellors than Edward, Lord Thurlow, but an age of comparative freedom and refinement has rarely exhibited one who so ill understood, or at least so ill discharged, the functions of a statesman and legislator.' Died 1806. [E.R.]

THURMER, J., a Germ. architect, 1789-1833.

THURNEYSSER, L., an alchemist and astrologer, son of a goldsmith at Bale, 1531-1596.

THUROT, FRANCIS, a French corsair, who entered into the royal service, and harassed the English commerce in the northern seas; he was killed in an engagement when returning from his expedition to Ireland 1760.

THUROT, J. F., a French Hellenist, 1768-1832.

THWAITES, EDWARD, a Saxon and Greek scholar, professor at Oxford, and assistant of Dr. Hickes in compiling his Thesaurus, 1667-1711.

THYNNE, FRANCIS, a herald and antiquary, son of William Thynne, the editor of Chaucer, author of a Continuation of Holingshed's Chronicles, and a History of Dover, died 1611.

THYSIUS, A., a Dutch historian, 1603-1697.

TIARA, P., a Dutch *savant*, 1514-1586.

TIARINI, A., an Italian painter, 1577-1658.

TIARKS, J. L., a Ger. astronomer, 1789-1837.

TIBERIUS, CLAUDIUS NERO, the second emperor of Rome, was born B.C. 42, and succeeded Augustus A.D. 14. He was a great general, and a master of Greek and Roman literature, but as he grew older in years he disgraced himself with every species of cruelty and debauchery. He was probably insane long before the commander of his prætorian guard assumed the responsibility of putting him to death, March 16, A.D. 37.

TIBERIUS CONSTANTINE, called also TIBERIUS II., one of the most virtuous emperors of the East, was a native of Thrace, and was brought up at the court of Justinian. He succeeded to the throne in 578, and having suppressed the conspiracy of Sophia, widow of his predecessor, reigned unchallenged till his death in 582. A *third* of the name reigned emperor of the East, 698-705.

TIBULLUS, ALBIUS, a Roman patrician and elegiac poet, whose productions are marked by much feeling for the beauties of nature and the pleasures of a country life. They are generally printed with the compositions of Catullus and Propertius; flourished in the 1st century.

TICKELL, THOMAS, a popular writer and poet of the age of Addison, was born at Bridekirk, near Carlisle, 1686. His father was a clergyman, and Tickell was educated at Oxford, where he became a fellow of Queen's College. He obtained an appointment as under-secretary of state through the friendship of Addison, and some of his pieces appeared in the 'Spectator'; died 1740. His grandson, RICHARD, a political writer, died 1793.

TICOZZI, S., an Ital. ecclesiastic, 1762-1836.

TIECK, LUDWIG, was born at Berlin in 1773, and studied successively at Halle, Göttingen, and Erlangen. Poetry was from boyhood his favourite study; but, while he was always a ready and pleasing versifier, his poetical endowments, really very fine, worked most strongly when he wrote in

prose. His literary career exhibits three epochs. —In the first of these, beginning about 1796, and lasting ten years, he was one of the most efficient of the Romanticists, and, like Novalis, made the system attractive by displaying, in inventive compositions, an originality of fancy and depth of feeling not possessed by the Schlegels, the critical chiefs of the school. The works he produced during this period were both numerous and diversified. Some of them were Dramatic and Poetical Parodies, whimsically uniting jest and earnest; the principal of these being 'Bluebeard' and 'Puss in Boots.' Others were Tales, or compositions like tales, which, following in the wake of 'Wilhelm Meister,' are referred by the Germans to the class of 'Art-Novels': such are the 'Effusions of the Heart of an Art-loving Cloister-Brother,' and 'Franz Sternbald's Wanderings.' Other pieces, like 'Genoveva' and 'The Emperor Octavianus,' are saintly or historical Legends, dramatically treated, with a close and studied imitation of the rude drama of the middle ages. Others again, and these the most poetical of all Tieck's works, are Popular Legends (Volksmärchen), related in a prose narrative form, with great fullness of playful fancy, very much beauty of description, and a simplicity or *naïveté* of manner which, sometimes fairly childish, is yet wonderfully pleasing. The first attack of a painful disease of the joints, which made Tieck very long an invalid, came on in 1806, and forced him to cease from literary labour for several years.—He resumed work in 1811, and for five years was chiefly busied on the Old English Drama, which he knew better than any other foreigner ever knew it; while he translated it with great spirit, and criticised it, not indeed without great caprice and rashness of judgment, but with much delicacy of poetical feeling. He began with his 'Old English Theatre,' containing translations and criticisms of old plays, some of which were on themes afterwards handled by Shakspeare, while others were maintained by Tieck (on grounds abundantly fantastic and slippery) to be really his, in spite of the English critics. Visiting London in 1818, and reading and copying in the Museum, he collected materials for two volumes of translations of plays preceding Shakspeare's ('Shakspeare's Vorgeschule').—In 1819, after a life of many wanderings, he finally took up his residence in Dresden, where he enjoyed a pension and honorary counsellorship. Besides collections of his earlier poems and other works, the chief business of this, the last period in his history, was the writing of short Novels, most of which first appeared in *Annals*; and which, critical and dissertative in character, and full of dialogue, have much more of analytic and reflective refinement than of narrative impressiveness, and show surprisingly little of the writer's early vein of poetry. Among the most interesting of these are 'Pietro of Abano,' and 'The Revolt in the Cevennes.' Others are 'Art-Novels,' to which class belong the 'Poet-Life' and 'Poet-Death,' having respectively for their heroes Shakspeare and Camoens. Tieck died at Dresden in the spring of 1853. [W.S.]

TIEDEMANN, DIETRICH, a Ger. philosopher and opponent of Kant, famous for his researches in the history of philosophy, anthropology, the origin of languages, and similar subjects, 1745-1803.

TIEDGE, C. A., a German poet, 1752-1841.

TIEFFENTHALER, JOSEPH, a Tyrolean missionary, thirty years resident in India, last cent.

TIEPOLO, GIOVANNI BATISTA, called *Tiepoletto*, a celebrated Venetian painter, 1692-1769.

TIEPOLO, J., a Venetian poet, 16th century.

TIEPOLO, JACOB, a doge of Venice, distinguished as a partizan of the Guelfs, 1229-1249. **LAURENT**, his son, doge 1268-1275. **BOHEMOND** of the same family, chief of a conspiracy against the doge, Gradinijo, which led to the establishment of the Council of Ten, 1310.

TIEPOLO, N., a Venetian poet, 16th century.

TIERNEY, GEORGE, a famous parliamentary debater and political writer, secretary for Ireland and president of the board of control during the administration of Fox and Grenville; b. in London where his father was a merchant, 1756, died 1834.

TIGLATH PILESER, or **THEGLAT-PHALLASSAR**, son and successor of Sardanapalus, a king of Assyria, supposed date 747-728 B.C.

TIGNY, MARIN GROSTETE DE, a French naturalist, who, aided by his wife, produced a work in ten volumes on the natural history of insects valuable as a compendium, 1736-1799.

TIGRANES, several princes of Armenia: **TIGRANES I.**, a friend and ally of Cyrus, B.C. 566-520. **TIGRANES II.**, the first king of Armenia of the Arsacides' dynasty, was placed on the throne by his brother, Mithridates II., king of the Parthians; he laboured many years in developing the commercial and industrial resources of the state, B.C. 128-95. **TIGRANES III.**, called *the Great*, son of the preceding, succeeded him in B.C. 95. He married Cleopatra, daughter of Mithridates the Great, and was his faithful ally in the gigantic wars with Rome; date of his death unknown. The next **TIGRANES** was a captive at Rome, but became king by the authorization of Augustus, and allied himself with the Parthians against the masters; died 6 B.C. His son, **TIGRANES IV** occupied the throne a short time, and died B.C. **TIGRANES V.**, was a grandson of Herod, king of Judæa, and governed Armenia by suzerainty of the Romans; he was put to death by order of Tiberius A.D. 34. **TIGRANES VI.**, another dependent of Rome, figured in history about 61. **TIGRANES VII** reigned 142-178. **TIGRANES VIII.**, succeeded, with his brother, Arsaces, about 408. In the troubles which ensued, they were both reduced to the necessity of surrendering their rights, the one Theodosius, emperor of Constantinople, the other to the Parthians.

TIL, S. VAN, a Dutch theologian, 1644-1731.

TILENUS, DANIEL, a protestant theologian of the French church, born in Silesia, 1568-1633.

TILING, J., a German physician, 1688-1715.

TILING, M., a German naturalist, died 1685.

TILLADET, J. R. DE LA MARQUE DE, French writer, theologian, and philos., 1650-1711.

TILLEMANS, PETER, a Flemish painter of landscapes and imaginary views, 1684-1784.

TILLEMONT, SEBASTIAN LE NAIN DE, a famous critic and historian of the Port Royal, author of a 'History of the Emperors and other Princes during the First Six Ages of the Church,' 'Materials towards the Ecclesiastical History of the First Six Ages,' and of much other historical matter highly valued for extreme accuracy, 1637-1698.

TILLET, M., a French agriculturist, 1720-1791.

TILLI, M. A., an Italian botanist, 1655-1740.

TILLIOT, J. B. LUCOTTE, Seigneur Du, a French philologist and antiquary, 1668-1750.

TILLOCH, ALEXANDER, an ingenious Scotch printer, who became distinguished as a miscellaneous writer and journalist, was born at Glasgow, where his father was a tobacconist, in 1759. In the course of his business as a printer he discovered the art of stereotyping, but, finally abandoning that business, he removed to London, and in 1789 became joint-proprietor and editor of an evening paper, called 'The Star.' In 1797 he commenced 'The Philosophical Magazine,' and having, from time to time, published a series of papers on theological subjects, he added to these, in 1823, his 'Dissertations on the Apocalypse.' In July, 1824, he commenced 'The Mechanics' Oracle,' a weekly periodical devoted to the instruction of the working classes; he also officiated as preacher to a congregation of dissenters in Goswell-Street Road. Some years before his death, which took place in January, 1825, Tilloch was honoured with the degree of LL.D. by the university of Glasgow.

TILLOTSON, JOHN, D.D., a distinguished prelate of the English Church, was a native of Sowerby, Yorkshire. His father was a clothier in that county town, and with respect to religious principles, was a nonconformist. His father having determined to give his son a liberal education, young John was sent in due time to Clare Hall College, Cambridge, where the influence of the society in which he mingled gradually dispelled his dissenting prejudices, and having resolved to adhere to the establishment, he began in earnest to prepare for the ministry in connection with the English Church. He soon rose to distinction as a preacher, and preferments flowed upon him in rapid succession—for he was first appointed to a curacy at Cheshunt, then he became rector of Reddington, preacher in Lincoln's Inn, and lecturer at St. Laurence, Jersey. Tillotson was sincerely attached to the protestant religion, and an occasion occurred on drawing out strongly his protestant spirit, when Charles II. in 1672 issued a proclamation for liberty of conscience, under the covert design of favouring the Roman Catholics. Tillotson gave a decided opposition to the measure both from the pulpit and the press. Notwithstanding this opposition to their favourite policy, the government deemed it expedient to bestow on the popular preacher the highest favours of the crown patronage by appointing him rector in St. Paul's, and dean of Canterbury. Tillotson evinced his protestantism on another occasion in a still more decided manner, by the advocacy of the Exclusion Bill against the duke of York. One gross inconsistency, however, sullies the otherwise honourable character and reputation of Tillotson, viz., that in attending Lord William Russell on the scaffold, he used every effort to persuade that patriotic nobleman to save himself by adopting the principles of passive obedience, and yet he became himself not long after, one of the most active enemies of the Stuart dynasty by promoting the revolution. The important services he rendered to the cause of the prince of Orange, were rewarded on William III. being established on the British throne, by promotion first to the deanery of St. Paul's, and not long after by his elevation

in 1691 to the archiepiscopal see of Canterbury. He had enjoyed that high dignity only three years, when his useful career was brought to a premature end by death. Tillotson was the popular preacher of his day, and in so great estimation were his discourses held, that even in that age, the copyright, though it was a posthumous publication, was sold for 2,500 guineas. Tillotson adopted a moderate Arminianism, and his discourses are accordingly devoted to the inculcation chiefly of the practical precepts of the gospel. In private life the archbishop was plain and unostentatious, kind to his relatives and charitable to the poor, liberal in his sentiments towards dissenters, and exercised the very extensive influence which his character as well as his office procured him in doing good to all without regard to rank or sectarian distinctions; 1630-1694. [R.J.]

TILLY. JOHN TERCLES, count of Tilly, was born at the castle of Tilly, in South Brabant, in 1559. He joined the order of Jesuits in youth; but soon left the ecclesiastical for the military profession. He first entered the Spanish army, and served for several years under Alva, and the other Spanish commanders in the Netherlands. About 1599 he entered the service of the Austrian emperor, Rudolf, and distinguished himself greatly in several campaigns against the Turks and the Hungarians. He then re-organized and commanded the army of the duke of Bavaria, and was also appointed generalissimo of the forces of the Roman Catholic league in Germany. In the beginning of the Thirty years' war, Tilly subjugated Bohemia by the single great battle of the White Hill (1620). He then conquered the Palatinate of the Rhine, defeating decisively the protestant troops in the three days' battle of Stadt Loo, 1623. He next commanded against Christian, king of Denmark, who sought to aid the German protestants. Tilly out-manceuvred and defeated him. When Gustavus Adolphus interfered in the war, Tilly was chosen to oppose the Swedish hero. He was now field-marshal, and commander-in-chief of the imperial forces. The first event of this part of the thirty years' war was the siege and capture of the city of Magdeburg by Tilly, 1631. The cruelty of the imperialist army on this occasion excited the deepest horror even in an age and country accustomed to military atrocities. Tilly himself wrote to the emperor that no such spectacle as that of the ruin of Magdeburg had been witnessed on earth, since the captures of Troy and Jerusalem. In the autumn of the same year Tilly met Gustavus Adolphus at Leipzig, and was utterly defeated, though he effected a soldierly retreat with part of his army. He was again beaten by the Swedish king at the passage of the river Lech, in 1632. Tilly was wounded in this battle, and died on the following day. He is said to have been personally of austere and pure character, despising all sensual enjoyments, and indifferent to wealth and honours. But the cruelties which he permitted his troops to exercise upon the unoffending inhabitants of the countries which were the scenes of his campaigns, show the frightful effects of military fanaticism combined with religious bigotry, even in a commander, who himself takes no part in the license and the violence which he sanctions. [E.S.C.]

TILLY, PETER ALEXANDER, Count De, a royalist officer of the period of the French revolution, author of some political works relative to the events of that time, 1764-1815. Another **COUNT TILLY**, not of the same family as the preceding, took up arms for the republic, and afterwards served Napoleon, died 1822.

TIMÆUS, a Pythagorean philosopher, called 'the Locrian,' from his birth-place; known as the instructor of Plato, and highly eulogized by him. A Greek historian, of the same name, lived about 350 B.C. A third **TIMÆUS** was a sophist of the third century of our era, and author of a Dictionary of Platonic phrases.

TIMANTHES, a Greek painter, 400 B.C.

TIMOCREON, a comic poet, 476 B.C.

TIMOLEON, one of the greatest of Greek generals and patriots, if not the ideal of the Grecian hero, was born in Corinth about 410 B.C. His first exploit was the deliverance of Corinth from the armed dictatorship of his elder brother, Timophanes, though it was necessary to put him to death, and bear the curses of his mother, who had made the tyrant her especial favourite. Timoleon, whose motives were not understood, was execrated for his share in this tragedy, and his existence became so burdensome that he meditated self-destruction, and retired altogether from public life: the affecting narrative may be read in Plutarch. After a lapse of twenty years, 343 B.C., he was recalled by the Corinthians, and sent to the aid of the Syracusans, then suffering from the despotism of the younger Dionysius. In this expedition, success attended upon success until all Sicily was redeemed from the cruel slavery to which it had been brought, and Syracuse became the seat of a republican freedom which linked in one brotherhood all the cities that had suffered from the petty tyrants who oppressed them: the Carthaginians were also expelled, and their army of 70,000 men, led by Hamilcar and Hasdrubal, defeated by a mere handful of patriots under Timoleon. It is the conduct of the deliverer after these victories that must decide his character, and to him belongs the rare virtue of abdicating a power which he still virtually exercised as a private citizen. Forty thousand Greeks flying before the sword of Philip, the father of Alexander, were glad to accept the new home offered to them in the devastated cities of Sicily; and Timoleon, having organized the states, retired to private life, but always attended the deliberations of the people. In his latter years he went to their assemblies in a chariot, from which he also addressed them on account of his blindness: it was his highest joy that he had secured to the Syracusans perfect freedom of opinion, and the impartial operation of the laws. He was so highly honoured, that his birth-day was kept as a public festival; and when he died, B.C. 337, he was buried with great magnificence at the public cost. The value of his life was soon after proved by the anarchy which began to spread, and the unruly spirits which obtained the supremacy in Syracuse. [E.R.]

TIMOMACHUS, a Greek painter, abt. 300 B.C.

TIMON, a Greek poet, and disciple in philosophy of Pyrrho, B.C. 270.

TIMON, surnamed 'the Misanthrope,' the original of that character in Shakspeare, B.C. 420.

TIMON, E., a Greek physician, last century.

TIMON, S., a famous Hungarian Jesuit, historian, and antiquary, 1675-1736.

TIMOPHANES, a tyrant of Corinth, who was assassinated B.C. 365. See **TIMOLEON**.

TIMOTHEUS, a Greek poet and musician, unrivalled in his age, 6th century B.C. He excelled in lyrical composition, and was a skilful performer on the cithara, or harp, which he improved by the addition of two chords.

TIMOTHEUS, called 'of Thebes,' a celebrated musician, time of Alexander the Great.

TIMOTHEUS, an Athenian general, who took a distinguished part in the social wars, and was condemned for avoiding a naval conflict, B.C. 356.

TIMUR. See **TAMERLANE**.

TINDAL, MATTHEW, one of the successors of Toland and Shaftesbury in the School of English Deists or Freethinkers, was born at Beer Ferre in Devonshire about 1657, and was admitted doctor of laws at Oxford in 1685. He retained his fellowship during the reign of James II. by professing the Roman Catholic faith; he afterwards recanted, however, and adopting revolutionary principles, went to the other extreme, and wrote against the Nonjurors. He now became an advocate, and sat as judge in the court of delegates with a pension from the crown of £200 per annum. Some time afterwards, considerable attention was drawn to him, by his work, entitled 'The Rights of the Christian Church' and the ensuing controversy; but the production which has rendered his name a memorable one was his 'Christianity, Old as the Creation, which appeared in 1730, a provoked replies from Dr. Warburton, Leland Foster, and Conybeare. Dr. Middleton endeavoured to take a middle course in this controversy, as may be seen in that article, but the most effective answer, though its very existence seems to have been forgotten, was that embodied in the 'Appeal of William Law, published 1740. Tindal's line of argument was mainly coincident with Shaftesbury that the immutable principles of faith and doctrine must be found within the breast, and that no external revelation can have any authority equal to the internal; this he supported by much learning and show of argument, which Warburton thought he had replied to by the mass of learned evidence contained in his 'Legation.' William Law, making no account of literary evidence, replied by a masterly development of the philosophy of the time and final recovery of mankind; a book remarkable for close argument and for its many fine illustrations, but now obsolete in certain fundamental principles. Tindal died in 1733, and was interred in Clerkenwell church, near the remains of Bishop Burnet. [E.I.]

TINDAL, NICHOLAS, nephew of the preceding, chiefly known by his translation and continuation of Rapin's History of England, 1687-1774.

TINDAL SIR NICHOLAS CONYNHAM, a distinguished lawyer and member of parliament, who rose to the dignity of lord chief justice of the Common Pleas, 1777-1846.

TINDAL, WILLIAM. See **TYNDALE**.

TINELLI, T., a Venetian painter, 1586-1638.

TINGRI, P. F., a French chemist, 1743-1821.

TINTORETTO, JACOPO ROBUSTI, called **TINTORETTO** from the circumstance of his father being

a dyer, was born at Venice in 1512. He studied only a few days in the studio of Titian, and was then dismissed by that great painter, for what cause is not known. This circumstance had an admirable effect upon him, it made him have more decided recourse to his own resources, and his spirit was well indicated in the words he wrote up on the wall of his room:—'The drawing of Michelangelo and the colouring of Titian.' He did eventually become the acknowledged rival of Titian in Venice itself; his *Miracle of St. Mark*, the *Miracolo dello Schiavo*, his masterpiece, is now in the academy of Venice, and is generally admitted to be one of the finest pictures in Italy; there is a good print of it by J. Matham. He died at Venice in 1594, aged eighty-two. Tintoretto is sometimes called *il Turoso*, from the extraordinary vigour and rapidity with which he painted; he was bold and grand, but often careless; he is said to have had three pencils, one of gold, one of silver, and a third of iron.—(Ridolfi, *Le Maraviglie dell' arte*, &c.) [R.N.W.]

TIPHAIGNE DE LA ROCHE, C. F., a French physician and man of letters, 1729-1774.

TIPPOO SAIB, the last sultan of Mysore, was born in 1749, and made his first appearance in the field of Indian warfare at the head of 5,000 horse in 1767. His father was the sultan, Hyder Ali, a soldier of fortune, who constructed his empire out of the dominions of the great Mogul, then falling to ruins. In 1780 the progress of Hyder was arrested by Sir Eyre Coote, under the government of Hastings, and the French having joined their forces to those of the sultan, the young Tippoo became acquainted with Lally Tolendal. In December, 1782, the death of his father placed him on the throne of Mysore, and at the head of an army, then in the field, of 88,000 men, supported by a sum of three millions sterling in his treasury, besides costly jewels: he continued the war with a zeal far surpassing his father's for Islamism, and in a short time not less than 100,000 persons were forcibly circumcised. In 1784 he concluded an advantageous peace with General Matthews, who surrendered to him the Nigger fort; but in 1786 he took the field again, provoked by a confederacy formed against him in Southern India, of which the Mahrattas were chief: the war on this occasion lasted till 1792, when his late defeats at Travancore and elsewhere compelled him to conclude a peace with the Marquis Cornwallis. The war upon which he had entered, however, was a religious one, and Tippoo was too sincere and courageous to surrender India without a last struggle to the Christians. It is certain that he entered into an extensive correspondence, which reached as far as Arabia, his purpose being to organize a general confederacy against the English; but it is doubtful whether he made any overtures to the French: the advantage he derived from his former acquaintance with them was realized in the superior discipline of his troops. His purpose was anticipated by the government of India, then under the marquis of Wellesley, who sent an invading army, numbering nearly 40,000 men, into his territories at the beginning of 1799. On reaching Seringapatam, his capital, General Harris demanded the cession of half his dominions, a large payment in money, and four of his sons, be-

sides four of his principal subjects, as hostages—terms which the sultan rejected, in alternate rage and despair, at being thus bearded in his last stronghold. A breach having been made in the walls, the storming party, of 4,000 men, was led by Sir David Baird on the 4th of May, and Tippoo Saib, resolving not to survive the loss of his kingdom, met the fate of a hero in the thickest of the conflict; his body was found amid heaps of slain, and interred with royal honours in his father's sepulchre, after which the empire of Mysore was dismembered. The reader desirous of further particulars may consult Murray's History of British India in the Edinburgh Cabinet Library, 1832, 2d edition, 1850; or Thornton's History of the British Empire in India, 1842. For the due appreciation of Tippoo's character, and the correction of some facts, compare the 'History of Tippoo Sultan, translated from the Persian of Myr Houssein by Colonel Miles,' 1845. [E.R.]

TIPTOFT, JOHN, earl of Worcester, a statesman and patron of letters, executed on a charge of treason, arising out of circumstances connected with his Irish administration, 1470.

TIRABOSCHI, GIROLAMO, a famous historian of Italian and Roman literature, 1731-1794.

TIRIN, J., a Flemish Jesuit, 1580-1636.

TISCHBEIN, J. A., a German painter and writer, 1720-1784. His brother, JOHN HENRY, founder of a new school similar in character to the Venetian, 1722-1789. J. H. CONRAD, their nephew, a painter and engraver, 1742-1808. J. H. WILLIAM, brother of the latter, known from 1751 to 1803. J. F. AUGUSTUS, a third brother, a painter of portraits, 1750-1812.

TISSARD, F., a French *savant*, died 1508.

TISSARD, P., a French poet, 1666-1740.

TISSOT, A. P., a French jurist, 1782-1823.

TISSOT, C. J., a French physician, 1750-1826.

TISSOT, J. M., a mathematician, died 1650.

TISSOT, S. A., a French physician, and author of numerous professional works, 1728-1797.

TITI, R., an Italian poet, 1551-1609.

TITI, or TITO, SANTI DI, a distinguished Italian painter and architect, 1538-1603.

TITIAN, or TIZIANO VECELIO, one of the greatest of Italian painters, and the prince of colourists and portrait painters, was born in the territory of Venice at Capo del Cadore in 1477. He studied in the school of the Bellini, first with Gentile and afterwards with Giovanni, with whom he was fellow-pupil with Giorgione, his own future rival. Titian first appeared as a great painter at the court of Alfonso I., duke of Ferrara, in 1514, when he painted the 'Bacchus and Ariadne,' in the National Gallery. Two years later he had attained to the full vigour of his extraordinary powers; in that year he executed his celebrated 'Assumption of the Virgin,' now in the academy of Venice, and hanging opposite to the *Miracolo dello Schiavo* by Tintoretto; the merits of both masters are well illustrated by the contrast. In 1528 Titian painted his 'St. Peter Martyr,' in which he has shown himself one of the first of landscape painters, especially of landscape as an accessory to figures. In 1545 he visited Rome, where he saw Michelangelo; he returned to Venice in the following year. He is supposed also to have visited Spain, but this is doubtful; Spain is however, extremely rich in

the masterpieces of Titian: after Venice, the gallery of the Prado at Madrid gives the greatest display of his powers. It has been assumed that Titian visited Spain partly from the fact of the patent of nobility, granted by Charles V., creating him Count Palatine of the empire, and knight of the order of St. Iago, being dated at Barcelona. This great painter died at Venice of the plague, in 1576, having lived to the extraordinary age of ninety-nine years. To describe fully his masterpieces alone, would occupy a volume; of his scholars, Paris Bordone, Bonifazio Veneziano, Girolamo di Tiziano, and his own son Orazio Vecellio, were able painters.—(Vasari; Ridolfi; Zanetti, *Della Pittura Veneziana*, &c.; Cadarin, *Della amore ai Venezianai di Tiziano Vecellio*; Northcote, *Life of Titian*, 1830.) [R.N.W.]

TITIUS, G. G., a German jurist, 1661-1714.

TITON DU TILLET, EVERARD, a master of polite literature and patron of letters, projector of a French Parnassus in honour of Louis XIV., a description of which he published, 1677-1762.

TITSINGH, J., a Dutch traveller, 1740-1812.

TITTEL, G. A., a Ger. philosopher, died 1816.

TITTMANN, JOHN AUGUSTUS HENRY, a German professor of theology, au of 'Encyclopädie der Theologischen Wissenschaften,' 1773-1831.

TITUS, a disciple of Paul, and preacher of the Gospel in Dalmatia, 1st century.

TITUS LIVIUS. See LIVY.

TITUS, FLAVIUS VESPASIANUS, emperor of Rome, was the eldest son of the emperor Vespasian; he was born in the year 40, and educated with Britannicus at the court of Nero. like the latter, he gave way to vices which afforded little promise of a happy reign. From 67 to 70 he was carrying on the war in Judæa, the whole conduct of which devolved upon him on his father's election as emperor, the capture of Jerusalem, on September 2, of the year last mentioned, brought this struggle to a close, after which Vespasian and Titus were both honoured with a triumph. It is almost unnecessary to mention that the fullest details of this war, the unparalleled cruelties and sufferings with which it was attended, may be read in Josephus; the episode of the passion of Titus for Berenice will be found in Suetonius. On the death of Vespasian in 79, Titus succeeded as emperor, commencing, by repeated proofs of his reformation, one of the most princely and beneficent reigns in the annals of Rome: for this the wisdom of his father was partly to be thanked, he having associated Titus with him in the empire, and developed the nobler traits of his character by the generous trust reposed in him. In the year of his succession the great eruption of Vesuvius took place, which buried Herculaneum, Stabizæ, Pompeii, and other towns beneath its ashes; in the following year a fatal epidemic and a fearful conflagration occurred in Rome, and in the next again, September 13, 81, Titus expired, perhaps of poison, and was succeeded by his brother, Domitian: the hopes he had excited were so great that his death was mourned as a public calamity, a rare honour for an emperor of Rome. [E.R.]

TIZIANO VECELLI. See TITIAN.

TOALDO, J., an Italian astrologer, 1719-1798.

TOBIN, A. M. DE., a Sp. painter, 1678-1758.

TOBIN, JOHN, a solicitor, born at Salisbury,

author of 'The Honey Moon,' 'All's Fair for Love' and several other plays, 1770-1804. JAMES, h brother, a poet, died 1815.

TOD, JAMES, an officer of the East India Company, author of 'Travels,' and Surveys, died 1831.

TODD, HUGH, vicar of Stanwix, in Cumberland, au. of a 'Description of Sweden,' 1658-1721.

TODE, H. J., a German naturalist, 1738-1797.

TODE, J. C., a Ger. medical writer, 1736-180.

TOFINO DE SAN MIGUEL, DON VICENS, a Spanish mathemat. and astronomer, 1740-1800.

TOINARD, N., a Fr. antiquarian, 1629-1706.

TOLAND, JOHN, one of those learned free thinkers who rendered themselves conspicuous after the publication of Locke's philosophy, was born in Ireland, of Roman Catholic parents, in 1669. As early as his sixteenth year, he shook off the superstitions in which he had been educated, and in consequence of this change, completed his education at Glasgow and Edinburgh, taking the degree of M.A. in the latter university in 1691. At Leyden, where he next passed two years, he made the acquaintance of Leclerc and Leibnitz, and returning to England again, published, in 1695, his 'Christianity not Mysterious.' This work was launched forth in the midst of a controversy concerning Socinian principles—that which South, Sherlock, Wallis, Howes, Cudworth and others, took part,—and was designed to show 'that there is nothing in the Gospel contrary to reason, or above it, and that no Christian doctrine can be properly called a mystery.' Attacks were made upon the author from all sides, the grand jury of Middlesex answered his work in a 'Prisment,' and the Irish Parliament ordered it to be burnt by the hangman. Toland had gone to Dublin to escape the storm raised against him chiefly by the Dissenters, in London, and he was now compelled to return to avoid a prosecution by the attorney-general of Ireland; thus alienated from all parties he declared himself a 'Latitudinarian,' though he always professed himself a Christian. His subsequent works were, a 'Life of Milton,' which accompanied an edition of the author's prose works, 'Amyntor,' 'Origines Judicæ,' 'The Philosophy of the Ancients,' 'Hypatius Nazarenus,' 'History of the Soul's Immortality among the Heathens,' 'The Origin and Force of Prejudices,' and numerous political pamphlets. His principal object, so far as these bore on religion, was to sustain his original controversy, and to destroy the authority of the Books of Scripture deemed canonical; but he was a vain man, proud of distinction, however obtained, and was probably more concerned about the great names he could associate with his own, than the principles he professed. He died at Putney in the fifty-third year of his age, 1722. In this neighbourhood reside the Gibbons, Bolingbrokes, and Mallets. [E.R.]

TOLEDO, FERNANDO ALVAREZ DE, duke of Alba, or Alva. See ALVA.

TOLEDO, F. DE, Spanish viceroy of Peru, died in prison after his return home, 1581.

TOLEDO, J. DE, a Spanish painter, died 1691.

TOLEDO, DON P. DE, Spanish viceroy of Naples under Charles V., 1484-1553. PETER, the same family, ambassador in 1608.

TOLER, JOHN, Lord Norbury, chief justice of the Common Pleas in Ireland, rose to distinct

at the period of the rebellion, distinguished as a wit, 1745-1831.

TOLET, F., a Spanish cardinal, 1532-1596.

TOLET, F., a French physician, died 1724.

TOLET, J., an English cardinal, died 1274.

TOLETT, ELIZABETH, an accomplished English lady, author of Poems, 1694-1754. Her nephew, GEORGE TOLLER, author of valuable Notes on Shakspeare, died 1779.

TOLLIUS, CORNELIUS, a Dutch philologist, born about 1620, died 1662. His brother, ALEXANDER, also a philologist, died 1675. JAMES, a third brother, a learned physician and professor, 1630-1696. Another Dutch philologist, named LERMANN TOLLIUS, was professor at Harderwyck and Leyden, 1742-1822.

TOLOMEI, J. B., an Italian Jesuit, cardinal, and statesman, 1655-1726. NICHOLAS, of the same family, a Jesuit and ecclesiastical writer, 1699-1774.

TOLOMEI, CLAUDIO, an Italian master and promoter of polite literature, 1492-1555.

TOMASELLI, J., an Ital. naturalist, 1733-1818.

TOMASINI, GIACOMO FILIPPO, bishop of Ippona Nuova, a biographical writer, 1597-1654.

TOMBES, J., a nonconformist div., 1603-1676.

TOMLINE, GEORGE, successively bishop of Lincoln and Winchester, author of 'Elements of Christian Theology,' 'Memoirs of Mr. Pitt,' whose secretary he had been, and a 'Refutation of the charge of Calvinism brought against the Church of England,' 1750-1827. The family name of this relate was PRETTYMAN, but he took that of Tomline on inheriting an estate left to him.

TOMLINS, ELIZABETH SOPHIA, a novelist and miscellaneous wr., b. in London 1768, d. 1828.

TONDUZZI, J. C., an Ital. historian, 1617-73.

TONE, THEOBALD WOLFE, founder of the association of 'United Irishmen,' was born in Dublin 1763, and by profession a barrister. He commenced his political agitation in 1790, and in 1796 prevailed on the French directory to send an expedition in support of the Irish insurrection. His fleet was scattered by storms, and Tone was made prisoner when conducting a petty armament somewhat later. He committed suicide in prison, November 19, 1798.

TONSTALL. See TUNSTALL.

TOOKE, ANDREW, a learned schoolmaster and mathematician, born in London 1673, died 1731.

TOOKE, JOHN HORNE, a political character of very considerable consequence in the last century, famed in the literary world as a grammarian and philologist, was born in Newport-Street, Westminster, where his father was a poulterer, in 1736. His education having been completed at Cambridge, he entered into orders, and became, in 1760, curate of Brentford in Middlesex. He was never sincerely attached to the church, however, but bestowed the greater part of his time on law and politics, for which the factious nature of the times, and the supposed designs of George III. and Lord Bute afforded abundant scope. From 1765 to 1767 he published his philippics against the court and the chief justice, Lord Mansfield, in favour of Wilkes the popular idol, and soon after made the acquaintance of that gentleman, as well as of Voltaire and Sheridan, on the continent. In 1770 and 1771, a period of great political excitement in Lon-

don, he founded the Society for Supporting the Bill of Rights; this produced a rupture between him and Wilkes, in consequence of the selfish advantages sought by the latter; about the same time he promoted the publication of the Debates in Parliament, in defiance of the House of Commons. From 1773 to 1782 he was of course the avowed enemy of the administration of Lord North, and the friend of the American patriots; in this interval he underwent a year's imprisonment and a fine of £200. The most important event of his life was his trial for high treason, in conjunction with Hardy; this took place at the Old Bailey in 1794, and was remarkable for the ability and self-possession with which Mr. Tooke defended himself; it ended in an acquittal, and he afterwards numbered among his friends Sir Francis Burdett and Major Cartwright. In 1801 he became member of parliament for a nomination borough, having failed in two previous attempts as a candidate for the popular suffrages. Nothing particular marked his subsequent career, and he died at Wimbledon, having first destroyed all his MSS., in 1812. His greatest literary work is his 'Diversions of Purley,' first published in 1786; attempts have been made to prove that he was the real 'Junius.' [E.R.]

TOOKE, WILLIAM, originally a printer, afterwards a foreign chaplain of the Church of England, author of 'Varieties in Literature,' 'Life of Catherine II.,' 'A View of the Russian Empire,' 'A General History of Russia,' and Translations of Lucian and of Zollikofer's Sermons; born at Islington 1744, died 1820.

TÖPFER, H. A., a Ger. philosopher, 1758-1833.

TOPHAM, E., an English writer, died 1820.

TOPINO-LEBRUN, F. J. B., a French historical painter, perished on the scaffold, 1769-1801.

TOPLADY, AUGUSTUS MONTAGUE, a celebrated Calvinistic divine and controversial writer, was born at Farnham in Surrey, 1740, and became vicar of Broad Hembury in Devonshire, where he composed most of his writings, in 1762. In 1775 he removed to London, and from that period officiated at the chapel of the French Reformed, near Leicester Fields. Died August 11, 1778.

TOPPI, N., an Italian historian, 1603-1681.

TORDENSKIÖLD, the name conferred on PETER WESSEL, a famous Danish admiral, when ennobled by Frederic IV. for his victory over the fleet of Charles XII., king of Sweden, 1691-1720.

TORELLI, JOSEPH, an Italian scholar and mathematician, editor of Archimedes, and translator of Æsop's Fables and of the Æneid, 1721-1781.

TORELLI, L., an Ital. biographer, 1609-1683.

TORELLI, L., an Italian jurist, 1489-1576.

TORELLI, P., an Italian poet, 1586-1608.

TOREN, OLAUS, a Swedish naturalist and traveller in the East Indies, died 1753.

TORFEUS, THORMODUR, in Icelandic THORMODUR TORFASON, or THORMODUR TORVESEN, a learned historian of Norway, 1648-1719.

TORNIEL, or TORNIELLI, AUGUSTUS, general of the Barnabites, and wr. of annals, 1543-1622.

TORNIELLI, J. F., an Italian poet, 1693-1752.

TORQUEMADA, JOHN DE, in Latin *Turrecremata*, a Spanish cardinal, confessor to Isabella of Castile, 1388-1468. A Franciscan friar, of the same names, published a 'History of the Wars and Discoveries in the West Indies,' 1615. A THOMAS

DE TORQUEMADA was first inquisitor-general of Spain, and acted with such relentless vigour that, in sixteen years, he had committed 8,800 victims to the stake, and 90,000 to various measures of imprisonment; he also banished 100,000 Jews from the country in that period, 1420-1498.

TORRE, BERNARDO DELLA, an ecclesiastical writer, chaplain to Murat, 1736-1820.

TORRE, FILIPPO DEL, an Italian antiquary and master of polite literature, 1657-1717.

TORRE, GIOVANNI MARIA DELLA, an Italian antiquary and natural philosopher, a great improver of the microscope, 1713-1782.

TORRENS, SIR HENRY, an Irish officer of the British army, who acted as secretary to Sir Arthur Wellesley in the peninsula, and since then became the promoter of many improvements in military regulations; born in Londonderry 1779, died 1828.

TORRENTINUS, HERMANN VAN BECK, called, a Dutch *savant*, author of the earliest attempt at an historical dictionary, 1450-1520.

TORRENTIUS-LEVINUS, otherwise LIEVIN VANDER BEKEN, a Belgian prelate, philologist, and Latin poet, 1525-1595.

TORRICELLI, EVANGELISTA, a famous Italian mathematician and natural philosopher, professor at Florence, time of Galileo, 1608-1647.

TORRIGIANI, PIETRO, a Florentine sculptor, who met with a tragical death in Spain, 1522.

TORRIGIANO, T., a physician, 1270-1350.

TORRIJOS, DON JOSE MARIA, a Spanish general, born at Madrid 1791, distinguished himself in the revolution of 1820, executed 1823.

TORRINGTON, GEORGE BYNG, Viscount, a naval officer who served in the late war, 1768-1831.

TORRUBIA, JOSE, a Spanish Franciscan, historian, and naturalist, died 1768.

TORSINELLO, H., an Ital. historian, 1545-99.

TORSTENSON, LEONARD, Count, a Swedish general, time of Gustavus Adolphus, 1595-1654.

TOSTI, F., an Italian physician, 1658-1741.

TOSCAN, G., a Fr. horticulturist, 1756-1826.

TOSCANELLA, PAOLO DEL POZZO, an astronomer of Florence, time of Columbus, 1397-1482.

TOSELLI, F., an Ital. biographer, 1699-1768.

TOSHI, D., an Italian theologian, 1535-1620.

TOSSANUS. See TOUSSAIN.

TOTILA, king of the Ostrogoths in Italy, totally vanquished by Belisarius and killed, 541-552.

TOTT, CLAUDE AKESON, a Swedish general, distinguished against the Russians in 1573, d. 1596.

TOTT, CLAUDE, Count, a Swedish senator and ambassador, time of Christina, 1616-1674.

TOTT, FRANCIS, Baron De, a French officer and diplomatist, of Hungarian origin, employed at Constantinople and the Crimea, author of *Memoirs of the Turks and Tartars*, 1733-1793.

TOTZE, E., a Prussian historian, 1715-1789.

TOULLIER, C. B. M., a Fr. jurist, 1752-1835.

TOULMIN, JOSHUA, successively a baptist and unitarian minister, editor of a new edition of Neale's *History of the Puritans* and other works, 1740-1815.

TOUP, JONATHAN, a classical scholar and critic, born at St. Ives, in Cornwall, 1713, died 1785.

TOUR, B. DE LA, a French preacher, last cent.

TOUR, BAILLET, Count De La, an Austrian general, time of Joseph II., died 1806.

TOUR, J. B. BONNAFAS DE LA, a French Jesuit preacher and religious poet, 1712-1777.

TOUR, MAURICE. See DELATOUR.

TOUR, THEODORE. See LATOUR.

TOUR D'AUVERGNE, THEOPHILUS MALO CORRET DE LA, called *the first Grenadier of France*, and long the terror of the enemy in Spanish warfare, 1743-1800.

TOURLET, R., a French Hellenist, 1770-1836.

TOURNEFORT, JOSEPH PITTON DE, a celebrated botanist, was born at Aix in Provence in 1656. He died in 1708. He was destined by his parents for the church, but at the death of his father he chose the profession of medicine. Botany was his favourite study, and to the prosecution of this, he ultimately devoted his life. He travelled in quest of plants over the Alps and Pyrenees, through Spain and Portugal; and afterwards visited Holland and England. He had for many years the superintendence of the Jardin du Roi, and lectured on botany to a numerous throng of students. Tournefort was one of a celebrated triumvirate of botanists which the end of the 17th and beginning of the 18th centuries produced. Ray in England, Rivinus in Germany, and Tournefort in France, were contemporaries and correspondents, and botany is much indebted to their labours for the progress since made. Tournefort's method of classification of plants is derived almost entirely from the flower, and, considering the time in which it was published, possesses very great merit. In France he is esteemed as much as Ray is in England; and the two philosophers are justly reckoned each the pride of their country. In 1700 he was selected under royal patronage, to proceed to the Levant to investigate the plants mentioned by ancient writers and to discover new ones. His journey occupied more than two years, during which he made a large collection of plants and other objects of natural history; and upon his return he was nominated professor of medicine at the college of France. His chief botanical works are the *'Elements de Botanique,'* and the *'Institutiones Herbariae,'* which possess great merit. Plumier named a genus of plants after him, Pittonia; but Linnaeus afterwards changed it to Tournefortia which it now retains. [W.B.]

TOURNELLY, H., a Fr. theologian, 1658-1729.

TOURNEMINE, R. J. DE, a learned Jesuit author of *'Reflections on Atheism,'* 1661-1739.

TOURNEUR, P. C., a Fr. translator, 1736-8.

TOURNIE, J. J., a Fr. mechanician, 1690-177.

TOURNON, C. T. MAILLARD DE, an Italian cardinal and legate to India and China, 1668-171.

TOURNON, F. DE, a French cardinal and diplomatist, time of our Henry VIII., 1489-1562.

TOURNON, P. C. CASIMIR MARCELLIN, Count De, a French statesman, died 1833.

TOURON, A., a French biographer, 1688-177.

TOURRETTE, MARC-ANTOINE LOUIS CLAUDE DE LA, a French naturalist, 1729-1793.

TOURTELLE, S., a French physician, au. of *'Philosophical History of Medicine,'* 1756-1801.

TOUSSAIN, DANIEL, in Latin *Tossanus*, learned protestant theologian, 1541-1602. PAUL his son, author of a *Life of the elder Toussain* and of various controversial works, died 163.

JAMES, a learned Hellenist, died 1547.

TOUSSAINT, F. V., a Fr. deist, 1715-1772.

TOUSSAINT DE SAINT LUC, the father of a Carmelite and ecclesiastical historian, died 169.

TOUSSAINT, L'OUVERTURE, was a negro, the son of African slave parents, and was himself a slave in St. Domingo during the greater portion of his life. He is said to have been born in 1743. When the revolt of the blacks broke out in that island in 1791, Toussaint joined his fellow-countrymen; but he did not sully himself by participation in any of the atrocities that marked the furious struggle of blacks, mulattoes, and whites, each against the other two races, by which the unhappy island was devastated. Toussaint, by his courage and generalship in the field, and still more by his eloquence, his knowledge of character, and his political skill and firmness, made himself chief of the negroes, who were the victorious party in the war. He reduced the part of the island, that had belonged to the Spaniards, into complete submission. He formed and maintained a regular army of black soldiers, and black officers, disciplined after the European model; and revived some slight degree of the commerce, by which St. Domingo had once been enriched. By introducing a strict system of compulsory labour among the negroes, whom he allowed to receive a fourth part of the produce of their toil, he secured the blessing of industry for the land and the people, while the blacks still prided themselves on being no longer the slaves of the white men. He maintained rigid military discipline, and administered justice with stern and impartial vigilance. Notwithstanding the severity of his rule, he was idolized by the negroes, who regarded him as a type of the eminence which their race was fitted to attain. Toussaint preserved a nominal allegiance to France, and assiduously courted Buonaparte's favour after the establishment of the consulate. But Napoleon was resolved to reduce St. Domingo into thorough submission as a colony, and after the peace of Amiens, in 1801, an army of 35,000 troops, under General Le Clerc, was sent on board a powerful fleet from the French ports against the island. Toussaint and his followers resisted for a time with valour and skill; but several of the negro generals deserted their

[Castle of Joux.]

chief, and at last Toussaint made his submission, and retired to a farm in the interior, leaving the French acknowledged masters of St. Domingo.

For two months Toussaint lived in retirement, but the French were jealous of his possible influence over the negroes, and, on July 5, 1802, Le Clerc caused Toussaint to be arrested, and sent him a prisoner to France. He was confined in the castle of Joux, in the Jura mountains, where he died on the 27th April, 1803. Toussaint L'Ouvverture is a bright example of the intellectual energy and greatness of which the maligned negro race is capable; and his fate is one of the saddest among the many melancholy proofs of the guilt and meanness of which the marked Europeans in their dealings with their African brethren. [E.S.C.]

TOUSTAIN, C. F., a learned Benedictine, author of a 'Traité de Diplomatie,' 1700-1754.

TOWERS, JOSEPH, a miscellaneous and political writer, born in Southwark, where his father was a dealer in second-hand books, 1737, died 1799. Towers began life as a printer, but became a preacher among the dissenters, and his merits were recognized by the degree of LL.D., conferred upon him by the university of Edinburgh. Among his works are 'A Review of the Genuine Doctrines of Christianity,' 'A Vindication of the Political Opinions of Locke,' and some articles in the *Biographia Britannica*.

TOWERSON, G., a theologian, died 1697.

TOWGOOD, MICAJAH, a dissenting minister, and famous advocate of the principle of separation from the Established Church; born in Devonshire 1700, died 1792.

TOWNLEY, CHARLES, a gentleman of Lancashire, who is numbered in the ranks of English scholars and connoisseurs, was born at the seat of his ancestors, 1737. He resided many years at Rome, where he collected the valuable marbles now in the British Museum, and known as the Townley Collection; died 1805. His uncle, **JOHN**, was an officer in the French army, and translated Hudibras into the language of his adopted country; died 1782.

TOWNLEY, JAMES, rector of St. Bennet's, Gracechurch-Street, and subsequently master of Merchant Tailors' school, known as a dramatic writer, and chiefly by his piece, entitled 'High Life Below Stairs,' 1715-1778.

TOWNSEND, JOHN, founder of the Deaf and Dumb Asylum in St. George's Fields, London, was born in the metropolis 1757, and became minister to an independent congregation, first at Kingston in Surrey, and afterwards at Bermondsey. The Rev. H. C. Mason, vicar of the latter parish, was his coadjutor in founding the asylum, for which a patron was found in the person of the late duke of Gloucester. They also worked together on the 'Family Bible,' known by the name of Mason's. Mr. Townsend died in 1826.

TOWNSEND, JOSEPH, a minister of the Church of England, educated as a physician under Dr. Cullen at Edinburgh. He was first interested in religion by the movement of the Wesleyans, and for some time acted as chaplain to Lady Huntingdon, and preached in her chapel at Bath; after which he obtained the living of Pewsey. He wrote several works, and died 1816.

TOWNSON, T., a learned divine, 1715-1792.

TOWSTON, W., an English traveller, 16th ct.

TOZER, H., a puritan divine, 1602-1650.

TOZZETTI, G. T., an Ital. botanist, 1722-1780.

TOZZI, LUKE, an Italian physician, 1638-1717.

TRACY, ANTHONY LOUIS CLAUDE DESTUTT DE, a French moralist and politician, 1754-1836.

TRACY, BERNARD DESTUTT DE, an ecclesiastic and ascetic writer, 1720-1786.

TRADESCANT, JOHN, a Dutch naturalist and Asiatic traveller, gardener to Charles I., died about 1652. His son, of the same name, author of a description of his father's curiosities, died about 1662. The latter bequeathed his father's museum to Elias Ashmole, who gave it to the university of Oxford. The Tradescants introduced many new plants into this country.

TRAETTA, T., an Italian composer, 1727-79.

TRAHERON, B., a learned divine, 16th cent.

TRAILL, ROBERT, a presbyterian minister, author of works highly esteemed among the Calvinists, born at Ely, in Fifeshire, 1642, died 1716. His son, ROBERT, was a minister in the county of Angus. JAMES, son of the latter, became an episcopalian, and was appointed, in 1765, bishop of Down and Connor; died 1783.

TRAJAN, one of the most illustrious emperors of Rome, was born near Seville, in Spain, in the year 53, and was adopted by Nerva in 97. The custom of adoption, when the choice was happily made, prevented the dangers incident to an interregnum, and, in this instance, only three months intervened between that expedient and the accession of the new Caesar. It is singular that Trajan was no connection or friend of Nerva's, but was chosen by him solely for his well-known virtues, his fine military spirit, and his general fitness for command; and so well had Rome reason to be satisfied with this choice, that the virtues of the new emperor remained, for ages after his time, proverbial. The great victories of Trajan were obtained over the Dacians, Germans, and Parthians, and it was to commemorate the first of these that his famous column was erected; imitated in our own times by that of Napoleon. By these victories he fixed securely the boundaries of the Roman empire on the banks of the Rhine and the Tigris. His internal administration was equally glorious, his reign being numbered with that of his successor, Hadrian, and with the period of the two Antonines, for its great clemency, and rigid discipline of justice—these virtues being ever inseparable. Among his benefactions may be mentioned the humane and legal mode of dealing with the Christians which he enjoined in his rescript to Pliny, appointed by him proconsul of Bithynia and Pontus. Trajan died at Selinus, a town in Cilicia, in August, 117. [E.R.]

TRALLES, B. L., a Polish physician, 1708-97.

TRALLIANUS. See ALEXANDER.

TRAPP, JOHN, a minister of the Church of England, author of Commentaries on all the books of Scripture, 1601-1669.

TRAPP, JOSEPH, commonly called Dr. Trapp, grandson of the preceding, and rector of Harlington, author of several learned works in divinity and polite literature, 1679-1747. See LAW.

TRAVASA, CAJETAN M., an Italian theatine, preacher, and historian, 1698-1774.

TRAVERS, N., a French priest, 1686-1750.

TRAVIS, G., an English divine, died 1797.

TREBY, SIR GEORGE, a celebrated judge and lawyer, period of the revolution, 1644-1702.

TREDGOLD, T., a civil engineer, died 1834.

TREIBER, J. P., a Ger. juriconsult, 1675-1727.

TREILHARD, J. B., Count, a French jurist and deputy to the estates-general, 1742-1810.

TRELON, C., a French poet, 16th century.

TREMBECKI, a Polish poet, died 1812.

TREMBLEY, ABRAHAM, an eminent naturalist and religious writer of Geneva, 1700-1784.

TREMELLIUS, EMMANUEL, son of a Jew of Ferrara, professor of Hebrew at Heidelberg, and author of a version of the Bible, 1510-1580.

TRENCHARD, SIR JOHN, a member of parliament and statesman, who was implicated in the Rye-house plot and the rebellion of Monmouth 1650-1695. JOHN, of the same family, a political writer, of the Whig party, author of 'The Natural History of Superstition,' 1669-1723.

TRENC, FREDERICK, Baron Von Der, a celebrated commander in the Austrian war of succession, was born at Reggio, of a noble Polish family in 1711. His military career commenced from 1738, when he entered the service of Russia. In 1740 he joined the Austrians, and became chief of the *Pandours*. His cruel and rapacious conduct created him many enemies, and being thrown into prison, he poisoned himself, after four years' confinement, in 1749. FREDERICK, his cousin, author of the celebrated *Memoirs*, was born in 1726 and entered the Prussian service under Frederick II. He was imprisoned in a dark underground cell at Magdeburg for ten years, and at last perished by the guillotine in France, 1794. MAURICE FLAVIUS, of the same family, was a writer on public law, and died 1810.

TRENEUIL, J., a French poet, 1763-1818.

TRENTA, P., an Italian poet, 1731-1795.

TRENTO, J., an Italian Jesuit, 1728-1784.

TRESCHOW, NIELS, a Norwegian philosopher and theologian, author of 'The Spirit of Christianity,' and the 'Philosophical Testament, or God Nature, and Revelation,' 1751-1833.

TRESHAM, H., an Irish poet, died 1814.

TRESSAN, LOUIS ELIZABETH DE LA VERGNE, Count De, a French officer and member of the Academy, author of a translation of Orland Furioso, and other works, 1705-1743. His son the ABBE DE TRESSAN, a writer, 1749-1809.

TRESSAN, PETER DE LA VERGNE DE, a missionary, born in Languedoc 1618, died 1684.

TREUER, G. S., a Germ. publicist, 1683-1743.

TREUTLER, J., a German jurist, 1565-1607.

TREUVE, S. M., a Fr. theologian, 1651-1730.

TREVISANI, FRANCESCO, an Italian painter taught by Antonio Zanchi, 1656-1746. ANGELICO his brother, a portrait painter, dates unknown.

TREVISANI, M. A., a Venetian doge, 1553-54.

TREW, C. J., a German botanist, 1695-1769.

TRIBOLO, N. DI, an Ital. sculptor, 1500-1550.

TRIBONIAN, a celebrated Roman jurist, who was employed by Justinian on the famous digest of the laws, died about 546. Tribonian bears a very indifferent character; a brief account of the great work on which he was engaged may be seen in the article JUSTINIAN.

TRICALET, P. J., an ascetic writer, 1696-1761.

TRICHET-DUPRESNE, RAPHAEL, a French bibliophile and numismatist, 1611-1661.

TRIER, J. P., a Germ. theologian, 1687-1768.

TRIEST, A., a Flemish prelate, 1576-1657.

TRIEWALD, SAMUEL, a Swedish poet and statesman, 1688-1742. His brother, **MARTIN**, a mathematician and engineer, 1691-1747.

TRIGLAND, J., a Dutch divine, 1652-1705.

TRILLER, D. W., a Ger. physician, 1695-1782.

TRIMMER, SARAH, authoress of numerous works designed to promote the religious education of the populace, was the daughter of Joshua Kirby, and was born at Ipswich in 1741. The principal of her works was a periodical continued several years under the title of 'The Guardian of Education.' Some of her books have been admitted into the list of the Society for Promoting Christian Knowledge. She died in 1810, and was buried in the family vault at Ealing.

TRIMNELL, C., a learned prelate, 1663-1723.

TRINCANO, DIDIER GREGORY, a military engineer and writer on fortification, born in Franche-Comté 1719, died about 1792. His son, **H. L. VICTOR**, a mathematician, 1754-1785.

TRINCAVELLI, VICTOR, a physician and classical editor of Venice, 1496-1568.

TRIONFETTI, LELIO and **GIAMBATISTA**, Italian botanists: the former 1647-1722; the latter, who was his brother, 1656-1708.

TRIP, LUKE, a Dutch poet, died 1783.

TRIPPEL, A., a Swiss sculptor, 1747-1793.

TRISSIN, or TRISSINO, GIOV. GEORGIO, an Italian poet, the first who wrote blank verse in that language, 1478-1550.

TRISTAN, J., a French numismatist, d. 1656.

TRISTAN, L., a Spanish painter, 1586-1640.

TRISTAN, N., a Portug. navigator in 1440-7.

TRISTAN L'ERMITE, FRANCIS, a French poet and dramatist, 1601-1649. His brother, **JEAN BAPTISTE**, a poet, historian, and genealogist, died about 1670.

TRITHEMIUS, JOHN, a famous German theologian and learned writer, 1462-1516.

TRIVET, NICHOLAS, an English Dominican, author of 'Annales Regium Angliæ,' died 1828.

TRIVISANO, MARCO, a Venetian biographer, died about 1674. His nephew, **BERNARDO**, a philosopher and literary *savant*, 1652-1720.

TRIULZI, GIAM GIACOMO, a distinguished general, born in 1447 of a noble Milanese family. Being slighted at the court of Lodovico Sforza, he entered the French service, and finally headed the invading army of Francis I., and won the battle of Marignano, which put the French in possession of Milan. Died at Chartres, 1518.

TROGUS POMPEIUS, a Norman historian, author of a Universal History, abridged by Justin, and described by him as a man of antique eloquence, time of Augustus.

TROILLUS, SAMUEL, a learned archbishop of Upsala, 1706-1764. His son, **UNO**, also archbishop of Upsala, and a man of letters, 1746-1803.

TROLLE, GUSTAVUS, archbishop of Upsala, and partizan of the Danish tyranny, killed in a battle in Norway after his expulsion, 1535.

TROLLE, H., a Danish admiral, 1516-1565.

TROLLE, G. H., a Swedish admiral, 1680-1765.

TROMMIUS, A., a German divine, 1688-1719.

TROMP, MARTEN HARPERTZOAN, a famous Dutch commander, was born in 1597, and received his first command from Prince Maurice in 1624. From 1637 to 1689 he was employed against the Spaniards and Portuguese, and was afterwards

matched against our own Admiral Blake; it was Tromp who sailed up the channel with a broom at his masthead, protesting he would sweep the English from the seas. He was killed in an action off the Dutch coast, 29th July, 1653. His son, **CORNELIUS VAN TROMP**, born 1629, displayed extraordinary courage and skill in his contests with the English, and died peaceably at Amsterdam in 1691. Some particulars will be found under the name of **RUYSER**, his fellow-commander.

TRONCHAY, G. DU, a Fr. writer, 1540-1582.

TRONCHET, F. D., a Fr. jurist, 1726-1806.

TRONCHIN, THEODORE, a protestant theologian of Geneva, 1582-1657. **LEWIS**, his son and successor as professor of divinity, died 1705. **N. DUBREUIL**, of the same family, a journalist, died in Holland, 1640-1721.

TRONCHIN, THEODORE, an eminent physician of the same family as the preceding, and a relative, by the mother's side, of Lord Bolingbroke, a great promoter of inoculation in France, 1709-1781. His relative, **JOHN ROBERT**, a jurisconsult, and writer against Rousseau, 1711-1793.

TROOST, C., a Dutch painter, 1697-1750.

TROWBRIDGE, SIR EDWARD T., a distinguished British admiral, died 1852.

TROWBRIDGE, SIR THOMAS, a naval officer distinguished in the last war, supposed to have perished at sea in the *Blenheim*, 1807.

TROSK, M., a German Orientalist, 1588-1636.

TROTTER, THOMAS, a physician in the royal navy, known as a professional and medical writer, born in Roxburghshire, died 1832.

TROTTI, J. P. B., an Ital. painter, 1555-1602.

TROTZ, C. H., a Ger. jurisconsult, 1701-1773.

TROY, FRANCIS DE, a Fr. painter, 1645-1730. His son, same name and profession, 1676-1752.

TRUBLET, N. C. J., a Fr. writer, 1697-1770.

TRUCHET, JOHN, a French monk, famous as an engineer and man of science, 1657-1729.

TRUEBA, DON TELESFORO DE, a Spanish constitutionalist, who took refuge in England and became known as a dramatist, died 1835.

TRUMAN, J., a nonconfor. divine, 1631-1671.

TRUMBULL, JOHN, an American lawyer and poet, born in Connecticut, 1750; died 1831. **JONATHAN**, his son, secretary to Washington, and member of Congress, 1740-1809. **JOHN**, brother of the latter, a painter of history, some of whose productions adorn the capital at Washington, 1756-1843.

TRUMBULL, SIR WILLIAM, a statesman and diplomatist, time of James II. and William III., well known as the friend and literary confidant of Dryden and Pope, 1638-1716.

TRUSLER, J., a literary compiler, 1735-1820.

TRYPHODORUS, a Greek poet and grammarian, time of Anastasius, 6th century.

TRYPHO, a Syrian usurper between Antiochus VI. and Antiochus VII., B.C. 140-134.

TSCHARNER, BERNARD, a Swiss historian, died 1778. His brother, **N. EMMANUEL**, 1773-94.

TSCHERNING, ANDREW, a Prussian poet and philologist, 1611-1659.

TSCHIRNER, HENRY THEOPHILUS, professor of theology at Wittenberg, an eloquent preacher, and author of several works, 1778-1828.

TSCHIRNHAUSEN, E. W. VON, a learned

German, distinguished for his discoveries in the art of manufacturing lenses and burning mirrors, and founder of the manufacture of porcelain in Saxony, 1651-1708.

TSCHOULBOF, M. D., secretary to the Russian senate and an historical writer, died 1793.

TSCHUDI, GILLES, in Latin *Egidius Tscudus*, a Swiss historian and teacher of Zuinglius, 1505-1572. DOMINIQUE, his brother, an ecclesiastic and historian, 1596-1654. J. HENRY, also an historian, 1670-1729.

TUAIRE, F., a French painter, 1794-1823.

TUBI, J. B., an Italian sculptor, 1630-1700.

TUCKER, ABRAHAM, the son of a London merchant, who was educated for the bar, and became known as a metaphysical writer. His principal work, entitled 'The Light of Nature Pursued,' was published under the fictitious name of Edward Search in 1765; flourished 1705-1774.

TUCKER, JOSIAH, a dignitary of the Church of England, author of a 'Treatise on Civil Government' and 'Elements of Commerce,' 1712-1799.

TUCKER, ST. GEORGE, called 'the American Blackstone,' a distinguished lawyer and promoter of the independence of the United States, d. 1828.

TUCKER, W., a learned divine, died 1620.

TUCKEY, JAMES HENGSTON, an African explorer, au. of 'Maritime Geography,' 1776-1816.

TUCKNEY, A., a learned puritan, 1599-1670.

TUDWAY, T., a musical composer, 17th cent.

TUDOR. See OWAIN.

TUET, J. C. F., a Fr. philologist, 1742-1797.

TULL, J., an agricultural writer, 1680-1740.

TULLIA. See TARQUIN.

TULLIN, C. B., a Norwegian histor., 1728-65.

TULLIUS HOSTILIUS, successor of Numa Pompilius as king of Rome, B.C. 673-641.

TULLY, GEORGE, rector of Gateside near Newcastle, and a famous writer against popery, died 1697. His uncle, THOMAS, a learned divine and controversial writer, 1620-1676.

TULP, NICHOLAS, a Dutch physician who became burgomaster, and greatly disting. himself by his patriotic resistance to Louis XIV., 1594-1674.

TUNSTALL, or TONSTAL, CUTHBERT, a famous English prelate, uncle of Bernard Gilpin, was born near Richmond, in Yorkshire, about 1474. In 1516 he accompanied Sir Thomas More as ambassador to Charles V., after which he became successively bishop of London and Durham. He was imprisoned in the Tower during the reign of Edward VI., and though he had shown a humane regard for the persons of protestants in the reign of Mary, he was deprived of his liberty again in that of Elizabeth. His keeper, however, was Archbishop Parker, who entertained him in a friendly manner at Lambeth, where he died in 1559.

TUNSTALL, JAMES, vicar of Rochdale, author of 'Discourses upon Natural and Revealed Religion,' and some classical commentaries, 1710-72.

TURA, COSMO, an Italian painter, 1406-1469.

TURBERVILLE, GEORGE, a poet and translator of Ovid, born at Whitchurch, in Devonshire, about 1580, died about 1600. His poetical description of Russia was founded on the knowledge he obtained of that country as secretary to the English ambassador, Sir Thomas Randolph.

TURCHI, ALESSANDRO, an Italian painter, taught by Brusasorci, about 1580-1650.

TURCHI, L., bishop of Parma, 1724-1803.

TURENNE. HENRI DE LA TOUR D'Auvergne, Viscount de Turenne, was born at Sedan, of a noble family, 16th September, 1611. At the age of fifteen he served in Holland, and studied the art of war under his maternal uncles, Prince Maurice of Nassau, and Prince Frederick Henry. In 1634 he received the command of a French regiment, and gained brilliant distinctions in the campaign in Flanders. In 1639 he commanded with success in Italy, and in 1643 he conquered Roussillon. In the next year he was made marshal of France, and commander of the French armies in Germany. He gained the great battle of Nordlingen in 1645; and by his able manœuvres, and decision and skill in action, he was the chief cause of the advantages gained over the imperialists in the latter part of the thirty years' war. When the civil war of the French broke out in France, Turenne was first engaged against the court, but afterwards became the chief commander of the royal armies. In 1654 and 1655 he commanded against the Spaniards and the Low Countries, gained the battle of the Dunes, and conquered the greater part of Flanders. The peace of the Pyrenees in 1660 closed this war; but when hostilities were renewed in 1667, Turenne ran through another rapid career of victories in Flanders, and the Spaniards were obliged to beg again for peace in the next year. In 1672 he was at the head of the French troops in Holland. He took forty towns in twenty-two days, and won five pitched battles against the Dutch and Austrians. He continued to guide the French arms with almost unvarying skill and success till the 27th July, 1675, when he was killed by a chance cannon shot when reconnoitring the ground for an intended battle against the celebrated imperialist commander, Montecuculi. [E.S.C.]

TURGOT, an English monk and historian of Durham, who became bishop of St. Andrews and primate of Scotland, died 1115.

TURGOT, ANNE ROBERT JACQUES, born at Paris, 10th May, 1727; died 20th March, 1781; one of the purest and most virtuous of men; certainly the wisest statesman who appeared during the latter days of the French monarchy. Could the fury of the terrible whirlwind which so soon numbered that ancient and gorgeous monarchy among things that were, have been averted by human providence, the man who alone could have saved that calamity was Turgot. In early youth, intended for the Church, his studies were varied, and in regions seldom visited by men of Action. Fortunately for France his purposes changed, and he turned his mind towards the functions of the Magistracy. Having obtained some inferior appointments, the repute of his administration was such, that in 1774, the Count Maurepas, the first Minister, called him to the high and responsible office of *Minister of Finance*. Here, the consummate ability of Turgot had fullest scope; and for a time, alike Court and Nation reposed on his unimpeachable probity. The Finances of France, as is well known, were then fast verging towards that condition which forced on the Revolution. Turgot's remedies were distinct and simple—'No bankruptcy, no more Loans, no increase of Taxes; but a rigorous examination of expenditure and resolute reduction.

Nor was the panacea a mere proposal. The Minister was equal to the realizing of it. And the reforms effected during his brief tenor of office were so numerous and important, that Public Credit for the time was re-established! Who knows not, however, that every financial reformer creates an army of enemies? Is a sinecure destroyed? Not only its holder, but his family: not only these, but all who are thereby put in fear, conspire against the formidable Minister. On a day marked black in the French Fasti—12th May, 1776, Turgot was dismissed: poor Louis XVI. having first remarked '*Il n'y a que M. Turgot et moi qui aimons le peuple.*' It was about the middle period of his ministry that Turgot addressed to Louis that celebrated memoir on the state of the Municipalities, in which he declared that the safety of France depended on the realization of such a constitution as actually prevailed long afterwards under Louis Philippe.

The cause of the evil, Sire, is, that your people have no constitution. The French nation is a society composed of different orders of men imperfectly united, and of a people among whom there are few social ties. On this account every man is absorbed in concern for his private interests; no one takes trouble about his public duties, or his relations with others.' Would that France had then obtained what might have converted mutual hatreds into a common patriotism, and jarring classes into a Nation!—After these two years of office, Turgot lived in retirement; but an active and glorious one. He wrote much;—the spirit of large and wise philanthropy breathing through every line. He had an old attachment to political economy; and his pen had fought well in the war with Monopolies. He was fond of metaphysics—especially as these bear on the theory of Language: his essay on *Existence* in the *Encyclopædie* is well known. But, perhaps, of all he has left, that which has the most enduring value are his *Letters to an Ecclesiastic on Toleration*: his *Discourse on the Advantages of the Christian Religion*: a second *Discourse on the Progress of the Human Mind*: and *Sketch of Universal History*. Pregnant as these are with instruction for all time, we express the fervent hope, that some one of our many enterprising publishers, may see reason to present them to the British people.—Turgot's whole works have been collected recently and published in two elegant royal 8vo volumes. [J.P.N.]

TURGOT, FRANCIS, called 'the Chevalier,' brother of the preceding, and a colonial governor, 1721-89.

TURGOT, M. S., a French provost, 1690-1761.

TURLOT, F. C., a French writer, 1745-1824.

TURNÈBE, ADRIAN, in Latin *Turnebius*, a French Hellenist and critic, 1512-1565.

TURNER, D., an English botanist, died 1818.

TURNER, D., a baptist writer, 1701-1798.

TURNER, EDWARD, M.D., born in Jamaica, 1797; died at London, 1837; the author of a valuable manual of chemistry, and of numerous contributions to chemical mineralogy and stoichiometry. He began his career as a lecturer in Edinburgh. When University College was instituted, the lectureship of chemistry was offered to Dr. Thomas Thomson, and on his declining to leave Glasgow, he was requested to nominate a

qualified chemist; he recommended Dr. Turner, who was accordingly appointed. Dr. Turner was a man of the most amiable disposition, and of acute scientific talents. [R.D.T.]

TURNER, J. H., an archæologist, 1814-1851.

[Birth-place of Turner.]

TURNER, JOSEPH MALLERD WILLIAM, was born in Maiden Lane, Covent Garden, in the spring of 1775. His father carried on a small business as a hair-dresser; and it was over his father's shop in Maiden Lane where most of his early efforts, in the art in which he eventually became so famous, were produced. His abilities appear to have been rapidly developed, for though unaided by instruction from any master, he obtained admission as a student into the Royal Academy in 1789, in only his fifteenth year, and was an exhibitor in the academy the following year, 1790. In his early youth, Girtin, the water-colour painter, appears to have been Turner's chief adviser, who always expressed a high veneration for his friend's ability. Turner had also the very great advantage of freely copying in the Gallery, or from the collection of drawings of Dr. Munro in the Adelphi; and his elaborate drawings soon procured a public recognition of his talents: he was elected an associate of the Royal Academy in 1800, and an academician in 1802. He was thus for fifty years one of the most distinguished members of that institution; and after a life of almost unrivalled success, and an industry unsurpassed, this great landscape painter died unmarried, and under an assumed name, in an obscure lodging at Chelsea, 19th December, 1851. He was, however, buried by the side of Sir Joshua Reynolds, in the crypt of St. Paul's Cathedral.—His life was in every sense a remarkable one; for its humble origin, and for its splendid results; retired and reserved always while living, the splendour of his fame among his contemporaries does not contrast more strongly with his habits of life, than the great and national character henceforth identified with his name, both by his reputation and the disposition of his property, does with the singular humility of his closing career. His large fortune,

both in pictures and in funded property, he has bequeathed to the nation; his pictures, however, under the condition that the government provide a suitable dwelling for them within ten years, and his funded property towards the establishment of an institution for the benefit of decayed artists. Turner had three styles as a landscape painter, and as the history of every distinguished painter will show, his first manner was much distinguished for laborious care in execution: he was chiefly a water-colour painter in early life. The contrast of style between his early and latest works is remarkable—the latter distinguished for its excessive looseness of execution, the former for its elaborate finish; and, compared with his ordinary works, for a coldness of colour. This peculiar coldness of colour he displayed both in his oil and water-colour pictures; and in some of the best of his early works, he shows a decided imitation of Wilson. In middle life he adopted a much freer mode of execution, and a greatly richer style of colouring. His finest works belong to this middle period, of which the two pictures bequeathed by him to the National Gallery, to be hung between two Claudes, are fine examples: the sun rising in a mist, exhibited in 1807; and Dido building Carthage, exhibited in 1815. Turner may be judged by these works, as he himself considered them two of his principal masterpieces; and the self-assertion of insisting upon their being exhibited by the side of the Claudes, shows that he courted, and required no indulgence from, our criticism. In comparison with Claude his execution is loose, even in his middle period; but these two pictures do not suffer more by the comparison than the Claudes—both are injured, as they are nearly in opposite extremes of taste; the Turners require some of his own later works as a foil, and in this case the two bequests might display the happy medium of execution. The majority of Turner's works of this middle period are certainly masterly and brilliant in colour. In the last twenty years of his career he was extravagant to an extreme degree: he played equally with nature and with his colours: although we could not see such effects in nature as he latterly represented, he maintained that we should be glad to see them, nevertheless. Light, with all its prismatic varieties, seemed to have been the chief object of his studies; individuality of form or character he was wholly indifferent to. The wild looseness of execution in Turner's latest works has not the apology of being attempted on scientific principles; he does not work up a particular point of the picture as a focus, and leave the rest obscure, as a foil, to enhance it: but all is equally obscure and wild. But were it otherwise, the philosophy would be very questionable: the infinite advantage of the human eye over instruments made by man is, that it can instantly adapt its focus to any object, and thus distinguish, within a limited range, the distant or the near equally well. It is this faculty of the eye which makes the natural landscape so charming; and, accordingly, nature also requires that the landscape which professes to be its transcript should be finished in all its parts, and thus enable the eye to exercise its wonderful functions over it as it does over a natural scene. Turner's works are very numerous in all his styles: he exhibited

about 300 pictures in the Royal Academy, which, however, constitute but a very small portion of his works. In 1808 he published a work called *Liber Studiorum*, or Book of Sketches, in imitation of Claude's *Liber Veritatis*.—(John Burnet, *Turner and his Works*, &c., 1852.) [R.N.W.]

TURNER, SAMUEL, a diplomatist of the East India government time of Hastings, author of an account of his embassy to Thibet, 1749-1802.

TURNER, SHARON, a solicitor of London, whose works on Anglo-Saxon history and some other subjects, are reckoned among the standards of English literature, 1768-1847.

TURNER, THOMAS, chaplain to Laud, bishop of London, and finally dean of Canterbury, 1591-1672. FRANCIS, his son, bishop of Ely, one of the seven prelates committed to the Tower by James II., author of a 'Vindication of Archbishop Sancroft,' 'Animadversions on a Pamphlet entitled the Naked Truth,' and other works, died 1700.

TURNER, WILLIAM, rector of Walberton, in Sussex, au. of a 'History of All Religions,' 1695.

TURNER, WILLIAM, a dignitary of the church, who wrote the earliest English herbal, entitled a 'History of Plants,' died 1568.

TURPIN, TULPIN, or TELPIN, JOHN, in Lat. *Turpinus*, a Fr. prelate and chronicler, 8th c.

TURPIN, F. H., a French historian, 1709-1799.

TURPIN DE CRISE, LANCELOT, Count, a French officer and writer on tactics, 1715-1795.

TURRETIN, BENEDICT, a Swiss protestant theologian, 1588-1631. His son, FRANCIS, professor at Geneva and a theological writer, 1623-1687. JOHN ALPHONSUS, son of the latter, and the most celebrated ecclesiastical writer and theologian of the family, 1671-1737. Of the same family were—MICHAEL, professor of divinity, 1646-1721. SAMUEL, son of Michael, professor of theology and Oriental languages, 1688-1718.

TUSSAUD, MADAME, the famous wax-modeller and proprietress of the exhibition in London, was born in Berne 1760. She came to London in 1802, and died there in 1850.

TÜSSER, THOMAS, a poet, called by Warton 'The British Varro,' born in Essex about 1515, died in London between 1580 and 1585. His principal work is quaintly entitled, 'Five Hundred Points of Good Husbandry vinit to as many of Good Huswiferie.'

TUTCHIN, J., a political writer, died 1707.

TUTILO, or TUOTILO, a monk of St. Gall, in Switzerland, distinguished as a painter, sculptor, orator, poet, and musician, 9th century.

TWEDDELL, JOHN, an accomplished scholar and traveller, born in Northumberland 1769, died prematurely at Athens 1799.

TWELLO, L., a learned divine, died 1742.

TWINING, T., a classical scholar who was presented to the living of St. Mary's, Colchester, by Bishop Lowth, born in London 1734, died 1804.

TWINING, W., an army physician and professional writer, born in Nova Scotia, died 1835.

TWISS, HORACE, a barrister and miscellaneous writer, was the son of Francis Twiss, known as a man of letters, and of Frances, second daughter of Roger Kemble, the father of that celebrated family. He was called to the bar in 1811, and entered parliament as member for Wootton Bassett, in 1820. In 1828, he was under-secretary for the colonies.

during the administration of Wellington. He never obtained much success in political life, but was highly esteemed in the social and literary circle. The principal of his works is a 'Life of Lord Eldon.' Died 1849.

TWISS, RICHARD, a traveller of fortune, known as a miscellaneous writer, 1747-1821.

TWISS, W., a nonconformist divine, 17th cent.

TWYNE, JOHN, an antiquarian and mayor of Canterbury, died 1581. His grandson, BRIAN, an antiquarian, was vicar of Rye, in Sussex, and archivist at Oxford, 1579-1644.

TWYSDEN, SIR R., an antiquary, 1597-1672.

TYCHSEN, O. G., professor at Rostock, and author of several Oriental works, 1734-1815.

TYCHSEN, T. C., an Orientalist, 1758-1834.

TYDEMAN, M., a Dutch *savant*, 1741-1825.

TYE, C., a musical composer, 16th century.

TYERS, T., an English critic, 1726-1787.

TYMPE, J. G., a Ger. theologian, 1699-1768.

TYNDALE, or TINDALE, WILLIAM, the venerable martyr and translator, was born in the hundred of Berkeley, either at Stinchcomb, or North Nibley, Gloucestershire, about the year 1484. At an early period he was sent to Oxford, where he took his degree, and also gave instructions in Magdalen Hall. But he left Oxford for Cambridge, where it is believed that he took a degree. In 1522 Tyndale is next found as tutor in the house of Sir John Welch of Little Sodbury, not far from Bristol, where he preached in the villages and towns on Sabbath, and often disputed with neighbouring abbots and other Romish ecclesiastics. Here too, he translated the 'Enchiridion Militis' of Erasmus, as a present to his host and his lady. His free opinions and discussions soon got him into troublesome examinations before the popish dignitaries, but no penalty was inflicted on him. He took the hint, however, left the county, and came to London, his mind being now fully occupied with the idea of translating the Scriptures. He soon found, as he himself quaintly says, 'that there was no room in my lord of London's palace to translate the New Testament, nay, no place to do it in all England.' In London he sometimes preached at St. Dunstan's-in-the-West, while Alderman Humphrey Monmouth took him under his protection, and gave him an annuity of ten pounds a-year, to enable him to live abroad, for which ten pounds he was in return to pray for the souls of the alderman's father and mother. Tyndale on leaving England went first to Hamburg. It is often said that from Hamburg he proceeded to Wittemberg, where he met Luther, who had now thrown off the last vestige of popish thralldom, and that there he completed his translation of the New Testament. The statement is apparently not correct, for during 1524 he seems to have remained at Hamburg, and in 1525 he appears to have been first at Cologne and then at Worms. At Cologne Tyndale seems to have commenced to print his first edition in 4to, but after ten sheets were printed the work was interrupted, and the translator and his coadjutors betook themselves to the Lutheran city of Worms, where the quarto was finished, and an octavo edition also issued from the press. The prologue to the quarto has been republished under the name of 'A Pathway to the Scriptures.' The translator's

name was attached to neither of the two editions, and he assigns a reason for this omission in his 'Wicked Mammon,' published in 1527. Copies of these versions early found their way into England. In 1526 Tunstall, bishop of London, fulminated his prohibition of them, and two years afterwards a number of copies were collected, nay, some were purchased by the bishop in Antwerp, and burnt at St. Paul's Cross. Warham and Wolsey were also dreadfully enraged, and Sir Thomas More was employed to denounce Tyndale, but his genius was foiled in the attempt, and Tyndale won a precious victory over the learned chancellor. Two editions were then printed at Antwerp, and found their way to England in vessels laden with grain. Endeavours were made to seize Tyndale and punish all who assisted him, but he removed to Marburg in Hesse in 1528, and published there a book of great value—'The Obedience of a Christian Man.' The result of all the English opposition was, that, as Foxe expresses it, 'copies of the New Testament came thick and threefold into England.' We find Tyndale again at Antwerp in 1529, during which year a fifth edition was printed; the four books of Moses were also translated, printed each at a separate press, and put into circulation. The enemies of the translator endeavoured to decoy him into England, but he was too wary to be so easily entrapped, for he well knew what displeasure Henry VIII. felt at his tract, called 'The Practice of Prelates,' and what penalty the royal indignation would speedily inflict. After the martyrdom of Frith, Tyndale set himself to revise and correct the version of the New Testament, and it was soon thrown off, with this remark in the preface, 'which I have looked over again with all diligence, and compared with the Greek, and have wedded out of it many fautes.' But his enemies in England, whose power had been shaken by the copious circulation of the English New Testament, were the more enraged against him, and conspired to seize him on the continent, in the name of the emperor. An Englishman, named Philips, betrayed him, and acting under such information, the authorities at Brussels seized him, in the house of Pointz his friend, and conveyed him to Vilverde, twenty-three miles from Antwerp. Pointz, who had with difficulty escaped himself, made every effort for him, but in vain. The neighbouring university of Louvain thirsted for his blood. Tyndale was speedily condemned, and on Friday, the 6th October, 1536, in virtue of a recent Augsburg decree, he was led out to the scene of execution. On being fastened to the stake, he cried in loud and earnest prayer, 'Lord, open the eyes of the king of England,' and then was first strangled and afterwards burnt.

His ashes flew,

No marble tells us whither.

The merits of Tyndale must ever be recognized and honoured by all who enjoy the English Bible—for their authorized version of the New Testament has his for its basis. He made good his early boast, that ploughboys should have the Word of God. His friends all speak of his great simplicity of heart, and commend his abstemious habits, his zeal, and his industry; while even the imperial procurator who prosecuted him styles him, *homo doctus, pius et bonus*. The works of Tyndale and

Frith were collected and published in three vols. 8vo, London, 1831. [J.E.]

TYPOEST, JAMES, in Latin *Typotius*, a Flemish historian, died 1601.

TYRANNIO, a Gr. grammarian, 1st cent. B.C.

TYRCONNEL, RICHARD TALBOT, earl of, a partizan of James II. in Ireland.

TYRRELL, JAMES, a barrister of the Temple, au. of a 'General History of England,' 1642-1718.

TYRTEUS, a Greek poet and musician, whose military songs and airs animated the Spartan army, and were constantly sung and played as long as that republic existed, 7th century B.C.

TYRWHITT, THOMAS, a famous scholar and master of polite literature, was born at Westminster in 1730, and was successively under-secretary at war and clerk to the House of Commons. He resigned the latter situation in 1768, and devoted his future years to literature. Besides his valuable classic commentaries, Tyrwhitt edited Chaucer's *Canterbury Tales* and Rowley's *Poems*, which he proved to be the production of Chatterton; d. 1786.

TYSON, EDWARD, a physician and writer of curious works in comparative anatomy, 1649-1708.

TYSON, JAMES, a dramatic writer, 1799-1820.

TYSSEUS, PETER, a Flemish historical painter, 1625-1692. His son, NICHOLAS, famous for the representation of still life, flowers, fruit, armour, and military weapons, 1660-1719. AUGUSTUS, br. of the latter, a landscape painter, 1662-1722.

TYTLER, H. W., a Scotch physicc., 1752-1808.

TYTLER, JAMES, born at Brechin, in Scotland, 1747, celebrated as a miscellaneous writer, and editor of several periodical works. Died in America, where he became a political exile, 1805.

TYTLER, WILLIAM, a Scottish antiquarian and

historical writer, was born at Edinburgh 1711, and became a writer to the signet, in which profession he continued till his death in 1792. His principal works are 'An Historical and Critical Inquiry into the Evidence produced against Mary Queen of Scots,' a 'Dissertation on the Marriage of Mary to Bothwell,' and the 'Poetical Remains and Life of James I., king of Scotland.' His son, ALEXANDER FRASER, Lord Woodhouselee, was successively professor of history, judge advocate, and justice of the Court of Session. He is the author of several much valued historical and critical works, the principal of which is his 'Elements of General History,' 1747-1813. The son of the latter, PATRICK FRASER TYTLER, the most eminent of the family, was born in 1790, and died after a lingering illness in 1849. His principal work is a 'History of Scotland,' in 9 vols., published at intervals from 1828 to 1843. Besides this contribution to historical literature he wrote a 'Life of the Admirable Crichton,' 'The Life and Writings of Sir Thomas Craig,' 'Lives of Scottish Worthies,' a 'History of Discovery on the Northern Coasts of America,' a 'Life of Sir Walter Raleigh,' and a 'Life of Henry VIII.' In the latter years of his life he enjoyed a pension of £200 a-year, for which he was indebted to the administration of Sir Robert Peel.

TZETZES, JOHN or JOANNES, a learned grammarian and poet of Constantinople, author of a valuable work entitled, *Chiliades Variarum Historiarum*, or *Historical Miscellanies*, 12th century. His brother, ISAAC, was also a man of taste and letters, and held a magisterial office in Macedonia.

TZETZI, J. B., a learned writer, 16th century. TZSCHIRNER. See TSCHIRNER.

U

UBALDI, G., a mathematician of the 17th cent.

UBALDINI, PETRUCCIO, an illuminator of Florence, who came to England in the reign of Elizabeth as a teacher of his native language, and wrote several historical works, from 1550-1588.

UBALDINI, ROGER, archbishop of Pisa, in 1276, noted for his cruelty as a Ghibelline chief. Having captured Ugolino and his sons, of the opposite party, he shut them up in a room and left them to die of hunger.

UBERTO, F. DEGLI, an Ital. poet, died 1370.

UCCELLO, P., an Italian painter, 1349-1432.

UCHENSKI, J., primate of Poland, died 1581.

UDAL, JOHN, a rigid puritan and Oriental scholar, died in the Marshalsea prison, London, 1592. EPHRAIM, his son, vicar of St. Augustin's, Walling Street, a zealous royalist, author of a treatise against sacrilege, entitled 'A Coal from the Altar,' and other works, died 1647.

UDAL, NICHOLAS, master of Westminster school, author of several works, 1506-1564.

UDALRIC, duke of Bohemia, 1012-1037.

UDEN, L. VAN, a Flemish painter, 1595-1662.

UDINA, GIOVANNI DA, an Italian painter, taught by Giorgione and Raphael, 1489-1562.

UFFEMBACH, or UFFENBACH, Z. C. VON, a learned German bibliographer, 1683-1734. His brother, JOHN FREDERIC, a lyric poet, 1687-1769. PETER, a physician, died 1635.

UGGERI, A., an Italian antiquary, 1754-1837.

UGGIONE, M., an Italian painter, died 1520.

UGHELLI, F., an eccles. historian, 1595-1670.

UGOLINO. See GHERARDESEA.

UHLICH, G., an Austrian historian, 1743-1794.

UULKENS, JAMES ALBERT, a Dutch naturalist and theologian, professor at Groningen, 1772-1825.

UITENBOGAARD, J., a Dutch theologian of the party of Remonstrants, 1557-1650.

ULADISLAS, seven kings of Poland:—ULADISLAS I., duke or king, succeeded his brother, Boleslas, in 1081 or 1082; his reign was troubled with civil and foreign wars, died 1102 or 1103. ULADISLAS II., succeeded his father, Boleslas III., in 1138 or 1139; he was deposed 1146, and died in exile 1159. ULADISLAS III., was elected king 1202, and deposed in 1206 on account of his cruelties, died 1233. ULADISLAS IV., surnamed LOKETEK, became master of the kingdom in 1290, was deposed by the states, and Wenceslaus elected in his room, 1300, but was restored on the death of the latter in 1305 or 1306. He sustained a war with the Teutonic knights, and died 1333. His son, Casimir III., called *the Great*, succeeded him. ULADISLAS V., grand duke of Lithuania, obtained the crown by marrying Hedwiga, daughter of Louis. See JAGELLON. He was succeeded by his son, Casimir IV. ULADISLAS VI., son of Casimir IV., same as LADISLAUS VI., king of

Hungary; see that article. **ULADISLAS VII.**, son of Sigismund, was born 1595, and succeeded his father 1632. He had previously sustained a war with the house of Romanoff, and now in 1633-4 he conquered the Turks and the Tartars of the Crimea. Died 1648.

ULADISLAS, three dukes or kings of Bohemia:—**ULADISLAS I.**, reigned 1109-1125. **ULADISLAS I.**, succeeded 1140, deposed and died in the same year, 1173. **ULADISLAS III.**, reigned only a few months in 1198, and died 1222. The sixth king of Hungary and Poland of this name, became king of Bohemia in 1471. See **LADISLAUS**.

ULDIN, a king of the Huns, 400-412.

ULEFELD, **CORNIFIX** or **CORFITO**, Count, a Danish statesman time of **Christiern VI.**, d. 1664.

ULFT, **J. VANDER**, a Dutch painter, 1627-80.

ULLOA, **A. DE**, a Spanish historian, d. 1680.

ULLOA, **ANTONIO DE**, a Spanish general and statesman, a great promoter of industrial and scientific progress in that country, 1718-1795. Ulloa's great distinction was in the mathematical sciences; and when very young he was sent to South America to co-operate with Condamine and the other French academicians in measuring a degree of the meridian. His talents, more lately, were turned to account in the construction of public works requiring engineering skill, the introduction of the woollen manufacture, &c.

ULLOA Y PEREIRA, **LOUIS DE**, a Spanish poet, time of Philip IV., died 1660.

ULPHILAS, a Gothic bishop, known to history about 375 as a delegate to the emperor Valens, from whom he solicited a settlement in Thrace for his countrymen. He is said to have translated the Bible into the Gothic language, and to have invented the characters for that purpose.

ULPIAN, a rhetorician of Antioch, 4th cent.

ULPIANUS, **DOMITIUS**, a famous jurist of Rome, who became the chief minister of his pupil, the emperor Alexander Severus, in the year 222. He is said to have been a resolute enemy of the Christians; and having effected some reforms in the army, he was murdered by the soldiers at the behest of the emperor and his mother, 228.

ULRIC, **PHILIP ADAM**, a native of the bishopric of Wurtzbourg, a teacher of jurisprudence and promoter of agriculture improvements, born 1692.

ULRICA, **ELEANORA**, two queens of Sweden.

1. The wife of Charles XI., and mother of Charles XII., was born in 1656: her father was Frederick II. of Denmark, and her marriage with the Swedish king in 1679 facilitated the establishment of peace between the two countries. She died in 1693. She was remarkable for her great learning and beneficent disposition. 2. The daughter of the preceding, born 1688, succeeded her brother, Charles XII., as queen regnant in 1719, four years after her marriage with prince Frederick of Hesse Cassel. In 1720, she resigned the government into the hands of her husband. Died 1744.

ULRICH, **J. H.**, a Ger. philosopher, died 1818.

ULRICH, **JOHN JAMES**, a Swiss theologian, 1569-1638. Another of the same names, professor of moral philosophy and natural law, and an ecclesiastical writer, 1683-1731. **JOHN GASPARD**, an ecclesiastic, author of a curious history of the Swiss Jews, 1705-1768. **JOHN RODOLPH**, a minister and author of ascetic works, 1728-1795.

ULUGH BEGH, a prince of the Tartars, grandson of the famous Tamerlane, was born in 1394, and succeeded his father on the throne, in 1447. He had been accustomed to the cares of government from his boyhood, and greatly distinguished himself as a patron of learning, and by his own astronomical observations, and works illustrating Eastern history and geography. His elder son having rebelled against him, caused him to be put to death near Samarcand in 1449 or 1450.

UNDERWOOD, **T. R.**, an artist and naturalist, author of 'Memorable Events in Paris during the Capitulation of 1814,' died 1835.

UNGER, **J. F.**, a Ger. economist, 1716-1781.

UNTERBERGER, **IGNATIUS**, a painter of a Tyrolese family that has produced many celebrated artists, born at Karales, 1744, died 1797.

UNZER, **JOHN AUGUSTUS**, a German physician, distinguished by his works on physiological and psychological subjects, among which may be mentioned 'A New Doctrine concerning the Movements of the Soul and the Imagination,' 'Thoughts on Sleep and Dreams,' 'On the Sensitive Faculties of Animated Bodies,' 'The Physiology of Animated Nature,' and 'Physiological Researches,' 1727-1799. His wife, **JANE CHARLOTTE**, a poetess and moralist, died 1782.

UNZER, **LOUIS AUGUSTUS**, a German writer, an. of a 'Treatise on Chinese Gardens,' 1748-75.

UPHAM, **W. E.**, an Eng. historian, died 1833.

UPTON, **JAMES**, a learned schoolmaster and divine of the Church of England, editor of classical works, 1670-1749. His son, **JOHN**, rector of Great Rissington, in Gloucestershire, also a classical editor, published an edition of Spenser's 'Faerie Queene,' and Notes on Shakspeare, 1707-1760.

URBAN, eight popes of Rome:—**URBAN I.**, succeeded Calixtus I. in 222, and suffered martyrdom in 230. **URBAN II.**, whose name was Otho or Endes, a Frenchman, succeeded Victor III. in 1087 or 1088; he struggled against the pretensions of the emperor, and proclaimed the first crusade at the instance of Peter the Hermit, died 1099. **URBAN III.**, reigned in the time of the emperor Frederick I., 1185-1187. **URBAN IV.**, time of St. Louis, to whom he offered the crown of Sicily, which was accepted by the duke of Anjou, 1261-1265. He instituted the festival of Corpus Christi. **URBAN V.**, succeeded Innocent VI. 1362, at the period when the papal court was held at Avignon (see **RIENZI**); he removed to Rome in 1367, but returned again in 1370, and died at Avignon the same year. **URBAN VI.**, succeeded Gregory XI. in 1378, and became the abettor of Charles Duraazo against Joan of Naples, died after an unquiet pontificate 1389. **URBAN VII.**, died the twelfth day after his election in September, 1590. **URBAN VIII.**, successor of Gregory XV. in 1623, held the pontificate during a long and busy period marked by the disputes of Jansenism; died 1644.

URBAIN, **FERDINAND DE ST.**, a French artist, and designer of medals to Innocent XI., 1654-1731.

URCÉO, **A.**, a learned Italian, 1446-1500.

URFE, **ANNE D'**, a French poet, 1555-1621. **HONORE**, his brother, a novelist and historian of the gallantries of Henry IV., contained in his romance of Astræa, 1567-1625.

URQUHART, **SIR THOMAS**, a Scottish mathematician and philologist, time of Charles II.

URQUIJO, DON MARIANNO LUIZ DE, a Spanish statesman, time of King Joseph, 1768-1817.

URREA, J. DE, a Spanish writer, 16th cent.

URRUTIA, J. DE, a Span. general, 1728-1800.

URSIN, J. F., a Germ. philologist, 1735-1796.

URSIN, JOHN HENRY, ecclesiastical superintendent at Ratisbon, author of a 'Compendium of the Ecclesiastical History of Germany,' died 1667. GEORGE HENRY, his son, a philologist and teacher of the *Belles Lettres*, 1647-1707.

URSINS, ANNA MARIA DE LA TREMOILLE, Princess Des, a celebrated name in Spanish history, was born in France about 1643. She was married in 1659 to the prince of Talleyrand Chalais, and in 1675 to the duke of Bracciano, chief of the Orsini family. After the death of the latter, she was attached to the court of Spain, and really governed the country during the early part of the reign of Philip V. In 1714, however, she was banished the kingdom, and subsequently kept house for the Pretender, James Stuart. Died 1722.

URSINS, J. JOUVENEL DES. See JUVENAL.

URSINUS, B., a Germ. mathemat., 1587-1633.

URSINUS, ZACHARY, a German professor of divinity and friend of Melancthon, author of several works, some of which have been translated into English, and a man of high moral character, 1584-1577. A descendant of his, named BENJAMIN, was raised to the prelate when Frederic I. assumed the title of king of Prussia in 1701. For others of the name see above (URSIN.)

URSULA, SAINT, a virgin and martyr, supposed to have been a daughter of a British prince, and to have been put to death at Cologne at a date which varies from 384 to 463. There is a legend that 11,000 virgin martyrs suffered with her, which some have explained by supposing that she had a companion named *Undecimila*. It is pretty certain, however, that many were put to death at the same time. She is regarded as the patroness of the Sorbonne.

URSUS, NICHOLAS RAYMARUS, a Danish astronomer, and rival of Tycho Brahe, died 1600.

URVILLE. See DUMONT.

USHER, JAMES, D.D., was born at Dublin, 4th January, 1580. Early destined for the ministry, he was entered a student in the university of Dublin, where he acquired a brilliant reputation as a scholar in Latin, Greek, Hebrew, and divinity. In this latter department, his unquenchable thirst for knowledge had led him into a course of reading far more extensive than what is commonly pursued even by enthusiastic students of theology—for during his residence at the university, he had not only read the works of all the most celebrated of modern theological writers—but even most of the fathers; and more especially he had gained so complete a mastery of the popish controversy, that at the age of eighteen, he entered the lists with a learned Jesuit who had given a general challenge to the protestants. With a reputation for learning so high, his promotion in the church was rapid. Having in 1601 obtained orders in the episcopal church, he was appointed Sunday preacher before the government at Christ's church, Dublin. In 1607 he was chosen professor of divinity in the university and chancellor of the cathedral of St. Patrick. He now entered on a career of authorship; and the first work he undertook

being an historical dissertation on the government and discipline of the church, he made a tour through England with a view to prosecute some inquiries in the libraries of the two universities. His fame procured him a welcome reception in these venerable seats of learning. His treatise was published in London, 1610, and a copy of it having been presented by Archbishop Abbot to King James, that monarch, delighted with so powerful a defence of his favourite episcopacy, loaded the author with tokens of his royal approbation—raising him to the bishopric of Meath which was then vacant, and afterwards constituting him a privy councillor of Ireland. By the royal command, Usher went to reside some years in England to prosecute researches into the antiquity of the British churches, and during his residence there the archbishop of Armagh having died suddenly, he was elevated to the high position of primate of Ireland, in January, 1624. The results of his antiquarian researches were given to the world in 1632, when he published a rare collection of letters from ancient MSS., extending from the year 592 to 1180. Usher being a man of liberal sentiments as to church government, maintained a friendly correspondence with all the eminent men in the churches both of England and Scotland, and took a lively interest in the progress of the gospel throughout the world, by whatever church or instrumentality the truth was diffused. Being, in 1640, driven from his see by the rebellion, and stripped of all his property except his books, he sought an asylum in England. In 1648 he was summoned to the Isle of Wight, to aid the king in negotiating with the parliament respecting the introduction of a uniform system of episcopacy. He sketched out a middle scheme which obtained the warm approbation of his royal master as the best expedient to settle the differences. But the expectations of this good man were sadly disappointed. The Scottish people would not receive it, and the imprudent attempt to force it on their acceptance, gave rise to the religious wars of which Scotland was the theatre during the seventeenth century. Usher again came before the world in 1650 as an author by the publication of his celebrated 'Annals of the Old and New Testament.' Various other works issued from his industrious pen; and he was the author of the received chronology of the Bible. After a long and active life, distinguished by usefulness and adorned by works of piety, he died of 20th March, 1656. [R.J.]

USHER, JAMES, of the same family as the distinguished prelate (preceding article), born of catholic parents in 1720, and known as a philosophical writer against Locke, died 1772.

USSIEUX, L. D', a Fr. agriculturist, 1747-1805.

USTARIZ, GABRIEL, one of the leaders of the revolution in Spanish America, 1772-1814.

USTARIZ, JEROME, a Spanish economist, author of the 'Theory and Practice of Commerce and Navigation,' died about 1760.

USTERI, LEONARD, a Swiss professor and promoter of educational reform, 1741-1789.

USUARD, a French hagiographer, 9th century.

UTENHOVIUS, or UYTENOVE, CHARLES, a native of Ghent, who cultivated the sciences in their classic languages, and wrote in defence of the reformed religion in England, about 1586-1600.

UVA, BENEDETTO DELL', an Italian ecclesiastical writer of sacred poetry, 16th century.

UVEDALE, ROBERT, a classical scholar and satirist, born in London 1642. The date of his death is unknown, but he assisted Dryden in translating Plutarch's Lives. Another Uvedale translated the Memoirs of Philip de Comines.

UWINS, DAVID, a physician and professional writer, whose attention was particularly directed to mental diseases; he had the courage also to adopt the principles of homœopathy, in favour of which he wrote his last pamphlet, 1780-1837.

UXELLES, NICHOLAS DE BLE, Marquis D', Fr. commander in time of Louis XIV., 1652-1730.

V

VACA DE GUZMAN, JOSEPH MARIA, a Spanish poet, born in Grenada abt. 1745, d. 1805.

VACAORUS, an Italian civilian, who became professor of law at Oxford, 12th century.

VACCA, ALVAR NUNEZ CABEZA DE, a Spanish governor of Paraguay, transported to Africa for his varice and cruelty in 1539.

VACCA, F., an Italian sculptor, 16th century.

VACCA BERLINGHIERI, FRANCIS, a Spanish physician, 1732-1812. His son, ANDREW, a surgeon, died at Pisa in 1726.

VACCARO, A., a painter of Naples, 1598-1670.

VACCHIERI, C. A., a Ger. histor., 1745-1807.

VACHET, B., a French missionary, 1641-1720.

VADDER, L. DE, a Flem. painter, 1560-1623.

VADDERE, J. B., a Flem. historian, 1640-91.

VADE, JOHN JOSEPH, a French play-writer and humorous poet, 1720-1757.

VADIANUS, the Latinized name of JOACHIM WATT, a German *savant*, 1484-1551.

VADIER, M. W. ALEXIS, a Jacobin of the French revolution, who took part in most of the violent scenes of that period, and was the accuser of Catharine Theos and her party. The last scene in which he acted, was the conspiracy of Babeuf; born in Languedoc 1735; died in exile 1828.

VAGA, PIERINO DEL, whose real name was Buonaccorsi, an Italian painter, 1500-1547.

VAHL, MARTIN, an excellent botanist, was born at Bergen in Norway, in 1749 or 50. He died in 1804. Vahl commenced his studies in natural history under Ström at Copenhagen. After two years

he removed to Upsal, where he prosecuted his botanical studies under the great Linnæus, and became one of his most distinguished pupils. He found favour in the eyes of Mademoiselle Linné, but Linnæus, at that time in the zenith of his fame, did not consider a poor botanist a sufficient match for his daughter. In 1779 he became lecturer and demonstrator of botany in the garden at Copenhagen, and a few years afterwards filled the chairs of natural history and botany in the university of that town. He travelled under royal auspices and at the expense of his sovereign, through great portion of Europe and made an extensive collection of plants. Being provided with excellent introductions, he had free access to the libraries and museums of the various literati of the towns he visited. In London the rich herbarium of Sir Joseph Banks was open to him, and he had the privilege of examining the manuscripts of Banks's

UZ, JOHN PETER, a Ger. scholar and poet, who filled several magisterial offices at Anspach, in Franconia, of which place he was a native, 1720-1796.

UZBEK, a khan of a portion of the people now governed by the emperor of Russia, since called, after his name, Uzbeks, 1305-1342.

UZES, ALDEBERT D', so named from his birth-place, bishop of Nismes, and one of the council which condemned the Albigenes, died 1180.

UZZANO, NICOLÒ D', a Florentine statesman, attached to the aristocracy and the Guelph party, succeeded Albizzi as chief of the republic, 1417, died 1432. After his death his political supporters became exiles from their country.

friend Dr. Solander. He taught botany with much success at Copenhagen, and has left behind him several excellent works which have established his reputation as a first-rate botanist. A genus of plants was dedicated to him by his contemporary Thunberg, under the name of Vahlia. [W.B.]

VAILLANT, FRANCIS LE, son of the French consul at Paramibo, in Dutch Guiana, an eminent traveller and ornithologist, 1758-1824.

VAILLANT, G. H., a Latin poet, died 1678.

VAILLANT, JEAN FOI, one of the greatest of European medallists, time of Colbert, the minister of Louis XIV., by whom he was employed on several important scientific missions, born at Beauvais 1632, died 1706. His son, JEAN FRANCIS FOI, was a physician, and cultivated the same branch of sciences as his father, 1665-1708.

VAILLANT, SEBASTIAN, an able botanist, who became director and professor at the Jardin du Roi, in the reign of Louis XIV., 1669-1722. The principal work of Vaillant is his 'Botanicon Parisiense.' He is said to have taught the sexual system of plants.

VAILLANT, WALBRANT, a French painter and engraver, 1623-1677. He taught three of his brothers who followed the same profession—BERNARD, JAMES, and ANDREW, but the particular dates are unknown.

VAILLANT-DE-GUELLE, G., bishop of Orleans, a philologist and poet, died 1587.

VAISSETTE, J., a Fr. historian, 1685-1756.

VALADON, ZACHARIAH, a French Capuchin and missionary who laboured in Asia Minor, and signalized himself by his devotion to the suffering people during the plague at Marseilles, born about 1680, died 1746.

VALARESSO, C., an Italian poet, 1700-1769.

VALARSACES, a king of Armenia, descended from Mithridates the Great, 150-127 B.C.

VALART, J., a French *savant*, 1698-1781.

VALAZE, CHARLES ELEANORE DUFRICHE DE, one of the Girondin leaders of the French revolution, born at Alençon, 1751; died by his own hand at the bar of Fouquier Tinville, where his party were condemned to the guillotine, May 31, 1793.

VALCARCEL, JOSEPH ANTHONY, a Spanish writer on agriculture, flourished about 1720-1792.

VALCARCEL, PIO ANTONIO, Count De Lunares, a learned Spanish antiquarian, 1740-1800.

VALCKENAER, LOUIS CASPAR, professor of

Greek and archæology at Leyden, 1715-1785. His son, JAN, a statesman, 1759-1821.

VALDEMAR. See WALDEMAR.

VALDES, ANTHONY, a Spanish statesman, who in 1796 yielded his office to Emmanuel Godoi, about 1785-1811. CAYETANO, his nephew, a member of the Cortes 1822, executed 1826.

VALDES, F., a Spanish tactician, 16th century.

VALDES, VALDESSO, or VALDESIUS, JUAN, a Spanish controversialist and reformer, generally claimed by the Socinians, died 1540.

VALDES, L. DE, a Spanish painter, 1661-1724.

VALDEZ, J. M., a Spanish poet, died 1817.

VALDO, PETER, generally considered the founder of the *Vaudois* or *Waldenses*, a body of Christians who separated themselves from the Church of Rome in the twelfth century, was born at Vaux, in Dauphiny, on the banks of the Rhone. He acquired a large fortune by commercial pursuits at Lyons; and when he resolved to retire from business, not only devoted himself to the spiritual instruction of the poor, but distributed his goods among them, and in all respects treated them as his children or his brothers. The only version of the Bible in use at that time, was the Latin Vulgate, but Valdo, who was a learned as well as a benevolent man, translated the four Gospels into French, this being the first appearance of the Scriptures in any modern language. The possession of these books soon discovered to Valdo and his people that the church was never designed to be dependent on a priesthood, even for the administration of the sacraments; and his instruction, boldly followed by practice, became so obnoxious to the church, that he was first persecuted by the archbishop of Lyons, and at length anathematized by the pope. No longer safe at Lyons, Valdo and his friends took refuge in the mountains of Dauphiny and Piedmont; and there formed those communities which grew in peace, and flourished in rustic simplicity,—‘pure as a flower amid Alpine snows.’ From these mountain valleys the simple doctrine of Christianity flowed out in multiplied rivulets over all Europe; Provence, Languedoc, Flanders, Germany,—one after the other tasted of the refreshing waters, until in course of ages they swelled to a flood that swept over all lands. Valdo is understood to have travelled in Picardy, teaching his reformation: he finally settled in Bohemia, where he died in 1179; the same year in which his tenets were condemned by a general council. [E.R.]

VALDORY, C., a French ascetic, 17th century.

VALDRIGI, T., an Italian jurist, 1761-1834.

VALENCIENNES, PETER HENRY, a French landscape painter, 1750-1819.

VALENS, FLAVIUS, emperor of Constantinople, son of a noble of Pannonia, was born in 328, and associated in the Roman empire with his brother, Valentinian I., who abandoned the East to him, 364. He embraced Arianism, and in 376 allowed the Goths, whom he had previously subjugated, to settle in Thrace. This warlike people, however, were provoked to take arms again, and having defeated the troops of Valens, they burnt the emperor in his tent, 378.

VALENS, JULIUS, a usurper of the Roman empire, proclaimed in the reign of Decius, and killed a few days afterwards in 251.

VALENS, PUBLIUS VALERIUS, a nephew of the preceding, killed by his soldiers 261.

VALENTIA, G., a Spanish ascetic, 1551-1598.

VALENTIA, P. DE, a Span. jurist, 1554-1620.

VALENTIN, L. A., a Fr. surgeon, 1736-1823.

VALENTIN, M., a French painter, 1600-1632.

VALENTIN, M. B., a Ger. natur., 1637-1726.

VALENTINE, B., an alchemist, 16th century.

VALENTINIAN, three emperors of Rome:—

VALENTINIAN (FLAVIUS) I., elder brother of Valens, and son of Count Gratian, was born in Pannonia 321, and succeeded after the death of Jovian 364. He gave the Eastern empire to his brother, and having defeated the Alemanni and the Quadi, died in a fit of passion 375. VALENTINIA (FLAVIUS) II., son and successor of the preceding was proclaimed emperor by the troops, and his brother, Gratian, at once ceded Italy to him. The latter shortly after was vanquished by Maximus, and Valentinian would also have lost his throne but for the timely help of Theodosius, emperor of the East, who put Maximus to death, an left Valentinian master of the whole Western empire. He was strangled by order of his rebellious general, Arbogastes, 392. VALENTINIAN (PLACIDIUS) III., became emperor at the age of six in 425, under the regency of his mother, Placidia. He was assassinated in 455.

VALENTINIANUS, founder of the sect of Gnostics named *Valentinians*, was a native of Egypt and became publicly known as a teacher of strange doctrines in 140, when he went to Rome. He was excommunicated 143, and died after boldly devoting himself to the spread of his tenets in Syria, 160.

VALENTYN, F., a Dutch missionary, 17th cent.

VALERA, D., a Spanish historian, 15th cent.

VALERIA, a Roman empress, daughter of Diocletian, and wife of Galerius Maximus, exiled and killed after his death, 315.

VALERIAN, PUBLIUS LICINIUS, a Roman emperor, born about 190, was proclaimed after the death of Gallus 253. He was defeated in the East by Sapor, king of Persia, and supposed to have been flayed alive, 260.

VALERIANO BOLZANI, PIERO, in Latin *Valerianus*, a learned Italian, 1477-1558.

VALERIANUS. See VALERIAN.

VALERIUS, LUCAS, an Italian mathematician called the Archimedes of his age, died 1618.

VALERIUS FLACCUS, CAIUS, author of a Latin poem, entitled *Argonautics*, 1st century.

VALERIUS MAXIMUS, a Roman historian who was in Asia with Sextus Pompeius, A.D. 14 besides which nothing is known of him. His work contains many valuable anecdotes and examples of moral excellence, and was one of the earliest printed after the revival of letters.

VALERIUS PUBLICOLA, one of the founders of the Roman republic, 6th century B.C.

VALESIO, J. L., an Italian painter, 16th cent.

VALETTE, JEAN PARISOT DE LA, grand master of the order of St. John at Jerusalem, renowned for his defence of Malta in 1565, and founder of La Valette; died 1568.

VALETTE, SIMEON, whose proper name was FAGONS, a French mathematician, 1719-1801.

VALIERO, A., a Venetian *savant*, 1531-1606.

VALINCOUR, JEAN BAPTISTE DU TROUSSEAU DE, a miscellaneous French writer, 1653-1730.

VALLA, GIORGIO, an Italian professor of polite literature, known 1471-1486.

VALLA, J., a learned theologian, died 1790.

VALLA, LORENZO, a distinguished Latin scholar, and one of the revivers of literature in the 15th century, born at Rome 1406, died 1457.

VALLA, N., a French juriconsult, 16th cent.

VALLANCY, CHARLES, an English officer in a corps of engineers engaged in the survey of Ireland, author of a 'Grammar and Dictionary of the Irish Language,' 1721-1812.

VALLÉ, PIETRO DELLA, surnamed *Il Pellegrino*, a famous traveller in the East, au. of an account of his travels, written in Italian, 1586-1652.

VALLÉE, G., a French deist, hung 1574.

VALLÉE, J. LA, a French writer, 1747-1816.

VALLI, E., an Italian physician, 1762-1816.

VALLIER, F. C., a French poet, 1703-1778.

VALLIERE, JEAN FLORENT DE, a French officer of artillery time of Louis XIV., 1667-1739. is son, JOSEPH FLORENT, 1717-1776.

VALLIERE, LOUISE FRANÇOISE DE LA BAUME LA BLANC, Duchess De La, lady of honour to Henrietta of England, and mistress of Louis IV., was born in Touraine 1644. She had two surviving children by the king, Mademoiselle de la Motte and the count of Vermandois, the latter of whom was legitimated in 1667. She was abandoned for Madame de Montespan, and retired to the convent of Chaillot in 1671; died 1710. Her grand-nephew, LOUIS CÉSAR DE LA BAUME LA BLANC, Duc De La Vallière, was a celebrated bibliophile, flourished 1708-1780.

VALLISNERI, ANTONIO, an eminent Italian physician and naturalist, 1661-1780.

VALLOT, A., a French physician, 1594-1671.

VALLOTTI, F. ANTONIO, an Italian musician and chapel-master in Padua, 1697-1780.

VALMIKI, the most ancient and most celebrated of the epic poets of India, author of the *Ramayana*, translations of which were published in English and German at the beginning of the present century.

VALMONT DE BOMARE, JAMES CHRISTOPHER, a French naturalist, 1731-1807.

VALOIS, HENRY DE, in Latin *Valesius*, a learned philologist and critic, 1603-1676. ADRIAN, his brother, a philologist and historian, 1607-1692.

HARLES, son of the latter, an antiquarian writer and historian, 1671-1747.

VALOIS, L. LE, a French Jesuit, 1639-1700.

VALOIS, YVES, a French Jesuit, born 1694.

VALPERGA DE CALUSO, THOMAS DES, a mathematician, and Oriental scholar, 1737-1815.

VALPY, RICHARD, an eminent classical scholar and schoolmaster, born in Jersey 1754, died 1836.

EDWARD, his brother, a classical editor and minister of the Church of England, died 1832.

VALSALVA, ANTONIO MARIA, an Italian physician and anatomical discoverer, 1666-1723.

VAN ACHEN, or AKEN, HANS, a German painter, dist. for his sacred subjects, 1552-1615.

VANBRUGH, SIR JOHN, was the grandson of a protestant refugee from the Netherlands, and the son of a wealthy sugar baker. He was probably born in 1666. We know very little as to the history of his youth, or as to the training which enabled him not only to become one of the most celebrated among English architects, but, also, in

conjunction with Congreve, to prolong, in the beginning of the eighteenth century, the licentious cleverness that had characterized the comic drama in the reign of Charles II. He is said to have passed some years of his youth in France, and was afterwards, for a short time, an ensign in the army. His career as a dramatist belongs, like that of Wycherley, to a few of the earlier years of his manhood. Two or three of his six or seven plays deserve no record. The first of them, 'The Relapse,' appeared in 1697; and 'The Provoked Wife,' the best of the series, immediately afterwards. In 1706 his vigorous picture of rascality, called 'The Confederacy,' was brought out at the new theatre in the Haymarket, an unsuccessful speculation of Vanbrugh and Congreve. He left uncompleted, at his death, 'A Journey to London,' which was worked up by Colley Cibber into 'The Provoked Husband.' He had, previously to the opening of this theatre, become eminent as an architect, by designing the magnificent pile of Castle Howard; and Lord Carlisle, being then Deputy Earl Marshal, appointed Vanbrugh to be Clarendon's king-at-arms. The new herald's presumed ignorance of his science was indignantly complained of by his colleagues, and merrily jested at by himself. He was next chosen as the architect of Blenheim; and, in the execution of this charge, in the midst of annoyances which (though vexatious in themselves) were sometimes as comic as anything in his plays, he produced the noblest monument of his striking though heavy architectural style. He died in 1726, having been liked as a good-natured man, and having lived more decently than he wrote. [W.S.]

VANCE, G., an eminent surgeon, died 1837.

VANCEULEN, or VANKEULEN, LUDOLPH, a Dutch mathematician, who made a remarkable approximation to the true ratio which the circumference of a circle bears to its diameter, died at Leyden 1610.

VANCOUVER, GEORGE, the distinguished navigator, a pupil and successful imitator of Cook, entered the naval service in 1771, when only thirteen years old. He served as midshipman on Cook's second and third voyages, 1772-80. On his return home he was made lieutenant, and appointed to the Martin sloop; and was variously employed in the public service for eleven years. In 1791 he received a command for the prosecution of maritime discovery. He was made captain, and appointed to the ship *Discovery*, again fitted out for an expedition. A small armed vessel, the *Chatham*, 135 tons, Captain Broughton, sailed in company; and the two ships left Falmouth on the 1st April, 1791. The objects, as laid down in the instructions, were to receive from the Spaniards the surrender of the settlement at Nootka, to survey the N.W. coast of N. America northwards from lat. 30°, with a special view to water communications with the interior, which might facilitate the operations of the fur traders; to pass the winter in a survey of the Sandwich Islands; and, on the homeward voyage, to make a careful inspection of the western coast of South America. The first three objects were successfully accomplished; 9,000 miles of sea coast in North America were surveyed with scrupulous accuracy, after the manner of his great master, whose methods of preserving health also, he followed with

such success, that during his voyage of four years' duration, and through an arduous service, he lost but two men from both crews. The third object stated was but imperfectly attended to, owing to the lateness of the season, and the stormy character of the weather. On the outward voyage to the Sandwich Isles, however, Vancouver had carefully examined the south coast of Australia, and a part of the shores of New Zealand. During his stay also at the Sandwich Isles, the native chiefs held a convocation, at which, after a protracted and amicable discussion, it was resolved to place the islands under British protection. Four European nations were at this time known to them, and they were in a condition to judge which of the four was the most likely to be a disinterested and able protector. The result was no doubt owing to the respect and confidence which Vancouver inspired. The Discovery was safely brought into the Shannon on the 13th September, 1795. Her commander was now post-captain, the promotion having taken place the previous year. He was paid off on his return; and, henceforth, occupied himself in preparing an account of his voyage, with charts exhibiting his surveys. The labour, however, which he had bestowed on this great work had undermined his constitution, and brought about a premature end.—He died in May, 1798, before his work was finished; the printing had proceeded as far as the 408th page of the third vol., and the charts had all been completed some time before, under his own eye. The remaining part of the narrative was drawn up from his papers by his brother, JOHN. [J.B.]

VAN DALE, ANTHONY, a Dutch theologian and antiquarian, au. of 'De Oraculis,' 1638-1708.

VANDAMME, DOMINIQUE JOSEPH, count of Unebourg, one of Napoleon's generals who was attached to the division of Marshal Grouchy at the battle of Waterloo, and subsequently offered to defend Paris with the 80,000 troops he had kept together, 1771-1830.

VANDELLI, DOMENICO, an Italian physician and naturalist time of Linneus.

VANDERGOES. See GOES.

VANDERHELST. See HELST.

VANDERHEYDEN. See HEYDEN.

VANDERMONDE, one of the most famous of modern mathematicians, 1735-1796.

VANDERSKËTEN, FERDINAND, a Flemish economist and publicist, 1771-1823.

VANDERVELDE, CHARLES FRANCIS, the most cel. modern novelist of Germany, 1772-1824.

VANDERVELDE, VANDENVELDE, or VAN VELDE, WILLIAM, called 'the Old,' a Dutch painter, skilled in the delineation of marine subjects, 1610-1698. His son, of the same name, called 'the Young,' regarded as the most eminent of all the marine painters, 1633-1707. There were three others of the name:—ISAIAH, born at Leyden about 1591; JOHN, his brother, a painter and engraver, born about 1598; and ADRIAN, who was a celebrated landscape painter, 1639-1672.

VANDERVENNE, a Dutch painter, 1586-1650.

VANDERWERFF, ADRIAN, a Dutch portrait and historical painter, 1659-1722.

VANDI, A. J. D., a Germ. chemist, died 1763.

VAN DIEMEN. See DIEMEN.

VANDYCK, ANTONY, was born at Antwerp, March 22, 1599, and is the most distinguished of

all Rubens's numerous scholars. He lived with that great painter for four years, and by his advice visited Italy, in 1621, where he remained for five years, chiefly at Genoa, Venice, and Rome, and returned to Antwerp in 1626. A picture of the Crucifixion painted for the church of St. Michael at Ghent, raised his reputation at once to the highest rank, and he attained equal distinction as a portrait painter. Vandyck visited this country a second time, 1630-31, but without attaining the notice which he had expected: he accordingly returned to Antwerp; but Charles I. having seen by him, a portrait of Nicolas Lanier, his chapel-master, sent him an invitation to return to this country, and he was courteously received by the king, who lodged him at Blackfriars' and conferred the honour of knighthood upon him the following year, 1633, with the title of painter to his majesty and a fixed salary of £200 per annum for life. These advantages fixed Vandyck in this country and he justified the king's choice by a long succession of the most magnificent portraits that have yet been produced out of Italy; indeed, the portraits of Vandyck are by some preferred to those of Titian; they have not the pictorial force of those of the great Venetian, but they are more refined generally, and are distinguished for more careful drawing and a more elaborate finish; the men, Titian, and the women of Vandyck, are superior. Vandyck died in London, December 9, 1641, at the early age of forty-one. Yet, notwithstanding his comparatively short life, such was his extraordinary success that he accumulated a large fortune by that time, about £20,000 sterling, though he lived in great style, keeping besides his town establishment, a country house at Eltham; and he 'kept so good a table,' says Graham, 'that few princes were more visited or better served.' He was buried in the old church of St. Paul, near the tomb of John of Gaunt: his fortune was inherited by a daughter, his only child.—(Graham, *Essays towards an English School*; Walpole, *Anecdotes of Painting*, &c.; Carpenter, *Memoir of Sir Anton Vandyck*, &c., London, 1844.) [R.N.W.]

VAN-DYK, H. S., a miscellaneous writer and poet, born in London 1798, died 1828.

VANE, SIR HENRY, a republican and religious zealot of the period of the commonwealth, was the eldest son of the baronet of that name, and was born at Hadlow in Kent in 1612. He was among the earliest of those whose religious opinions induced them to seek a home in America, and having gone to New England, in 1635, was appointed governor of Massachusetts. Being far from popular among his fellow-colonists, he returned to England the year after, married here, and entered parliament: by the interest of his father also he was appointed joint treasurer of the navy with Sir William Russell. The measures in which he not took part were the condemnation of Strafford and Laud, followed, in 1643, by the 'Solemn League and Covenant' of which he was one of the chief promoters, as he also was of the 'Self-Denying Ordinance.' He stood aloof from the king's trial, but on the establishment of the commonwealth, became one of the council of state: in this position he remained till Cromwell's dissolution of parliament in 1653. Sir Henry Vane was, from the first, a steady opponent of the authority assumed by the

my, his hope being that the Saviour would appear and establish a fifth universal monarchy, or sign of a thousand years; he was most obnoxious to Cromwell, therefore, the staunchest representative and upholder of whatever authority could be exercised in the state by human agency. In several occasions these two men were brought to personal contact, and while Cromwell exhibited the greatest antipathy to the dreamy expectations, and the plausible temperament of one, the latter showed no deficiency of courage in braving his resentment. After the restoration was condemned for treason, and beheaded on Tower Hill, June 14, 1662. He wrote several works, chiefly religious, at least as he understood the matter, pointing to 'The Total and Irrecoverable Ruin of the Monarchies of this World.' [E.R.]

VAN-HELMONT. See **HELMONT.**

VAN-HOECK, J., a Flemish painter of history, 1600-1650. **ROBERT,** believed to be his relation, so a painter, born 1609.

VAN-HOOREBEKE, CHARLES JOSEPH, a Flemish botanist and pharmacopelist, 1790-1821.

VAN-HUGTENBERG. See **HUGTENBURGH.**

VANIERE, JAMES, a celebrated French Jesuit and Latin poet, 1664-1739.

VANINI, LUCILIO, a Neapolitan philosopher, died alive at Toulouse, 1585-1619.

VANLOO, JAMES, a Dutch historical and portrait painter, 1614-1617. **LOUIS,** his son, excelled design, died 1712. **JEAN BAPTISTE,** son of the latter, who became a fashionable portrait painter in England, 1684-1745. **CHARLES ANDREW,** called **CARLO,** brother of the preceding, a great historical and imaginative painter, the most popular artist of his time, 1705-1765. **LOUIS MICHAEL,** a painter and scholar of Jean Baptiste, first painter to the king of Spain, 1707-1771. His brother, **CHARLES AMADEUS,** famed at Berlin as a history and portrait painter, born 1718.

VAN-LOON, G., a Dutch numismatist, b. 1683.

VAN-MANDER, CHARLES, a Flemish painter and writer on antiquities, 1548-1605.

VAN-MILDERT, WILLIAM, bishop of Durham, and son of a Dutch merchant settled in London, and a distinguished theologian, 1765-1836.

VAN-NEVE, F., a Flemish painter, last cent.

VAN-NOORT, OLIVER, was a native of Utrecht. He is noted as the first Dutchman who circumnavigated the globe, 1598-1601. He went out by the Strait of Magellan and returned by the Cape. The voyage was not made memorable by any important discovery or other remarkable result. [J.B.]

VANNI, CARLOS, a Neapolitan apostate, who betrayed the liberal cause in 1775, and put an end to his existence at Sorrento, 1799.

VANNI, several Italian painters:—**FORNIO,** a native of Pisa, 14th century. **FRANCESCO,** skilled both as a painter and architect, 1565-1610. His nephew, **RAFFAELLE,** taught by Antonio Caracci, 1566-1655. **GIOVANNI BATTISTA,** best known as an engraver, 1599-1660.

VANNUCHI, ANDREA DEL SARTO, a very celebrated painter of Florence, 1488-1530.

VAN-OS, P. G., a Dutch painter, 1776-1839.

VAN-SCHOUTEN, or SCHOUTEN, WILLIAM BRUNELISAN, an able Dutch navigator, was a native of Hoorn in North Holland. He was sent

out in command of an expedition fitted up by some merchants of Amsterdam, who were suffering under the oppressive monopoly which the Dutch East India Company had obtained, in virtue of their exclusive right to trade to India by the Cape and the Strait of Magellan. The object was to find another passage; this Schouten successfully accomplished (February, 1616) by sailing to the south of Terra del Fuego. He named the extreme point of land after his native town; and a strait passed through, Le Maire, after the largest contributor to the expense of the undertaking. [J.B.]

VANSOMER, PAUL, a Flemish portrait painter, who acquired the highest distinction in England before the time of Vandeyck, 1576-1621.

VAN-SWIETEN, GERARD, a Dutch physician and commentator on Boerhaave, 1700-1772.

VANUDEN, L., a Flemish painter, 17th cent.

VAN-UTRECHT, ADRIAN, a Flemish painter, famous for flowers, fruit, shell-fish, &c., 1599-1651.

VAN-VEEN, or VENIUS, OTHO, a Dutch painter, distinguished for his graceful compositions and fine heads, 1556-1634.

VAN-VITELLI, GASPARD, a Dutch painter, 1647-1736. His son, **LUIGI,** an architect, 1700-73.

VARANDA, J., a French physician, 1620-58.

VARATANES, the Greek form of the name of Barham, king of Persia.

VARCHI, B., an Italian historian, 1502-1565.

VARENIUS, A., a Ger. theologian, 1620-1684.

VARENIUS, B., a Dutch geographer, 1610-80.

VARGAS, A. DE, a Span. painter, 1613-1674.

VARGAS, F., a Spanish juriconsult, 16th cent.

VARGAS, L. DE, a Span. painter, 1502-1568.

VARGAS Y PONCE, DON JOSE, a Spanish navigator and geographer, 1755-1821.

VARIGNON, P., a Fr. mathematic., 1654-1722.

VARILLAS, A., a French historian, 1624-96.

VARIN, J., a French botanist, 1740-1808.

VARIN, JAMES, a celebrated medal engraver, 1604-72. **JOSEPH,** of the same family, 1740-1808.

VARIN, T., a French historian, 1610-1668.

VARIUS, LUCIUS, a Roman dramatic writer and epic poet, who is highly spoken of by his friends, Virgil and Horace. Hardly a fragment of his writings is now extant.

VARLEY, J., an English artist, 1777-1842.

VAROLI, C., an Italian anatomist, 1543-1575.

VARON, C., a French writer, 1761-1796.

VARRO, M. T., consul of Rome, B.C. 216.

VARRO, MARCUS TERENTIUS, a Roman statesman, and one of the most learned men of his age, was born at Rome B.C. 116, and died about 27. His learning and his actual writings were encyclopædic in extent, but of all his labours there now only remains extant a portion of his *De Lingua Latinâ*, and his *De Re Rusticâ*, with some fragments of his Satires.

VARRO, PUBLIUS TERENTIUS ATACINUS, a Roman poet, and contemporary of the preceding.

VARTAN, an Armenian prince, killed in action against the Persians 451.

VARTAN, called *Vertabied*, the *learned*, an Armenian poet and historian of his country, 13th century. His 'Fables' were published by Saint Martin; his history remains in MS.

VARUS, consul of Rome, B.C. 12.

VASARI, GIORGIO, the celebrated author of the 'Lives of the Most Excellent Painters, Sculp-

tors, and Architects,' of Italy, from the earliest time down to the year 1568, the date of the second edition of his work, was born at Arezzo in 1512; he visited Florence in 1524, and there made the acquaintance of Michelangelo, Andrea del Sarto, and other great artists of the time. Vasari distinguished himself both as a painter and an architect, but his great and immortal service in the cause of art is his most elegant and comprehensive series of biographies above alluded to. This unparalleled biographical series, which Haydon ranked as the *third* book in the world, the Bible and Shakspeare holding the two higher places, can perhaps only be justly appreciated by the genuine lovers of their subject, and then only with diligent labour and study and considerable familiarity with the progress of modern art. It has gone through many editions in Italy, the first, or editio princeps, was published in Florence in 1550, in 2 vols. 8vo; the second, also by Vasari, in 1568, in 3 vols. 4to, with woodcut portraits, coarse but full of character, and doubtless of much individual truth. The following editions, and some other reprints, have appeared since Vasari's time:—one at Bologna, from 1647 to 1663; one at Rome in 1759, with notes by Bottari; another at Leghorn and Florence by Bottari, in 1767-72; another at Siena in 1791-94, by Della Valle, reprinted afterwards in the Milan edition of the Italian Classics; another at Florence, in 6 vols. 8vo, in 1822-23, a reprint of the second edition of Vasari, without any notes of the commentators, and even without an index. In 1832, the admirable German translation by Schorn and Förster was commenced, in 8 vols. 8vo, the last in 1849; and three good Italian editions have appeared within the last ten years or so; the last commenced in 1846, in 12mo, by a society of young enthusiasts in the cause, is beyond all praise, the researches of Rumohr, Schorn, Gaye, and other foreign critics have been taken the utmost advantage of, many documents have been consulted, and this great work is perhaps now as well illustrated as it is ever likely to be, except some very unexpected treasures among the old records of Italy should be discovered to throw new light upon this interesting subject. The editors are Carlo and Gaetano Milanesi, and Carlo Pini, of Siena. The best of Vasari's Lives are naturally the Florentines, and those who lived nearer to his own time. The notices of the earlier artists and those remote from Florence, have not escaped errors and misrepresentations, which are, however, now remedied in the various notes and comments with which the work is now enriched. But under any view the collection constitutes a remarkable series, not only for its prodigious store of facts, but also for its extreme beauty, grandeur, and fascination of style. An English translation has been lately added to Bohn's Standard Library. The following is the full title of the Italian edition recommended:—*Le Vite de' pin eccellenti Pittori, Scultori, e Architetti*. Di Giorgio Vasari: publicate per cura di una società di amatori delle arti belle. Flor., Felice Le Monnier, 1846-54, seqq. Vasari died at Florence in 1574, and was buried in Arezzo, his native place, and of which one of the greatest of its glories, of past or of future time, will ever remain the circumstance of its having given birth to Giorgio Vasari.

[R.N.W.]

VASCO DE GAMA. See GAMA.

VASI, J., an Italian designer, 1710-1782.

VASQUES, ALPHONSO, an Italian painter born of Spanish parentage, about 1575-1645.

VASQUEZ, G., a Spanish casnist, 1551-1604.

VASQUEZ DE CORONADO, FRANCESCO, Spanish navigator, time of Mendoza, 1540.

VASSELIN, G. V., a Fr. historian, 1767-1801.

VATABLUS, J., a French Hebraist, died 1541.

VATACES. See JOHN.

VATER, C., a German physician, 1651-1738.

ABRAHAM, his son, a great promoter of inoculation, author of several works, 1684-1751.

VATER, JOHN SEVERINUS, a distinguished German Orientalist and theologian, 1771-1826.

VATTEL, EMMERICH, a jurist and man of letters, was born near Neuchâtel, in 1714. He was originally educated for the church, but his studies turned to the direction of philosophy and literature, while he found employment in the petty diplomacy of the smaller central states. Thus he was appointed, in 1746, minister from Poland to the Republic of Berne. The occasional petty dabbling in diplomatic duties, accompanied by abundant leisure, which this office conferred, probably had considerable influence in the direction of his labours and the formation of his fame. Like the inhabitants of middle Europe, ambitions of literary fame in his age, he sought it in a study of French literature, and an imitation of French models. He wrote many works;—some on light literature such as 'Sur la Natur d'Amour'—others on metaphysics; but all alike forgotten. It was his fortune, however, to fill up a vacant space in the literature of jurisprudence, by systematizing and placing in lucid order the writings on international law, from Grotius downwards. His 'Dro de Gens'—'The Law of Nations, or Principles of the Law of Nature Applied to the Affairs of Nations and Sovereigns,' first published in 1758, has gone through many editions, been translated into several languages, and become a universal text-book. Vattel died on 28th December, 1767. [J.H.B.]

VATTIER, P., an Arabian scholar, 1623-1663.

VAUBAN, SEBASTIAN LEPRESTRE DE, the greatest military engineer and tactician of France, was born in Burgundy in 1633; and commenced his public career in the time of Mazarin. He took part in all the campaigns of Holland and Flanders, and was created marshal in 1703. He constructed or improved an immense number of fortresses, directed as many as fifty-three sieges, and was present at one hundred and forty battles. He wrote twelve folio volumes on Strategy. Died 1707.

VAUCEL, P. L. DU, a Jansenist, 1640-1715.

VAUGELAS, CLAUDE FAVRE DE, a member of the French Academy, and chief employé of the body on the famous Dictionary, 1585-1650.

VAUGHAN, HENRY, author of poems, chief devotion, born at Newton, in Brecknockshire, 1621, died 1695. THOMAS, his brother, author of some Rosicrucian works, written under the title Eugenius Philalethes, died 1666.

VAUGHAN, SIR J., a learned judge, 1608-77.

VAUGHAN, SIR J., a judge and privy councillor, contemporary with Lord Lyndhurst, Wild and Denman, 1772-1839.

VAUGHAN, W., a poet and transl., 1577-1641.

VAUQUELIN, NICHOLAS LOUIS, a French chemist, instructed by Fourcroy, 1763-1830.

VAUVENARGUES, LUC DE CLAPIERS, Marquis De, a moralist and elegant writer, author of 'Introduction to the Knowledge of the Human Spirit,' and 'Maxims,' 1715-1747.

VAUVILLIERS, JOHN FRANCIS, a French *savant*, 1698-1766. His son, of the same names, a learned Hellenist and statesman, 1737-1801.

VAUX, NICHOLAS, first lord, a brave officer and favourite of Henry VIII., descended from a French family, died 1530. His son, THOMAS, an admired poet, 1510-1522.

VAUX, NOEL JOURDAN, Count De, a marshal of France, dist. in the Flemish wars, 1705-1788.

VAVASSOR, or VAVASSEUR, FRANCIS, a French Jesuit, Latin poet, and philologist, 1605-81.

VECCHIETTA, LORENZO DE PIERO, an Italian sculptor, founder, and painter, 1482-1540.

VECCHIO DI SAN BERNARDO, F. MENZOCCHI, called Il, an Italian painter, 1510-1574.

VEDRIANI, L., an Italian historian, 1601-70.

VEEN, or VENIUS. See VAN-VEEN.

VEGA. See GARCIAS.

VEGA-CARPIO. See LOPE DE VEGA.

VEGA, G., a Germ. mathematician, 1754-1802.

VEGETIUS, FLAVIUS RENATUS, a Roman writer on the military art, 4th century.

VEGIO, MAFFEI, a Latin poet, 1406-1458.

VEIGA, EUSEBIUS DE, a Portuguese Jesuit and astronomer, born in Coimbra 1718, died 1798.

VEITH, L. F., a Germ. theologian, 1725-1796.

VELASCO, F. DE, a Span. general, died 1716.

VELASQUEZ, DIEGO, a Spanish general, who accompanied Columbus in his second voyage; was engaged in the conquest of St. Domingo, and founded the city of Havana in the island of Cuba. He sent out the expedition which discovered Yucatan and Mexico, and despatched Cortez to subdue the latter country; died 1523.

VELASQUEZ CARDENAS Y LEON, JOAQUIN, a Mexican astronomer, 1732-1786.

VELASQUEZ DE VELASCO, LUIS JOSE, a Spanish antiquarian, 1722-1772.

VELAZQUEZ, DON DIEGO RODRIGUEZ DE SILVA Y, was born at Seville in 1599; he first studied under Francisco Herrera, and afterwards with Pacheco, whose daughter he married. He visited Madrid in 1622, and in 1623 was appointed court painter to Philip IV. of Spain. He visited Italy in 1629, and again in 1648, to make purchases of works of art for the king. He died August 7, 1660. Velazquez has the reputation of being the greatest of Spanish painters; he is chiefly distinguished as a portrait painter, but he excelled also in history, landscape, and genre; like the majority of the Spanish painters, he belongs to the naturalist school, he painted life as he found it, with extraordinary force, facility, and skill. His greatest works are still at Madrid.—(Cean Bermudez, *Diccionario Historico de los mas Ilustres Profesores de las Bellas Artes in Espana*. See also the *Penny Cyclopædia*, and Stirling's *Annals of the Artists of Spain*.) [R.N.W.]

VELDE. See VANDERVELDE.

VELEZ DE GUEVARA, LUIS, a Spanish satirist and comic poet, died 1646.

VELEDA, a German prophetess, 1st century.

VELLEIUS. See PATERCULUS.

VELLEGUS, ANDREW SEVERIN, a Danish historian and councillor of state, 1542-1616.

VELLUTI, D., an Italian historian, 1813-1370.

VELLY, P. F., a French historian, 1709-1759.

VELSER, or WELSER, MARK, in Latin *Velserus*, a Ger. historian and philologist, 1568-1614.

VELTHEIM, AUG. FREDERIC, Count Von, a Germ. archæologist and mineralogist, 1741-1801.

VELTWYCK, G., a Dutch poet, died 1555.

VENANTIUS, a Christian poet, 6th century.

VENCE, H. F. DE, a Fr. ecclesiast., 1676-1749.

VENCESLAUS. See WENCESLAUS.

VENDOME, CÆSAR, Duc De, eldest son of Henry IV. and of his mistress, Gabrielle D'Estrees, a refugee in England in the time of Richelieu, and minister of state under Mazarin, 1594-1665. LOUIS, his eldest son, viceroy of Catalonia, married a niece of Mazarin, and after her death took orders and became a cardinal, 1612-1669. LOUIS JOSEPH, son of the latter, successively Duc de Penthievre and Duc de Vendome, a famous general in the wars of Louis XIV., honoured for his services by admission to the honours of a prince of the blood royal, 1654-1712. His brother, PHILIP, prior of Vendome, and the last of his house, 1655-1727.

VENEL, G. F., a French chemist, 1723-1775.

VENEL, J. A., a French physician, 1740-1791.

VENERONI, JOHN, the Italianized name of Vigneron, a French grammarian, 17th century.

VENETTE, J. DE, a Fr. chronicler, 1807-1869.

VENETTE, NICHOLAS, a French physician and physiologist, author of 'Tableau de l'Amour Conjugal,' and other works, 1632-1698.

VENEZIANO, ANTONIO, an Italian fresco painter, 1810-1884. DOMENICO, a painter in oils, 1420-1476. AGOSTINO, an engraver, 1490-1540.

VENERIO, three doges of Venice:—ANTONIO, reigned 1382-1400. FRANCESCO, succeeded Marc Antonio Trevisani 1554, died 1556. SEBASTIANO, commander of the fleet at the battle of Lepanto, elected doge and died same year, 1571.

VENERIO, DOMENICO, a distinguished Italian poet, 1517-1582. FRANCESCO, his brother, a philosophical writer, died 1581. LORENZO, a third brother, known as a poet, died about 1550. MAFFEO and LUIGI, sons of the latter, dates unknown.

VENINI, FRANCESCO, a Milanese ecclesiastic, mathematician, and poet, 1787-1820.

VENINO, J., an Italian Jesuit, 1711-1778.

VENIUS. See VAN-VEEN.

VENN, HENRY, a minister of the Church of England, son of a divine named Richard Venn, author of several religious works, 1725-1796. JOHN, his son, author of Sermons, 1759-1813.

VENNE. See VANDERVENNE.

VENNER, T., an English physician, 1577-1650.

VENNING, R., a nonconfor. divine, 1620-1673.

VENTENAT, STEPHEN PETER, a distinguished French botanist, member of the institute, and author of several useful works, 1757-1808.

VENTIMIGLIA, GIUSEPPE, a Sicilian prince and supporter of the constitution, 1761-1814.

VENTURE DE PARADIS, JEAN MICHEL, a French Orientalist and diplomatic agent, 1742-99.

VENTURI, GIAMBATISTA, an Italian physician, statesman, and literary *savant*, 1746-1822.

VENTURI, P., an Italian Jesuit, 1693-1752.

VENTURINI, J. G. JULIUS, a German officer and writer on tactics, 1772-1802.

VENUSTI, M., an Italian painter, 1515-1576.
 VENUITI, R., an Ital. antiquarian, 1705-1763.
 VERBIEST, FERDINAND, a Flemish Jesuit, astronomer, and Chinese missionary, 1630-1688.
 VERCI, J. B. M., an Italian historian, 1739-95.
 VERE, EDWARD, earl of Oxford, a poet and statesman of the age of Elizabeth, born about 1540, died 1604. He sat on the trial of Mary Queen of Scots, in virtue of his office of lord high chamberlain, and many traits of character, little to his honour, are recorded of him.

VERE, SIR FRANCIS, one of the most gallant of the commanders who distinguished themselves in the reign of Elizabeth, was born in 1554. He was the companion-in-arms of Prince Maurice in the Dutch war of independence, and defended Ostend with only 1,700 men against a Spanish army of 12,000. Died 1608.

VERE, SIR HORACE, baron of Tilbury, younger brother and companion-in-arms of the preceding, shared in the glory of his principal actions in the Dutch war. His great achievement was an able retreat with 4,000 men before the great general, Spinola, who commanded 12,000. Died 1635.

VERELIUS, OLAF, one of the most distinguished antiquaries of Sweden, 1618-1682.

VERELST, S., a Flemish painter, died 1710.

VERGARA, CÆSAR ANTONIO, a Neapolitan ecclesiastic and numismatist, born 1680.

VERGARA, J. DE, a Spanish painter, 1726-99.

VERGARA, N. DE, called '*the Old*,' a Spanish painter of history, painter on glass, and sculptor, 1510-1574. His son, NICHOLAS, called '*the Young*,' a sculptor and architect, 1540-1606.

VERGENNES, CHARLES GRAVIER, Count De, a French diplomatist and statesman, 1717-87.

VERGERIO, PIERO PAOLO, professor of dialectic at Padua, and one of the restorers of literature, 1349-1419. Another member of the family, bearing the same names, was at first a vigorous opponent of the reformation, but became a convert to protestantism, and died in Wirtemberg 1565.

VERGIER, J., a French poet, 1657-1720.

VERGNIAUD, P. V., one of the most eloquent leaders of the Girondin party in the French revolution, was born at Limoges in 1759, and was practising as an advocate at Bourdeaux, when elected to the Legislative Assembly, 1791. He was one of the twenty-two Girondists condemned by the Jacobins of the revolutionary tribunal, and executed October 31, 1793.

VERHEYDEN, F. P., a Dutch painter and sculptor, born at the Hague 1657, died 1711.

VERHEYEN, P., a Dut. anatomist, 1648-1710.

VERHOEK, P., a painter and poet, 1633-1702.

VERMEIREN, AUGUSTIN, a Flemish Carmelite, author of Fables in verse, 1656-1703.

VERMEULEN, CORNELIUS, a famous designer and engraver of portraits, 1644-1702.

VERMEYN, J. C., a Dutch painter, died 1559.

VERNES, JACOB, a pastor of Geneva, known as an adversary of Rousseau, 1728-1790.

VERNET, CLAUDE JOSEPH, a French painter, in great esteem for his landscapes and marine subjects, more particularly the latter, in which he excelled, 1714-1789. A. C. HORACE, called *Carle*, his son and pupil, famous for his battle-pieces, 1758-1836. HORACE VERNET, the celebrated painter, is son of the latter, and was born 1789.

VERNET, J., a Genevese theologian, 1698-1789.

VERNEUIL, CATHERINE HENRIETTE DE BALZAC D'ENTRAIGUES, Marquise De, a mistress of Henry IV., who acquired so much influence over him as to obtain a written promise of marriage, which it required all the firmness of Richelieu to annul: she conspired against the king after his marriage with Mary de Medici, 1583-1633.

VERNIER, P., a Span. mathematic., 1580-1637.

VERNIER, THEODORE, a politician of the revolutionary period, afterwards a peer of France, 1731-1818.

VERNIQUET, E., a Fr. architect, 1727-1804.

VERNON, EDWARD, an English admiral, born in Westminster 1684. His father was secretary of state to William and Mary, and having given his son a classical education, was disappointed by his adoption of a seaman's career. He first served under Admiral Hopson, and was in the action at Vigo, in October, 1702. His name became historical, however, in 1739, by the expedition to Portobello, the command of which was given to him, with the rank of vice-admiral of the blue. In 1741 he made an unsuccessful attempt upon Carthage, in conjunction with General Wentworth, the graphic details of which may be read in Smollett's *Roderick Random*. Died 1757.

VERNON, ROBERT, the munificent founder of the Gallery of British Art, named after him, and now in the national collection, was born in 1774, and acquired his vast fortune by trading in horses. He was a liberal patron of the fine arts in his lifetime, and his bequest to the nation is said to have cost him £150,000. Died 1849.

VERNON, T., a learned lawyer, died 1726.

VERNY, C. F., a French poet, 1753-1811.

VERON, F., a French Jesuit, 1575-1649.

VERON, P. A., a French astronomer, 1736-70.

VERONESE, PAUL. See CAGLIARI.

VERRIO, A., a Neapolitan painter, 1639-1707.

VERROCHIO, ANDREA DEL, a Florentine painter, sculptor, goldsmith, and architect, 1422-1488.

VERSCHAFFELT, CHEVALIER P., called *Pietro Fiammingo*, a Flemish sculptor and architect, 1710-1793.

VERSCHURING, HENRY, a Dutch painter of landscapes and cavalry actions, 1627-1690.

VERT, C. DE, a French liturgist, 1645-1709.

VERTEGAN, RICHARD, an ingenious antiquarian of Roman Catholic principles, born in London of Dutch parents, and settled at Antwerp; author of '*Restitution of Decayed Intelligence concerning the most noble and renowned English Nation*,' published 1605; died about 1635.

VERTOT D'AUBŒUF, RENE AUBERT, Abbé De, a French Capuchin, author of works on the Revolutions of Rome, Sweden, and Portugal, and a History of the Order of Malta, 1655-1735.

VERTUE, GEORGE, an eminent English engraver and antiquarian, born in London 1684, died 1756. His engraved works, consisting of portraits and historic prints, are very numerous, and in high repute for their accuracy. In the course of his antiquarian tours he took many sketches of churches, ruins, and other monuments; his literary remains consist of historic notices of artists, and anecdotes of painting.

VERUS, ÆLIUS, grandson of Cæcilius Commodus, adopted son of Adrian, and consul of Rome,

died 138. LUCIUS VERUS, his son, joint emperor with Marcus Aurelius, whose daughter he married, flourished 130-169.

VERZOSA, J., a Spanish writer, 1523-1574.

VESALIUS, ANDREAS, the greatest anatomist of his age, and the father of modern human anatomy, was born at Brussels, either in April, 1513, or December, 1514, for the year of his birth is uncertain. He was descended from a family remarkable for the number of eminent medical men it had produced, and his father was attached in a medical capacity to the household of the archduke Charles, afterwards the emperor, Charles V. He devoted himself at an early period of life to human anatomy and dissection, studying under the most eminent masters of the day, and between the years 1535 and 1537 he served as a physician and surgeon with the troops in the Low Countries. In 1544 he was appointed chief physician to the emperor Charles V., and on his abdication in 1555 he was nominated to the same office by his son, Philip II. His opposition to the Galenic doctrines, his habit of dissecting human bodies, then considered impious, and the great reputation he enjoyed at the Spanish court, raised him many enemies; and a rumour that he had opened the body of a young Spanish nobleman whose heart showed symptoms of vitality, having got abroad, he was publicly accused of murder. The charge was taken up by the clergy and the medical faculty, to whom he was obnoxious, and also by the relations of the deceased; and though he enjoyed the protection of the king, he was obliged to flee from the persecution by which he was assailed, and to travel into Palestine by way of expiation of his alleged guilt. When this voyage was undertaken is not exactly known, but in 1563 the senate of Venice invited him to return and fill the chair of anatomy at Padua, then vacant by the death of Fallopius; and having embarked for that purpose, he was shipwrecked on the island of Zante (the ancient Zacynthus), where he perished miserably of cold and hunger, on the 15th of October, 1564, and his body having been recognized by a goldsmith of Venice, it was honourably interred in the church of St. Mary's, in that island. He was the author of numerous works, but that by which he is best known is entitled, *De Humana Corporis Fabrica*. [J.M.C.]

VESLING, JOHN, a German anatomist, and writer on the botany of the East, 1598-1649.

VESPASIAN, whose full name in Latin was TITUS FLAVIUS VESPASIANUS, emperor of Rome, was born of an obscure family in the territory of the ancient Sabines, in the year 9. He rose to distinction in the Roman army, during the reigns of Caligula and Nero; and was conducting the war in Judæa when he was proclaimed emperor by his soldiers, after the brief reigns of Galba, Otho, and Vitellius, 69. He then left the prosecution of the war to his son Titus; and reaching Rome about the middle of the year 70, entered upon his high functions without opposition. The expectations that had been raised by his ability, his virtues, and his indefatigable application to business, were not disappointed; but it is commonly believed, and the report is adopted by Gibbon, that he disgraced himself by a sordid parsimony. This is so incompatible with the generous qualities also attributed to him, that the explanation must

be sought in circumstances, not sufficiently considered,—such as the dissatisfaction likely enough felt by the Prætorian guard, and by others who may have expected a more liberal distribution of the public money. The reign of Vespasian was marked by the pacification of Gaul, which had been disturbed by the revolt of Claudius Civilis, and by Agricola's conquest of Great Britain: the destruction of Jerusalem also took place, as mentioned under the name of Titus. Died in the seventieth year of his age, 79. [E.R.]

VESPUCCI. See AMERIGO.

VESTRIS, a family of dancers and theatrical performers:—GAETANO APOLINE BALTHAZAR, distinguished at the Parisian opera, 1729-1808. ANNA FREDERIKA, his wife, 1752-1808. M. AUGUSTUS, a natural son of Gaetano, 1760-1838. MARIE ROSE GOURGAND DUGAZON, a sister-in-law of Gaetano, distinguished by her performance in tragic parts, 1746-1804.

VETTER, L. R., a Ger. pathologist, 1765-1806.

VETTORI, F., an Italian antiquary, 1708-1778.

VETTORI, F., an Italian physician, 1485-1528.

VETTORI, PIETRO, in Latin *Victorius*, a great promoter of literature in Italy, 1499-1585.

VETTORI, V., an Italian poet, 1697-1763.

VEZZOZI, ANTONIO FRANCESCO, a learned Italian theatine and biographer, 1705-1785.

VIANE, F. VAN, a theologian, 1619-1693.

VIANI, A. M., an Italian painter, 16th century.

VIANI, G., an Italian numismatist, 1762-1816.

VIANI, GIUSEPPE, a painter of Bologna, 1636-1700. DOMENICHO, his son and pupil, 1668-1711.

VICARS, JOHN, a presbyterian zealot of the commonwealth, author of several quaint works of a religious character, 1582-1652.

VICARY, T., an English anatomist, 16th cent.

VICENTE, G., a Portuguese poet, 1480-1557.

VICENTE, J., a Castilian painter, last century.

VICHMANN, B., a Rus. historian, 1786-1822.

VICI, A., an Italian architect, 1744-1817.

VICIANA, M., a Spanish historian, 16th cent.

VICO, ÆNEAS, an Italian antiquarian, engraver, and numismatist; died about 1560.

VICO, F., a Spanish historian, 17th century.

VICO, GIOVANNI BATTISTA, the first to propose a philosophical method of considering human history, was born at Naples in 1668, and became professor of rhetoric in the university of that city. His life was passed in comparative obscurity in studying the works of the ancients, and in bringing his vast acquirements in jurisprudence and criticism to bear on the problem of human destiny. The principal labour of his life is his work entitled 'Principi di una Scienza Nuova,' first published in 1725, and which is, in fact, a philosophy of history, recognizing the action of Providence, and the divine intention continually working out in social events; in this view he has been followed by Schlegel, but with much less spirituality. What Vico would demonstrate is the analogy of one age and nation with another, as regards the succession of events, and these proceeding in a certain historic cycle, which he divides into three ages—the divine, the heroic, and the human: he becomes, therefore, the interpreter of the mythical remains of antiquity, such as the Homeric poems, and displays, in his way, the reason of national manners and forms of government. The 'Universal His-

tory' of Bossuet, and the 'City of God' by Saint Augustin, were the 'only previous works that could be named in series with this of Vico; since his time—besides Schlegel—Kant, Herder, Lessing, and Condorcet, have each developed their own particular systems; to Vico, however, belongs the honour of opening out this new path through the fields of philosophy. The highest recognition he received was his appointment as historiographer to the king of Naples in 1735. In 1743 he fell into a state of insensibility which lasted fourteen months, in all which time he knew neither his friends nor children: he died thus in January, 1744. [E.R.]

VICQ D'AZYR, FELIX, a French physician, famous as a naturalist and physiologist, author of valuable works, 1748-1794.

VICTOR, several popes of Rome:—VICTOR I., bishop and saint, succeeded 185, and was martyred, according to some accounts, 197; he was succeeded by Zephyrinus. VICTOR II., the friend and relation of the emperor, Henry III., reigned 1055-1057. VICTOR III., succeeded Gregory VII., and died after a few months' pontificate, 1086-1087. VICTOR IV., an antipope, elected after Adrian IV. 1159, and supported by the emperor in opposition to Alexander III.; died 1164.

VICTOR AMADEUS I., duke of Savoy, was born 1587, son of Charles Emanuel I., and crowned 1630. He married the sister of Louis XIII., and in his latter years commanded the forces of that sovereign in his Italian wars, d. 1637.

VICTOR AMADEUS II., duke of Savoy, and first king of Sardinia, was born in 1665, and succeeded his father in the duchy 1675. He married Maria of Orleans, niece of Louis XIV., but entered, nevertheless, on a tortuous policy, which involved him in a war with that monarch. Having acquired Sicily, he exchanged that kingdom in 1717 for Sardinia, by treaty with the emperor. He died two years after his abdicating in favour of his son, 1732.

VICTOR AMADEUS III., son and successor of Charles Emanuel III., was born in 1726, and ascended the throne in 1773. He founded the Academy of Sciences at Turin, and exhibited the utmost anxiety for the welfare of his subjects. His hostility to the revolution in France, provoked a contest with that country in which his throne fell by the arms of Buonaparte, 1796.

VICTOR EMMANUEL, king of Sardinia, son of the preceding, Victor Amadeus III., born 1759, succeeded his brother, Charles Emmanuel IV., 1802, abdicated during a revolt 1821, died 1824.

VICTORINUS, MARCUS AURELIUS, one of the thirty tyrants who assumed the Roman purple in the time of Gallienus, killed by his troops 268.

VICTORINUS OF FELTRE, a celebrated Italian philanthropist and charitable founder, 1379-1447.

VICTORIUS. See VETTORI.

VIDA, MARCO GIROLAMO, an Italian prelate and distinguished Latin poet, about 1490-1566.

VIDAL, B., a Provençal physician, 1741-1805.

VIDAL, D., a Spanish painter, born 1670.

VIDAL, JAMES, called *the Old*, a Spanish historical painter, 1583-1615. His nephew, J. VIDAL DE LIENZO, called *the Young*, 1602-1648.

VIDAL, P., a Provençal troubadour, died 1200.

VIEIL, PIERRE LE, a French painter on glass

and writer on the art, 1708-1772. WILLIAM, of the same family and profession, 1675-1731.

VIEILH DE BOISJOLIN, CLAUDE AUGUSTIN, a French biographical writer, 1788-1832.

VIEIRA, SEBASTIAN, a Portuguese Jesuit and missionary to Japan, 1570-1634.

VIEIRA, or VIEYRA, A., a Portuguese Jesuit and missionary to Brazil, 1608-1697.

VIEL, C. F., a French architect, 1745-1819.

VIEL, CHARLES MARIA DE, a converted Jew of Lorraine, and commentator on the Gospels, died a baptist about 1700. His brother, LEWIS, entered the communion of the Church of England, and wrote on subjects of Jewish learning.

VIEL, STEPHEN BERNARD, a French priest, transl. of Telemachus into Latin verse, 1756-1821.

VIETA, FRANCIS, in Latin *Vièteus*, a French mathematician and algebraist, 1540-1603.

VIEUSSENS, RAYMOND, an eminent French physician and anatomist, born in 1641, and died at an advanced age, between the years 1715 and 1720, though in what precise year is not known. His life was spent chiefly at Montpellier, and he is known in medical history principally by a work on the nervous system, entitled, *Neurographia Universalis*, published in 1685. [J.M.C.]

VIGAND, or WIGAND, JOHN, a German theologian and botanist, 1523-1587.

VIGANO, S., an Italian dancer, 1769-1821.

VIGEE, LOUIS GILES BERNARD, a French poet who bears the reputation of having basely sung the praises of every successive government from the time of the republic, 1755-1820.

VIGENERE, BLAISE DE, a French alchemist, and secretary of embassy to Rome, 1523-1592.

VIGER, F., a French Hellenist, died 1647.

VIGILIUS, an African bishop, 5th century.

VIGILIUS, a pope of Rome, elected by the intrigues of Theodora, wife of Justinian, 537; died, after many reverses, arising out of his opposition to Justinian and the empress, 555.

VIGILIUS, a Dutch juriconsult and governor of Holland and Gueldres, died 1577.

VIGNE, ANDRE DE LA, a French poet and historian, secretary to Anne of Brittany, 15th cent.

VIGNIER, NICHOLAS, a distinguished historical writer, physician, and historiographer to Henry III., king of France, 1530-1596. His son, of the same name, an ascetic and controversial writer, converted from protestantism to the Catholic Church; dates unknown. JEROME, a son of the latter, a priest of the oratory, known as a poet and historian, 1606-1661.

VIGNOLA, the common appellation of GIACOMO BAROZZIO, a celebrated architect of Vignola, successor of Michelangelo in the works of St. Peter's, and au. of a Treatise on the 'Five Orders,' 1507-73.

VIGNOLES, STEPHEN, better known under the name of LAHIRE, one of the most celebrated French commanders of the reign of Charles VII., distinguished in all the wars of his time with the English, and above all at Jargeau and the battle of Patay in 1418, died 1442.

VIGNOLI, J., an Ital. archaeologist, 1680-1753.

VIGORS, N. A., an Irish zoologist, 1787-1840.

VIGUIER, P. F., a Fr. Orientalist, 1745-1821.

VILLA, A. T., an Italian poet, 1720-1794.

VILLADOMAT, ANTONIO, a Spanish painter, born at Barcelona 1678, died 1755.

VILLALPANDA, JOHN BAPTIST, a Spanish Jesuit and Scripture commentator, 1552-1608.

VILLALPANDE, FRANCESCO TORREBIANCA DE, a Spanish writer on demonology, 16th century.

VILLALPANDE, GASPARD CARDILLOS DE, a Spanish scholar and controversialist, died 1570.

VILLALPANDE, J. DE, chief of a Spanish sect analogous to the quietists, 16th century.

VILLANI, GIOVANNI, an Italian historian, died 1348. MATTEO, his brother, author of a continuation of his history, died 1363. FILIPPO, son of the latter, author of a further continuation, and of the first modern work on literary history; known as a lecturer on Dante in 1404.

VILLANI, N., a Latin poet, died 1640.

VILLARET, C., a French historian, 1717-1766.

VILLARET DE JOYEUSE, L. T., a French admiral, distinguished in the last war, 1750-1812.

VILLARS, DOMINIQUE, a French physician, au. of a Natural History of Dauphny, 1745-1814.

VILLARS, MONTFAUCON DE, a French abbé, nephew of the celebrated father Montfaucon, and author of a prohibited book entitled 'Comte de Gabalis,' from which Pope derived the machinery for his Rape of the Lock; born about 1640, murdered on the highway 1675.

VILLARS, PIERRE DE, a French prelate, negotiator, and ascetic writer, 1517-1592. His nephew, of the same names and dignity, an ecclesiastical writer, 1543-1613.

VILLARS, PIERRE, Marquis De, a French general and diplomatist, died 1678. His wife, MARIE GIGAULT DE BELLEFONDS, friend of Maria Louisa, wife of Charles II. of Spain, author of 'Letters,' containing curious details of the Spanish court, 1772. LOUIS HECTOR, son of the preceding, duke of Villars, and a famous marshal of France, opposed in arms to the duke of Marlborough, especially at the battle of Malplaquet, 1653-1734. His son, HONORE ARMAND, duke of Villars and Prince De Martiniques, was remarkable for nothing but his famous parentage and the protection he offered to Voltaire, 1702-1770.

VILLAUT DE BELLEFOND, a French traveller on the coast of Guinea, 1666.

VILLAVICIOSA, JOSE DE, a Spanish inquisitor and burlesque poet, 1589-1658.

VILLEBRUNE, J. B. LEFEBVRE DE, a French Orientalist, philologist, and Hellenist, 1732-1809.

VILLEDIEU, MARIE HORTENSE DESJARDINS, Dame De, a novelist and poetess, 1632-1683.

VILLEFORE, J. F. BOURGOIN DE, an ecclesiastical and biographical writer, 1652-1737.

VILLEFROY, WM. DE, a learned Orientalist, founder of the Capuchin Hebraists, 1690-1777.

VILLEGAS, E. M. DE, a Sp. poet, 1595-1669.

VILLEGAS MARMOLEJO, P. DE, a Spanish painter of sacred subjects, 1520-1577.

VILLEGOMBLAIN, F. RACINE, Seigneur De, a Fr. statesman and historian of events during the reigns of Charles IX., Henry III., and Henry IV.

VILLEHARDOUIN, GEOFFRAI DE, an ancient French historian, and commander in the fourth crusade, which resulted in the capture of Constantinople, 1198.

VILLEMOT, P., a Fr. astronomer, 1651-1713.

VILLENEUVE, HURON DE, a French poet, contemporary with Philip Augustus.

VILLENEUVE, PIERRE CH. JEAN BAPTIST

SILVESTRE, a French admiral who commanded at the battle of Aboukir in 1799, and at the battle of Trafalgar in 1805. On the latter occasion he was taken prisoner, but being soon after restored to liberty he returned to France, and was ordered by Napoleon to remain at Rennes. In the despondency created by this circumstance, he committed suicide by piercing himself through the heart.

VILLENEUVE, WILLIAM DE, a chevalier of Provence, historian of the conquest of Naples, whither he accompanied Charles VIII.

VILLENEUVE BARGEMONT, CHRISTOPHER, Count De, a Provençal statistician and man of letters, 1771-1829.

VILLENFAGNE D'INGIHOUL, HILARION NOEL, historian of Spa and Liège, 1753-1826.

VILLERMAULES, M., a Swiss missionary and writer on the state of China, 1667-1757.

VILLEROI, NICHOLAS DE NEUFVILLE, Seigneur De, a French statesman and diplomatist from the time of Charles IX. to Louis XIII., a partizan of Guise and the Spanish alliance, author of *Memoirs*, 1542-1617. His son, CHARLES, marquis of Villeroi, negotiated the marriage of Henry IV. and Mary de Medicis, died 1642. NICHOLAS, son of Charles, governor of Louis XIV. and marshal of France, 1597-1685. The most conspicuous of the family was F. DE NEUFVILLE, Duc De Villeroi, son of the latter, who was educated with Louis XIV., and took a leading part in his wars from 1693 to 1706. In 1715 he was appointed governor of Louis XV.; died 1730.

VILLERS, C. F. DOMINIQUE DE, a French writer and philosopher, who became professor at Gottingen after the emigration of 1792, and wrote an 'Essay upon the Reformation,' composed under the influence of Madame de Stael and Benjamin Constant, 1767-1815.

VILLETTE, F., a French optician, 1621-1698.

VILLIERS, GEORGE. See BUCKINGHAM.

VILLIERS, J. F. DE, a Fr. physician, 1727-94.

VILLOISON, J. B. D'ANSE DE, an eminent Greek scholar and critic, author of several works and of manuscripts relating to Greek history, now in the Bibliothèque du Roi at Paris, 1750-1805.

VILLON, F., a French poet, 1431-1490.

VILLOTTE, JAMES, a French Jesuit and missionary to Persia and Turkey, 1656-1743.

VINCE, SAMUEL, a native of Suffolk, author of several valuable works in mathematics and astronomy. He was born of poor parents, but being sent to college by the munificence of Mr. Tilney, became professor of astronomy and experimental philosophy at Cambridge, and held several livings in the Church of England. In 1786 he was elected a fellow of the Royal Society, and his principal works appeared between that period and 1809. Died 1821.

VINCENT, a Bohemian chronicler, who was a canon and archivist at Prague, 12th century.

VINCENT OF BEAUVAIS, a learned Dominican, who composed an immense Résumé, or Encyclopædia, of the learning of the 13th century, by order of Louis IX.; died about 1264.

VINCENT, F. A., a French painter, 1746-1816.

VINCENT, F. N., a French republican, born at Paris 1767, executed with Hebert 1794.

VINCENT, ISABEAU, an enthusiast of the reformed religion, born in Dauphny 1670.

VINCENT OF LERINS, an ascetic writer and monk of that place, died about 450.

VINCENT OF PAUL. See PAUL.

VINCENT, SAINT. See FERRIER.

VINCENT, THOMAS, a nonconformist minister, remarkable for his courageous devotion to the afflicted during the great plague of London, author of 'God's Terrible Voice in the City by Plague and Fire,' an 'Explanation of the Assembly's Catechism,' and 'Fire and Brimstone,' born at Hertford 1634, died 1671. NATHANIEL, his brother, a religious writer and preacher, died 1697.

VINCENT, WILLIAM, rector of Allhallows, in London, author of several works interesting to classical scholars, 1739-1815.

VINCI, LEONARDO DA, was born at Vinci in the valley of the Arno below Florence, in 1452; he became the pupil of Andrea Verocchio. In 1483 he entered the service of Lodovico il Moro, duke of Milan, with a salary of 500 scudi per annum, equal to about a thousand pounds sterling at the present time. In 1485 he established an academy of the arts at Milan, and about ten years later, executed his celebrated picture of the 'Last Supper,' in oil colours, on the wall of the Refectory, in the convent of the *Madonna delle Grazie* in that city; there is a copy of this remarkable work, by Marco D'Oggione, now in the Royal Academy, London. Leonardo left Milan in 1499 and returned to Florence, and there commenced his great composition of the 'Battle of the Standard' for the Council Hall, in the Palazzo Vecchio. Michelangelo being commissioned by the Gonfaloniere Soderini to execute a second design for the opposite end, this was the celebrated 'Cartoon of Pisa,' exhibited in 1506, but neither work was ever executed in the hall, owing to political disturbances. In 1514 Leonardo visited Rome, but left again shortly afterwards without executing any works there, owing partly to a misunderstanding with Michelangelo, and to the pope's want of proper appreciation of his capabilities; he entered the service of Francis I., with a salary of 700 crowns per annum, and accompanied that king to France in 1516, but he was now old, and he died in France at Cloux, near Amboise, May 2, 1519, without executing any work for the French king. Leonardo da Vinci has the most remarkable reputation of any of the illustrious artists of Italy. He was a man of universal ability in science and art; he excelled in painting, sculpture, architecture, engineering and mechanics generally; in botany, anatomy, mathematics, and astronomy; and he was also a poet, and an admirable extempore performer on the lyre. Mr. Hallam in his *Introduction to the Literature of Europe*, has the following remarkable eulogium on him:—'If any doubt could be harboured, not only as to the right of Leonardo da Vinci to stand as the first name of the fifteenth century, which is beyond all doubt, but as to his originality in so many discoveries, which probably no one man, especially in such circumstances, has ever made, it must be on an hypothesis not very untenable, that some parts of physical science had already attained a height which mere books do not record.'—Unpublished MSS. by Leonardo contain discoveries and anticipations of discoveries, says Mr. Hallam, 'within the compass of a few pages, so as to strike us with something like the

awe of preternatural knowledge.' The principal of his published treatises is the *Trattato della Pittura*, of which there are several editions in several languages.—(Lomazzo, *Trattato della Pittura, Scultura ed Architettura*, Milan, 1584. Rome, 1844. Vasari, *Vite*, &c.; Amoretti, *Memorie Storiche su la Vita, &c.*, Di Leonardo da Vince, Milan, 1804. See also the *Penny Cyclopædia*.) [R.N.W.]

VINCI, LEONARDO, a Neapolitan musical composer of the 18th century.

VINCIGUERRA, MARCO ANTONIO, an Italian poet and secretary of Venice, 15th century.

VINDING, ERASMUS, a learned Danish philologist and juriconsult, 1615-1684.

VINER, CHARLES, a writer on law, and munificent benefactor of Oxford, 1680-1756.

VINES, R., a presbyterian divine, died 1655.

VINET, ELIE, a French philologist, antiquarian, and learned editor, died 1587.

VINKEBOON, or VINCKENBOOMS, DAVID, a painter of Malines, 1578-1606.

VINNEN, ARNOLD, in Latin *Vinnius*, a Dutch juriconsult, regarded as the best commentator on the Imperial Institutes, 1588-1657.

VIOLE, D. G., a Benedictine of St. Maur, an ecclesiastical writer and historian, 1598-1669.

VIONNET, G., a Latin poet, 1712-1754.

VIOTTI, GIOVANNI BATTISTA, an Italian violinist and musical composer, 1755-1824.

VIRET, PETER, a Swiss theologian, and one of the principal reformers, 1511-1571.

VIREY, C. E., a French poet, 1566-1636.

[Virgil—From an Ancient Gem.]

VIRGIL (PUBLIUS VIRGILIUS MARO) was born at Andes, a small village near Mantua, on the 15th of October, B.C. 70. He was thus five years older than Horace, and seven years older than the emperor Augustus. An old tradition has identified Andes with the modern village of *Pietola*, and may perhaps be accepted as true. Virgil's father was proprietor of a small estate which he cultivated; and the future poet, after passing his boyhood there in the seclusion of his father's villa, was sent to school at Cremona, where he assumed the manly gown on his sixteenth birthday (B.C. 55). He next proceeded to Mediolanum (Milan) for education of a higher order, thence to Naples, where he studied Greek under Parthenius, a native of Bithynia, and afterwards visited Rome. In the capital he was instructed in the tenets of the Epicurean philosophy by Syroon, a philosopher of that sect, and is said to

have had, as his fellow-pupil, Varus, to whom he afterwards inscribed his sixth Eclogue. He devoted himself to study with intense application, and thus laid the foundation of that varied learning, for which he was scarcely less remarkable than for poetical genius. It is uncertain how long he may have been absent from home, and merely a conjecture that, after completing his studies, or prosecuting them so long as his feeble health would permit, he returned to his paternal farm, and there wrote some of the small pieces which are attributed to him. But his peaceful seclusion was disturbed by an unexpected event, which is believed to be alluded to in his first Eclogue. Octavianus, (Augustus) on his return to Italy after the battle of Philippi (B.C. 42), assigned to a portion of his veterans the lands in the neighbourhood of Mantua, thereby depriving Virgil of his patrimony, which, however, was afterwards restored to him, by the intercession of powerful friends. Soon after this occurrence Virgil again visited Rome, was introduced to Augustus, and to his minister, Mæcenæ, the munificent patron of genius, and continued during the remainder of his life to enjoy their friendship and patronage. In B.C. 19, he visited Greece, intending to make a tour of that country, and to revise and perfect his *Æneid*; but having met the emperor at Athens on his return from the East, and finding his feeble health fast declining, he resolved to accompany him to Italy. He succeeded in reaching the shores of his native country, and died soon after his arrival at Brundisium on the 22d of September, B.C. 19, before completing his fifty-first year. In compliance with his wish, his body was conveyed to Naples, and there buried at the distance of two miles from the city. The works of Virgil consist of, 1. *Bucolica*, or Eclogues, pastoral poems, amounting to ten; 2. *Georgica* (Georgics), an agricultural poem in four books; and 3. *Æneis* (the *Æneid*), a national epic poem, in twelve books, besides some minor poems which are ascribed to him. The Eclogues are doubtless his earliest productions, and must, therefore, be estimated chiefly as indications of the future efforts of the poet. In the Georgics the powers of the poet are more matured; freshness and vigour are given to a subject possessing but little of the poetical element; and the rude and rough hexameter of Lucretius is advanced to a degree of perfection which cannot be surpassed. The object of the *Æneid* is to give an account of the fortunes of *Æneas* from the period of his leaving Troy till his settlement in Italy, as indicative of the future greatness of Rome, and, therefore, abounds in allusions to subsequent events in Roman history. In point of artistic skill the *Æneid* is inferior to the Georgics; and the defect is easily accounted for by the circumstance that the poem did not receive the finishing revision of the poet, and was therefore ordered by him, in his last illness, to be burnt. It was, however, preserved, and published by his friends Varius and Tucca. Virgil's character as an epic poet has been often assailed, and as often defended—our limits prevent us from entering upon the question. It may be sufficient to say that, till the appearance of the *Paradise Lost*, he held the second place in this the highest department of poetry; and though he has since descended to the third, he is inferior still only to Homer and Milton. [G.F.]

VIRGIL POLYDORÉ. See POLYDORUS.

VIRGILLE-LABASTIDE, C. DE, a French economist and mechanician, 1682-1755.

VIRGINIA, a young girl of Rome, killed by her father Virginius, as the means of saving her from the dishonour threatened by the decemvir Appius Claudius, B.C. 449. The story relates that this tragedy led to the abolition of the decemvirate, equivalent to a change in the constitution of Rome: the facts are not well authenticated.

VIRGINIUS-ROMANUS, a comic poet of Rome, age of Augustus, 1st century B.C. None of his works are now in existence.

VIRGINIUS RUFUS, LUCIUS, a Roman general and governor, time of Nero.

VIRIATHUS, leader of a revolt in Lusitania, defeated by Fabius Æmilianus, after a five years' struggle, B.C. 144, assassinated B.C. 140.

VISCANIO, SEBASTIAN, a Spanish explorer of the coasts of New California, 1602.

VISCHER, CORNELIUS, a designer and engraver of Haarlem, about 1610-1660. His brother, JOHN, an engraver, born 1636.

VISCHER, PETER, a German sculptor and founder, taught in Italy, died 1530. His son, HERMANN, killed by an accident 1540.

VISCONTI, a noble Milanese family, who headed for a long time the party of Ghibellines. The principal are—OTHO, archbishop of Milan, and vanquisher of the Della Torre party, 1208-1295. His nephew, MATTEO, called 'the Great,' perpetual lord of Milan and imperial vicar in Italy, 1250-1323. GALEAZZO, his successor, who compromised himself with the Guelphs after a long struggle against them, and was thrown into prison by the emperor, Louis V., 1277-1328. AZZO, son and successor of the preceding, declared against Louis, and was named vicar of the church by the pope, John XXII. He greatly increased his territories, and died 1339. LUCHINO, son of Matteo the Great, and successor of his nephew, AZZO, poisoned by his wife 1349. GIOTTANNI, brother of the latter and archbishop of Milan, was associated in the temporal government of Luchino, and increased his own importance at the expense of the papacy, died 1354. MATTEO II., grandson of Matteo the Great, by his fifth son, Stefano, had a share in the sovereignty 1355, and was disposed of by poison. GALEAZZO II., one of the amiable brothers of the latter, died 1358. BARNABO, another of the brothers and associates, was poisoned by his nephew, Giovanni Galeazzo, in 1385. In this long interval of power he had shown himself a cruel and debauched prince, but he laid the foundation of the university of Pisa, and managed to steer his course through difficult times. GALEAZZO, the first of this name with the title *duke of Milan*, having treasonably acquired the state in 1385, endeavoured to make himself king of Italy: he greatly increased the territory and the number of cities under his government; died 1402. GIOVANNI MARIA, eldest son and successor of the latter, being put to some trouble by the regency of his mother, made an attempt to poison her; his subjects soon after revolted, and he was assassinated by a natural son of Barnabo 1412. PAOLO MARIA, brother of Giovanni, secured his authority by marrying the widow of the latter, and sometime after had her beheaded. He increased his

dominions by robbing the Swiss, and many valiant names in Italian history were engaged in his wars; died 1447. The natural daughter of the last named having married a Sforza, gave rise to a new dynasty in Milan.

VISCONTI, GASPARD, of the same family as the preceding, a courtier and poet, 1461-1499.

VISCONTI, GIOVANNI BATISTA, a learned antiquarian, successor of Winckelmann as commissary of antiquities at Rome, and keeper of the pontifical museum, 1722-1784. His eldest son, **ENNIUS QUIRINUS**, far exceeded him in ability and learning as an archaeologist, and his works are regarded as high authorities. The principal of them is a 'Description of the Pio-Clementine Museum,' and Greek and Roman Iconographies, compiled by desire of Napoleon. Born at Rome 1751, died 1818.

VISCONTI, J., a liturgist, died 1633.

VISDELOW, C., a French Jesuit and Chinese missionary, au. of a 'Hist. of Tartary,' 1656-1737.

VISDOMINI, E., an Italian poet, 1550-1622.

WISE, JOSEPH DONNEAU DE, a French historian, dramatist and dramatic writer, 1640-1710.

VISETTI, J., an Italian poet, 1736-1813.

VISSEHER, REMER, a Dutch poet, founder of a reunion of literary men, who contributed to restore the Dutch language, 1547-1620. **ANNE**, his eldest daughter, called the Dutch Sappho, skilled in poetry, music, and painting, 1584-1652.

MARIE, her sister, also a dist. poetess, 1594-1649.

VITA, J. DE, an Italian archaeologist, 1708-74.

VITALIANUS, a pope of Rome, 657-672.

VITALIS. See **ORDERIC**.

VITELLIO, or VITELLO, a Polish mathematician, the first European in modern times to write anything valuable on optics, about 1254.

VITELLIUS, AULUS, a Roman general, proclaimed emperor in Germany at the time Vespasian was engaged in war with the Jews, A.D. 69. About the time he arrived in Rome, Vespasian was proclaimed at Alexandria, and, on the latter arriving in Italy at the head of his hostile army, Vitellius was put to death.

VITELLIUS, ERASMUS, a Polish prelate and negotiator at the diet of Augsburg, 1470-1521.

VITIGES, successor of Theodatus as king of the Ostrogoths in Italy 526, taken captive by Belisarius 540, died at Constantinople 543.

VITRINGA, CAMPEGIUS, a learned protestant divine and Hebraist, professor at Franeker, 1659-1722. His son, **HORACE**, a Hebrew critic, died in youth, 1680-1696. **CAMPEGIUS**, his second son, a professor and theologian, 1693-1723.

VITRUVIUS POLLIO, MARCUS, a Roman architect, the author of a well-known treatise on architecture in ten books, *De Architecturâ*. The *editio princeps* of this work was published at Rome about 1480, without date or name of printer, by George Herolt, in folio, and under the superintendence of Sulpitius: there have been many editions since, in the original Latin and in the principal European languages; in English, by W. Newton, in 1771-91, with plates, folio, London; by W. Wilkins, R.A., in 1812; 'The Civil Architecture of Vitruvius,' in two parts, 4to, being a translation of the 3rd, 4th, 5th, and 6th books only, and those not entire; and by Joseph Gwilt, London, 1826, in royal 8vo. Neither the time nor place of Vitru-

vius' birth are known, but as he dedicated his book to the emperor Augustus, when he was already old, he is supposed to have been born about 80 B.C. This treatise is a very important work as explaining the knowledge of the ancients on the matters treated. Vitruvius mentions the several ancient writers to whom he was chiefly indebted, all of whose works are lost. See a summary account of this treatise in the *Penny Cyclopædia*. [R.N.W.]

VITRY, EDWARD DE, a French Jesuit, disting. as a numismatist and philologist, 1670-1730.

VITRY, J. DE, a French historian, died 1244.

VIVARES, F., a French engraver, 1709-1780.

VIVENS, CHEVALIER FRANCIS DE, a French physician and economist, 1697-1780.

VIVES, JOHN LOUIS, i.e. Latin *Ladovicus Vives*, a classical scholar, and one of the revivers of literature in Spain; born at Valencia 1492, died at Brussels, where he had settled as a teacher of the *Belles Lettres*, 1541. Vives was one of the teachers of the Princess Mary Tudor, and was obliged to leave England for writing against the divorce of Catharine.

VIVIAN, RICHARD HUSSEY, Lord, eldest son of John Vivian, Esq., of Cornwall, and distinguished as an officer in the late war, was born in 1775. He entered the army in 1793, and commenced active service on the coast of France under Lord Moira. His first distinctive achievement was in the desperate affair at Corunna, when he covered the retreat of Sir John Moore. At Waterloo he commanded the sixth brigade of cavalry. After the peace he took an active part in politics, was appointed master-general of the ordnance in 1835, and created a peer 1841. Died 1842.

VIVIANI, VINCENIO, an Italian mathematician, taught by Galileo, and honoured by the grand duke of Tuscany with the office of chief engineer. We owe to him the restoration of the lost treatises of Aristæus and Apollonius of Perga; born at Florence 1622, died 1703.

VIVIEN, J., a French painter, 1647-1734.

VIZZANI, ÆNEAS, in Latin *Viginus*, a physician of Bologna, 1543-1602. **POMPEIO**, an historian of that city, died 1607. **CARLO EMANUEL**, a philologist and classical commentator, 1617-61.

VLADIMIR, four Russian princes:—**VLADIMIR**, called *the Great*, became master of the dominions of his father after assassinating his brother, Jaropolk, in 980, and commenced the civilization of Russia, and the foundation of the Christian religion; died 1005. **VLADIMIR** (the second, though not called by that title), eldest son of Yaroslav, grand duke of Kiev, became duke of Novogorod in 1038, conducted an expedition against Constantinople 1041, died 1052. **VLADIMIR II.**, his great-grandson, commenced to reign 1113, and was distinguished for his humanity and wise administration; he sustained a war with the Bulgarians, the Livonians, and the emperor Alexis Comnenus, and was the first of the grand dukes who took the title of Czar, and assumed the characters of imperial dignity; died 1125. **VLADIMIR ANDREIOVITZ**, nephew of Ivan II., is remarkable for his renunciation of the power offered to him, in favour of his cousin, Demetrius, with the view of promoting the establishment of a regular order in the succession. This occurred in 1364, and Vladimir

afterwards distinguished himself in arms against the Tartars. Died 1410.

VLADISLAS. See ULADISLAUS.

VLAMING, P., a Dutch poet, 1686-1733.

VLASTA, a Bohemian amazon, who maintained a struggle for eight years in the endeavour to establish a state ruled by women, killed 743.

VLEIEGER, S., a Dutch painter, 17th century.

VLIERDEN, LAMBERT DE, a Flemish jurisconsult and Latin poet, 1564-1640.

VLIET, WILLIAM VAN, a Dutch historical and portrait painter, 1584-1642.

VLIET, or VLITIUS, J. VAN, a Dutch jurisconsult, philologist, and poet, died 1666.

VOEL, J., a French Jesuit, 1541-1610.

VOET, GISBERT, in Latin *Voetius*, professor of divinity and Oriental languages at Utrecht; born at Hensden 1593, died 1680. He wrote against the Arminians, and against the Cartesian philosophy, with much ill-feeling and personal bitterness. His son, PAUL, was professor of law at Utrecht, and wrote several periodical works, 1619-1667. DANIEL, another of his sons, was professor of philosophy, and wrote on physiological and other subjects, 1629-1660. JOHN, son of Paul, became a professor of law at Leyden, and is au. of a valuable 'Commentary on the Pandects,' 1647-1714.

VOGEL, C., a German composer, 1756-1788.

VOGEL, J. W., a Ger. mineralogist, 1657-1723.

VOGEL, RODOLPH, a German physician and chemist, compiler of a 'Medical Library,' published between 1751 and 1771.

VOGLER, J. P., a Germ. botanist, 1746-1802.

VOGLI, J. H., an Ital. biographer, 1697-1762.

VOIGT, G., a German theologian, 1644-1682.

VOIGT, J., a Germ. bibliographer, 1695-1765.

VOIGT, J. C., a German physician, 1725-1810.

VOIS, A. DE, a Dutch painter, born 1641.

VOIS, R. DE, a French ecclesiastic, 1665-1728.

VOISENON, CLAUDE HENRY FUSEE, Abbé DE, a dramatic writer and wit, whose life presents a singular mixture of alternate devotion and licentiousness, born at the Château de Voisenon, near Melun, 1708, died 1775. The best of his romances is entitled 'L'Histoire de la Felicite;' some of his comedies were very successful.

VOISIN, J. DE, a rabbinical writer, 1620-1685.

VOISIN, or VOYSIN, D. F., chancellor of France during the Orleans regency, 1654-1717.

VOITURE, VINCENT, a poet and man of letters, advanced by Mazarin, 1598-1648.

VOLANUS, A., a Polish protestant, celebrated for his controversy with the Jesuits, 1530-1610.

VOLCKAMMER, J. C., a physician and botanist of Nuremberg, last century.

VOLCKAMMER, J. G., a physician and botanist of Nuremberg, 1616-1693.

VOLCKMANN, J. J., a native of Hamburg, known as a translator, 1732-1803.

VOLKOV, FEDOR GRIGORIEVITCH, a great Russian dramatist and actor, 1729-1763.

VOLKYR, NICHOLAS, secretary to the duke of Lorraine, and historian of Alsace, 16th century.

VOLLENHOVE, J., a Dutch poet and protestant theologian, 17th century.

VOLNEY, CONSTANTINE CHASSENEUF, Comte DE, enjoyed in the early part of this century a brilliant reputation, which, however, did not rest on such a basis either of deep learning or of solid

thought, as to secure its permanence. His most famous work, the 'Ruines, ou Méditations sur les Révolutions des Empires' (1791), is a piece of showy and even eloquent writing; but it has no real force as an exposition of the unsound and dangerous principles which it inculcates. Soon after it there appeared 'La Loi Naturelle,' a system of ethics founded on the basis of materialism. Before the publication of these works, he had done better service by his spirited and observant 'Voyage en Syrie et en Égypte;' and afterwards he was a valuable labourer in the field of Ancient Chronology. His speculations on the Oriental Tongues led to much controversy, but seem to be now held quite destitute of worth.—Volney was born in Anjou in 1757, and inherited after a time property enough to let him indulge in travelling and miscellaneous studies. He took part in the Revolutionary struggles, attaching himself to the party of the Gironde; and after the fall of Robespierre he was for some time a professor in the Ecole Normale. At first he was a favourite of Napoleon, who proposed to make him second consul; but by and by he shared in the contempt with which the emperor treated all independent thinkers. He voted in the senate for Napoleon's deposition, and was created a peer at the Restoration. He died in 1820. [W.S.]

VOLPATO, GIOVANNI, an Italian engraver and writer on the principles of design, was born at Bassano 1733, died 1802. Volpato was instructed by Bartolozzi, and was employed to make engravings from the paintings of Raphael at the Vatican. A monument by Canova has been erected to him.

VOLPATO, J. B., an Italian painter, 1633-1706.

VOLPI, GIOVANNI ANTONIO, a famous Italian scholar and Latin poet, 1686-1766. His brother, GAETANO, an editor and bibliographer, born 1689. A third brother, GIAMBATTISTA, a distinguished anatomist, taught by Morgagni, died 1757.

VOLPINI, GIAMBATTISTA, an Italian physician and disciple of Van Helmont, died 1714.

VOLTA, ALEXANDER, born at Como, Milan, 14th February, 1745; died 5th March, 1827, at Como. Educated in the public school of his native place under the eye of his father, Volta at an early age directed his attention to the phenomena of electricity. About 1775 he published an account of his electrophorus, which in the smallest size forms a source of the electric fluid, a remarkable instrument at that period in the history of electricity. In 1776 and 1777 he noticed the production of carburetted hydrogen in stagnant pools. Although probably unknown to him, Franklin had described the same fact in 1774. He showed in 1780 that the burning of some of Pietra mala is due to this gas. In 1777 he first used eudiometers to fire gases in close vessels, and invented about the same time the electric gun and pistol, and the permanent hydrogen lamp. In 1779 he became professor of physics at Pavia. In the beginning of the year 1800, Volta constructed the Voltaic pile, the most wonderful apparatus perhaps ever invented by man, since of the unparalleled truths developed by the agency of this simple invention, we have only yet seen the dawn. After this period he was made a senator of Lombardy by Napoleon, who likewise bestowed other favours upon him. But he made no figure

as a political orator, falling short in this respect even of Newton, who, during his parliamentary career, is said to have spoken only once in the House of Commons, and the solitary oration was to direct the door-keeper to shut one of the windows, through which a draught of air was projected upon the member addressing the House. Voltaire, however, never uttered a word. In 1819, he retired from his professorship to his native town, and spent the evening of his days, beloved and honoured by his fellow-citizens. [R.D.T.]

VOLTAIRE, the name capriciously assumed by FRANÇOIS MARIE AROUET, was made by him more celebrated than any other word that we read in the literary history of the eighteenth century. There was hardly any department of literature to which Voltaire did not make contributions; and, to say nothing of many efforts trifling or unsuccessful, the variety of his genius is attested by the number and diversity of the departments in which he attained celebrity. He gave to the French language some of its finest tragedies, and its only epic that is worthy of the name; a few of its liveliest novels, and many of the wittiest and most highly finished of its satirical and other light poems; several of its most spirited and judicious histories; and a large number of its most acute critical essays; and, above all, he poured out an enormous series of writings, which, though their claim to the title of philosophical may justly be questioned, passed in their time for the exposition of a true and great philosophy, and exercised on public opinion throughout Europe a tremendous and practical influence. He was a consummate master in the art of representation, owing his effectiveness much less to his great clearness and consecutiveness of thought, than to the remarkable skill and liveliness with which he puts his ideas into words: his poetical diction is very refined and terse; and his prose style is unsurpassed for its apt perspicuity, its easy and varied grace, and its brilliant turns and strokes of wit. Against this large sum of merit, there has to be set off a heavy account of literary faults, caused chiefly by a lamentable predominance of moral evil. Voltaire was a bad-hearted man: he neither loved nor revered any object except himself and his own glory; his vanity generated an insatiable malignity, and a settled unbelief in all that is true and holy; and, while his serious poetry thus became cold, his other works exhibit unrestrained indulgence in a sneering irony, which, taken along with their prevalent purpose, may be held as not unjustly imaged in Goethe's Mephistophiles. The dangerous political tendency attributed to Voltaire's writings was little more than indirect: the immediate objects of his attack were much seldomer kings than priests. He was, in fact, a bigot, a bigotted and intolerant deist. The atheism professed by some of his fellow-Encyclopedists, was regarded by him with a dislike as scornful as that with which he looked on Christianity; and if the design which he avowed, of destroying the Christian religion, occupied him almost exclusively, this was only because that faith was nominally or really prevalent, and because among its ministers were many of the enemies on whom he panted to be revenged. Trained in his youth amidst the unbelief and profligacy which pervaded the aristocratic society of Paris in the era of the Regency, he taught literature

to mock at truths which he saw mocked at in real life; and he thus became the direct agent in propagating, but the indirect and unwitting instrument in finally overthrowing, the system of opinions and conduct which disgraced that evil time.—Voltaire was the son of François Arouet, an officer in the finance department of the government, and was born at a village near Paris, in 1694. He distinguished himself in boyhood, at the Jesuit College of Louis-le-Grand, by his aptitude for learning, his malignant wit, and his inclination to scoff at religion. His godfather, a fashionable and literary abbé, introduced him at an early age into courtly circles, where he speedily learned the hollowness of everything around him, and acquired and exhibited his characteristic skill both in artful compliment and in biting repartee. He was next placed in the chambers of a lawyer, but speedily deserted them.—Indecent satirical verses having been circulated on the death of Louis XIV., the notoriety of the young Arouet caused him to be suspected (wrongfully for once) of being the author. He was confined for a year in the Bastille, where he finished his tragedy 'Œdipe,' and sketched his epic 'L'Henriade.' He was now allowed by his father to take his own way. His tragedy, proving successful, was followed by others which failed; the 'Henriade,' stolen in manuscript, as he alleged, was printed, with satirical verses which he said were interpolations. The publication, thus called surreptitious, made him famous; and the same farce was repeated so often in his literary career, that, in this case as in the rest, the whole was plainly a device of the author himself. He now experienced, much as Dryden did afterwards, the danger of associating with aristocratic rakes. A man of quality, affronting the young poet in society, was put to silence by an apt retort; he took his revenge by making his valets give the upstart a beating; Voltaire learned to fence, challenged his insulter, and was answered by an imprisonment of six months. On his release he was banished from the kingdom.—He chose to pass his exile in England, where he lived for three years (1726-1729). His French apologists say that he was here confirmed in his infidelity by his intimacy with Bolingbroke and others. No confirmation or additional instruction was needed. Hardly more reason is there for the assertion that he made himself profoundly acquainted with the English language and literature. He did learn very much of both; but he never learned anything profoundly. He became sufficiently acquainted with Shakespeare's works to ridicule them and steal from them; and he acquired English enough to write a ludicrously blundering letter, which is preserved by the biographers of Pope. In England, at all events, he learned how to publish works by subscription, and perhaps also how to conduct commercial speculations. By the English profits of an edition of the 'Henriade,' he laid the foundation of a fortune, which he afterwards increased enormously by lottery tickets, gambling in the corn trade, and lending money at usurious interest. Thus, though he soon affected to be above receiving any price for his literary works, he was a rich man for many years of his life, and a very rich one at its close.—For several years after he was allowed to return to France, Voltaire shifted his residence often, having sometimes real occasion to dread the govern-

ment. Now, besides the 'Lettres Philosophiques,' (sketched in England, and very obnoxious,) appeared his 'Histoire de Charles XII.,' and several tragedies, among which were 'Adelaide du Guesclin,' and 'Zaire' (1732), his dramatic masterpiece. In 1738 Voltaire and Madam du Chastelet, a married woman of a mathematical turn, agreed to live together, and retired to the Villa of Cirey, on the borders of Champagne and Lorraine. There they lived, studied, and quarrelled, till 1749, when the lady, who had more lovers than one, died in childhood. Her example, and Voltaire's boundless presumption, made him mistake himself so much as to publish the 'Elémens de la Philosophie de Newton.' In this retreat were composed, besides other tragedies, the two fine ones 'Mahomet' and 'Merope,' as also the 'Siècle de Louis XIV.,' and, in part at least, the 'Essai sur les Mœurs et l'Esprit des Nations.' The retirement was interrupted by visits to Paris, by several other journeys, and by a secret mission to Frederic II. of Prussia, whom Voltaire had already visited.—In 1750, on the invitation of this eccentric king, Voltaire settled at Berlin. He remained there for three years, during which he enlightened the royal circle by his wit, corrected the bad French of the royal philosopher and poet, and learned to demonstration, not only that courts are wearisome places, but that Frederic of Prussia and François Aronnet were too like each other to be really friends. This period was not prolific in new compositions.—Nor did much that was important come from his pen during the next few years, which he spent at various places in France, living for a time also in Germany, to collect materials for the 'Annales de l'Empire,' which is described as being the only one of all his works that wearies the reader.—In 1758, when he was in his sixty-fourth year, he purchased two small estates, lying not far from Geneva, though within the French frontier; and at his chateau of Ferney, in one of these, he passed the last twenty-two years of his life. Ferney was, during that time, what Abbotsford became, more worthily, in our own day, the muster-place of all the celebrities of Europe, whom the master of the mansion entertained hospitably, while he sedulously prosecuted his own literary labours. To this period, of vigorous old age, unimpeded by personal dangers, but far from being undisturbed by personal quarrels, belong very many of Voltaire's works, and some of his best. The last of his successful plays were 'L'Orphelin de la Chine,' acted a little before his retirement, and 'Tancrède,' soon after it. A crowd of other tragedies were confessed failures; and his comedies always had been so. 'La Philosophie de l'Histoire' (1765), was written as an introduction to the 'Essay on the Manners of Nations,' now completed and published; and the 'Histoire de Pierre le Grand' appeared in parts from 1759 to 1765. Thus, as one of his French biographers observes, 'To combat religion without ceasing, and to make war on all who defended it; to defend his own glory against those who attacked it; and to succour or avenge the innocent victims of human justice: all these diversified employments were far from absorbing his whole time.' There is here an allusion to a series of Voltaire's exertions, of which his vindication of the memory of Calas was the first. Though he

was doubtless led to defend the unfortunate Calvinist by regarding him as a victim of his own enemies the priests, his better feelings were keenly awakened as the long struggle proceeded, and this and several subsequent appeals of the same sort are among the best points in the conduct of the 'Philosopher of Ferney.' It should be noted, also, that, with all his frugality, he was a liberal and improving landlord, and a charitable neighbour. He quarrelled with his parish priest; but he built him a new church. Towards the end of his days, indeed, he showed a desire of reconciliation with the ministers of religion, his expression of which scandalized his infidel friends as a piece of cowardice, while the clergy were disposed to regard it as shameless hypocrisy. He seemed to look no farther than obtaining the sacraments by pretences and tricks; and he justified himself to his disciples by saying, that he wished his body to rest in consecrated ground. It was, after all, not without deception and intrigue, that his friends were able to procure this posthumous honour for the unrepenting apostle of unbelief. Having gone to Paris, where he had not been for twenty years, he died there in 1778, soon after having completed his eighty-fourth year. [W.S.]

VOLTERRA, DANIEL RUCARDI DE, a celebrated Italian painter and sculptor, 1509-1566.

VONCK, F., a Belgian advocate, known as one of the popular leaders in 1789, died 1792.

VONDEL, JOOST VON DER, a Dutch poet and dramatic writer, whose works have greatly aided in perfecting his native language, 1587-1679.

VOPISCUS, FLAVIUS, a Latin historian, who lived at Rome in the time of Diocletian and Constantine Chlorus, commencement of the 4th century. He is considered one of the best writers of the Augustan histories. His work commenced with the history of Aurelian, but his remains now extant are the lives of the four tyrants, Firmus, Saturninus, Proclus, and Bonosus; and of the three emperors, Carus, Numerianus, and Carenas.

VORAGINE, J. DE, an Italian Dominican, historian, and writer of sacred legends, died 1298.

VORST, ÆLIUS EVERARD, a Dutch physician, director of the botanic garden at Leyden, 1565-1624. His son ADOLPHUS, a physician and botanist, editor of an edition of Hippocrates. 1597-1663.

VORST, CONRAD, in Latin *Vorstius*, a Dutch theologian, successor of Arminius at the academy of Leyden, 1569-1622. WILLIAM HENRY, his son, a minister and Hebrew scholar, died 1660.

VORSTIUS, J., a Lutheran controversialist, philologist, and Hebrew scholar, 1623-1676.

VORTIGERN, a British king, elected after the departure of the Romans from this island in 454, killed in battle 485.

VOS, MARTIN DE, an eminent Flemish painter, instructed by his father and by Tintoretto. He excelled in landscapes and historical composition; died at Antwerp 1604. SIMON PAUL, another artist of this name, excelled most in hunting pieces, and flourished at Antwerp about the same time, but the dates are not ascertained.

VOSS, JOHN HENRY, a German poet and critic, who ranks also among the greatest of German translators and philologists, was born of humble parentage at Mecklenberg in 1751. He studied

under Heyne at Gottingen, and in 1809 was appointed professor at Heidelberg, in which office he died 1826. In his translations of Homer, and others of the chief classics, Voss is said to have preserved the metrical form of the original, the most minute details, and expressions of ideas, the epithets, and all the effective characteristics, with surprising fidelity. He has translated Shakspeare, but this endeavour is understood to be less successful. He was involved in many bitter controversies with Heyne, Stolberg, and Creurey. His own 'Idyls' have the reputation of being charming additions to the native literature of Germany.

VOSSIUS, GERARD, a Roman Catholic theologian and learned editor, died 1609.

VOSSIUS, GERARD JOHN, professor at Leyden and Amsterdam, celebrated for his extensive learning as a theologian and philologist, was the son of a protestant minister, and was born near Heidelberg 1577. Some of his works are still considered of great value. He was killed by falling from a ladder in his library 1649. His son, ISAAC, also bears a great name among the learned, but he was sceptical of revelation; he settled in England and became canon of Windsor, 1618-1688.

VOUET, SIMON, an eminent Fr. painter, employed in the Louvre and Luxembourg, 1582-1649.

VOULTE, JOHN, in Latin *Vulteus*, a Latin poet, born at Rheims about 1542.

VOYER, a family of distinguished Frenchmen: —RENE, Seigneur D'Argenson, a soldier and diplomatist, 1596-1651. His son and successor in the title, same name, a diplomatist and ambassador to Venice, 1623-1700. MARC RENE, son of the latter, chancellor of France, minister of police, and a great promoter of *Lettres de Cachet*, 1652-1721. His eldest son, RENE LOUIS, Marquis D'Argenson, minister of foreign affairs, distinguished as a scholar and partizan of the philosophic doctrines, author of 'Essays,' 1694-1757. MARC PIERRE, brother of the latter, successor of his father as lieutenant-general of police, and successor of M. de Breuille as minister of war, was born in 1696. His name is a conspicuous one in the history of the Orleans regency; and having strenuously opposed

the system of William Law, he was out of favour till the great financialist had fallen into disgrace. He was a patron of learned men, and D'Alembert and Diderot dedicated the *Encyclopédie* to him. He was disgraced through the influence of Madame Pompadour in 1757; died 1764. His son, RENE, a distinguished commander, flourished 1722-1782.

VOYS, A. DE, a Dutch painter, born 1641.

VOYSIN. See VOISIN.

VREE, or VREDIUS, OLIVER DE, a Flemish historian of his own country, 1578-1652.

VRIES, GERARD DE, a zealous Cartesian philosopher, flourished at Utrecht 17th century.

VRIES, JOHN FREDEMAN DE, a Dutch painter of architecture and perspective, 1527-1588.

VRIES, MARTIN GERRITSON DE, a Dutch navigator, time of Van Diemen, 1642.

VRILLIERE, LOUIS PHELIPEAUX, Marquis De La, secretary of the Orleans regency, 1672-1725.

VROOM, or VROON, HENRY CORNELIUS, a Dutch marine painter, from whose designs the tapestry in the House of Lords, representing the defeat of the Spanish armada, was executed to the order of Admiral Howard, 1566-1617.

VUEZ, A. DE, a French painter 1642-1724.

VUILLEMIN, or WILLEMIN, JEAN, a French physician and Latin poet, 16th century.

VUITASSE, C., a Fr. theologian, 1660-1716.

VULCANUS, the Latinized name of Bonaventura de Smet, a learned Fleming, 1538-1614.

VULSON, or WILSON, DE LA COLOMBIERE, MARC DE, a famous heraldic writer, who resided at Grenoble, till his domestic peace was destroyed, in the first half of the 17th century, and then took up his abode at Paris. He died in office at the court 1658. Among his works, which are of great value, may be mentioned 'Le Vrai Théâtre d'Honneur et de Chevalerie,' 2 volumes in folio, 'La Science Heroïque,' and 'De L'Office des Rois d'Armes, des Heraults et Poursuivants.'

VUOERDEN, M. A., Baron De, a French administrator, author of 'Historical Journals' relating to the history of Louis XIV., 1629-1699.

VZESLAS, grand duke of Russia, rival of Isiaslav in their civil wars, 1068-1101.

W

WAAJEN, WAASEN, or WAEYEN, JEAN VANDER, a Dutch theologian, who has the reputation of being one of the best controversialists of that country, and was counsellor to the prince of Orange, 1639-1701. His son, of the same names, who succeeded him as preacher to the university of Franeker, died 1716.

WAAL, or WÄEL, LUCAS DE, a painter of Antwerp, taught by John Breughel, 1591-1676. CORNELIUS, his younger brother, 1594-1662.

WACE, or WAICE, ROBERT, an Anglo-Norman poet and chronicler, who was canon of Bayeux, and chaplain to Henry I. of England, 12th century.

WACHTER, JOHN GEORGE, a learned German philologist and antiquarian, 1673-1757.

WACKERBARTH, A. C. COUNT VON, an Austrian field-marshal and statesman, 1662-1734.

WADING, or WADDING, LUKE, an Irish priest, who held a professorship at Salamanca, and

afterwards resided at Rome, author of a 'History of the Order of St. Francis,' and editor of several learned works, including Duns Scotus and Calaisio's Concordance, 1588-1657.

WADDING, PETER, an Irish Jesuit, who became chancellor at the university of Gratz, in Styria, author of Latin works, 1580-1644.

WADHAM, NICHOLAS, founder of the college that bears his name at Oxford, 1536-1610.

WADSTROM, or WADSTREM, CHARLES BERNARD, a Swedish engineer, memorable as a promoter of African colonization and discovery, was born in Stockholm 1746. He visited Africa in company with the botanist, Sparrman, and the mineralogist, Arrhenius, in 1787, and on coming to London was invited to give evidence before the privy council, in an inquiry tending to the abolition of the slave trade. His pamphlet on the subject led to the establishment of the English colony at Sierra Leone; died at Paris 1799. Wadstrom

added some remarks upon the negro character to the work of Norris on Dahomey.

WÆL, LUCAS DE, a Flemish painter, 1591-1676. CORNELIUS, his brother, a painter of landscapes and battle-pieces, 1594-1662.

WÆFER, LIONEL, an English adventurer, who was originally a surgeon in the army, and sailed with Dampier. The latter having quarrelled with him, put him ashore on the isthmus of Darien, where he remained some time with the Indians. He published an interesting narrative on his return home in 1690.

WÆFFLARD, ALEXIS JAMES MARIA, a French dramatic author, 1787-1824.

WAGA, THEODORE, a Polish jurist and historian of his own country, 1739-1801.

WAGENAAR, JOHN, historiographer to the city of Amsterdam, author of a 'History of Holland from the Earliest Times to 1751,' 'The Present State of the United Provinces,' 'Description of the City of Amsterdam,' and 'The Character of John de Witt placed in its True Light.' The first of these works extends to 21 vols. 8vo, and the edition of 1752-1759 is embellished with engravings, maps, and portraits, by Houbraken. Wagenaar was born in Amsterdam 1709, died 1773.

WAGENAAR, LUKE JANSEN, a Dutch pilot and writer on navigation, died 1596.

WAGENHARE, PETER DE, a religious professor and Latin poet, born about 1599, died 1662.

WAGENSEIL, JOHN CHRISTOPHER, professor of history and jurisprudence at Altorf, author of 'Tela Ignea Satanae,' which is a collection and refutation of all that the Jews have written against Christianity, 1633-1705.

WAGER, SIR CHARLES, a brave naval officer, distinguished in the reign of Anne, 1666-1743.

WÄGHORN, THOMAS, a lieutenant in the royal navy, whose name will long be held in remembrance for his achievement of the Overland route to India. He was born at Chatham in 1800, and having seen much service by sea and land in the employ of the East India Company, commenced the execution of his great project in 1827. His exertions were crowned with success, but his means and his health were both exhausted, and he died soon after receiving a meagre instalment of the thankful recognition to which he was entitled, in 1850.

WÄGNER, B., a professor of philosophy, 16th c. WÄGNER, CHARLES CHRISTIAN, a German physician and professional writer, 1732-1796.

WÄGNER, C. L., a Ger. theologian, last cent.

WÄGNER, GABRIEL, a German polemic and philosophical writer, professor of literature and poetry at Hamburg in 1696.

WÄGNER, GODEFROI, a German divine, and editor of several learned works, last century.

WÄGNER, G. F., a German jurist, born 1631.

WÄGNER, J. G., a Ger. physician, died 1759.

WÄGNER, J. J., a Swiss physician, author of a Natural History of his country, 1641-1695.

WÄGNER, LOUIS FREDERIC, a jurisconsult and numismatist of Tübingen, 1700-1789.

WÄGNER, PAUL, a magistrate and jurist of Leipzig, 1617-1697. CHRISTIAN, his son, a divine and learned writer, 1663-1698. GOTTFRIED, brother of the latter, a learned writer upon the origin of the Americans, 1652-1725.

WÄGNER, PETER CHRISTIAN, a learned German physician and naturalist, 1703-1764.

WÄGNER, TOBIAS, a learned theologian and counsellor at Tübingen, 1598-1680.

WÄGSTAFFE, THOMAS, a learned divine of the party of nonjurors, who adopted the medical profession after the revolution, and finally became a prelate: besides his Sermons, he wrote some political tracts and a vindication of Charles I., 1645-1712.

WÄGSTAFFE, WILLIAM, known as a humorous writer, physician to Saint Bartholomew's Hospital, born in Buckinghamshire 1685, died 1725.

WÄHLENBERG, GEORGE, an eminent Swedish botanist and geologist, 1784-1814.

WÄILLY, NOEL F. DE, a French grammarian, 1724-1801. His son, STEPHEN AUGUSTIN, author of a Rhyming Dictionary, 1770-1821. CHARLES, of the same family, a famous architect, 1729-98.

WÄILLY, P. J., a Fr. missionary, 1759-1826.

WÄITHMAN, JOHN, an alderman and member of parliament of the city of London, well known as an advocate of popular rights; born in Denbighshire 1765, died 1833.

WÄKE, SIR ISAAC, an ambassador of the time of James I., born at Billing, in Northamptonshire, where his father was rector, about 1575, died 1632. He wrote several works, the principal of which is his 'Rex Platonicus,' of which six editions were published.

WÄKE, WILLIAM, archbishop of Canterbury, a prelate of great learning and ability as a theologian, was born at Blandford, in Dorsetshire, 1657. He became bishop of Lincoln in 1705, and archbishop in 1716. The most remarkable circumstance in his history was his correspondence with the Jansenists, the end of which was to promote a union of the French and English Churches. Died 1737.

WÄKEFIELD, GILBERT, a classical scholar and theologian, originally a curate in the Church of England, was born at Nottingham in 1756. He left the church to accept the situation of classical teacher at Warrington, from which, in 1790, he removed to the dissenting college at Hackney. In less than a year this engagement was also brought to a close, and Mr. Wakefield gave himself up freely to opposition politics and attacks upon the religious systems, especially of the Church of England. His 'Letter to the Bishop of Llandaff' led to his prosecution and imprisonment for two years in Dorchester gaol. He was liberated in May, 1801, and died of typhus fever in the September following. He is author of several learned works, besides some of temporary interest.

WÄKEFIELD, PRISCILLA, authoress of numerous works, designed to promote the education and moral improvement of the young, was born of Quaker parents, named Trewman, in 1750, and died at Ipswich 1832. Her benevolent disposition was further shown by the foundation of savings banks, originally promoted by her for the benefit of the industrious poor.

WÄKEFIELD, ROBERT, a distin. Hebraist, and minister of the Church of England, died 1537.

WÄLBAUM, J. J., a Ger. naturalist, 1724-99.

WÄLCH, A. G., a German writer, 1736-1801.

WÄLCH, B. G., a German *savant*, 1756-1805.

WÄLCH, J. G., a German theologian and philologist, 1693-1775. His son, J. E. EMMANUEL,

a learned theologian and naturalist, 1725-1778. CHR. W. FRANÇOIS, brother of the latter, an ecclesiastical historian and theologian, 1726-1784. C. FREDERIC, a third br., a juriconsult, 1734-99.

WALDAU, G. E., a German *savant*, born 1745.

WALDEGRAVE, JAMES, earl of, an eminent statesman, governor of the prince of Wales, son of George II., author of *Memoirs*, 1715-1763.

WALDEMAR I., called 'the Great,' king of Denmark, born 1131, succeeded Eric V., 1147. His reign was illustrated by expeditions against the pirates of the Baltic, and he compelled Magnus VI., king of Norway, to sign a humiliating treaty; died 1181. WALDEMAR II., called 'the Victorious,' younger son of the preceding, succeeded his brother, Canute VI., 1202. He made many warlike expeditions into Sweden, Norway, and Germany, created a powerful navy, and revised the laws of his kingdom; died 1241.

WALDEMAR III., eldest son of the preceding, was regent from 1219 to 1231. WALDEMAR IV., third son of Christopher II., was in Bavaria at the death of his father in 1333. In 1340-4 he recovered part of his kingdom by force of arms, and obtained some further successes against Sweden in 1353 and 1357; eventually, however, he was glad to obtain peace by making some sacrifices; died 1376.

WALDENSIS, THOMAS, a learned English Carmelite, born at Walden, in Essex, about 1367. He became the champion of the church against the reformers of the reign of Henry IV., and in that of Henry V., whose favourite he was, rose to be provincial of his order and a privy councillor. Henry V. died in his arms, and he himself departed this life while attending the youthful monarch, Henry VI., in France, 1430.

WALDO, PETER. See VALDO.

WALDIS, B., a German fabulist, died 1554.

WALDKIRCH, JOHN RODOLPH DE, a Swiss juriconsult and historian, 1678-1757.

WALE, ANTHONY DE, a Flemish theologian and adversary of the remonstrants, 1573-1639. JOHN, his son, a physician and anatomist, 1604-1649.

WALES, WILLIAM, an English mathematician, who accompanied Captain Cook on his second voyage in the character of astronomer, and was finally secretary to the Board of Longitude, author of several astronomical works, 1734-1798.

WALINGFORD, RICHARD, abbot of St. Albans, known as an astronomer and historian, 14th cent.

WALKER, ADAM, an experimental philosopher and lecturer, was born in Westmoreland 1732, and brought up as a weaver, but devoting all his spare time to self-improvement, was early qualified for a place in the intellectual world. He was settled in London as a professional man in 1778, and died there in 1821. Besides his works in experimental philosophy, he invented the Eidouranian, or transparent orrery, the revolving lights in the islands of Scilly, and several useful machines. His son, WILLIAM, was also a lecturer on astronomy, and flourished 1766-1816.

WALKER, CLEMENT, a presbyterian and political writer of the time of Cromwell, was born at Cliffe, in Dorsetshire, and educated at Oxford. Previous to the civil wars he was usher of the exchequer, but at the commencement of those stirring times he became, in 1640, member of parliament for Wells. His 'History of Independency'

and 'Cromwell's Slaughter House,' were the occasion of his committal to the Tower in 1649, and he died there 1651.

WALKER, SIR EDWARD, clerk to the privy council in the time of Charles I., known as a heraldist and historian, died 1677.

WALKER, GEORGE, a dissenting minister and teacher of theology, better known as a mathematician by his 'Doctrine of the Sphere,' was born at Newcastle-on-Tyne about 1734. He was one of the ministers of the high pavement meeting in Nottingham, and, after that, theological tutor at a dissenting academy in Manchester. Died 1807.

WALKER, GEORGE, famous for his defence of Londonderry against James II., was born of English parents at Tyrone, and became a minister in the Irish Church. He was killed at the battle of the Boyne shortly after his promotion to the bishopric of Derry, 1690.

WALKER, JOHN, a minister of Exeter, author of 'An Attempt towards Recovering an Account of the Numbers and Sufferings of the Clergy who were Sequestered in the Rebellion,' d. about 1730.

WALKER, JOHN, a well-known lexicographer, was born at Friern Barnet, in Middlesex, 1732, and lived by the profession of a schoolmaster and lecturer, having, however, first studied elocution with a view to the stage. His works are a 'Critical Pronouncing Dictionary,' 'A Rhyming Dictionary,' 'Elements of Elocution,' 'Rhetorical Grammar,' 'Outlines of English Grammar,' and a 'Key to the Classical Pronunciation of Greek, Latin, and Scripture Proper Names.' Died 1807.

WALKER, JOHN, a physician and geographical writer, who, at the time of his decease, was head of the London Vaccine Institution; born at Cocker-mouth, in Cumberland, 1759, died 1830.

WALKER, OBADIAH, a Roman Catholic divine and writer on education, 1616-1699.

WALKER, R., a portrait painter, 17th century.

WALKER, S., an English divine, 1714-1761.

WALKER, T., an English actor, 1698-1743.

WALKER, T., a humorous writer, who filled the office of a police magistrate, 1784-1836.

WALKER, W., a learned divine, died 1684.

WALL, EDWARD, belonging to an ancient Irish family, was the chief promoter of the rebellion in that country in 1641, and, after the death of Charles I., succeeded the marquis of Ormond as viceroy. He was defeated by Cromwell, and escaped to France, where he died 1651.

WALL, JOHN, a physician and medical writer, chiefly remarkable for his researches to discover materials proper for china ware, and the great promoter of that manufacture in Worcester. He also discovered the virtues of the Malvern waters: 1708-1776. His son, MARTIN, an eminent physician, professor at Oxford, 1744-1824.

WALL, WILLIAM, vicar of Shoreham, in Sussex, author of a 'History of Infant Baptism,' and 'Critical Notes on the Old Testament;' died 1728.

WALLACE, SIR WILLIAM, the national hero of Scotland, is supposed to have been born about the middle of the thirteenth century. Like that of all men immortalized in the early history of nations as the vindicators of their independence, his life has been coloured and amplified by the admixture of legendary poetry with fact. It has, however, to be remarked as to Wallace, that re-

search in the documentary sources of history has tended to prove the main features of his career—that he gathered by his personal influence a large body of followers—that though of humble origin he became governor of Scotland—that he gained signal victories, and was the object of the special vengeance of the English monarch. He is generally said to have been the son of Sir Malcolm Wallace of Elderslie, near Paisley, a man of ancient family, though not of high rank. That he was himself knighted, and held the title of 'Sir,' or Sieur, is shown by the documents of the day. It is usual to speak of the higher Scottish nobility of the period as basely deserting their country and leaving the national contest to be headed by the one man who was faithful among the faithless. But it must be remembered that the nobility were men of Norman origin, whose sympathies naturally were with the court of their national leader, the Norman king of England. The northern Scots, chiefly of Saxon origin, were now made to feel the regal and aristocratic oppression under which the Saxons of England had been governed since the conquest. It is natural to suppose that Wallace's family belonged to the old gentry, who felt the ascendancy of the Normans, as Cedric the Saxon is so picturesquely made to do in *Ivanhoe*, and that the young man feeling his capacity for the task, became the leader of his oppressed countrymen, while the Norman nobles stood aside until ambition opened up for some of them a prospect of dominion in the liberated country. His first conflict with the English power is attributed to a romantic origin. Engaged in a dispute with some soldiers in Lanark, the lady of his affections afforded him refuge. She was slain by the foreigners, on whom the young lover in his turn took signal vengeance. Being thus fairly at feud with the invading power, he gathered around him a gradually increasing body of his countrymen, and was at last joined by such aristocratic leaders as Douglas, Murray, and young Bruce, when Edward sent a force to quell them in 1297. These followers had not sufficient reliance on their leader, and with few exceptions made a separate submission. Wallace, however, still keeping together his humble followers, attacked and defeated the English army on the plains of the Forth, near Stirling Bridge. The country appeared to be entirely liberated, and the successful leader carried his army across the border to make retaliation on England; a protection granted by him to the monastery of Hexham, dated 7th November, 1297, is one of the few documents relative to him which has been preserved. He assumed the title of regent of the kingdom, but the haughty nobles who had so few ties to Scotland, viewed his career with more jealousy than gratitude. Edward, who was absent during the reverses sustained by his forces, resolved, with his accustomed energy, to strike a decided blow, and on the 22d of July, 1298, the English king in person gained over him the victory of Falkirk. For some time Wallace led a wandering life, and conducted a sort of guerilla war until the year 1303, when he was taken prisoner. He was removed to London, and on the 23d of August, 1305, executed under the English treason law, with every circumstance of cruelty and ignominy that could be devised. The English

populace sympathized with his fate as that of a fellow-countryman rather than an enemy. [J.H.B.]

WALLENBOURG, JAMES DE, an Austrian diplomatist and Orientalist, 1763-1806.

WALLENSTEIN. ALBERT WALLENSTEIN, duke of Friedland, born in 1583, was the most renowned German commander during the first half of the THIRTY YEARS' WAR. He was of a noble family, and greatly increased his wealth and power by marriage. When the Danes took part in the struggle between the catholics and protestants in Germany, Wallenstein offered the emperor Ferdinand II. to raise and maintain an army of 50,000 men at his own expense, on condition that he was to have the uncontrolled command of them, and the privilege of indemnifying himself from the territories that they conquered. The emperor accepted these terms, and Wallenstein raised his army of volunteers, gained repeated victories over the Danes and their allies, and overran nearly the whole north of Germany, though he was checked by the heroic resistance of the town of Stralsund. But the violence of his proceedings, and his haughty demeanour, excited the jealousy of many of the catholic princes against him; and the emperor deposed him from his command in 1629. Wallenstein retired with calmness; relying on the promises of a favourite astrologer that he would soon be gloriously restored. This actually took place in 1632. The Swedish hero Gustavus Adolphus had appeared in the meantime on the scene of war, and had crushed the imperialist armies. Tilly the emperor's favourite general had been killed in action with him; and Ferdinand now trembling for his personal safety implored Wallenstein to resume the command. Wallenstein consented, but on terms of even more haughty independence than before. Such was the confidence that the soldiery placed in him, and such was the magic of his name, that the warlike youth of Germany crowded around his standard, and in a short time he encountered the Swedes at the head of a powerful and well-equipped army. He had the advantage over Gustavus and his Saxon allies in the early part of the campaign. He recovered several provinces from them, and defeated Gustavus when the Swedish king attacked his camp at Nurnberg. Wallenstein afterwards lost the great battle of Lutzen (Nov. 10, 1632) in which Gustavus fell; but Wallenstein re-organized his army in Bohemia, and was expected by the Austrian court to press hard on the German protestants and Swedes now that they were deprived of their great king. Wallenstein, however, remained inactive, and was accused by his enemies at Vienna of intriguing with the Swedes, with the view of making himself king of Bohemia. He was also hated on account of the comparative liberality of his religious opinions by the monks and Jesuits, who were all powerful in the emperor's councils. He was assassinated Feb. 25, 1634, by an Irishman named Butler, and some other foreign officers in his army. His murderers were rewarded by the emperor, and the vast possessions of the duke were confiscated. Historians have differed as to the reasonableness or unreasonableness of the suspicions that were entertained of Wallenstein's loyalty; but there can be no difference of opinion as to the deep atrocity of his taking off. [E.S.C.]

WALLER, EDMUND, was one of the most famous of English poets, for many years both before and after the Restoration; and his celebrity was not completely eclipsed till, in the course of the present century, our older poetical literature came to be more justly appreciated, and strength of imagination and feeling to be estimated more highly than elaborate correctness of form. Waller's works are verses of society and celebrations of public personages and events, with a large number of love-poems. Much inferior, not to Donne and Cowley only, but to several others of their class, both in imaginative force and in tenderness of emotion, he has a fine grace of fancy and diction, a wise purity of taste, and greater skill and care than almost any other poet of his age in the finishing and rounding off of his smaller compositions. His versification is exceedingly sweet; and he has unquestionable merit as a forerunner of Dryden in the improvement of the heroic couplet.—Waller, born in Hertfordshire in 1605, succeeded in childhood to a large patrimonial estate; and he added to his fortune by a wealthy marriage. It was before a second marriage that he paid unsuccessful addresses to Lady Dorothea Sidney, commemorated in his poems by the name of Sacharissa. After having been a member of the House of Commons in early youth, he sat again on the reassembling of parliament by Charles I. in 1640. At first he took his position with the party of Hampden, who was his cousin, and through whom he was connected also with Cromwell. But his vacillating temper soon showed itself; and, on the breaking out of the civil war, though he continued to sit in parliament, he was active in opposition to the proceedings of the house. In 1643 he was arrested for participation in a plot, said to have been intended for raising the Londoners on the king's behalf. Several of the plotters, and among them a brother-in-law of Waller's, were executed; and he himself escaped only through abject submission, and the most cowardly betrayal of the secrets of his friends. He was heavily fined, and banished from the country; but after the establishment of the Protectorate, Cromwell allowed him to return from France; and he took up his residence at a house he had near Beaconsfield, in Buckinghamshire. Poetical panegyrics on the Lord Protector now flowed freely from his pen; and it was quite characteristic of the man, that, on the Restoration, these were followed by verses 'To the King, on his Majesty's Happy Return.' He sat repeatedly in parliament even in his extreme old age; and, though he was neither trustworthy nor trusted, his liveliness of talk, and his felicitous readiness of wit, made him one of the favourite speakers of the house. He died in 1687, and lies buried beside Edmund Burke. [W.S.]

WALLER, SIR WILLIAM, a famous general of the parliamentary army in the civil wars, born in Kent 1597, died 1688. His career was not unsuspected by the independents, and at the restoration he became one of the members for Middlesex. He wrote a 'Vindication of his Character and Conduct,' and 'Divine Meditations.'

WALLERIUS, JOHN GOTTSCHALK, an eminent Swedish naturalist, professor of chemistry, metallurgy, and pharmacy, at Upsala, 1709-1785.

WALLIN, G., a Swedish Orientalist, 1686-1760.

WALLIS, JOHN, an eminent mathematician, who held the office of archivist and Savilian professor of geometry at Oxford, born at Ashford, in Kent, 1616, died 1703.

WALLIS, S., an English navigator in 1766-68.

WALLIUS, or VAN DER WALLE, JAMES, a Jesuit and Latin poet, French Flanders, 1599-1680.

WALLOT, J. J., a German astronomer, settled as professor at Paris, executed 1794.

WALMESLEY, CHARLES, a Roman Catholic divine and doctor of the Sorbonne, known as a mathematician, 1721-1797.

WALPOLE, SIR ROBERT, better known by his name in the House of Commons, than by his peerage title as earl of Orford, was born at Haughton, his father's family mansion, on the 26th of August 1676. His father dying in 1700, he succeeded to his estate, and entered parliament. His education like that of other country gentlemen in that age was extremely imperfect, and it has been said, that as he knew nothing of French, he and George I. who could not speak English, had to discourse on state questions in bad Latin. His main powers were a capacity for business and a knowledge of mankind. In 1708 he was made secretary at war. He was attacked, along with Marlborough, by the Tory government, which negotiated the treaty of Utrecht, and committed to the Tower on a charge of accession to commissariat speculation. With the Hanover accession came, of course, restoration of influence, and the power of triumphing over his enemies. He immediately entered on high office but the foundation of his unexampled reign of ministerial power, was in the dexterity and success with which he adjusted the losses caused by the South Sea scheme, so as to make their pressure least on those who were least culpable. From 1721 until 1742 he governed the British empire, and during that period, though more than one enemies or rivals appeared to be on the eve of bearing him to the ground, he righted himself by his own admirable dexterity. He was a friend of peace, and preserved it until a European war and his downfall came together. The country owes to his government the origin of many important projects of practical statesmanship. Among the most valuable of these was the plan for suspending the exaction of duties until commodities are brought to market, by the arrangement now so well known as the bonding system. The excise scheme, as it was termed, in which he proposed to bring this into practice, was so pertinaciously denounced by popular opinion, under the well-known cry, 'Liberty, property, and no excise,' that he required to abandon it. Among his good qualities may be counted his clemency towards his political opponents, at a desire rather to baffle them, than let them be involved in dangerous schemes. But on the other hand, there is no doubt that the charges of corruption made against him are well founded. If he carried out his objects in government he cared not how this was done, and he did much to verify his own axiom, that every man has his price. His habits and manners were coarse as those of the fox-hunters of his day, and we find his son, Horace in a party of ladies of the younger and more fastidious generation, nervously anxious lest his father should say things to drive them from the room. His first wife was a daughter of Sir John Hunt

lord mayor of London, but he afterwards married his mistress, Miss Skerret, an event which the duchess of Marlborough loudly proclaimed, but which Coxe's elaborate biography does not mention. The fatal majority against him, which showed that his power was gone, was characteristically enough in an election case. It occurred on the 2d of February, 1742. On the 9th he was created earl of Orford, and on the 11th resigned. After three years of misery from unwonted inaction and painful disease, he died on 18th March, 1745. [J.H.B.]

WALPOLE, HORACE, born in 1717, was the third son of Sir Robert. On leaving Cambridge, he travelled on the continent with the poet Gray, till the sensitive man of letters and the supercilious man of rank quarrelled and parted. For more than a quarter of a century from 1741 he sat in the House of Commons; but, though he made some speeches, he was neither a distinguished nor a useful member. Government sinecures conferred on him by his father made up his income to nearly four thousand a-year. Thus enabled to indulge his natural indolence, he spent his life in luxurious lounging; watching and satirizing his political and fashionable contemporaries, coquetting haughtily with literature and literary men, with art and artists, building at Twickenham his Gothic toy-house of Strawberry Hill, and filling it with antiquarian and ornamental nicknacks. In his seventy-fourth year, by the death of his nephew, he succeeded to the Earldom of Orford; but the peerage made no change in his habits. He died six years afterwards, in 1797.—Horace Walpole's literary productions never rise above the character of cleverness: but, in their several ways, all of them are clever; and the best of them are among the cleverest of their kind. Neither his 'Anecdotes of Painting in England,' nor his 'Catalogue of Royal and Noble Authors,' would suffice to preserve the reputation which, professing to despise it, he really longed for vehemently. He attempted twice, with considerable success, the adventure of imaginative composition; in the romance of 'The Castle of Otranto,' (1764), and the exaggerated tragedy of 'The Mysterions Mother,' (1768). He was more at home in his 'Memoirs of the Reign of George II.,' and the 'Memoirs of the Reign of George III.,' the bitterness of which has some excuse in his just indignation at the ill-usage suffered by his father. But the permanence of his celebrity rests on his 'Letters,' which offer a miniature picture of society and public life for the greater part of his long life. They are cynical and ill-minded in the extreme, but always full of keen observation and lively description, and frequent in strokes of pointed wit; and the style, though really formed by great labour, possesses a masterly terseness and apparent ease. Both the *Memoirs* and the *Letters* were, by his own order, reserved from publication till after his death. [W.S.]

WALPOLE, HORATIO, Lord, brother of Sir Robert, preceding article, was born in 1678, and held several offices under government. Besides political pamphlets, he wrote an 'Answer to Bolingbroke's Letters on History.' Died 1757.

WALSH, EDWARD, an Irish physician and army surgeon, author of 'A Narrative of the Expedition to Holland,' &c.; died 1832.

WALSH, PETER, an Irish priest and political writer, who became professor at Louvain, and on his return to Ireland persuaded many of the clergy to subscribe a declaration disclaiming the pope's temporal authority; died 1687.

WALSH, WILLIAM, a gentleman of Queen Anne's household, known as a poet, 1663-1708.

WALSINGHAM, SIR FRANCIS, one of Queen Elizabeth's eminent statesmen, was born at Chislehurst, in Kent, 1536. He was first employed by Cecil as ambassador to the court of France in the period 1570-1577, and then became one of the secretaries of state, and received the honour of knighthood. In 1586, three years after he had gone as ambassador to Scotland, he formed one of the Commission for the trial of Queen Mary, and when he died, in 1590, was chancellor of the duchy of Lancaster. While Walsingham was in France the massacre of St. Bartholomew took place, and his enmity to Mary Stuart was well grounded in his knowledge of the dark machinations of the Roman Catholics. Queen Elizabeth, who had a vein of humour in her composition, and frequently addressed her ministers in a sportive manner, called him her *moon*, and in such a night as threatened Europe at that time, she had reason enough to congratulate herself on having a counsellor so honest and sagacious. He possessed political knowledge and foresight in a remarkable degree, and though it is said he was puritanically inclined, no man could have drawn a more distinct line where he believed, rightly or wrongly, that the toleration of princes should cease. Walsingham deserves honourable remembrance also for the steady fidelity to his principles which he displayed at the French court, and his bold remonstrances with the king. His Despatches are highly interesting, and may be consulted in the work of Sir Dudley Digges. [E.R.]

WALSINGHAM, THOMAS, a monk of St. Albans, historiographer-royal to Henry VI., about 1440, author of English chronicles.

WALTER, JOHN, late proprietor of the *Times* newspaper, and member of parliament, deserves honourable mention as the first to raise the character of the daily press, and bring the steam engine to its aid. He was born in 1773, and undertook the exclusive management of the *Times*, in the character of joint proprietor, in 1803. The successful application of the steam engine in this enterprise dates from 1814. Mr. Walter represented Berkshire in parliament from 1832 to 1837, and was returned for Nottingham in 1841; d. 1847.

WALTER, JOHN GOTTLÖB, an eminent Prussian anatomist, 1734-1818. FREDERIC AUGUSTUS, his son, also an anatomical writer and professor, 1764-1826.

WALTHER, B., a German astronomer, d. 1504.

WALTHER, G. C., a jurisconsult, 1601-1656.

WALTHER, M., a German preacher and theologian, 1593-1662. AUGUSTIN FREDERIC, his son, an anatomist, author of a Treatise on the Tongue, 1688-1746.

WALTHER, R., a Swiss theologian and Latin poet, 1519-1586. His son, ADOLPHUS, a Latin poet of remarkable talent, 1552-1577.

WALTON, BRIAN, bishop of Chester, and editor of the London Polyglott Bible, 1600-1661.

WALTON, IZAAC, a well-known writer on ang-

ling, was born at Stafford in 1593. He died in 1683. Though his education was not a remarkably good one, and though he made in after life no pre-

"House of Isaac Walton.]

tensions to learning, he yet became one of the most popular authors of the time in which he lived. He was originally a linen-draper in London, but acquiring a competency, he was enabled to retire from business and leave town. He was a pious man, of a thoughtful contemplative turn of mind, and during the time he was in business was exceedingly fond of fishing. The river Lea was his darling haunt (still a favourite spot for Cockney anglers), and there he spent as much of his time as he could spare from his shop, in angling and contemplation. In 1653 he published his famous work, 'The Complete Angler, or Contemplative Man's Recreation.' In this work he introduced a good deal of information upon the habits of fresh water fishes, and figured with considerable accuracy many of the species of which he treats. The air of verisimilitude and unaffected benevolence which this work exhibits has made it the most popular book of its kind ever written; a popularity which after the lapse of 200 years it still enjoys amongst the lovers of the 'gentle craft.' Walton was considered the most expert fisher of his time, and has been called the father of anglers. He spent a great part of his latter years in the society of eminent divines, and has left behind him several biographical memoirs which are still highly thought of. He lived to the age of ninety. [W.B.]

WAMESE, J., a French juriconsult, 1524-90.

WANGENHEIM, F. A. J. DE, a Prussian Orientalist and writer on forest botany, 1747-1800.

WANLEY, NATHANIEL, rector of Trinity Church, in Coventry, author of 'Self-Reflection,' 1633-1680. His son, HUMPHREY, a learned literary antiquary, secretary to the Society for Promoting Christian Knowledge, and librarian to the earl of Oxford, 1672-1726.

WANSLEBEN, or VANSLEB, JOHN MICHAEL, an Oriental scholar, and traveller in Abyssinia and Egypt, born in Thuringia 1635, died 1679.

WARBECK, PERKIN, or PETER, a pretender to the English throne, who assumed the character and title of Richard, duke of York, one of the princes supposed to have been murdered in the Tower. Being defeated in arms, he was executed in the reign of Henry VII., 1499. Some obscurity still remains about his history.

WARBURTON, ELIOT B. G., an English novelist and miscellaneous writer, died 1851.

WARBURTON, JOHN, a heraldist and antiquarian, author of 'Vallum Romanum,' 1682-1759.

WARBURTON, WM., D.D., a distinguished bishop of the English Church, was born at Newark in 1698. Having acquired the elements of education at the grammar school of his native town, he served an apprenticeship to an attorney, and after the expiry of his term, opened chambers as a legal practitioner. Tiring, however, of the law, he turned his views towards the church, and was admitted to deacon's orders in 1723. The legal studies of his early life exercised a powerful influence in moulding his habits of thought as well as his treatment of controversial subjects: and to the non-professional course of his preparation for the church, must be ascribed that dislike to the routine of the regular discipline, and that pride he took in confounding the adherents to the beaten paths of theology, which formed one of the marked peculiarities in his character. Naturally of a strong, domineering temper, his arrogant dogmatism, united to great skill and power in wielding the weapons of dialectic controversy, led him into the propounding and supporting paradoxes, which with all his great learning and acknowledged excellencies, rendered him an unsafe guide. By the force of his natural and acquired talents, however, he rose to distinction in the church. In 1726, he obtained the vicarage of Greasley, and three years after, the rectory of Brant Broughton. During his residence in this latter place, he prepared several works for the press; the principal of which are—Inquiry into the Causes of Prodigies and Miracles, a Treatise on the Legal Judicature of Chancery, and some Translations. These were soon followed by other productions of a higher character—the Alliance between Church and State, which was first published in 1738, and the first volume of the Divine Legation, which appeared towards the close of the same year. Although both of these works contributed to establish his fame as a divine, it was not to either of them directly, but to another production of his able pen that he was indebted for his elevation to episcopal dignity. This was his 'Vindication of Pope's Essay on Man,' which not only introduced him to an acquaintance with that poet, but procured him the friendship of Mr. Allen of Bath, through whose influence he gained the patronage of the crown. He was successively appointed chaplain to the king, prebend of Durham, dean of Bristol, and bishop of Gloucester, in 1759. In the conduct of the controversial wars it was his delight and pride to carry on, the temper of Warburton often presented a sad contrast to the meekness of the Christian character. But with all these palpable defects, he was a man of sincere and habitual piety—of a tender conscience—of great benevolence, and a reigning zeal, which has rarely been surpassed, for the propagation of Christianity, as the greatest blessing to the human race. His death took place in 1779. [R.J.]

WARD, EDWARD, au. of 'The London Spy,' and of a poetic version of Don Quixote, 1667-1731.

WARD, BERNARD, an Irish economist, settled in Spain, and employed in the public service of that country, 1750.

WARD, JOHN, a learned writer, professor of

rhetoric at Gresham college, was the son of a dissenting minister, and was born in London 1679. He began life as an assistant schoolmaster, and having made himself known as a classical scholar and antiquary, was chosen professor in 1720; died 1758. His principal works are 'Lives of the Gresham Professors,' and 'A System of Oratory.'

WARD, ROBERT PLUMER, a miscellaneous and historical writer, best known as the author of 'Tremaine,' was born in London 1765. He commenced his professional career as a barrister, in 1790, and published his first work, an 'Inquiry into the Foundation and History of the Law of Nations in Europe,' in 1795. He entered parliament in 1802, and became under-secretary for foreign affairs in 1805; afterwards he was successively one of the lords of the admiralty, and clerk of the ordnance. He died in 1846, and the Hon. E. Phipps has since published his 'Memoirs and Literary Remains.'

WARD, SAMUEL, Margaret professor of divinity, known as a learned controversialist, died 1643.

WARD, SETH, bishop of Salisbury, eminent as a mathematician and astronomer, 1617-1689.

WARD, T., a Roman Catholic divine, 1652-1708.

WARDLAW, HENRY, founder of the university of St. Andrews; became bishop of that see in 1404, and was chiefly remarkable for his zeal in behalf of the Roman Catholic Church. He was a man of high character in other respects, but unscrupulous in his treatment of those he regarded as heretics, many of whom he sent to the stake. Died 1440.

WARDLAW, DR. RALPH, was born in Dalkeith, 22d December, 1779, a few months after which his family removed to Glasgow. Though bred in the principles of the Secession Church, he resolved to join himself to the Congregational party, and was, in 1803, ordained by his friend Mr. Ewing to be pastor in a chapel in Albion-Street: he afterwards removed to a larger place of worship in George-Street. In 1811 he was associated with Mr. Ewing as one of the tutors in the Theological Academy. Dr. Wardlaw acquired a high reputation as a theologian, and his professional merits were acknowledged by an honorary degree of D.D. His principal works are 'Discourses on the Socinian Controversy,' 'Sermons,' 'Man's Responsibility for his Belief,' 'Lectures Against Religious Establishments,' 'Lectures on the History of Joseph,' &c. He died 17th December, 1853, and his funeral was a public procession. [R.J.]

WARE, JAMES, an eminent oculist, died 1815.

WARE, SIR JAMES, called 'the Camden of Ireland,' author of works on the history and antiquities of that country, 1594-1666.

WARGENTIN, P. W., a Swedish astronomer, secretary to the Academy of Sciences, 1717-1783.

WARHAM, WM., archbishop of Canterbury and lord chancellor, was born at Okely, in Hampshire, 1460, and in 1475 admitted a fellow of New College, Oxford. His public life commenced in 1493, when Henry VII. sent him on an embassy to the duke of Burgundy; he became keeper of the great seal in 1502, but resigned this office in 1515, in consequence of the ascendancy of Wolsey, who succeeded him; died 1532.

WARING, EDWARD, professor of mathematics at Cambridge, author of an 'Essay on the Prin-

ciples of Human Knowledge,' 'Properties of Algebraic Curves,' and other works, 1734-1798.

WARMHOLTZ, CHARLES GUSTAVUS, a Swedish bibliographer, 1710-1784.

WARNER, FERDINANDO, a doctor and clergyman of the Church of England, author of a great number of works, theological, biographical, and historical, 1703-1768. JOHN, his son, a writer on prosody, and translator of the history of 'Friar Gerund,' from the Spanish.

WARNER, JOHN, bishop of Rochester, distinguished for his learning and munificence, and as a royalist at the period of the rebellion, 1585-1666. Among his charitable works may be mentioned the foundation of Bromley College, for twenty widows of royal and orthodox clergymen, and four scholarships in Balliol College for young Scotchmen.

WARNER, J., an eminent surgeon, 1717-1801.

WARNER, RICHARD, a botanist, 1711-1775.

WARNER, WILLIAM, an English scholar and poet, mentioned among the early writers to whom we owe the refinement of our language, 1558-1609.

WARNERY, C. E., a French officer and writer on tactics, in the Polish service, 1719-1786.

WARREN, C., a steel engraver, died 1823.

WARREN, SIR JOHN BORLASE, an English admiral, employed in the expedition to Quiberon, destined to assist the Vendees, was born at the seat of his family at Stapleford, in Nottinghamshire, 1754. After the Vendean expedition he joined the Brest fleet under Lord Bridport, and distinguished himself in 1798 by capturing the French squadron sent to invade Ireland. On the conclusion of peace he became a privy councillor, and was sent as ambassador to Russia; died 1822.

WARREN, SIR PETER, vice-admiral of the red, was born in Ireland 1703, and won his laurels by the capture of Louisbourg, and the total defeat of a French squadron sent to recover it, 1745-1747. In the autumn of the last-mentioned year his popularity occasioned his return to parliament as member for Westminster; died 1752.

WARSEWITZ, C. STANISLAUS, a Polish statesman, historian, and Jesuit; died 1605.

WARTON, JOSEPH and THOMAS, were brothers, and very like each other in pursuits and mental character. They share with Bishop Percy the honour of having given the first perceptible impulse to that revolution in literary taste, which dethroned Pope and the Didactic school of poetry, and led poets and critics to a renewed study both of nature and of Old English literature. The Wartons have a place, likewise, among our minor poets; but in this character even Thomas possesses but small merit. They were sons of a clergyman, who was professor of poetry at Oxford, and afterwards a vicar in Hampshire. Joseph was born in 1722, and lived till 1800. Thomas, born in 1728, died in 1790.—Dr. Joseph Warton was the more active and independent thinker of the two; and students of the principles of criticism have, since his time, estimated, more justly than did his contemporaries, the value of his 'Essay on the Genius and Writings of Pope.' It was published, in separate parts, in 1756 (the same year with Percy's Reliques) and 1782. But Warton, a poor man during all the best period of his life, was diverted from systematic study and speculation by the toils of clerical duty, and after-

wards by those of teaching. He taught for nearly forty years in Winchester School, of which for twenty-seven years he was head master.—Dr. Thomas Warton, being content to remain in the celibacy of Trinity College, Oxford, was able to devote himself without interruption to his favourite pursuits. He held the professorship of poetry for the usual ten years from 1757; and in 1785 he was appointed poet-laureate and Camden professor of history. Besides writing a good deal of poetry, and several miscellanies and pieces of humour, he creditably edited Theocritus and one of the Greek Anthologies. But his really valuable efforts were made in the criticism of Early English literature. His earliest performance of this sort was the 'Observations on the Faerie Queene of Spenser,' published in 1752, and much enlarged in 1762. His great work, 'The History of English Poetry,' appeared in three successive volumes, in 1774, 1778, and 1781. He lived to write only a small portion of a fourth volume; and the work closes abruptly near the beginning of Elizabeth's reign. It is ill-digested, desultory, and often very loose in reasoning: it contains many serious gaps, and very many positive errors, in detail. But even its mistakes and deficiencies are fewer than we might have expected from the first pioneer in so rugged a field; and the value of the book makes it well worth the trouble which has been expended on it, in corrections and additions, by its recent editors, Price and Taylor. Its antiquarian learning is very great; the poetical taste of the author is remarkably fine; and the flowing and animated eloquence, which breaks out whenever the occasion permits, makes many parts of it as interesting as anything we have of the sort. [W.S.]

WARWICK, a famous baronial name in England; the principal of those who have borne it are —GUY OF BEAUCHAMP, commonly called Guy, earl of Warwick, a party to the league against Edward II., by which the favourite, Piers Gaveston, was beheaded, 1312. RICHARD, a favourite of Henry V., distinguished in the French wars, and regent in the time of his successor; died 1439. RICHARD NEVILLE, earl of Warwick, called the King Maker, slain at the battle of Barnet 1471. EDWARD, grandson of the latter, beheaded by Henry VII. 1499.

WARWICK, SIR PHILIP, secretary to Charles I., and member of the long parliament, author of a 'Discourse on Government,' and 'Memoirs of the King' 1608-1682.

WARWICK, VIBRAND VON, a Dutch navigator, who prepared the commercial relations between Holland and the Chinese in 1606.

WASER, ANNA, a Swiss painter, 1679-1713.

WASEE, GASPARD, a learned Swiss Orientalist and antiquarian, 1565-1625. His son, JOHN HENRY, a diplomatist, 1600-1669.

WASER, H., a Swiss minister and economist, author of 'Chronologie Diplomatique,' 1742-1780.

WASHINGTON, GEORGE, was born in Westmoreland in the state of Virginia, on the 22d of February, 1732. His father was affluent, but George received merely the ordinary education of the young American colonist of the day, which was always meagre, unless when the ambitious parents sent a son to the home country. He had, however, but scanty literary or artistic tastes,

and studied only the accomplishments which aided his practical views. Though it has been questioned if he knew any language but English, it is understood that he studied French after the responsibilities of command had fallen on him, for the purpose of holding communication with the auxiliaries sent from France to join the army of independence. On the other hand, his practical acquirements were precociously developed. When but sixteen years old he was employed in surveying the vast wilderness assigned to his connection, Lord Fairfax, in the district of the Allegany mountains. He pursued the profession of a surveyor, which in a country full of estates, utterly unknown in character and extent to their owners, was a lucrative one; and he is said to have thus obtained an unconscious training for his subsequent warlike operations by acquiring a minute acquaintance with some parts of the country, and a knowledge of the general characteristics of the whole. Before he was twenty years old he received an important command, as adjutant-general of one of the military districts into which Virginia was divided to resist the Indians, and his genius entitled him to more important command in the American war with France in 1754. In a mission across the frontiers to ascertain the objects of the French, he discovered by his extraordinary sagacity the views of aggrandizement which led ultimately to the destruction of French power in America. He distinguished himself in the war which then broke out, and as all this occurred before he was twenty-three years old, his history decidedly supports the theory that the faculty of the military commander is generally developed early in life. It is believed, indeed, that many of the early calamities of that war might have been obviated if veteran British commanders had paid more respect to the sagacity of the young Virginian. In 1759 he married Mrs. Martha Curtis, a widow. She brought considerable property to add to Washington's large estates, and for some years his hands were as full of business, in the management of private property and attendance on the provincial legislature, as they ever afterwards were when he was at the head of the Union. It was one of his peculiarities that he carried out small matters with the same articulate organization as large. He slurred over nothing, and his household books, of which fac-similes have been extensively circulated, would have stamped him as a pedantic trifler, had they not exemplified the same rigid adherence to system and accuracy of detail with which he subsequently organized the government of a great nation. He took an unnoticeable but active part in his own province, in the preparations for the assertion of independence. He was appointed one of the delegates from Virginia to the first general congress in 1774, and had the command of the independent companies of the state. Still, his position had never been brilliant or ever conspicuous, and it is perhaps the most remarkable instance of that common sense which characterized the revolution, that the supreme command of the army of independence should have fallen into his hands. He became commander-in-chief on 15th June, 1775. To give his history from that period until, after completing the task assigned to him, he resigned his command at the close of the year 1783, would be to give a history of the American

war of independence. It may be only generally remarked of his career, that it was almost to the conclusion a struggle not only against the British force, but the turbulence and factiousness of those who were influential in the new states and their army. It cannot be said that the brilliancy of his achievements gave him his great influence, for he was often beaten, and it was by taking advantage of what his troops learned in hardships and defeats, that he was at last able to accomplish the sagacious and deeply planned movement by which Cornwallis was surprised and found it necessary to surrender. He was inaugurated as the first president of the United States, on the 30th of April, 1789. How he presided at the organization of a new empire, and regulated the enthusiasts, or self-seekers, who struggled for their peculiar objects, is, like his military career, matter of history. On more than one occasion, if he could not with certainty have achieved life-long despotic power, he might have acquired the flattering title of king, but it was his great merit that he sought only as much power and greatness as enabled him to do his duty, and no more. He retired from public life in 1796, and died on the 14th of December, 1799, leaving a reputation without a stain. [J.H.B.]

[Tomb of Washington.]

WASMUTH, M., a Danish Orientalist, 1625-88.

WASSE, CORNELIA WOUTERS, Baroness Von, a female writer of Brussels, 1739-1802.

WASSE, JOSEPH, a native of Yorkshire, distinguished for his classical learning, 1672-1738.

WASSENAER, N. J., a Dutch physician and historian of Europe, died 1632.

WASSENBERG, EVERARD VON, a German historian of the reign of Uladislaus IV., b. 1610.

WATELET, CLAUDE HENRY, a French painter and etcher, author of several critical works on art of considerable value, 1718-1786.

WATERHOUSE, EDWARD, an English divine, known as a heraldist and miscell. writer, 1619-70.

WATERLAND, DANIEL, a learned divine, and dignitary of the Church of England, was born at Wasely or Walesly, in Lincolnshire, 1683, and died 1740. His principal works are of a contro-

versial character, written against Jackson and Tindal: a complete edition was published in 11 volumes 8vo, 1823, by Van Milderr.

WATERLOO, ANTHONY, a Dutch landscape painter and etcher; born about 1618, died 1662.

WATERLOO, G. B., a Latin poet, 1572-1597.

WATRELOS, LAMBERT, a priest of Flanders, author of a Chronicle of Cambray, 1110-1172.

WATS, GILBERT, an English scholar, d. 1657.

WATSON, DAVID, a learned Scotchman, best known for his version of Horace, 1710-1756.

WATSON, HENRY, a gallant East Indian officer and engineer, born at Holbeach about 1737. He distinguished himself at the siege of Belle Isle in 1761, and at the capture of Havannah 1762, but in a still more memorable manner by the works of Fort William; died 1786.

WATSON, JAMES, a Scotch printer, author of a History of the Art in Scotland, died 1722.

WATSON, JOHN, a minister of the Church of England, known as an antiquarian, and historical and miscellaneous writer, 1724-1783.

WATSON, RICHARD, bishop of Landaff, author of several learned works, was born at Heversham, near Kendal, in 1737. He first distinguished himself as a natural philosopher, and in 1764 succeeded Dr. Hadley as professor of chemistry at Cambridge; in 1771 he became professor of divinity. The theological works of Bishop Watson are, 'An Apology for Christianity, in a series of Letters addressed to Edward Gibbon, Esq.,' 'An Apology for the Bible,' in answer to Paine's Age of Reason, and many miscellaneous Tracts and Sermons. His philosophical works are chiefly on Chemistry. Died 1816.

WATSON, ROBERT, a Scottish historian and professor of the *Belles Lettres*, author of a 'History of Philip II.,' born at St. Andrews about 1730, died 1780. Mr. Watson began a History of Philip III., which was completed by Dr. Thompson.

WATSON, T., a nonconformist divine, d. 1690.

WATSON, T., a catholic prelate, died 1582.

WATSON, T., a song-writer, d. 1591 or 1592.

WATSON, SIR WILLIAM, a physician of London, eminent as a botanist and natural philosopher, especially for his skill in electricity; born in Clerkenwell 1715, died 1787.

WATT, JAMES, the author of improvements in the application of steam as a motive power which have identified his name with the steam engine. Directing the force of an original genius, early exercised in philosophical research, to the improvement of the steam engine, he enlarged the resources of his country, increased the power of man, and rose to an eminent place among the illustrious followers of science and the real benefactors of the world. Watt was born at Greenock, 19th January, 1736, the son of James Watt, twenty years town councillor, treasurer, and bailie of Greenock. Being even in infancy, says M. Arago, of a delicate constitution, the early education of James Watt was in a great measure of a domestic character. His ill health seems to have led him to the cultivation of his intellect with unusual assiduity. It is said that when only six years of age, he was discovered drawing geometrical figures on the hearth with chalk, and other anecdotes related of him justify the remark which was elicited by a friend on the above occasion that he was 'a by ord'nar' wean.'

When about fourteen years of age he made an electrical machine, and there is a curious anecdote related by M. Arago, to the effect that his aunt, Mrs. Muirhead, who did not entertain the same opinion as his father of the powers of the boy, upbraided him one evening at the tea table for what seemed to her to be listless idleness;—taking off the lid of the kettle and putting it on again; holding sometimes a cup and sometimes a silver spoon over the steam; watching the exit of the steam from the spout, and counting the drops of water into which it became condensed. With the increased light imparted by a knowledge of his subsequent career, the boy pondering before the tea kettle, will, as observed by his French enthusiastic biographer, be viewed as the great engineer pre-luding to the discoveries that were to immortalize him. In 1755, Watt went to London, and placed himself under Mr. John Morgan, mathematical and nautical instrument maker, in Finch Lane, whose business it would appear lay chiefly in making and repairing the instruments made use of in the experiments in mechanics and natural philosophy. Shortly after his return from London, about 1757, when Watt had scarcely attained his twenty-first year, he endeavoured to establish himself in business in Glasgow, but owing to his not being a burgess he met with opposition from the corporation of arts and trades, who refused to allow him to set up even the humblest workshop. To the great renown of the authorities of the university, which is not under city jurisdiction, Watt was offered an asylum within the precincts of the college, where he established a shop, and he was honoured with the title of mathematical instrument maker to the university. The great men of the day—Adam Smith, Dr. Black, Dr. Dick, Professor Anderson, kindly befriended young Watt, and the more intelligent students were his intimate companions. The revival of commercial and manufacturing enterprise in Britain had about this time directed attention to steam as a motive power. As early as 1761 or 1762, Watt made some experiments on the force of steam. But the event to which his invaluable discoveries may be most distinctly assigned took place in the session of 1763-64, when Professor Anderson sent him a model of Newcomen's steam engine to repair. He soon repaired the model, which exists to this day in the museum of the natural philosophy class. While working at these repairs, he was led to detect the imperfections of the machine itself, and to investigate those properties of steam upon which its action depends. About this time he left the college and took up his abode in the town previous to his marriage with his cousin, Miss Miller, the daughter of a 'freeman,' in the summer of 1764. It is not possible to enter here on the nature of Watt's improvements in the steam engine, or to estimate their economical advantages; we must refer to treatises on the steam engine for information on these points. Suffice it here to say, that Watt's invention of a separate condenser, and the necessary modifications of the arrangements of the mechanism of the engine, were in their main features completed as early as 1765. In 1768, the first patent was applied for, and obtained 5th January, 1769. Dr. John Roebuck, the founder of Carron Iron Works, who had aided Watt in pre-

paring his third working model, was a sharer in this patent. Roebuck's affairs got embarrassed in the summer of 1769, and Watt was for the time deprived of the means of prosecuting his inventions. He dedicated himself, however, with great credit to general engineering and surveying during the interval which elapsed before the opportunity presented itself of his finally devoting himself to the carrying out of his improvements in the steam engine. It was while engaged in the greatest engineering work undertaken by him, the surveying and estimating a line of canal between Fort William and Inverness, since executed by Telford on a larger scale than was then proposed, that Watt, in 1773, having been bereaved of his wife, determined to accept an invitation from Matthew Boulton, the founder of Soho, to settle in England. Watt's connection with Boulton commenced early in the year 1774, and they remained in partnership till 1800, when Watt retired from business, but their friendship continued undiminished until Boulton's death. Of the spirited manner in which Boulton conducted the mercantile department of the establishment, some idea may be formed from the fact, that upwards of £47,000 was spent before the patentees began to receive any returns; but at length their remuneration began to pour in, and in no scanty stream. In Cornwall and other mining districts, especially where coal was not abundant, the new engines speedily replaced the old; but down to 1794 the introduction of the steam engine into other three mining districts had been comparatively slow, and it has been stated, that at the expiration of the patent the aggregate power of the engines employed in London was not more than 650 nominal horse power; in Manchester about 450 horse power, and in Leeds about 300 horse power. As above alluded to, a volume would not suffice to exhaust Watt's professional biography, and we must leave our readers to inquire into this elsewhere. Of the private character of the great engineer a most pleasing account is given by Lord Jeffrey, who observes: 'Perhaps no individual in this age possessed so much and so varied exact information, had read so much, and remembered what he had read so accurately and well. He had infinite quickness of apprehension, a prodigious memory, and a certain rectifying and methodizing power of understanding, which extracted something precious out of all that was presented to it.' In social conversation he allowed his mind, like a great cyclopædia, to be opened up on whatever subject might best suit the taste of his associates; and he made everything so plain, clear, and intelligible, that, it is remarked, scarcely any one could be conscious of any deficiency in their own capacity in his presence.—Of a generous and affectionate disposition, he was considerate of the feelings of all around him, and gave the most liberal assistance and encouragement to all young persons who showed indications of talent, or who applied to him for patronage and advice. As his death approached, he was perfectly conscious of his situation, and calm in the contemplation of it, expressing his thankfulness for the length of days with which he had been blessed. He died at Heathfield, near Soho, Birmingham, on the 25th August, 1819. He was fellow of the Royal Societies of London and Edinburgh; correspondent of the French Insti-

tute, and an LL.D. of Glasgow university. By public subscription a monument was erected to him in 1824 in Westminster Abbey, one of the best of Chantrey's works. The countenance of this statue has been characterized as the 'personification of abstract thought.' Other statues by Chantrey adorn George's Square, Glasgow, the University Museum, and the chapel at Handsworth, erected by Watt's only son, who survived him, and who is since dead. [L.D.B.G.]

WATT, ROBERT, a Scotch physician, author of professional works, and of the well-known index of British and foreign literature, entitled 'Bibliotheca Britannica,' 1774-1819.

WATTEAU, ANTHONY, an eminent French landscape painter, b. at Valenciennes 1684, d. 1721.

WATTS, ISAAC, D.D., was a native of Southampton, where he was born on 17th July, 1674. His father was a dissenter, and living at a time when nonconformity was a crime, he several times suffered heavy penalties, both by fine and imprisonment. Isaac early displayed a remarkable precocity; and his greatest delight while a mere child, consisted in reading simple story books. At the age of four he began to learn Latin, and at seven, had attracted no small attention by his talent for versifying. His proficiency in classical studies was so much above the average scholarship of school boys, that some wealthy individuals, desirous of encouraging so gifted a youth, offered to bear the expenses of his education at one of the universities, if his father would have consented to his entering the established church. Prevented by conscientious scruples from accepting this generous offer, the father placed Isaac at a dissenting academy, under the care of the reverend Mr. Rowe, an independent clergyman, eminent both for his piety and learning. At the age of twenty, his academic course was finished, but instead of commencing an active course of preaching, he resolved, with a rare exercise of humility, and distrust of his fitness for the pulpit, to return to his father's house, with a view of acquiring, during a season of religious retirement, those higher qualifications for the duties of the ministry, which no course of academic instruction, however extensive or varied, can supply. It was during this period that he first tried his poetic talents in the composition of sacred poetry; and so much were these sacred songs admired, that on their being collected and published in a little volume, they were unanimously adopted as the hymn-book of the independent chapel where his father worshipped.—After a retirement of two years under the paternal roof, he accepted an invitation from Sir John Hartopp, Bart. of Stoke-Newington, to undertake the office of tutor to his son. In this situation, he enjoyed ample opportunities for self-improvement; and while he was most conscientious in attending to the interests of his youthful charge, he pursued his own studies at the same time, with indefatigable industry; increasing his familiarity with the Hebrew and Greek Scriptures,—perusing the works of the most eminent biblical writers and divines,—forming abridgments of many, and endeavouring to digest his acquired knowledge by the methods he afterwards described in his 'Improvement of the Mind.'—In 1698, Watts entered upon the duties of the ministry, as assistant to Dr. Chauncey, pastor of the inde-

pendent church, Mark Lane, London; and on the death of that clergyman, was chosen to succeed him on 8th March, 1702. Under the auspices of this eloquent and fervid young preacher, the congregation rapidly increased, and continued for several years in the most flourishing condition, when an alarming illness, brought on by his vehement style of oratory, threatened to put a premature period to his life and usefulness. By due care and attention he recovered; but his physical energies were so much impaired, that he was obliged, first, to employ an assistant, to relieve him of some part of his ministerial duties; and then afterwards, on the recurrence of a violent fever, which gave a severe shock to his enfeebled constitution, he had, at his own desire, Mr. Price associated with him as colleague in the pastoral charge of his congregation. Compelled soon after to resign his public office, he went on a visit to the house of his friend, Sir Thomas Abney, knight and alderman, at Abney Park, Stoke-Newing-

[Abney Park, the residence of Isaac Watts.]

ton; and that visit, though designed at first to be for a few days, was prolonged to a residence of more than thirty years. In this hospitable mansion he received all the tender and assiduous attention which his infirmities required; and which were sweetened by the pleasures of cultivated society and Christian friendship. In 1728, the universities of Edinburgh and Aberdeen simultaneously conferred on him the honorary degree of Doctor in Divinity. Seldom has such a title been bestowed on one so worthy to receive it. Dr. Watts' range of knowledge was almost unbounded, and although theology was of course the chief subject of his study, he had mastered the whole circle of the sciences. Dr. Watts holds a respectable rank in the list of British poets. His poetry is chiefly of a devotional cast, and in regard to his hymns, Dr. Johnson has pronounced this high eulogium, 'That for children he condescended to lay aside the scholar, the philosopher, and the wit to write little poems, systems of instruction adapted to their wants and capacities.' Dr. Watts died on 25th November, 1748, in the seventy-fifth year of his age. [R.J.]

WAYNFLETE, WILLIAM OF, so called from his birth-place, in Lincolnshire, was the eldest son

of Richard Patten or Barbour. Commencing his distinguished career as head master of Winchester school about 1429, he became provost of Eton, then in course of foundation by Henry VI., 1442, bishop of Winchester 1447, and lord high chancellor 1456. He founded Magdalen College, Oxford, and, though a true Lancastrian, was highly honoured by Edward IV.; died 1486.

WEAVER. See WEEVER.

WEBB, F., an English writer, 1735-1815.

WEBB, P. C., an antiquarian, 1700-1770.

WEBBE, GEORGE, a native of Wiltshire, who became bishop of Limerick, and died in the castle of that town, where the rebels had imprisoned him, in 1641. He is the author of several religious works, the principal of which is entitled 'Practice of Quietness, directing a Christian to Live Quietly in this Troublesome World.'

WEBBE, SAMUEL, a great English musician and composer, was born in 1740. In his boyhood he was indentured to a cabinet-maker, but after the termination of his apprenticeship he devoted himself entirely to the study of music. At twenty-six years old he gained a gold prize medal for the best canon from the Catch Club, and from the years 1765 to 1792 he had no fewer than twenty-seven medals awarded to him from the same club for glees, canons, odes, and catches. It was for this club that Webbe composed the famous glee 'Glorious Apollo.' His compositions of the class mentioned amount to one hundred and seven. He composed, besides masses (he was a Roman Catholic) anthems, songs, &c., many of which are still sung. He died in 1817. [J.M.]

WEBBER, JOHN, an ingenious artist, who was appointed draughtsman in the last expedition of Captain Cook; born in London 1751, died 1793.

WEBBER, Z., a Dutch theologian, died 1697.

WEBER, ANANIAS, a German theologian, preacher, and controversial writer, 1596-1765.

WEBER, CARL MARIA VON, one of the greatest of German musicians, was born at Eutin in Holstein, in December, 1786. In 1797 he was taken to Salzburg and placed under the tuition of Michael Haydn, (brother of the illustrious composer), and here he published his first works. Soon after this he went to Munich, where he received lessons in singing from Valesi, and in composition from M. Kalcher, under whose supervision he wrote music for an opera 'The Power of Love and Wine.' In 1800 his opera the 'Wood Maiden' was brought out, in 1801 'Peter Schlemihl,' and soon after 'Rubezahl,' which afterwards appeared as the composition of Rode. In 1802 he set out on a professional tour through Germany, and in 1806 he went by invitation to Carlsruhe, where he produced several symphonies and concertos. At Darmstadt he composed his 'Abon Hassan,' and from 1813 to 1816 he was director of the opera at Prague. In 1822 he brought out at Berlin his greatest work, 'Der Freischutz,' which produced an immense sensation in the north of Germany, and wherever it was performed. It was put on the stage in London on the 23d of July, 1824. In November, 1823, Weber produced at Vienna his opera of 'Euryanthe,' and in 1825 he accepted from Mr. Charles Kemble the offer of £500 to compose an opera for the English stage. This opera was 'Oberon,' which was brought out at

Covent Garden theatre, conducted by Weber himself, on the 12th of April, 1826. Soon after unmistakable symptoms of pulmonary disease presented themselves, and the health of the great composer sank rapidly, and his illustrious career closed on the 5th of June, 1826, when he was found lifeless in his bed. He was buried in the Roman Catholic chapel, Moorfields, permission to inter him in St. Paul's cathedral having been refused on account of his religion. [J.M.]

WEBER, EMMANUEL, a German historian, poet, and jurisconsult, died 1726.

WEBER, G., a German *savant*, 1632-1698.

WEBER, HENRY WILLIAM, a miscellaneous writer and archaeologist, was born at St. Petersburg of German parents in 1783, and having been educated at Edinburgh and Jena for the medical profession, finally settled in Scotland as an author. His principal works are—'Metrical Romances of the Thirteenth, Fourteenth, and Fifteenth Centuries,' 'Explication of Northern Antiquities,' 'The Battle of Flodden Field,' and an edition of 'Beaumont and Fletcher.' Died 1818.

[Birth place of Daniel Webster.]

WEBSTER, DANIEL, was born at Salisbury in the state of New Hampshire, on the 18th of Jan., 1782. He was a child of the wilderness, and but for the New England system of education, which pushed, even then, the means of instruction into remote solitudes, he would never have been enabled to bring his great faculties to bear in public life. His acquirements were always scanty when compared to the great intellectual force with which he could apply them. He studied for the law in the joint capacity of attorney and barrister after the American fashion, and in 1807 removed from the obscure village of Bosceawen to a larger field of exertion in Portsmouth, the chief town of the state. He was a great forensic orator, and his career at the bar was connected with many leading cases of great public and constitutional interest. In 1812 he became a member of congress, and at once took up a marked, though not a popular position, as he was opposed to the policy of the war with Britain. In connection with this struggle he was thrown into a contest which, reappearing at intervals, occupied more or less a great portion of his legislative exertion. The necessities of the war first suggested large projects for creating a state bank, and an expansive currency, which were opposed by Webster as likely to nourish the American failing

of reckless speculation. His policy of watching and adjusting the currency frequently saved the United States from monetary danger, and a remarkable instance of his wise strictness occurred, when by his exertion the payment of revenue in district paper, ever fluctuating, and sometimes 25 per cent. under its nominal value, was abolished, and payments required in States currency. When the question of the rechartering of the bank came back for discussion in 1832, he thought that changes in the constitution of the establishment, and in the wealth and population of the country, justified the measure, and he was ranged among its supporters. In 1826 he became a member of the senate, and was rechosen in 1833. From that time he filled for nearly twenty years the state offices nearest to the highest. That he should have been president, was the natural expectation of other nations, and his disappearance from the scene without having reached that distinction, is one of the instances which show that the Americans, perhaps wisely, are jealous of seeing very clever men in that powerful position. Webster died at Boston on the 24th of October, 1852. [J.H.B.]

WEBSTER, JOHN, an Engl. dramatist, 17th c.

WEBSTER, NOAH, the famous American lexicographer, was born in 1758, at West Hartford, and was descended from one of the earliest English settlers in that colony. Having studied for the law he was called to the bar in 1781, and devoted the whole remainder of his life to literary and professional avocations. Besides his 'Dictionary of the English Language,' a work of amazing industry and research, he wrote 'Sketches of American Policy,' 'The Grammatical Institute,' and other works. He also conducted one of the daily papers of New York. Died 1843.

WEBSTER, THOMAS, a native of the Orkneys, known as professor of geology in the London University, and a writer on that science, 1773-1844. His 'Encyclopædia of Domestic Economy' may be considered the result of his acquaintance with Count Rumford, in whose researches he participated.

WEBSTER, WILLIAM, an English divine, editor of the Life of General Monk, &c., 1689-1758.

WECKERLIN, G. R., a German poet and political negotiator, 1584-1651.

WECKHERLIN, G. L., a publicist and miscellaneous writer of Wirtemberg, 1739-1792.

WEDDERBURN. See ROSSLYN.

WEDEL, C. H., a Prussian general, 1712-1782.

WEDEL, GEORGE WOLFGANG, a German physician and writer of many learned works, 1645-1721. His son, STEPHEN HENRY, a physician, 1671-1709. J. ADOLPHUS, brother of the latter, same profession, 1675-1748. JOHN WOLFGANG, of the same family, a learned botanist, 1708-1757.

WEDGWOOD, JOSIAH, famous for his improvement of the English pottery manufacture, was born at Newcastle-under-Lyne, where his father was engaged in that branch of business, in 1730. He was well versed in natural philosophy, and produced his valuable results after numerous experiments upon the various kinds of clay and colouring substances, joined to a taste for art. He was the benefactor of his country in many other important matters, more especially in the promotion of the grand trunk canal, engineered by Brindley, and of a road through the potteries, died 1795.

WEENINX, or WENIX, J. B., a Dutch painter, remarkable for the versatility of his powers, 1621-1660. His brother, JOHN, who excelled in hunting pieces and still life, 1644-1719.

WEERDT, ADRIAN DE, a Flemish landscape painter, flourished at Brussels, 16th century.

WEERDT, SEBALD DE, a Dutch navigator, who was killed at the isle of Ceylon 1603.

WEEVER, or WEVER, JOHN, an industrious antiquarian, supposed to have been born in Lincolnshire in 1576, died 1632. His work is the well-known 'Funeral Monuments of Great Britain,' originally published in 1631.

WEGELIN, JAMES, a native of St. Gall, author of a 'Universal History,' and of a 'Memoir on the Philosophy of History,' 1721-1793.

WEICHMANN, C. F., a German writer, author of 'The Unedited Poetical Productions of the Most Celebrated Writers of Lower Saxony,' died 1769.

WEIDLER, J. F., a Germ. astron., 1691-1755.

WEIGEL, CHRISTIAN EHRENFRIED, a German physician, distinguished as a botanist, last century.

WEIGEL, ERHARD, an eminent German astronomer and mathematician, 1625-1699.

WEIGEL, V., a German theologian, 1533-1588.

WEILLER, G., a German philosopher, d. 1826.

WEIMAR, ANNE AMELIA, duchess of, daughter of the duke of Brunswick, distinguished by her patronage of literature, died 1807.

WEINBRENNER, FREDERIC, a German architect and friend of Lavater, distinguished as a man of taste and writer on science, 1766-1826.

WEINREICH, V., a German *savant*, 1552-1622.

WEISE, C., a German writer, 1642-1708.

WEISHAUP, ADAM, a famous name in the history of secret societies, was a professor of canon law in the university of Ingolstadt. He was born in 1748, and educated among the Jesuits, quarrelling with whom caused him to propose a counter association of the good and enlightened of all nations. The society organized in pursuance of this design, began working in 1776, and was finally known as the Society of *Illuminati*. In its foundation, an endeavour was made to combine all the working advantages and most striking symbols of Freemasonry and Jesuitism; from the latter, its statutes of implicit obedience, and its espionage was derived; from the former its order and ritual, but modified by the revolutionary ends which its leaders really proposed. This society was suppressed by the elector of Bavaria in 1783, and Weishaupt, quitting Ingolstadt, went to Gotha, where he was honoured with the dignity of Aulic counsellor. He died in 1822, and left several works illustrating the history of the *Illuminati*, and his views concerning the progress of society, and 'Moral Perfectionability.' The Abbe Barruel and Professor Robison wrote exaggerated reports of this and the many similar movements of the period. See further in the article SAINT MARTIN. [E.R.]

WEISS, F. R., a Swiss statesman, 1751-1802.

WEISSE, CHRISTIAN FELIX, a miscellaneous German writer and dramatic poet, author of several successful plays, and of songs and odes which are highly spoken of by the German critics. Weisse likewise acquired great popularity as a writer of works for youth, 1726-1804.

WEITZ, J., a Prussian philologist, 1576-1642.

WELCHMAN, EDWARD, a digitary of the

church, author of an 'Illustration of the Thirty-Nine Articles,' and a 'Defence of the Church of England,' 1665-1739.

WELD, THOMAS, an English cardinal, whose father, of the same name, was founder of the Roman Catholic college at Stoneyhurst, 1773-1837.

WELDON, JOHN, an organist and distinguished composer of cathedral music, died 1736.

WELLER DE MOLSDORF, JEROME, a German theologian, distinguished for his piety and his connection with Luther, 1499-1572. JAMES, of the same family, an Orientalist and theologian, author of a Greek Grammar, 1602-1664.

WELLESLEY, RICHARD COLLEY WELLESLEY, marquis of, was born at Dublin on 20th June, 1760. He became in youth a very accomplished scholar and gave in early life greater promise of distinction than his renowned brother the duke of Wellington. He was an active member of the Irish House of Lords until the union, and at the same time had a seat in the English Commons. He was brought first into notice by his views on the regency question, which pleased George III. He received a British peerage as Baron Mornington, and the Irish title of marquis of Wellesley. It was in the year 1797 that the career in which he was destined to shine, was opened to him by his appointment as governor-general of India. It seemed at first no favourable prognostic of his career that just after the calamities which had occurred from intrusting a royal duke with the command for which he was unfit, and while a repetition of the same mistake was producing its fruits under the brother of the prime minister, Wellesley passing over veteran officers who had performed great achievements, should intrust high command to his young brother, Arthur. Whether fortuitous or wisely calculated, the result was fortunate for the British rule in India at a very critical time. The government of Wellesley and his brother's victories form the second great epoch after the operations of Clive and Hastings in the acquisition of the British Indian empire. Though he desired to return earlier, he was prevailed on to remain governor-general until the year 1803. He held several offices after his return, and was from 1821 to 1828 governor-general of Ireland. He died on 20th December, 1842. [J.H.B.]

wards duke of Wellington, was born at Dangan Castle in Ireland, on May 1, 1769.—Marshal Ney, Goethe, and several of the greatest men of the age were born in the same year. His father was Lord Mornington, an Irish nobleman, but he was of Norman blood, being lineally descended from the standard-bearer to Henry II. in his conquest of Ireland in the year 1100. His elder brother, who succeeded to the family honours, was a man of great genius and capacity, who afterwards became governor-general of India, and was created Marquis Wellesley. Thus the same family had the extraordinary fortune of giving birth to the statesman whose counsel and rule preserved and extended our empire in the Eastern, and the hero whose invincible arm saved his country and conquered Napoleon in the Western world. Young Arthur Wellesley, after having received the elements of education at Eton, was sent to the military school of Angers in France to be instructed in the art of war, for which he already evinced a strong predilection. He received his first commission in the army in the 33d regiment, which to this day is distinguished by the honour then conferred upon it. The first occasion on which he was called into active service was in 1793, when his regiment was ordered abroad, and formed part of the British contingent, which marched across from Ostend under Lord Moira, to join the allied army in Flanders. He bore an active part in the campaign which followed, and distinguished himself so much in several actions with the enemy, that though only a captain in rank, he came at length to execute the duties of major, and did good service in several well-fought affairs of the rear guard in which he bore a part. Though the issue of the campaign was unfortunate, and it terminated in the disastrous retreat through Holland in 1794, yet it was of essential service in training Wellesley to the duties to which he was hereafter to be called, for it was with an army at one time mustering 90,000 combatants that he had served; and his first initiation into the duties of his profession was with the great bodies which he was afterwards destined to command, and his first insight into war was on a great scale, to which his own achievements were one day destined to form so bright a contrast. After the return of the troops from Holland, the 33d regiment was not again called into active service till 1799, when it was sent out to India, to reinforce the troops there on the eve of the important war, in which Lord Wellesley, his elder brother, who was now governor-general, was engaged with the forces of Tippoo Saib. Young Wellesley went with them, and on his way out his library consisted of two books, which he studied incessantly, the Bible, and Cæsar's Commentaries. On landing, his regiment, of which he had now become lieutenant-colonel, was so conspicuous for its admirable discipline and the perfection to which the commissariat and all the arrangements connected with it had been brought, that it was specially noticed by General Harris, the commander-in-chief. Previous to the assault of Seringapatam, Tippoo Saib's capital, Wellesley was intrusted with the command of a nocturnal attack on an outwork which proved unsuccessful, from the troops missing their way in the dark and getting into a deep water-course which proved to

[Dangan Castle, the birth place of Wellington.]

WELLINGTON. ARTHUR WELLESLEY, after-

be impassable. General Baird, however, the second in command, gave him next day an opportunity of renewing the attack, which he did with entire success. His regiment was not engaged in the assault which followed on May 4, when the town was taken; notwithstanding which, he was next day appointed governor of it, a promotion obviously done to gratify the governor-general, and deservedly felt as an undeserved slight by the gallant hero who had conducted and headed the assault. Whatever opinion may be formed on the merits of this appointment, one thing is perfectly clear, that Col. Wellesley immediately gave decisive proof of his entire adequacy to the discharge of the important duties to which he was called. Seringapatam was soon put in a respectable position of defence, the disorders consequent on the storm arrested, and the administration of the new dominions acquired for the Company put on the best footing. Ere long he was called to more active duties. Doondiah Waugh, a noted freebooter, having collected 5,000 horse, the wreck of Tippoo's forces, had renewed the war in the upper provinces, and was levying contributions in all quarters from the inhabitants. Col. Wellesley, upon this, put himself at the head of 1,400 horse, partly European and partly native, with which he pursued the Mysore chief. After undergoing incredible fatigues he at length succeeded in coming up with him and bringing him to battle. The result was soon settled, Doondiah was defeated and slain, and the first intelligence his partizans received of his death, was by seeing his dead body brought back lashed to a galloper gun. On this occasion, Col. Wellesley charged the Mysore horse in person at the head of the British dragoons. This brilliant achievement was the prelude only to still more important achievements. War having broken out in 1803 between the East India Company and the Mahrattas, General Wellesley, to which rank he had now been promoted, received the command of one of the armies destined to operate against them. After having stormed the strong fortress of Ahmednagur, which lay on the road, he came up with the Mahratta force, 30,000 strong, posted at the village of ASSAYE. Wellesley's forces, at the moment, did not exceed 4,500 men, of whom only 1,700 were European; and the half of his army, under Col. Stevenson, was at a distance, advancing by a different road, separated from his own by a ridge of intervening hills. But justly deeming the boldest course in such critical circumstances the most prudent, he took the resolution of instantly attacking the enemy with the small body of men under his immediate command. The result showed the wisdom as well as heroism of the determination. After a desperate struggle, in which he himself charged a Mahratta battery at the head of the 74th regiment, the vast army of the enemy, which comprised 18,000 splendid horse, was totally defeated, all their guns, 97 in number, taken, and their army entirely dispersed. It need hardly be said that this great victory had a material effect in breaking the power of the Mahrattas, and compelling them to conclude a most glorious peace, which closed Marquis Wellesley's administration. General Wellesley was made a Knight of the Bath for this victory, and he returned to England Sir Arthur

Wellesley. His next employment was at the expedition under Lord Cathcart to Copenhagen, in 1807, on which occasion he commanded a division of the army. He was not engaged in the siege, but commanded a corps which was detached against a body of Danes, 12,000 strong, who had collected, in the rear of the British force, in the island of Zealand. They were dispersed without much difficulty by a body of 7,000 men under Sir Arthur Wellesley. After the fall of Copenhagen he returned to England, and was nominated soon after to the command, in the first instance, of an expeditionary force of 10,000 men, which was fitted out at Cork, to co-operate with the Portuguese in rescuing their country from the tyrannic grasp of the French emperor. It was intimated to him, however, that Sir Harry Burrard and Sir Hew Dalrymple would, as soon as they arrived, supersede him in the command; and his friends urged him not to accept a subordinate command after having commanded great armies in the East. But Sir Arthur replied in a noble spirit:—"I have, as we say in India, eaten of the king's salt; and I will serve his majesty in whatever situation he may be pleased to place me, be it supreme or inferior." The expedition set sail in June, 1808, and landed on the coast of Portugal, when they were soon assailed by General Junot, who had marched out of Lisbon, with 19,000 men, to drive him into the sea. The British force consisted of 16,000, and, as this was the first time the troops of the rival nations had met in the peninsula, great interest was attached to the conflict. The French were defeated after a sharp action; and Sir Arthur had made preparations to follow up his victory by marching the same evening to Torres Vedras, where he would be between Junot and Lisbon, and would either drive him to a disastrous retreat or force him to surrender. But at this critical moment, when the order had just been despatched for this decisive movement, Sir H. Burrard arrived and took the command.—He belonged to the old school, with whom it was deemed enough to fight one battle in one day, and he gave orders to halt. Junot, in consequence, hastened back to Torres Vedras, without losing an hour, and regained the capital. Sir H. Dalrymple soon afterwards arrived and concluded the famous convention of Cintra, by which the French evacuated the whole of Portugal. That convention excited unbounded indignation in England at the time; but Sir A. Wellesley justly supported it, for, when the opportunity of cutting off Junot from Lisbon had been lost, it was the best thing that could be done. Next year, still more operations were undertaken. Sir Arthur, who had now been appointed to the sole command of the army in Portugal, landed at Lisbon on April 4, and by his presence restored the confidence which had been much weakened by the disastrous issue of Sir John Moore's campaign in the close of the preceding year. His first operation was to move against Marshal Soult, who had advanced to Oporto, with 20,000 men, and taken that city. By a bold movement he effected the passage of the Tagus, under the very guns of the enemy, and drove the French to so rapid a retreat, that he partook of the dinner which had been prepared for Marshal Soult! The French general, by abandoning all his guns and baggage, effected his

retreat into Galicia, but not without sustaining losses as great as Sir John Moore had done in the preceding year. He next turned towards Spain, and having effected a junction with the Spanish general, Cuesta, in Estramadura, their united forces, 60,000 strong, but of whom only 20,000 were English and Portuguese, advanced towards Madrid. They were met at Talavera by King Joseph at the head of 45,000 of the best French troops in Spain. A desperate action of two days' duration ensued, which fell almost entirely on the English and Portuguese, as the Spaniards, who were 38,000 in number, fled at the first shot. The French were in the end defeated with the loss of 8,000 men and 17 guns; but the fruits of victory were in a great measure lost to the English by the arrival of Marshals Soult, Ney, and Mortier, with the whole forces in the provinces of Galicia, Leon, and Asturias in their rear, which forced them to retreat to the Portuguese frontier. But one lasting good effect resulted from this movement, that these provinces were liberated from the enemy, who never after regained their footing in them. The year 1810 witnessed the invasion of Portugal by a huge French army, 80,000 strong, under Marshal Massena, which, after capturing the fortresses of Ciudad Rodrigo, and Almeida, penetrated into the very heart of that country. Sir Arthur, who had now been created Viscount WELINGTON, had only 35,000 men under his command, with which, it was impossible to prevent the fall of those fortresses. But he took so strong a position on the ridge of Busaco that he repulsed, with great slaughter, an attack upon it by two corps of the French army, and when at length obliged to retire, from his flank being turned after the battle was over, he did so to the position of *Torres Vedras*, thirty miles in front of Lisbon, which, by the advantages of nature and the resources of art, had been rendered impregnable. Six hundred guns were mounted on the redoubts, which was defended by 60,000 armed men. After wasting five months in front of this formidable barrier, the French general was forced to retreat, which he did closely followed by Wellington to the Spanish frontier. There Massena turned on his pursuer, and he re-entered Spain with a view to bring away the garrison of Almeida, which was now invested; but he was met and defeated at Fuentes d'Onore by Wellington, and forced to retire without effecting his object to Ciudad Rodrigo. The remainder of the year 1810 and the whole of 1811 passed over without any very important events, although a desperate battle took place in the latter year at Albuera, where Marshal Soult was defeated with the loss of 7,000 men by Marshal Beresford, in an attempt to raise the siege of Badajoz, which Wellington was besieging. He was compelled to desist from that enterprise after he had made great progress in the siege by a general concentration of the whole French forces in the centre and south of Spain, who advanced against him to the number of 60,000 men. But, though Wellington withdrew into Portugal on this occasion, it was only soon to return into Spain. In the depth of winter he secretly prepared a battering train, which he directed against Ciudad Rodrigo, when Marmont's army, charged with its defence, was dispersed in winter quarters, and after a siege of six

days, took it by storm in January, 1812. No sooner was this done than he directed his forces against Badajoz, which he also carried by storm, after a dreadful assault, which cost the victors 4,000 men. Directing then his footsteps to the north he defeated Marmont with the loss of 20,000 men in killed, wounded, and prisoners, near Salamanca; and advancing to Madrid, he entered that capital in triumph, and compelled the evacuation of the whole of the south of Spain by the French troops. He then turned again to the north, and advanced to Burgos, the castle of which he attempted to carry, but in vain. He was obliged again to retire, by a general concentration of the whole French troops in Spain, 100,000 strong, against him, and regained the Portuguese frontier after having sustained very heavy losses during his retreat. The next campaign, that of 1813, was a continual triumph. Early in May, Wellington, whose army had now been raised to 70,000 men, of whom 40,000 were native English, moved forward, and driving everything before him, came up with the French army of equal strength, which was concentrated from all parts of Spain in the Plain of VITTORIA. The battle which ensued was decisive of the fate of the peninsula. The French, who were under King Joseph in person, were totally defeated with the loss of 156 pieces of cannon, 415 tumbrils, their whole baggage, and an amount of spoil never before won in modern times by an army. The accumulated plunder of five years in Spain was wrenched from them at one fell swoop. For several miles the soldiers literally marched on dollars and Napoleons which strewed the ground. The French regained their frontier with only one gun, and in the deepest dejection. St. Sebastian was immediately besieged and taken after two bloody assaults, Pampeluna blockaded, and a gallant army, 35,000 strong, which Soult had collected in the south of France to raise the blockade, defeated with the loss of 12,000 men. Wellington next defeated an attempt of the French again to penetrate into France at St. Marcial, and following up his successes, crossed the Bidassoa, stormed the lines they had constructed on the mountains, which were deemed impregnable, and after repeated actions, which were most obstinately contested through the winter, drove them entirely from the neighbourhood of Bayonne, and completed the investment of that fortress, while Soult retired with 40,000 men towards Toulouse. Thither he was followed next spring by Wellington, who again defeated him at Orthes in a pitched battle, after which he detached his left wing, under Lord Dalhousie, which occupied Bourdeaux. The main army, under Wellington in person, followed Soult and brought him to action, in a fortified position of immense strength, on the heights of Toulouse. The battle took place four days after peace had been signed, but when it was unknown to the allies; it graced the close of Wellington's peninsular career by a glorious victory. Honours and emoluments of all kinds were now showered upon the English general. He received a field-marshal's baton from George IV. in return for Marshal Jourdan's taken on the memorable field of Vittoria; he was made a duke on the conclusion of the peace; received the thanks of both Houses of Parliament, and grants at different times to the amount of

£500,000 to purchase an estate and build a palace. He was chiefly at Paris during the year 1814 conducting the negotiations for peace; but on the return of Napoleon from Elba in March, 1815, he was appointed to the command of the united army of British, Hanoverians, and Belgians, 70,000 strong, formed in the Netherlands, to resist the anticipated attack of the French emperor. The French emperor was not long of making the anticipated irruption; on the 15th June, 1815, he crossed the frontier, and drove in the Prussian outposts, with 130,000 men. Next day he attacked the Prussians, under Blücher, with 80,000; and dispatched Ney with 30,000 against Wellington's army, which was only beginning to be concentrated. A desperate action ensued at Quatre Bras, in which the French were at length repulsed with the loss of 5,000 men; and, on the 18th, Wellington having collected all his forces at the post of Waterloo, gave battle to Napoleon in person, who was at the head of 80,000 men. His force was only 67,000, with 156 guns; whereas, the French had 250, and of these troops only 43,000 were English, and Hanoverians, and Brunswickers, who could be relied on, the remainder being Belgians, who ran away the moment the action was seriously engaged. Notwithstanding this great inequality, the British army maintained its ground with invincible firmness till seven o'clock, when the arrival of 50,000 Prussians, under Blücher, on Napoleon's flank, enabled Wellington to take the offensive. The result was the total defeat of the French army, with the loss of 40,000 men and 156 guns. Napoleon fled to Paris, which he soon after left, and surrendered to the English, and Louis XVIII. having returned to his capital: his dynasty, and with it peace, was restored. The allies having determined to occupy the frontier fortresses, with an army of 150,000 men during five years, the command of the whole was bestowed on the duke of Wellington; thus affording the clearest proof that his was the master mind which had come to direct the European alliance. This high and important situation he held for the next three years, during the whole of which time he discharged its arduous duties with the most consummate wisdom, justice, and discretion. Not only did he retain the entire confidence of the allied sovereigns and respect of their soldiers under his command, but he interposed in so efficacious a manner to lighten the enormous burdens laid by the treaty of Paris on France, as to earn the gratitude and receive the thanks of all well-informed persons in that country. Mainly owing to his powerful intercession the period of occupation of the fortresses was shortened from five to three years, and the amount of contributions paid for its support of course proportionally lessened. Wellington resigned his command, and with it his magnificent appointments in October, 1818, and returned to England, to the retirement of a comparatively private station, terminating thus a career of unbroken military glory by the yet purer lustre arising from relieving the difficulties and assuaging the sufferings of his vanquished enemies. In 1819 he was appointed commander-in-chief of the army, which situation he held during the whole anxious years which followed, and by his able and far-seeing arrangements, contributed in an essential manner

to bring the nation without effusion of blood through the long years of distress which followed. In November, 1827, he was, upon the dissolution of Lord Goderich's administration, appointed prime minister, which situation he held till displaced by a hostile vote of the House of Commons, on November 30, 1830, when the nation was convulsed by the passion for reform. This terminated his life as a political leader; but he was again appointed commander-in-chief some years afterwards, which situation he held till his death. The vigour of his intellect and sagacity of his counsels appeared in the uniform success which, during that period, attended the military operations in every part of the globe. He suppressed the Canadian revolt in 1837; faced, undismayed, the Afghanistan disaster in 1841; arrayed the forces which again led our standard in triumph to Cabul in 1842; brought the Chinese war to a successful issue; subdued the Sikhs and tribes of Scindia, and rooted out of their almost impregnable fastnesses the formidable Caffres of South Africa. During all this period his counsels, whether at the head or out of the cabinet, were uniformly directed to one object, the preservation of European peace, which, mainly owing to his exertions, was preserved unbroken, save by domestic tumult, for forty years after his crowning victory at Waterloo. And thus the most successful military commander which Europe has produced, put the key-stone to the arch of his fame, by directing his whole energies, after a brief period of energetic warfare, to the preservation of the blessings and cultivation of the virtues of peace. His long and honoured life, after having been prolonged beyond the usual period of human existence, at length drew to a close. He had, some years before his death, alarming symptoms in his head; so often the consequence of long-continued intellectual effort; but by strict abstemiousness and perfect regularity of life, he succeeded in subduing the dangerous symptoms, and he was enabled to continue and discharge his duties regularly at the Horse Guards till the time of his death, which took place on September 18, 1852, at the advanced age of eighty-three years. He was honoured with a public funeral, and buried in St. Paul's, in the most magnificent manner, beside Nelson. The queen and all the noblest in the land were there; a million of persons witnessed the procession, which went from the Horse Guards, by Apsley House, Piccadilly, and the Strand, to St. Paul's, and not a head was covered, and few eyes dry, when the procession appeared in the streets. Wellington was only once married. He left two sons, the eldest of whom succeeded to his titles and estates, the fruits of his transcendent abilities and great patriotic services. The leading feature of his intellect was wisdom and sagacity; of his moral character, a conscientious discharge of duty. In genius he was inferior to many, in foresight and just discrimination, to none. He was not gifted with the power of oratory, and had considerable difficulty in expressing his opinions; but such was the solidity of his judgment and the strength of his understanding, that what he said never failed to command attention, and, for the last twenty-five years of his life, he exercised an undisputed ascendancy in the House of Lords. In private life he was simplicity itself; his habits were regular, his life

abstemious; he was punctual in keeping appointments, and assiduous in the discharge of every duty. Without any habits of ostentation he could, on fitting occasions, exhibit a splendour becoming his rank; and his simple habits enabled him to bestow innumerable sums on deserving objects, and relieve the distresses of great numbers of his brethren in arms. Without asserting that he was free from all the failings common to the children of Adam, it may safely be affirmed that, as he was the greatest general recorded in British, and one of the greatest in European story, so he was one of the most immaculate characters which has adorned the annals of his country. [A.A.]

[Walmer Castle.]

WELLS, CHARLES WILLIAM, born of Scotch parents at Charlestown, in South Carolina, and settled as a physician in London, author of several physiological works, and of an *Essay on Dew*, the theory of which is now admitted, 1753-1817.

WELLS, E., a learned divine, 1664-1727.

WELLWOOD, SIR H. MONCREIFF, an eminent divine and pastor of the Scottish Church, 1750-1827.

WELLWOOD, THOMAS, a Scottish physician, author of *'Memoirs of English Affairs from 1588 to the Revolution,'* 1652-1716.

WELSCH, C. J., a German philologist, 1624-78.

WELSER. See **VELSER**

WELSTED, LEONARD, one of the heroes of Pope's *Dunciad*, known as a poet and miscellaneous writer, born in Northamptonshire 1689, died 1747.

WENCESLAUS, the name of several dukes and kings of Bohemia:—**WENCESLAUS I.**, duke, 907-936. **WENCESLAUS II.**, succeeded his uncle, Conrad, 1191, and was driven from the throne three months afterwards by Przemislas, died in prison 1194. **WENCESLAUS III.**, as duke, or the first as king, son of Przemislas Ottocar I., was born 1205, and associated in the government with his father in 1228. He began to reign alone in 1230, died 1253. **WENCESLAUS IV. or II.**, succeeded to the throne of Bohemia 1283, elected king of Poland in opposition to Uladislaus IV. 1300, and king of Hungary 1301. He ceded the latter dignity to his son, and died 1305. **WENCESLAUS V. or III.**, son of the preceding, became king of Hungary when twelve years of age 1301, and ceded that country to Otho IV., when his father's death called him to the government of Bohemia in 1305; assassinated

1306. **WENCESLAUS VI. or IV.**, king of Bohemia and emperor of Germany, was the son of the emperor Charles IV., and was born 1359. He succeeded to his father in 1378, but his cruelties and debaucheries desolated the kingdom and led, in 1394, to his deposition. This time he succeeded in re-establishing his authority, but in 1400 he was solemnly deprived of the title of emperor, and remained king of Bohemia only, till his death in 1419. It was towards the close of his reign that the wars of John Huss and Zisca broke out.

WENCESLAUS, duke of Saxony, succeeded his brother, Rodolph II., 1370, killed 1388.

WENDELIN, GODFREY, a German astronomer, geometer, and Latin poet, 1580-1660.

WENGIERSKI, ANDREW, the most celebrated of four brothers, rendered famous by their zeal for the spread of Socinianism in Poland, 1600-1649.

WENTWORTH. See **STRAFFORD**.

WENTZEL, J. C., a Ger. musician, 1659-1723.

WENZEL, C. F., a German chemist, 1740-93.

WEPPER, J. J., a German anatomist, 1620-95.

WEPPEN, J. A., a Ger. dramatist, 1742-1810.

WERDMÜLLER, JOHN RODOLPH, a Swiss landscape and flower painter, 1639-1668.

WERDUM, ULRICH VAN, a Dutch statesman and historical writer, died 1681.

WEREMBERT, a monk of St. Gall, distinguished as a Latin poet and musician, died 884.

WERNFELS, S., a German divine, 1651-1740.

WERF. See **VANDERWERFF**.

WERKMEISTER, ANDREW, a German composer and writer on music, 1645-1706.

WERNER, ABRAHAM GOTTLÖB, a distinguished mineralogist and geologist, was born at Wehlau in Upper Lusatia, in 1750. He died in 1817. His father was connected with an iron foundry, and the young Werner, having minerals given to him as playthings, became familiar with their names from his earliest childhood. He was educated in the school of mines at Freyberg in Saxony, and eventually became professor of mineralogy and inspector of the mineralogical cabinet there. He has conferred great benefit on the science of mineralogy by introducing a precise, methodical language, well adapted for the description of minerals, and has rendered much the same service to it as Linnaeus did by his *Terminology* to botany. As a geologist, he is the father of the Neptunian theory, and however liable he is to the charge of very grave errors, he has done vast good to the science by his causing it to be studied more systematically than it ever had been before. Few naturalists who have written as little as Werner, have enjoyed a higher reputation. As a mineralogist, the late Dr. Murray of Edinburgh used to prefer him to Haüy. As a geologist, Professor Jameson ranks him as one of the first that has ever appeared. His reputation appears to us of the present day much exaggerated. He lectured with great zeal, assiduity, and success; and though he has left few works behind him, he had the pleasure of seeing a host of ardent pupils rising around him, who by their writings and labours have extended his fame and spread a knowledge of the principles he taught throughout all Europe. A mineral has been named in honour of him, *Wernerite*. [W.B.]

WERNER, J., a Swiss painter, 1637-1710.

WERNER, PAUL VON, a Prussian general, distinguished at the battles of Prague and Breslau, 1707-1785.

WERNER, ZACHARIAS, the son of a professor at Königsberg, was born there in 1768. The ill-regulated life of this eccentric man of genius falls into two stages, surprisingly unlike each other. In the first, extending from his twenty-fifth year to his forty-third, he was, in alternate fits, a man of business, a dramatic poet, and a profligate: he obtained, and threw up, official appointments under the Prussian government: he married three times, and was three times divorced. In 1811 he became a Roman Catholic, received priest's orders, preached with great applause at Vienna during the Congress of 1814, and, in spite of extravagant oddities, was a popular orator in the pulpit till his death in 1823.—His Dramas have a gloomy impressiveness, both of magnation and passion, which (for some of us at least) it is difficult to resist; but they are full of coarse and hideous exaggeration, and of an ambitious mysticism with which he invests alike religion and history, human conduct and his hobby of freemasonry. In his works, indeed, as in the tenor of his life, there is much that can hardly be reconciled with the supposition of sanity. The most popular and least obscure of his works is his harrowing domestic tragedy, 'The Twenty-fourth of February.' In others he celebrates Attila, the Destruction of the Templars, and the Conversion of Pomerania by the Teutonic Knights. [W.S.]

WERNHER, JOHN BALTHASER, Baron Von, a German juriconsult and publicist, died 1742. His nephew, M. GODFREY, a jurist, 1716-1794.

WERNICKE, C., a German poet, died 1720.

WERNSDORFF, GOTTLÖB, and his son of the same name, distinguished as philologists, the former 1668-1729, the latter 1710-1774.

WERNSDORFF, E. F., a second son of the preceding, a learned historian of Syria, 1718-1782.

WESLEY, JOHN, great grandfather of the Methodist leader, was a clergyman of the Church of England, in the reign of Charles II. He received his education at New Inn, Oxford, and having distinguished himself by his piety, as well as his learning—especially his attainments in Oriental literature—he secured the favour and patronage of Dr. Owen, the vice-chancellor of the university. Having taken orders, he obtained the living of Blandford, in Dorsetshire, and was ejected for nonconformity. Continuing still to preach, he suffered imprisonment four successive times. His spirit being broken by the hardships and persecution to which he was subjected, he died at the early age of thirty-four, at the village of Preston; and such was the spirit of the times, that the authorities would not allow his body to be buried in the church of Preston. John Wesley married a niece of Thomas Fuller, the church historian. [R.J.]

WESLEY, SAMUEL, father of the celebrated clergyman of that name, was a minister of the Church of England, who held the livings of Epworth and Wroote, in Lincolnshire, in 1700. He was a devoted and very pious, as well as learned man. The country town over which he was appointed, was noted for profligacy and vice: and the zeal with which he performed his sacred duties was so offensive to many of the wicked inhabitants,

that they long meditated some plan of revenge. At length they set fire to the rectory. It was with the greatest difficulty the family were rescued, and the first act of the pious father on finding his children assembled in safety on the green before the blazing edifice, was to kneel down in the midst of the crowd, and give thanks to God for the deliverance. Mr. Wesley had some strong peculiarities of opinion; amongst which we may mention as the chief, that he was a most zealous advocate of the revolution. His wife was a violent partizan of the Stuart family: and this opposition of sentiment produced so much domestic discord, that Mr. Wesley left his family and parish for some years, till the reign of Anne brought about a reconciliation. On the accession of the Hanoverian family, the dissensions broke out afresh in the Epworth rectory, as Mrs. Wesley refused to acknowledge their right to the throne. And then there occurred an incident which produced an extraordinary sensation throughout the country in 1716, under the name of the Epworth ghost. It consisted of some strangely mysterious noises that were made when the family were at prayers, and especially when they came to the supplications for King George and the prince. It is now generally believed to have been a Jacobite trick, which the servants or neighbours resorted to, in order to frighten old Wesley from his political allegiance. Mr. Wesley was the author of several works both in prose and poetry. The principal of these were, a 'Life of Christ' in verse, 'The Histories of the Old and New Testaments' in verse, 'Elegies on Queen Mary and Archbishop Tillotson,' and 'Dissertations on the Book of Job.' He died April, 1734. [R.J.]

WESLEY, SAMUEL, son of the former, was born at Epworth, 1692. Although he was four years old before he could speak, he displayed great quickness and aptitude for learning,—distinguishing himself to a very uncommon degree by his classical attainments, first at Westminster, and afterwards at Christ Church, Oxford. From Christ Church he returned to Westminster, in the capacity of usher; and there took orders under the patronage of Bishop Atterbury. Having strongly imbibed his mother's political opinions, he assailed the administration of Sir Robert Walpole, with satirical abuse; and rendered himself so obnoxious to the ministry, that when the office of under-master became vacant, and he was proposed as in all respects well qualified to fill it, the appointment was refused. Finding promotion at Westminster hopeless, he accepted the mastership of Tiverton school. Samuel was a religious man, but of sound and sober judgment. He disapproved of much both in the sentiments and conduct of his brothers, and for many years they never met. He died in 1739, in firm and unalterable communion with the Church of England. [R.J.]

WESLEY, JOHN, the great founder of the Arminian branch of Methodists, was born at Epworth, Lincolnshire, on 17th June, 1703. His father, the rector of that place, was a man whose great piety and zealous administration of discipline excited against him the hostile feelings of his parishioners. Their malignity drove them to the wicked purpose of setting fire to the rectory at midnight, and little Johnny Wesley, then a very young boy, was literally plucked as a brand from the

burning. The domestic education he received was strictly of a religious character, and under the instructive influence of his mother especially, his heart was early imbued not only with the knowledge, but the fear of the Lord. Having received the elements of classical education at Charter House school, he was entered at the age of seventeen a student of Christ's Church, Oxford. While at that seat of learning, he became member of a private society consisting of a few young men of congenial piety, whose number amounted to fifteen, and who attracted great notice by the austerity of their manners and the fervour of their piety. Their meetings for social prayer and religious converse were held in Wesley's chambers—they formed the purpose of partaking of the communion together once, as well as fasting twice a-week. From these objects of personal improvement, they ere long directed their views towards the religious enlightenment of the poor; and for that purpose they divided the town into districts, each of the members charging himself with the voluntary duty of paying domiciliary visits and maintaining a religious superintendence of the sick and destitute inhabitants. The novelty of such proceedings exposed the young students to much satirical abuse, but they persevered through good report and bad report, while the ardour they displayed in the prosecution of their studies, together with the honours that most of them gained, disarmed the college authorities of all grounds to complain that they were spending their time in pursuits not strictly academic. On Wesley's completion of his university studies, steps were in the course of being taken by his friends to procure his appointment to be assistant and successor to his aged father in the parish of Epworth. But for conscientious reasons, he declined the offer, and determined to remain at Oxford to diffuse his religious principles amongst the students. In 1735, being in London for the settlement of some family matters, he received from the trustees of the new colony at Georgia an invitation to go out to that settlement as missionary. Having consulted their mother, who advised their acceptance of the offer, John and Charles Wesley embarked for the Georgian settlement on 14th October, 1735. Several of their Oxford associates accompanied them as labourers in the missionary field, and in consequence, being too numerous for that place, Charles with one friend repaired to Frederica, while John settled at Savannah. There he soon gathered a large congregation, which continued to flourish for some years, till his vigorous and precipitate measures of discipline raised such a storm of indignation amongst the people, that he was forced to resign. Returning to England, he settled in London, where he became acquainted with the famous Peter Böhler, to whom Wesley himself ascribes the honour of being the agent in his conversion to vital Christianity. The date of this marked change in his religious character and views he fixes on 24th May, 1738. Whitfield having about this time returned to England, Wesley joined his standard, and both commenced an active career of field-preaching at Bristol, where also the first methodist chapel was erected, in 1739. Wesley afterwards returned to London, where he performed regular public worship in a large building

in Moorfields, and that place, from its having been originally a foundry, was afterwards well known as the Foundry Church. Wesley's connection with Whitfield was broken by the irreconcilable difference of their views on fundamental articles of faith, he espousing Arminianism, while Whitfield was steadfast in his adherence to the Calvinistic system. The rupture between these two great leaders gave a shock to methodism, the effect of which remain to this day. But Wesley was a undaunted as he was indefatigable. He permeated the country, forming new congregations in many parts; and being now untrammelled by the fetters of old or traditionary usage, he employed the services of lay preachers. The leading feature of the ecclesiastical system he laboured to establish may be thus briefly described. The preachers were to itinerate, to depend on the gratuitous hospitality of friends to the cause, instead of being provided for by a fixed stipend—congregations were to be divided into classes—a vigilant inspection established over the morals of all—weekly meetings were to be held at which the members of any class might have an opportunity of expressing their wants or describing their religious state and feelings. He and his preachers, at the commencement of their itinerant labours, were exposed to maltreatment in a variety of ways, but they bore all annoyances, whether in the form of bodily injury or obloquy, with such fortitude and patience as ere long disarmed the violence of their opponents. Wesley was a man of eminent piety and devoted zeal, and yet in his character several blemishes appeared, the principal of which were ambition and vanity. He married late in life and from the violence and caprice of the lady's temper, he seems to have made a wrong choice for it proved an unhappy union. Wesley while preaching at Lambeth caught cold, which threw him into a fever, and his weakened constitution being unable to resist its ravages, he fell a victim to this malady on the 2d of March, 1791, in the eighty-eighth year of his age, and sixty-fifth of his ministry. [R.J.]

WESLEY, CHARLES, third son of Samuel, and brother of John Wesley, was born at Epworth April, 1708. While at Westminster school, an Irish gentleman of great fortune, of the name of Charles Wesley, though unknown to the family, wrote, proposing to make him his heir; and accordingly, for several years the expenses of his education were borne by his unseen namesake. In course of time, a gentleman, supposed to be this Irish patron, waited upon Charles, and urged the youth to accompany him, and take up his residence in Ireland. The family having left the young man to act according to his own discretion, Charles intimated his resolution to remain in England; in consequence of which, the inheritance destined for him was given to another, who taking the name of Wesley, or Wellesley, was the first earl of Mornington, and grandfather of the duke of Wellington. 'Had Charles made a different choice,' say Southey, 'there might have been no methodists—the British empire in India might still have been menaced from Seringapatam, and the undaunted tyrant of Europe might have continued to insult and endanger our shores.' Charles went with his brother John to Oxford, took an active

part in the meetings of their religious association at that university, and accompanied him on the missionary expedition to the Georgian settlement. At the Savannah, however, the brothers took different courses. Charles parted with his brother there, and in company with Ingham, one of his Oxford comrades, repaired to Frederica. The rigid discipline, however, he established at that settlement, disgusted the people; and although he laboured incessantly for their spiritual welfare, yet having pursued measures for which the people could only have been gradually reconciled, especially concerning the observance of Sabbath, and the rule of admission into communion with the church, he was at length obliged to leave. Charles returned to England, and having become acquainted with Peter Boehler, the Moravian, an entire change was produced on his religious views and feelings. He dated his *conversion* on 24th May, 1738: and that has ever been considered a remarkable day in the history of methodism. Having established himself in London, he preached for a while to large congregations in Blackheath: but disorders and confusion occurred there as formerly at Georgia, and Charles now commenced a course of itinerant preaching. While itinerating in Yorkshire, he was taken up, on suspicion of being a Jacobite, but having satisfactorily proved that he had merely used some scriptural expressions in a spiritual sense, without the remotest reference to the Pretender, he was acquitted. But this accusation tended to increase the obloquy under which the methodist leaders lay; and on several occasions, Charles and his friends were exposed to great trouble and danger. The history and public labours of Charles Wesley have been anticipated in the previous notice of his brother John. He married in the forty-first year of his age, Miss Sarah Guyne; and after this event, he gradually discontinued his itinerating, to perform the duties, and enjoy the comforts of domestic life. Latterly, his opinions differed considerably from those of his brother, especially regarding the evil tendency of the band-meetings, and other parts of the methodist discipline. Charles had a warm, poetical fancy, and wrote some beautiful hymns. He died in 1788. [R.J.]

WESSEL, JOHN, in Latin *Wesselus*, professor of philosophy and theology at Cologne, celebrated as an adversary of the Realists, and the forerunner of Luther, born at Groningen 1419, died 1498.

WESSELEY, HARTWIG, a Jew of Copenhagen, famous for his Hebrew poetry, moral treatises, and commentaries on the Bible, 1723-1805.

WESSELING, PETER, a distinguished German scholar and philologist, 1692-1764.

WEST, BENJAMIN, P.R.A., was born at Springfield in Pennsylvania, October 10, 1738. He commenced his career as a portrait painter at Philadelphia, he then removed to New York, and in 1760 visited Italy, where he remained about three years. In 1763 he visited England, and was induced to remain in this country, through the many valuable connections which he formed here. West was introduced to George III. by Dr. Drummond, the archbishop of York, and he was almost engrossed by the king from the year 1767 until 1802, when he lost the patronage of the court through the illness of the king. He then com-

menced his series of great religious pictures, to which he now chiefly owes his reputation. Of his earlier works, the 'Death of General Wolfe' is the most celebrated; in this picture he introduced the sensible innovation of dressing men in their own clothes; painters had previously as a rule, very absurdly used the Roman costume on all historic occasions, a custom not a whit less foolish than dressing the Greeks and Romans in the costume of modern times; the latter absurdity may indeed, at least, rest on the plea of ignorance of the real costume. To account for such a fact at present, as that Sir Joshua Reynolds should have endeavoured to persuade West to dress Wolfe in the uniform of a Roman general of 2000 years back, defies reason. West deserves the profoundest gratitude of posterity, if it be just to identify such a revolution from the absurd to the rational with his individual efforts. He succeeded Reynolds as president of the Royal Academy in 1792; he died March 11, 1820, in his eighty-second year, and was buried in St. Paul's. — (Galt, *Life and Studies of Benjamin West*. London, 1820.) [R.N.W.]

WEST, GILBERT, a nephew of Lord Cobham, distinguished as a poet and miscellaneous writer, was born in 1706, and in 1752 appointed clerk of the privy council, after which he became treasurer of Chelsea Hospital. His principal works are his original Poems, a version of Pindar, and Observations on the Resurrection. He was on intimate terms with Dr. Doddridge. Died 1756.

WEST, JAMES, a connoisseur in antiquities, whose collection of MSS. is now in the British Museum, president of the Royal Society from 1768 to his death in 1772.

WEST, R., a learned lawyer, died 1726.

WEST, THOMAS, a Jesuit of Lancashire, author of a 'History of Furness Abbey,' 1716-1779.

WESTALL, RICHARD, a famous water-colour painter and designer, was born in 1765, and apprenticed in London to an engraver of heraldry. He commenced his career as an artist in 1786, being then on intimate terms with Lawrence; and at the close of his life gave lessons to her present majesty, then Princess Victoria. His celebrity rests on his beautiful illustrations of Milton, Shakspeare, and Moore's Loves of the Angels. Died 1836. WILLIAM, his younger brother, also an artist, is distinguished by his numerous illustrations of the picturesque, supplied to the booksellers, and collected in his own tours, 1782-1850.

WESTERBAAN, JACOB, a Dutch priest, translator of the Psalms, and author of Poems, 17th c.

WESTERMANN, F. J., a French officer, distinguished in the army of Dumouriez and afterwards in La Vendée; executed with the Dantonists 1794.

WESTON, ELIZABETH JANE, an English lady settled at Prague in Bohemia, and ranked with the poets and Latin scholars of the 16th century.

WESTON, STEPHEN, an Oriental scholar, who became rector of Manhead, in Devonshire, but resigned his living to devote himself to literary pursuits, author of Translations from the Chinese and Persian, a Chinese Dictionary, and several other works in philology, 1747-1830.

WESTON, T., a comic actor, died 1776.

WESTON, W., a learned divine, died 1760.

WESTPHAL, E. C., a German jurist, 1737-92.

WESTPHAL, J., a Germ. theologian, 1510-71.
WETHERELL, SIR CHARLES, an eminent lawyer, who became attorney-general under the administration of the duke of Wellington, was born in 1770. At the period of the Reform Bill, he held the office of recorder at Bristol; and his opposition to that measure nearly cost him his life in the riots of 1831. His death, in 1846, was occasioned by concussion of the brain, produced by falling from his carriage.

WETSTEIN, JOHN RODOLPH, a Swiss magistrate, statesman, and writer on diplomacy, 1594-1666. The second of the name, son of the preceding, a theologian and classical scholar, 1614-1684. The third, son of the latter, a theologian and Greek scholar, 1647-1711. **JOHN HENRY**, a second son, a printer of classical editions, established at Amsterdam, 1649-1726. **C. ANTHONY**, son of John Henry, a Dutch scholar and poet, 1743-1797. **JOHN JAMES WETSTEIN**, a theologian and philologist, well known for his labours on the New Testament, was also a member of this family. His 'Prolegomena' to a new edition of the Greek Testament was published in 1730, and in 1751 the text itself was given to the world with every variation that he had discovered, and his critical remarks. Died in the sixty-first year of his age, 1754.

WETZEL, J. C. F., a Ger. Hellenist, 1762-1810.

WETZEL, J. G., a German writer, 1691-1755.

WEWITZER, R., a comic actor, 1748-1824.

WEYSE, CHRISTOPHER ERNEST FREDERIC, a famous musical composer, was born at Altona, in 1774, and died in 1842. He excelled chiefly in oratorios and sacred music; but he composed a vast number of songs, which became highly popular among the Swedish peasantry.

WEZEL, J. C., a German novelist, 1747-1800.

WHALLEY, PETER, an English critic and divine, author of 'An Essay on the Method of Writing History,' 'An Inquiry into the Learning of Shakspeare,' an edition of Ben Jonson, and a 'Vindication of the Evidences and Authenticity of the Gospel from the Objections of Lord Bolingbroke,' 1722-1791.

WHARTON, G., an Eng. astronomer, 1617-81.

WHARTON, HENRY, a learned divine, to whom we are indebted for valuable illustrations of our ecclesiastical history, 1664-1695.

WHARTON, THOMAS, an eminent physician and professional writer, b. in Yorkshire, 1610-73.

WHARTON, THOMAS, marquis of, eldest son of Philip, Lord Wharton, distinguished as a strenuous opponent of the court in the reigns of Charles II. and James II., and as a Whig statesman under the administration of Lord Godolphin; born about 1640, d. 1715. The revolutionary ballad of 'Lillibullero,' is attributed to him. His son, **PHILIP**, duke of Wharton, was an unprincipled politician, and turned about without scruple from the cause of the pretender to that of George I. He was a brave soldier, however, and wrote some poems and miscellaneous pieces which have been published. Died 1731.

WHATELY, W., a puritan divine, 1583-1639.

WHEARE, D., a Cornish historian, 1573-1647.

WHEATLEY, CHARLES, a vicar of Herefordshire, au. of 'A Rational Illustration of the Book of Common Prayer,' and other works, 1686-1742.

WHEATLEY, FRANCIS, a self-instructed por-

trait painter, who excelled also in the delineation of domestic scenes, 1747-1801.

WHELER, or WHEELER, SIR GEORGE, a scholar and divine of the Church of England, who was born at Breda in Holland, where his parents were living in exile, 1650. After travelling in Greece and Asia Minor he entered the church, and obtained some rich preferments; the chapel known by his name in Spitalfields was built at his expense on the estate belonging to him. His work consist of his 'Travels,' a highly valued production, 'The Protestant Monastery,' containing directions for the religious conduct of a family, and 'An Account of the Churches and Places of Assembly of the Primitive Christians.' Died 1724.

WHETHAMSHED, JOHN, an abbot and chronicler of St. Albans, who lived to be more than a hundred years old; ordained 1382, died 1464.

WHICHCOTE, BENJAMIN, a philosophical divine of great influence in his day, was born in Shropshire, 1610, and died at the house of his friend, Dr. Cadworth, in 1683. He belonged to what is called the Latitudinarian party. Besides his Sermons, we possess his 'Observations and Apophthegms,' published by one of his pupils in 1688 and 'Moral and Religious Aphorisms,' which appeared for the first time in 1703. His Sermon were first given to the world by the earl of Shaftesbury.

WHISTON, WILLIAM, well known as a divine and natural philosopher, was born at Norton in Leicestershire, where his father was rector, in 1667. Having taken orders he became chaplain to the bishop of Norwich, and in 1696 published his first work, entitled 'A New Theory of the Earth, from its Original till the Consummation of All Things.' In 1698 he became rector of Lowestoft in Suffolk and in 1703 succeeded Sir Isaac Newton as professor of mathematics, but seven years later, was expelled the university on a charge of Arianism. He published several other works, and among others a translation of Josephus, and his own Memoirs. Died 1752.

WHITAKER, EDWARD, a clergyman and schoolmaster of the Church of England, author of 'A General and Connected View of the Prophecies,' 'Family Sermons,' &c., born 1750.

WHITAKER, JOHN, a clergyman of Cornwall well known for his learned writings on antiquarian and historical subjects; born at Manchester about 1735, died 1808. Among his works are a 'History of Manchester,' 'Genuine History of the Britons Asserted,' 'The Origin of Arianism,' 'The Real Origin of Government,' 'Mary Queen of Scots Vindicated,' 'Course of Hannibal over the Alps,' 'The Life of St. Neot,' 'Histories of London and Oxford,' besides Sermons, Poems, and various critical papers.

WHITAKER, THOMAS DURHAM, rector of Whalley and Blackburn, author of several antiquarian works, and an edition of the Visions of Piers Ploughman, 1759-1821.

WHITAKER, WILLIAM, a Calvinistic divine of great eminence, born at Burnley, in Lancashire, 1547. He was an active party to the religious disputes of his age, and was called by Cardinal Bellarmine, the most learned heretic he had ever read. Died 1595.

WHITBREAD, SAMUEL, son of the eminent

brewer of that name, distinguished as a politician, was born in 1758, and was married in 1789 to Elizabeth, eldest daughter of the first Earl Grey. His career in parliament dates from 1790 to his death in 1815, and was marked by his impeachment of Lord Melville. He was a zealous Whig. He died in the year mentioned by his own hand.

WHITBY, DANIEL, a learned controversial divine, whose commentary on the New Testament is still held in high estimation, 1638-1726.

WHITE, JOSEPH BLANCO, a Spanish gentleman of Irish descent, who became convinced of the errors of popery at the age of fifteen, while being educated as a Roman Catholic priest. He came to England in 1810, and devoted himself to literature, chiefly through the magazines and periodical press, 1775-1841.

WHITE, REV. GILBERT, a good naturalist and pleasing writer, was born at Selborne in Hampshire, in 1720. He died in 1793. He was educated at Oxford; and was elected a fellow of Oriel College; took his degree of M.A., and was appointed one of the senior proctors of the university. He soon left Oxford, and possessing a quiet, unambitious disposition, a great love for the study of nature, and a particular attachment to the charms of rural scenery, he fixed his residence in his native village of Selborne. Nor could any offers which were made to him of settling upon a college living, tempt him from his beloved retreat, but here, in the enjoyment of competence and learned ease, he spent his days in serene tranquillity, beloved by his neighbours and in correspondence with many of the most learned antiquarians and naturalists of the day. In 1789 he published his *Natural History of Selborne*. The minute exactness of the facts contained in it, the good taste displayed in their selection, and the elegance and the liveliness with which they are described, render his work exceedingly interesting and instructive, and make it one of the most generally popular books on natural history ever written. It has gone through various editions, and still holds its popularity with all who can relish accurate descriptions of the habits of domestic animals, birds, and insects, by which they are surrounded. [W.B.]

WHITE, HENRY, a clergyman and literary character of Lichfield, died 1836.

WHITE, HENRY KIRKE, one of those many talents that have been extinguished prematurely, is deeply interesting on account of his early struggles and the amiability and piety of his character. If he had survived long enough for active usefulness, he might have been an invaluable clergyman; but it is difficult to believe that he would ever have been a distinguished poet. He was born in 1785, at Nottingham, where his father was a butcher. His zeal for study in boyhood was not damped, either by a succession of manual employments, or by the drudgery of an attorney's desk, at which he was by and by placed. Contributions to small periodicals encouraged him to print, in 1803, a volume of poems, which was severely reviewed, but made him favourably known to Southey and other men of eminence. His religious opinions and feelings had now taken a very serious turn; and Mr. Simeon, with the aid of his friends, procured for him a sizarship in St. John's College, Cambridge. In both of his two years at the uni-

versity, he distinguished himself eminently; but the severity of the labour wore him out. He died in 1806, in his twenty-first year. Southey edited his 'Remains,' prefixing a very beautiful memoir. [W.S.]

WHITE, JAMES, a miscellaneous writer and novelist, born in Ireland, died 1799.

WHITE, JEREMY, a nonconformist minister, and wr. in favour of universal restitution, d. 1707.

WHITE, JOHN, a barrister and political writer of the commonwealth period, commonly called *Century White*, from his principal publication; this work bears the following expressive title,—'The First Century of Scandalous Malignant Priests, Made and Admitted into Benefices by the Prelates; or, a Narrative of the Causes for which the Parliament hath Ordered the Sequestration of the Benefices of Several Ministers Complained of before them, for Viciousness of Life, Errors in Doctrine, for Practising and Pressing Superstitious Innovations against Law, and for Malignancy against the Parliament.' Born in Pembrokeshire 1590, died 1645.

WHITE, JOHN, usually called '*The Patriarch of Dorchester*,' was a puritan divine, highly esteemed for his eloquence and piety, 1574-1648.

WHITE, or WHYTE, JOHN, a catholic divine, created bishop of Winchester by Mary, 1511-1560.

WHITE, JOSEPH, a divine of the Church of England, in high repute as an Oriental scholar, was born at Stroud, in Gloucestershire, 1746, and died 1814. He obtained great credit and preferment for his Bampton lectures, which, it was afterwards discovered, had been composed principally by Mr. Badcock, once a dissenting minister, further aided by contributions in Greek literature from Dr. Parr. His other works are '*Observations on Certain Antiquities of Egypt*,' a '*Harmony of the Gospels*,' &c.

WHITE, or VITUS, RICHARD, a Roman Catholic professor and canonist, author of a Latin History of the British Islands, died 1612.

WHITE, ROBERT, an engraver, 1645-1704.

WHITE, THOMAS, an English Aristotelian philosopher and catholic, known as a friendly disputant with Hobbes and Descartes, died 1696.

WHITE, THOMAS, the founder of Zion College in London Wall, and other charities designed to promote learning, was a native of Bristol. He commenced his public career as vicar of St. Dunstan's, Fleet-Street, in 1575, and died 1624. The college and alms-house were built on the site of Elsyng priory, then in ruins, £3,000 being left by him for that purpose.

WHITE, SIR THOMAS, founder of St. John's College, Oxford, was a rich citizen and mayor of London. He was born at Reding in 1492. His mayoralty dates in the year of Wyatt's rebellion, and for his services at that crisis he received the honour of knighthood. Died 1566.

WHITFIELD, GEORGE, founder of the Calvinistic methodists, was a native of Gloucester, in the Bell Inn of which town, his father being a tavern-keeper, he was born 16th December, 1714. His father having died while George was yet young, the boy's education devolved solely on his mother, whose pious instructions and example had a powerful influence in imbuing his infant mind with strong religious impressions. Having resolved to cultivate the superior talents with which she saw

George was endowed, she sent him to a classical school. At the age of fifteen he had distinguished himself by the accuracy, extent of his knowledge, and taste in Greek and Roman literature. But his mother not succeeding in the hotel, and becoming reduced to poverty, the progress of George's education was stopped, and being driven to undertake some menial place about the establishment, his manners and morals were much injured by his association with irreligious servants. Happily his impressions revived, and having been confirmed he received for the first time the sacrament of the Lord's Supper. His mother's circumstances improving, she sent him to Pembroke College, Oxford, and there he joined in forming a small select society for mutual improvement in religious knowledge and personal piety along with the Wesleys and a few college contemporaries of kindred spirit. Dr. Benson, bishop of Gloucester, who was acquainted with his rare talents and piety, resolved to grant him ordination, and the solemn ceremony was performed at Gloucester, on 20th June, 1736. His first sermon, preached on the following Sabbath, produced an extraordinary sensation. From Gloucester he went to London, where he preached alternately in the chapel of the Tower and at Ludgate prison every Tuesday. In 1737 he joined his friends the Wesleys as a missionary at the Georgian settlement. But he had only been four months resident there, when he returned to England both to obtain priest's orders and to raise subscriptions for erecting an orphan house in that settlement. On his arrival in London, he found an outcry raised against him on account of methodism. Bishop Benson disregarded it, and ordained him a priest. But he was denied access to the pulpits of many old friends; and hence he commenced the practice of open-air preaching in Moorfields, Kennington, and Blackheath, and other quarters, where his ministrations were attended by vast crowds. Having raised a fund of £1,000 for his orphanage, Whitfield returned in 1739 to the American continent. At Savannah immense crowds repaired to hear him, and extraordinary scenes of excitement were enacted. On 25th March, 1740, he laid the first brick of the orphan asylum, and when the building was completed, he gave it the name of Bethesda. Although his ministry was very successful at Savannah, he sighed for his native land; and accordingly in 1741, he returned once more to Britain, where he continued with indefatigable diligence to preach the gospel. In prosecution of that object, he made a tour through England, Wales, and Scotland, preaching in many places, and always in the open air, to immense crowds. While in Wales, he married Mrs. Jones, a widow to whom he had long cherished a warm attachment; and shortly after his marriage, he repaired to London, where, it being winter, some of his admirers erected a wooden shed in which he preached. To this fragile structure, he gave the name of the tabernacle, and it was the scene of some extraordinary awakenings. The journeys and voyages of this indefatigable minister amount to a number almost incredible. He has stated in his memorandum book, that 'from the time of his ordination to a period embracing thirty-four years, he preached upwards of 18,000 sermons, crossed the

Atlantic seven times, travelled thousands of miles both in Britain and America; and when his strength was failing, he put himself on what he termed 'short allowance,' viz., preaching only once in every day of the week, and three times on the Sabbath! Whitfield was no common preacher. Parties of the most opposite character and principles, such as Franklin, Hume, and John Newton have united in bearing testimony to the beauty and effectiveness of Whitfield's pulpit oratory. The death (in 1770), of this eminent servant of God was sudden, having been produced by a cold caught while preaching at Portsmouth, and followed by a severe attack of asthma, which put period to the life and labours of one of the most devoted and successful ministers of Christ since the days of the apostles. [R.]

WHITEHEAD, D., an eminent divine, d. 157

WHITEHEAD, G., a cel. Quaker, 1636-1725

WHITEHEAD, JOHN, a methodist physician who attended Wesley in his last illness, preached his funeral sermon, and wrote 'Memoirs' of his life, died 1804.

WHITEHEAD, P., a satiric poet, 1709-1774.

WHITEHEAD, WILLIAM, successor of Cibb as poet-laureate, author of 'The Roman Father 'The School for Lovers,' 'Friendship,' and other compositions of considerable merit; he was friend of Mason, who wrote his life, 1715-1785.

WHITEHURST, JOHN, a philosophical writer and maker of instruments, 1713-1788.

WHITELOCK, BULSTRODE, an eminent lawyer and friend of Cromwell, was the son of James Whitelock, lord chief justice of the King's Bench, and was born in London in 1605. was one of the managers of the trial of Strafford but took no part in that of Laud or the king. 1656, he was chosen speaker of the House of Commons, and in 1659 became president of the council of state, and keeper of the great seal. His historical memoirs are highly valued, and Whitelock greatly eulogized, as to personal character, Lord Clarendon. He died after many years' retirement at Chilton Park, in Wiltshire, 1676.

WHITGIFT, JOHN, archbishop of Canterbury distinguished as a supporter of the Church of England, was born at Grimsby in Lincolnshire 1530, or, according to some authorities, in 1533. was regarded as a great persecutor both of puritans and papists, by their own partizans, Hooker and the episcopalians extol his moderation and proper firmness. He died in 1603, almost his last words being 'Pro Ecclesia Dei.'

WHITLOCK, ELIZ., a famous actress, sister of Mrs. Siddons and the Kembles, 1761-1836.

WHITTINGHAM, SIR SAMUEL FORD, a British officer, distinguished in the service of Syria during the peninsular war, died commander-in-chief at Madras 1841.

WHITTINGHAM, WILLIAM, a puritan divine who became dean of Durham in the reign of Elizabeth. He destroyed or mutilated many of antiquities of the cathedral in his zeal against popery, 1524-1589.

WHITTINGTON, SIR RICHARD, whose name has been rendered popular by the legends current about him, the real truth concerning which never been ascertained, was a citizen and member of London. He probably rose from a humble

tion, like so many others who have filled the magisterial chair. His last mayoralty dates 1419.

WHITTINGTON, ROBERT, author of grammatical works, long used in the English schools, flourished about 1480-1530.

WHITWORTH, CHARLES, Baron, an ambassador from the English court to Peter the Great, author of an Account of Russia, 1670-1725.

WHYTT, R., a Scotch physician, 1714-1766.

WICHERLY. See **WYCHERLEY**.

WICKHAM. See **WYKHAM**.

WICKLIFF. See **WYCLIFFE**.

WICQUEFORT, ABRAHAM DE, a Dutch diplomatist, author of Memoirs concerning ambassadors and their functions, 1598-1682.

WIEGLER, J. C., a Germ. chemist, 1732-1800.

WIELAND, CHRISTOPHER MARTIN, a celebrated German poet, dramatist, and novelist, of the last century. He has been called the German Voltaire. His works have been published in 51 volumes, and embrace essays, tales, poems, histories, and translations. 'Oberon,' a poetic romance in 12 cantos, is his best known production; 1733-1813.

WIELING, A., a German jurist, 1693-1746.

WIER, JOHN, in Latin *Wierus*, or *Piscinarius*, a Brabantine physician and writer on demonology and witchcraft, 1515-1588.

WIFFEN, JEREMIAH HOLME, a Quaker poet, author of a translation of Tasso, and other popular productions in miscellaneous literature, including a History of the Russells, 1792-1836.

WIGAND, JOHN, a learned divine, 1523-1587.

WILBERFORCE, WILLIAM, Esq., a distinguished British statesman and Christian philanthropist, was born in 1759, at Hull. Educated at the grammar school of his native town, he was transferred in due time to Cambridge, where his distinguished position as a scholar and a gentleman is sufficiently indicated by the fact of his being chosen whenever he attained majority, to represent Hull in parliament. For a considerable time he was content to remain a silent member of the House of Commons, while at the same time he was a most active and intelligent observer of the forms of that legislative assembly. Reserving himself for some great and important occasion, he made his *debut* as a parliamentary orator on the subject of the slave trade, and in his second session, he introduced a bill for the abolition of the inhuman traffic. The 12th of May, 1789, was the memorable day when that topic was first introduced; and the journals of that period are unanimous in ascribing much of the interest connected with the movement to the powerful and affecting speech with which the bill was prefaced. Mr. Wilberforce was acknowledged both in and out of the house to have earned by that appearance, the reputation of one of the most eloquent orators of the age; and the hearts of all good men in every part of the country implored blessings on the head of him who dared in the highest places of the land to advocate the cause of outraged humanity. A most violent and determined opposition was organized by interested parties. Nevertheless in the following year Mr. Wilberforce renewed his motion, and on the plea of insufficient evidence, the opposing party succeeded in procuring a postponement of the question. Many men would have been dispirited by these fruitless efforts,

and perhaps have relinquished their task in despair. But Mr. Wilberforce was not to be daunted. Having taken up his position on the ground of conscientious objection to all trafficking in slaves, he prosecuted the measure with that calm and unyielding determination which is always the fruit of mature thought and strong principle; and his patience was put to a severe trial; for while he renewed his motion every session from 1792, he met with no better success than at first. In 1804, after a cessation for a few years, he brought the subject once more before the notice of a new parliament. But the public mind had made a prodigious advancement towards a better tone of feeling in regard to the slave trade, and the bill passed the third reading in the Lower House. In the Upper House, the consideration of the subject was postponed till the next session. A still more important step in advance was taken when the liberal cabinet in 1806 adopted the bill and threw all the weight of government influence into the scale. It was introduced into the Commons' House at the special request of Wilberforce under the auspices of Fox, and was passed by a majority of 114 to 15, and Lord Granville succeeded in carrying it through the Lords. But Mr. Wilberforce was universally regarded throughout the kingdom as the great champion of the cause—and the most gratifying expressions of public gratitude were poured in upon him from all parts of the country. Mr. Wilberforce has established claims to public notice and esteem of another and even higher kind. He had become a decided Christian, at a time and in circumstances when to act in accordance with the high principles of Christian morality was a much more difficult thing than it is happily in the present day. The publication of his 'Practical View of Christianity,' a work in which he compared the defective notions of religion that prevailed among the majority of professing Christians with the standard of the New Testament—formed an era in the religious history of this country; and multitudes have traced to its perusal their first serious impressions of religion. The character of the distinguished author was a beautiful commentary on the principles developed in this book. Throughout a long life he sustained the character of a consistent Christian; and that was no easy attainment for one who moved in the highest circles, and was constantly mingled in all the changes of the political world. But although his position was isolated, such was the sincere and unaffected piety—such the prudent discretion that regulated his intercourse with general society, that he commanded the respect and esteem of all parties. Mr. Wilberforce terminated his honourable and useful life on 28th July, 1833, and on his deathbed enjoyed the comforts of that gospel in which he had reposed his faith for so many years of his life. [R.J.]

WILBYE, J., a musical composer, 16th century.

WILCOCKS, JOSEPH, bishop of Rochester, promoted the erection of the west front of Westminster Abbey, 1673-1756. His son, **JOSEPH**, an ingenious antiquarian, author of 'Roman Conversations,' and 'Sacred Exercises,' 1723-1791.

WILD, HENRY, an Oriental scholar, born at Norwich, where he began life as a tailor about

1684. The date of his death is unknown, but in 1734 he published a translation of Mohammed's Journey to Heaven. He was a man of irreproachable morals, and seems to have suffered much from his precarious means of subsistence.

WILD, R., a divine and poet, 1609-1679.

WILDBORE, CHARLES, a self-taught mathematician and miscellaneous writer, died 1802.

WILDENS, J., a Flemish painter, 1584-1644.

WILFORD, FRANCIS, a German Orientalist, and officer in the British service, died 1822.

WILFRED, a Saxon bishop and saint of the Roman calendar, who exhibited his architectural skill and his taste in embellishments, by the improvement of York cathedral and the erection of churches at Hexham and Ripon; died 709.

WILHEM, W. L. B., founder of the popular singing schools in France, 1779-1842.

WILKES, JOHN, was born in London on the 17th of October, 1727. His father, an affluent distiller, gave him a high education, of which his capacity enabled him to take full advantage. He was learned and witty, and his attractive conversation, aided by his fashionable tastes and lavish habits made him popular with the juvenile aristocracy of the day, both good and bad. His torrid appearance has often been alluded to, but authentic original portraits, while they have a general resemblance to the expression in Hogarth's caricature, represent not a coarse rude demagogue, but the delicate sinister features of a sybarite and heartless profligate. He treated the mob for his own purposes much as his profligate companions of the Monk-monks' Club, who were so indignant at his becoming a demagogue, treated their female victims. It was in 1762 that, driven desperate by his extravagance, he commenced the *North Briton*. For a libel there printed, his house was searched under a general or indefinite warrant, and for this constitutional outrage he obtained a verdict for £10,000 against the secretary of state. The same event began his memorable conflict with the House of Commons. His expulsion in 1764 opened the question how far the majority of the house was entitled to deprive constituents of the privilege of having their own representative, and he triumphed by the obnoxious resolutions being expunged in 1782. He had the art in all his struggles to keep not only on the popular, but the constitutional side. When no longer attacked he fell into insignificance, which, perhaps, he did not dislike, as he had secured some lucrative offices. He died on 27th December, 1797. [J.H.B.]

WILKIE, SIR DAVID, was born in the parish of Culter in Fifeshire, November 18, 1785. In 1799 he attended the Trustees' Academy at Edinburgh; entered as a student of the Royal Academy of London in 1805, and became at once a famous painter by the exhibition of his 'Village Politicians' in the following year. He became a member of the Royal Academy in 1811; visited the continent in 1825, for the sake of recruiting his health, and remained abroad three years. When he returned he forsook *genre* painting to which he owed his great popularity, and substituted a loose sketchy style of execution, and devoted himself henceforth chiefly to history and portrait. The change proved to be unwise: he failed in portrait, and from being the prince of *genre*-painters, he became only a very

inferior painter of history. He was knighted in 1836; he had already been appointed limner to the king, in Scotland, and painter in ordinary to his majesty. In an unlucky hour in the autumn of 1840, Sir David set out for a tour in the East; he visited Constantinople, the Holy Land, and Egypt; he complained of illness while at Alexandria, and expired suddenly on board the Oriental steamer, off Gibraltar, June 1, 1841, and his body was committed on the same day to the deep; the coffin was lowered into the sea in 46° 20' north lat., and 60° 24' west long.—(Allan Cunningham, *Life of Sir David Wilkie*, &c. London, 1843. *The Wilkie Gallery*, &c. See also the *Penny Cyclo-pædia*.) [R.N.W.]

WILKIE, WILLIAM, a Scottish minister and professor of philosophy at St. Andrews, author of 'The Epigoniad,' an epic poem, 1721-1772.

WILKINS, SIR CHARLES, called the 'father of Sanscrit literature,' was born at Frome, in Somersetshire, 1749, and went to Bengal in the civil service 1770. He resided in India fifteen years, and in that period translated the Bhagavat Gita into English, and exhibited his mechanical skill in making the first Bengali and Persian types used in Bengal. On arriving in England he became librarian to the Directors of the East India Company, and published in succession the 'Fables of Vischnou Sarma,' better known in Europe as the 'Fables of Pilpay,' his 'Arabic Grammar,' an edition of 'Richardson's Dictionary' enlarged, and other works. Died 1836.

WILKINS, DAVID, rector of Hadleigh, in Suffolk, and archdeacon of that county, known as an antiquarian and Saxon scholar, 1685-1745.

WILKINS, JOHN, brother-in-law of Oliver Cromwell, and bishop of Chester, was born in Northamptonshire 1614. He was distinguished for his learning, especially as a mathematician, and is the inventor of the perambulator or wheel for measuring distances. Died at the house of his friend, Dr. Tillotson, in London, 1672.

WILKINS, WILLIAM, an architect and writer on architecture, was born at Cambridge, where his father was a builder, in 1778, and succeeded Sir John Soane as professor at the Royal Academy in 1837. The principal of his edifices are the London University, St. George's Hospital, the University Club House, and the National Gallery in Trafalgar Square. His literary works are 'Remarks on the Buildings and Antiquities of Athens,' and 'The Civil Architecture of Vitruvius.' Died 1839.

WILL, G. A., a Germ. numismatist, 1724-1798.

WILLERTS, ADAM, a Flemish marine painter, 1577-1640. His son, ABRAHAM, born 1613.

WILLAMOV, J. G., a Russian poet, 1737-77.

WILLAN, ROBERT, a physician of London, known as a professional and religious writer, 1757-1812.

WILLENOW, CHARLES LOUIS, a distinguished botanist, member of the Academy of Sciences and director of the botanic garden at Berlin; he wrote several works on plants, and collected a Zoological Cabinet which he presented to the museum, flourished 1765-1812.

WILLE, J. G., a German engraver, 1717-1807.

WILLET, P. R. F., a French botanist and traveller in the East Indies, 1762-1790.

WILLET, RENIE, a French botanist, director of the botanic garden at Nancy, 1735-1807.

WILLEMIN, N. X., a French antiquarian, designer, and engraver, author of 'The Civil and Military Customs of Antiquity,' 1764-1833.

WILLEMUR, L. DE PENEN, Count De, a Spanish general and statesman, 1761-1836.

WILLERMOZ, P. J., a French physician and chemist, 1735-1799. His son, **P. C. CATHARINE**, a physician and anatomist, 1767-1810.

WILLET, ANDREW, a learned divine of Cambridgeshire, author of works written against popery, and other theological subjects, born at Ely 1562, died 1621.

WILLIAM THE CONQUEROR. William I., king of England, was the illegitimate son of Robert duke of Normandy, by Ariotta, the daughter of a tanner of Falaise. He was born in 1027. His father had no legitimate children; and when Duke Robert departed on a pilgrimage to the Holy Land, he persuaded his barons to swear allegiance to young William as his heir. Duke Robert died while returning from Palestine in 1035; and during the first years of William's dukedom, the ambitious feuds of the Norman barons and the aggressions of the king of France placed Normandy in a perilous state of anarchy and weakness. But as soon as William grew out of boyhood, he began to govern for himself; and after years of jeopardy and strife, he established a degree of order in his duchy, which was unknown in the rest of Europe, and he made himself universally known and respected among the princes of Christendom. William was related to Edward the Confessor king of England; and he long watched anxiously for the time when the death of that childless sovereign should give him the opportunity for making himself king of this country. Edward died on the 5th January, 1066; and the Saxon Harold was chosen by the English to succeed him. But William speedily asserted his claims. Besides his relationship to the late king, he had been nominated, or he pretended that he had been nominated by the dying Edward as his successor: and he had in the preceding year taken advantage of the temporary presence of his rival in Normandy, to make Harold, partly by force and partly by fraud, swear to help him in obtaining the crown of England. As soon as King Edward was dead, William demanded the execution of this promise; and, on Harold's refusal, he prepared to assert his rights by the sword. He assembled, for the invasion of England, a host which Mackintosh has rightly termed 'the most remarkable and formidable armament which the western nations had witnessed.' He landed with this army in Pevensey Bay, 29th September, 1066, and on the 14th of the next month he fought and won the decisive battle of Hastings, in which Harold and the bravest thanes of southern and central England perished. William advanced and occupied London, the Saxons generally submitting themselves to him; and he was crowned king of England at Westminster on Christmas day, 1066. At first his rule was comparatively mild; but the Saxon spirit chafed under the sense of foreign domination, and under the insolence of the Norman barons and prelates of the new king. Then came fierce local risings, with delusive partial successes over the foreigners, soon crushed by the disciplined troops and high military genius of the Conqueror. Then followed the revengeful cruelties

of the king, the effects not so much of hasty anger, as of stern remorseless policy. He was resolved to establish his dominion and his dynasty firmly in England; and neither fear nor mercy ever made William pause in employing the most efficacious means to work out a settled purpose. The insurrections of the Saxons were visited by him with confiscation, massacre, and devastation; and it is computed that a third of the old Saxon population of England was swept from the land during his invasion and reign. But, terrible as are the acts of cruelty with which William's memory is associated, it would be unjust to let them blind us to the high qualities which he displayed, as a ruler, and as an ordainer of our institutions. He maintained the strictest order and internal peace. His military renown checked the ambition and cupidity of the marauding Danes, who had infested the English coasts for more than two centuries. He organized the feudal system here, with changes from its development on the continent, so as to keep down the turbulent insubordination and lawless violence of the nobility. He retained (though with many important modifications) the Saxon popular tribunals; and altogether he may be truly said to have displayed a marvellous discernment of the two great principles of government, which require centralized power in matters of imperial importance, and local self-government in matters of chiefly local interest. William the Conqueror died in 1087. It ought to be added that, like all the race of his great ancestor, Rolf the Ganger, who conquered Neustria 150 years before William conquered England, he was eminent for his appreciation of intellect, science, art, and learning, and for liberality to all men of all nations by whom they were displayed. [E.S.C.]

WILLIAM II., king of England, second son of the preceding, was born in 1060, and succeeded his father in the absence of his elder brother, Robert, 1087. The latter also allowed him to acquire the dukedom of Normandy by purchase, and then joined the crusaders. William reigned nearly thirteen years, and was killed in the New Forest by an accident, as commonly supposed, in 1100. He was surnamed *Rufus*, the red or ruddy, and bears the reputation of an evil and avaricious man.

WILLIAM III., king of England, stadtholder of Holland, and prince of Orange, was the son of William II., stadtholder of Holland, and of Mary, daughter of Charles I. of England. He was born November 14, 1650. His father had died a little more than a week before the young prince's birth, and the party of aristocratic republicans among the Dutch, that was hostile to the ascendancy of the house of Orange, eagerly took this opportunity of curtailing its power; and prevented the offices of stadtholder and captain-general, which the father had held, from being conferred on the infant son. The great wealth and hereditary estates of the prince of Orange, his connection with the royal families of England and France, and the popularity of his name and house among the common people, still made young William an object of anxiety to the leading Dutch statesmen; and he grew up surrounded by the officers and spies of a jealous government, that watched his every action and word, and every growing tendency of his disposition with pretended courtesy but real suspicion.

William thus early acquired, as a defence against the snares around him, the reserved manners, and the habits of secrecy and self-reliance, that marked him throughout life. When he was twenty-one, the disasters of the war against England and France, in which the Dutch were then involved, caused a general movement among the mass of the people against the De Witts and the other aristocratic chiefs of the commonwealth. William was made stadtholder, and continued with this office and that of captain-general, and the other high powers which his ancestors had enjoyed. It is a deep blot on his fame that at this crisis of his life he neither exerted himself to prevent the murder of the De Witts by the infuriated people, nor did he take any steps to bring the murderers to justice. Towards the country, that thus made him its chief at a time of unexampled distress and peril, William did his duty nobly. He encouraged the Dutch to reject the degrading terms of peace which the hostile kings offered, and to defend their fatherland, town by town, and inch by inch. Nay, he exhorted them, rather than submit, to embark on board their vessels and found a new free state in the East Indies. He himself spurned with indignation the offers of Louis XIV. to bribe him by making him king of the United Provinces under the protection of England and France. When the French envoy pointed out to him the immense power of the invading armies, and that he was sure, if he rejected the proposals, to see both himself and Holland irretrievably ruined, William answered, 'I have thought of the means to avoid beholding the ruin of my country: I can die in the last ditch.' His heroism had its just reward. The progress of the French armies over Holland was checked. The emperor of Germany and other powers combined against Louis XIV. Charles II. of England was compelled by his parliament and people to make peace with the Dutch; and at last the treaty of Nimeguen, 1678, left Holland free and independent after a war, in which William, though he met with frequent reverses, had won the admiration of Europe as a general and as a statesman. In the same year he married the princess Mary of England, daughter of James II. by his first wife. William watched with the deepest interest the struggle of parties in this country. He felt that his own peculiar mission was to defend the cause of civil and religious liberty in Europe against the ambition and bigotry of Louis XIV. If England could be brought to fill her natural place as a free and a protestant state in this great strife William was confident of the result. But Holland and her other allies were unequal to a continued contest against the power of France, if England, under her Stuart rulers, was to act again as the tool and accomplice of the Bourbons. Hence, when the English, in 1688, sought the intervention of William against the misgovernment of James II., William eagerly embarked in the great enterprise of his age. He landed in this country in the November of that year, and gained almost bloodless possession of the kingdom. The houses of parliament solemnly chose him king of England by the bill of rights. In Scotland and Ireland the adherents of the abdicated monarch made some resistance in arms, but were ultimately put down. William himself decided the Irish war

by the great victory of the Boyne, which he gained in person over James and his followers. William's reign over these kingdoms was disquieted by many jealousies between him and his new subjects. He was offended at the limitations on the royal power and revenue, which the English Whigs introduced; and he was of course regarded with the bitterest animosity by the Jacobites, who cherished the fallen cause of the Stuarts. The war also against France, which was the necessary consequence of the Revolution of 1688, brought many burdens on this country, and was attended with many losses in the field. The peace of Ryswick in 1697 was regarded by all parties as no more than an armed truce; and it was well known that Louis XIV. was scheming to unite the vast possessions of the Spanish crown to the dominion of France. William sought to prevent this by two treaties between the principal European powers for the partition of the Spanish provinces on the death of the reigning king. But this only incensed the court of Madrid, and when the king of Spain died in 1700, it was found that he had bequeathed all his crowns to the grandson of Louis XIV., who forthwith repudiated the partition treaties, and prepared to seize this rich inheritance for the house of Bourbon. William now applied all his energies to form a new league against France; but in the midst of his warlike preparations he died at Kensington, 8th March, 1702. William III. was unquestionably a great man, but he was one of those coldly great men, who rather extort our admiration from our reason, than raise the sympathy or enthusiasm of our hearts. His permission of the massacre of the clan Macdonald, at Glencoe, is (like his conduct with regard to the De Witts,) a grievous stain on his memory. But we must judge him by the general character of his actions, and not by one or two culpable deeds. We must look to the circumstances in which he was placed; and we must consider what would have been the probable current of events in the latter portion of the seventeenth century, and in all after time, if the fraud, the rapacity, and intolerance of Louis XIV. and our own Stuarts had not been encountered by an opponent so resolute, so vigilant, so high-minded, and indomitable as William III. If we judge him thus, we shall feel that he deserves the imperishable gratitude of posterity, as the rescuer and preserver of our national independence, our constitutional liberties, and our right to worship according to a free conscience and a pure faith. [E.S.C.]

WILLIAM (HENRY) IV., third son of George III., was born August 21, 1765, and entered the navy as a midshipman in the fourteenth year of his age. He reached the rank of admiral in 1801. In 1818 he married the princess Adelaide, eldest daughter of the duke of Saxe-Meiningen, who bore him two daughters, neither of whom survived their infancy. He became heir presumptive to the throne by the death of the duke of York in 1827, and succeeded George IV. June 26, 1830; died 1837. The great event of his reign was the achievement of the Reform Bill, by which this country was saved from the verge of a revolution. He left ten natural children, known as the FITZ-CLARENCES.

WILLIAM, *king of Scotland*, surnamed 'the Lion,' succeeded his brother, Malcolm IV., 1165, and died 1214. He was succeeded by Alexander II.

WILLIAM, *duke of Normandy*, surnamed 'Long Sword,' was born in 900, and succeeded his father, Rollo, in 927. He was assassinated in 942.

WILLIAM, surnamed 'Short Hose,' son of Robert III., duke of Normandy, made a vain attempt to recover the estates of his father, of which he had been despoiled by Henry I. of England. He became count of Flanders in 1127, died 1128.

WILLIAM, son of Henry I., king of England, invested by him with the duchy of Normandy, and perished by shipwreck 1120.

WILLIAM, *duke of Apulia*, succeeded his father, Roger, son of Robert Guiscard, 1111, died 1127.

WILLIAM, six counts of Holland, four of whom were also counts of Hainault, and one emperor of Germany:—**WILLIAM I.**, who usurped the country on returning from a crusade to the prejudice of Ada, his niece, and died 1223. **WILLIAM II.**, grandson of the preceding, born about 1226, succeeded his father 1234. In 1247 he was elected king of the Romans, and being proclaimed emperor by the papal legate in 1250, had to dispute the crown with Conradin IV., till the death of that prince in 1254. He was soon after recalled to his hereditary estates by a revolt, and lost his life in a battle 1256. **WILLIAM III.** of Holland and I. of Hainault, succeeded his father, John, in both countries 1304, and died 1337: he was surnamed 'the Good.' **WILLIAM IV.** of Holland and II. of Hainault, son and successor of the preceding, perished in a battle fought with his revolted subjects 1345. He was succeeded by his sister, Margaret, and her husband, the emperor Louis of Bavaria. **WILLIAM V.** of Holland and III. of Hainault, son of Margaret and Louis, usurped the authority of his mother 1349; he died miserably in a tower, to which he had been consigned for the murder of one of his gentlemen in 1377. **WILLIAM VI.** of Holland and IV. of Hainault, succeeded his father, Albert, in 1404, died 1417.

WILLIAM I. OF NASSAU, prince of Orange, the first leader in the Dutch war of independence, was born in 1533 of Lutheran parents, but descended from the ancient counts of that principality. Being trained to political employments at the court of Charles V., he conformed outwardly to catholicism, and had become governor of the provinces of Holland, Zealand, and Utrecht, while the reformed doctrines were spreading and events were ripening for the revolt of the Netherlands. The leading circumstances of that great and glorious struggle, which lasted considerably more than half a century, were these. On the death of Charles V., who had made great efforts to keep the Netherlands free from 'heresy,' he bestowed those provinces on his son, Philip II., king of Spain. The latter appointed Margaret of Parma, a natural daughter of his father, stadtholderess, with the cardinal Granvella for her adviser, who began his career by prosecuting the protestants, and creating a vast number of bishoprics. The dark and resolute despotism of Philip was shadowed forth in England in the reign of Mary, called the 'bloody,' but in the Netherlands he was as the tyrant of his own household, and so much the more unscrupulous and persecuting. In 1564 the cardinal, provoked by the opposition and hatred which he had to encounter, departed for Spain, and shortly afterwards preparations were making to introduce

the inquisition, and this in the midst of a people already half Lutherans and Calvinists. In 1566 the nobles went in procession, and petitioned Margaret against this measure, and as they were treated with contempt, their remonstrances were followed by popular commotions. On this Alva was sent, at whose approach a hundred thousand of the most industrious Flemings took refuge in foreign countries, chiefly in England. This was the crisis at which William of Orange came forward, and raised the standard of independence, and the desperate circumstances under which he called the people to arms, may be referred to in the article ALVA. Though that monster of cruelty was recalled at the end of six years, 1574, and replaced by a milder ruler, the Dutch continued the war, and Holland was liberated by the relief of Leyden, which William effected by laying the whole country under water, 1575. He was now elected stadtholder, and Calvinism became the established religion, to the exclusion of Lutheranism as well as the Roman Catholic faith. By the 'Pacification of Ghent' in 1576, William united all the provinces in one confederation, but he found it impossible to heal these internal causes of disunion, and the Spaniards, taking advantage of them, were able to repossess themselves of the southern provinces, under the duke of Parma, whence arose the present distinction between Holland and Belgium. Philip had now set a price on William's head, and, in 1582, an attempt was made to assassinate him, but he recovered from the wound. A second attempt, in 1584, was but too successful. One Balthaser Gerard, being introduced to the stadtholder on the plea of business, he suddenly drew a pistol, loaded with three balls, and shot him in the body. The prince expired almost instantly: his last words were, 'May God have mercy on me, and these poor people!' He was succeeded, and the war carried on successfully, by his second son, MAURICE OF NASSAU. [E.R.]

WILLIAM, two kings of Holland, **WILLIAM (FREDERICK) I.**, styled king of the Netherlands, grand duke of Luxembourg, prince of Orange, and duke of Nassau, was born at the Hague in 1772. He distinguished himself in the wars with the French republic, and became an exile with his father, the hereditary stadtholder of the Dutch republic, in 1795; after his father's death he succeeded first to the duchy of Nassau, and joined the Prussian army against Napoleon. He became king of Holland by the settlement of affairs which followed the fall of Napoleon in 1814, the countries united under his rule by the congress of Vienna being the old united provinces of Holland, the bishopric of Liège, and Belgium: the latter, however, was separated by the revolution of 1830. He abdicated in 1840, and died in 1843. **WILLIAM II.**, son and successor of the preceding as king of Holland, was born in 1792, and distinguished himself in the peninsular war under Lord Wellington; he also commanded the army of the Netherlands at the battle of Waterloo. His reign commenced from his father's abdication in 1840, and he died a few days after the revolution of March, 1848.

WILLIAM OF APULIA, a Latin poet and historian of the 12th century.

WILLIAM OF AUVERGNE, or OF PARIS, a French prelate and theologian, died 1249.

WILLIAM OF WYKEHAM. See WYKEHAM.

WILLIAMS, ANNA, a miscellaneous and poetical writer, was the daughter of a Welch surgeon, whom she accompanied to London in 1730, and supported many years by the labour of her pen. In 1740 she became blind from cataract, and then had recourse to her needle till she was admitted under the roof of Dr. Johnson, who was struck with admiration of her generous devotion. She died in his house, Bolt Court, Fleet-Street, in the seventy-seventh year of her age, 1788.

WILLIAMS, SIR CHARLES HANBURY, a diplomatist and man of letters, 1709-1759.

WILLIAMS, COOPER, a chaplain in the navy, and writer of voyages, &c., 1767-1816.

WILLIAMS, DANIEL, many years minister to a presbyterian congregation in Dublin, was born about 1644, at Wrexham, in Denbighshire. The latter part of his life was passed in London, and he left his library in Redcross-Street, Cripplegate, for the use of dissenting ministers. Died 1716.

WILLIAMS, DAVID, founder of the 'Literary Fund,' was born in Cardiganshire, 1738; and after officiating some time as a dissenting minister, became a teacher of deism. This speculation not answering, Mr. Williams devoted himself to private teaching and literature, and at the close of his life was supported by the excellent institution he had himself projected. His principal works are an edition of 'Hume's History,' 'Lectures on Education,' 'Lectures on Political Principles,' 'History of Monmouthshire,' &c. Died 1816.

WILLIAMS, EPHRAIM, an American general, founder of the college named after him, died about 1791.

WILLIAMS, F., a creole writer, died 1770.

WILLIAMS, GRIFFITH, bishop of Ossory, in Ireland, was born at Cærnarvon, about 1589, and in the rebellion of 1641 became an exile from his see, which he recovered at the restoration. He wrote several religious works, and an account of the persecutions he had suffered. Died 1672.

WILLIAMS, H. M., a female artist, 1759-1827.

WILLIAMS, JOHN, archbishop of York, and lord keeper in the reign of James I., was born at Aberconway in Cærnarvonshire, 1582. He succeeded Lord Bacon as chancellor in 1621, and was raised to the see of York in 1641. During the rebellion he fortified and defended Conway castle in the interest of the king. Died 1650.

WILLIAMS, JOHN, a learned prelate, one of the divines who were promoted after the revolution of 1688, b. in Northamptonshire 1634, d. 1709.

WILLIAMS, JOHN, the martyr of Erromanga, was born in a very humble rank, but being imbued with deep feelings of piety, early resolved to devote himself to missionary labours, and by his self-denying and zealous prosecution of his work, has obtained a name among the foremost of his evangelical contemporaries. Having entered into the service of the London Missionary Society, he was sent out in 1817 to their station in the South Sea Islands; and the scene of his first duties there was in the Raiatea—the largest and most central of the Society Islands, situated about one hundred miles' distance from Tahiti. He afterwards removed to what is called the Hervey Group of Islands, and having discovered Rarotonga, the largest of the group, landed with a view to establish himself

there. During eleven years he prosecuted the work of an evangelist on that island, and on reviewing his course at his departure, could bear this wonderful and gratifying testimony: 'When I found them in 1823, they were entirely savages, and when I left them, they had not only embraced the Christian profession, but I am not aware that there was a house in the island where family prayer was not observed every morning and evening.'—Burning with zeal to introduce the gospel into every island of the Pacific, this indefatigable missionary removed to another group—the New Hebrides, which lay far westward. Having been welcomed to the island of Parna, Mr. Williams prepared to make a similar attempt in Erromanga. On approaching it, he and his two companions hailed some of the natives who were sailing in a canoe, and found they spoke a different language—were of a darker complexion—shorter in stature—wilder in their appearance, and more jealous of the intentions of strangers, than the people in Parna. The missionaries tried to propitiate them by offering them some bread, and requesting the chief to give them some water, which he speedily fetched. Encouraged by these appearances, they waded ashore; but scarcely had they landed, when they ran in all haste back to the sea, being pursued with hostile weapons by the savages. Mr. Williams had reached the edge of the water, but the beach being rugged and steep, he stumbled and fell, when the native who pursued him, taking advantage of the fall, struck him repeated blows with a club. Others running up, completed the work of destruction, by piercing his body with arrows. Before his two companions could venture to make the slightest attempt to rescue him, the savages had dragged the mangled remains away with them. Thus perished, in the prime of life and usefulness, a missionary who was 'in labours abundant;' and whose 'Narrative'—full of the most interesting and delightful details,—has been beautifully and justly styled, 'A Modern Acts of the Apostles.' [R.J.]

WILLIAMS, SIR ROGER, a native of Monmouthshire, dist. in the Flemish wars, died 1595.

WILLIAMSON, HUGH, an American physician, astronomer, and member of congress, author of a 'History of North Carolina,' and 'Observations on the Climate of America,' 1735-1819.

WILLIAMSON, SIR JOSEPH, a statesman and collector of manuscripts, born at Cumberland, where his father was a clergyman, about 1680. He began his public career as clerk of the council after the restoration, and became principal secretary of state in 1674; died 1701.

WILLIS, FRANCIS, a clergyman of the Church of England, whose attention to mental disorder led to his adoption of the medical profession, and to his appointment as physician to George III. died 1807.

WILLIS, THOMAS, a distinguished English anatomist and physician, born at Great Bodwin, in Wiltshire, in 1622, and died at London in 1675, in the fifty-fourth year of his age. Willis belonged to the sect of Iatro-chemists, who resolved all the motions of the human body, in health and disease, into the chemical action and reaction of the solids and fluids of which it is composed. He was deeply involved in the controversies of his age, but the work by which his name is known to posterity is that on the

Anatomy of the Brain and Nerves, *Cerebri Anatomie, cui accessit Nervorum descriptio et Usus*, which was published at London in 1664. Some of the opinions contained in this book are remarkable as being anticipations of the ideas on the functions of the brain long afterwards propounded by Gall, for he not only maintained that the cerebrum is the seat of the intellectual faculties, and the cerebellum of the involuntary movements, but that each part of the brain has its own separate functions. Another treatise on the soul of brutes, *De Anima Brutorum*, published in 1672, involved him in irritating disputes with theologians of the time, which are thought to have shortened his days. [J.M.C.]

WILLOUGHBY, SIR HUGH, commander in a voyage of discovery which sailed from London in 1553, at the instance of a company of merchants directed by Sebastian Cabot. The expedition, consisting of three vessels, was last heard of off Finmark, on the 30th July in that year, soon after which all must have perished.

WILLUGHBY, FRANCIS, a famous naturalist and friend of Ray, who arranged and published his MSS. on ichthyology, 1635-1672.

WILLYMOT, W., an English clergyman, schoolmaster, and classical editor, died 1737.

WILMOT, JOHN. See ROCHESTER.

WILMOT, JOHN EARDLEY, chief justice of the Common Pleas, was born at Derby in 1709, and died 1792. He wrote 'Notes of Opinions,' which were published by his son in 1802. The latter, same names as his father, was born at Derby in 1748, and attained great eminence as a chancery lawyer. He died in 1815.

WILSON, ALEXANDER, a celebrated ornithologist, was born in Paisley in 1766. He died in 1813. His father was a man in poor circumstances, and Wilson himself was brought up to the trade of a weaver. His education was well attended to in early life, and he was possessed of an ardent poetic temperament of mind, accompanied with a strong predilection for the beauties of nature. He became disgusted with the drudgery of the loom; gave free vent to his poetical disposition, and for nearly three years he wandered over the country as a pedlar, selling muslins and poems. Both poetry and pedlary, however, turned out failures in his hands, and an unfortunate dispute between the journeymen and master weavers, in which he took an active part, rendering his residence in his native country extremely unpleasant to him, he emigrated to America. He arrived in that country in 1794, and for eight years he supported himself by weaving or perambulating the country with his pack, occasionally surveying land for the farmers, and latterly by teaching. In 1802 he was offered an engagement in a seminary at Kingessing on the Schuylkill, whither he immediately removed, and which fortunately procured him the patronage of some kind and influential friends. Amongst these was Mr. Lawson the engraver, who taught him drawing, colouring, and etching. Previous to his coming to America he had never shown any taste for ornithology; but his application now to drawing seemed to develop his latent talent. His first attempts were not successful, but as soon as he commenced the delineation of birds he made rapid progress. His success seems to have first suggested the idea of his American Ornithology. To accom-

plish this work he undertook many journeys through various parts of America, sleeping for weeks in the wilderness alone with his gun and his pistols in his bosom, performing solitary voyages on the great rivers in a frail canoe, and collecting all the birds of the districts through which he travelled. He drew, etched, and coloured all the plates himself, and after many delays and disappointments, he at last procured a publisher, and produced a first volume of his celebrated work. It far exceeded the expectations of the public, and eight volumes successively made their appearance, and procured him great and deserved reputation. Before he could finish his great undertakings, he was seized with a sudden and severe illness, and died at the age of forty-eight. Wilson's great wish was, to use his own words, 'to raise some beacon to show that such a man had lived;' and though his death was premature, he lived long enough to accomplish the object of his ambition. [W.B.]

WILSON, ARTHUR, an English historian, who was secretary to Robert, earl of Essex, and steward to the earl of Warwick, 1596-1652.

WILSON, FLORENCE, a Latin scholar and professor of philosophy, born at Elgin in Scotland, about the beginning of the 16th century, died in Dauphny, on his way home from Navarre, 1547. The work by which he is known is a dialogue, entitled 'De Tranquillitate Animi.'

WILSON, H., an English navigator, died 1810.

WILSON, JAMES, a navigator, who discovered the islands called Duff's group in 1796.

WILSON, JOHN, a composer of sacred music, born at Faversham in Kent, 1594, died 1673.

WILSON, JOHN, a Scotch vocalist, who attained great popularity by his manner of singing the beautiful lyrics of his native land. Born 1800, died at Quebec in 1849, while on a professional visit to America.

WILSON, JOHN, better known for many years of his life by the soubriquet of Christopher North, was born in the town of Paisley in 1785, or, as some accounts say, in 1788. His father was an eminent merchant there, and the paternal mansion in the High-Street of that ancient borough, still attests the wealth and dignity of the family by its stately urban magnificence. Wilson received the elements of his education, we believe, with the late Mr. Peddie of Paisley, and afterwards under the superintendence of the parish minister of Mearns; at the age of thirteen he entered the university of Glasgow, and afterwards that of Oxford, in Magdalen College. From the latter source he doubtless imbibed that familiar acquaintance with, and rich appreciation of the classic writers, which, in happy union with his other qualities, constituted him one of the most eminent writers and literary men of his day. The first poem he ever published obtained the Newdegate prize in his venerable Alma Mater. For some years afterwards he lived at his beautiful retreat of Elloray, on Windermere, when, as a matter of course, he became intimate with Coleridge, Southey, and Wordsworth, the leading apostles of what was then called the Lake School of Poetry; and the dreamy sweetness of whose style of composition tended to dilute and weaken the simplicity and vigour of his own. Pecuniary causes obliging him to leave Elloray, he joined his mother in Edinburgh, who was a woman of a high

order of intellect, qualified to be the monitor and helper of so erratic a spirit. Here he began to study the law for the profession of a barrister, but never actually assumed the professional toga. In 1812 appeared the *Isle of Palms*, and soon afterwards the *City of the Plague*, and *Unimore*, the principal contributions of his fanciful and capricious muse. There is a soft, liquid flow of musical expression in these poems, with a vague, dreamy wildness and pathos, in combination with an exuberant fancy; and in the *City of the Plague* an irregular vigour and richness of imagination, resembling the *outré grandeur* of some of our old English dramatists. It is as a prose writer, however, that Wilson takes rank among the literary Titans of his native land. His novels are not much read now, being over-informed with sentiment, and the characters pitched far above the average of Scottish rural and urban nature. The *Trials of Margaret Lindsay* and the *Foresters* are, however, exquisite specimens of composition as poetic prose. In 1820 he succeeded the celebrated Dr. Brown as professor of moral philosophy in the university of Edinburgh, an appointment severely and justly commented upon at the time; and if we take Dr. Chalmers as an authority, whose dictum it was, that moral philosophy was the gate to theology, it reflected as little credit upon those who appointed, as upon him who accepted. At the same time began, and certainly oddly enough, his connection with *Blackwood's Magazine*, where appeared that famous series of political and literary pieces, which set all Edinburgh in a flame, so well known as the *Noctes Ambrosianæ*. Wilson was always considered as the presiding *genius loci*, and amongst his associates were John Gibson Lockhart and the Ettrick Shepherd, the latter chiefly as a butt. Rich in broad, coarse humour, and violating, not seldom, the conventional courtesies and even decencies of political and personal intercourse, their irresistible waggery, and biting sarcasm, raised the Edinburgh periodical to the high station it has always maintained. The genius of Wilson arose out of the rich overflow and exuberance of his animal spirits, themselves the result of a finely developed physical constitution, in fact, of a *physique* the most imposing and attractive that perhaps ever son of song was gifted with. We believe that the stories of the excesses of his youth and manhood were much exaggerated, as his fertile fancy and rich classical resources, with his irresistible tendency towards the ridiculous, would elevate him by their intense exercise, into a condition very like *ebrius*, if not *ebriosus*. In 1851, he resigned the situation of professor of moral philosophy in the university of Edinburgh; having been struck with paralysis, and expired on the 4th of April, 1854. With great propriety a Whig government granted him a pension of £300 a-year, and having lived down in himself, and in the minds of many others, the political acerbities of his youth and manhood, this eminent Scotsman has passed away, to occupy no mean niche in the Scottish Temple of Fame. [T.D.]

WILSON, RICHARD, R.A. This great landscape painter was born at Pinegas, Montgomeryshire, and showing an early taste for drawing, was taken to London by Sir George Wynne, and placed with a portrait painter of the name of Wright.

Wilson himself commenced his career as a portrait painter, and took to landscape first in Italy in 1749, by the advice of Zuccarelli and Vernet. Wilson returned to London in 1755, after an absence of six years, and acquired a great name in 1760 by his picture of 'Niobe.' He was one of the original thirty-six members of the Royal Academy, and succeeded Hayman as librarian in 1776. Towards the close of his life he came into possession of some property from a deceased brother, and he retired to the village of Llanverris, where he died in 1782. Wilson, admirable as his pictures are, was not successful, some of his works sold better than others, and these he accordingly frequently repeated, but generally with some slight difference. The figures of his pictures were frequently inserted by Mortimer and Hayman; his principal works are views in Italy; many of them have been admirably engraved by Woollett.—(T. Wright, *Some Account of the Life of Richard Wilson, R.A.* London, 1824.) [R.N.W.]

WILSON, SIR ROBERT, a British officer and politician, was born in London 1777, and commenced his military career in Flanders under the duke of York. He distinguished himself on many occasions during the wars against Napoleon, and was in Paris after his fall in 1815, where he aided in the escape of Lavalette. He sat in parliament as member for Southwark from 1818 to 1831, and in 1842 was appointed governor of Gibraltar. Died 1849.

WILSON, THOMAS, bishop of Sodor and Man, greatly distinguished for his pious and exemplary conduct, was born in Chester 1663, and educated at Dublin. He was appointed to his bishopric in 1697, and refused to leave his people when preferment was offered to him. He wrote a 'History of the Isle of Man' and some religious works, but is chiefly distinguished for his acts of practical benevolence; died in 1755.—His only son, of the same name, born in 1703, was rector of St. Stephens, Walbrook, for forty-six years. He rendered himself remarkable by his devoted admiration of the historian, Mrs. Macaulay, to whom he erected a statue in his church under the name of 'Liberty.' He wrote several works, among which are 'The Ornaments of Churches Considered,' 'A View of the Projected Improvements in Westminster,' and a pamphlet against distilled liquors. Died 1784.

WILSON, SIR THOMAS, a statesman and learned writer, age of Elizabeth, died 1581.

WILSON, WILLIAM RAE, a Scotch scholar, author of 'Travels in the Holy Land,' 1774-1849.

WILTON, JOSEPH, a sculptor, 1722-1803.

WILTZ, P., a French ascetic, 1671-1749.

WIMPFEN, FELIX DE, a French officer and member of the estates-general, born 1745, pensioned by the first consul in 1799, died in the employ of the state 1814. His brother, the BARON DE WIMPFEN BORNEBOURG, a general and writer on tactics, 1732-1800.

WINCHESTER, T., rector of Appleton, in Berkshire, and a learned writer, known 1749-1773.

WINCKELMANN, JOHN, a German protestant theologian, 1551-1626. His son, JOHN JUSTUS, an historian, born at Gnessen 1620, died 1697.

WINCKELRIED, ARNOLD DE, a Swiss peasant, who died gloriously fighting against the Austrians at Sempach, 1386.

Richard Wilson.

Cardinal Thomas Wolsey.

General George Washington.

Benjamin West P.R.A.

WINCKLEMAN, JOHN JOACHIM, a celebrated name in æsthetical and art literature, was born in the duchy of Brandenburg 1718. He devoted himself to the study of antiquities at Rome, where he obtained an appointment in the Vatican, and was murdered at Trieste on his way homewards for the sake of some golden medals he possessed, in 1768. His works on the history of art and ancient monuments have exercised the happiest influence on that description of literature, and are still invaluable as mines of information.

WINCKLER, T. F., an archæologist, 1771-1807.

WINDER, HENRY, a learned pastor of the nonconformists, author of a 'Hebrew English Concordance,' and other works, 1693-1752.

WINDHAM, JOSEPH, an artist and antiquarian, principal author of the 'Jonian Antiquities,' published by the Society of Dilettanti, 1739-1810.

WINDHAM, WILLIAM, a Whig statesman of the period of Pitt, was born in Norfolk, of an ancient family, in 1750, and made his first appearance in parliament as member for Norwich in 1783. His talents caused him to be singled out by Burke as one of his coadjutors, and he always remained his constant friend and partizan. From 1794 to 1801 he was in office under Pitt as secretary at war. He became secretary again under Lord Grenville after the death of Pitt, and held office from 1806 to March 25, 1807; d. 1810.

WINDHEIM, C. E., a German professor of philosophy and the Oriental languages, 1722-1766.

WINDISCH, C. G., a Germ. historian, 1725-93.

WING, VINCENT, an astronomer, 17th century.

WINGATE, EDMUND, an eminent mathematician, lawyer, and member of parliament, 1593-1656.

WINKELMANN. See WINCKELMANN.

WINKLER, J. H., a German jurisconsult and philosopher of the school of Wolfe, 1703-1772.

WINSLOW, EDWARD, the English governor of Plymouth, in North America, author of 'Good News from New England,' died 1655.

WINSLOW, JAMES, an eminent anatomist, born in the island of Funen, in Denmark, in the year 1669, and died at Paris in the year 1760, in the ninety-first year of his age. His system of anatomy was long the standard class-book of the schools, but in modern times it has been superseded by more perfect and more recent works. [J.M.C.]

WINSOR, FREDERICK ALBERT, the projector of the present method of lighting the streets by gas, first adopted in Pall Mall, after some smaller experiments, in 1809. Died 1830.

WINSTANLEY, WM., originally a barber, author of several literary compilations, d. abt. 1690.

WINSTON, T., an Engl. physician, 1575-1655.

WINTER, G. S., a German veterinarian, 17th c.

WINTER, JOHN WILLIAM DE, a Dutch vice-admiral, who entered the French service under Dumouriez as a partizan of the revolution, and was defeated in the Texel, at a later period, by Duncan, 1750-1812.

WINTER, N. S. VAN, a Dutch poet, born at Amsterdam, 1718. His wife, LUCRETIA WILHELMINA, a poetess, 1722-1795. PETER, son of Van Winter by a first marriage, author of poems and translations, beginning of the present century.

WINTER, P. VON, a Ger. musician, 1754-1825.

WINTHROP, J., an American astron., 1714-79.

WINTLE, T., a learned divine, 1737-1814.

WINTRINGHAM, CLIFTON, a physician and professional writer, died at York 1748. His son, SIR CLIFTON, also a physician and wr., 1714-94.

WINWOOD, SIR RALPH, a statesman and diplomatist, author of 'Memorials,' 1565-1617.

WIRSUNG, C., a German physician, 1500-1571. JOHN GEORGE, an anatomist, assass. 1643.

WIRTZ, J., a Swiss painter, 1640-1709.

WIRTZ, J. C., a Swiss theologian, 1688-1769.

WISE, F., a learned antiquary, 1695-1762.

WISEMAN, R., a surgical writer, 17th century.

WISHART, GEORGE, a martyr of the reformation in Scotland, burnt alive 1546.

WISHART, W., a Scotch divine, 1657-1727.

WISHEART, GEORGE, chaplain to Montrose, period of the civil wars, author of an 'Account of the Wars in Scotland,' and a Biography of his patron, 1609-1671.

WISTAR, CASPAR, a professor of anatomy and physician at Philadelphia, author of professional works, and a 'System of Anatomy,' 1760-1818.

WITCHELL, G., an astronomer, 1728-1785.

WITEZOWITCH, P., a learned historian and antiquarian of Dalmatia, died 1773.

WITHER, G., an English poet, 1588-1667.

WITHERING, WILLIAM, a physician and naturalist, author of a 'Systematic Arrangement of British Plants,' born in Shropshire 1741, d. 1799.

WITHERSPOON, JOHN, a descendant of Knox, known as a divine in Scotland and America, born near Edinburgh 1722, died 1794.

WITSIU, or WITS, HERMAN, a Dutch divine, author of several learned works, 1636-1708.

WITT. See DE-WITT.

WITTE, E., a Dutch painter, 1607-1692.

WITTE, G. DE, a Flem. theologian, 1638-1721.

WITE, or WITTEN, HENNING, a German divine and biographical writer, 1634-1696.

WITICHUUS, CHRISTOPHER, a protestant theologian and writer against Spinoza, 1625-1687.

WITOLA, M. A., a Ger. theologian, 1736-97.

WITTWER, P. L., a Ger. physician, 1752-92.

WLOOSWICK, P. N. BARON HORN VAN, a Dutch archæologist, born 1742, died in Paris 1809.

WOBESER, E. W., a German poet, 1727-1795.

WODHULL, M., a poet and translator of Euripides, born in Northamptonshire 1740, died 1816.

WODROW, ROBERT, a Scottish ecclesiastical historian, born at Glasgow 1679, died 1734.

WOEHNER, A. G., a Ger. Orient., 1693-1762.

WOELF, J., a German composer, 1772-1811.

WOFFINGTON, MARGARET, a celebrated actress of last century, whose society was highly valued by the *élite* of talent and fashion, 1718-60.

WOIDE, C. G., a Dutch Orientalist, 1725-90.

WOKEN, F., a German theologian, 1685-1734.

WOLCOTT, JOHN, commonly known by his assumed name of *Peter Pindar*, was a satirical poet and humourist, born at Dodbrooke in Devonshire 1738; died in London, where he supported himself by his pen, and his skill as an artist, 1819. The painter Opie was indebted to him for his introduction to the busy world of London, Dr. Wolcott having discovered his genius during his residence at Truro. The chief of his productions is his 'Lyric Odes to the Royal Academicians;' his other poems are principally satires..

WOLDECK D'ARNEBOURG, J. G., a Prussian general of the seven years' war, 1712-1785.

WOLF, B., a Dutch painter, 1758-1825.

WOLF, E. W., a German composer, 1735-1792.

WOLF, FREDERICK AUGUSTUS, an eminent classical scholar and philologist of Germany, was born in the county of Hohenstein in 1759, and became professor at Halle and Berlin. He was engaged in a literary contest with Heyne, arising out of his principal work, the 'Prolegomena ad Homerum,' or theory of the Homeric poems. Died 1824.

WOLF, G. F., a German anatomist, 1735-1794.

WOLF, JEROME, a learned German, professor of Greek at Augsburg, 1516-1581.

WOLF, JOHN, a German historian, 1587-1600.

WOLF, JOHN CHRISTOPHER, an eminent Lutheran divine and philologist, 1683-1739. His brother, J. CHRISTIAN, a philologist, 1689-1770.

WOLF, JOHN CHRISTIAN, born at Breslau in 1679, died at Halle in 1754; a man of considerable energy and of varied attainments—honoured to become member of the Academy of Berlin, the Royal Society of London, and the Academies of Sciences at Paris and Petersburg. Wolf, nevertheless, was of the class who flourish only when great men are gone: his industry was unquestionable, for he filled Europe with his words and books: his function too was respectable; he dried, cut up, and sold the Philosophy of Leibnitz. The volumes published by him are most numerous; their simple titles would occupy a column of our Dictionary:—it is unnecessary to print these titles, for none save Antiquarians will henceforth read Wolf. He was powerful in classification, subdivision, and nomenclature; to him, for instance, we owe the technical term *Rational Psychology*, as distinguished from experimental: he thus designated his efforts—sufficiently unsatisfactory—to explain the facts of consciousness by the essence of the Soul. Wolf's greatest merit flows from his moral courage. He bravely contended for the rights of Free Thought, in the face of immense clamour and much persecution.—His system and authority were hopelessly destroyed by KANT. [J.P.N.]

WOLF, PETER PHILIP, an historian of the Jesuits and of Maximilian I., 1761-1808.

WOLFART, P., a Germ. physician, 1675-1726.

WOLFE, CHARLES, author of the famous ode entitled 'The Burial of Sir John Moore,' was a divine of the Irish Church, and was born at Dublin 1791. He died prematurely in 1823. His literary remains were published two years subsequently by the Rev. J. A. Russel.

WOLFE. GENERAL JAMES WOLFE was born in Westerham in Kent, A.D. 1726. His father was a general, and young Wolfe entered the army at a very early age. He was honourably distinguished in the battle of Dettingen and Fontenoy; and at the subsequent battle of Laffeldt in 1747, he attracted the special notice of his commander, the duke of Cumberland, who ever afterwards zealously aided in Wolfe's promotion and advancement. He was not more eminent for personal bravery and coolness in action, than for his success in disciplining his men, while at the same time he won the heart of every soldier that served under him. When our great minister, the elder Pitt, undertook in 1757 to raise England from the temporary degradation into which she had then fallen, and to smite down the House of Bourbon in every quarter of the globe, he discerned the genius of Wolfe:

and wisely disregarding the conventional claims of seniority, Pitt intrusted to the young officer the highest duties in the conquest of French America. Wolfe, in conjunction with Amherst, led the force which besieged and captured Louisbourg in July, 1758, an achievement which gave us Cape Breton and Prince Edward's Island. In 1759 Pitt conferred on Wolfe the still more important command of the expedition against Canada, which was to advance up the St. Lawrence and attack Quebec from the west, while the other British commander in North America was to co-operate by assailing the French possessions from the opposite direction. Wolfe reached the Isle of Orleans in the St. Lawrence on the 26th June, with a force of 8,000 excellent troops, and with a fleet of twenty-two sail of the line under Admiral Saunders. Montcalm, the French governor of Canada, had concentrated all the military strength of the province in Quebec; and, though he was inferior to Wolfe in the number of regular troops, the zeal of the numerous French provincials who fought under him, the strength of his position, and the skill with which he fortified and watched each approach to Quebec, made Wolfe's enterprise appear almost hopeless. The English commander who invaded Canada from the other direction, and who ought to have invested Quebec from the upper side, loitered on his march; and for two months Wolfe and his force lay below the city, unable to strike any effective blow, and taught by a severe repulse which they sustained on the 31st of July, with how strong and vigilant an adversary they had to cope. Wolfe's health was shattered by anxiety and fever; but he spared neither mind nor body; and at length he himself discovered the cove above the town, which now bears his name, and the narrow winding path that leads from it up the cliff to the heights of Abraham, a plateau to the west of Quebec, where the city's fortifications were feeblest. He succeeded in the night of the 12th September, in leading

[Wolfe's Monument.]

5,000 of his men up this path, and in surprising the post of Canadians by whom the summit was guarded. On the next morning Montcalm led his

troops out to meet him, and the battle was fought, which determined the ascendancy of the Anglo-Saxon race and language over the French in the New World. Both Wolfe and Montcalm fell. Wolfe was twice struck as he led on a bayonet charge which decided the day; and when the French were already broken, he received a third bullet, which was fatal, in the heart. He lived just long enough to know that the victory was complete; and the last words of the young conqueror were—'Now, God be praised, I die happy.' Wolfe was as exemplary in private life, as he was eminent in the discharge of public duty, and his name is one of the purest as well as the brightest in the long list of England's military heroes. [E.S.C.]

WOLFERSDORF, CH. FREDERICK VON, a Prussian general, born in Saxe Gotha, 1717-1781.

WOLTER, P., a Germ. historian, 1758-1805.

WOLGUTT, M., a Ger. painter, 1434-1519.

WOLKE, C. H., a native of Hanover, distinguished by his efforts, as a writer and founder, in the cause of education, 1741-1825.

WOLLASTON, WILLIAM, an eminent moralist and theologian, who was educated for the church, but having ample means left him by a rich relation, devoted himself to literature. His principal work, and one which has been highly popular, is 'The Religion of Nature Delineated.' Born in Staffordshire 1659, died 1724.

WOLLASTON, WILLIAM HYDE, M.D., born 6th August, 1766, at East Dereham, near Norwich, of which his father was clergyman; died 22d December, 1828, in London. Dr. Wollaston received a first-rate education, and having studied for the medical profession, settled first at Bury St. Edmunds. Afterwards, becoming a candidate for St. George's Hospital, London, and failing, he gave up the profession in disgust, and devoted himself to chemical pursuits. He examined with great care the crude platinum ore, discovering in it two new metals, palladium and rhodium, and improving the process for the manufacture of platinum, so as to enable him to realize a handsome fortune. In 1797 he described three new species of urinary calculi—the fusible calculus, the mulberry calculus, and the bone-earth calculus. He also first described cystic oxide, and urate of soda calculi, the latter formed in the joints of gouty persons. He was the inventor of the periscopic camera, and of numerous ingenious optical and chemical apparatus. To him chemistry is indebted for the methods at present employed for the estimation of ammonia, potash, and magnesia. Dr. Wollaston was a man of retiring habits, but by those who knew him intimately he was held in high regard. He has been accused of a penurious disposition. The fact that he presented his brother with £10,000 when asked to apply to the ministry in his behalf, seems to afford opposite evidence of the most substantial and overwhelming description. [R.D.T.]

WOLLE, C., a German Orientalist, 1700-1761.

WOLMAR, M., a Swiss jurist, 1497-1561.

WOLSEY, THOMAS, so well known in history as Cardinal Wolsey, is generally said to have been born at Ipswich, in the year 1471. His parents were so obscure, that whether or not his father followed the occupation of a butcher, attributed to him by the cardinal's enemies, has not been ascer-

tained. However it may have been achieved, young Wolsey obtained an excellent education, and he had a brilliant student-reputation at Magdalen College, Oxford. He never was an ascetic. Though he must have worked hard during his college career, he seems to have had his full share of the dissipation of the day, and it is known that for some peccadillo he was on one occasion subjected to the penal discipline of the stocks. His first preferment, after he had taken orders, was that of Symington in Somersetshire, believed to have been obtained through the marquis of Dorset, whose sons he instructed. The turning point in his career appears to have been his appointment as one of the chaplains of Henry VII. This introduced his abilities to the royal notice, and on his successful accomplishment of a delicate diplomatic mission to Flanders he obtained the rich deanery of Lincoln in 1508. It is not easy precisely to determine the source of the extraordinary influence which he exercised over Henry VIII. in the early years of his reign. He is said by his able scholarship to have aided in the composition of the celebrated *Assertio Septem Sacramentorum*, against Luther; but he was a favourite before he had an opportunity of performing this service. He was placed in the influential office of the king's almoner, through the recommendation of Fox, the bishop of Winchester; and that calculating prelate is said to have advanced Wolsey for the purpose of counteracting his rival Surrey. When once the impetuous Henry had learned to seek counsel of Wolsey, it is easy to believe that his magnificent notions, his scholarship, his knowledge of life, and his accommodating morality, would please such a monarch. Preferment flowed in upon him. In 1514 he was made bishop of Lincoln. He was then in possession of lucrative livings both in England and France. In 1515 he was made cardinal, and next year legate *a latere*, a commission which made him virtually the pope in England, giving him an authority which, if more limited in extent than that claimed by the bishop of Rome, was the more powerful, since it was exercised close at hand, and by one who knew the circumstances of the clergy over whom he ruled. Almost at the same time with these preferments he received the high ministerial and judicial office of lord chancellor. With his cardinalate he received the honour of the hat, usually conferred only on members of royal families. He held the bishopric of Tournay in France, and many other lucrative preferments in different parts of Europe. The vast influence which he exercised at the powerful court of England made his friendship an object not only to private seekers of preferment, but to the principal European powers. He aspired to the popedom at the time when Charles V. and Francis the First were competing with each other to succeed Maximilian as emperor of Germany. Hence each of them sought to secure the aid of Wolsey, by outbidding his rival in prospects of assistance towards the cardinal's great object, while he on his part had the too difficult task of making up his mind where to throw his influence, and of acting for one party with as little prejudice as possible to his influence with the other. He lost, much to his mortification, the great object which would have given him a securer foundation for power than he had in England, and

he ever treated the emperor Charles V. as one who had deceived him. No churchman in England had ever achieved so vast an amount of power and wealth as Wolsey, and, unfortunately for himself, he was fond of exhibiting it all to the world. He had a weakness for display, shown in the common anecdote about his having his portrait always taken in profile from one side, because the other was disfigured by a wart. The huge acquisitions made by fortunate prelates, and the ramifications of their influence by possessions all over Europe, were giving great alarm to thinking minds; and there is no doubt that the ostentation with which Wolsey displayed the offensive innovation hastened on the reformation. He had even given an impulse in the same direction by his enlightened projects for diverting some of the monastic property from its existing uses to the university of Oxford, and to other educational institutions. His qualities and defects are told with matchless truth and beauty in the words supplied by Shakspere to his faithful followers:—

'He was a scholar, and a ripe and good one;
Exceeding wise, fair spoken and persuading;
Lofty and sour to them that loved him not,
But to those men that sought him, sweet as summer.
And though he was unsatisfied in getting,
(Which was a sin), yet in bestowing, madam,
He was most princely.'

His enmity to the emperor inclined him to sanction his sister's divorce from Henry, but as a high churchman he found it impossible to be the king's champion through the whole transaction. To justify his overthrow, charges were brought against him under the *præmunire* statute against enforcing bulls from Rome. The charge was one which with the royal favour he might have met, but when it was directed from that quarter it was irresistible. After being subjected to some capricious oscillations of favour, a warrant was issued to apprehend him for high treason. Attacked by sickness, he sought refuge in the abbey of Leicester with the mournful saying,—'Father abbot, I am come to lay my bones among you.' He died there on the 28th November, 1530. [J.H.B.]

[Leicester Abbey.]

WOLSTONECRAFT, Mary, wife of William Godwin, au. of the 'Rights of Women,' 1759-97.

WOLTMANN, C. L. DE, a German historian and man of letters, 1770-1817.

WOLZOGEN, J. L., a Socinian wr., 1596-1656.
WOLZOGEN, L. VAN, a learned Dutch theologian and elocutionist, 1632-1690.

WOMOCK, LAURENCE, bishop of St. David's and a controversial writer, 1612-1685.

WOOD, ANTHONY, author of the 'History and Antiquities of Oxford,' and the 'Athenæ Oxoniensis,' was born in 1632, and educated at the university. His works were written with the indefatigable zeal of an enthusiast, and are often quoted. He died in his native place, where he had lived and laboured, in 1695.

WOOD, JAMES, the banker and millionaire of Gloucester, was born there in 1756, and died 1830. His only distinction is that of having scraped together, by indulging in every meanness, nearly a million sterling. There is not a redeeming trait recorded of his character, and nothing could entitle him to a place in our pages but the frequency with which the name of 'Jemmy Wood' is quoted by way of example.

WOOD, MATTHEW, knight and alderman of London, was the son of a lace manufacturer at Tiverton, and was born in 1767. He acquired his standing in the city as a hop merchant, and was twice mayor, in 1815 and 1816; from the last named year also he had a seat in parliament, and was well known as a reformer. Died 1843.

WOOD, ROBERT, an Irish scholar and archaeologist, au. of a 'Description of the Ruins of Ballinacorney,' and those of 'Palmyra' or 'Tadmor,' 1716-73.

WOODDESON, RICHARD, an English civil lawyer, au. of 'Elements of Jurisprudence,' and 'A Systematic View of the Laws of England,' 1745-1820.

WOODFALL, WILLIAM, a celebrated printer, whose name became famous from the prosecution to which he was exposed for printing the Letters of Junius. Died 1803.

WOODHOUSE, ROBERT, an eminent mathematician and professor at Cambridge, author of 'The Principles of Analytical Calculation,' and other works, 1773-1827.

WOODHOUSELEE. See TYTLER.

WOODVILLE. See ELIZABETH.

WOODVILLE, ANTHONY, otherwise WYDEVILLE, brother of Elizabeth, queen of Edward IV., and created by him Earl Rivers, was born in 1442. He made an unsuccessful attempt to crow the king's son, and was sent to the scaffold 1483.

WOODVILLE, WILLIAM, physician to the Middlesex Dispensary and Small-pox Hospital in London, author of 'Medical Botany,' and a 'History of Inoculation,' 1752-1805.

WOODWARD, HENRY, a famous comedian, dramatic writer, and composer of pantomimes, born in London 1717, died 1777.

WOODWARD, JOHN, a physician and professor at Gresham College, distinguished as a naturalist and antiquarian, was born in Derbyshire 1665, and died 1728. His principal work is an 'Essay towards a Natural History of the Earth.'

WOOLLETT, WILLIAM, was born at Maidstone in Kent in 1735, and learnt engraving of John Tinney. He acquired early a great reputation as a landscape engraver; his works of this class, after Wilson, are probably still unapproached. He engraved also two of West's greatest works, the 'Death of General Wolfe,' and the 'Battle of the Hogue,' which raised his reputation as an historical

cal engraver almost on a par with his name in landscape. He was appointed engraver to George III.; and died in London, May 23, 1785. Woollett is great for his colour, and his skill in representing variety of texture, also for an extraordinary force in his prints, owing to the judicious combination of the three methods, with aquafortis, with the graver, and with the dry point. His works after Wilson constitute in themselves a delightful landscape gallery, all unsurpassed as pictures or as prints. [R.N.W.]

WOOLSTON, THOMAS, a deistical writer, who was originally a minister of the Church of England, and wrote an 'Apology for the Christian Religion'; at a later period, he was prosecuted for his 'Six Discourses on Miracles,' and his 'Defence' of the discourses. Born at Northampton, 1669, d. 1732.

WOOLTON, JOHN, bishop of Exeter, known as a theological writer, 1535-1594.

WORDSWORTH, WILLIAM, was born at Cockermouth in Cumberland, on the 7th of April, 1770. His father was an attorney there, and he was the second of five children. Dorothy, the only daughter, was his most cherished friend and confidant during his life. The mother of the family died in William's ninth year; and the father died five years afterwards, leaving to his children little fortune beyond a claim for law-agency on Sir James Lowther, afterwards earl of Lonsdale. This debt remained unsatisfied till 1802, when, on the accession of the next earl, £8,500 was paid in satisfaction of it.—In 1787, after having been educated chiefly at the endowed school of Hawkshead, near Esthwaite Lake, William was sent by his uncles to St. John's College, Cambridge. He had read much in boyhood, especially poetry, and had written English verses, in imitation (as he says himself) of Pope's versification, 'and a little in his style.' One of these compositions presaged two of the most prominent features in the character of his mind. It was, says he, 'a long poem, running upon my own adventures, and the scenery of the country in which I was brought up.' The only considerable poem which he wrote while at the university, was 'The Evening Walk.' His vacations were devoted to wanderings in the country; and in the autumn of 1790 he spent nearly three months in a tour on the continent, visiting France, Switzerland, some of the Italian lakes, and the Rhine. He disliked the system of the university, and attended little to the studies of the place. Indeed, it is to be observed that, through life, Wordsworth was as little of a student as any literary man ever was. Except in poetical literature, his knowledge of books seems to have always been very slight. And if he was disinclined to read, he was quite as much disinclined to writing: he had weak eyes, and great indolence. In his mature years, he composed most frequently in the course of his walks, without setting down a word; and many of his poems would certainly have been lost, had not the ladies of his family been at hand to record them. He has himself said, that, if he had been free to choose his course of life, he would have spent his days in travelling. To the adoption of a profession he was never able to make up his mind. The church was proposed to him, but speedily rejected. His religious belief never was such as to prevent his taking orders; but his

opinions on the state of society, during his early manhood, would not easily have been reconcilable with the position of a clergyman in the Church of England. For several years after the outbreak of the French revolution, he was an ardent republican. In 1791 he took his degree of B.A., and quitted Cambridge.—In the close of the same year he went to France, where he spent nearly twelve months; and there he wrote the poem called 'Descriptive Sketches,' which betrays, yet more than 'The Evening Walk,' the poetic strength with which he was endowed. These pieces were published in 1793. In that year, also, 'The Female Vagrant' was written. For some years he wandered about, gradually satisfying himself that he was justified in regarding poetry as his true vocation. He planned a monthly miscellany, which was to have been 'republican but not revolutionary;' and he attempted to find employment in writing for the London newspapers on the opposition side. In 1795 he received a legacy of £900 from his friend and contemporary, Raisley Calvert. This generous and seasonable bequest fully answered the intention of the donor: it enabled the poet to devote himself to study till the settlement of his father's affairs.—In the autumn of 1795 Wordsworth began to live with his sister, their first residence being at Racedown in Dorsetshire. He commenced, but abandoned, a poetical imitation of Juvenal; and in this year and the following, he made his first and last attempt in a kind of poetry very uncongenial to the cast of his genius, by writing the Tragedy of 'The Borderers.' Refused at Covent Garden, this piece remained in manuscript for nearly half a century.—About this time, likewise, were written a good many of the earliest of those fine passages, which were afterwards dovetailed into 'The Excursion.' This is a fact particularly deserving attention. The poet's blank-verse compositions, with their solemn tone of meditation, their purely dignified diction, and their sweep of rotund melody, were made known to the world only when he had passed middle age; and they were treated by his critics as the fruits of improved skill and enlarged experience and purified taste. But he actually had at his command, and was continually expressing, this his highest mood of poetry, from his twenty-fifth year. Coleridge, with whom Wordsworth made acquaintance while in Dorsetshire, always insisted that his friend's first business ought to be, the completion of the Philosophical and Autobiographical Poem, of which these fragments were designed as parts. But Wordsworth was never at all disposed to pay deference to the opinion either of affectionate friends or of hostile critics. With him, as with most of us, 'the boy was father of the man.' He had always been quietly self-willed; and his character in manhood possessed the feature which he attributes to his early boyhood when he says:—'Possibly from some want of judgment in punishments inflicted, I had become perverse and obstinate in defying chastisement, and rather proud of it than otherwise.' At this time, indeed, as it has been remarked by his nephew, the whole tenor of his opinions led him to dissatisfaction with things existing; and his political creed (perhaps in part through the shock which events on the continent were beginning to give to it) affected his creed in literature. He perceived, with great

clearness, two or three deep-rooted faults in the recent poets of England: the artificial stamp of their diction; their general inattention to external nature; their want of sympathy with ordinary events and with the feelings of mankind at large. He felt that he possessed the power of producing poetry, in which these faults should be avoided. But, in the meantime, tempted partly by deliberate error in theory, partly by incidental eccentricities of taste and judgment natural to a self-trained and uncommunicative muser, he rebelled, not only against the false canons of literature, but against several that are really true. In the poems with which he chose to make his first effort towards the reformation of the public taste, there are many points of thought, of sentiment, and of expression, which, as the most judicious of his admirers allow, would not have appeared if those poems had been written even a few years afterwards. Some things, indeed, especially the oddest and boldest of the colloquial words and idioms, were silently altered in the later editions. But the eccentricity of judgment lingered, in a great degree, to the last, fostered by the self-brooding solitude to which he devoted himself.—The ‘Lyrical Ballads,’ to which chiefly these observations are applicable, made rapid progress in Wordsworth’s next place of abode. This was Nether-Stowey in Somersetshire, where he lived for a year, removing to the place in August, 1797, in order to be near Coleridge. In the next year he wrote ‘Peter Bell;’ and in autumn he published, in one volume, the twenty poems which (with three by Coleridge) make up the first edition of the ‘Lyrical Ballads.’ The poet was now in his twenty-ninth year. Immediately afterwards he went to Germany with his sister and Coleridge; and, the party separating, Miss Wordsworth and her brother spent the winter of 1798-99, very uncomfortably, and seemingly with little advantage of any kind, at Goslar in Hanover. Here were written several beautiful pieces, among which were ‘Lucy Gray,’ and the fragments of blank-verse beginning ‘There was a Boy’ and ‘Wisdom and Spirit of the Universe.’ A beginning was also made with that first part of the great Poem, which Wordsworth’s friends entitled ‘The Prelude.’—Wordsworth’s long residence among the lakes of his native district began soon after his return to England. In the end of 1799 he settled with his sister in a small house at Grasmere, which he continued to occupy for eight years. In 1800 were written ‘The Brothers,’ ‘The Pet Lamb,’ ‘Ruth,’ ‘Michael,’ and ‘Hart-Leap Well;’ and, in the close of the year these and other poems made up a second volume of the ‘Lyrical Ballads,’ which appeared with a reprint of the first. To 1802 belong, among other pieces, ‘The Rainbow,’ ‘The Leech-gatherer,’ ‘Alice Fell,’ ‘Intimations of Immortality,’ and the two Sonnets on Buonaparte. Then, also, Wordsworth was working on ‘The Excursion,’ which at that time bore the name of ‘The Pedlar.’ In that year, he married Mary Hutchinson of Penrith, to whose amiability his poems pay warm and beautiful tributes. In 1803 he made a tour of some weeks in Scotland, being guided at Melrose by Walter Scott; and he now became acquainted with Sir George Beaumont, whose name appears often in his writings. In 1805 he suffered the grief of losing his brother, Captain Wordsworth, who

perished by shipwreck. In this year were written ‘The Waggoner’ and the ‘Ode to Duty;’ and ‘The Prelude’ was finished, and consigned to the poet’s desk for forty-five years. In 1807 were printed two volumes of poems, composed since 1800. They contain, besides several very fine ballads, and many other small poems, the ‘Sonnet Dedicated to Liberty,’ and the ‘Memorials of Tour in Scotland.’ These volumes were the object of some of those critical censures, (severe but very far from being groundless,) under which, with a his outward apathy and real self-esteem, the poet as his letters show, smarted very severely.—In 1808 he removed to Allan Bank at the head of Grasmere Lake, where he lived for three years. In 1809 he contributed to the ‘Friend’ of Coleridge, who was then living with him; and published his indignant and very eloquent pamphlet on the Convention of Cintra. His political opinions have now settled pretty much into the form they ever afterwards held, a kind of speculative Toryism heightened by his church opinions, but balanced by many notions really democratic. In 1810

[Rydal Mount.]

printed, as an introduction to a set of Views of the district, his Observations on the Scenery of the Lakes, the most interesting of all things of the sort. In this year was born the last of his five children, two of whom died two years afterwards.—In the spring of 1813, after one temporary change of dwelling, he took up his abode at Rydal Mount, two miles from Grasmere, which was his home for thirty-seven years, and the scene of his death. Then, too, by the interest of Lord Lonsdale, he was appointed distributor of stamps for Westmoreland, an office which was executed by a clerk, and yielded about £500 a-year.—A second tour in Scotland, early in 1814, gave birth to a few poems; and in summer was published ‘The Excursion,’ the greater part of which had been written at Allan Bank. This edition, consisting of five hundred copies, was not exhausted for six years. ‘Let the age,’ wrote the poet to Southey, ‘continue to love its darkness; I shall continue to write, with, I trust, the light of Heaven upon me.’ In the design of this remarkable poem, it is difficult to discover anything that can justify commendation, whether we look to it as an independent work, or regard it as forming a part in that gigantic poem, which the author so long contemplated executing in which

William 3.rd King of England.

But if 'The Excursion' is to be judged by its best passages, hardly any poem in our language is equal to it. Some of its scenes, extending through hundreds of lines; many passages of smaller extent, but yet considerable; and innumerable verses, and phrases, and words; are among the most exquisite things to which any poetic mind ever gave expression.—In 1815 appeared 'The White Doe of Rylstone,' a work instinct with a dreamy loveliness, and estimated by its author very highly. But it evinces, more plainly than any of his preceding works, his incapacity to plan or conduct a sustained narrative; and it is characterized, even more than the 'Lyrical Ballads,' by that which Coleridge had publicly pronounced to be one of his friend's besetting sins; namely, the prevalence of 'an intensity of feeling disproportionate to such knowledge and value of the objects described, as can be fairly anticipated of men in general, even of the most cultivated classes.'—Within a year or two before and after the publication of this work, the poet, in his usual fashion, proved his power of poetizing in a very different key, by composing several of those small pieces, whose elaborate refinement, both of sentiment and of diction, has drawn forth the lively admiration of readers the most adverse to the peculiarities of his system. Such were 'Laodamia,' 'Dion,' the 'Ode to Lycoris,' and 'Artegall and Elidure.' In 1816 was composed the 'Thanksgiving Ode,' and a rhymed translation of Three Books of the *Æneid*. In 1819 appeared 'Peter Bell,' which was rather popular, and the 'Waggoner,' which was much the reverse. To that year belong the series of Sonnets on the River Duddon. In 1820 Wordsworth, with his wife and sister, made a tour of four months on the continent, of which 'Memorials' were published some time afterwards. In that year, too, a visit to Sir George Beaumont gave occasion to the very fine series of Sonnets called 'Ecclesiastical Sketches.'—Wordsworth was now fifty years old, had written all his best works, and had laid most of them before the world. But, though the thirty years during which his life was still prolonged were unproductive of great performances, they witnessed very extraordinary changes in the reputation of the author. Poets were already familiar with his works, and acknowledged him as the chief in a new development of the art; but ordinary readers, taking what they found of him in the periodicals, knew as yet only a few of his best passages and a great many of his worst. The *Edinburgh Review*, supported afterwards by the *Quarterly*, had hitherto guided the public opinion as to his writings; a turn was now given to the tide, by the eloquently vehement panegyrics which began to be showered on him in *Blackwood's Magazine*, about the year 1820. Without taking account of minor points, we may correctly consider Wordsworth's principal critics as looking at the functions and duties of poetry from two opposite points of view. Jeffrey paid regard mainly to the perfection or imperfection of the result; Wilson and his friends were content with examining the state of mind out of which the result is generated. The former, severely pure in taste, demanded an elaborate work of art, symmetrically designed, and executed with care and dignity; the latter sought for nothing beyond such proof of genius as might be furnished in a few striking pas-

sages, and held native endowment as more than sufficient to atone for imperfect execution. Scrutinized in the first of these aspects, all the brilliant poetry which arose in England during the first generation of our century was seriously defective; and that of Wordsworth, with all his deliberation and slowness of performance, was, through the natural character of his mind, still more open to exception than the effusions of Scott and Byron had been made by carelessness and haste. Even those who, having formed a competent acquaintance with Wordsworth's works, felt themselves compelled to adopt this view, could not be, and were not, blind to the admirable beauties of detail, which, when blazoned forth by the pen of Christopher North, speedily made the poet's name to be a word of honour, even with those who knew none of his poems but in fragments, or who were wearied or repelled by the inanimateness and the disproportionate design of 'The Excursion.' The fame of the Poet of the Lakes grew yet wider, when his influence had shown itself decisively in that new school of poetry, which had its beginnings with Keats and Shelley. For a good many years before his death, Wordsworth was not only acknowledged, and justly, to be really the greatest English poet of his time, but was regarded with a reverence allowing no possibility of faults. Symptoms of a wiser and more discriminating judgment have shown themselves of late; and, in no long time, the world will estimate justly and correctly the works of one of the greatest, as well as purest and most blameless, of the poets who have enriched and enlarged the domain of English literature.—The period extending from Wordsworth's fiftieth year to his eightieth requires no minute notice. He lived among his beloved mountains, travelled much, suffered a good deal, and wrote little. Two visits to Scotland, in the former of which (in 1831) he saw Scott just before he left Abbotsford for the last time, provided many of the materials for a volume, published in 1835, 'Yarrow Revisited, and other poems.' The finest of these are the meditative pieces entitled 'Evening Voluntaries.' About this time the poet was deeply affected by political events; and he felt yet more keenly the declining health of his sister, who became a confirmed invalid. In 1837 he made, for nearly six months, a tour in Italy, which suggested several pieces, printed, in 1842, in a volume called 'Poems, chiefly of Early and Late Years.' In it was inserted the Tragedy of 'The Borderers.' In that year, being now seventy-two years of age, he resigned his distributorship in favour of one of his two sons, and received from Sir Robert Peel a pension of three hundred a-year. In 1843, on the death of Southey, the same ministry appointed Wordsworth to be Poet-Laureate; an office which he accepted only on the assurance, that it was to be entirely nominal and honorary. In 1847 he had to witness the death of his accomplished daughter, Mrs. Quillinan. He died on the 23d of April, 1850, being exactly the day of the month which closed the life of Shakspeare. His remains rest in the churchyard of Grasmere. [W.S.]

WORGAN, J. D., an English poet, 1790-1819.

WORLIDGE, T., a portrait painter and engraver of etchings after Rembrandt, 1700-1766.

WORM, OLAUS, in Latin *Wormius*, a Dutch physician and antiquarian, 1588-1654.

WORONZOW, M. LARIONOWITZ; Count De, a Russian statesman and favourite of the empress Elizabeth, disgraced under Catharine, 1710-1767.

WORSDALE, JAMES, a dramatic writer and painter, taught by Sir G. Kneller, died 1767.

WORSLEY, SIR RICHARD, the historian of the Isle of Wight, was born there in 1751. He became governor of the island, comptroller of the royal household, and member for Newport. In addition to his historical work, he published a magnificent catalogue of his marbles and other antiques, under the title of 'Museum Worsleianum.' Died 1805.

WORTHINGTON, JOHN, rector of Ingoldsby in Lincolnshire, author of religious works, &c., 'The Doctrine of the Resurrection,' 1618-1671.

WORTHINGTON, THOMAS, a Roman Catholic theologian, died in exile about 1626.

WORTHINGTON, WILLIAM, vicar of Llarrhayard in Denbighshire, and a dignitary of the church, was born in Merionethshire 1703, and educated at Oxford. Died 1778. His principal works are an 'Essay on the Scheme of Redemption,' 'The Scripture Theory of the Earth,' 'On the Historical Sense of the Mosaic Account of the Fall,' and an 'Inquiry into the Case of the Gospel Demoniacs.'

WOTTON, EDWARD, a physician and naturalist, time of Henry VIII., 1492-1555.

WOTTON, SIR HENRY, a well-known statesman, diplomatist, and political writer, born in Kent 1568, died 1639. He went as an ambassador to Venice, the United Provinces, and several of the German courts in the reign of James I. His works are 'The States of Christendom,' 'Parallels between Essex and Buckingham,' 'Elements of Architecture,' 'Characters of the Kings of England,' and Poems, &c.

WOTTON, WILLIAM, a clergyman of the Church of England, remarkable for his precocious knowledge of the sciences and Oriental languages, author of 'Reflections upon Ancient and Modern Learning,' a 'History of Rome, from the Death of Antoninus Pius to the Death of Alexander Severus,' 'Memoirs of the Cathedrals of St. David's and Llandaff,' and other works of less note. Born at Wrentham in Suffolk 1666, died 1726.

WOUTERS, F., a Flemish painter, 1614-1659.

WOUVERMAN, PHILIP, was born at Haarlem in 1620, where he died in 1668, aged only forty-eight. Though one of the most masterly of painters, he is said to have been disappointed. His works became very valuable soon after his death, and have increased in value since, but according to D'Argenville, who rather contradicts Houbraken, he was so supremely disgusted with the encouragement he received, that shortly before his death he burnt all his drawings and studies, in case they should encourage his son to follow the profession of a painter: he seems to have worked chiefly to have enriched the dealers even during his own lifetime. Wouverman's subjects are generally road-side, travelling, hunting, fighting, or plundering scenes, and such as admit of horses, which he constantly introduced in his pictures; it is a common belief that he never painted a picture without a white or a gray horse, but this is doubtless an exaggeration. He painted horses in small with unrivalled skill; indeed, his mastery in every department of painting is perfectly extraordinary, and his colouring is always

rich and transparent. All the works, however attributed to Philip Wouverman, are not his; many were doubtless the productions of his brother **PETER WOUVERMAN,** who survived Philip many years; a second brother, **JOHN,** was a good landscape painter.—(Houbraken, *Groote Schouburgh* &c.) [R.N.W.]

WRANGEL, HERMANN, a Swedish general, rewarded with a marshal's baton by Gustavus Adolphus, 1587-1644. His son, **CHARLES GUSTAVUS,** greatly distinguished in the German wars and in the councils of his sovereign, 1613-1676.

WRAXALL, SIR N. W., an indefatigable traveller and historical writer in the civil service of the East India Company, 1751-1831.

WRAY, D., an archaeologist, 1701-1783.

WREDE, CHARLES PHILIP, Prince, a Bavarian officer and statesman, who served as the ally of Napoleon from 1805 to 1813, and in the two following years joined the coalition, 1767-1839.

WREN, SIR CHRISTOPHER, was born at East Knoyle, Wilts, October 20, 1632; his father was rector of the parish. He was educated at Westminster school, and showed great mechanical ability at a very early age. In 1646 he went to Oxford, and entered as a gentleman commoner at Wadham College; he took his bachelor's degree in 1650, became a fellow of All Souls, and a master of arts in 1653; and in 1657, then only in his twenty-fifth year, was chosen professor of astronomy in Gresham College, London, and in 1666 Savilian professor of astronomy at Oxford, where he also took his degree of doctor of civil law. The following year he was the chief mover in procuring the foundation of the Royal Society, which had already existed some few years as the Philosophical Club, and he became its president in 1668. Such were the preliminary studies of England's greatest architect, but he had already commenced his great career in 1661 as assistant to Sir John Denham, the surveyor of the royal works, who was himself incapable of the duties of the office. Wren's first work in this capacity was a new hall for the public meetings of the university, a commission intrusted to him by Archbishop Sheldon, the chancellor of the university, since celebrated as the Sheldonian Theatre; it was completed in 1668. About the same time he built a new chapel for Pembroke College, Cambridge, for his uncle, the bishop of Ely. In 1665 he visited Paris. In 1666 he succeeded Sir John Denham as surveyor of the royal works, with a salary of £100 per annum, and as surveyor-general of the repairs of St. Paul's. In 1672 he submitted plans for a new church instead of attempting to repair the old one, which had been completely destroyed by the fire. A commission was appointed for the execution of the work in 1673, and Wren having given up his professorship at Oxford, was appointed architect of the cathedral, and was knighted by the king on the occasion. This great work, in style the Italian renaissance, occupied nearly forty years; it was completed in 1710; Wren receiving only £20 a-year as architect of St. Paul's, but he executed many other churches and public buildings in London at the same time, as 'The Monument,' Temple Bar, &c., besides some others in the country, Oxford, and Cambridge, Winchester, Greenwich, Hampton Court, &c. Of all his great works, e

towers of Westminster Abbey are alone discreditable; he was, however, not very successful in his palaces, as for instance, the additions to Hampton Court, and Marlborough House, in both of which the apartments are of mean proportions, contrasting strongly even with the hunting boxes of many German princes. The cartoon gallery at Hampton Court is deplorably ill suited to its purpose. Sir Christopher never visited Italy; his mastery of the Italian renaissance he owes probably mainly to the example of Inigo Jones; he has in St. Paul's achieved something more than a worthy rival of St. Peter's; though on so much smaller a scale, it has internally through its so far more judicious proportions even a vaster effect than St. Peter's at Rome; the interior, however, is painfully cold, but this is no fault of Wren's, it is the general want of colour and other decoration. The original design was more like St. Peter's than that carried out. In 1684 Wren was appointed comptroller of the works at Windsor, and in 1685 he was returned to parliament as one of the members for Plympton; he sat also in following parliaments for Windsor and for Weymouth. In 1717, after the death of Anne, he lost the favour of the court, and was removed from his office of surveyor-general. He retired to Hampton Court, where he died February 25, 1723.—(*Parentalia*, 1750; Elmes, *Life of Wren*; Allan Cunningham, *Lives of the Painters*, &c.; *Penny Cyclopædia*.) [R.N.W.]

WREN, M., a learned prelate, 1585-1667.

WRIGHT, ABRAHAM, an English theologian, 1611-1690. His son, JAMES, an antiquarian and historian of Rutlandshire, 1644-1715.

WRIGHT, EDWARD, a mathematician, who is said to have discovered the true method of dividing the meridian line, about 1560-1615.

WRIGHT, JOSEPH, a painter of versatile ability, commonly called 'Wright of Derby,' and particularly skilled in landscapes, and scenes in which the effects of fire-light is introduced, 1734-1797.

WRIGHT, S., a nonconform. divine, 1683-1746.

WRIGHT, W., a Jesuit and theologian, d. 1639.

WRIGHT, W. R., president of the Court of Appeal at Malta, author of 'Horse Ionice,' a work describing the Greek isles, died 1826.

WRISBERG, H. A., a Ger. anatom., 1739-1808.

WUCHERER, F., a Ger. theologian, 1682-1737.

WULFER, J., a Germ. Orientalist, 1651-1682.

WUNSCH, C. E., a Prussian astronomer, physician, and naturalist, born about 1730.

WUNSCH, J. J. DE, a Prus. general, 1717-88.

WURMBRAND, JOHN WILLIAM, Count, an Austrian statesman and antiquarian, 1670-1756.

WURMSER, DAGOBERT SIGISMUND, Count, an Austrian general who distinguished himself in the wars with the French republic; born in Alsace 1724, died soon after he had been compelled to surrender Mantua 1797.

WURSTSEIN, C., a mathematician and historian of the city of Bale, 1544-1588.

WURTZ, F., a Swiss surgeon, 16th century.

WURTZ, G. C., a French physician, 1756-1823.

WURTZ, J. W., a Ger. controversialist, d. 1826.

WURTZ, PAUL, Baron De, a general in the service of Sweden and the United Provinces, d. 1676.

WURTZBURG, CONRAD DE, one of the ballad-singers of Germany, 13th century, author of the 'Nibelungen,' published 1757-1784.

WYATT, JAMES, a metropolitan architect, builder of the Pantheon in Oxford-Street and of Fonthill Abbey, 1743-1813.

WYATT, R. J., a sculptor of considerable eminence, was born in London, 1795; and instructed in his art by Charles Rossi, of the Royal Academy. In 1821, he went to Rome, and continued to reside there till his death in 1850. He was an indefatigable worker, and produced some groups and statues which are much admired. The greatest of the latter is his 'Penelope,' which he was commissioned to execute for the queen in 1841, at which period he visited England.

WYATT, SIR THOMAS, a courtier, statesman, and poet, who enjoyed the favour of Henry VIII., and was employed by him in several diplomatic missions; born at Allington castle, in Kent, 1503, died 1541. His poetical works, which consist of love elegies and odes, have been greatly admired, and were first published with those of Lord Surrey. He was twice tried for sedition, but acquitted.—His son, of the same name, was a zealous protestant, and was beheaded by Queen Mary in 1554.

WYCHERLEY, WM., was the oldest of those Comic Dramatists, whose licentiousness throws on the period succeeding the Restoration a disgrace not to be wiped away by the brilliant cleverness of their works. Less witty than Congreve, less gay than Farquhar, and inferior to Vanbrugh as a painter of character, he has a vigour and good sense, and an ingenuity in the invention of lively incidents, not reached by any of these his contemporaries. He was the son of a Shropshire gentleman, and

[Birth-place of Wycherley.]

born about 1640. He was sent in his youth to France, where he learned the fashionable morality, and conformed to the fashionable religion by becoming a Roman Catholic. At the Restoration he was placed at Oxford, where he returned to the Church of England. The whole of his after life was that of an improvident and debauched man of pleasure. The dates at which his four comedies appeared range from 1669 to 1678; but the two earliest of them were, by his own account, written before he came of age, and the other two a considerable time before they were acted. 'The Plain Dealer,' a vigorous but unpleasing adaptation of Molière's 'Misanthrope,' was composed when he was twenty-five years old; and at thirty-two he wrote his lively and unprincipled comedy, 'The Country Wife.'

About 1680 he married a young widow, the countess of Drogheda, whose jealousy of her rakish husband made him uncomfortable, and whose bequest of her fortune to him served only to plunge him into lawsuits at her death. He lay for seven years in the Fleet prison for debt; and even after his release, which is said to have been procured by King James, he continued to be a needy man. When he was certainly above seventy years old, he married a young woman, being desirous, it is said, to disappoint a nephew whom he disliked. But he survived his marriage only eleven days, dying in December, 1715. [W.S.]

WYCK, THOMAS, called 'the Old,' a Dutch painter and engraver, 1616-1686.

WYCLIFFE, WICKLYFFE, or WICLIF, JOHN DE, was born at Wycliffe, near Richmond, in Yorkshire, about A.D. 1324. In early youth he was a commoner of Queen's College, Oxford, but soon removed to Merton, of which he became a fellow. His favourite studies were metaphysics and theology. One of his earliest public appearances was in 1360 against the mendicant monks, with whom the university had a resolute quarrel. In 1361 he became master of Baliol, and was presented to the rectory of Fillingham, in the diocese of Lincoln, which he afterwards exchanged for that of Ludgershall. Four years afterwards he was installed warden of Canterbury Hall, then recently founded by Archbishop Islep. In 1367, Langham, archbishop of Canterbury, expelled him from the wardenship, on which he appealed to the pope, Urban V., and a decision, after a delay of three years, was given against him. In 1372 he took his degree of D.D., and read lectures in divinity with great applause. He was sent soon afterwards as a commissioner to the papal embassy at Bruges, where he remained two years, and detected more narrowly the workings of the mystery of iniquity. On his return he was presented to the prebend of Aust, and the rectory of Lutterworth, through the patronage of the duke of Lancaster. Three hundred of his parochial sermons have been preserved. He had for some time been loud and bitter in his remonstrances against the idle and vicious clergy, and his vehemence and fidelity increased with his years. The enraged prelates summoned him before the convocation, but his powerful patrons saved him. In 1376 the monks drew up nineteen articles against him, taken from his prelections and sermons. These charges show that Wycliffe preached a species of protestantism—denying transubstantiation and the supremacy of the pope, and severely condemning the abuse of her temporalities on the part of the church. During the next year the pope sent to England five bulls against the reformer. But the king died before they arrived, and the universities would not act. The prelates, however, cited Wycliffe to appear before them in London. In the meantime parliament was in a dilemma on a question of casuistry, whether it were lawful to refuse the pope's demand that treasure should be sent out of the kingdom. The matter was referred to Wycliffe, and he at once decided that parliament might resist. He then, attended by the duke of Lancaster and the lord marshal, Earl Percy, appeared before the episcopal tribunal, and after some altercation, left the court in safety. He

was summoned to appear again at Lambeth in 1378, but the process was suddenly stopped by the queen-mother. In 1381 he published twelve theses against transubstantiation, and the archbishop of Canterbury formally pronounced the majority of them dangerous and heretical. Wycliffe left Oxford in 1382, and retired to Lutterworth. There he laboured without intermission, and neither tongue nor pen was idle in the cause of evangelical truth and freedom. He had been threatened with paralysis a year or two previous, but in 1384 he was seized in the pulpit with a sudden stroke, and soon after expired. Wycliffe's

[Wycliffe's chair.]

works are very numerous, and are chiefly of a polemical and practical nature, induced by the spirit of the age in which he lived. His English translation of the Latin Bible, or Vulgate, was a work of great merit and necessity, for it unlocked the Scriptures to the multitude, or as his antagonist, bewailing such an enterprise, worded it, 'the gospel pearl was cast abroad and trodden under foot.' The papal schism that happened on the death of Gregory XI., stirred him up to compose a famous tract 'The Schism of the Popes.' His essay on 'The Truth and Meaning of Scripture,' contains striking statements on the perfection and clearness of the Bible alone as the rule of faith. The English style of the reformer is wonderful for his age, and is clear and homely in its structure. Our present tongue was then beginning to raise itself into eminence and popularity. Chaucer's poetry and Mandeville's prose were evidence of its flexibility and power. Wycliffe's style is more common than theirs, for it speaks to the people in their own vernacular. Wycliffe will ever be remembered as a good and a great man, an advocate of ecclesiastical independence, an unquailing foe to popish tyranny, a translator of Scripture into our mother tongue, and an industrious instructor of the people in their own rude but ripening dialect. May he not be justly styled the 'morning star of the reformation?' So much impression was made by his works that one of his enemies complains—'that a man could not meet two persons on the road but one was a Wickliffe.' A convocation held at Oxford in 1408 prohibited the reading and diffusion of the reformer's version. At the council of Constance in 1415, the dead Wycliffe was denounced as a heretic, and his bones were ordered

to be exhumed from consecrated ground. Thirteen years afterward the decree was enforced by Pope Martin V., and Fleming, bishop of London, was ordered to see it done. His grave was opened, the bones taken out and burned, and the ashes cast into the stream that passes near the church of Lutterworth. As Thomas Fuller adds in his own style:—This river took them 'into the Avon, Avon into the Severn, Severn into the narrow seas—they into the main ocean, and thus the ashes of Wyke-life are the emblems of his doctrine which is now dispersed all the world over.' [J.E.]

WYDEVILLE. See WOODVILLE.

WYDRA, S., a Polish mathematician, 1741-1804.

WYERMANN, or WEYERMANN, J. CAMPO, a Dutch painter and writer, 1679-1747.

WYKEHAM, WILLIAM OF, bishop of Winchester, and lord high chancellor of England, was born at Wykeham in Hampshire 1324. He was promoted to his see after distinguishing himself in several state employments in 1366, and held the high office of chancellor, from 1367 to 1371. He promoted the formation of Winchester school and New College, Oxford. This eminent prelate died in 1404, and was buried in his own oratory in Winchester cathedral, where a costly monument is erected to his memory.

WYNANTS, JOHN, a Dutch landscape painter, the teacher of Philip Wouwermans, 1600-1670.

WYNANTZ, GODWIN, Count, a jurisconsult and statesman of the empire, 1661-1732.

WYNDHAM, H. P., an antiquarian writer and member of parliament for Wiltshire, 1736-1819.

WYNDHAM, SIR WILLIAM, an eloquent parliamentary speaker and statesman of the period of Queen Anne, was born at Orchard Wyndham in Somersetshire 1687, and entered parliament as knight of the shire for his native county. In 1710 he was made secretary at war, and in 1713 chancellor of the exchequer. On the death of the queen he became a distinguished member of the opposition, and in 1715 was committed on a charge of being implicated in the Scotch rebellion; died 1740. Having married a daughter of the duke of Somerset, his eldest son, SIR CHARLES WYNDHAM, inherited the title of earl of Egremont, from his uncle. He died in 1763.

WYNN, CHARLES WATKINS WILLIAMS, an experienced member of the House of Commons, having represented Montgomeryshire from 1797 to his death in 1850. He became secretary at war under Earl Grey from December, 1834, to April, 1835, but is chiefly memorable for the honourable constancy of his public and private conduct during this long career. He was a liberal supporter of the Welch school in London, and deserves to be named among the friends of literature.

WYNNE, EDWARD, author of 'Dialogues on the Laws and Constitution of England,' 1734-84.

WYNNE, JOHN HUDDLESTON, a native of Wales, who settled in London as an author, and wrote 'A History of the British Empire in America,' and 'A History of Ireland,' 1743-1788.

WYNTOUN, ANDREW, a Scottish rhyme-chronicler, prior of the monastery of St. Serf's Inch on Lochlomond, died about 1420.

WYON, WILLIAM, R.A., a distinguished English medallist, 1795-1851.

WYRWICZ, CHARLES, a Polish Jesuit, historian, and geographical writer, 1716-1793.

WYSS, the name of several Swiss writers:—BERNARD, author of a history of events from the time of Rodolph of Hapsburg, still in MS., about 1463-1525. NICHOLAS, a chronicler of events connected with the reformation, killed in the battle of Cappel, 1531. HANS HENRY, author of a 'History of the Canton and City of Zurich,' published 1783. FELIX, professor of theology at Zurich, 1596-1666. GASPARD, brother of the latter, a Greek scholar, dates unknown.

WYTFLIET, CORNELIUS, a Flemish historian, and secretary to the senate of Brabant; date of his works 1598-1607.

WYTHE, GEORGE, an American statesman and champion of independence, 1726-1806.

WYTTEBACH, DANIEL, a learned scholar and critic, born in 1746 at Berne, and professor from 1771 at Amsterdam and Leyden. He published an edition of the moral works of Plutarch, Historical Selections from Ancient Authors, and other works. Died 1820.

WZABECZ, WENCESLAUS JOACHIM, professor of surgery at Prague, author of several practical works on surgery, 1740-1804.

X

XACCA, E., a Sicilian poet, born 1643.

XANTONGE, ANNE and FRANCIS DE, sisters of Dijon, who each founded a religious house of the Ursuline order, the former 1567-1621; the latter died 1639.

XAINTRAILLES, JEAN POTON, Seigneur De, a commander in the army of Charles VII. at the period of the expulsion of the English, died 1461.

XANTHUS OF LYDIA, a Greek historian, some fragments of whose writings, published in the collections of Creuser and Muller, are all that remain, flourished in the 6th or 5th century B.C.

XANTIPPE, whose name has passed into a proverb for a scolding wife, was the spouse of Socrates the philosopher, and notwithstanding her ill temper was deeply attached to him. The date of her death is unknown.

XANTIPPUS, an Athenian general, 5th c. B.C.

XANTIPPUS, a Lacedæmonian general who defeated the Romans under Regulus, B.C. 255.

XAUPI, J., a French ecclesiastic, 1688-1778.

XAVIER. See FRANCIS.

XAVIER, JEROME, a Jesuit and missionary, of the same family as the saint, died 1617.

XENOCLES, a Greek tragedian, 4th cent. B.C.

XENOCRATES, a Greek philosopher of the Platonic school, employed as a diplomatist by Philip, king of Macedon, and remarkable for his integrity, B.C. 400-314.

XENOCRATES, a Greek physician, 1st cent.

XENOPHANES, flourished between 540 and 500 B.C., an Ionian by birth; afterwards settled in Italy. From the few almost oracular verses of Xenophanes that have reached us, we may still form a tolerably adequate conception of the nature of that important place, in the History of Greek Philoso-

phy, which unquestionably belongs to him. Indifferent to the search of the Ionic School after a primal physical element; neither sympathizing with the higher aim of Pythagoras,—his mind was arrested by the direct question concerning the Gods. And his conclusions seem to have been as follows. Rejecting utterly the Gods of the Poets, and every modification of Anthropomorphism—he declared, because he *felt*, that something—being, reality—is; but he denied that man can reach its nature, or ever apprehend its attributes. Man can learn or conceive only what is like himself, or what is placed before him by the senses. BEING, is not discernible by sense; neither can it be similar to Man. Essentially then it is incomprehensible, inscrutable, unknown, and unknowable. Xenophanes, was not afraid to ascertain that he could see nothing, in the awfulness which is beneath visible Life. But he was no sceptic—he believed that GOD IS.—These reverential and most pregnant thoughts, fill a large space in all subsequent Modern as well as Greek speculation. [J.P.N.]

XENOPHON, the Athenian historian and philosopher, was the son of Gryllus, a native of the Attic borough Ercheia. The time of his birth and death is not mentioned by any ancient writer, but it has been with very considerable probability inferred that he was born about B.C. 444; and Lucian states that he attained to above the age of ninety. He began life as a soldier, and was present at the battle of Delium (B.C. 424). In the flight which ensued he fell from his horse, and owed his safety to Socrates, on whose shoulders he was carried to a place of security. Having by this incident become known to the great philosopher of the age, he cherished for him ever after the warmest affection, and derived from him all his moral and philosophical principles. Nothing worthy of notice is known respecting him till B.C. 401, when, on the invitation of his friend Proxenus, he was induced to join the expedition of Cyrus the younger against his brother, Artaxerxes Mnemon, king of Persia. Before deciding, he asked the advice of Socrates, who recommended to him to consult the Delphian oracle; but Xenophon, who had previously determined to go, merely asked the oracle to what gods he should sacrifice in order to insure success; and, having performed the required rites, proceeded to Sardis, where he arrived in time to join the expedition. Attaching himself to the army, without any military appointment, he accompanied it in its tedious march, and was present at the battle of Cunaxa in which Cyrus fell. On the death of their leader the barbarian troops fled, and left the Greeks alone in the plains of Mesopotamia. Clearchus, whom they invited to take the command, and also others of the Greek generals were soon after massacred by the treachery of the Persian Satrap, Tissaphernes. In this emergency Xenophon came forward, and, with the consent of his countrymen, took a prominent part in conducting the famous 'Retreat,' of which he has left a minute and graphic account in the *Anabasis*. Not daring to attempt a return by the route by which they had advanced, they proceeded along the course of the Tigris, and across the high lands of Armenia to Trapezus (*Trebizond*), a Greek colony on the south-east coast of the Black Sea, and thence

found their way to Chrysopolis, which is opposite to Byzantium (*Constantinople*). On their arrival here the Greeks were in great distress, and they therefore readily accepted the invitation of Seuthes king of Thrace, to aid him in recovering the sovereignty. They performed their promise; but the Thracian chief declined to pay the stipulated reward, and it was with great difficulty that Xenophon got from him part of the sum agreed upon. Being still very poor, the Greeks next made an expedition into the plain of the Caicus; and seizing the house and property of a wealthy Persian thereby replenished their empty pockets. Of this spoil Xenophon obtained his due share. In consequence of his connection with the expedition under Cyrus, Xenophon was banished from Athens about B.C. 399; and, as he remained in Asia, probably joined Agesilaus, king of Sparta, during his expedition into that country in B.C. 396. When Agesilaus was recalled, Xenophon accompanied him to Greece, and was with him in the battle against his countrymen at Coronea, B.C. 394. After the battle he returned with Agesilaus to Sparta, and soon after settled at Scillus, in Elis not far from Olympia, on a spot presented to him by the Spartans, where he was joined by his wife and children. In this secluded retreat he spent his time in hunting, entertaining his friends, and writing the works which have immortalized his name. After a residence of more than twenty years, he was expelled from Scillus by the Eleans, and retired to Corinth, where he is believed to have died. The sentence of banishment against him had been previously recalled; but Xenophon never revisited his native city. The extant works of Xenophon may be divided into four classes:—1. Historical—the *Anabasis*, an account of the expedition of Cyrus the Younger, and the Retreat of the Ten Thousand, a model of perspicuous and interesting narrative; the *Hellenica*, or Grecian Histories, a continuation of the History of Thucydides as far as the battle of Mantinea (B.C. 362); the *Cyropaedia*, an historical or philosophical romance, founded on the real events of the early life of Cyrus; and the *Life of Agesilaus*. 2. Didactic—the *Hippiarchicus*, a treatise on Horsemanship; and the *Cynegeticus*, a treatise on Hunting. 3. Political—two Treatises on the *Constitutions of Sparta and Athens*, and a Treatise on the *Revenues of Attica*. 4. Philosophical—the *Memorabilia of Socrates*, a faithful record of the doctrines and sayings of the philosopher; the *Apology of Socrates*, which professes to contain the substance of Socrates' address to his judges; the *Symposium*, an account of a festive meeting, at which Socrates was present; the *Economicus*, a discussion on the duties of domestic life; and the *Hiero*, an imaginary conversation between the tyrant of Syracuse and Simonides. It is impossible in our limited space to analyze the character of Xenophon as an historian, a politician, a philosopher, and a general. It is not detracting from pre-eminent merit to allege that his continuation of the History of Thucydides falls short of the original; that, in depth and philosophical acumen, he must yield to Plato, while he is a more faithful exponent of the doctrines of their common instructor; and that his conducting of the Retreat of the Ten Thousand presents many of the qualities of a great com-

mander. His style exhibits the Attic dialect in its purest and most perfect form; clear, simple, and devoid of ornament. [G.F.]

XERES, F., a Spanish historian of the conquest of Peru, where he accompanied Pizarro.

XERXES, king of Persia, was the son of Darius and of Atossa, daughter of Cyrus. He succeeded his father B.C. 485, to the prejudice of his elder brother, Artazabanes. Four years previously the forces of Darius had been defeated by the Greeks under Miltiades at the battle of Marathon, and the interval had been passed in preparing for a second expedition. These preparations Xerxes continued on a scale of magnificence, almost incredible, and in the spring of 480 B.C. he commenced his march from Sardis: his army was moved forward with great deliberation, and being numbered on its arrival in Europe was found to muster 1,700,000 foot, and 80,000 horse; besides camels, chariots, and ships of war. These numbers, and the undisciplined crowds who must have attended them, to supply their necessities, are perfectly bewildering to the imagination; and they become still more so when their varied costumes, the silken and gilded tents, the standards, the costly armour, and the variety of national weapons are considered. One of the political parties of Greece, it must be borne in mind, were in league with the Persian court, and the terror of the country verged upon despair of maintaining their liberties. Themistocles, however, while the pass of Thermopylae was defended by Leonidas and his partisans, succeeded in rallying his countrymen, and having created a navy, defeated Xerxes at the battle of Salamis. This great event took place in the year of the expedition B.C. 480. The Persians were allowed to retreat in such order as they could, but Mardonius, one of the principal commanders, reserved a more manageable army, the best he could pick from the flying host, and with these he was defeated by the combined Greeks the year following. Xerxes was assassinated by Artabannus, one of the great officers of his court, who aspired to found a new dynasty in Persia, B.C. 465. [E.R.]

XERXES, the *second* of the name, king of Persia, succeeded his father, Artaxerxes Longimanus, B.C. 424, and was assassinated 423.

XIMENES, AUGUSTIN MARIA, Marquis De, a French poet, and friend of Voltaire, 1726-1817.

XIMENES, F., a Spanish painter, 1598-1666.

XIMENES, FRANCIS, one of the Spanish missionaries who introduced Christianity into Mexico, au. of a description of Mexican zoology and botany.

XIMENES, FRANCIS, known in Spanish history as Cardinal Cisneros, from the territorial title of his family, was born at Torrelaguna in 1437. A great portion of his time was spent in obscurity and hard study. In 1492 he was made confessor to Queen Isabella, and in 1494 was made archbishop of Toledo. In 1507 he received the cardinal's hat. Along with his high dignities, he was possessed of vast revenues, but his influence arose from his discountenance of the luxurious and grasping habits of the higher priesthood, and his adopting the rigid discipline of the new order of St. Francis, with which he identified himself. He thus prepared the way for such internal reform as the Romish Church received. He was a great patron of letters, and by his exertions and expenditure produced the earliest edition of a polyglott Bible, known as the Complutensian, from its publication at Complutum. The political career of Ximenes was a struggle for the establishment of the power of the crown above the nobles, and somewhat anticipated the policy of Richelieu in France. He died on 8th Nov., 1517. [J.H.B.]

XIMENES, J., a Spanish poet, 16th century.

XIMENES, J. A., a Spanish theolog., 1719-74.

XIMENES, LEO, a geometrician, astronomer, and engineer, of Sicilian birth, 1716-1786.

XIMENES, L., a French ascetic, 13th century.

XIMENES, RODERIC, archbishop of Toledo, and author of Spanish histories, died 1247.

XIMENO, V., an Italian biographer, 17th cent.

XUARES, GASPARD, born in a district of Paraguay, distinguished as a naturalist, 1731-1804.

XUARES, or SUARES, RODERIC, a Spanish juriconsult, time of Ferdinand and Isabella.

XYLANDER, the Græcised name of WILLIAM HOLTZEMANN, a Germ. philologist, born at Augsburg 1532, d. professor at Heidelberg, 1576. He translated the works of Plutarch and Tryphiodorus.

XYPHILIN, JOHN, a patriarch of Constantinople, sprung from a noble family of Trebizond, and famed for his virtues and great learning, died 1078, after a patriarchate of twelve years. His nephew, of the same name, author of an abridgement of Dion Cassius, first published in 1551.

XYSTUS. See SIXTUS.

Y

YAHIA AL BARMEDI, ABOU ALI, an Arabian vizier of the Barmecide family, who played a conspicuous part in the reign of Haroun al Rashid, and was put to death in 803.

YAKOUT, SCHEAB EDDYN ABDALLAH, an Arabian biographical writer and geographer, of Greek origin and birth, 1179-1229.

YALDEN, or YOULDING, THOMAS, successor of Atterbury as preacher at Bridewell hospital, now to fame as a poet and miscellaneous writer, 1671-1736. The best known of his productions is his 'Ode to Saint Cecilia's Day.'

YANEZ DE LA BARBUDA, a Portuguese commander, who attempted the conquest of Grenada, and perished in the field, 1374.

YANEZ, F., a Spanish painter, died 1560.

YART, A., a French poet, 1710-1791.

YATES, FREDERICK HENRY, a popular English actor, and manager of the Adelphi theatre, was born in 1797, and made his first appearance on the stage in 1817. His abilities were extremely versatile, ranging from the exhibition of the deepest pathos to the humour of broad farce; died 1842.

YATES, RICHARD, a comic actor, who kept the stage several years in such characters as 'Fondlewife' in the 'Old Bachelor;' died 1796. His wife, ANNA MARIA, a tragic actress, died 1787.

YDELEZ, STEPHEN, a priest of Franche-Comté, who devoted himself to the service of the sick poor, and wrote on the plague, 1581.

YEARSLEY, ANNE, known as a poetical and dramatic writer, was originally a milk-woman, and was born at Bristol about 1756. She was encouraged to publish by Hannah More, and the profits of her works enabled her to engage in a more congenial occupation as mistress of a circulating library; died 1806.

YEATES, THOMAS, an Oriental scholar, whose literary labours were devoted to the Bible as a translator and editor, 1768-1839.

YEATS, T. P., an entomologist, died 1782.

YEBRA, M. DE, a Spanish ascetic, 16th cent.

YELVERTON, SIR HENRY, an English judge, author of 'Reports of Special Cases,' 1566-1630.

YEPEZ, ANTONIA D', a Spanish Benedictine and historian of his order, died 1621.

YEPEZ, DIEGO D', bishop of Tarragona, and a learned historian, 1559-1613.

YEREGUI, JOSE DE, a pious and learned ecclesiastic of Guyapusco, 1734-1805.

YGLESIAS, J. DE, a Spanish poet, 1753-1791.

YMBISE, or IMBESE, JEAN D', a magistrate of Ghent, who endeavoured to free his country from the Spanish yoke, and was executed 1584.

YON, ST., in Latin *Ionius* or *Eonius*, a martyr of Christianity in France, 290.

YORK, THE HOUSE OF, rival to that of Lancaster, and possessor of an elder right to the crown, derived its claim from Richard, son to the duke of Clarence, who was the second son of Edward III. The line of Lancaster claimed from John of Gaunt, his third son. **RICHARD**, duke of York, succeeded the duke of Bedford as regent in France, during the minority of Henry VI. His claim to the crown was first asserted about 1450, after the rebellion of Cade, and he first took arms in defence of it by raising an army of 10,000 men in 1452. Thus began the wars of the red and white roses, which deluged England with blood. The duke was defeated at the battle of Wakefield, by Queen Margaret, and killed in the action, 24th December, 1460. It is questionable whether his son, Clifford, was murdered as generally understood. The last chief of the white rose was his son, Richard III. [E.R.]

YORK, FREDERICK, duke of, commander of the British army in the Low Countries at the period of the French revolution, was the second son of George III., and was born August 16, 1763. He studied military tactics at Berlin; and in 1791 married the eldest daughter of the king of Prussia. He died, involved in debt, occasioned by his passion for gaming, on January 5, 1827. A vindication of his command in Flanders has been recently published by his military secretary.

YORKE, SIR JOSEPH SIDNEY, an admiral and member of parliament, perished in Stoke's Bay on returning from Spithead with all his ship's company, 1831.

YORKE, PHILIP, first earl of Hardwicke, was born at Dover in 1690, and educated for the law. He was appointed chief justice of the King's Bench, and raised to the peerage in 1733. From 1736 to 1756 he held the office of lord chancellor, and retired with the duke of Newcastle; died 1764.

YORKE, PHILIP, second earl of Hardwicke, son of the preceding, was born in 1720. In 1738 he was appointed one of the tellers of the exchequer, and, in 1764, succeeded his father in the earl-

dom. His distinction is that of a man of letters. He was joined by his brother, the Hon. **CHARLES YORKE**, in publishing the 'Athenian Letters, or the Epistolary Correspondence of an Agent of the King of Persia, residing at Athens during the Peloponnesian War.' His other works are 'The Correspondence of Sir Dudley Carleton,' and 'Miscellaneous State Papers.' Died 1790.

YORKE, PHILIP, third earl of Hardwicke, elder son of Charles Yorke, was born in 1757. He held several public offices, and from 1801 to 1805 was lord-lieutenant of Ireland. Died 1834.

YORKE, PHILIP, of the same family as the preceding, known as a genealogist and historian, was born about 1743, and died, after a life of literary leisure, in 1804. His work on 'The Royal Tribes of Wales,' contains much curious and authentic matter.

YOUNG, SIR ARETAS WILLIAM, a peninsula officer, who was successively protector of slaves in Demerara 1826, and lieutenant-governor of Prince Edward's Island, 1831. Died 1835.

YOUNG, ARTHUR, a native of Norfolk, who became rector of Bradfield in Suffolk, and prebend of Canterbury. He wrote 'An Historical Dissertation on Idolatrous Corruptions in Religion.' Died 1759. His son, of the same name, born at his father's rectory in 1741, is well known as an agricultural writer and rural economist, and was secretary to the Board of Agriculture. Died 1820.

YOUNG, EDWARD, was born at his father's parsonage, near Winchester, in 1684. From 1700 he held a fellowship at Oxford. In 1710 part of his poem, 'The Last Day,' was inserted in the Tatler; and the whole was published in 1711. For many years from the latter of these dates, he continued to produce poems of various kinds. The most successful, and by much the best of them, till the appearance of his last and most popular work, were his Satires, which, appearing in separate pieces, were collected in 1728, under the name 'The Love of Fame, the Universal Passion.' His tragedy of 'Busiris' was acted successfully in 1719; 'The Revenge,' the only one of his tragedies that is now ever acted, appeared in 1721; and the 'Brothers,' while in rehearsal, in 1727, was withdrawn by the author, who, after having long hesitated between professions, had just taken orders. In 1730 his college presented him to the rectory of Welwyn, in Hertfordshire, valued at three hundred a-year; and this was the highest preferment he ever obtained, notwithstanding very frequent solicitations, which were continued when he was very old. In 1731 he married a widow, the daughter of the earl of Lichfield. Lady Elizabeth Young died in 1741; and her husband is supposed to have begun, soon afterwards, the composition of the 'Night Thoughts.' The publication of the poem, taking place in sections, was completed in 1749. With its want both of individual interest, and of genuine poetic imagination, this work could not have gained the permanent celebrity it has, were not for the rarity of good religious poetry, and the readiness with which serious persons welcome any work of the sort. In its antithetical turn, and its perpetual ingenuity of strained analogies, not unrelieved by snatches of fine fancy, it reminds us of the metaphysical poetry of the seventeenth century. But the appearance of a work, so solemn

and elevated in tone, at a time like that in which the 'Night Thoughts' came forth, was really a fact hardly less encouraging for the prospects of literature, than was the appearance of the exquisite 'Seasons' of Thomson a few years earlier. Young survived till 1765. [W.S.]

YOUNG, MATTHEW, an Irish prelate and mathematician, author of 'An Analysis of the Principles of Natural Philosophy,' and 'The Method of Prime and Ultimate Ratios.' Born in Roscommon 1750, died 1800.

YOUNG, THOMAS, born at Milverton, Somersetshire, 13th June, 1773, died in London, where he had long practised as a physician, on 10th May, 1829. If extent of acquirement, originality in conception, and positive contributions to knowledge of highest importance, should ever give enduring fame, the claim might well have been made by Young. Some men, however—almost through inexplicable causes—appear formed to be unfortunate; and unhappily Young lived and died in comparative obscurity. It is probable that his acceptance in 1818 of the Secretaryship of the Board of Longitude, and the connected editorship of the Nautical Almanac, contributed to this unhappy result. It cannot be denied that he was not exactly fitted for either office, and that his administration of them, laid him open to the successful and very eager attacks of persons who had no respect for his genius, nor for any man's,—who, in truth, had neither the power nor the inclination to appreciate genius of any kind. Young's chief feats were two. First, he successfully contests with FRESNEL the glory of founding the Undulatory Theory of Light. The idea of propagation by undulations, in opposition to Newton's conception of propagation by Emission, had been started long before Young's time; but to him unquestionably belonged the privilege of originating the explanation of all those more delicate phenomena of Light, by his doctrine of *Interference*. This view had of the advantage of *Fresnel's*; he had no willing auditory: in England, at the time, the *superstition* with which we have hitherto been inclined to invest every illustrious insular name, had not been cleared away from that Immortality which belongs of right to NEWTON. Young's other capital discovery dispelled the mists from another sphere:—it was he who primarily detected the key to phonetic Hieroglyphics. Previous to his time, the old Egyptian symbols had been regarded simply as pictorial representations—real pictures, or real, through analogy. And, although some thought it probable that the inscriptions also concealed an *alphabetic* writing, no conception had been formed of the way in which *pictorial* representations could pass into *phonetic*; and no key discovered therefore, to the contents of Egyptian records. Aided by the Rosetta stone, Young divined the secret,—clearly preceding CHAMPOLLION, and in theory penetrating farther than even that acute and most deserving Frenchman ventured to go.—We believe that if the merits of our remarkable Countryman were made to rest even on those two memorable discoveries, injustice would be done to him. His mind teemed with new and profound conceptions, and he has left numerous other hints, that will probably yet start out into unexpected importance. Young was buried in Farnborough; but he has a

monument—among the motley crowd—in that National Mausoleum, where great men alone ought ever to have been permitted to repose—the Abbey of Westminster. [J.P.N.]

YOUNG, SIR WILLIAM, a miscellaneous writer and member of parliament, born near Canterbury 1750, died, governor of Tobago, 1815.

YOUSOUF, the last governor of Spain for the Oriental caliphs, killed in battle 759.

YPSILANTI, three Greek princes who distinguished themselves in efforts to achieve the independence of their country. CONSTANTINE, born at Constantinople about 1760, became, in 1799, hospodar of Moldavia, and, in 1802, of Wallachia. He was deprived of this dignity, and after the treaty of Tilsit, 1807, resided in Russia; died 1816. ALEXANDER, the most distinguished of the three, was son of the preceding, and was born in 1792. He attained military rank in the Russian army, and, in 1820, became chief of the *Hetaireia*, an association of Greek patriots. He began the war of independence by crossing the Pruth, attended with only a few followers, in March, 1821, but after repeated defeats was obliged to abandon the cause and take refuge in Vienna, where he died in 1828. His brother, DEMETRIUS, also headed the insurgents, and died 1832.

YRALA, or IRALA, DOMINGO MARTINEZ DE, one of the Spanish conquerors of America, companion of Mendoza, died 1567.

YRIARTE, I., a Spanish painter, 1635-1685.

YRIARTE, DON JUAN DE, a learned archaeologist, keeper of the Royal Library at Madrid, and chief author of the Improved Orthography and Punctuation of the Spanish Language, 1702-1771. His nephew, DOMINGO, a diplomatist, 1746-1795. THOMAS, brother of the latter, a famous poet, comedian, and fabulist, editor of the *Mercury* of Madrid, 1750-1791.

YSABEAU, ALEXANDER CLEMENT, a celebrated character of the French revolution, born about 1750. Being sent as a deputy to the convention he became the colleague of Tallien, and a participator in his cruelties at Bourdeaux. He was subsequently a member of the directory and the council of elders; died 1823.

YSAURE, or ISAURE, CLEMENCE, a lady who instituted the floral games at Toulouse, was born there, shortly before the expulsion of the English, about 1450. Her lover being slain in battle, she consecrated her life to the Virgin and to the cultivation of poesy. She left a considerable revenue for the celebration of the floral games, and for prizes given to successful poets. This festival was celebrated annually, in May, till 1806, when it was repressed. Its history was written by Poitevin.

YVAN. See IVAN.

YVAN, ANTOINE, founder of the religious order of Mercy, flourished in Provence, 1576-1653.

YVART, J. A. VICTOR, an agricultural writer, called 'The Arthur Young of France,' 1764-1831.

YVER, J., a French novelist, 16th century.

YVES, CHARLES ST., a monk of St. Lazarus, who left his order and became celebrated in Paris as an oculist, 1667-1733.

YVES, ST., a theologian and canonist, appointed bishop of Chartres in 1091, died 1115.

YVETAUX, VAUQUELIN, a French scholar and poet, tutor to Louis XIII., 1559-1649.

YVON, PETER, a controversial writer and proselyte of Labadie, from about 1640.

YVON, P. C., a French physician, 1719-1811.

Y-YN, one of the greatest statesmen produced in China, was born about 1770 B.C. He was

minister for thirty-three years to Tai-Kia, whose reign was rendered, by him, one of the most happy and brilliant in the Chinese dynasty. He lived to be nearly one hundred years old, and died in an honourable retirement.

Z

ZABAGLIA, NICHOLAS, an Italian mechanician and architect, to whom the method of transferring fresco paintings is attributed, 1674-1750.

ZABAN, or ZABANIUS, ISAAC, a Hungarian philosopher, and writer in favour of the atomic theory, born about 1670, died 1699.

ZABARELLA, FRANCESCO, cardinal and archbishop of Florence, a learned canonist and writer on ecclesiastical polity, 1339-1417. BARTOLOMEO, his nephew, also archbishop of Florence, and professor of law, 1396-1442. JACOPO, a descendant of the preceding, a professor of philosophy and commentator on Aristotle, 1553-1589.

ZABOROWA, JAMES, a Polish publicist, employed under the direction of the chancellor, in collecting the laws, 1502-1506.

ZABUESING, J. C., a Ger. writer, 1747-1795.

ZACCARIA, FRANCESCO ANTONIO, a learned Venetian Jesuit, historian of Italian literature, and a defender of the papacy, 1714-1795.

ZACCHIAS, PAOLO, an Italian physician and man of letters, born at Rome 1584, died 1659.

ZACH, CLARA, countess of, daughter of a Hungarian noble, executed for assassinating Casimir, king of Poland, who had outraged her, 1330.

ZACH, F., a German astronomer, 1754-1832.

ZACHARIA, D., a French alchymist, 16th cent.

ZACHARIA, G. T., a Ger. Orientalist, 1729-77.

ZACHARIA, JUSTUS FREDERICK WILLIAM, a German poet, professor at Brunswick, 1726-77.

ZACHARIAH, a king of Israel, B.C. 784.

ZACHARIAH, one of the Jewish prophets, flourished in the reign of Darius, 6th century B.C.

ZACHT-LEEVEN, or SAFT-LEEVEN, HERMANN, a Dutch painter, 1609-1685. His brother, CORNELIUS, a painter of drunken frolics, 1606-73.

ZACUTO, ABRAHAM, in Latin *Zacutus Lusitanus*, a Portuguese Jew, known as a physician and professional writer, 1575-1642.

ZAGO, O., an Italian engineer, 1654-1737.

ZAHN, J., a Germ. mathematician, 1641-1707.

ZAIDOUN, ABOUL WALID AHMED IBN, a Spanish Arabian poet, 1003-1070.

ZAINER, G., a German printer, 1430-1478.

ZAIONCEK, JOSEPH, a Polish general, who defended the cause of independence till 1814, and then became a partizan of Russia, 1752-1826.

ZAKREZEWSKI, IGNATIUS WYSGYOTA, a member of the Polish diet, and one of those who distinguished themselves in 1794 in the cause of their country's independence, 1774-1802.

ZALEUCUS, a Greek philosopher, renowned as the legislator of the Locrians, 500 B.C.

ZALLINGER, J. B. DE THARN, a Tyrolese Jesuit and botanist, 1731-1785. JAMES ANTONY, of the same family, a Jesuit, philosopher, and canonist, 1735-1812. F. SERAPHIN, a Jesuit and physician, 1743-1805.

ZALLWEIN, G., a German canonist, 1712-66.

ZALUSKI, ANDREW CHRYSOSTOME, a prelate,

diplomatist, and grand chancellor of Poland, 1655-1711. His nephew, ANDREW STANISLAUS, grand chancellor, distinguished as a patron of letters, died 1758. J. ANDREW, brother of the latter, bishop of Kiev, collector of a great library, destroyed at the capture of Warsaw by Suwarrow, 1701-1774. ZALUZANSKI, ADAM, a physician and botanist of Bohemia, 16th century.

ZALYK, GREGORY GEORGIADIS, a Greek of Thessalonica, secretary of embassy, and author of French and modern Greek Dictionary, 1785-1827.

ZAMAGNA, B., a Latin poet, 1735-1820.

ZAMAKHSCHARI, ABOUL CASSEM MAHMUD AL, an Arabian poet, 1074-1144.

ZAMBECCARI, F., a Venetian poet, 15th cent. ZAMBECCARI, COUNT FRANCESCO, an Italian aeronaut, born at Bologna 1756, perished in making one of his experim. in balloon navigation 1812.

ZAMBECCARI, JOSEPH, an Italian physician distinguished in comparative anatomy, 17th cent.

ZAMBERTO, B., a Venetian author, one of the first to translate Euclid, 15th century.

ZAMBONI, B., an Italian author, 1730-1797.

ZAMET, SEBASTIAN, a celebrated Italian financier and court intriguer, time of Marie de Medici whom he accompanied to France, born at Lucca about 1549, died 1614. His son, JOHN, baron of Murat and camp-marshal, distinguished in the religious wars, died 1620. SEBASTIAN, his second son, chaplain to Marie de Medici, bp. of Langres and protector of the Port-Royal *savants*, died 1655.

ZAMORA, A., a Spanish physician, 1570-1640.

ZAMORA, BERNARD DE, a learned Spanish ecclesiastic and philologist, 1720-1785.

ZAMORA, GASPARD DE, a Spanish Jesuit author of a Scripture Concordance, 1546-1621.

ZAMORA, L., a Spanish poet, died 1614.

ZAMOSKI, JOHN, nephew by marriage to Stephen, king of Poland, distinguished as a warrior, diplomatist, and patron of literature, called the 'Defender of his Country and Protector of the Sciences,' died 1605.

ZAMPI, F. M., an Italian poet, died 1774.

ZAMPIERI, C., an Italian poet, 1701-1784.

ZAMPINI, MATTEO, an Italian juriconsul and partizan of the league, author of works of French history, 16th century.

ZANARDI, N., an Ital. theologian, 1570-1643.

ZANCHI, BASILIO, in Latin *Zanchius*, an elegant Latin poet, born at Bergamo 1501, died in prison 1558. GIROLAMO, his cousin, a celebrate protestant and friend of Peter Martyr, was compelled to leave Italy and become a professor at Heidelberg. He was born at Alanzo, in the territory of Bergamo, 1516, and died, some time after losing his sight, in 1590. His works form eight volumes, and one of them, on Predestination, has been translated into English by Dr. Toplady. The father of Girolamo, F. T. ZANCHI, is known in Italian literature as an historian and Latin poet.

ZANE, J., a Venetian poet, 1529-1560.

ZANETTI, ANTONIO MARIA, Count, a Venetian antiquarian who contributed to the perfection of wood engraving, 1680-1766. J. FRANCESCO, of the same family, an archæologist and learned editor, 1713-1782. ALESSANDRO, his brother, an art-writer and librarian of Saint Marc, 1716-1778. BERNARDO, a theologian and historian of the Longobardi, 1690-1762. GUIDO, a learned numismatist, keeper of the museum of antiquities at Ferrara, 1741-1791.

ZANETTINI, J., an Italian jurist, 1430-1493.

ZANIBONI, A., an Italian poet, died 1767.

ZANNICHELLI, J. GIROLAMO, an Italian physician and natural philosopher, 1662-1729.

ZANNONI, J. B., an Ital. archæol., 1774-1832.

ZANOLINI, A., an Ital. Orientalist, 1693-1762.

ZANONI, A., an Ital. agriculturist, 1696-1770.

ZANONI, JACOPO, a botanical writer, director of the botanic garden at Bologna, 1615-1682.

ZANOTTI, J. P., an Italian painter and poet, secretary of the Clementine academy, 1674-1765.

ERCOLO, his brother, a poet and writer on sacred subjects, 1684-1763. F. MARIA, a third brother, distinguished as a philosopher by his labours in popularizing the systems of Descartes and Newton in Italy, 1692-1777. EUSTACHIUS, nephew of the preceding, an astronomer, 1709-1782.

ZAPF, G. W., a German *savant*, 1747-1810.

ZAPF, N., a German Hebraist, 1600-1672.

ZAPPI, GIAMBATISTA, a philosophical writer of Italy, born at Imola about 1540. His grandson, GIAMBATISTA FELICE, a lawyer and poet, author of Odes and Sonnets, remarkable for purity of style, 1667-1719. FAUSTINA, the wife of the latter, was a daughter of the famous Carlo Maratti, and like her husband was skilled in poetry.

ZARAGOZA, JOSE DE, a Spanish Jesuit, distinguished as a mathematician and astronomer, 1627-78.

ZARATE, AUGUSTIN DE, a Spanish historian of the discovery and conquest of Peru, 16th cent.

ZARATE, F. L. DE, a Spanish poet, d. 1658.

ZARCO, JOHN GONZALES, a Portuguese navigator who discovered the islands of Porto Santo and Madeira, the former in 1417, the latter in 1419. He became governor of Madeira, and was the founder of Funchal.

ZARLINO, J., a distinguished musician, composer, and theologian of Chioggia, 1519-1599.

ZAROTTI, C., an Italian physician, 17th cent.

ZASE, ULRIC, a Swiss councillor; although a Catholic, he had a great admiration for Luther, whom he styled the Phoenix of Theologians. Many of his works were, consequently, put by the pope in the index; 1461-1535.

ZAVARONI, ANGELO, an archæologist and biographer, born in Calabria 1710, died 1767.

ZAVAVI, ABOUL HASSAN, an Arabian grammarian, author of a poem on Syntax, 1168-1230.

ZAWADOWSKI, PETER VASSILIEVITCH, Russian minister of instruction time of Alexander, father of the present emperor, 1738-1812.

ZAYAS Y SOTOMAYOR, MARIA DE, a Spanish lady, celebrated by her writings, last cent.

ZAIZUS, ULRIC, professor of law at Friburg, and author of several learned works, 1461-1535. His son, JOHN ULRIC, 1521-1570.

ZEA, DON FRANCISCO ANTONIO, a botanist and statesman, was born in New Grenada 1770,

and received the appointment of director of the botanic cabinet at Madrid. On the abdication of Charles IV. he became minister of the interior, and on the retreat of the French went to South America, where he aided in founding the republic of Columbia, of which he became vice-president. In 1820 he came to England as a diplomatic agent to that government and died here in 1822.

ZEECHI, J., an Italian physician, 1533-1601.

ZECCHI, LELIO, an Italian theologian, jurisconsult, and canonist, died 1610.

ZECCHINI, P., an Ital. physiologist, 1739-1793.

ZEGERS, H., a Flemish painter, 17th century.

ZEGERS, T. N., a Flemish ascetic, died 1559.

ZEIBICH, C. H., a Hung. theologian, 1717-1763.

ZEID-BEN-THABET, one of the secretaries of Mahomet. He greatly contributed to disseminate the new doctrine, and made, by order of the caliph, Abou-Bekr, a complete copy of the Koran, which alone came to be considered as authentic.

ZEIDLER, C. S., a Ger. historian, 1719-1786.

ZEIDLER, J. G., a German poet, died 1711.

ZEIRI-BEN-MOUNAD, called AL TAGLANI, chief of the Zeirites-Sanhadjites. He conquered the whole of the country extending from Algiers to Tripoli, and presented it to Obeid-Allah. He rendered great services to the Fatimites, and was killed at the battle of Mansourah 971. His son, YOUSOUF-BALKIN, founded the dynasty of the Zeirites-Sanhadjites.

ZEKY-KHAN, MOHAMMED, half-brother of Kerym-Khan, king of Persia, on whose death in 1779 he seized the throne. He was distinguished for nothing but his cruelty, and was put to death by his soldiers shortly after his assumption of power.

ZELADA, F. X., an Italian cardinal, secretary of state, and librarian of the Vatican, 1717-1801.

ZELLER, J. G., a Ger. physician, 1656-1734.

ZELOTTI, BATTISTA, an Italian painter, the fellow-student of Paul Veronese, under Antonio Badile, uncle of the latter, 1532-1592.

ZELTER, C. F., a Ger. composer, 1758-1832.

ZELTNER, GUSTAVUS G., a German philologist and historian, 1672-1738. His brother, J. CONRAD, also a learned writer, 1687-1720.

ZENDRINI, BERNARDO, a celebrated mathematician and hydraulic engineer, employed by the Venetian and Austrian governments in important public works, author of several treatises, 1679-1747.

ZENO. There were three celebrated Zenos, ZENO of ELEA, the pupil and expounder of Parmenides; ZENO of CITTIUM, in Cyprus, founder of the school of the STOICS; and ZENO the EPI-OUREAN, who lived in the times of Cicero, and had the honour of teaching that illustrious Orator, Philosopher, and Statesman. The two first alone, demand notice here.

ZENO of ELEA, in Magna Græcia, born about the year 500 B.C. Xenophanes had found, or rather divined UNITY, in the Idea of an unknown God. Parmenides took a different view, and identified the Unity we seek, with the IDEA of it; in other words, he asserted it to be wholly subjective. Zeno followed his great Master; and if we rightly interpret enigmatical traditions concerning him, it appears that he must have advanced very far. He is said to have denied the existence of Space, of Motion, and of many posi-

tive Relations: the very absurdity of the stories set afloat respecting his doctrines, evinces how much he must have been misunderstood—not by his contemporaries perhaps, but by later writers. There is no clue to the foregoing statements, save one. His scheme must have corresponded almost exactly with Kant's: he had separated subjective laws from objective reality, and proclaimed that over the chasm between, he could discern no bridge. It is indeed sufficiently strange to detect traces of the illustrious German Thinker, at the far end of two thousand three hundred years! That our interpretation is most probably true, further appears from Zeno's great and undeniable achievement. The existence of a Science of *Logic*, was discerned by him first of all; and he laid down many of its Laws. *Logic*, be it remembered, is the Science which explores not the qualities or order of external Things, but the conditions under which the Mind moves, as it determines and judges; and what more likely, than that the reality of such a Science should be earliest seen by the Philosopher, who first of all recognized the distinctiveness of Subjective Laws? [J.P.N.]

ZENO OF CITRUM, in Cyprus, lived about 250 years before Christ. The external incidents of Zeno's life were in no wise remarkable; his importance and fame rest on his being the founder of the sect of the STOICS,—(named, because Zeno chose to teach under the Porch, or *Stoa*)—a sect of greater and wider influence than any other that sprung up during the latter days of Greece, for it took root within the soil of Rome, and obtained sway over the Jurisprudence as well as the Morals of the Republic. The foundations only, of Stoicism, were laid by Zeno, who seems to have been indebted for his chief maxims to Antisthenes the Cynic; it was perfected as a philosophical scheme by the more vigorous genius of Chrysippus of Soli, who reached the year 210 B.C.—Stoicism is not a system of *Morals* alone; it had its *Logic* and *Theory of Nature* besides. Its doctrine of the Human Understanding, or regarding the origin and nature of Knowledge, is surprisingly similar to *John Locke's*. Assuming *Sensation* as the source and foundation of whatever can be discerned in the mind, the Stoic claimed for Mind the power of acting on its sensations, comparing them, grouping them, and judging so concerning them. In this way, a *Judgment* is formed by a *synthesis of Sensations*,—what they termed a *comprehensive representation*, by a synthesis of individual Judgments; and finally, that ultimate and universal synthesis, which is *Science*. The critical student will not fail to observe that every trace of the profound philosophy of Plato had already disappeared.—Next, as to Stoic *Physiology*. This is a *Necessity*, a Fatalism pure and simple. They speak indeed of God. They speak of Providence. And of the beauty and perfection of the order of the World, in which each atom has its harmonious place; symmetry the most unchallengeable reigning through all, and the wisest economy also, seeing there is nothing useless—not a solitary molecule that can be called superfluous, neither one, unnecessary. To closer scrutiny, however, this God of the Portico, appears an existence devoid of personality and self-consciousness: the name is applied to an hypothetic germ or seed,

from whose necessary and determinate developments, Nature and all the varieties of Being have sprung. There is no God distinct from the material Universe: there is but one substance which, considered in its forms, is NATURE—in its essence, GOD. Assuredly also a powerful declension from the Theism of the greater Times!—Neither can we speak, in less qualified terms, of the vaunted *Morality* of Stoicism. With much semblance of nobleness, and undoubtedly containing wherewithal to nourish a noble nature, it is yet false through exaggeration, and that vicious exclusiveness which always characterizes the decay of Science. It is verily a maxim to be engraven on every soul—'Be strong and free!' But the question recurs, what is *strength*? Is it the power to regulate passion and desire, to enthrone Reason as the judge or umpire over the tendencies inseparable from our complex nature. or the ambitious, the unnatural, the vain effort to extirpate passion and desire, so that ceasing to be *Men* we may rival the Gods? No philosophy worthy the name of Ethical, ever failed to recognize it as Man's primal duty, to curb the appetites, extinguish evil passions, and so govern the soul but the Stoic's conception of Order, is not government, it is extinction: just as the blind despot destroys the freedom he cannot rule, and name his solitude *Peace*! History never offers a more certain indication of decrepitude of Thought and defect of true Manliness, than the acceptance of exaggerations like these. Speaking scientifically they involve an omission of many of the essential elements of the problem whose solution is aimed at: and under another view, they more than indicate the prevalence of practical insincerity:—no Human Being can get beyond the position of MAN; and he who pretends to do so, universally sinks below it. It is a singularly instructive fact that this 'complete liberty' of the Stoic, was often held consistent with the worst excesses. Having triumphed, the disciple held that no crime could stain him: like multitudes of Mystics, he had achieved salvation; and neither worldliness, nor meanness, nor crime, could suffice to disturb his sanctimoniousness, or effect his Fall!—It is easy to see that out of such a doctrine, Men in themselves great, might extract much to augment their Fortitude. But if Stoicism aided in producing SCIPIO, a THRASEAS, an EPICETUS, or MARCUS AURELIUS; it also evolved and justified the most disastrous record in the annals of Rome—the issue of the almost maniac ferocity of MARCUS BRUTUS. [J.P.N.]

ZENO, called *the Isaurian*, emperor of the East was a chief of the Isaurian guard who obtained the favour of Leo I., and married his daughter Ariadne. He exercised the imperial power from 464 to 491, when he found himself in the midst of dangers, from which he sought the escape of oblivion in debauchery. Four days after his suspicious death, Ariadne married Anastasius.

ZENO, APOSTOLO, called 'the father of the Italian Opera,' was born at Venice in 1669, and became famous by a periodical work entitled 'Il Giornale de Litterati,' which he commenced in 1770. As a dramatic writer he is compared with Corneille, and his works form 11 volumes, published in 1744. Died 1750.

ZENO, C., a Venetian admiral, 1334-1418.

ZENO, NICOLÒ and ANTONIO, brothers of the preceding, are celebrated in the history of navigation, by their alleged discovery of America prior to the voyage of Columbus. It is considered probable that they reached Greenland. The former died in 1395, the latter 1405. CATERIGO, grandson of Antonio, went as ambassador to Persia, and wrote narrative of his mission, 1472. NICOLÒ, of the same family, a man of letters, and member of the council of ten, 1515-1565.

ZENOBIA, SEPTIMIA, a princess of Arabian descent, who became queen of Palmyra in the desert, after the murder of her husband, Odenatus, in 267. The latter was killed by his nephew at a festival, and Zenobia, who acted with great energy, assumed the title of queen of the East. She was deprived of her dominions by the emperor Aurelian in 272, and died in a private retirement near Rome. The celebrated critic Longinus acted as her secretary, and was put to death by the Romans. ZENOBIOUS, a Greek sophist, 2d century.

ZENODORUS, a tyrant of Syria, d. B.C. 20.

ZENODORUS, a Greek sculptor, 1st century.

ZENTGRAVE, J. J., a Ger. theolog., 1643-1707.

ZEPERNICK, C. F., a Ger. jurist, 1751-1801.

ZEPHIRINUS, a bishop of Rome, 197-217.

ZERBE, P. DE, an Ital. missionary, 1712-1716.

ZERBIS, G. DE, an Ital. anatomist, died 1505.

ZERMEGH, J., a Hungarian histor., 16th cent.

ZERNITZ, C. F., a German poet, 1717-1744.

ZEROLA, T., an Italian canonist, 1548-1603.

ZESEN, P. DE, a German poet, born 1619.

ZEUNE, J. C., a Ger. philologist, 1736-1788.

ZEUXIS, one of the most celebrated painters of antiquity, was born at one of the ancient towns of

Heraclea, probably in Macedonia, about 460 B.C.

Zeuxis was at the height of his reputation in the time of Archelaus, king of Macedon, 413-399 B.C.;

he painted the palace of this king at Pella, for

which he was paid 400 minæ, about £1,600 sterling.

Much concerning Zeuxis has been preserved in

ancient writers; nearly every notice reflecting upon

him in the very highest praise, not only in the shape

of popular anecdotes, but in the positive and circum-

stantial statements of art criticism: and some

of the facts recorded concerning this painter, show

how similar must have been the ways of art among

the Greeks upwards of 2,000 years ago, to what they

have been during their great epoch in Europe in

modern times. The *naturalist* development of art as

compared with its condition the generation before, in

the time of Polygnotus is clearly demonstrated in the

various accounts of Zeuxis, both as to subject and

its treatment, at the same time combined with the

ideal or principle of selection; art was no longer

merely representative, but thoroughly dramatic.

Polygnotus, Zeuxis, and Apelles represent well

the three great phases of Greek painting, the

essential, the dramatic, and the refined, in which

the technical qualities attained their utmost per-

fection, and like most clevernesses obscured or

overshadowed more essential qualities. Amongst the

most remarkable works of Zeuxis, and they were

many, are mentioned particularly the celebrated

'Helen of Croton,' and a 'Family of Centaurs.'

The former was painted from five beautiful virgins

of the city, and was one of the most celebrated of

all the Greek pictures, and it has for ages been the

theme of poets of all countries. Zeuxis himself subscribed on the picture the three lines from Homer which speak of Helen's beauty:—

'No wonder such celestial charms
For nine long years have set the world in arms!
What winning graces! what majestic mien!
She moves a goddess, and she looks a Queen.'

Pope, *Il. iii.*, 156-8.

Lucian says that Zeuxis seldom or never exerted his powers upon such vulgar or hackneyed subjects as gods, heroes, or battles. His characteristics have been described as a grand style of form, combined with a high degree of execution, and powerful effect of light and shade; for Apollodorus, the Athenian painter, who may be termed the Greek Rembrandt, complained that Zeuxis had robbed him of his art. To all these fine qualities we must add his highest, his dramatic power of composition; in expression Aristotle tells us that he was inferior to Polygnotus. There are several stories told about illusive pictures painted by Zeuxis and Parrhasius of Ephesus: the only value of these is to show that *illusion* was one of the qualities of Greek painting, which will acquire it a higher consideration in some minds than any other quality;—(Wornum, *Epochs of Painting Characterized*, &c., and *Penny Cyclopædia*, Art. Zeuxis.) [R.N.W.]

ZEVECOT, J., a Flemish poet, 1604-1646.

ZHINGA, BANDI, a queen of Angola, who maintained a struggle for 28 years with the Portuguese, and after performing prodigies of valour was despoiled of the larger part of her dominions. She then submitted to be baptized as a means of preserving the remainder, 1581-1663.

ZICHEN, E. DE, a Flemish contro., 1482-1538.

ZIEGELBAUER, CARACHORD, a German Benedictine and historian of his order, 1696-1750.

ZIEGENBALG, BARTHOLOMEW, a German philologist and missionary to the East Indies, 1683-1719.

ZIEGLER, C. J. A., a Ger. physician, 1735-95.

ZIEGLER, G., a German jurist, 1621-1690.

ZIEGLER, J., a Latin dramatic writer and biographer of Bavaria, 1520-1564.

ZIEGLER, J., a Bavarian theologian, mathematician, and geographical writer, 1480-1549.

ZIEGLER, W. C. L., a Ger. theol., 1763-1809.

ZIEGLER, ST. KLIPPHAUSION H. ANSELME DE, a poet of Saxony, 1653-1690.

ZILIOLI, A., a Venetian historian, 16th cent.

ZIMARA, M. A., an Ital. physician, 1460-1532.

ZIMISCES, emperor of the East. See JOHN.

ZIMMERMANN, EBERHARD AUGUSTUS WILIAM VON, professor of natural philosophy at Brunswick, author of political works and treatises in natural history, 1743-1815.

ZIMMERMANN, HENRY, author of an account of the third voyage of Captain Cook, with whom he sailed in the *Discovery*, 1776.

ZIMMERMANN, JOHANN GEORG VON, was one of the most eminent of continental physicians in the eighteenth century, both as a practitioner and as a professional writer. His miscellaneous writings also were numerous; and one of these, his striking but not very philosophical essay 'On Solitude,' is now, indeed, quite forgotten in England, but was once very popular among us. It was first printed, as a sketch, in 1756, and afterwards in its complete shape in 1785.—Zimmer-

mann was born in 1728, at Brugg, in the canton of Bern. After having studied at Göttingen, he practised medicine successively at Bern and in his native town. His tendency to hypochondria showed itself even thus early, but did not disqualify him from either active practice or from zealous and miscellaneous studies. His professional celebrity gained him, in 1768, the appointment of royal physician at Hanover; after the second appearance of his work 'On Solitude,' he was invited to St. Petersburg; and the year after he attended Frederick of Prussia in his last illness. His writings after this were chiefly gossiping collections, and expressions of the horror with which he regarded the revolutionary principles that were becoming prevalent. His melancholy continued to increase; and he was completely deranged for some time before his death, which took place in 1795. [W.S.]

ZIMMERMANN, JOHN JAMES, a Swiss theologian, professor at Zurich, 1685-1756.

ZIMMERMANN, JOHN JAMES, an eloquent German preacher, generally regarded as a disciple of Boehmen and Brouquelle, whose doctrines he rendered highly popular; born in the duchy of Wurtemberg, 1644, died at Rotterdam, 1693. Zimmermann made many proselytes in Germany and the United Provinces, and at the moment of his death was about to depart for America to escape the persecution to which he had been subjected. For some years he was professor of mathematics at Heidelberg. The most notorious of his works is entitled a 'Revelation of Antichrist.'

ZIMMERMANN, JOSEPH, a Swiss officer, poet, and military writer, 17th century.

ZIMMERMANN, MATTHIAS, a learned theologian of Hungary, 1625-1689.

ZIMMERMANN, WILLIAM, a German pastor and controversial writer, 16th century.

ZIMOROWICZ, SIMON, a Russian poet, about 1604-1629. A brother of his, named BARTHOLOMEW, was a biographical writer.

ZINCKE, C. F., a German painter, 1684-1767.

ZINGARELLI, NICOLÒ, an Italian musician, known at the court of Napoleon in the earlier years of the empire, and afterwards chapel-master at the Vatican, born at Naples 1752, died 1837. He is the author of several operas.

ZINKE, G. H., a Germ. economist, 1692-1769.

ZINKGREF, J. G., a German poet, 1591-1635.

ZINN, J. G., a German anatomist, 1727-1759.

ZINZENDORF, NICHOLAS LOUIS, Count Von, founder of the Herrnhuters, or Moravian Brethren, was born at Dresden in 1700. According to his own account (in his 'Natural Reflections on Various Subjects'), he aspired to form a society of believers from his boyhood. On coming of age in 1721, he settled, with this object in view, on his estate at Berthelsdorf, in Upper Lusatia, and was there joined by several proselytes from Bohemia. By 1732 the numbers who had flocked around him amounted to six hundred, and all these were subject to a species of ecclesiastical discipline, or monastic despotism, which brought them in spirit and body, or was intended so to do, under the most absolute control of their leader. From an adjacent hill, called the *Huth-berg*, was derived the name of the colony *Huth des Herrn*, contracted to *Herrnhut*, the name of the sect;—

the appellation of Moravian Brethren was assumed for his party by Count Zinzendorf, for the sake of connection with the separatists of Bohemia and Moravia, partly derived from Valdo, the forerunner of Luther: some of these, indeed, were among his colonists. Zinzendorf assumed various titles: the chief of the Herrnhuters, all of which related to a *pontificate* as his function. From 1733 his missionaries began to spread, not on over parts of Europe, but in Greenland and North America—even Africa and China were not forgotten. To him, in fact, Wesley was directly indebted for both his religious organization and his missionary plans, which became so eminently successful that indefatigable labourer having passed some time with Count Zinzendorf at Herrnhuth. The interference of the government with the Count's projects, can hardly be regarded as a measure of persecution, as secret doctrines were undoubtedly held by him, and thus motives given to his followers, and objects sought, of which, whether good or evil, the established authorities could take no cognizance. The history of the sect is curious and interesting: next to their organization of classes, the use of singing, which furnished the Wesleys with a valuable hint, is one of its most remarkable characteristics; under this head some singular details might be given. Something might be said also on the connection of a certain marriage rite with the theory of regeneration, the efficacy of which was probably tried by the Herrnhuters in common with the Quakers. Count Zinzendorf died amongst his people on the 9th June, 1760. [E.F.]

ZINZENDORF, PHILIP LOUIS, Count Von, an Austrian statesman, by whom the wars with Turkey and France were decided, chancellor in the reign of Joseph I., 1671-1742. His son, of the same name, a cardinal, 1699-1747.

ZINZERLING, J., in Latin *Jodocus Sincerus* a philologist of Thuringia, 1590-1618.

ZIRARDINI, ANTONIO, a learned Italian jurist, consult and archaeologist, 1725-1784.

ZISKA. The real name of this renowned leader in the early wars of religion in Germany was JOHN TROCZNOW. He acquired the name Ziska (which means one-eyed,) from the loss of an eye in battle. He was born about 1380. He was of one of the noblest families in Bohemia, and was brought up in the court and camp of the emperor. Like the greater number of his Bohemian fellow-countrymen, he embraced the tenets of John Huss; and when that reformer was cruel and perfidiously put to death by the council of Constance, the Bohemians flew to arms to avenge their leader's martyrdom, and to protect themselves from the persecution with which they were menaced by the bigotry and tyranny of the emperor Sigmond. They elected John Ziska their general; and in a few months he raised and disciplined a formidable army, and organized a war of independence throughout Bohemia. The emperor invaded Bohemia, but Ziska attacked and utterly defeated him, 11th July, 1420. A negotiation and temporary pacification followed; but the war soon broke out again with redoubled violence, each side being exasperated against the other by religious fanaticism, and by the thirst for retaliation for deeds of atrocious cruelty. Ziska was everywhere victor.

ons. He invaded Austria and Hungary, and lost his remaining eye at the siege of Raab. Though now entirely blind he continued to command the Bohemian armies, and gained a victory over Sigismund at Arssig, which placed the Austrian dominions at his mercy. Ziska's ferocity was equal to his military skill; and his followers spread the most fearful and indiscriminating ravages wherever they marched. The emperor now earnestly sought terms of peace, and a treaty, most humiliating to Austrian pride, was concluded by Ziska's influence over the Bohemians. Ziska was on his way to meet the emperor when he died of the plague, 11th October, 1425. There is a legend that by his dying orders his skin was, after his death made into a drum, and used by the Bohemians in their subsequent wars with the emperor. [E.S.C.]

ZIZIANOFF, PAUL DEMETRIEVITCH, a Georgian prince in the service of Russia, assassinated at the instance of Khan Ibrahim, 1805.

ZOBOLL, A., an Italian astronomer, 17th cent. ZOCOLLI, CARLO, an architect, engineer, and jurisconsult of Naples, 1718-1771.

ZOE, a mistress of Leo VI., emperor of Constantinople, who was married by him after she had defeated a conspiracy, and died in less than two years after her elevation to the throne, 893. She is said to have poisoned her first husband. A second ZOE was successively the mistress and wife of the same emperor; she condescended to the former character, in order to test the probability of her supplying Leo with a successor, and was crowned three days after the baptism of her son, Constantine VII., in 905. The latter succeeded to the throne in 911, and Zoe exercised the sovereign authority some time: she was at length exiled, and died in obscurity, 919.

ZOE, empress of the East, was the daughter of Constantine IX., and became the wife of Romanus III. in 1028, when she was in the forty-eighth year of her age. She was a debauched woman, and became the murderess of her husband, in order to place her lover on the throne, who reigned under the title of Michel IV. The latter dying, was succeeded by his nephew, Michel V., who was deposed by the people, and Zoe and her sister, Theodora, proclaimed joint sovereigns. She displayed great ability and firmness in the government; and in 1042 married in third nuptials Constantine Monomachus. She continued to reign till her death at the age of seventy-four, in 1052.

ZOEGA, GEORGE, a Danish archæologist, celebrated for his labours in Egyptian philology and antiquities, 1755-1809.

ZOES, H., a French jurisconsult, 1571-1627.

ZOHEIR, an Arabian poet of the period of Mahomet. The work of his which has come down to the present time celebrates some of the Arabian princes, and was published at Leipzig in 1792, with a Latin translation and Notes.

ZOILUS, a Greek critic and rhetorician, author of works against Homer, B.C. 283-247.

ZOLA, J., a Venetian theologian, 1739-1806.

ZOLKIEWSKI, STANISLAUS, hetman of the Polish armies under Sigismund III., was engaged in many important battles against the Russians, and died gloriously fighting against the Turks, 1547-1620.

ZOLL, H., a German jurisconsult, 1643-1725.

ZOLLIKOFER, GEORGE JOACHIM, a Swiss pastor, famous for his amiable character and eloquence as a preacher, author of 'Devotional Exercises' and Sermons, which have been translated into English, 1730-1788.

ZONARAS, JOHN, a Greek historian and ascetic writer of the 12th century.

ZONBOV, the last favourite of Catharine II. of Russia. He was made commander of the artillery, and realized an immense fortune from his exactions. Excited by Paul I., he took part in his assassination; died 1817.

ZONCA, VICTOR, an Italian architect, author of several curious mechanical inventions, of which he has written an account, published 1607.

ZOPELLI, J., a Venetian poet, 1639-1718.

ZOPF, J. H., a German historian, 1691-1776.

ZOPPIO, GIROLAMO, an Italian dramatist, died 1591. His son, MELCHIOR, a dramatic writer and philosopher, 1544-1634.

ZOPPO, P., an Italian painter, died 1515.

ZOPPO DI LUGANO, the commonly received name of J. B. DISCEPOLI, an Italian painter of the Milanese school, 1590-1660.

ZORG, HENRY, whose proper name was KOKES, a Dutch painter of interiors, 1621-1682.

ZORN, J., a German botanist, 1739-1799.

ZORN, P., a German philologist, 1682-1746.

ZOROASTER, or ZERDUSHT, the founder, or rather, as we believe, the *Reformer* of the Religion of the Parsees; born at Urmia, in Azerbaijan, about 589 B.C., in the reign of Darius Hystaspes. We shall not speak here of the fables concerning Zoroaster, nor seek to follow him during the twenty years he is reported to have spent in meditation among the awful solitudes of inaccessible Elbrooz. It is of chief moment to recognize him as the earliest systematic expounder of that solution of the Mystery of Evil, which may be termed *Spiritual Dualism*. He imagined two mighty spirits in contest—ORMUZD and AHRIMAN—God and the DEVIL; and in this, as we have said, he most probably reproduces an older mythology of the Parsee race. In English, we have the doctrine of Zoroaster in the immortal verse of Milton; nor indeed did the Hebrews ever have any notion of Dualism, until after their intermixture—during times of captivity—with the farther East. Ormuzd, was conceived by Zoroaster, symbolized by Light. The Sun a visible type of Him; and Fire the expression of his energy. Fire-worship spread, extensively through India and Higher Asia; but, as usual, it became a superstition. Schism followed on the death of Zoroaster, who, any more than other greatest Men, had no true Successor. [J.P.N.]

ZORZI, ALESSANDRO, in Latin *Georgius*, a Venetian theologian, 1747-1779.

ZOSIMUS, a Greek historian of the 5th century, contemporary with Honorius and Theodosius the younger. His work is a history of the Roman emperors, reaching to the year 470, and is favourable to Christianity. It was translated into English under the title of 'The New History of Count Zosimus,' 1684.

ZOSIMUS, a pope of Rome, 417-418.

ZOUCH, or ZOUCHE, RICHARD, author of several works in Latin on civil, military, and maritime jurisprudence, was born at Anstey, in Wilt-

shire, about 1590, and was admitted a fellow at Oxford in 1609. He was afterwards a member of parliament, and Admiralty judge. Died 1660.

ZOUCH, THOMAS, born at Sandal, near Wakefield, in Yorkshire, in 1787, became rector of Wycliffe in that county, and prebendary of Durham. In 1808 he declined the bishopric of Carlisle on account of his advanced age, and died in 1816. He wrote 'The Crucifixion,' a Seaton prize poem, 'An Inquiry into the Prophetic Character of the Romans,' 'Illustrations of the Prophecies,' a 'Memoir of Sir Philip Sidney,' and other works.

ZRINGI, N., a Hungarian poet, 17th century.

ZSCHOKKE, HEINRICH, born at Magdeburg in 1771, inherited in childhood a moderate patrimony, which enabled him during his youth and early manhood to gratify his desire of adventure and of various knowledge. After having been a family tutor, the literary man of a troop of players, and a student in the university of Frankfort-on-the-Oder, he was licensed as a candidate of theology, or preacher, in the Reformed or Calvinistic church, and was within a little of becoming pastor of a congregation in his native town. He next returned to Frankfort, and lectured there on various branches of philosophy and theology. Failing, however, to obtain a professorship, he settled, in 1796, at Reichenau in the Grisons, where he established very successfully a boarding-school for boys. The political disturbances, spreading into Switzerland, drove him within two years to seek refuge at Bern. His administrative ability, with his political opinions, recommended him to employment under the central government of the Helvetic Republic. In 1802 he settled near Aarau, the chief town of the canton of Aargau; and there he resided for the remainder of his long life. Attaching himself in politics to that which may be regarded as having been the moderately democratic party, he held in succession several public offices, and distinguished himself by his activity in promoting social reforms, especially such as bore on the education of the poor. He died in the summer of 1848.—Zschokke's published writings filled, when collected, more than forty volumes. Their kinds were various; and he was far from being successful in some of these, especially his attempts at poetical and dramatic composition. His most ambitious works were, his 'History of the Bavarian Nation and its Princes,' and his 'History of Switzerland for the Swiss People.' The latter, first published in 1802, became exceedingly popular, and is authoritative and excellent, though held not to be impartial. In his interesting 'Autobiography,' written in old age, he declared himself the author of the 'Hours of Devotion' (Stunden der Andacht), which was originally a Sunday periodical, designed for ordinary families. It became, on being collected, a great favourite throughout protestant Germany; where its shortcoming in orthodoxy was held no serious drawback on its fervour of sentiment, its advocacy of unlimited tolerance, and its zealous inculcation of practical duty.—The best known, however, of Zschokke's works are his Novels, which are very numerous, while some are of considerable length. The least successful of them are those which take the form of historical romances: he wanted the strength of imagination and the depth of feeling requisite for recreating the past. The best are

those in which he paints reality and familiar life, and in these there is a very agreeable mixture of broad humour with a light and cheerful sentimentality; while the grotesqueness of characterization is supported by much originality in the invention of comic incidents. A considerable number of these comic tales, as well as several of the serious ones, are avowedly didactic. In some of them the author aims at teaching religious lessons, much like those of the 'Stunden'; as in the dissertative story of 'Alamontade,' and the serio-comic novel of 'Jonathan Frock.' In others he represents much in the manner of Mrs. Hamilton or Miss Edgeworth, attempts at domestic and social reforms among the poor: such are 'The Goldmakers Village,' 'The Millionaire,' and 'The Hole a Elbows.' Several of the best are lively and striking embodiments of the weak points in social institutions, especially as these appear under absolute governments. Instances of the kind are these: the tale, 'Who Governs?' in which a European war is traced to the freak of a French chamber maid; 'Small Causes,' in which the history of two individuals is followed through a succession of trifling accidents; and 'The Adventures of a New Year's Night,' in which a prince and a policeman exchange places, and throw a petty court into confusion before morning. A good many of Zschokke's smaller novels have appeared in English periodicals and one or two of them, as well as his 'Autobiography,' have been translated separately. [W.S.]

ZUALLART, J., a German traveller, and author of descriptive works, 16th century.

ZUAZO, H., a Spanish juriconsult, died 1527.

ZUBER, M., a Latin and Greek poet, 1570-1623.

ZUCCARDI, U., an Italian jurist, 1480-1541.

ZUCCARELLI, or ZUCCHIERELLI, FRANCESCO, an Italian painter and engraver, taught by Morandi, distinguished for his landscapes, in which he introduced small figures, 1712-1788.

ZUCCARO, or ZUCCHERO, TADDEO, a painter, after the Roman school, born at Urbino 1529, died 1566. His younger brother, FEDERIGO, painter and sculptor, prince of the academy of Saint Luke, famous for his gigantic figures adapted to dome painting, 1542-1609.

ZUCCHERELLI. See ZUCCARELLI.

ZUCCHI, B., an Italian writer, 1560-1631.

ZUCCHI, GIOVANNI, an Italian painter, taught by Vasari, died 1590. FRANCESCO, his brother famous for his mosaic work, died 1620.

ZUCCHI, M. A., an improvisator, died 1764.

ZUCCI, N., an Italian Jesuit, 1586-1670.

ZUCCOLO, L., an Italian moralist, 16th cent.

ZUCCOLO, L., an Italian jurist, 1599-1688.

ZUCCONI, J., a Venetian poet, 1721-1754.

ZUCKERT, J. F., a Ger. mineralogist, 1737-78.

ZUICHEM D'AYTA, VIGILIUS, a Flemish juriconsult, and president of the council, 1507-77.

ZUINGLIUS. See ZWINGLI.

ZUMALACARREGUY, THOMAS, general in chief of the Spanish army, was born in 1789, and became a devoted partizan of Don Carlos, on the death of Ferdinand VII., which took place in 1822. He was the most redoubted opponent of the armies of Christina and Donna Maria, and possessed qualities which gained him the respect even of his enemies. Zumalacarreguy died of wound received at the siege of Bilbao, 25th June, 1835.

ZUMBO, GAETANO JULIO, a famous Sicilian artist; he learnt, without the assistance of a teacher, the principles of sculpture, and, after having profoundly studied anatomy, he gained great reputation by his figures in a coloured wax, the preparation of which he kept secret; 1656-1701.

ZUMSTEEG, J. R., a Germ. comp., 1760-1802.

ZUNIGA, DON DIEGO ORTIZ DE, historian of the civil and ecclesiastical affairs of Seville, 17th ct.

ZURBARAN, F., a Spanish painter, 1598-1662.

ZURITA, J., a Spanish historian, 1512-1581.

ZURLA, P., an Italian antiquarian, 1769-1834.

ZURLAUBEN, LATOUR CHATILLON DE, an ancient Swiss family, which produced many distinguished warriors, from the 12th to the 16th centuries. The best known is **BEAT FIDELE ANTOINE JEAN DOMINIQUE**, Baron Latour Chatillon de Zurlauben, who became lieutenant-general, and devoted his latter years to literature. His works are a 'Military History of the Swiss in the French Service,' a 'History of the Swiss and their Allies,' a 'Picturesque Tour in Switzerland,' and various memoirs; born at Zug 1720, died 1795.

ZURLO, JOSEPH, Count, a Neapolitan statesman, born 1759, and named finance minister 1798. In this capacity he ventured on reforms which led to his dismissal, but he became minister again under Murat in 1809, and in the fresh circumstances of 1820. On the latter occasion the influence of the Carbonari deprived him of power. Died 1828.

ZUSTRIS, L., a Dutch painter, died 1600.

ZUZZERI, BERNARDO, an Italian Jesuit and missionary in Croatia, 1683-1762. **J. LUC**, of the same family, a celebrated numismatist, 1716-1746.

ZWANZIGER, J. C., a Hungarian philosopher and opponent of Kant, 1732-1808.

ZWEERS, JEROME, a Dutch poet, 1627-1696.

His grandson, **CORNELIUS**, a dramatist, died 1774.

ZWELFER, J., a German chemist, 1618-1668.

ZWICKER, DANIEL, a theologian of Dantzic, chief of the Tolerants, 1612-1678.

ZWINGER, THEODORE, a German physician and philosophical writer, flourished at Basle, 1533-1588.

His son, **JAMES**, a physician and Hellenist, 1599-1610. **THEODORE**, son of the latter, a theologian and superintendent of the churches at Bale, 1597-1654.

JOHN, son of Theodore, a theologian and bibliographer, 1634-1696. **THEODORE**, son of John, a physician, anatomist, and botanist, 1658-1724.

JOHN RODOLPH, their nephew, a physician and founder of a scientific society, 1692-1777. **FREDERIC**, his brother, a physician and naturalist, 1707-1776.

ZWINGLI, or ZUINGLIUS, ULRICK, the great Swiss reformer, was born at Wildhausen, in the canton of St. Gall, in 1484. His early education was carried on at Basle, and afterwards at Berne. The Dominican monks, in this place, attracted by his talents and rising reputation, sought to entrap him into their order, but his father, in order to remove him from the scene of temptation, sent him off to Vienna. In 1502, and being eighteen years of age, the young scholar returned home, and soon repaired again to Basle and took his degree as master of arts. Under the teaching of Wittenbach, who had been acting along with the famous Reuslin, his mind received the first germs of free inquiry—those seminal truths, which, in his quick and genial mind, soon ripened into harvest. He

preached his first sermon in 1506, and was chosen pastor of Glaris. Here he remained ten years, and during that period he mingled in the strife of arms against the French. The young pastor, at the same time, devoted himself to the study of Greek and Hebrew, gradually made the Scriptures his sole and supreme rule of authority, and publicly expounded the Gospels and the Epistles. In 1516 he had been chosen preacher to the Abbey of Einsidlen, a famed spot of popish pilgrimage and superstition, and the year following he removed to a similar position in the cathedral of Zürich. The effect of his honest preaching of the gospel soon became apparent in the city and country, and his general character and opinions produced a deep and universal sensation. While this state of transition was so marked, the crisis was hastened, in 1518, by the arrival of Samson, the seller of indulgences. The traffic in these 'Roman wares' roused the indignation of Zwingli and led to a keen exposure and a successful resistance. Luther's writings were, at the same time, largely circulated at the recommendation of the reformer. The plague broke out, and, during its continuance, though weak himself from exhaustion, he assiduously tended the sick and dying. His zealous labours grew in number and results, the simplicity of the gospel was more distinctly apprehended by him; but the friends of the popedom were enraged, and Zwingli was tried, in January, 1523, on a charge of heresy. Rome gained nothing by the trial. Zwingli presented 67 propositions, and defended them from Scripture. The reformer gathered courage with growing difficulties, and, in 1524, the council of Zürich remodelled the public worship according to the views and wishes of Zwingli. Pictures, statues, and relics were removed from the churches, and mass was abolished. Opposition to the reformed doctrines was meanwhile gathering in the other cantons. The question arose, whether each canton was free to choose its own form of religion, or whether the confederation should interfere; Zürich contended for its individual liberty and independence, but was opposed by the Waldstettes, or the primitive democratic cantons of Schwytz, Unterwald, Urzug, and Lucerne. The triumph of the reformation at Berne, and other places, threw those forest cantons into wilder commotion, and, in consonance with their views of their federal polity, they took up arms for Rome. Zürich, encouraged by Zwingli, called out its troops and put itself into a posture of defence. Efforts were made to maintain peace, but it was of no long duration, and after various diplomatic negotiations, hostilities finally commenced. Zürich had also lost somewhat of its earlier evangelical purity, while the neighbouring states were conspiring for its ruin. In the awful emergency, when the public mind was alarmed by a series of omens and prodigies, the reformer maintained tranquillity. The war began. Zürich was cowardly, dilatory, and far from being prepared, but the horn of the enemy echoed among their hills, and the devoted Zwingli mounted his caparisoned horse, took farewell of his wife and children, and went forth as a patriot and warrior to share in the common danger. The Zürichers marched to meet the Waldstettes, but were defeated at Cappel with great slaughter, 11th October, 1531. Zwingli was found, after the battle, lying

on his back and his eyes upturned to heaven, with his helmet on his head, and his battle-axe in his hand. He had been struck near the commencement of the engagement, and then as he fell and reeled, he was several times pierced with a lance. He was living when discovered in the evening; but the infuriated fanatics soon despatched him. Next day his dead body was barbarously quartered and burnt. Thus perished this hero-martyr. The contests of Zwingli and Luther on the nature of the Sacrament of the Lord's Supper are well known, but the Swiss proved himself freer from early prejudice and traditional teaching than his great German antagonist. It is needless to discuss the relative merits of the two illustrious reformers, their position and sphere of influence being so very different. The fame of Luther has overtopped that of Zwingli, yet the Swiss divine had perhaps more

caution and sagacity, and certainly more learning and refinement than the Saxon. He was also earlier alive to the errors of Rome, and though he died a young man, yet in his narrower circle of action he carried out the reformation farther than Luther did. The works of Zwingli were published in four folios, Tiguri, 1581; and in eight octaves edited by Schuler and Schultess, Zürich, 1828-1842. [J.E.]

ZYTH, A. VAN, a Dutch theologian, 17th cent.
ZYL, OTHO VAN, in Latin *Zylus*, a Dutch poet and professor of rhetoric, 1588-1656.

ZYPE, FRANCIS VAN DEN, in Latin *Zypæus*, professor of anatomy at the university of Louvain, author of a work published 1683.

ZYRLIN, or ZIERLIN, G., a Swiss pastor and Latin poet, 1592-1661. An explication of the prophet Abdias, written in German, is ascribed to him

APPENDIX.

ABB

ABBAS PACHA, viceroy of Egypt, was the grandson of Mehemet Ali, whom he succeeded in 1849. He was a man of no particular character, but exhibited a friendly disposition towards the English, chiefly, perhaps, from his hatred of French influence. Died July 13th, 1854, and was succeeded by Said Pasha, the youngest son of Mehemet Ali.

A'BECKETT, GILBERT, was the second son of a solicitor of large practice in Golden square, London, who dealt in the now all but extinct business of providing young men of fortune with parliamentary boroughs. Young Gilbert, in common with his brothers, was educated at Westminster school. Before A'Beckett had left Westminster, that talent for ridicule began to display itself, which a wit of the day very happily characterized, when he said 'A'Beckett would contrive to put the pyramid under a thimble.' At a very early age, in conjunction with one of the members of the Mayhew family, he started a small publication called the *Cerberus*, where will be found not a few of the jokes and germs of articles that afterwards appeared full blown in *Punch*. Though vehemently admired and vehemently puffed by a clique, *Cerberus* proved a mercantile failure. No sooner had it ceased to growl, than the *Beacon* rose to warn; this more ambitious venture proved disastrous to the spirited publisher, Richardson. The *Beacon* 'paling its ineffectual fire,' A'Beckett and his staff were once more cast upon the bosom of mighty London. Something which seemed relief soon came, however, in the shape of an advertisement for a successor to 'Dirty Cummings,' the delicate sobriquet of the dramatic critic of the *Weekly Dispatch*. From among a host of competitors A'Beckett proved the successful candidate for the vacant office of theatrical censor, and great was the rejoicing of the literary *troupe* with which he was associated. But, alas, A'Beckett was not long on the *Dispatch* before he was pronounced wanting in vigour and power. Once more adrift in conjunction with a humourist named Seymour, the *Figaro* in London was projected and produced. Original in idea, crisp and pungent in its articles and low in price, the *Figaro* soon obtained a great sale. Mr. A'Beckett became a popular writer, clearing a thousand a-year by this venture. The success of *Figaro* led A'Beckett very rapidly into numerous publishing schemes, which ultimately landed him in the Insolvent Court, a crisis arising from his utter ignorance of business matters. On the establishment of *Punch*, Mr. A'Beckett was employed upon it principally in parodying courtly and commercial announcements, and in burlesquing Blackstone's 'Commentaries.' This latter vein being found popular, the histories of Rome and England were laid under contribution, but in many quarters this invasion of the domain of history was sternly

ANG

denounced as beyond the legitimate field of the humourist. About this time it was, he became connected with the *Morning Herald* and the *Times*. The bantering articles on the foundation of the British Association were understood to be from his pen. Called to the bar he made the acquaintance of Mr. Charles Buller, and by him A'Beckett was put on a commission for reporting on the poor laws and the poor. The able report which he produced on this occasion procured him an appointment as one of the metropolitan magistrates in 1849. This appointment gave rise to much cavil on the part of legal aspirants, and the *Morning Herald* denounced it in some severe leaders, understood to have been written by the late Samuel Phillips. Mr. A'Beckett's sagacity on the bench fully justified the appointment which he held with the utmost satisfaction to the public until his death. He died suddenly at Boulogne, in the autumn of 1856.

ABERCROMBY, SIR ROBERT, fifth baronet of Birkenbog and Forglen, in the county of Banff. Born 4th February, 1784, died at Forglen House, June, 1855.

ADAIR, SIR ROBERT, a diplomatist whose important services date in the time of Fox and Canning, born 1763, died in his ninety-third year, October, 1855. He was the last surviving friend of Charles James Fox. An interesting notice of his career will be found in the 'Gentleman's Magazine.'

ADAM, SIR CHARLES, a distinguished British admiral, died governor of Greenwich Hospital, 1853.

ADAMSON, JOHN, an antiquarian and man of letters, late treasurer and secretary of the Society of Antiquaries of Newcastle, 1787-1855.

AIKEN, ARTHUR, eldest son of the well known *litterateur*, and nephew to Mrs. Barbauld, was born at Warrington in Lancashire, 1773. He is the author of several works interesting to the naturalist, and was one of the founders of the Geological Society; died 1854.

ALEXANDER, ROBERT, a native of Paisley, distinguished as a journalist, chiefly as founder of the *Liverpool Mail*, 1795-1854.

AMARANTHE, MADAME DE STE. See THEOS.

ANCKLITZ. See SCHWARTZ.

ANGLESEY, HENRY WILLIAM PAGET, marquis of, eminently distinguished as a cavalry officer, was born in 1768. His father was Henry, the first earl of Uxbridge; his mother, a daughter of the Very Rev. Arthur Champagne, dean of Clonmacnoise. In the early part of his career he bore the title of Lord Paget, but succeeded to his father's title in 1812, and was created marquis of Anglesey a few days after the battle of Waterloo. His noble spirit and military ardour was shown as early as 1790, when he raised among his father's tenantry the 80th regiment of foot, or Staffordshire

volunteers, at whose head, in 1794, he joined the duke of York in Flanders. In June of this year his talents for command and his gallantry were so well established, that he was appointed lieutenant-colonel of the 16th light dragoons, and thus commenced his brilliant career as a cavalry officer. Though only twenty-six years of age, he took the place of Lord Cathcart, at the head of his brigade, during the temporary absence of that officer. In 1799, he accompanied the duke of York to Holland, and among other deeds of valour completely routed General Simon, whose force amounted to seven squadrons, while Lord Paget commanded only one. On this occasion he took five of the enemy's cannon, besides recovering some of our own pieces. From this period till 1808, Lord Paget devoted himself to the discipline of his regiment, the 7th light dragoons, and towards the close of this year was ordered into Spain to strengthen the forces of Sir David Baird, who was then advancing through Galicia, to effect a junction with Sir John Moore. It was now, in the famous retreat upon Corunna, and the final battle, that the noblest qualities of the soldier were displayed in the indomitable courage and discipline of Lord Paget's troops, and the spirit of chivalry he infused into them; for the retreat was covered by a series of fights, in which the generosity and knightly courage of the middle ages were hardly less prominent than the word of command. In 1809 Lord Paget returned to England, and his next appearance on the battle-field is at Quatre Bras and Waterloo, as earl of Uxbridge. It is impossible, in the narrow space at our command, to do justice to his achievements at this crisis of the world's fate. The cuirassiers were deemed invincible. 'Twice,' one of his biographers relates, 'had the gallant earl led the guards to the charge, cheering them with the rallying cry of, "Now for the honour of the household troops!"' when three heavy masses of the enemy's infantry advanced, supported by artillery, and a numerous body of cuirassiers. This formidable force drove in the Belgians, leaving the Highland brigade to receive the shock. At this critical moment Lord Uxbridge galloped up to the second heavy brigade, under the command of Sir William Ponsonby, when the three regiments were wheeled up in the most masterly style, presenting a beautiful front of above thirteen hundred men. As the earl rode down the line, he was received by a general shout and cheer from the brigade. Then placing himself at their head, they made the most rapid and destructive charge ever witnessed. The division they attacked consisted of upwards of nine thousand men, under Count d'Erlon. Of these, three thousand were made prisoners, and the rest killed, with the exception of a few hundred men, who formed themselves under cover of the cuirassiers. After this, his lordship bravely led the same troops in several other brilliant attacks, cutting in pieces whole battalions of the old French guard, into whose masses they penetrated.' The earl was carried through these dangers without injury, but was struck in the knee by almost the last shot of Waterloo; in consequence of which his leg had to be amputated. A few weeks, however, saw him convalescent again, and, besides the honours which he received on his return home, a pension of £1,200 a-year was awarded him, which he nobly declined. His later

years were chiefly devoted to the public service as master of the ordnance, except that he was viceroy of Ireland in the tumultuous period of O'Connell's ascendancy. In 1842, he left his old companion in arms, the 7th light dragoons, and assumed the command of the royal horse guards: four years later he was honoured with the rank of field-marshal. Died April 29, 1854. [E.R.]

ARAGO, DOMINIQUE-FRANÇOIS-JEAN, an eminent French mathematician and astronomer born 1786; died 1853. — This remarkable man was born in the village of Estagel, near Perpignan in the department of the Eastern Pyrenees, on the 26th of February, 1786. His father was a licentiate of law, and the owner of as much property in land, vineyards, and olive plantations, as enabled him to support in comfort a numerous family; but the family itself was of Spanish descent, and the future philosopher inherited with his birth the passions of the south. His elementary education was received at the communal school of his native place; but on the removal of his father to Perpignan, he was sent to the college of that ancient city, where he followed the course of instruction pursued in the French academies of that time, which did not include the learned languages. His tastes, he tells us (*Histoire de ma Jeunesse*), were at this early period purely literary, and the development of his latent mathematical faculties he owed to an accidental meeting with a young officer of engineers who was engaged in superintending the repairs of the ramparts of Perpignan, and who inspired him with a passion for a military life. Learning from his new friend that he had been a pupil in the Polytechnic school, and that a severe mathematical examination was required for admission into the establishment, he determined henceforth to cultivate the mathematics, which he did with so much zeal and success that in eighteen months he mastered the subjects contained in the programme of admission; and having passed with credit the preliminary examination, which was conducted by the celebrated Monge, at Toulouse, he entered the Polytechnic towards the end of 1803, carrying into it, he assures us, a more profound knowledge of analysis than most of the pupils contrived to carry out of it. During the next three years his progress must have been very great, for we find that, in 1806, he was appointed one of the secretaries to the Board of Longitude, and that he was shortly afterwards associated with M. Biot in the measurement of an arc of the meridian in Spain, a national undertaking which had been suspended by the death of M. Mechain, to whom it was originally confided. He still indulged the hope of following a military career under the immediate patronage of Marshal Lannes, but a different and more congenial destiny awaited him, and the Spanish expedition, which consumed three years at the most critical period of his life, first postponed the realization of his early hopes, and finally frustrated them. Biot having returned to Paris, and war having broken out between France and Spain, Arago's position in a hostile country became one of extreme danger from which he was only extricated by his own courage and dexterity. Perched on the summit of a lofty mountain, on which during the day he used his geodetical in-

struments, and at night lit a signal fire, he was suspected by the Spanish peasantry to be a spy who was communicating by telegraph with the invading army. He was obliged, therefore, to make his escape as speedily as possible, which he did in the disguise of a Catalonian mountaineer, proceeding, with his instruments and papers, to Majorca, where he found shelter in the fortress of Belver. There he completed his geodetical calculations, and remained till the political fermentation on the neighbouring continent extended to Majorca, and rendered his further stay in that island unsafe. His only way of regaining France, however, was by proceeding, in the first place, to Algiers, and thence embarking in an Algerine vessel destined for Marseilles; but this vessel, when within sight of her port, was captured by a Spanish privateer, and the philosophical voyager sent as a prisoner of war to the fortress of Rosas, and afterwards to the hulks at Palamos. After a detention of several months, and undergoing many hardships and indignities, he was liberated by the Spanish authorities, and allowed, with his Algerine companions, to proceed on his voyage to Marseilles; but a storm arose, the vessel was driven off the French coast and towards Africa, and her passengers landed at Bongia, whence M. Arago proceeded on foot to Algiers. After much delay, and some risk, the French consul procured a passage for him in a French vessel bound to Marseilles, where he arrived safely, on the 2d of July, 1809, after having been chased by an English ship of war. The reappearance of the missing philosopher in France, under circumstances so unusual, created a strong sensation in the scientific world. Among its other results it led to the formation of a friendship between Arago and Alexander Von Humboldt, which only ended with the death of the former: while it also brought to the hero of such strange adventures a rapid accumulation of honours. On the death of the astronomer Lalande, he was elected, in September, 1809, a member of the Academy of Sciences, and shortly afterwards he was appointed one of the professors of the Polytechnic school, and director of the imperial observatory, in which he ever afterwards resided. In 1830, on the death of M. Fourier, he was chosen perpetual secretary of the Academy; and in 1834, he visited Great Britain, where he was received with the respect due to his eminent personal and scientific character. The rest of his life would seem to have been spent wholly in France, and chiefly in Paris, where he occupied the highest social place that a man of letters can attain to, though the warmth of his nature led him into some troubles which a man of calmer temperament would have avoided. In political sentiment Arago was an ardent republican, but his integrity was respected by the heads of the different dynasties, imperial and royal, under which he lived. His strong political predilections, however, involved him in connections unfavourable to the calm pursuit of knowledge, and the consequences have always been regretted by those who knew how little fitted he was by previous habits for the successful management of political affairs. He took a conspicuous part in the revolutionary movement of 1848, and his appointment by the provisional government of that year to the double

office of war and marine excited some merriment at the expense of the aged philosopher, who was certainly not in his right place at the head of the army and navy departments. The sanguinary contest in the streets of Paris, in June, shocked the sensibilities of a humane man, and dissipated many fond illusions which he had till then indulged, nor did he ever recover from the impression which that terrible scene made upon him. An insidious malady (diabetes) which had begun about this time to manifest itself was aggravated by mental suffering, and the last vestiges of political hope that clung to him being extinguished by the *coup d'etat* of December, 1852, it became obvious that his physical strength was rapidly declining under the combined pressure of bodily infirmities and disappointed hopes. He refused to take the oaths to the new government; but a formal exception was considerably made in favour of a man who had deserved so well of France. Dropsy of the chest having succeeded to the disease he was originally afflicted with, he became gradually weaker, though his mind remained clear to the last; and notwithstanding the skill of his physicians, and the affectionate solicitude of his family, he died tranquilly, but somewhat suddenly, on the 2d of October, 1853. The leading points in the intellectual character of M. Arago would seem to have been, vigour of apprehension, facility in acquiring knowledge, and a happy power of discrimination in its application. To these qualities he added that pure enthusiasm without which no excellence can be reached, and habits of application which only a robust frame could have borne. He has been called the busiest man of a busy age, and it is reported of him that he considered every man idle who did not work fourteen hours a-day! while the range of his own knowledge, which was immense, shows that he did not recommend to others what he did not himself practise. 'The number and variety of M. Arago's labours,' says the venerable Alexander Von Humboldt, 'on the physical constitution of the heavens and the earth will make it a very difficult task to write his life. In all these labours, we find the same penetration and the same anxiety for the advancement of science, and the same temperance in his conjectures.' His writings are so numerous that it is quite impossible to give a list of them in a sketch like the present; but Baron Humboldt has arranged the subjects which he treated under the following heads:—1. literary and biographical; 2. astronomical; 3. optical; 4. electro-magnetical; 5. meteorological and atmospheric; 6. physical geography. The *Eloges* which he wrote, in his capacity of secretary to the Academy, are those of Volta, Dr. Thomas Young, Baron Fourier, James Watt, Carnot, Condorcet, Bailly. Of these, that on James Watt is the only one that has yet appeared in an English dress. A complete edition of his works in French, of which the first six volumes have been already printed, is in course of publication in Paris; and there can be no doubt that, when completed, they will constitute the most fitting monument that could be raised to the memory of one of the most distinguished scientific men that France has produced in the present age. [J.M.C.]

ARBOUIN, JAMES, a merchant of London,

author of a much admired treatise on the Regenerate Life, 1742-1822.

ARNAUD, MARSHAL DE ST., late commander-in-chief of the French forces in the Crimea, was born at Paris of humble parentage in 1801, and first distinguished himself in the wars of Algeria, where he went in 1836. After the most brilliant services in the field, and the devotion of his talents to the task of colonization, he was appointed, in 1850, governor of Constantine, and in 1851 he subdued the Kabyles at the head of only 6,000 men. He then returned to France, and was appointed commander of the 2d division of the army of Paris, and minister of war. His career in the war with Russia is well known. On the 26th Sept., 1854, he was attacked by cholera, and being already weakened by disease, he died three days afterwards on the voyage to Constantinople.

ARNOLD OF MELCHTHAL. See **WINCKELRIED**.

ARNOTT, DR. ARCHIBALD, was born in 1771. Dr. Arnott entered the army about the age of twenty, and retired from active service in 1826. During the principal period of his career, he was attached to the 20th foot, sharing the perils and exploits of that regiment on the Nile, in Calabria, Portugal, Spain, and Holland, earning a medal with clasps for Egypt, Maida, Vimiera, Corunna, Vittoria, the Pyrenees, Nivelle, Nive, Orthes, and Toulouse. After the war, Dr. Arnott accompanied his regiment to St. Helena and India. At St. Helena he became the medical attendant of Napoleon Buonaparte. Arnott's professional ability, ingenious character, and upright and dignified deportment as an officer, and gentleman, at once secured for him the confidence and esteem of the emperor. Shortly before his dissolution, Napoleon gave Dr. Arnott a signal testimony of appreciation of his services. As the emperor lay on his death-bed, he caused a valuable gold snuff-box to be brought to him; and with a last effort of departing strength, he engraved the letter N with a pen-knife upon the lid, and presented it to Dr. Arnott. Napoleon also bequeathed to the Doctor 12,000 francs, and the British Government, to mark its approbation of his conduct, granted him £500. Napoleon expired with his right hand in that of Dr. Arnott. The Doctor's masculine and tenacious memory was richly stored with recollections and anecdotes of that momentous period, yet, with the exception of a very clear and distinct 'Account of the Last Illness, Decease, and *post mortem* Appearances of Napoleon Buonaparte,' published in 1822, he could never be induced to write on the subject. Latterly, Dr. Arnott retired to his native parish, and died on his patrimonial estate, Kirkconnel Hall, 6th July, 1855.

ARUNDALE, FRANCIS, an architect and antiquarian, 1807-1854.

ASTRAMPSYCHUS, a Greek author of the lower empire, whose Iambics are printed with Rigault's edition of Artemidorus.

B

BAGOT, RICHARD, late bishop of Bath and Wells, was born in Northamptonshire, 1782. In 1803 he graduated at Oxford, and in 1806 was pre-

sented by his father, William, first Lord Bagot, to the rectory of Leigh in Staffordshire. The year following he moved to Blithfield and became canon of Windsor. In 1817, he was appointed a canon of Worcester; in 1829, was consecrated bishop of Oxford; and in 1845, succeeded Bishop Law in the see of Bath and Wells. Two remarkable circumstances render his bishopric a memorable one—the cessation of the 'Tracts for the Times,' in obedience to his mandate as bishop of Oxford and the attack made upon him in the House of Commons by Mr. Horsman, for inducting the Rev. Mr. Bennett into the living of Frome. Soon after the latter occurrence symptoms of mental aberration appeared, and the affairs of his diocese were administered, in accordance with an act of parliament obtained for the purpose, by the Bishop of Gloucester and Bristol. Died May 15, 1854. [E.R.]

BANKS, THOMAS CHRISTOPHER, a remarkable writer on the genealogy of the peerages; was created baronet of Nova Scotia by the pseudo earl of Stirling, 1760-1854.

BARBER, CHARLES, a distinguished artist and associate of the literati of Liverpool; late president of the Liverpool Academy, died 1854.

BARCLAY, CAPTAIN, the famous pedestrian; was descended from the same ancient family as the author of the 'Apology' for the Quakers. He was born in Kincardineshire, 1779, and performed his great feats in pedestrianism about the commencement of the present century. He was a claimant for the earldom of Monteith and Airth, in right of his mother, from whom he took the family name of Allardice. Died 1854.

BARTLETT, WILLIAM HENRY, an accomplished artist and traveller, author of numerous finely embellished works. Died on his passage from the East, 1809-1854.

BATHORI. See **STEPHEN**, king of Poland.

BATISTA. See **MANTOVANO**.

BEAUFORT, HENRY SOMERSET, seventh duke of, born 1792; served on the staff of the duke of Wellington in the Peninsular war; member for the borough of Monmouth from 1815 to 1832; junior lord of the admiralty, 1816-1819; succeeded to the dukedom, 1832; died 1854.

BELL, CHRISTOPHER, a Brit. adm., 1784-1854.

BELL, CURRER. See **BRONTE**.

BELLEW, SIR MICHAEL DILLON, Bart., of Mount Galway. Born 29th September, 1796; created a baronet in 1838, died in 1845 at his family seat.

BELLOT, JOSEPH RENE, a lieutenant of the French navy, whose noble devotion in the search for Sir John Franklin has endeared his name to England, was born in Paris, 1826, but generally called himself a Rochefort man, in consequence of his removal to that city when about five years of age. He studied in the college of Rochefort till his sixteenth year, when he was removed to the Naval School under public patronage, and in the course of two years began his career of active service on board the Suffron. In the same year, 1844, he was removed successively to the Friedland and the Berceau, and sailed in the latter of these vessels to the coast of Africa. Here, in the summer of 1845, Bellot distinguished himself in the expedition against Tamatave, and received the cross of the legion of honour on the recommendation

ion of his commander, Capt. Romaine Desfosses. From the *Berceau*, which was afterwards lost, he moved to the frigate *Belle Poule*, the commodore's ship on that station, and, besides superintending the signals, found time to give a course of lectures on geometry and navigation, to such of the crew as desired it. Soon afterwards he returned to France, and was almost immediately promoted (Nov. 15, 1847) to the rank of *Enseigne de Vaisseau*, being now in his twenty-first year only; and in this capacity he shipped at first in the *Pandore*, and then in the corvette *Triomphante*, which sailed for the Plate River, July 23, 1848. In this cruise again his commander, Captain Sochet, spoke of him as an officer of the highest promise; and having returned to Rochefort in August, 1850, he was soon afterwards appointed to convey troops to Cherbourg in a small transport vessel which he commanded for a month. This service closed his career in the French navy, for it was in the spring of 1851 that he began to solicit his government for leave to take part in the expedition then preparing for Lady Franklin. His biographer remarks that Bellot was *passionally a voyager*; and his journals prove the correctness of the observation, for they are marked by all the enthusiasm of discovery, and scorn of danger that we find in the old voyagers, but he was also animated by a chivalrous admiration of Lady Franklin, and a sympathy for her loss; nor must we omit a desire to add to the glory of his country by planting the French flag, and conferring the names of Frenchmen, for the first time, on arctic lands. His request being granted, Bellot sailed in the *Prince Albert*, a brig of 50 tons, commanded by Mr. Kennedy, which left Aberdeen on its second voyage to the Northern Seas, in May, 1851, and returned in the year following. In this interval the young adventurer made an important geographical discovery in the course of a journey of at least 1,100 miles over the ice, accomplished under great difficulties; he found, in short, that Boothia Felix was separated from the land of Somerset by a narrow arm of the sea, now called Bellot Strait. While absent also, he had been honoured with the rank of lieutenant in the French service. On his return, Lieutenant Bellot memorialized his government, and urged the importance and humanity of an expedition to the Polar Seas, but before any decision could be arrived at he requested and received permission to sail with Captain Ingfield in the *Phoenix*, which left Woolwich, accompanied by the *Breadalbane*, in May, 1853. On the 21st of August, he volunteered to carry a communication across the ice, and a gale coming on, the ice was parted from the shore and drifted away with the current in a storm of snow and wind. Bellot perished, and the *Breadalbane* was wrecked in the same gale. [E.R.]

BERANGER, PIERRE JEAN, the Burns of France, was born at Paris, August 19, 1780, at the house of his grandfather, a Parisian operative tailor. Neither father nor mother seem to have had much to do with the education of the future poet. His father, a native of Flamicour, near Peronne, was constantly aspiring during a life full of adventure to attain a more elevated condition than that in which he was born; but unfortunately he wanted the perseverance necessary to assure success in his ambition, being, in point of

fact, rather too much addicted to tracing the greatness of his ancestry ever to achieve his own. It was therefore to his grandparents that Beranger owed his first principles and impulses. With them he lived until his ninth year, and while under their roof, witnessed the taking of the Bastille. Forty years afterwards he celebrated the event within the prison *De la Force*. Before young Beranger had reached his tenth year, he quitted Paris for Peronne, where he was consigned to the care of a paternal aunt, who kept an inn in the suburbs of that town. The aunt was a stern disciplinarian, and though his services as pot-boy left the future poet but little leisure for reading, nevertheless it was under her roof that Beranger first made the acquaintance of Telemachus, Racine, and Voltaire. At the age of twelve he was struck by lightning in her house. So soon as he recovered from the severity of the shock, his first words were a sneer at the expense of the old lady. At the commencement of the storm Beranger had observed his aunt sprinkling her house all over with holy water. 'Pray, what good,' said he, 'has all your holy water done?' At the age of fourteen he was apprenticed to one Laioné, a printer. In this employment he began to learn the rules of orthography and language. But the school which contributed most to his intellectual and moral development was the *School of Primary Instruction*, founded at Peronne by M. Bellue de Bellanglis. An enthusiastic admirer of Rousseau, M. Bellue had designed an institution for children according to the maxims of the citizen-philosopher. The exercises which the discipline of the school necessitated Beranger to compose, formed his style, awakened his taste, extended his knowledge, and directed his attention to public affairs. From this school he returned at the age of seventeen to his father at Paris; and about this time the first idea of making verses dawned upon him. Molière and La Fontaine were his favourite authors; he studied their fine and minute points of observation, their verse, their style, and through this study arrived at something like a just conception of his own proper talent. Days of darkness and adversity quickly succeeded. From the depths of his poverty Beranger conceived the idea of possibly interesting M. Lucien Buonaparte in his position, so, gathering up his songs, he sent them, together with a letter revealing his circumstances, to the brother of the First Consul. Lucien Buonaparte, ever ready to succour struggling genius, gave to Beranger the most generous recognition and the most substantial assistance. Subsequently, through the interest of M. Arnault, Beranger obtained an appointment to an office in the University, which he held for twelve years. In 1821 he was dismissed from this appointment on account of his political sentiments. His works have been collected and published at six successive times—in 1815, in 1821, in 1825, in 1828, in 1833, and in 1847. The collection published in 1821 was prosecuted, and though defended by M. Dupin, senior, cost the author three months' imprisonment; the edition of 1828 was also prosecuted, and for it Beranger endured a captivity of nine months. The poet was also tried for reprinting some of the obnoxious songs in the account of his trial. At the revolution of 1848 Beranger was chosen a deputy to the National

Assembly, but he resolutely refused the honour. During the reign of the present Emperor of France, the most flattering attentions were bestowed upon him by Napoleon and Eugénie. Nevertheless, he held fast the integrity and simplicity of his republican creed, and died as he had lived—a man who flattered neither Kaiser, Pope, nor King. Eager to make capital out of his dust, the Emperor decreed him a public funeral; the state of parties in Paris, however, sadly marred the splendour of this spectacle, and robbed the imperial government of the glory which, in other circumstances doing honour to the remains of the national poet of France, would unquestionably have thrown around the *regime* of Napoleon. Beranger died July, 1857.

BERESFORD, WILLIAM CARR, Viscount Beresford, a soldier of distinguished bravery; was born in 1770, entered the British army in 1778, and served in America, Egypt, and the Peninsula. He was raised to the peerage in 1814, and employed in various capacities connected with his profession until 1830. He died in 1854.

BERKELEY, THE HON. CRAVEN FITZHARDINGE, M.P., born May, 1805, was member of parliament for Cheltenham from 1832 to 1847. Died in 1855.

BERLIOZ, MADAME, formerly well known on the London stage as Miss Smithson, d. at Paris, 1853.

BERNAL, RALPH, smithy member for Rochester, and a connoisseur in art, died 1854.

BETHAM, SIR WILLIAM, remarkable for his labours in genealogy, heraldry, and other subjects of antiquarian research, was born in 1779. His father was a clergyman, and Betham was brought up to the printing business; but commenced his literary avocations by revising a portion of Mr. Gough's edition of Camden. About 1805, he went to Dublin as clerk to Sir Chichester Fortescue, then Ulster king-of-arms, and succeeded his employer in that office in 1820. He published many works, and devoted much of his time to the antiquities of Ireland and the Celtic tongue. Died at Blackrock, near Dublin, October, 1853.

BETHELL, REV. GEORGE, M.A., senior fellow and vice-provost of Eton College. Born in 1799; died August, 1857.

BEXFIELD, WILLIAM RICHARD, doctor in music, composer of 'Israel Restored,' was born in Norfolk, 1824. He had already distinguished himself by the composition of some fine chorals, fugues, and anthems, when he became organist of Boston church, though scarcely more than twenty-one years of age. His oratorio was performed at Norwich for the first time in 1851. Dr. Bexfield died prematurely in November, 1853.

BIELKE. See **DE BIELKE**.

BIRD, GOLDING, M.D., an eminent physician in London, and well known as the author of several works on natural philosophy, &c. Dr. Bird was born in Norfolk, in 1815, and whilst still a youth at school, manifested a decided taste for the study of chemistry and botany. He was brought up to the profession of medicine, and during his medical studies, had applied himself so zealously to the science of botany, that he obtained the prize given for that by the Apothecaries' Company. In 1836, before he was twenty-two years of age, he was appointed lecturer on natural philosophy at Guy's Hospital school of medicine, and afterwards he gave

lectures on medical botany. Dr. Golding Bird's chief works are his 'Elements of Natural Philosophy,' 'Lectures on Electricity and Galvanism,' and 'Urinary Deposits;' but his love for natural history continued throughout his life, and his papers on 'the Siliceous Armour of Equisetum Hyemale' in the Linnean Society's Proceedings, and on 'the Zoophytes of Tenby' in the Microscopical Society's Transactions, show that he could snatch time from the absorbing pursuits of an extensive practice to follow up his favourite studies. In 1848-49 symptoms of disease of the heart showed themselves, and notwithstanding care and retirement from business to the healthy neighbourhood of Tunbridge Wells, ultimately proved fatal in October, 1854, at the early age of thirty-nine. Dr. Bird was assistant-physician to Guy's Hospital, was a fellow of the Linnean, Geological, and Royal Societies, and had for some time previous to his death a practice of £5,000 a-year. [W.B.]

BISHOP, SIR HENRY ROWLEY, died on the 30th of April, 1855, aged sixty-eight years. Sir Henry, who was a native of London, had for his first and principal master in music, Signor Francesco Bianchi, who towards the close of last century was engaged as opera composer for Billington and Bianti. In 1806 Bishop was engaged at the opera house as composer of *Ballet* music. Two years later he began to write for the English theatres, his first works being 'Caractacus,' and a pantomime for Drury Lane; in 1809 his reputation was established, and he produced at the above-named theatre 'The Circassian Bride.' No second performance ever took place, because at the burning of Drury Lane theatre the score of this work was destroyed. From this period until 1826, he wrote incessantly for the two great theatres; and his career as a dramatic composer may be said to have terminated with the year named, when his 'Aladdin,' which was composed as a rival to Weber's 'Oberon,' proved a failure. Operas, ballets, melo-dramas, incidental music to Shakespeare's plays, adaptations of foreign operas, glees, and songs, all followed each other with remarkable rapidity during the years when he wrote for the theatres. His regular dramatic compositions amount to no fewer than seventy in all, while his glees (the most popular of those of any modern English composer) and his songs, many of which will be long remembered, are almost limitless. During the late years of his life he composed two *Cantatas* for the Philharmonic Society, which added nothing to his reputation. Though he died literally in misery, he for many years enjoyed a full share of popular favour, and reaped large gains. He was one of the first Philharmonic directors,—for some years conducted the Ancient Concerts—was elected professor of music at Edinburgh under the legacy of General Reid, which situation he filled only for some three years—and held an appointment at Oxford. He received the honour of knighthood from the Queen shortly after she came to the throne.—The *Athenæum* says of him, 'Had he possessed more of the true artist temperament more self-respect, and more energy, with the gifts which he owned, and the opportunities which he commanded, he might have founded a school of dramatic music in this country. No ordinary grace, delicacy, and freshness, distinguish his melodies. In

the best of his airs and glees, the words are followed and set with taste. His treatment of the opera was simple and clear—neither feeble nor thin—always appropriate, often elegant, and generally effective. There is music in "The Slave," "The Miller and his Men," "Guy Mannering," "Maid Marian," "The Virgin of the Sun," "The Englishman in India," and half a score beside of his operas—there are settings by him for one and two voices of Shakespeare's choicest words—delicate, melodious, and English enough to make us express our regret that Bishop never comprehended his own strength, or his own responsibility, as a master and an inventor.

—Sir Henry R. Bishop was improvident; he died without leaving provision for the future of a son and daughter—twins—without even providing for their education. In the last weeks of the composer's life, means were set on foot to provide for the close of his life by a public performance, and a subscription which might assist in rearing his children during the tender years of their infancy, but he died before the fruits of the benevolence of his fellow-artists came to ripeness.—The *Musical World* of May 5th, 1855, had an article on the musical genius of Sir H. R. Bishop, from which we extract the following passage:—

His death has left a gap which we look in vain to see filled up. That we have had, and still have, none adequate and learned musicians, is unquestionable; but that we ever could boast, with the single exception of Purcell, a composer so individual; and so identified with the sentiment of English national melody, is equally doubtful. Bishop was not merely genuine; he was prolific, and produced a great many things that are likely to endure as long as the art itself, which, after all, can be said of few composers. The melody of Bishop was a pure and flowing spring that had its source in nature, and was therefore a gift from above. His tune was varied and abundant. His vein of melody, as in the instance of far greater masters than himself, seems to open without an effort. Nothing forced, exaggerated, or otherwise ungenial, was to be traced in his productions—we allude of course to his best, to the good rain—from which time has sifted the chaff. On the 8th of April, of the same year, the *Times*, in an appeal to the public in favour of Sir H. R. Bishop, says,—"No English musician has composed so much and so well as Henry Bishop; and probably none has produced so many things likely to endure. In every house where music, more especially vocal music, is a welcome guest, the name of Bishop has been, and must long remain, a household word. Who that has been soothed by the sweet melody of "Blow, Gentle Gales," charmed by the measures of "Lo! Here the Gentle Lark," enlivened by the animated strains of "Foresters, Sound the cheerful Horn," touched by the sadder music of "The Wind Whistles Cold,"—who that has been haunted by the insinuating tones of "Tell me, my heart," "Under the Greenwood Tree," or "Where the Wind Blows," which Rossini, the minstrel of the South, was wont to love so well—who that has felt sympathy with "As it fell upon a day, in the merry month of May," admired the masterpiece of treble and chorus, "The Chough and Crow," or been moved to jollity at convivial feasts by "Mynheer van Dunk," the most original and genial of comic

glees, will not be grieved to hear that the inventor of them all, with so many more of equal merit and beauty, is in sickness and distress, without money, and no longer able to toil for it, deprived of ALL that should accompany old age?"—The performance which was got up for his benefit yielded a considerable sum of money, but he did not live to enjoy any portion of the receipts. After the demise of Sir Henry, the subscription which was commenced for the benefit of himself and his children remained open for a considerable period, and various sums, from £25 downwards, were contributed by amateur noblemen, professional gentlemen, and others. We may mention, in passing, that the Covent Garden theatrical fund, and the firm of Broadwood and Sons, contributed each £50. There is therefore good reason to hope that the young children of the eminent artist and composer will be provided for during their nonage, and that they will be furnished with an education sufficient to carry them respectably through life. [J.M.]

BLACK, JOHN, late editor of the *Morning Chronicle*, was the son of a cottager, and was born near Dunse, in Berwickshire, 1783. He commenced life as an errand-boy, and, like many literary men who have risen to celebrity, devoted his early years to self-culture under no ordinary difficulties. At the age of twenty-seven, he walked to London with three halfpence in his pocket, but with an introduction to Mr. Perry, editor of the *Morning Chronicle*, who engaged him as reporter. In 1821, he had risen to the post of editor, which he retained till 1844, when he retired from active life. Died in June, 1855.

BLANQUI, JEROME ADOLPHE, one of the most distinguished publicists of France, born at Nice, 1798, died at Paris, Jan. 28th, 1854. His ablest work is entitled 'Cours d'Economie Industrielle.' M. Blanqui travelled many years in foreign countries, England, Italy, Germany, Austria, and Servia, to study and compare the different processes of industry and social economy, the results of which he has embodied in his works.

BLOMFIELD, CHARLES JAMES, late bishop of London, was born on the 29th May, 1786, at Bury St. Edmunds. From his father, who was a teacher there, he received his earliest education. But it was at the grammar school of his native place, where he spent some ten years, that he acquired the rudiments of that scholarship which afterwards secured for him at Cambridge the distinction of third wrangler, senior medallist, and a fellowship at Trinity college, together with Sir William Brown's gold medal for the Latin and Greek ode. Charles James Blomfield, though the son of poor parents, was fortunate enough to obtain the patronage of the marquis of Bristol and the second earl Spenser. With such ability and such patronage, his preferment in the church to which he had devoted himself was unusually rapid. At the early age of thirty-eight he was elevated to the bishopric of Chester, and four years afterwards to the see of London. During the quarter of a century which he held that conspicuous position he was universally recognized as the most eminent member of the episcopal bench. The disposal of the ample preferment in his gift was never prostituted to the objects of nepotism nor to the bias

of his political opinions. Bishop Blomfield was a firm supporter of High Church principles, and was one of the prelates who entered their protest against the elevation of Dr. Hampden, bishop of Hereford, to the episcopate. His lordship was known among scholars by his admirable editions of *Æschylus* and *Callimachus*. The best friends of his school and college career were those of his ripest years. The store of his reading and the fund of his anecdotes diffused a charm over the society of every circle which he entered. The enjoyment of his mental powers was preserved to the close of his existence; his last act of consciousness was an act of prayer. He died in 1857.

BLUNT, JOHN JAMES, regius professor of divinity in the university of Cambridge; author of a 'Sketch of the Reformation of the Church of England' and other works, 1794-1854.

BOXER, EDWARD, rear-admiral of the White, late commander of the port and harbour of Balaklava, was a native of Dover, born 1783. He entered the service in 1798, and was some time in the flag-ship of Lord Collingwood. In 1840, he was engaged on the coast of Syria, and took part in the operations against St. Jean d'Acre. Died of cholera on board the *Jason*, June, 1855.

BOXER, JAMES MICHAEL, nephew of the preceding, and a lieutenant in the royal navy, died at Balaklava of cholera a few days before his uncle, 1855.

BOYD, DR. JAMES BOYD, was born on the 24th December, 1795, at Paisley, where he received the elements of his education. At the university of Glasgow he particularly distinguished himself in the classics. After taking the degree of M.A., he devoted himself to the study of medicine. Renouncing this pursuit, he became a student of theology, and in 1822, having completed his theological curriculum, was licensed as a preacher of the gospel. In 1825 he was elected house governor of Heriot's Hospital, Edinburgh. In 1829 his Alma Mater testified its sense of his merits by conferring upon him the title of Doctor of Laws; and in August of that same year he was appointed by the town council of Edinburgh to the classical mastership of the High School,—a situation which he held for the long period of twenty-seven years. As a scholar he possessed great critical acuteness, unusual variety, exactness of knowledge, and extreme refinement of taste. His labours in the field of classical and general editing were extensive and successful. In 1834 he prepared for the press an improved edition of Adam's 'Roman Antiquities,' which has been fifteen times reprinted. He subsequently edited Potter's 'Grecian Antiquities;' Anthon's 'Sallust,' with additional notes and examination questions; Anthon's 'Select Orations of Cicero,' with additional notes; and last, but not least important or meritorious, Bishop Porteus's 'Summary of the Evidences of Christianity,' with definitions, synopses, and examination questions, supplied by the editor. Dr. Boyd died at his house, George square, Edinburgh, on the 18th August, 1856.

BOYLE, RIGHT HON. DAVID, a distinguished Scottish lawyer, born 1772, appointed president of the court of session in 1841, died 1853.

BRAHAM, JOHN, one of the most distinguished vocalists that ever adorned the English stage, was

born in 1777. He made his *debut* at the age of ten, and continued his long and brilliant career as a singer until a few years from his death. He was the composer of several popular operas, among which may be mentioned the 'Cabinet.' Braham died in 1856.

BRAYLEY, EDWARD WEDLAKE, F.S.A., an antiquarian and miscellaneous writer, whose numerous works are spread over the first quarter of this century, was born in Lambeth, 1773. In 1825 he became librarian to the Russell Institution, which office he continued to hold till his death in 1854. Among the most valuable of his works may be mentioned 'History and Antiquities of the Abbey Church of St. Peter, Westminster,' 'Londiniana, or Reminiscences of the British Metropolis,' and 'The Beauties of England and Wales,' the latter a work in 11 vols.

BRITTON, JOHN, architectural and archæological writer, was born 7th July, 1771, at Kingston St. Michael, in Wiltshire. During a long and honourable career he did good service in extending the study of British architecture and topography, and improving the public taste and feeling for natural antiquities. Mr. Britton died on the 1st Jan., 1857.

BROCKEDON, WILLIAM, remarkable at once as an artist and inventor, was the son of a watchmaker, and was born in Devonshire, 1787; died 1854. His principal literary works are 'Italy, Classical and Picturesque,' fol., 1842-1843, and 'Egypt and Nubia,' 3 vols. fol., 1846-1849. The most admired of his paintings is a portrait of his son, 'A Student at King's College.'

BROKE, CHARLES ACTON, commander in the royal navy, was the son of Admiral Broke, who commanded the *Shannon* in the famous action with the *Chesapeake*. His services were chiefly in the Mediterranean, of late years as signal master in the citadel of Zante; died, aged thirty-seven September, 1855.

BRONTË, Miss, the gifted and much lamented novelist, known first as Currer Bell, was the eldest of three sisters, daughters of the Rev. Patrick Brontë, vicar of Haworth. A volume of 'Poems by Currer, Ellis, and Acton Bell,' published in 1846, attracted little attention, but the appearance of 'Jane Eyre, by Currer Bell,' in October of the year following, took the critics by storm, and astonished the world of every-day novel readers by its sustained intellectual power, and proofs of original genius. Curiosity was at once excited to know more of the author, whose *nom de plume* disguised, as it was intended to do, her very sex; the critics, however, remained completely at fault, and the publication of 'Wuthering Heights' by her sister Emily (Ellis Bell), and of 'Agnes Grey' by her younger sister Anne (Acton Bell), did not tend to enlighten them. The veil was at length lifted under painful circumstances. Emily Brontë died of consumption in Oct., 1848, shortly after the publication of 'Wuthering Heights,' and in the early spring her sister Anne was attended to the same grave. The facts were stated by their surviving sister, Miss Brontë, in a new edition of 'Wuthering Heights,' published 1851, whose touching memorial and recognition of the genius of her sisters, may still be read in the preface. Meanwhile, in 1849, Miss Brontë herself had

published her second novel 'Shirley,' the scene of which was laid in the dales of Yorkshire; and in 1853, her third and last work 'Villette,' appeared. Want of space forbids the least remark on the genius displayed in these works, and their distinctive characteristics; it is enough to say that their own high merits, and the sympathy of all who read them for the gifted spirit whose life and character they epitomize, will far outlive any praise we could bestow upon them. The sad story of Ellis and Acton Bell has now to be repeated for their elder in years, as she undoubtedly was in genius and artistic skill. The hand of Miss Brontë after her bereavement was solicited by the Rev. Arthur Nicholls, a gentleman who acted as her father's curate, but the latter was unwilling that his only remaining child should be taken from him. At length it was arranged that their home should be formed under the old roof-tree, a new study was added to the parsonage, and the lovers were married in 1855. Three months later the bride's constitution gave way, and she sank rapidly from week to week till she breathed her last, on the 31st of May, 1855, happy in the consoling presence of her husband and her aged father. [E.R.]

BROTHERTON, JOSEPH, for nearly a quarter of a century M.P. for Salford, was the architect of his own fortune, the consistent advocate of liberal opinions, of benevolent character, a strict vegetarian and total abstainer, and much esteemed by all who knew him. Mr. Brotherton died suddenly on the 11th Jan., 1857, much regretted.

BROWN, JAMES, an eccentric character of Durham, author of numerous pieces written in verse, which exposed him to much ridicule. He assumed the title of Baron Brown, in accordance with a fictitious patent of nobility sent to him; in consequence, it was waggishly stated, of his works having been the means of converting the Mogul Empire. His poems consisted for the most part of visions, prophecies, and rhapsodies suggested by some part of the sacred volume, of the contents of which he had an astonishing recollection. A portrait and memoir of this person is given in Hone's Every Day Book, vol. ii. [E.R.]

BROWN, SAMUEL, M.D., was born at Haddington, February 23, 1817. Equally distinguished in literature and science, Dr. Brown gained, in the metropolis of his native country, a name second to none of the young men of genius who adorned the Scottish capital. His researches and experiments in chemistry attracted great attention. His apparent success in some elaborate processes for transmuting metals, almost led to the belief that the dreams of alchemy were about to be realized. Dr. Brown's views on these subjects, as expounded and illustrated in lectures, commanded the admiration of scientific men before whom they were delivered, and gained him the friendship of Jeffrey, Chalmers, and others capable of appreciating scientific genius and eloquence. When the chair of chemistry was vacant by the death of Dr. Hope, Dr. Brown offered himself as a candidate, nor was he without considerable support; but the practical researches and published works of Dr. Gregory, together with the known failure of some of Dr. Brown's experiments, gave his opponent superior claims in the judgment of the electors. Subsequent

to this event, he gave lectures, in conjunction with the late Edward Forbes, with whom kindred genius and scientific enthusiasm had brought him into association. In 1849, 'Galileo Galilei,' a tragedy, was published by Dr. Brown; a work exhibiting much of his peculiar genius. The leading Scottish Reviews were frequently enriched by his literary contributions: some of the finest papers in the *North British* were from his pen. Dr. Brown belonged to a family well known in Scotland. His grandfather was John Brown of Haddington, author of the Self-Interpreting Bible, and founder of circulating libraries. Dr. Brown died at Morningside, Edinburgh, in 1856.

BROWNE, SIR THOMAS, author of the celebrated 'Religio Medici,' was a physician, the son of a merchant, and was born in London, October, 1605. He was educated at Winchester and Oxford, and pursued his professional studies according to custom, while travelling abroad in France, Italy, and Holland, taking his degree at Leyden. He began practice in the neighbourhood of Halifax, but removed to Norwich, where he died, on the anniversary of his birth-day in 1682, leaving a reputation which will endure, as Dr. Johnson expresses it, 'while learning shall have any reverence among men.' His 'Religio Medici' was first published without his consent in 1642, followed in the same year, on account of its many corruptions, by a genuine edition. In ten years, it had appeared in Latin, French, Italian, and German translations, and has ever since kept its place, at least as a curiosity, in the hands of the learned. This work has given rise to much controversy, and it figures in the 'Index Expurgatorius.' It is a subtle and argumentative production, but is far from being so absolutely paradoxical as it is sometimes represented, more especially in the second part, where the author sets forth his practical religion as the life of charity, and the love of God, in anticipation of Fenelon; it ought to be remembered, also, that it was written, as the author declares, without a view to publication, expressing his 'Conceptions,' and containing many things that should be read in 'a soft and flexible sense.' It contains the 'Religion' of Sir Thomas Browne, so far as he really understood his own heart, and the subjects of which he treats in the more reasoning portion, may be taken as an *exposé* of his mental habits—his manner of considering difficulties, his way of dealing with paradoxes and mysteries. It is only in this light it can be read fairly. His greatest work, the 'Pseudodoxia Epidemica,' or 'Inquiries into Vulgar and Common Errors,' first published in 1646, has been frequently reprinted, and is still a text-book; it well deserves to be characterized in the words of Coleridge, who describes the author as 'rich in various knowledge, exuberant in conceptions and conceits, contemplation, and imagination.' The popular legends considered in this work, and the author's manner of dealing with them, are things as curious and entertaining in their way as anything in the pages of Pliny, though very different in the end of their narration: it was answered by Alexander Ross in 1647. The other works of Sir Thomas Browne are an account of 'Urn Burial,' and 'The Garden of Cyrus,' besides a number of Tracts and a vast mass of MSS., including his correspon-

dence with Evelyn, Dugdale, and others; these are preserved in the British Museum and in the Bodleian Library. A collected edition of his works, including Sir Kenelm Digby's 'Annotations on the Religio Medici,' appeared in 1686: a modern edition was published in 4 vols. 8vo, 1836. [E.R.]

BRUAT, ADMIRAL, late commander of his country's fleet in the Black Sea, was born at Colmar in 1796, and obtained his first command in 1829, when his ship the *Silene* was wrecked on the coast of Africa. On this occasion he became a prisoner at Algiers, and was released when that city was captured by the French. In April, 1845, he was appointed governor of the Marquesas, and in April following of all the French establishments in Oceanica. In 1854, he became second in command of the squadron in the Black Sea, and succeeded Admiral Hamelin as first commander, when the latter returned home. He was present at the bombardment of Sebastopol, Oct. 17, and left for Toulon, Nov. 4th, 1855. Died on board the *Ulm*, in the roadstead of Messina, Nov. 25th.

BUCHAN, PETER, a Scottish antiquarian, disting. for his researches in ballad poetry, d. 1854.

BUCKINGHAM, JAMES SILK, born in the village of Flushing, near Falmouth, 1786, was the son of a retired officer, formerly in the merchant service. In the age of Elizabeth one of his ancestors served in the fleet by which the Spanish Armada was discomfited, and a like adventurous career seems to have had irresistible attractions for all in his line of descent. Of seven children, James inherited the most of this passion, and his roving disposition and love of enterprise made him the frequent and favourite guest of Sir Edward Pellew, on board the *Indefatigable*. It is not surprising, therefore, that he went to sea while quite a child, but he had also, at the ripe age of ten, passed through the experience of a love adventure and been made prisoner; he was then, he tells us in his charming 'Autobiography,' considered a handsome boy, and as he lived to be a fine old man, the truth of this can hardly be doubted. In a few more years we find him settled with a bookseller in Devonport, and at fifteen he submitted to the manager of the theatre his tragedy, entitled 'The Conquest of Circassia;' presently, however, he left his master, went to sea in a man-of-war, and when tired of the service ran away in disguise, and gave his attention, for a year, to the study of the law. With all this diversity of pursuits he found time to fall in love, and, before he was twenty years of age had a wife to support: for which luxury, we may state, he had to pay in manual labour, and worked some time in London and Oxford as a compositor. At length the sea drew him again into the service of man on a larger stage, and he went as a naval officer to the West Indies, and finally to Calcutta, where he endeavoured to establish himself by setting up his printing presses and exposing the abuses of the Indian government;—of course, his presses were seized, and the wide world was still before our bold adventurer. We cannot, for want of space, follow him in his ensuing travels through the East, but the title of his works will afford some idea of their extent. In 1822, he published 'Travels in Palestine,' and 'Travels in Arabia;' in 1827, 'Travels in Mesopotamia and the Adjoining Countries;' in 1830, in

'Assyria and Media.' Meanwhile, in 1825, Mr. Buckingham had established in London 'The Oriental Herald,' and at a later period he travelled again,—this time far and wide on the American continent. He was now well known as a man of letters, an able lecturer, and an indefatigable projector of social and legislative improvements; and with the latter character as his special recommendation, he was elected member of parliament for Sheffield, and sat in the house from 1832 to 1837. No man, as it has been expressed, was more before the public in his day, and few, we think, have been more misrepresented. In 1843, he established a literary club in Hanover square, called 'The British and Foreign Institute;' its object being a social *ré-union*, in which persons of all nations might meet as on common ground, to enjoy literary society and promote certain public uses and reforms intimately connected with the progress of the age. This design was carried out with Mr. Buckingham's usual zeal till 1846, when the institution was dissolved, partly as a consequence of the scandalous attacks that had been made upon it in the pages of *Punch*. In his 'Address to the British Public,' Mr. Buckingham fully vindicated the honesty of his character, and enumerated, as follows, a few of the 'projects' which he had successfully accomplished:—1. Establishment of a free press in India; 2. Liberty of settling in India for all British subjects; 3. Power of purchasing lands by English colonists; 4. Establishment of trial by jury in India; 5. Abolition of the burning of widows; 6. Discontinuance of drawing revenue from idolatry; 7. Free trade for Englishmen with China; 8. Opening of the overland route to India; 9. Immediate emancipation of British slaves; 10. Establishment of temperance societies (Mr. Buckingham, we ought here to observe, was president of the Temperance League); 11. Providing public baths for the people; 12. Opening public walks and gardens; 13. Establishment of provincial museums; 14. Forming public cemeteries for interment without towns; 15. Allowance of an annual grant to Polish exiles; 16. Abolition of impressment for the navy; 17. Providing seamen's homes for the merchant seamen; 18. Formation of societies for the suppression of duelling; 19. Reduction of the tax on authors and publishers. Of course it is not to be supposed that these reforms were all alike accomplished by the unaided efforts of one man; but such were the projects with which Mr. Buckingham was busy in his lifetime, and their enumeration is interesting, as showing the measure of his sympathies, and the utility always aimed at in the diversity of his pursuits. Few men have led a more adventurous life and seen greater vicissitudes of fortune, preserving, at the same time, a constant effort to do good on the largest possible scale. His career is one which establishes (to use his own words when announcing his *Autobiography*) 'that there is no obscurity of birth, no privation of property, and no opposition, either of powerful individuals, or still more powerful public bodies and governments, that may not be overcome by industry, integrity, zeal, and perseverance;—no depth of misfortune from which the victim may not hope to emerge, by labour, economy, temperance, and that single-mindedness which regards the faithful discharge

duty as the great object to which all others must be made subordinate.' Mr. Buckingham died June 30, 1855. [E.R.]

BUONAPARTE, CHARLOTTE JULIA, princess Canino, eldest daughter of Joseph Buonaparte, king of Spain, and of Julia Maria Clary, sister of the present queen dowager of Sweden, the widow Bernadotte. Born at Paris, 1802; married her cousin Charles, son of Lucien, prince of Canino, 1822; became princess by her husband's succession to his father's title, 1840; died 1854.

BURKE, JAMES, lieutenant in the royal engineers, memorable for his gallant bearing in an attack upon the Russian camp near Rustouk, where he met the death of a hero, July 11, 1854.

C

CAMPBELL, SIR JOHN, major-general, killed in the assault on the Redan fort, June 18th, 1855, was the son of Sir Archibald Campbell, commander in the first war with the Burmese. He was born in 1807, and was therefore in the prime of life when he fell. His first experience of war was obtained on the staff of his father, in the Burmese war; subsequently, he joined the 38th regiment, and served with it from 1837 to 1851, in the Mediterranean, West Indies, and Nova Scotia. In the year last mentioned he returned to England, and was appointed brigadier-general, being sent to the Crimea; by a late brevet he became major-general. He fell gloriously, cheering his men, and his body was found on the day following, close up to the abattis. His remains were interred at Cathcart's Hill. [E.R.]

CANDLISH, Mrs., formerly Miss Jean Smith, the last of the six 'belles of Mauchline' celebrated the verse of Burns,—

"Miss Miller is fine, Miss Markland's divine,
Miss Smith she has wit, and Miss Betty is braw;
There's beauty and fortune to get wi' Miss Morton,
But Armour's the jewel for me o' them a'."

The husband of Mrs. Candlish was a medical man, and her son is the Rev. Dr. Candlish of Edinburgh. **CARBUCCHIA, GENERAL**, one of the commanders of the French army in the East, and a distinguished archaeologist; died 1854.

CARLOS, DON, second son of Carlos IV., king of Spain, and grandson, by the mother's side, of Louis XV. of France, was born 1788. On the death of his brother, Ferdinand VII., in 1833, he was put to the succession to the throne, but was at length, in 1839, compelled to retreat into France. In 1845 he abdicated his pretensions in favour of his eldest son, Don Carlos Luis Conde de Monteleon, who has since married a sister of Ferdinand, king of the Two Sicilies. Don Carlos died at Este, aged sixty-seven, March 10th, 1855.

CARLYLE, Mrs., mother of the celebrated author, died 1854.

CARPENTER, R. C., an architect, 1812-1855.

CARTER, JAMES, an engraver, 1798-1855.

CARTOPHILUS. See SAINT-GERMAIN.

CATHCART, SIR GEORGE, lieutenant-general, commanding the 4th division of the British army in the Crimea, was born in London, 1794, and commenced his military career in the 2d life

guards, 1810. His experience of active warfare commenced after the battle of Borodino, in the grand army headed by the Emperor Alexander, who took the field in person, January, 1813. He was then a lieutenant in the 6th dragoons, and remained with the allied forces through all the following campaigns, and was present at all the great battles fought in Germany and France, and finally at the capture of Paris. After the peace of 1814, he accompanied his father, Lord Cathcart, to the Congress at Vienna, and from that city he took his departure for Brussels as extra aid-de-camp to the duke of Wellington. In this capacity he was present at Quatre Bras and Waterloo, and afterwards remained on the staff of the duke as full aid-de-camp. After many years of regimental service he had retired on half-pay, when the rebellion in Canada broke out, the events of which placed him in command of all the troops south of the river St. Lawrence. Six years he remained in Canada, and having returned home he again retired on half-pay; but his country still demanded his services, and, in 1852, he went out as governor and commander-in-chief at the Cape, where he at length brought the Caffre war to a conclusion. His return to England was only like a flying visit on his way to the Crimea, where his career is sufficiently well known. His fall at the battle of Inkermann is thus described by the correspondent of the *Times*:—"Sir George Cathcart seeing his men disordered by the fire of a large column of Russian infantry which was outflanking them, while portions of the various regiments composing his division were maintaining an unequal struggle with an overwhelming force, rode down into the ravine in which they were engaged to rally them. He perceived, at the same time, that the Russians had actually gained possession of a portion of the hill in rear of one flank of his division, but still his stout heart never failed him for a moment. He rode at their head encouraging them, and when a cry arose that the ammunition was failing, he said coolly, "Have you not got your bayonets?" As he led on his men, it was observed that another body of men had gained the top of the hill behind them on the right, but it was impossible to tell whether they were friends or foes. A deadly volley was poured into our scattered regiments. Sir George cheered them, and led them back up the hill; but a flight of bullets passed where he rode, and he fell from his horse close to the Russian columns. The men had to fight their way through a host of enemies, and lost fearfully. They were surrounded and bayoneted on all sides, and won their desperate way up the hill with diminished ranks and the loss of near 500 men. . . . Sir George Cathcart's body was afterwards recovered, with a bullet wound in the head, and three bayonet wounds in the body.' Thus fell one of the brightest ornaments of the army—a man who was fitted for any command, and worthy of the highest honours. We ought to remark that the profession is indebted to General Cathcart for a volume of commentaries, published 1850, in which the strategy of Napoleon and the allies in 1813 and 1814 is compared, and the principal battles described. [E.R.]

CATHERINE, queen of Navarre, was the sister of Francis Phœbus, whom she succeeded 1483.

In 1481 she married John d'Albert, who was crowned king with her in 1494 at Pampeluna. She died a few months after her husband, after being despoiled of the government, in 1516.

CATHERINE HOWARD. See HOWARD.

CAVAIGNAC, LOUIS EUGENE, a French general and politician, son of the celebrated conventionalist of the name. His elder brother was an eminent republican, and suffered a prosecution for the active share he took after promoting the Revolution of 1830, in attacking the measures of Louis Philippe's government. While his brother was thus occupied in the arena of politics, the future general was serving in the army, which he entered on receiving a commission from the Polytechnic School. In 1828, he held a command in the French expedition to the Morea. Returning to France, we find him, in 1830, in garrison at Arras, where, as afterwards at Metz, he openly avowed his republican sentiments. In consequence of this declaration of his political opinions, he was sent to Africa, where he gained great distinction in the Algerine wars. In 1847, he succeeded Lamoriciere in the command of the province of Oran; and in the following year was promoted to the governor-generalship of Algeria. His rule in Algeria was distinguished by great firmness and judgment. While holding that important office he was chosen a delegate to the National Assembly for the two departments of Lot and Seine. Ancestral connection induced him to sit for Lot. On the 24th February, a decree of the provisional government made him General of Division, a second decree made him Minister of War. The latter post was, however, declined by him, because he was not allowed to concentrate in Paris such a military force as he wished to maintain. It was not long after this ere events showed the necessity of placing the supreme military command in the hands of a single individual. Cavaignac was in consequence appointed Minister of War, and at once entered upon his command. It was on the 23d of May, that the President of the National Assembly delivered to him the command of all the troops appointed to guard the chamber. The 23d of June saw the Parisians once more behind the barricades. Two plans for suppressing the revolt were proposed. The executive committee was for spreading the troops over the capital; Cavaignac's plan was the reverse of this, and consisted in concentrating his troops at certain points, and bringing them into action in large masses. The insurrections of July, 1830, and of 1848, had been treated by the existing governments as larger street riots, to be quelled in police fashion. Cavaignac treated the insurrection of June as the outbreak of a civil war, and met it in true order of battle. After four days' fighting in the streets, Cavaignac found himself the absolute disposer of the destinies of Paris and France, but, true to his republican principles, he laid down his dictatorship, like some ancient Roman, as soon as he had pacified the capital. The National Assembly, however, aware of the importance of his services, appointed him President of the Council, with power to nominate his own ministry. This position was held by him until the election of the President of the Republic. On laying down his extraordinary powers, Cavaignac received the thanks of the

National Assembly, and the compliments of his successor. When Louis Napoleon executed his *coup d'etat*, one of his precautions was to arrest Cavaignac in his bedchamber. The General was however, released after a brief detention; and he resided unmolested in Paris since that time, though in common with other distinguished Frenchmen he never acknowledged either the Dictatorship or the Empire. In July, 1857, Cavaignac was returned as one of the ten deputies to Paris, in opposition to the imperialist party. His sudden death on the 30th October, 1857, has, however, taken from France one of the most patriotic of her sons and one of the ablest of her generals. In cool, resolute daring, and in the utter absence of all love of display, Cavaignac more nearly resembled the duke of Wellington than any French general. Cavaignac was buried at Montmartre: some 15,000 of the people of Paris escorted his remains to their final resting-place. Among the mourners were the chief of his old political friends, who had emerged from their obscurity to do honour to their departed comrade.

CHALON, JOHN JAMES, a distinguished painter, chiefly of landscapes and marine pictures, died at an advanced age, November, 1854.

CHAPMAN, JOHN, memorable for his exertions in the cause of India, especially for the introduction of railways and the cultivation of cotton, died 1854.

CLAYTON, A. B., an architect, 1795-1855.

CLEMENCE, ISAURUS. See YSAURE.

CLINT, GEORGE, a painter and mezzotint engraver, remarkable for his theatrical and other portraits, 1770-1854.

CLONCURRY, VALENTINE BROWNE LAWLESS, Lord, of Cloncurry in Ireland, was born in Dublin, 1773, and educated for the bar. Toward the close of the century we find him identified with the movement party of his countrymen, a member of the Society of United Irishmen, and an associate of Curran, Grattan, Emmett, O'Connor, Lord Edward Fitzgerald, and George Ponsonby. In 1798 he was arrested on a charge of treason, but after several examinations before the Privy Council, he was liberated as 'imprudent rather than criminal.' Arrested again in 1799, he did not regain his freedom till 1801, and in the meantime, by the death of his father, had inherited the family title. From that time till the visit of George IV. in 1821, he remained at variance with the government, but was then graciously received by his Majesty, and lived to become a sworn member of the Privy Council. Died 1853. [E.R.]

COCHRANE, CHARLES, principal founder and president of the 'National Philanthropic Institution,' established in Leicester square for the relief of the unemployed poor, 1807-1855.

COCKBURN, SIR GEORGE, a distinguished British admiral, born in 1772, and honourably served his country from 1786 till the day of his death in 1853.

COCKBURN, HENRY THOMAS, known by his title, Lord Cockburn, as one of the lords of the court of session and a lord commissioner of justice, was born in 1779. He holds a brilliant place in the rank of barristers, and possessed remarkable power and eloquence as a special pleader. In political doctrines he belonged to the san-

constellation of whigs as his friend Lord Jeffrey, whose life and correspondence he published, 1852. Died 1854.

COCKTON, H., author of 'Valentine Vox' and other contributions to light literature, 1808-1853.

CODRINGTON, ADMIRAL SIR EDWARD, born 1770, entered the navy in 1783, and in 1794 was lieutenant on board the flag-ship of Lord Howe. From that time he took a distinguished part in many great actions, but his name is chiefly associated with the destruction of the Egyptian fleet at Savarino, October 20th, 1827. On this occasion his commands of the king are said to have been expressed in a sentence more pithy than dignified, - 'Go it, Ned!' From 1832 to 1839 he sat in parliament for Devonport. Died 1851.

COLBURN, HENRY, the well known publisher, projector of the 'New Monthly Magazine,' the 'Court Journal,' the 'United Service Magazine,' and the 'Literary Gazette.' Died 1855.

COLLYER, WILLIAM BENJO, a distinguished theologian and popular preacher of the metropolis, was the son of a builder at Deptford, and was educated at Homerton. Died in his seventyecond year, 1854. His 'Lectures on Scripture Facts,' published in 1808, obtained for him the diploma of D.D. from the university of Edinburgh.

COLOMBIERE. See VULSON.

COLQUHOUN, JAMES, known as the Chevalier de Colquhoun, distinguished as a diplomatist and writer on the civil law, 1780-1855. His father was the celebrated writer on the police system of the metropolis.

CONDER, JOSIAH, editor of the *Patriot* newspaper, was born in London, on 17th September, 1789. At an early age Josiah Conder manifested that poetical genius and literary taste which subsequently distinguished him. In 1814 he became proprietor of the *Eclectic Review*, being at that time a bookseller in London. In 1819 he disposed of the business to Mr. Holdsworth, and went to reside at Watford, in Hertfordshire, retaining in his own hands the management of the *Eclectic* till 1837, when Dr. Thomas Price became the proprietor and editor. During the twenty-three years of Mr. Conder's editorship of this monthly journal, he enjoyed the assistance either more steadily or more occasionally, of John Foster, Robert Hall, Dr. Chalmers, Dr. Pye Smith, Isaac Taylor, L. Twiss, D.D., Dr. Vaughan, Charles March, and many other literary celebrities. In 1818, Mr. Conder published a work on Protestant Nonconformity. In 1824 he entered upon an engagement to compile the 'Modern Traveller.' In 1832 Mr. Conder became editor of the *Patriot* newspaper, an office which he sustained with credit for twenty-three years. Mr. Conder died on the 27th December, 1855.

CONYBEARE, THE VERY REV. WM. DANIEL, dean of Llandaff, was born June 7, 1787. His father was rector of Bishopgate. The late dean was educated at Westminster, and afterwards at Christ Church, where, in 1808, he took a first class in classics, and a second in mathematics. At Christ Church, Conybeare was the associate of the late Sir Robert Peel, and is said to have been somewhat acquainted with the opinions of that eminent statesman, whom he used always to describe as a

whig at heart. From Christ Church he proceeded to Oxford, and shortly after taking his degree there, he entered upon the study of that science with which his name is inseparably associated. It was in 1814 his first communication was made to the 'Transactions of the Geological Society,' of which body he was, if not the founder, at least one of the earliest members. In the study of the new science, he was associated with Buckland and Phillips. His first paper in the 'Geological Transactions' is a tract on the origin of a remarkable class of organic impressions occurring in the nodules of flint, in the course of which he establishes that these substances are not, as was supposed, fossil corals, but produced by the infiltration of siliceous matter into shells, the calcareous matrix of which has perished. Mr. Conybeare completed his geological labours by the publication, in conjunction with Mr. Phillips, of the 'Outlines of the Geology of England and Wales.' The work was regarded as a marvel of compilation, and has often been referred to as one of the most useful manuals on the subject ever published. Mr. Conybeare was for many years rector of Sully, in Glamorganshire. In 1831 he was elected vicar of Bristol College. During that and the two following years he delivered a series of lectures at the College, which were afterwards published, accompanied by an inaugural address on the Application of Classical and Scientific Education to Theology. Originality of thought, and charm of style, gave these lectures an unusual popularity. In 1836, Mr. Conybeare became vicar of Axminster, Devon. In 1839 he was appointed Bampton lecturer to the University of Oxford. In 1847, at the instance of Dr. Coplestone, then bishop, he was instituted to the deanery of Llandaff, resigning Axminster in favour of his eldest son. Here the last eleven years of his life were passed in the prosecution of his favourite studies, and in the zealous discharge of his professional duties. The loss of a son, the Rev. W. J. Conybeare, who promised to transcend in the world of letters, even the father's fame, is understood to have hastened the death of the venerable Dean of Llandaff, which took place on the 12th August, 1857, at Itchen Stoke, near Portsmouth.

COOK, W. B., an engraver, 1778-1855.

COOPER, BRANSBY, a distinguished English surgeon, nephew of Sir Astley Cooper, born in 1792, and at an early age entered the naval service, but being obliged to relinquish it from weak health, he embraced the medical profession. In 1812 he entered the royal artillery as surgeon, and gained great experience in the Peninsular war. He afterwards settled in London, was appointed demonstrator of anatomy at St. Thomas's Hospital, and published many valuable papers. He died in 1853.

COPELAND, FANNY. See FITZWILLIAM.

COPELAND, THOMAS, a writer on surgery and other medical subjects, 1781-1855.

CORRY, ARMAR LOWRY, rear-admiral of the White, was born in 1793, and entered the naval service in 1805, under Capt. Sir H. Popham. He received his first commission, April 12, 1812, and sailed with Napier as second in command of the *Baltic* fleet, 1854. Died at Paris, May 1, 1855.

CORVINUS, JOHN. See HUNNIADES.

COTTENHAM, CHARLES CHRISTOPHER PEPPYS, earl of, formerly lord chancellor, was born

in 1781, and called to the bar in 1804. In July, 1831, he was returned to parliament through the interest of Earl Fitzwilliam; in 1834 became master of the rolls, and in 1835 was appointed, in conjunction with others, a commissioner of the great seal. In 1836, this high responsibility devolved on himself alone. He continued in office till 1841; resuming it again while the whigs held the reins of government, from 1846 to 1850. Died 1851.

COTTLE, JOSEPH, one of the earliest and most faithful friends of Coleridge, 1769-1853.

CRICHTON, REV. ANDREW, a Scottish divine, many years editor of the *Edinburgh Advertiser*, author and translator of many valuable contributions to history and biography. Died 1855.

CROKER, THOMAS CROFTON, whose name is identified with the fairy legends and traditions of the Celtic race, was the son of Major Croker, of the 38th regiment of foot, and was born at the house of his maternal grandfather, in Cork, 1798. He was a descendant of an old Devonshire family, some of whom had settled in the south of Ireland in the times of Elizabeth and Cromwell; and, notwithstanding his high connections, was educated for a mercantile life. He passed much time in the south of Ireland in the period 1812 to 1815, collecting the legends and songs of the peasantry; at the same time employing occasionally his talent for sketching; yet his first work, 'Researches in the South of Ireland,' did not appear till 1824. In the spring of the following year, he became renowned by the publication of his 'Fairy Legends,' to which he was indebted for the acquaintance of Sir Walter Scott, who met him with several other celebrities of the day at a breakfast party, at Mr. Lockhart's, in Pall Mall. The occasion is interesting, as it forms the subject of a notice in Sir Walter Scott's journal, who characterizes Mr. Croker as 'the author of the Irish Fairy Tales, little as a dwarf, keen-eyed as a hawk, and of easy, prepossessing manners, something like Tom Moore.' Other interesting particulars concerning this interview will be found in the 'Gentleman's Magazine,' vol. xlii., p. 452. It may be added, that the best published likeness of him is said to be in Maclise's 'Snap Apple Night.' It would exceed our limits to specify all the legendary and other amusing or learned works we owe to the subject of our notice; but we may briefly mention his contributions to the annuals, 'Daniel O'Rourke,' and 'Legends of the Lakes,' in which he was aided by the MSS. of Mr. Lynch. In 1832, he essayed his hand as a novelist, but was more himself in 1839, as editor of 'The Popular Songs of Ireland.' This year also he took part in the formation of the Camden Society, and, in 1840, was still more active in founding the Percy Society, both of which were benefited by his antiquarian knowledge and literary talents as editor. Died at his house in Brompton, after a short illness, August 8, 1854. [E.R.]

CROLL, FRANCIS, an engraver of Edinburgh, who was rapidly rising to eminence when he died, at the early age of twenty-seven, 1854.

CUDDY, LIEUT.-COLONEL, a gallant officer, killed while leading his men up to the Redan fort, September 8, 1855.

CUITT, GEORGE, an artist distinguished for his

etchings, author of 'Wanderings and Pencilling amongst the Ruins of Olden Times,' 1779-1854.

CURTIUS, QUINTUS. See QUINTUS.

D

DACRE, BARBARINA BRAND, Dowager Baroness Dacre, chiefly celebrated for her dramatic writings, was born in 1757. Her father was the brave Admiral Sir Chaloner Ogle. Her works began to appear in 1821, and include translation from Petrarch. In 1831, she edited 'Recollection of a Chaperon,' and in 1835, 'Tales of the Peasantry,' both written by her daughter Mrs. Sullivan, the author of 'Ellen Wareham' Died 1854.

D'AGUILAR, SIR GEORGE, lieutenant-general in the British army, memorable for his services in the Chinese war, 1785-1855.

DARTMOUTH, WILLIAM, fourth earl of, distinguished as a liberal promoter of popular institutions; born 1784, succeeded to the peerage on the death of his father 1810; died 1854.

DAVID, M. D'ANGERS, the well known French sculptor, died at Paris at the age of sixty-five Jan., 1856. He was a pupil, and nephew by marriage, of David the painter, and was an ardent republican, as shown by the long list of great names who did honour to his funeral.

DAVIES, GRIFFITH, F.R.S., a distinguished actuary, born at Caernarvon 1788, died in London 1855.

DAVY, LADY JANE, daughter of Charles Ker, Esq., of Antigua, and widow of the celebrated Sir H. Davy, remarkable for her accomplishments and conversational powers, died 1855.

DAWNAY, THE RIGHT HONOURABLE WILLIAM HENDRY, seventh Viscount Down, born 15th May, 1812, died 26th January, 1857.

DE BIELKE, RODOLPH, an eminent Danish diplomatist, was the successor of Count Reventlow as charge d'affaires in this country, and is remarkable for his services during the Schleswig-Holstein agitation, and the troubles of 1848. After leaving England, he became Danish minister at the court of Berlin, and from thence had retired to Italy to recruit his health, where he was seized with cholera, and was so greatly reduced that he died at Padua, July 26, 1855.

DE LA BECHE, SIR HENRY THOMAS, a distinguished geologist, at whose instance the Museum of Practical Geology was instituted, 1796-1855.

DEMAINBRAY, THE REV. S. G. F. T., one of the chief promoters of the allotment system, author of a pamphlet entitled, 'The Poor Man's Best Friend,' 1759-1854.

DENISON, EDWARD, late bishop of Salisbury, was born in London, 1801, and at the time of his appointment to the bishopric, March, 1837, held a small college living at Oxford. He was in favour of reviving the synodical powers of the church and was remarkable for his sincerity and clearness of judgment. He is the author of several works chiefly in practical religion. Died March 6, 1855.

DENMAN, THOMAS, Lord, born in London 1779, was the son of a physician distinguished by the patronage of the court, and grandson of

country apothecary. His first teachers were Mr. and Mrs. Barbauld, then keeping school in Norfolk; his education was continued at Cambridge. In 1806, he was called to the bar; and in 1818, took his seat in parliament as member for Wareham; in 1820, for Nottingham. The same year, having boldly ranged himself with Brougham and the other advocates of popular rights, he was also appointed solicitor-general to Queen Caroline, the advocacy of whose cause left him proportionately out of favour with the court. In 1828, his star began to rise under favour of Lord Lyndhurst; and, at the period of the reform bill, his brilliant qualities, no longer under eclipse, carried him to office. At the close of that struggle, therefore, we find him, November 8, 1832, appointed successor of Lord Tenterden as lord chief justice of the King's Bench; soon after which he was made a privy councillor, and eventually, in 1834, raised to the peerage. Lord Denman performed the functions of the high office to which he had been called with rare devotion to his duties and independence of character till March, 1850, when he retired on the ground of ill health. He died at Stoke Albany in Northamptonshire, aged seventy-six, September 22, 1854. [E.R.]

DENNISTOUN, JAMES, an historical writer and amateur of art, was born in Dumbartonshire in 1803; died in February, 1855. He was distinguished by his acquaintance with the literature and history of Scotland, and contributed some interesting papers to the reviews. His 'Memoirs of the Dukes of Urbino,' is a well known and admired work; since which we have from his pen one of the most interesting biographies that has appeared for many years, in the 'Life of Sir Robert Strange,' the eminent engraver, and of his brother-in-law, Andrew Lumisden, secretary to the Stuart princes. Sir Robert Strange was the grandfather, on her mother's side, of Mrs. Dennistoun.

DEPPING, G. B., a Fr. antiquarian, 1784-1854.

DILLWYN, L. W., a Welch magistrate and naturalist, characterized as the father of English botany, author of several important works, 1778-1855.

DOBSON, A. R., a young architect of much promise, son of a gentleman of the same name, long known at Newcastle-on-Tyne, perished in the fire at Gateshead, aged twenty-six, 1854.

DOD, CHARLES ROGER, whose name is familiar to the public as the founder of the 'Parliamentary Companion and the Peerage,' was born in his father's vicarage of Drumlean in 1793. He was educated for the bar, but abandoned his legal studies for journalism, and was for many years a writer in the *Times*. Died 1855.

DONATO, NICHOLAS, doge of Venice, succeeded John Bembo, 1618, and died the month following. He was succeeded by Antonio Priuli.

DONE, JOSHUA, a pianist and composer of music, chiefly of songs, died in poverty, occasioned by his irregular habits, aged about sixty, 1848.

DOVASTON, J. F. M., an essayist and poet, author of 'British Melodies,' and other poems, and of a life of Bewick, the naturalist, with whom he was intimately acquainted, 1782-1854.

DUCIE, EARL, a distinguished English agriculturist and free-trader, 1802-1853.

DU PLAT, GEORGE GUSTAVUS CHARLES

WILLIAM, brigadier-general in the British army, died at Vienna, where he had proceeded, after the commencement of the late war, as military commissioner, December 21, 1854. General Du Plat had been nearly forty years in the service, and was recently consul-general at Warsaw. His son, Capt. Du Plat, is an equerry to Prince Albert.

DUPONT. See PONTE, PONTIUS.

DUPONT, (DE L'EURE,) JACQUES CHARLES, chief of the provisional government of France in 1848, was born at Neubourg, in the department of Eux, 1767. He became mayor of his native place in 1792, and continued to fill numerous offices in the magistracy till the revolution of 1830, when he became minister of justice. The reaction under Louis Philippe soon deprived him of this position, and he then identified himself with the opposition in the chamber of representatives. He was proposed to the people by Lamartine, and hailed with universal applause as head of the government after the revolution of February; died 1855.

DUPUY. See PUY, PUTTEN.

E

EGERTON, FRANCIS, the first earl of Ellesmere, of Ellesmere, county Salop, and Viscount Brackley, of Brackley, Northamptonshire, was born on the first day of January, 1800. He was the second son of George Granville, marquis of Stafford, who was afterwards created duke of Sutherland. His grandfather, the preceding marquis of Stafford, had married the daughter, and eventually co-heir, of Scroope, the first duke of Bridgewater, to whose estates the late earl succeeded on the death of his father, assuming then the sole name of Egerton, in place of his patronymic of Leveson Gower. The Ellesmere peerage was a revival, having been first conferred on Thomas Egerton, lord chancellor of England in the reign of James I. The chancellor was created baron Ellesmere and viscount Brackley, but died before the promised earldom was conferred, which James granted to his son under the title of earl of Bridgewater. In the works of Bacon, as well as in the historical annals of the time, the name of lord Ellesmere frequently appears; and a still more interesting literary association is, that his appointment to the presidency of Wales and the Marches was the occasion of Milton writing his masque of *Comus*. The fourth earl of Bridgewater was created duke in 1720, the ducal title becoming extinct in 1803, though the earldom remained till 1828 in another branch of the family. The princely property of the Bridgewater peerage, including the magnificent collection of pictures, was devised by the last duke to his nephew the duke of Sutherland, with remainder to his second son, the deceased earl of Ellesmere.—From Eton, where he received his early education, Lord Francis Leveson Gower went up to Christ Church, Oxford, where he took the B.A. degree in 1821. In 1822 he was returned to parliament, and became a devoted supporter of the policy of Canning. When the London university was projected he became one of its most zealous promoters, despite the outcry about its hostility to the church and to

Oxford and Cambridge. In 1820, as Lord Francis Egerton, he was chief secretary for Ireland; under the duke of Wellington, in 1830, he was secretary at war. On the formation of Peel's government in 1841, he declined a seat in the cabinet. On the bill for the repeal of the corn laws being introduced he moved the address in reply to the royal speech. From 1829 to 1834, he sat for the county of Sutherland, and from 1834 to 1846, for South Lancashire, which he represented at the time of his elevation to the peerage. From an early period Lord Ellesmere cultivated literary tastes, and published several works both in prose and poetry. His lordship's name will, however, be more widely known in connection with art than literature. To the splendid collection of pictures he inherited he made numerous important additions, and the Bridgewater Gallery, said to be worth more than a quarter of a million, is the finest private collection in Great Britain. The late earl was a fellow of several of the learned societies, was vice-president of the Literary Fund; was one of the royal commissioners of the Exhibition of 1851, and a trustee of the British Museum. Few noblemen have better discharged the duties of their order. He died in 1857.

ELCHINGEN, DUC D', the younger son of Marshal Ney, and the inheritor of his father's title, died at Gallipoli, on his way to take a command in the East, July 14, 1854.

ELDON, JOHN SCOTT, second earl of, grandson of the illustrious chancellor of that name, member for Truro from 1829 to 1831, died in 1854, having nearly two years before become of unsound mind.

ELLIOT, SIR HENRY MILES, foreign secretary to the government of India, author of a 'Bibliographical Index to the Historians of Mahomedan India, and a Glossary,' 1809-1854.

ELTON, SIR CHARLES ABRAHAM, a classical scholar and poet, died 1853.

ESCOTT, BICKHAM, a political speaker and magistrate, member for Winchester, 1802-1855.

ESTCOURT, MAJOR-GENERAL JAMES BUCKNALL, born 1802, died of cholera in the camp before Sebastopol, June 23, 1855. This gallant officer was appointed on the staff of Lord Raglan, and shared the glories of the principal actions in the Crimea; previously, in 1835, he had accompanied the expedition to the Euphrates.

EVANS, ARTHUR BENONI, late head master of Market Bosworth school, distinguished as a profound classical scholar and author, was born in Berkshire, 1781; died at Market Bosworth, Leicestershire, November, 1855. Dr. Evans was at once a linguist, naturalist, numismatist, musician, mechanic, anatomist, artist, and divine; and with all these talents he had a large share of those better qualities which gained for him the love and confidence of his parishioners. He belonged to the high church and conservative party.

EWING, JAMES, lord provost of Glasgow, returned member of parliament for that city at the general election in 1832; distinguished for the munificent aid he afforded to various philanthropic movements; 1776-1854.

EZZELIN. See ROMANO.

F

FABER, GEORGE STANLEY, the celebrated writer on prophecy, was the eldest son of the Rev. Thomas Faber, and was born in 1774. In 1800 he became the vicar of Stockton-upon-Tees, but exchanged this living for that of Long Newton in 1811. The latter he retained till 1832, when he was appointed master of Sherburn's Hospital, near Durham. Here he died, aged eighty, January 2, 1855. His chief work, which has gone through five editions, is entitled 'Dissertations on the Prophecies that have been Fulfilled, are now Fulfilling, or will hereafter be Fulfilled, relative to the great period of 1260 years; the Papal and Mohammedan Apostacies; the Tyrannical Reign of Antichrist, or the Infidel Power; and the Restoration of the Jews.'

FAUCHER, LEON, a French journalist who rose into notice after the revolution of July 1848, devoting his pen to the doctrines of free trade and political economy, died at Marseilles, Dec. 1, 1854. M. Faucher became home minister under the presidency of Louis Napoleon, and was removed from office previous to the *coup d'état* of Dec. 2.

FAUCIT, JOHN SAVILLE, stage manager and author of several plays, father of the celebrated Miss Helen Faucit; died 1854. The most popular of his productions are 'The Miller's Maid,' and 'Wapping Old Stairs.'

FAULKNER, THOMAS, an industrious writer on topographical and antiquarian subjects, formerly a bookseller of Chelsea, 1776-1855.

FELLOWES, SIR THOMAS, a distinguished British naval officer, 1778-1853.

FERDINAND, duke of Genoa, younger brother of Victor Emmanuel, king of Sardinia, born 1820, married to Mary Elizabeth, daughter of the present king of Savoy, 1850; died 1855.

FERRIER, SUSAN, died at Edinburgh, on the 5th of November, 1854, at an advanced age. Mr. Ferrier's novels were three: 'Marriage' (1818), 'The Inheritance' (1824); and 'Destiny; or, The Chief's Daughter' (1831). These works, of which the first was especially popular, had their chief excellence in the vigorous faithfulness and deep humour with which they portrayed characters and scenes of common and real life. The authoress 'Marriage,' greeted by the author of 'Waverley' as 'a sister shadow,' maintained a dignified and lady-like privacy, on which it would be unseemly to intrude. It may be enough to say, that her father was one of Sir Walter Scott's official colleagues, a principal clerk of the court of session in Scotland; and that, through one of her brothers she was connected by affinity with the family of Professor Wilson. [W.S.]

FIELD, GEORGE, memorable for his successful application of chemistry to the arts; author of 'Chromatics,' 'Outlines of Analogical Philosophy' and other works; 1777-1854.

FIELDING, COPLEY VANDYKE, late president of the Old Society of Painters in Water Colour, remarkable for the beauty of his marine subjects and landscapes, 1787-1854.

FITZCLARENCE, LIEUT.-GENERAL LORD FREDERICK, son of the duke of Clarence and Mrs. Jordan, grand master of the Scottish free-

nasons, and a devoted officer of the Indian army, 1799-1854.

FITZWILLIAM, FANNY ELIZABETH, late of the Haymarket theatre, was born in 1803; died at Putney, of cholera, September, 1854. Mrs. Fitzwilliam made her first appearance in public in 1814, as Miss Fanny Copeland, and was particularly successful at the Surrey theatre as Effie Deans in the 'Heart of Midlothian.' She married Mr. Fitzwilliam, an actor of Irish characters, in 1822. Her most popular performances were at the Adelphi, especially with Mr. John Reeves in the 'Wreck Ashore.' Being an admirable mimic she often performed more than one character in the same piece.

FONTAINE, L., a Fr. architect, 1760-1854.

FONTAINE, LOUIS, a French architect, and member of the Academy of Fine Arts, 1764-1854.

FORBES, EDWARD, F.R.S., born in the Isle of Man in 1815, died in Edinburgh. November, 1854.

The taste for Natural History which characterized Professor Forbes, and ultimately raised him to the rank of one of the first and most philosophic naturalists of the present day, showed itself in early life. He was educated at the University of Edinburgh, where he was a pupil of the late Professors Jameson and Graham, and studied the kindred sciences of Zoology, Geology, and Botany, with marked success. At the early age of eighteen he visited Norway on a Natural History excursion, and made many observations on its native productions and glaciers. In 1841 he was appointed naturalist to H.M.S. *Beacon* on the surveying expedition to the Mediterranean, and made a tolerably extensive tour through Asia Minor. During this expedition he carried on an important series of dredging operations, which gave rise to his brilliant theories on the nature and distribution of submarine life in reference to geological changes. In 1843 he was elected Professor of Botany in King's College, London, as successor to George Don. He became secretary and curator to the Geological Society, and in 1845 was elected a Fellow of the Royal Society. On the establishment of the Government School of Mines in connection with the Ordnance Geological Survey under the direction of Sir Henry de la Bèche, Professor Forbes became Palæontologist to that institution; and when the new museum was opened in Jermyn street, he was appointed Professor of Natural History there. In this situation he remained for some time, giving lectures to crowded audiences; and at the same time worked hard in various parts of the country in connection with the Geological Survey. On the death of Professor Jameson of Edinburgh, in the year 1854, Forbes was immediately elected his successor, and entered on the duties of the chair of Natural History in the University of Edinburgh at the commencement of the summer session. Here he was pre-eminently popular, and bade fair to raise his own reputation, as well as that of the University of Edinburgh, to a high pitch; but, alas! a disease, the seeds of which had been sown in his constitution some years previously, cut him off, after a very short but severe illness, and after he had filled the chair only a few months. Forbes's works are very numerous, but chiefly consist of detached memoirs in many of the leading scientific journals of the day. His first published separate

work was the '*Malacologia Monensis*,' a description of the shells of the Isle of Man. His next was the very pleasingly written '*History of the British Star-fishes*;' then came his '*Travels in Lycia*,' in company with Lieut. Spratt; the '*Natural History of the British Mollusca*,' in conjunction with Mr. Sylvanus Hanley; and the '*Natural History of the British naked-eye Medusæ*,' published by the Ray Society. He died, much lamented, at the early age of thirty-nine years. [W.B.]

FORESTER, FANNY. See JUDSON.

FORREST, ROBERT, a self-taught Scottish sculptor, died 1853.

FOURDRINIER, HENRY, celebrated for his improvements in the means of manufacturing paper, was born in London 1766. He patented his machine for the manufacture of paper between the years 1800 and 1807, and after various vicissitudes of fortune, his claims were acknowledged by the house of parliament in 1840. Died 1855.

FRANKLIN, SIR JOHN, the lamented arctic voyager, was the son of W. Franklin, Esq., of Moor's Enderly in Lincolnshire, and was born in that county, 1786. He entered the navy in 1800, and served in the action of Trafalgar, and the expedition against New Orleans. At three different periods, previous to his last fatal enterprise, he penetrated the arctic ocean; the first in 1818, the second extending from 1819 to 1822, the third from 1823 to 1827. After his return from the latter in 1828, he married the present Lady Franklin, then Miss Griffin, whose touching appeals and untiring efforts to procure his rescue, have given her a distinguished place in the catalogue of devoted wives. It was on the 19th of May, 1845, that the ships *Erebus* and *Terror* sailed from the Thames, with official instructions which directed Sir John Franklin to proceed through Lancaster Sound and Barrow's Straits, to Cape Walker, and to use every effort to penetrate from that point to Behring's Straits; at the same time, in case of circumstances rendering this course impossible, he had full liberty to try any other passage. The voyage as far as Baffin's Bay was prosperous; and the ships were last seen, with all well on board, moored to an iceberg in the middle of that bay, and about 200 miles from the entrance of Lancaster Sound: this was on the 26th of July of the same year. Ever since, their fate has been shrouded in darkness; for notwithstanding the discoveries that have been made and the tales that have been related by the Esquimaux, there is nothing better than surmise in regard to the manner in which they perished,—for this much it would be folly any longer to doubt. We may add, that Sir John Franklin's expedition was provisioned for three years, but, with careful management, it is possible he may have made them last four. [E.R.]

FREDERICK AUGUSTUS, king of Saxony, born 1797, succeeded his uncle 1836, having six years previously been appointed co-regent of the kingdom. He was killed by an accident which overturned his carriage in Aug., 1854, and was succeeded by his brother John.

FULCHER, GEORGE WILLIAMS, a tradesman and magistrate of Sudbury, known as a poet and occasional writer, 1799-1855.

FULLERTON, JOHN, a Scottish lawyer, and one of the lords of the court of session, 1775-1854.

FULTON, JOHN, a native of Ayrshire, remarkable for his self-acquired superiority in the acquisition of languages and the construction of mathematical instruments; died 1854.

G

GABRIAS. See **BABRIAS.**

GAISFORD, THOMAS, dean of Christ Church, distinguished for his profound and varied erudition; editor of many classical works, 1779-1855.

GARDINER, WILLIAM, a writer on music and connoisseur in the fine arts; author of 'Music and Friends,' and a work of travels, entitled 'Sights in Italy,' 1764-1854.

GAVIN, HECTOR, a physician and sanitary reformer, author of many valuable works, died from an accidental shot at Balaklava, April 20, 1855. His most remarkable labours were in connection with the inquiries into the causes of disease in Newcastle and other towns of the north, during the late visitation of cholera.

GAY. See **GIRARDIN.**

GENNADIUS. See **SCHOLARIUS.**

GERVILLE, CHARLES ALEXIS ADRIAN DUBOISIER, Mons. De, a distinguished archaeologist and antiquarian, author of numerous works, including a memoir of his own life; 1769-1853.

GIFFARD, HENRY WELLS, commander of H.M. ship *Tiger*, son of admiral John Giffard, died at Odessa from wounds received in defending his ship, June 1, 1854. Captain Giffard entered the navy in 1824, and was appointed to the rank of commander in February, 1838. In 1840 he accompanied the expedition against China, and was present at the capture of Chusan, at the blockade of Ningpo, and at Amoy; his ship was the *Cruiser*, 16. In 1846, he commanded the *Penelope* steam frigate, bearing the broad pendant of Sir Charles Hotham, on the coast of Africa. The accident by which his vessel was stranded in the neighbourhood of Odessa, is too recent to require particular notice. Every effort that could be made to get the ship off proved unavailing, and in a few hours, the Russians having brought their field guns to bear, opened a murderous fire from the cliffs, which compelled the *Tiger* to strike her flag. The crew having surrendered, became prisoners at Odessa, where it appears they were treated most kindly. Captain Giffard survived nineteen days, and was buried with military honours, Gen. Osten-Sacken attending the funeral. [E.R.]

GIFFARD, JOHN, a veteran admiral, whose son, Captain Giffard, is the subject of the foregoing notice, died in Southampton, aged ninety, Sept. 25, 1855. Admiral Giffard was a whig in politics, and was for many years the leader of that party in Southampton.

GILBERT, J. F., a landscape painter, 1791-1855.

GILLKREST, JAMES, a veteran medical officer and professional writer attached to the army; d. 1854.

GILLMAN, JOSEPH, a native of Little Over, near Derby, born 1759, died in the ninety-sixth year of his age, June, 1855. This veteran was one of the foremost mutineers at the Nore, and is said to have dictated the last and effective message to

Mr. Pitt. He served under Rodney, Hood, and Nelson, and was one of the forlorn hope in the storming of Seringapatam.

GILLY, WILLIAM STEPHEN, a dignitary of the Church of England, author of several popular works, especially concerning the Vaudois Christians; born in Essex, 1789, died in his vicarage, Norham, 1855.

GIRARDIN, MADAME DE, formerly Mdll Delphine Gay, celebrated among the literati of France for her poems and other popular works, was born about 1803. She was remarkable for her beauty when very young, and received a special prize from the Academy, and a pension from the crown, for her first poems in 1822. In 1831 she was married to the celebrated Emile de Girardin, and after that period frequently wrote for the *Presse*. Died 1855.

GIRY. See **SAINT-CYR.**

GODWIN, MAJOR-GENERAL, an Indian officer, commander of the Bengal division of the army, the recent Burmese war, 1785-1854.

GOLDIE, THOMAS LEIGH, brigadier-general in the army of the Crimea, killed at the battle of Inkermann, in the same struggle in which General Sir George Cathcart fell, November 5, 1855.

GOSSET, MONTAGUE, a distinguished surgeon of London, author of several valuable papers on surgical literature, 1792-1854.

GOULBURN, HENRY, late member for the university of Cambridge, and a statesman of the Peel party, was born in 1784. He graduated M.A. in 1808, a year after his return as member for Horsham, and first took office as home secretary in 1810, under the duke of Portland. From 1810 to 1818 he sat for the borough of St. Germans, not disfranchised, and in the latter year was returned for West-Looe. In 1821 he became Irish secretary and a privy councillor, an office which he vacated in 1828 for that of chancellor of the exchequer under the duke of Wellington, retiring with the rest of the cabinet in 1830, when Lord Grey became premier. In the interval from 1826 to 1834 Mr. Goulburn had sat for Armagh, but in the general election of the last-mentioned year he was returned for Cambridge, and retained his seat to his death. In 1834 he became home secretary under the administration of Sir Robert Peel, and in Sept. 1841 chancellor of the exchequer, since which he lived almost retired from the arena of political agitation; 1789-1856.

GREENOUGH, GEORGE BELLAS, an eminent geologist, born 1777, died at Nice 1854, aged seventy-seven. Mr. Greenough inherited an ample fortune, and sat for some time in parliament. He soon, however, forsook the tangled maze of politics and devoted his time to scientific pursuits. Geology and geography were his favourite studies, and along with several other kindred spirits, he established the Geological Society of London. Of this he was the first president, and filled the chair several times on subsequent occasions. He also held the office for two years of president of the Geographical Society, and at his death bequeathed his extensive collection of maps to be divided between these two societies. He was a fellow of the Linnean and Royal Societies, and is the author of 'A Critical Examination of the First Principles of Geology,' which has been translated into German, 'A Geol.

logical Map of England and Wales, with an accompanying Memoir, which has gone through two editions, and 'A General Sketch of the Physical Features of British India.' During his long life Mr. Greenough employed his time, his money, and his talents, in actively promoting geological knowledge, and at his death left a sum of £500 to be spent in the arrangement and preservation of the maps, which we have already mentioned he had bequeathed to the Geological and Geographical Societies. [W.B.]

GRESWELL, WILLIAM PARR, incumbent of Denton, Manchester, author of several learned works, 1765-1854.

GUNNING, HENRY, a distinguished official of Cambridge university, author of 'Reminiscences of the University, Town, and County of Cambridge from 1789;' 1768-1854.

H

HALL, JAMES, a writer on art, 1797-1854.

HARDING, GEORGE PERFECT, an artist in water colours, famous for his accurate copies of historical subjects, died 1854.

HARE, CHARLES JULIUS, was born on the 13th September, 1795. He gave very early indications of being a sprightly and intelligent boy, and, like many other persons of distinction, he was much indebted for his mental training and refinement of character to the influence of his mother, daughter of Dr. Shipley, bishop of St. Asaph, as well as of his aunt, the widow of the famous Sir William Jones. At a suitable age he was entered a pupil at the Charterhouse; and among the schoolboys contemporary with him at that classical institution, were several who rose to literary eminence in after life, such as Waddington, dean of Durham, and Grote and Thirlwall, the learned historians of Greece. Having completed the usual curriculum of the Charterhouse, Hare was removed to Cambridge in 1812, and his scholarly acquirements having become well known during a lengthened residence at that university, he was elected a fellow of Trinity College in October, 1818, and four years after was appointed assistant tutor of the college. In that prominent situation he had continued ten years, when the family living of Hurstmonceux, in Sussex, becoming vacant by the death of his uncle, he was, by the urgent recommendation of friends, prevailed on to accept that rectory. His tastes were wholly academic, and it was not without a severe struggle that he brought his mind to exchange the congenial studies and society of Cambridge for the laborious duties and retired life of a country clergyman. Previous to entering on the administration of his parish, however, he made arrangements for enjoying a year's absence on the continent. Foreign scenes were not new to Hare, for he had spent several years of his youth in Germany; and it was during his residence in that country that he imbibed that profound admiration for the character and services of Luther, as well as acquired that strong predilection for German philosophy and literature which have stamped his writings with one of their most striking characteristics. Directing his travels now towards the south of

Europe, he passed rapidly through France and even Switzerland, in his impatient desire to feast his eye with a sight of the classic scenes of Italy. Greece and Rome were the grand centres around which his associated ideas revolved, and in gratifying his taste with a minute survey of localities which his imagination had invested with so much interest, he passed months which glided with unnoticed rapidity away. In the spring of 1834 he set out on his homeward journey, and forthwith took up his abode in the rectory of Hurstmonceux, which, during his incumbency, displayed the appearance of a splendid mansion-house—being adorned with many rare works of the Italian masters, which, being a passionate admirer of art, he had, at great cost, collected abroad, as well as enriched with a valuable library of 12,000 volumes, a great proportion of which were in the German language. His domestic felicity was consummated by his marriage with an amiable and accomplished lady, sister of his former pupil and friend, Dr. Frederick Maurice. As a parish clergyman, Hare cannot be described as active or zealous in his work. He was, indeed, kind to the poor, when they waited on him. He was, moreover, a powerful and eloquent preacher to people of cultivated minds or philosophic taste; but his sermons were of so refined a strain, so occupied with the discussion of public questions, and protracted to so great a length, as to be altogether unsuitable for the edification of a rustic audience. In his additional office of archdeacon of Lewes, to which he was presented in 1840, he was more in his proper sphere, as appeared from the great interest which his charges to his clergy uniformly produced. It is, however, as an author in the general walks of literature that his name is most widely known. Few, indeed, there are, if any, among his contemporaries, who equalled him in the variety, extent, and accuracy of his knowledge,—in his thorough acquaintance with every form of opinion that prevailed both in this country and on the continent;—above all, with the researches and speculations of the great German writers in philosophy, theology, history, and general literature. His earliest appearances before the world as an author were in his translation of the German romances and tales of Fouqué and Tieck. And it was he who, in conjunction with Thirlwall, bishop of St. David's, had the merit of introducing the English public to an acquaintance with the important labours of Niebuhr in the field of ancient Roman history. But it was particularly in the department of theology that his familiar and minute acquaintance with German speculation was manifested; and it will not be disputed that no person in the present day exercised a greater influence than Archdeacon Hare in stimulating the ardour with which the works of the great German critics are now read and studied in Britain. Among his original works, we may particularize his 'Parish Sermons,' 'The Mission of the Comforter,' 'Guesses at Truth,' which was the joint production of his brother Augustus and himself, 'The Victory of Faith,' 'Vindication of Luther,' 'Biography of John Sterling,' 'The Psalms in English Verse,' papers in the 'Philological Museum,' and many other periodicals. Archdeacon Hare was a man of independent thought, and was noted for several eccentricities

ties, one of which was his adoption, on principle, of a strange, but, as he thought, right etymology of the English. Thus, for instance, he wrote *preucht* for preached, and *publisht* for published; and while Thirlwall and Whewell, who both adopted the same peculiarity, afterwards returned to the ordinary practice, Hare, with characteristic firmness to what he conceived the truth, adhered to this singular mode of spelling, in all matters, grave or gay, common or sacred. He was taken suddenly ill in the autumn of 1854, so that it was with difficulty he delivered his last charge to his assembled clergy, and on his return home he continued for a few months in a lingering state, till he expired on the 20th January, 1855, giving to his family a cheering sign of his hope, when he had lost the power of utterance, by pointing with his finger upwards. [R.J.]

HAY, LIEUT.-GEN. JAMES, a British officer, distinguished in the Peninsula and at Waterloo, entered the army as cornet, 1795; died 1854.

HEAD, SIR GEORGE, elder brother of Sir Francis Bond Head, many years an active commissariat officer; author of several popular works, comprehending his personal memoirs and travels, and an account of the manufacturing districts of the United Kingdom; 1782-1855.

HENDERSON, LIEUT.-GENERAL, a gallant British officer, commander of the guards at Waterloo; died 1854.

HERBERT, ALGERNON, a barrister-at-law, remarkable as the author of several extraordinary works on abstruse subjects, scriptural, historical, and philosophical; died aged sixty-three, June, 1855.

HEREDIA, DIEGO DE, a Spanish patriot, chief justice of Madrid in the reign of Philip II.

HERRIES, HON. JOHN CHARLES, a member of parliament and statesman, was the eldest son of a London merchant. He was born in 1778, and became a junior clerk in the treasury, 1798. His next appointment was that of private secretary, first to Mr. Vansittart, and afterwards to Lord Bexley, secretary of the treasury. In 1811 he was appointed, successively, comptroller of army accounts and commissary-in-chief; closing his merely official career in 1821 as auditor of the civil list. In 1822 he became secretary to the treasury and member for Harwich, which he continued to represent till 1841. In 1827 he took office under Lord Goderich as chancellor of the exchequer, but soon afterwards resigned, in consequence of a quarrel concerning the appointment of Lord Althorpe, as chairman of the finance committee. His resignation, it is said, was the chief cause of the failure of that administration, but the truth is, the cabinet of Lord Goderich was never firmly cemented, and so many opposite elements existed in it, that its dissolution was almost certain from the beginning. From 1828 to 1830 under the duke of Wellington, Mr. Herries was master of the mint and president of the board of trade. In 1835, during the brief period that Sir Robert Peel held office, he was secretary at war. In 1841, as stated above, he ceased to represent his old constituents, and took no part in political affairs till 1847, when he was elected member for Stamford. In the meanwhile, the principle of free trade had been established by the complete success of the anti-corn law league; and Mr. Herries, as

a conservative, found no place in the administration till the formation of Lord Derby's cabinet in 1852, when he became president of the India board. He retired from public life in the spring of 1853. Died at his seat, near Seven Oaks, April 24, 1855. [E.R.]

HERSEE, WILLIAM, a miscellaneous writer, many years editor of the *Warwick Advertiser*, 1786-1854.

HINKS, REV. THOMAS DEE, LL.D., professor of Hebrew and Oriental languages in the Royal Belfast Academy, was born in 1787, and died on the 24th February, 1857, at the advanced age of ninety. Dr. Hinks was peculiarly distinguished for his scholarship, and for the attention he paid to agricultural improvement. He commenced the Munster *Farmers' Magazine*, a work which did much to raise the standard of farming in the south of Ireland. In 1821 he was elected head master of the classical school in the Royal Belfast Academy, and in the succeeding year was appointed professor of Hebrew and Oriental languages, an appointment which he held with great credit until his death. Dr. Hinks is the father of the distinguished Orientalist of that name.

HOARE, SIR HUGH RICHARD, born 1784, died 10th January, 1857.

HOBHOUSE, RIGHT HON. HENRY, keeper of state papers, and one of the ecclesiastical commissioners for England, was born in 1776, and called to the bar in 1801. From 1817 to 1827, he held the office of under secretary of state for the home department, and was appointed keeper of her Majesty's state papers after the discovery of Milton's long lost theological work among the unarranged documents in 1825. Died 1854.

HODGSON, FRANCIS, provost of Eton, a distinguished classical scholar, 1781-1853.

HOLLINS, JOHN, a portrait painter, 1798-1855.

HOLMES, JOHN, assistant-keeper of the manuscripts in the British Museum, and an author on several occasions, was born in 1800, and brought up as a bookseller. We are indebted to his pen for a new edition of 'Cavendish's Life of Cardinal Wolsey,' published 1852; died April, 1854.

HOOD, FRANCIS GROSVENOR, colonel in the 3d battalion of grenadier guards, born 1810, killed in the trenches before Sebastopol, October 18, 1855. He was a grandson of admiral the first Viscount Hood, and was remarkable for his gallantry. After the battle of the Alma he received the special thanks of the commander-in-chief and the duke of Cambridge for the manner in which he brought his regiment into action.

HOPE, WILLIAM WILLIAMS, an eccentric character, who devoted his enormous wealth to gratify his taste for articles of vertu, and to the refinements of music, literature, and art; died in Paris, 1854. His collections have since been sold.

HUME, JOSEPH, was the son of a master mariner trading from Montrose, where he was born in 1777. Left fatherless at an early age, he was indebted to his mother for the training which enabled him, on all occasions, to rise superior to the difficulties by which he was surrounded. The smallness of her resources, as the mistress of a little shop in Montrose, did not prevent Mrs. Hume aspiring to a better position for her son, and she apprenticed him to a surgeon-apothecary

I

his native town. In 1796, he became a member of the College of Surgeons at Edinburgh; and having obtained a professional appointment in the service of the East India Company, he left England at the commencement of the Mahratta war. On the voyage out, he performed the duties of purser, in addition to his own as assistant-surgeon; in India he mastered the native languages, and acted as interpreter of Persian to the army; being at the same time postmaster, paymaster, and commissariat officer. These multifarious occupations enabled him to return to England, in 1808, with a well-earned fortune of from £30,000 to £40,000. He then travelled a year or two in Europe and the East; and, in 1812, bought a seat in parliament, which he lost almost immediately by a dissolution. At this period of his life he became an active member of the central committee of the Lancastrian school system, and was most anxious to obtain a place in the directory of the East India Company, in which, however, he did not succeed.

In 1818, he was sent to parliament as representative of the Aberdeen district of burghs, which included his native Montrose, and he continued to represent the same constituency till 1830, when he was returned for Middlesex in conjunction with Mr. Byng. In 1837, he was defeated by Colonel Hood; but was returned for Kilkenny, by the aid of O'Connell's influence, in the same month. In the conservative house of 1841 he found no place; at the following year he was returned by his old constituents of Montrose, in whose service he died. It is almost needless to characterize Mr. Hunt, whose political character and public services are as well known as the British constitution itself. Nothing could overcome his almost dogged perseverance in the course he had marked out for himself—we ought rather to say, his inflexible principles and amazing industry as a member of the House of Commons. The blue books and parliamentary papers of the last quarter of a century may be regarded as a lasting monument to his unremitting application to business, of his persistency in the cause of reform, and of his stories over innumerable abuses. From these stores of almost repulsive literature must hereafter be extracted the true story of his achievements, and the legends of the sinecurists and drones that his enchant arm has delivered us from. Died at his seat, Burnley Hall, in Norfolk, February 20, 1855. [E.R.]

HUNT, FREDERICK KNIGHT, late editor of the *Daily News*, was born in 1814, and was early grown upon his own resources as an employé in the office of the *Morning Herald*. By the most extraordinary exertions he supported his mother and her five children, left unprovided for by the death of his father, and yet contrived, by a course of reading and self-culture, to prepare himself for a professional career. He studied medicine as well as literature; to which circumstance we owe one of his projects, 'The Medical Times,' having become well known as a journalist, he was selected by Mr. Dickens as one of the assistant editors for the *Daily News* in 1846, and became editor in chief, 1851. Died in November, 1854. Mr. Hunt is author of 'The Fourth Estate: a history of the English Newspaper Press.'

INGLIS, SIR ROBERT HARRY, whose name will long be remembered as a zealous churchman, and supporter of the charitable institutions of his country, was the son of the first baronet, who was for many years chairman of the East India Company. He began life as a member of the bar, but declining the law, took his seat in the House of Commons as member for Dundalk in 1824. At the close of 1826 he became member for Ripon, and from 1828 to 1853 sat for the university of Oxford. Died in the seventieth year of his age, May 5, 1855.

INSOM, —, a distinguished sculptor, settled many years past at Florence, died, 1855.

J

JAMES, EDWARD, a dignitary of the Church of England, well known for his classical attainments, 1790-1854.

JAMESON, ROBERT, a distinguished mineralogist and geologist, born at Leith 1773, died in Edinburgh 1854, in his eighty-first year. Educated for the medical profession, his attention seems to have been early directed to the study of natural history. At the commencement of his studies, the celebrated Werner was causing the sciences of mineralogy and geology to assume much greater importance than they had ever done before. Young Jameson placed himself under his guidance, became a pupil at Freyburg, where Werner had established his school, and embraced with great ardour the particular doctrines which he taught. In 1804, upon Dr. Walker's death, Mr. Jameson was elected his successor as Regius Professor of Natural History, Lecturer on Mineralogy, and Keeper of the Museum in the University of Edinburgh. The prevailing tendency of Jameson's mind was of a practical nature, and the duties attending his appointment to this chair were fulfilled with great zeal and activity for a long series of years. He rendered the study of natural history, and particularly mineralogy and geology, more popular in Edinburgh than they had ever been before, and the museum attached to the chair was immensely increased by his exertions and judicious outlay of money. At his death, the collection of minerals and rocks amounted to 40,000 specimens; the fossils to 10,000; while of crania and skeletons there were no fewer than 800. Other kingdoms of nature were in like manner represented, and he had in addition collected together numerous drawings, casts, models, maps, and instruments for surveying. Professor Jameson's works are chiefly his valuable work on 'Mineralogy,' his 'Translation of Cuvier's Theory of the Earth,' and numerous papers contributed to the 'Wernerian Society's Transactions.' He was for many years editor of one of the first natural history and scientific periodicals of the day, the 'Edinburgh Journal,' and he was a fellow of almost all the learned societies of Europe, and several in America. [W.B.]

JAY, WILLIAM, an eminent dissenting minister, was born in humble circumstances at Tisbury

in Wiltshire, 1769. He began preaching when a mere youth, and was only sixteen when he was admitted into the pulpit at the Surrey Chapel. In 1791, he was settled as the minister of Argyle Chapel in Bath, where he died in his eighty-fifth year, Dec. 25, 1854. He is the author of many volumes of sermons, his last being 'Lectures on Female Scripture Characters,' published since his death, but delivered nearly half a century ago.

JERROLD, DOUGLAS, was born on the 3d January, 1803, whether in London or Sheerness is doubtful. His father, Samuel Jerrold, was manager of the theatres of Sheerness and Southend. Among the theatrical folks who played on his father's stage was Edmund Kean, who carried him on the boards in *Rolla*, and with whom he also appeared as 'The Stranger's Child.' Like most young men bred up amidst the associations of the sea, Jerrold's thoughts, in reference to a profession, early took a nautical turn. From this predilection his father in vain sought to dissuade him, but finding remonstrance useless, he procured for him a midshipman's commission in a man-of-war commanded by Captain Austen, brother of the great novelist. Jerrold's health physically unfitted him for the naval profession. Retiring from the sea, at his own solicitation, he was apprenticed to a letterpress printer in London. After mastering the mechanical duties of a compositor, the *caecœthes scribendi* innate in Jerrold developed itself. An essay on the opera of 'Der Freischütz' was dropped by him into the editor's box of the *Monitor*, on which he was employed. He was made aware of the fate of his anonymous composition, not by a 'notice to a correspondent,' but by having it put into his hands to set up for the next number of the paper. The essay created a sensation, but the author preserved his *incognito*, until earnest inquiry being made, he disclosed the authorship to the editor, who henceforth employed him upon literary work. Jerrold's career as a dramatic author now commenced. When only eighteen years of age, he wrote 'More Frightened than Hurt,' a two act farce, followed soon after by 'The Smoked Miser,' 'The White Milliner,' and numerous other productions. His 'Black-eyed Susan' was produced at the Surrey theatre with the most triumphant success; for hundreds of nights it was performed without interruption; it retrieved the fortunes of Elliston, the manager of the Surrey, then all but desperate, and it gave Mr. T. P. Cooke independence. 'The Mutiny at the Nore' followed this great success; and among the numerous productions of his pen at this period the most noteworthy are 'Nell Gwynne,' 'The Schoolfellow,' and 'The Housekeeper,' the 'Bride of Ludgate;' and transcending all these efforts at length appeared his 'Rent Day,' suggested from Wilkie's celebrated pictures. For this play Wilkie sent Jerrold a handsome letter, accompanied by a couple of proof engravings, with the great painter's autograph. 'The Rent Day' proving nearly as great a success as 'Black-eyed Susan,' Jerrold resolved to take a theatre for himself, and thus reap the full advantage of his labours. In connection with Mr. Hammond he became joint lessee of the Strand theatre, and so long as Jerrold and Hammond kept by the Strand property success crowned their enterprise. Unfortunately, in an evil hour, they ex-

changed the Strand for Drury Lane, which proved as signal a failure as the former had been a success. About this time 'The Heads of the People' was published. In it Jerrold wrote 'The Peopener,' 'The Lawyer,' 'The Pawnbroker,' and other less known papers, all marked by his well known and peculiar powers. When *Punch* was started, Mr. Jerrold was absent from England, but so soon as he returned he became one of its most brilliant contributors. His early contributions to *Punch* were signed 'Q,' and among these appeared that most memorable of them all, 'On the Custody of Blessing Colours for the Army,' which the Society of Friends had reprinted and posted throughout the kingdom. 'Punch's Letters to a Son,' 'The Story of a Feather,' and the 'Cautious Lectures,' will keep green the memory of Jerrold's connection with that amusing and instructive serial. From some cause or other none of Jerrold's separate ventures were very successful. The *Illuminated Magazine*, the *Shilling Magazine*, and his *Weekly Newspaper*, were all of them more or less pecuniary failures. It was in the *Illuminated Magazine* that Clovermook, perhaps the most finished of his works, appeared. Jerrold's *Shilling Magazine* first gave the world the tale 'St. Giles and St. James,' in which, more completely than anywhere else, may be found Jerrold's views of social ethics. When he had ceased connection with his *Weekly Newspaper*, he became editor of *Lloyd's*, which, under his management, attained an enormous circulation. He died Monday, 8th June, 1857, in the full vigour of his powers. To the last all about him had hopes of his speedy recovery, even the doctor shared the delusion: he alone seemed to know that his end was near. When asked how he felt, he replied, 'One that is waiting and waited for.' His dust reposes in Norwood cemetery. His literary friends have presented a testimonial to his widow in the form of an annuity, the proceeds of various performances for her benefit.

JEW, WANDERING. See SAINT-GERMANO JOHN, King of Navarre. See ALBRET.

JOHNSTON, GEORGE, M.D., born 1797; died 1855. Dr. Johnston was a native of Berwickshire in Scotland, studied medicine at the University of Edinburgh, and was a pupil of the celebrated Dr. Abercromby of that town. After taking his degree of medicine, he commenced practice at Belford, Northumberland, but shortly afterwards removed to Berwick-upon-Tweed, where he continued to reside as one of the principal medical men of that town till the day of his death. As a medical man he was very successful in his practice, and procured the love and confidence of his patients; but it was as a naturalist that he will be best known to posterity. Botany being a part of the curriculum of the Edinburgh School of Medicine, and an attendance upon the lectures on that science being imperative upon students, Dr. Johnston was favoured, like many of his contemporaries, to follow the study, and his 'Flora of Berwick-upon-Tweed' is a proof of his earnestness and zeal in prosecuting it. While preparing materials for that work, he was at the same time paying particular attention to the natural history of the marine invertebrate animals inhabiting Berwick Bay; and his numerous papers in 'Jameson's Philosophical Journal'

K

'Loudon's Magazine of Natural History,' and the 'Annals and Magazine of Natural History,' attest the amount of labour he bestowed upon their habits and characters, while the illustrations from the pencil of Mrs. Johnston conferred additional value on the important papers so published. Dr. Johnston's observations upon these comparatively speaking obscure animals were continued for many years, and perhaps no man since the celebrated Colonel Montagu has done so much to advance our knowledge of this neglected field of zoology. His more mature works are his 'History of British Zoophytes,' which has passed through two editions; his 'History of British Sponges and Corallines,' a work long ago out of print; his 'Introduction to Conchology,' which has been translated into German; and the first volume of the 'Natural History of the Eastern Borders,' which for many years of his life formed his chief solace in the midst of the harassing calls of his profession. This volume contains the 'Flora of the district,' and has been characterized as one of the most delightful botanical works which has ever appeared. The 'Fauna' was to have followed, but his death prevented its completion. A 'Monograph of British Annelides,' written as one of the series of catalogues of animals contained in the British Museum, was nearly completed, and we believe is now in the press. Dr. Johnston was one of the editors of the 'Magazine of Zoology and Botany,' afterwards called the 'Annals and Magazine of Natural History,' which he continued to be till his death. He was the founder of the 'Berwickshire Naturalists' Club,' and of the 'Ray Society,' both of which institutions have done good service to natural history; was a fellow of the Royal College of Surgeons of Edinburgh; LL.D. of the Marischal College of Aberdeen; and had been twice elected mayor of the town of Berwick, to the interests of which he devoted much attention. [W.B.]

JOHNSTON, JAMES F. W., a popular writer on chemistry and some of the allied subjects, was born at Paisley in 1786; and became reader of chemistry and mineralogy in the university of Durham on its foundation in 1833. In 1843, he was elected chemist to the Agricultural Society of Scotland, an appointment which did not interfere with his former office, which he resumed till his death in September, 1855. Professor Johnston had the honour of studying chemistry under Berzelius. The most popular of his works is the well known 'Chemistry of Common Life.'

JONES, RICHARD, a minister of the Church of England, and professor of political economy and history in Haileybury college, memorable for his part in effecting the tithe commutation, 1791-1855.

JOWETT, WILLIAM, a minister of the Church of England, author of several practical works, 1787-1855.

JUDSON, EMILY C., formerly Miss Chubbuck, a graceful American writer, was born in the state of New York about 1814. She was first known to the public about 1843 by her *nomme de plume* of 'Fanny Forester.' A collection of her sketches and poems was published at Boston in 1846; died 1854.

JULIA SABINA. See SABINA.

KAY, JOHN, D.D., bishop of Lincoln, a learned prelate of the Church of England, 1783-1853.

KEMBLE, CHARLES, the last surviving brother of that distinguished family of actors, was born at Brecknock in South Wales, 1775; died, aged seventy-nine, November, 1854. He possessed remarkable powers as a comedian, and acted the subsidiary characters of the drama with surprising effect. His career on the stage closed in the spring of 1840; but he occasionally appeared before the public as a reader of Shakspeare. The celebrated Miss Fanny Kemble, now Mrs. Butler, is his elder daughter.

KEMBLE, JOHN MITCHELL, the eminent Anglo-Saxon scholar and archaeologist, was born 1806. Mr. Kemble was the eldest son of the late famous actor, Charles Kemble, and was educated, during his earlier years, by Dr. Richardson, author of the Dictionary of the English Language. In 1826, Mr. Kemble entered at Trinity College, Cambridge, and there graduated B.A. and M.A. At Cambridge he obtained a prize for English composition, and became eminent as a speaker at the "Union," a literary society, consisting of Tennyson, Charles Buller, Maurice, Sterling, French, and others hardly less distinguished. Soon after Mr. Kemble had taken his degree, he, with a college friend, who now holds a high position in the English Church, and some other Englishmen, were induced by General Torrijos to engage in an enterprise for the deliverance of Spain from the tyranny of Ferdinand, reimposed upon the nation by the Bourbons. The plot was betrayed to the Spanish Government, and Torrijos and his friends were shot. By a lucky accident Mr. Kemble was prevented from landing in Spain, and thus escaped the fate of his comrades. After this adventure, Mr. Kemble made a lengthened residence in Germany, where he contracted an intimate friendship with the celebrated Jacob Grimm, and was regarded by that eminent philologist as one of the most promising of his disciples. On his return from Germany, Mr. Kemble was appointed editor of the *British and Foreign Review*, established by the late Mr. Kentworth Beaumont, chiefly for the purpose of directing public attention to the aggressive policy of Russia. Whilst engaged in the editorship of the *Review*, which, in his hands, was ably conducted, Mr. Kemble produced his 'Saxons in England,' a work which at once established his reputation as a historian. This work was founded, in a great measure, on his *Codex Diplomaticus Alti Saxonici*, a collection of documents relating to the Saxon period, which he had amassed from various sources with infinite labour. A great archaeological work, the *Horæ Ferales*, for which he found materials amongst the ancient sepulchres of Germany and England, was left by Mr. Kemble in such a state, that a portion of it at least can be published. Mr. Kemble died suddenly, in the full maturity and vigour of his powers, in Dublin, on the 26th Feb., 1857.

KITTO, JOHN, D.D., was a native of Plymouth, and, in his own opinion, of Phœnician descent; for 'the Greek word *Κίτιο*,' says he, 'is that which

Dioscorides uses for the name of a species of cassia. And this again is called in Hebrew *kiddah*, which, as well as the Greek, probably represents the Phœnician name of this aromatic. Now, the Phœnicians had much intercourse for tin with the remote part of Cornwall, from which my grandfather brought his family; and the probability is, that it was at least a Phœnician name, if it does not imply a Phœnician origin for those who bear it.' Kitto's father was a master-builder, who, notwithstanding he possessed the greatest advantages for insuring success in the world, yet neglected his business—and in consequence of the unfortunate habits into which he fell, was reduced to the necessity of becoming a jobbing mason, and plunged himself and family in deep distress. Among other consequences of this domestic poverty, the education of young Kitto was neglected; for both through the inability of his parents to bear the expenses of his schooling, and the necessity for assisting his father's labours, he was removed from the care of a teacher at an age when he was but an indifferent scholar even in the common branches of learning. When he was twelve years of age, an accident happened, the consequences of which were felt through the whole of his future life. He was engaged assisting his father in new slating the roof of a house, and having ascended to the top of the ladder with a pile of slates on his head, he was in the act of stepping on to the roof, when suddenly losing his presence of mind, he fell from a height of thirty-five feet into the paved court below. For a fortnight he lay in a state of insensibility; and when at length he awoke to consciousness, it was to become aware of the dreadful fact, that he was hopelessly deaf. Various experiments were tried to restore to him the use of his hearing, but although the tympanum of his ear was not destroyed, all means proved ineffectual for the recovery of the lost sense. In other respects he continued long in a state of the greatest nervous debility, and even after his recovery, it was found that he was totally unfit for resuming the manual labours of his former trade. Happily a strong literary taste, which, during his protracted confinement, was not created so much as it was more fully developed, led him to resort to books, first for pleasure, and afterwards for usefulness, till the idea gradually sprung up that it might be turned to account as a means of support, since he had become incapacitated for a more active employment. His reading was chiefly, though not exclusively, directed to sacred literature; and after two extensive tours which he was enabled successively to make through Russia, and Northern Europe, and especially in Persia and the countries of Western Asia, where his intelligent mind was struck and deeply interested with the observance among living people of manners and customs analogous to those described in the Holy Scriptures, he returned, resolved to use the literary materials he had amassed for the illustration of the sacred volume. The fruit of his observations and researches appeared first in the issue of the *Pictorial Bible*: and the success of this publication, though anonymous, was so encouraging, and his fame as a commentator so fully established, that he found no difficulty in procuring employment from the booksellers in other undertakings of a similar

kind. A great number of small compilations, such as 'The Pictorial History of Palestine,' 'The Court of Persia,' &c., came from his indefatigable pen; for being disqualified by his deafness from mingling in society, and depending for support of himself and family entirely on the produce of his literary labours, he wrought with extraordinary industry—seldom less than fourteen hours in a day. Dr Kitto did not confine himself to these smaller works: zealous in the diffusion of all kinds of knowledge that bore on the illustration of the Word of God, he projected other undertakings of a higher character and importance, both for learning and philosophical discussion, than had been previously attempted in this country, and which the respect entertained by biblical scholars for his editorial qualifications enabled him, with the assistance of several able coadjutors, successfully to execute. 'The Cyclopædia of Biblical Literature,' and 'The Journal of Sacred Literature,' which have contributed so much to extend the range of theological study among British divines, owe their existence to his skill and persevering industry. But the most widely popular of his works was, the 'Daily Illustrations of the Bible,' being original readings for a year on subjects from Sacred History, Biography, Geography, Antiquities, and Theology, especially designed for the family circle. This work is only a compilation, for the materials are gleaned from all quarters; but they are arranged with great skill—the style is distinguished by a beautiful simplicity—and the subjects treated in such a manner as tends greatly to promote among common people the intelligent reading of the Scriptures. As a theological writer, in the peculiar department of illustration he chose, Dr. Kitto's distinguishing characteristics were patient research—a sound judgment—a strict and faithful adherence to truth, even in the most minute and trifling particulars; so that he makes his readers feel they may place implicit confidence in the accuracy of his statements. Though never in orders, he was, on account of his rare attainments in theology, honoured with the degree of doctor in divinity; and he was further rewarded by an annual pension of £100 from her Majesty. Worn out by his incessant labours, and perhaps the internal mechanism of the head having been permanently injured by the dreadful accident that occasioned his deafness, he was, for a considerable time, subject to a painful neuralgic affection, and obliged, by medical advice, to relinquish all literary exertion for the space of two years. For the benefit of the waters, he removed with his family to Cannstadt, in Germany, and had not been long established there when he died in the spring of 1855. [R.J.]

KLITZ, PHILIP, an English organist and composer, author of several famous compositions, 'Tales of the New Forest,' &c., 1805-1854.

KRASINSKI, COUNT VALERIAN, a Polish diplomatist and historical writer, one of the most distinguished of the exiles in this country, died at Edinburgh, Dec. 22, 1855.

L

LAMBERT, MARK, distinguished for his excellence as an ornamental engraver, and once the assistant of Thomas Bewick, by whom the art of wood engraving was restored, 1781-1855.

LAMENNAIS, ABBE DE, the celebrated republican writer, formerly a priest of the Church of Rome, died Feb. 27, 1854.

LANDMANN, GEORGE T., lieutenant-colonel in the royal engineers, died in his seventy-fourth year, Aug. 1854. Colonel Landmann saw a good deal of service, and was actively engaged in engineering works during the great war, dating from 1795 to 1812. His memoirs, recently published, are interesting for their store of anecdote and much curious matter of history.

LANDSBOROUGH, DAVID, minister of the Free Church in Saltcoats, and an associate of the Linnæan Society, author of valuable scientific memoirs, 1781-1854.

LANE, HUNTER, an English physician and distinguished professional writer, 1802-1853.

LANGTON, MISS JANE, chiefly remarkable as the god-daughter of Johnson, mentioned in 'Boswell's Life' as the subject of a well known letter written by him, 1775-1851.

LARDNER, LEOPOLD JAMES, remarkable as a linguist and bibliographer, late one of the assistants in the printed book department of the British Museum, 1815-1855.

LA RIVIERE. See **BAILLIE, ROCHE**.

LARKIN, NATHANIEL JOHN, well known in London a few years ago as a maker of geometrical solids, and teacher of crystallography, died in the seventy-fourth year of his age, October, 1855, in the neighbourhood of Hornsey. Besides one or two elementary treatises, he published, in 1820, 'An Introduction to Solid Geometry, and to the study of Crystallography.' The object of this work was to demonstrate some of the curious properties belonging to the Platonic bodies, and their relations one to another, independent of the sphere.

LAWRENCE, ABBOT, late ambassador to England from the United States, was born in 1793, and educated as a merchant. He had long been known as a public character and member of Congress, when, in 1843, he was appointed one of the commissioners for the settlement of the north-eastern boundary. In 1849, he accepted the post of minister at the court of London, and was well known for his public spirit and efficient services till 1852, when he returned home. The Hon. Abbot Lawrence died at Boston, Aug. 18, 1855, and is said to have bequeathed large sums to charitable and other public purposes.

LELIUS. See **LÆLIUS**.

LETELLIER. See **TELLIER**.

LICHFIELD, THOMAS WILLIAM ANSON, earl of, postmaster-general from 1835 to 1841, in which period the uniform rate of a penny inland postage was brought into operation, was born in 1795, and succeeded his father in the peerage, 1818. The assembly of O'Connell and other Irish members at his house in St. James's square, during the premiership of Lord Melbourne, gave a designation to the 'Lichfield House Compact,' died 1854.

LINDLEY, ROBERT, a distinguished violinist, died, aged eighty-three, June 30, 1855.

LISTON, MRS., formerly Miss Tyrer, and widow of the celebrated John Liston, a successful actress of comic parts, 1780-1854.

LOCKHART, JOHN GIBSON, was the son of one of the city ministers of Glasgow, who belonged to a landed family in Lanarkshire. He was born at Cambusnethan (of which parish his father was then pastor) in 1794. Presented, by the senatus of the University of Glasgow, as a distinguished student, to one of the Snell exhibitions at Oxford, he entered at Balliol College in 1819; in 1813 he took honours as a first-class man in *literis humanioribus*; and he graduated as LL.B. in 1817. A little before this last date he had gone to study in Germany, the literature of which country he soon contributed to make known among us. He became a member of the Scottish bar, but can hardly be said to have made any serious attempt to practise the profession. Literature soon became his constant business. From an early period in the history of 'Blackwood's Magazine,' founded in 1817, he was one of its ablest and most active contributors. It was never doubted but he was the writer of some of the severest and most sarcastic of the papers, by which, in its palmy days, that energetic but unscrupulous periodical infused so much of gratuitous bitterness, both into politics and into literature; and, though Lockhart's reputation as an unsparing satirist may have brought on him the imputation of having been the author of attacks really perpetrated by others, yet there were several circumstances, and among others the unfortunate affair ending in the death of John Scott, which indicated that he considered himself as bearing a large share of the responsibility involved in the management of the magazine. At all events, no one questioned the high talent, scholarship, and accomplishments, which he brought to bear on literature. Much of these, with a strong party spirit, but without the worst of the magazine-features, was exhibited in 1819, in his anonymous work, 'Peter's Letters to his Kinsfolk.' In 1820, he married Sophia, the eldest daughter of Sir Walter Scott. Afterwards he published, or rather collected from the magazine, his very fine and spirited versions of 'Spanish Ballads;' while, from 1824, appeared, successively, his striking novels, 'Valerius,' 'Reginald Dalton,' 'Adam Blair,' and 'Matthew Wald.' His 'Life of Burns,' in 1825, made a volume in 'Constable's Miscellany.' In 1826, a year or two after Gifford had retired from the editorship of the 'Quarterly Review,' Lockhart was very deservedly chosen to be his permanent successor; and London was thenceforth his place of residence. There is not, probably, among competent judges, any dissent from the opinion, that in his hands the 'Quarterly Review' was the most skilfully edited periodical of its day. On the death of his celebrated father-in-law in 1832, there was devolved on him a task which a more chivalrous man might have executed in a more generous spirit, and perhaps, also, with more of real wisdom and discretion. But the task involved difficulties which, probably, no man whatever could have vanquished completely; and, whatever may be its faults, whether of shortcoming or of excess, Lockhart's 'Life of Scott' must long hold its place, as a singularly

though painfully interesting monument in our literary history. In 1843, Lockhart's income, long (it is to be believed) abundant beyond that of most literary men, was increased by some hundreds of pounds, on his appointment, by Sir Robert Peel, to the sinecure office of auditor of the Duchy of Cornwall. In 1853, he was compelled, by ill health, to retire from the management of the Review. He sought renovation of strength by a visit to Italy, but in vain; and he died, on the 25th of November, 1854, at Abbotsford, which by that time had become the residence of his son-in-law. His wife had long predeceased him; so had his elder son, the boy to whom the 'Tales of a Grandfather' were dedicated; a younger son had followed in early manhood; and Sir Walter Scott's family is now represented by Lockhart's daughter, Mrs. Hope Scott. [W.S.]

LONDONDERRY, CHARLES WILLIAM, third marquis of, a gallant Peninsular officer, author of a 'Narrative of the War' in which he served; distinguished for his public spirit on several occasions, and especially for his friendly interference in behalf of Abd-el-Kader; born 1778, envoy at Berlin 1813, succeeded his brother in the peerage 1822, died 1854. We are indebted to his pen for a valuable contribution to English history in the correspondence of his brother.

LOW, RIGHT REV. DAVID, a Scottish prelate, remarkable for his acquaintance with the traditions of the last two centuries, the most valuable of which were embodied by Mr. Chambers in his 'Histories of the Rebellion'; died in his eighty-eighth year, 1855.

LUCAS, FREDERICK, a Roman Catholic polemical writer, elected in 1852 member for Meath, died in his forty-third year, Oct., 1855.

LYONS, EDMUND MURRAY, commander in the royal navy, son of vice-admiral Sir Edmund Lyons, was born in 1819. Died of a wound received in the attack on Sebastopol, June 23, 1855. The operations of Captain Lyons in the sea of Azoff are fresh in every one's memory; and he was equally successful in the expedition of the previous year to the White Sea. One of his officers writes: 'The navy has lost its greatest ornament; and we have lost one who, to us, was more than a friend; he was so brave, so great, so good, and so amiable, that we all loved him much more than we knew.' His body was interred at Therapia, the greatest honour being shown to his memory by the officers who attended, and the crowds of people who flocked to his funeral. [E.R.]

M

MACDONALD, WILLIAM RUSSELL, a journalist and miscellaneous writer, late editor of *Bell's Life in London*, and author of many pleasing productions for the young; 1787-1854.

MACKAY, CHARLES, an eminent Scotch actor, was born in Edinburgh, October, 1787. When only nine years of age, he left Dunedin for Glasgow, but finally returned to his native city about the close of the year 1818. It was in the spring of 1819 that 'Rob Roy' was first produced in Edinburgh. Mr. Mackay, who had already made a

reputation in Aberdeen, now joined Mr. Murray's company; and, as Bailie Nicol Jarvie, earned the highest laurels. 'One would think,' said Sir Walter Scott, 'the part made for him, and him for the part. He is completely the personage of the drama—the purse-proud, consequential magistrate, humane and irritable in the same moment; and the true Scotsman in every turn of thought and action.' So complete was Mr. Mackay's identification with the character, that he became known among his acquaintance by the familiar cognomen of the 'Bailie.' As a delineator of Scottish character as developed in the several dramas founded on our great romancist's novels, Mackay stood unequalled and unapproached. With his retirement, a certain set of characters disappeared from the stage, as completely as the true Lady Macbeth died with Mrs. Siddons. The Bailie was, no doubt, his masterpiece; but who ever played Peter Peebles, Dumbiedykes, Meg Dods, Jock Howieson, and the rest, as he played them? His humour was intensely Scottish, dry, shrewd, rich, and pawky, yet independent, reserved, genial. His accent and pronunciation were perfect. His Scotch was not a vulgar, coarse, broad Scotch but an easy, unaffected, natural dialect, spoken as a native language, not as an imitated *patois*. In his acting he never overstepped the modesty of nature; content to be appreciated by those who knew and enjoyed true dramatic talent, without prostituting his humour to draw the laughter of the vulgar. Mr. Mackay continued a hardworking and respected member of the Edinburgh theatre till 1841, when he ceased to belong to the regular company, after twenty-two years' honourable and successful service. In 1848, he resolved upon retiring from the stage. Mr. Wilson, the distinguished vocalist, made an offer of his services on the occasion, and in the name of the dramatic company, presented the veteran performer with an elegant cup. On some few occasions after this, did the Bailie revisit the scene of his former triumphs. Mr. Mackay died at Edinburgh, on the 2d November, 1857, in his seventy-first year. His departure snaps another of the now rapidly lessening links that bound the present generation to the generation of Scott and his contemporaries.

MACKENZIE, THOMAS, a Scottish architect, especially distinguished for his restorations of the old baronial castles of his country; died in the prime of life, 1854.

MACKESON, COLONEL, an officer in the East India Company's service, distinguished as a diplomatist; assassinated at Peshawur in 1853.

MADDOX, WILLES, a painter of portrait and history; born 1813, died at Constantinople, 1854.

MAI, ANGELO, Cardinal, a distinguished classical scholar, memorable for his discoveries of lost portions of the classics, late chief librarian of the Vatican, was born in the diocese of Bergamo, 1782. His remarkable discoveries date from 1814, when he was keeper of the Ambrosian Library at Milan, and an historical account of them written by Mr. Archdeacon Nares, was communicated to the Royal Society of Literature in 1824. A collected edition was published in ten quarto volumes, in the years 1825 to 1838. Cardinal Mai died at Albano in his seventy-third year, Sept., 1854.

MANBY, CAPTAIN GEORGE WILLIAM, the inventor of several kinds of apparatus for saving ves in case of shipwreck, died at Southtown, near Great Yarmouth, in the ninetieth year of his age, November, 1854. He was the son of an officer in the army, and in 1803 was appointed wreck-master at Yarmouth. The wreck of the pipe gun-brig, of which he was an eye-witness, causing a great loss of life, was one of the causes that set his inventive faculties at work in devising means of affording aid to the sufferers by similar disasters. In this endeavour he was assisted by grants from the government, and lived to be recognized as the benefactor, not of his own country only, but of all Europe. He had the happy consciousness of having saved upwards of 600 lives by his various inventions.

MANCHESTER, GEORGE MONTAGUE, sixth duke of, memorable as a leader of the English protestant party, and for his learned and thoughtful works upon the Scriptures; 1799-1855.

MANIN, DANIEL, the distinguished Italian patriot, was born in 1804. When only in his seventeenth year, he was received as a doctor of law at the university of Padua. Being unable to practise as an advocate before the age of twenty-four, he devoted the seven intervening years to the study of jurisprudence, and to a translation of the Roman law. Manin married early; and in one of the most retired quarters of his native city, passed his early manhood among his family, his books, and friends. It was in this humble retreat that he became future president of the Venetian republic famed of the emancipation of his country. Manin was the opposite of all we associate with the stock-notion of an Italian revolutionist—grave, sober, moderate, a lover of law, and a zealous supporter of order. He was never mixed up with any of the secret societies. A legislator by profession, it was his aim to combat Austria with legal weapons. He seized upon the weaknesses of the imperial government, and made a handle of the laws which Austria herself had nominally granted without permitting them to be actually put in force. For Venice and Lombardy he asked a separate government, a revision of codes, an annual budget, freedom of worship, and freedom of the press. The revolution of 1848 found Manin in prison; and liberated by a decision of the tribunal, he was immediately placed at the head of affairs, and made dictator of the republic, proclaimed only a month afterwards. That Venice stood a year's siege against the power of Austria, was mainly due to the genius of Manin. After the capitulation of Venice, in 1849, Manin retired to France, where he lived a quiet life, still full of hope for the future. Health had, however, long been failing him, and the death of his wife and daughter hastened the hour that released this high-souled patriot from the tumult and unrest of earth. He was buried at Montmartre. His funeral was public; the French government, this time, abstaining from any interference.

MANNERS, LORD CHARLES, a Peninsular officer and member of parliament, 1780-1855.

MARIA, queen of Portugal, daughter of Pedro, the late emperor of Brazil, was born at Rio de Janeiro, 1819, and left her native country for Europe in 1828. Her succession to the crown

was disputed by her uncle, Don Miguel, who declared himself king of Portugal, and contested her claims till the taking of Lisbon in 1834. Her reign was afterwards a stormy and unhappy one, disturbed by civil war and endless political intrigues, the end of which was the triumph of the duke of Saldanha in 1851. Died Nov., 1854.

MARIA ADELAIDE, queen of Sardinia, daughter of the archduke Reigrier of Austria, born 1822; married to her cousin, Victor Emmanuel, 1842, who became king when his father abdicated in 1849; died 1855.

MARIA THERESA, queen dowager of Sardinia, daughter of the archduke Ferdinand of Austria, born 1801; married to Charles Albert, then prince of Savoy-Carignan, 1817; left a widow 1824; died 1855.

MARKHAM, FREDERICK, successor of General Pennefather as commander of the second division in the Crimea, was born in 1805, and first saw actual service in the field during the rebellion in Canada in 1837, when he was severely wounded. As lieutenant-colonel, he served in the Punjab campaign, 1848-1849, and was present at the siege of Mooltan and the battle of Goojerat. He was on his way to take the command at Peshawur, when the exigencies of the Russian war caused his recall, and he made a hasty journey into the Crimea. The previous state of his health led to his recall home after the fall of Sebastopol, and he died in London, Nov. 21, 1855.

MARTIN, JOHN, the celebrated painter of 'Belshazzar's Feast,' was born at Haydon Bridge in Northumberland, July, 1789; died at the house of Thomas Wilson, Esq., Douglas, Isle of Man, 1854. His father, who was a teacher of fencing in Newcastle, apprenticed him to a coach-builder and painter, but the indentures being subsequently cancelled, he finally placed him with an Italian artist, named Muss, who brought him to London to assist in painting on enamel. Here he married at the age of nineteen; and with this spur to exertion he painted, as early as 1812, his first picture, 'Sadak in Search of the Waters of Oblivion,' which was sold for 50 guineas. Between this period and 1814, he produced 'Paradise,' 'The Expulsion,' and 'Clytie.' In 1818 and 1819 he painted 'Joshua' and the 'Fall of Babylon.' In 1820, 'Macbeth,' which he regarded as his most successful landscape; and in 1821, 'Belshazzar's Feast,' for which he received the premium of 200 guineas from the British Institution. His other great works date between this period and 1828; the last of the series being the 'Fall of Nineveh.' We must not omit, however, three remarkable pictures of later date recently exhibited in London, with the faults as well as the beauties of which every one interested in art must be familiar. Art-writers are generally agreed in admitting—that it is impossible to deny—the original genius and imaginative power of Martin. Among painters he well merits the appellation of a Dante or Milton,—the same mystic grandeur and supernatural terror, contrasting with exquisite touches of nature's loveliness, characterizing his productions. His pictures of 'Pandemonium,' the 'Belshazzar,' and others of similar character, are not simply striking—they are almost as startling in their effects as visions, and can never be forgotten by those who have once seen them, or even the

engravings from them, many of which were executed by the artist himself. The illustrations of Milton, for which he received 2,000 guineas, were actually drawn by him on the plates. Martin hitherto has been more popular with the public than with the critics of art, for the simple reason, perhaps, that he followed not their rules, and possessed few points of character with which they could sympathize; his talents, however, were substantially recognized by the government of Belgium, and he was elected a member of their Academy. His genius, perhaps, was essentially inventive and architectonic; in proof of which he submitted to the government, some years ago, a magnificent design for the improvement of the metropolis, including the embankment of the Thames. [E.R.]

MEDWYN, LORD, the title assumed by JOHN HAY FORBES, Esq., as a judge of the court of session, and lord of justiciary, was born in 1776 at Edinburgh. He was called to the Scottish bar in 1799, and appointed judge in 1825. Died in 1854, two years after his retirement from the bench.

MELLONI, MACEDONIO, a celebrated Italian philosopher, who several times received the Rumford gold medal. Born at Parma 1801, died at Portici in 1854.

MERLE, GIBBONS, an English journalist and author, best known as one of the editors of *Galignani's Messenger*; died 1855.

MILL, WILLIAM HODGE, D.D., a dignitary of the Church of England, professor of Hebrew, and a distinguished mathematician and Orientalist, was born in 1791. From 1821 to 1838 he resided in India, as principal of Bishop's College, Calcutta; and contributed towards the evangelization of that country a work in Sanscrit, entitled 'Christa Sangrita.' He succeeded Dr. Lee as regius professor of Hebrew in 1848. Died 1853.

MILLER, HUGH, *Author, Journalist, and Geologist*, born at Cromarty in 1802, was the descendant of a race of sailors, most of whom had made the ocean their tomb, not once during an entire century had a male member of the family been laid in the family burial vault. After many hairbreadth escapes his father ultimately met the common doom of his race, perishing in a storm off the coast of Peterhead while the subject of this brief sketch was yet only some five years of age. On his widowed mother now devolved the chief if not exclusive care and training of Hugh Miller. At the school of Cromarty the boy was no remarkable prodigy, a love of story-telling and a love of adventure were at this period his chief characteristics. Having acquired the usual education received by the peasantry of Scotland in her public schools, to which in his case was added a smattering of Latin, young Miller was sent to earn his bread at the craft of a mason, a profession in which he acquired considerable dexterity and excellence. The calling he had chosen developed the taste and furnished the opportunities of scientific investigation. In 1829, he published a small volume of poetry, but poetry was not his forte,

"Scarce haufins warned wi' minstrel fire,
An' little skilled in lear o' rhyme,"

it was manifest that he would reap but few laurels on Parnassus. His next publication, 'Scenes and Legends of the North of Scotland' at once revealed

his peculiar powers. This work the late Baron Hume, nephew of the historian, a man of consummate taste and soundest judgment, said was written in an English style which he had begun to regard as one of the lost arts. About this time Hugh Miller withdrew from the drudgery of manual labour as a mason, having received an appointment in the Commercial Bank at Cromarty. In this situation he continued until called to Edinburgh to edit the *Witness* newspaper, a journal which the leading members of what was known as the evangelist section of the Church of Scotland were about to establish. The ability displayed by Mr. Miller as editor of the *Witness* is well known. The influence he exerted on ecclesiastical and educational events in Scotland was of no common order. His paper speedily attained a commanding circulation, and it is with some little feeling of pardonable pride, that in his autobiographical memoir the self-educated editor records the fact that the *Witness* was read by a greater proportion of college bachelors than probably any other Scottish journal. It was in 1840 that Hugh Miller's name first began to be known beyond his native land. At a meeting of the British Association for the advancement of Science held that year in Glasgow, Sir Roderick, then Mr. Murchison, ever ready to draw attention to rising merit, gave an account of the striking discoveries recently made by Mr. Miller in the old red sandstone of Scotland. Agassiz, who was present, pointed out the peculiarities and importance of these discoveries, associating the name of the modest journalist with the wonderful fossil now known as the *Pterichthys Milleri*, specimens of which were then under the notice of the section. Dr. Buckland following Agassiz, said he had never been so much astonished in his life by the powers of any man as he had been by the geologic descriptions of Mr. Miller. He described the objects with a felicity which made him ashamed of the comparative meanness and poverty of his own descriptions in the 'Bridgewater Treatise' which had cost him hours and days of labor. The publication of the 'Old Red Sandstone' with the details of the author's discoveries and research, more than justified all the anticipations that had been formed. The 'Old Red Sandstone' was followed, in 1847, by 'First Impressions of England and its People,' the result of a tour made during the previous year, and suggested to him, we believe by his partner as a fitting theme on which might contribute a few interesting papers to the *Witness*. Parts of this work abound in the fine descriptive writing to be found within the compass of the English language. 'Footprints of the Creator,' written in reply to that fascinating and highly popular work 'Vestiges of the Natural History of Creation' still further extended his scientific fame, exhibiting its author as one not merely possessing in a high degree the purely scientific faculty, but as uniting to the most rigid scientific precision that love of theological and metaphysical disquisition which distinguish the mental philosopher and theologian. His latest work, 'The Testimony of the Rocks,' is written in the same spirit and with the same aim as the 'Footprints of the Creator' and has met a most unprecedented circulation. The sad circumstances of his death no doubt contributing to deepen the interest of this his late

labour. For some years previous to his decease, it was apparent that in Mr. Miller the vital forces had been sadly overwrought. The immense literary labours he had undergone had relaxed the muscular energy of his powerful frame, and it was not difficult to detect even by his gait that the editor of the *Witness* had become the prey of those diseases which seem the heritage of the man of genius, just as surely as the gout seems the heritage of the high liver. Having conquered for himself a position, gained a most honourable competency, known as the ablest literary defender of ecclesiastical opinions dear to a large section of Scotchmen, and having earned a European reputation as the most eloquent expositor of the truths of geological science, it might have been anticipated that his sun which had hitherto shone with so lustrous a light, would yet for years to come have culminated in the horizon of human thought. But it was not to be; and in the mysterious dispensations of providence it came to pass that he, whom so many hearts so warmly loved and whose dying eyes so many thousands of his countrymen would have felt honoured to have closed, perished silent and alone. On the evening of the 23d December, though in a state when all literary work should have been forgone, Mr. Miller corrected the last proofs of 'The Testimony of the Rocks.' In the morning, that noble heart which erewhile heaved with such generous emotion, was found torn by bullets and shattered by a revolver. In a paroxysm of insanity he had done the fatal deed. Thus gloomily perished this self-taught genius, the greatest man after Scott and Burns Scotland has produced. A collected edition of Mr. Miller's works is now being published by the Messrs. Constable, which will, we believe, include selections from his contributions, literary, ecclesiastical, and political, to the *Witness* newspaper.

MITFORD, MARY RUSSELL, was born on the 16th of December, 1786, at Alresford in Hampshire. Her father was a physician, a man of good family, and related by the marriage of a niece to the ducal house of Atholl; her mother was the daughter of a clergyman in Hants.—The student of literature might gain an instructive lesson in the art of idealizing, if he were here to institute a double comparison. The materials for it would be furnished, on the one hand, by some of the pictures which Miss Mitford has painted in her prose works; and, on the other, by the originals of the objects as they really existed, or even as they were described by the author when she ventured on disclosing a part of the truth. Dr. Mitford, if we take him even as his daughter is compelled to describe him in her autobiographical memoirs, would offer a striking contrast to the ever wise and amiable father of the half-imaginary groups: a contrast yet more melancholy would be found to separate the rural ease, and plenty, and happiness, depicted and hinted at in 'Our Village,' from the struggles and anxieties, the alternations of prosperity and distress, which made up the real history of the family. Dr. Mitford may have been, and probably was, a pleasant person in companionship; but, even from the facts reluctantly communicated by his daughter, he must be pronounced to have been, in the extreme, thoughtless, extravagant, and selfish. He received a large fortune with his wife; and

he appears to have had, more than once in his life, a good professional practice. Other sums of money likewise came into his hands—the largest item being £20,000, gained in a lottery, by a ticket which, at a time of pressing difficulty, he had insisted on purchasing for his daughter, then a little girl. One supply after another disappeared nearly as fast as it was obtained; the family migrated from place to place, shifting painfully between opulence and poverty; and at length the daughter had to support, first her father, and afterwards herself, by the hard earnings of literary labour. In 1842, when Dr. Mitford died, a subscription was raised by the friends of the family; and soon afterwards Miss Mitford received a pension from the government.—In early life Miss Mitford's literary inclinations leant decidedly towards poetry and the drama. Her first publications were three volumes of poems, 'perpetrated,' to use her own good-humoured phrase, 'in less than two years,' and all published in 1806. Two of them were poetical narratives: 'Blanche, a Spanish Story;' and 'Christina, the Maid of the South Seas.' They were followed, in 1812, by 'Wellington Hall, a Poem,' which described a coursing-match, and showed the predilection for greyhounds with which the readers of her prose works have been made so familiar. Her love for dramatic poetry and acting, nourished in her childhood by a governess, whom she describes pleasingly, and strengthened, as she tells us, by her presence at performances of classical plays in Dr. Valpy's school at Reading, was allowed full scope for some years of her life. If her tragedies have not kept possession of the stage, this is no more than must be said of other poets of our age who are more celebrated. 'Julian' (1823) is really a fine drama for the closet; 'Foscari' (1826) is not much inferior; and 'Rienzi' (1828) was, for a time, very successful in the theatre. 'Charles I.' was refused a chance,—by the silly scruples which were the rule of action for George Colman, the licenser: the oriental opera of 'Sadak and Kalasrade' failed, but perhaps through the music; and several other plays, with fragmentary dramatic scenes, may be read in a collected edition.—Long, however, before the appearance of *Rienzi*, Miss Mitford had, fortunately (in the end) for her own fame, been compelled to step aside into other paths. In her own brave words, 'the pressing necessity of earning money, and the uncertainties and delays of the drama at moments when disappointment or delay weighed upon me like a sin, made it a duty to turn away from the lofty steep of tragic poetry, to the everyday path of Village Stories.' The vein thus happily struck by Miss Mitford, presented itself to her in an extensive and various course of contribution to magazines and annuals. The earliest of her rural sketches were refused admission into the 'New Monthly Magazine,' during Thomas Campbell's nominal editorship. They first appeared, in 1819, in no more distinguished a vehicle than 'The Lady's Magazine.' They formed afterwards the first portion of 'Our Village;' and the series was completed in five volumes in 1832. The town of Reading, near which the author lived for many of the latest years of her life, was the original of another series, 'Belford Regis,' published in 1835. A good many other stories and sketches of the

same sort are scattered through periodicals; and a few have been collected. Miss Mitford's prose pieces are wearisome to many readers, and must be so to all who crave strong excitement. They have, indeed, two sources of weakness: the lingering fondness and endless repetition with which she dilates on inanimate objects and groups; the constancy (an odd feature in a practised writer of tragedies) with which she shuns and keeps back everything that is painful or even deeply pathetic. But her descriptions have both great truth, and, for lovers of nature of a certain kind, lively interest; and over every character and incident she throws a semi-transparent veil of cheerfulness, which irradiates her pages as if with a continual flood of sunshine. It would be a curious thing to know how far she was indebted to reality, for the amiabilities, and generousities, and felicities of her personages; or how far she practised, on any or all of her originals out-of-doors, the process of beautifying which we know her to have applied to her own fireside and its occupants.—In 1852 appeared, in three volumes, Miss Mitford's 'Recollections of a Literary Life; or, Books, Places, and People.' The work contains very few personal details; but it is a remarkably pleasant series of extracts, chiefly poetical, and of light criticism, almost always laudatory, especially of her own friends. Particulars of her life were prefixed by her more fully to the two volumes of her collected dramas in 1854. In the same year, too, were published her last works, 'Atherton, and other Tales.' In her 'Recollections' she had described, with a half-comic pathos, the miseries of an invalid, compelled to quit an old and favourite, but decaying abode. In her new house, Swallowfield Cottage, not far from the former, and, like it, near Reading, she spent her last days, in the cheerful contentment natural to her character, and with all the happiness that could be made for her by many and distinguished friends. She died there on the 10th of January, 1855. [W.S.]

MITZKIEVITCH, ADAM, a Polish poet, formerly professor of the Slavonic language and literature in the college of France. Died at Constantinople, 1855.

MOLE, LOUIS MATHIEU, Count, the celebrated French statesman, was descended from the old noblesse of that country, and was a youth when his father was beheaded in the reign of terror. Inheriting the talent which had rendered his ancestors illustrious, he had therefore to make his way under very different circumstances, and at the age of twenty-five published a work, 'Essai de Morale et de Politique,' which attracted the attention of Napoleon, who appointed him, together with MM. Portalis, jun., and Pasquier, one of his *Maitre des Requêtes*,—by which may be understood the functions of a law officer attached to the Council of State, somewhat resembling those of our masters in the Court of Chancery. In this character he was appointed, together with his colleagues, one of Napoleon's commissioners in the Grand Sanhedrim of the Jews which was convened in Paris in 1806, with the ultimate object, probably, of their restoration to Palestine, but with the preliminary view of inducing them to enter the army. After this M. Molé was made Prefect of Dijon, and while holding this appointment wrote the life of his great

ancestor Mathieu Molé, who was president of the parliament of Paris during the wars of the Fronde: his subsequent honours under the empire were those of *Conseiller d'Etat* and *Director-General des Ponts et Chaussées*, with the title of Count,—supreme judge and minister of justice after the campaign of 1812, and president of the Council of Regency when Napoleon took the field in person again. In this character he remained faithful to the Empress Marie Louise, till released from his duty by the recommendation of Napoleon himself, and was then forced on Louis XVIII., who could not tolerate the renegade nobility, by Talleyrand; nevertheless, he became one of Napoleon's peers during the hundred days, and at the same time resumed his old functions of *Director-General des Ponts et Chaussées*, which he continued to exercise under the second restoration. In this period of his career M. Molé acted with the opposition against Polignac, and was of course a foremost man when Louis Philippe became king, who immediately appointed him foreign minister, and at a later period prime minister. The brilliancy of his reputation was now greatly enhanced by the ability with which he sustained himself against the attacks of MM. Thiers and Guizot; and as this is the most fitting place to speak of his general character, we may describe him concisely in the words of Lamartine—'a man of political temperament, of ability for a crisis, agreeable to the Court, honoured by conservatives, and loved by the superior bourgeoisie; one of those national aristocrats whose character accords with their birth, and whose native superiority wins for them honour and affection even from the most zealous democracy.'—(*Rev.* o. 1848.) Like several other of the chief statesmen of France, he made what effort he could to save the monarchy in 1848, and those failing, he afterwards lived almost retired, saving that he appeared once more as auditor to the Council of State during the Presidency of Louis Napoleon. His last hopes, it is believed, were fixed on the restoration of Henry V. Count Molé died suddenly of apoplexy, Nov. 24, 1855. [E.R.]

MOLESWORTH, SIR WILLIAM, justly characterized as the liberator and regenerator of our colonial empire, was born in London, 1810. He was descended from an ancient family, in whose ranks have been numbered colonial governors, courtiers, and naval officers, the barons of Pencarow, since the time of Elizabeth. Sir William became baronet at the age of thirteen by the death of his father, and was just rising to his majority at the period of the reform agitation, in which cause he made his maiden speech at a county meeting in 1831, having recently returned from his travels on the continent. In 1832, he was returned with Mr. Trelawney as M.P. for the eastern division of Cornwall, and kept his seat till 1837, when his local influence failed to make head against the conservative feeling that prevailed: the same year, however, he was returned for Leeds in conjunction with Mr. Edward Baines. In 1841, foreseeing the defeat of the liberal interest, Sir W. Molesworth declined the contest, and, retiring a while from the bustle of political life, he girded himself, by hard political study, for future action. Southwark, in fine, had the honour of sending him to parliament in 1847,

and the same constituents have twice re-elected him,—first, in 1853, when he became first commissioner of public works; and again, on his recent appointment as secretary of state for the colonies. The laborious zeal in one great cause, the political talents, and the persevering singleness of purpose by which Sir William Molesworth at length attained this eminence, gave high promise of his administrative abilities in office; but he had scarcely time to realize his position when he was surprised by death, October 22, 1855. His early loss will be long and deeply lamented,—and by none so much as our expectant fellow-subjects in the colonies. Order and constructive ability, combined with integrity, independence, and unflinching perseverance in the investigation of difficulties, are rare political qualities, and the less brilliant some of the practical talents may be which go to make up such a character, the more unselfishness we may claim for their exercise. Another kind of tribute is still due to his memory. Sir William Molesworth is only recognized in one-half his character as a politician or statesman: he was also the cultivated philosopher and man of letters. In 1839, he commenced publishing at his own cost, and has since completed, the works of Hobbes, in a beautiful library edition, English and Latin; he has also left in MSS. the materials, far advanced towards completion, for a life of that philosopher. [E.R.]

MONTGOMERY, JAMES, the last survivor but one, and a worthy member, though not among the reatest, of the great company of poets who glorified the first generation of our century, has recently gone to his rest, full of years, and of the honour that belongs to good men.—He was born at Irvine in Ayrshire, on the 4th of November, 1771. His parents, who were of the sect of Moravians, emigrated in his boyhood on a missionary enterprise to the West Indies, where both of them died. Their son was left for education in a seminary of the Brethren at Fulneck, in Yorkshire; and there he spent ten years of his early youth. Much of the plaintive and devotional sweetness which breathes through his poems may be attributed to the influence of the Moravian spirit; but the Moravian rules were far from being directly favourable to the cultivation of those literary and poetical tastes, which were early developed in his mind, and had to be indulged by stealth when yielded to at all. His superiors wisely yielded to his reluctance to the ministry, for which they had designed him; but no better place could be found for him than one behind the counter of a miscellaneous shop. Thence, after a year's servitude, he eloped, his possessions consisting of three shillings and sixpence, and a volume of manuscript poems. Starved out before being able to reach the great mart of letters, he took another place of the same sort as before, writing to his preceding master for a character, and (to the credit of both parties) receiving one, with an invitation to return.

A few months afterwards he found his way to London; and, although he failed to gain a publisher for his poems, he obtained a place for himself as shopman to a bookseller in Paternoster Row. Soon he returned to Yorkshire, and, in 1782, entered the employment of Mr. Gale, of Sheffield, a bookseller, who was also proprietor of a newspaper,

then called the *Sheffield Register*. Montgomery began to write for the newspaper; and when, its politics being too liberal for the age, Gale found it convenient to quit England, his young assistant took the editorship. He re-named the print the *Sheffield Iris*, a name which in more recent times he made so respectable and so respected. In the meantime, however, troubles came over him. Although his writings are believed to have been exceedingly moderate in tone, and are very unlikely, from his character and disposition, to have been otherwise, yet the jealous government of the day prosecuted and punished him twice in the course of twelve months. In January, 1795, for having printed (not written) a song on the fall of the Bastille, he was sentenced to imprisonment for three months, and fined twenty pounds; in January, 1796, his sentence was a fine of thirty pounds, with imprisonment for six months, for having offended, by an account of a riot in the streets, a zealous volunteer officer, who was also a magistrate. These events gave birth to a short series of poems: 'Prison Amusements, written during nine months of imprisonment in the castle of York'.—Montgomery's larger poems soon began to appear: 'The Wanderer in Switzerland,' in 1806; 'The West Indies,' in 1809; and 'The World Before the Flood,' in 1812. A second series of the same class was formed by 'Greenland,' published in 1819; and 'The Pelican Island,' in 1828. A good many of his early essays in the *Iris* are said to have been collected and reprinted; and within the last thirty years have appeared his 'Prose by a Poet,' and 'Lectures on Poetry and Literature.' His prose writings, however, are of small account; nor have his more ambitious works, in verse, vitality or substance enough to float them down the stream of time. His name is preserved, and made dear to the lovers of poetry, inspired at once (a rare union) by genius and by devotion, through his minor poems of a lyrical and reflective kind. Such pieces as 'The Grave,' and 'The Common Lot,' are familiar to every one who loves poetry of a religious cast. His poetical works were collected into four volumes in 1841, and into one volume in 1850; and, in 1853, he published 'Original Hymns, for Public, Private, and Social Devotion.'—His retirement from the editorship of the *Iris* took place in 1840; and the newspaper did not long survive the loss. For the last few years of his life he possessed a government pension. He died at his house in Sheffield, April 30, 1854. [W.S.]

MONTGOMERY, ROBERT, author of the 'Omnipresence of the Deity' and other well known works, died at the beginning of December, 1855. Mr. Montgomery was educated at Oxford, and ordained about the year 1835. He was some time minister of St. Jude's episcopal chapel at Glasgow, but the last years of his life he rented Percy street chapel in the metropolis, where his eloquence in the pulpit and his amiable private character made him highly popular.

MOORE, LIEUT.-COL. WILLOUGHBY, an aged officer memorable for the noble performance of his duty on board the transport ship *Europa*, which was destroyed by fire on the night of May 31, 1854, being then on her voyage to the East, and about 200 miles from Plymouth. He remained on board the burning vessel to the last, making the

best arrangements in his power for removing the men (a detachment of the 6th dragoons), and is stated to have been at length driven into the mizen chains by the violence of the flames and to have there perished.

MOORE, MRS. WILLOUGHBY, lady superintendent of the officers' hospital at Scutari, died at her post of duty, Nov., 1855.

MORGAN, JOHN MINTER, a well-known philanthropist, author of a project for a self-supporting village, was born in 1783. His father was a wholesale stationer in the metropolis, and at his death left Mr. Morgan in possession of an ample fortune. Naturally benevolent, and desirous of active occupation, his attention was arrested by the projects of Robert Owen, on which he published his comments in a pamphlet, 1819. The year following he published his famous little work entitled 'The Revolt of the Bees;' and thenceforth, by poems, lectures, or addresses, seizing with avidity on every opportunity presented by circumstances, he sought to obtain a hearing for his plans. The essential point in which he differed from Mr. Owen was in the recognition of religious principles as the basis of his calculations. In 1842 he petitioned parliament for an inquiry into his project, entitled the 'Church of England Agricultural Self-Supporting Institute;' and, besides addressing large public meetings on the subject, he promulgated his views by the press in his 'Christian Commonwealth.' His plan was received with some favour in Germany, where an opportunity existed for comparing it with the Moravian establishments, and in this country it was viewed with favour by a scattered few of the clergy. Competition was the great evil it proposed to extinguish, and therewith much of the misery that afflicts society; but the difficulty of raising a sufficient capital (£40,000 was the sum proposed), no less than the prejudices of society, and perhaps the formality that characterized Mr. Morgan's plan, ever prevented the establishment of a model institute. The projector sought what consolation he could in the hope of a better future, and published, in 1850, a series of works bearing on the renovation and progress of society, called 'The Phoenix Library,' 13 vols., 12mo; this series included the productions of his own pen, and, of course, 'The Revolt of the Bees.' Mr. Morgan died at his residence in Stratton street, Piccadilly, December 26, 1854, shortly after establishing an institution on Ham Common, called 'The National Orphan House.' [E.R.]

N

NACHIMOFF, ADMIRAL, well known as the commander of the Russian fleet when the Turkish ships were destroyed at Sinope, in Nov., 1853. Killed at Sebastopol, July, 1855.

NAPIER, SIR GEORGE THOMAS, a younger brother of the hero of Scinde, General Sir Charles James Napier, born at Whitehall, 1784, died at Geneva, September, 1855. He was in the chief actions of the Peninsula, and at the siege of Ciudad Rodrigo he lost his right arm. From 1837 to 1844 he served his country as governor of the Cape of Good Hope, since which he passed

most of his time abroad. The offer of his services in the Crimean war was declined.

NEWPORT, GEORGE, a distinguished physiologist and naturalist, born at Canterbury, 1803; died in London, 1854. Mr. Newport is a good example of the benefits arising from the institution of those societies for the cultivation of literature and science, which are now so general throughout the country. Engaged as a youth in a humble business, he luckily had his mind directed to scientific pursuits through the influence of the literary society established in his native town. His taste led him to anatomical and physiological investigations, and was the means of inducing him to study medicine. This profession led him to follow still further these particular branches of study, and to the prosecution of them he ultimately devoted his whole time and attention. His numerous memoirs in the Transactions of the Linnæan and Royal Societies, and in various scientific journals of the day, established his fame as an original and acute observer, procured for him twice the Royal medal of the Royal Society, caused him to be elected President of the Entomological Society, and obtained for him from the Crown a pension of £100 per annum. His last labours were a course of patient investigations and experiments to show the changes undergone in the ovum of the frog during its development; and it was to his zeal in prosecuting these researches that he owed his death. Engaged in obtaining a supply of frogs in the marshes near London, he contracted a fever which cut him off in his fifty-first year. [W.B.]

NICHOLAS, late Emperor of Russia, brother of his predecessor, Alexander, was born in 1796 and died suddenly, of paralysis of the lungs, soon after midnight, between March 1st and 2d, 1855. The career of Nicholas is one of the most remarkable in the annals of royalty, and his character on which would have stood out grandly in other ages. Previous to his accession, the name of the Emperor Nicholas hardly belongs to history, but the first events of his reign stamped his character, and served, perhaps, to decide his policy once for all towards his own subjects. The death of Alexander, Nov. 30, 1825, proved the signal for a wide spread revolt, which menaced the throne and the existing institutions of the country; for at its head were many of the officers who had marched in Germany with the Russian army in 1812, and there became acquainted with the theories of the republican and constitutional government. The conspiracy was general, extending from St. Petersburg to Kief; and, in the capital, the populace were joined by the guards, under pretence of supporting Prince Constantine, who had long before, definitively resigned the crown in favour of his brother. On this occasion the young sovereign displayed the chivalry of his character, and as much by his personal daring as the terrible use he made of his cannon in the streets of Petersburg, awed his rebellious subjects into obedience. His coronation was celebrated with unusual pomp, Sept. 3, 1826, at which time the affairs of Greece occupied the attention of the Western powers, and made manifest the ambition and the secret designs of the Russian government: for the present, however, a settlement was effected by the treaty of London, concluded July 6, 1827, between England, France

and Russia. In the meantime, war had broken out between Russia and Persia, in which, by the victorious arms of Paskievitch the Russian frontier was advanced to the Arras (*Araxes*), as admitted in the articles of peace signed at Turcomanchai, Feb., 1828. Thus another province was added to the Russian empire, besides which, and contrary to stipulation, she retained Talish and Moghan beyond the Arras, as a means of easier entrance into the Persian dominions. On the 4th of the succeeding April, war was formally declared against Turkey, for alleged violations of the treaty of Bucharest concluded sixteen years before, and an army of 115,000 men crossed the Pruth: the sacrifice of life on both sides was very great, but Turkey was the sufferer in her possessions, and was compelled to conclude the treaty of Adrianople, Sept. 14, 1829, which handed over to Russia the Circassian coast of the Black Sea, and was even stigmatized by Lord Aberdeen for its duplicity. The interest of these events to Western Europe was soon, however, absorbed in the greater peril created by the French Revolution of 1830, and the Czar himself was immediately occupied with the last desperate struggle of the Poles, which lasted from Nov., 1830, to Oct. 5, 1831, when the wreck of the patriot army surrendered to Rudiger and Paskievitch. This cruel and decisive conflict had hardly been terminated, when the revolt of the Pasha of Egypt against the Grand Sultan afforded the emperor an excuse for sending an expedition to the Bosphorus; at which opportunity he extorted from the Porte the clandestine treaty of Unkiar Skelessi, dated July 8, 1832, the effect of which was to close the Dardanelles against the fleets of Europe, in a word, to place Constantinople by her own act, at the mercy of the Russian fleet in the Black Sea. This event was followed by political complications of no ordinary difficulty, which, in 1840, had nearly produced a war between England and France, and led to our military operations in Syria, where the further advance of Mehemet Ali was checked by the operations of Sir Robert Stopford and Commodore Napier. The succeeding years, till 1848, were not marked by any event that we need notice in this summary, but the intrigues of the Russian government are supposed by many to have secretly fomented the convulsions of that year, and there is historical evidence, that the Czar, whatever his apparent moderation, was ever watchful of his opportunity to crush the free institutions of the West, or, as he latterly expressed it, to 'put a stop to the materialism of England.' The opportunity for a first advance was created by the peril of the Austrian government, and in July, 1848, the Russian troops were marched into Hungary in support of the house of Hapsburg, where Bem and Dembinski at the head of 20,000 Poles had joined the Magyars: the Hungarians, it is well known, were eventually defeated by the surrender of Georgey to the Russian General Rudiger, on the 11th of August, and the immediate gain of the Czar was the fall of a constitutional government, which had been perilous in close proximity with his dominions. The events of the late war are too familiar to require an extended notice, but it may be mentioned that the quarrel originated, substantially, in the assertion, by Russia, of a right

to the protectorate of the Greek Church throughout the dominions of the Sultan; in support of which, part of the Russian army was ordered towards Moldavia, at the latter end of 1852. Two divisions actually crossed the Pruth at the beginning of July, 1853, the interim having been occupied by the mission of Prince Menschikoff to Constantinople, and the naval demonstrations on the part of England and France in Besika Bay. The subsequent occurrences to the death of Nicholas, are inscribed in the annals of our country in pages which can never be pronounced inglorious, whatever faults of administration, and want of leading ability, may, at the same time, have been brought to light. The sudden death of the Czar, as he stood upright in his pride, serves to mark the character of the man, whose passions could sear his brain at the same moment that he preserved his unrelenting aspect, and moved among his courtiers and subjects with the haughty bearing of a demi-god, or a hero of the ancient world. The time, however, has not yet arrived to estimate his character fairly, and it must be conceded that selfishness of a merely personal nature formed no part of it. His temper and policy were alike imperial, and all his designs tended to the advancement of the glory of his country, and the improvement of his people,—so far, at least, as such designs are compatible with the absolute manner of government. [E.R.]

NICHOLSON, GEORGE, a clergyman and theological writer, died 1819.

NICKLE, MAJOR-GENERAL SIR ROBERT, an old Peninsular officer, late commander of the forces at Melbourne, memorable for his services at Ballarat, 1785-1855.

NIXON, SAMUEL, a sculptor of London, whose principal works are 'The Four Seasons' in Goldsmith's Hall, 1803-1854.

NOLAN, LEWIS EDWARD, captain in the 15th hussars, killed in the famous cavalry charge at Balaklava, was the son of the late Major Nolan, some time vice-consul at Milan. He obtained his first commission in the army of Austria, but entered the service of his country in 1839 as ensign in the 4th foot. He was a man of varied accomplishments, skilled in many languages, Eastern and European, besides being a matchless cavalier and swordsman. In 1853 he published a work on the 'Organization, Drill, and Manœuvres of Cavalry Corps,' having first visited the principal military posts in Russia, besides other parts of Northern Europe. The fatal mistake under which the light cavalry were ordered to charge the Russian guns has been amply discussed in the public journals. Captain Nolan was killed by the first shot as he rode in advance of his men. [E.R.]

NORBURY, LORD. See TOLER.

O

O'CONNELL, MAURICE, eldest son of the celebrated Daniel O'Connell. He was called to the Irish bar in 1827, and became member for Clare in 1831 on the nomination of his father, after which he was seldom without a seat in parliament. Died in June, 1853.

O'CONNOR, FEARGUS, the chartist leader, was born in 1796, at Dargan Castle, county Meath. He was known in 1832 as one of the supporters of O'Connell, and obtained a seat in the first reformed parliament for the county of Cork. At the general election of 1835, he was elected for Cork a second time, but was unseated on the petition of Mr. Longfield: in the same year he contested, unsuccessfully, the borough of Oldham. From that period till 1847, though he was once or twice a candidate, he did not go to the poll, but he was then returned by the chartists of Nottingham, and was still member in 1852, when his mental aberration became manifest. At the time of his greatest influence, Mr. O'Connor was proprietor and editor of the *Northern Star*, a weekly journal devoted to the political interests of the working classes. It was under the direction of this journal that the movement was set afoot which resulted in the famous petition for the charter, and the gathering in London of a large body of the working classes, April 10, 1848. Though since made a subject of ridicule, there was so little sense of security in the public mind at the time, that a large provision was made for the defence of the government and the capital by the duke of Wellington; the people, however, dispersed quietly under the honest advice of their leader, and the petition was wisely abandoned when it was discovered that the mass of signatures was vitiated, by many that were either false or ridiculous. The political career of Mr. O'Connor was now at an end, and the total failure of his land scheme, followed by the unmerited disgrace and calumny to which he was subject, seem to have overturned the balance of his reason. His insubordination in the House led to his committal by the speaker during the session of 1852, and he was finally consigned to the care of Dr. Tuke of Chiswick, where he died, Aug. 30, 1855. Mr. O'Connor, like many of his countrymen, was a man of violent passions, but thoroughly honest in his intentions, and so far from mercenary that his devotion to the cause he espoused left him a beggar. The remnant of his followers expressed their sense of his disinterestedness in the motto displayed at his funeral, 'He lived and died for us.' [E.R.]

OCTAVIUS. See **AUGUSTUS**.

OLAUS, MAGNUS, an archbishop of Upsala who lived during the first half of the 16th century. He is known throughout Europe as a legendary writer, his stories of Lycanthropy, of Mermen, and similar marvels being frequently cited. An English version of his work was published in 1658.

OMMANEY, SIR JOHN ACKWORTH, K.C.B., rear-admiral of the Red, was born 1783, and died on 8th July, 1855, at his seat, Warblington House, Havant, Hants.

O'NEILL, JOHN BRUCE RICHARD, third viscount and baron, memorable as the last of the hereditary chiefs of Ulster, 1780-1855.

O'REILLY, THE HON. DOWELL, for nearly a quarter of a century attorney-general of Jamaica, and president of the legislative council there, was born in 1795; died at his residence, St. Andrew's, Kingston, Jamaica, in October, 1855.

ORMOND, JOHN BUTLER, second marquis of, distinguished for his contributions to the *Belles Lettres*, born in Dublin, 1808; died suddenly while bathing, 1854.

OXLEE, JOHN, a learned divine, remarkable for his industry and great literary capacity, born in Cleveland 1779, died 1854. He was master of 120 languages or dialects. His principal work is entitled 'The Christian Doctrines of the Trinity and Incarnation.'

P

PACIFICO, DON, well known for his claims upon the Greek government, which had well nigh provoked a war, died in London at an advanced age, 1854.

PAGET, LORD. See **ANGLESEY**.

PAILLET, M., a distinguished French barrister and member of the assembly, died 1855.

PAPWORTH, GEORGE, distinguished as an architect and engineer, 1801-1855.

PARK, PATRICK, a sculptor, died 1855.

PARKER, VICE-ADMIRAL HYDE, was the son of admiral Sir Hyde Parker, who died in 1807, and grandson of vice-admiral Sir Hyde Parker, who was lost in the *Cato* in 1782. He first entered upon active service in the navy in 1799, and attained the rank of post-captain after the expedition to Copenhagen in 1807. Since the peace he served some years on the Mediterranean station, and in 1845 commanded an experimental squadron. In 1852 he attained the rank of vice-admiral, and took office as one of the lords commissioners of the admiralty, under the duke of Northumberland; died 1854.

PARKER, CAPTAIN HYDE, son of the preceding, was born 1825, and obtained his first commission April 5, 1844. Two years subsequently he joined the *Constance*, 50, Captain Sir Baldwin Walker, and in 1847 obtained the rank of commander. He was entrusted with an important command as captain of the *Firebrand* in the Black Sea fleet, and exhibited the highest qualities of the seaman. The squadron blockading the Danube was under his orders, and in a short period the military stations and batteries which had been the chief impediments to the free navigation of the river were destroyed. In a fortnight after these achievements, Captain Parker entered the river with a boat expedition, his object being to reconnoitre a battery commanding the quarantine ground. The pinnace in advance grounded, and a destructive fire was poured upon the boats. At this moment our young hero resolved to storm the forts; and advancing at the head of his men, he received a ball in the heart, and fell dead in the arms of his coxswain. The correspondent of the *Morning Herald* thus alludes to his noble end, and sums up his character:—"Belonging to a family long distinguished in our naval annals, Captain Hyde Parker gave promise of equalling any of his race in services to his country. On receiving the news of his death, "Any one but him!" was the universal cry throughout the combined fleet. "I have no one left like him!" said our sorrowing admiral. The undaunted courage he had shown, added to his consummate ability, had already won for him a name which will not readily be forgotten. He was indeed no common man. We lament that there has passed from among us that genius which grasped instinctively questions which required from

others months of study—that strange fascination of manner which made all who came into contact with him love and yet respect him—that active intellect at home on every subject—that generous spirit far more careful for others' welfare than his own—that mind, so continually occupied in his country's service. Such was one who may perhaps be the last of his famous name. There gathered round to grace that funeral train the men of almost every nation; the strong sons of his own land—the brave children of our loved and noble ally—the dark Italians—all mingled, in martial pomp, with the troops of the Moslem, who then, for the first time, saw how France and England honour their warriors dead. But one feeling animated all, from the ambassadors and representatives of the four great nations who bore his pall, down to the Turks and Greeks who, moved far beyond their wont, gathered round us in sympathizing crowds. Even their women cast aside their wonted reserve for the moment; the tear was dropped over the fallen stranger who was to rest so far from his own land; from many a lip we heard the low murmur, “Kardesh, kardesh,” “Brothers, brothers.” His body was interred in the English cemetery at Pera. It may be interesting to add that the fort against which he was gallantly advancing when he received his death-wound, was soon after in possession of his men, led by Captain Powell. [E.R.]

PARMA, FERDINAND CHARLES DE BOURBON, duke of Parma, born 1823, was the son of Charles II. and the Princess Theresa of Sardinia, daughter of King Victor Emmanuel. His father became duke of Parma on the death of Marie Louise, the widow of Napoleon, in 1847, and abdicated in favour of his son, who assumed the title of Charles III. March 14, 1849. He was assassinated March 26, 1854, and his widow became regent during the minority of her son.

PARRY, SIR WILLIAM EDWARD, rear-admiral of the White, was born at Bath, where his father was in practice as a physician, 1790. In 1803 he entered the navy as volunteer on board the *Ville de Paris*, 110, and in 1810 was commissioned as lieutenant. His first acquaintance with the northern seas was in the ordinary service, affording protection to the Spitzbergen whale fishery, and collecting observations towards the improvement of the admiralty charts. From 1813 to 1817 he was engaged in active service on the North American station, and at the close of that period was soliciting for employment in African discovery. At this time, however, the Royal Society had memorialized the government to prosecute certain discoveries in the arctic regions, and as Parry had expressed himself equally ‘ready for hot or cold,’ he sailed for the north with Captain Buchan in May, 1819. This expedition returned in November, 1820, and Lieutenant Parry was soon after rewarded with the rank of commander. Three other expeditions in the arctic seas were undertaken by him as captain of the *Hecla*; the first extending over the years 1821 to 1823; the second from 1824 to 1828, reckoning the whole period till the *Hecla* returned to England,—her companion, the *Fury*, Captain Hoppner, having been wrecked; the third, completed in 1827, in which, defiant of every risk, he advanced to the highest latitude ever reached, 82° 45'. Cap-

tain Parry was now rewarded with the honour of knighthood, and shortly after went out to New South Wales as commissioner for managing the affairs of the Australian agricultural company,—an appointment which he retained till 1834. In 1835 he became assistant poor law commissioner in Norfolk, and in 1837 was employed by the admiralty to organize the packet service. Two other functions of his extend over several years,—that of hydrographer to the admiralty from 1823 to 1829; and that of comptroller of the steam department of the navy from 1837 to 1846. In 1853 he was appointed lieutenant-governor of Greenwich hospital, shortly after his promotion as rear-admiral of the Blue. Died in July, 1855. Sir Edward Parry is the author of a small work, entitled ‘Thoughts on the Parental Character of God,’ besides narratives of his voyages. [E.R.]

PASCO, JOHN, rear-admiral, memorable as having performed the duty of signal officer at the battle of Trafalgar, when Nelson gave the order, ‘England expects every man to do his duty;’ 1776-1854.

PAUL, HAMILTON, a Scotch journalist, known as the college friend and companion of Campbell, editor of an edition of Burns, 1774-1854.

PEPE, GUGLIELMO, a native of Calabria, well known as a general of the Neapolitan army, and a leader of the revolutionary party in Italy, was born in 1788, and first entered the army when Murat was king of Naples. He continued in the service after the restoration of the Bourbons, and was exiled for his share in the revolutionary movements of 1820-21. In 1848 he returned to his country, and was appointed commander-in-chief of the army sent to central Italy against the Austrians. At Bologna he was ordered to return, but instead of doing so he repaired to Venice, and served as commandant till the surrender of the city in 1849. Died near Turin, Aug., 1855.

PEREIRA, JONATHAN, an eminent physician, distinguished in the metropolis as a lecturer on chemistry, botany, and the materia medica, died, in consequence of an accident, in his forty-ninth year, Jan., 1853. Dr. Pereira, by his labours on the materia medica, has the reputation of having developed what was practically a new science. His ‘Elements of Materia Medica’ was published in its improved form in 1839.

PHILLIPS, SAMUEL, well known as an essayist and journalist, was the son of a tradesman, and was born in 1815. Having failed in an endeavour to carry on his father's business, he devoted his time to literature, and appeared as the author of ‘Caleb Stukely,’ in 1842. Subsequently he wrote for the *Morning Herald*, and was appointed literary reviewer on the *Times*. Died 1854.

PONSONBY, LORD, a diplomatist, 1771-1855. **PORTSMOUTH, NEWTON FELLOWS**, fourth earl of, M.P. for Andover, 1772-1854.

POTTINGER, SIR HENRY, a distinguished English diplomatist, died 1856.

PRIULI, the surname of several Venetian doges. **LORENZO**, who reigned from 1556 to 1559. **JEROMINO**, brother and successor of the preceding, died 1567. **ANTONIO**, successor of Nicholas Donato in 1618. In his reign, that dangerous conspiracy was formed, of which St. Real has written the history; died 1623.

PROSSI, TOMMASO, one of the most disting. authors and poets of modern Italy, 1789-1854.

PUSEY, PHILIP, an eminent practical agriculturist, late editor of the 'Agricultural Society's Journal,' 1799-1855.

R

RADOWITZ, JOSEPH VON, a Prussian general and military writer, was born in 1797, and was descended from the lesser nobility of Hungary. He received his military education in France at the time Jerome Buonaparte was king of Westphalia, and commenced active service as an artillery officer in 1812. After the peace, he devoted himself to religious and mystical studies, and having enemies at court, passed some time in honourable banishment, but was recalled to Berlin in 1840, when a war with France was imminent. In the revolutionary year 1848 he retired from the Prussian service, and became a member of the national assembly of Frankfort, the eventualities of which forced him to Berlin in the character of the king's friend and minister. Died Dec. 25, 1854.

RAGLAN, LORD, late commander-in-chief of the British army in the Crimea, was born 1788, and was first known as Lord Fitzroy Somerset. His father was the fifth duke of Beaufort, his mother a daughter of Admiral Boscawen; he belonged to the highest class of the English aristocracy. Having entered the army at an early age, he was selected by the duke of Wellington to serve on his staff in 1807, and was accordingly under fire for the first time in the attack of the British upon the Danish troops, in the expedition to Copenhagen. He accompanied our great captain to the peninsula, being first appointed one of his aides-de-camp, and afterwards his military secretary. In the words of Lord Hardinge, 'during the whole period that the duke of Wellington was in the peninsula—with the exception, perhaps, of a short time when he was in England for the benefit of his health—Lord Fitzroy Somerset was at his right hand;' he was present in all the great actions of the peninsular campaign, and ever foremost in the field; at Badajoz, he was among the first to mount the breach, and it was to him that the governor delivered up his sword; at Busaco, he was slightly wounded, and at Waterloo he lost his right arm. His rank at this time was that of lieutenant-colonel in the 1st foot guards. His embassies and other minor services to the state, we pass over to mention that he held the office of military secretary, at the horse guards, for twenty-five years, being from 1827 to 1852,—the year in which he was appointed master-general of the ordnance, and raised to the House of Peers by the title of Lord Raglan. Events were now ripening, which, it is impossible to deny, have shed a fresh lustre on the name of the gallant Fitzroy Somerset. In February, 1854, he was appointed commander of the forces proceeding to the East, and in the month of May succeeded the marquis of Anglesey as colonel of the royal horse guards (blue). At the beginning of May, he arrived with Lord de Ros, and the principal officers of his staff, at Gallipoli. At the end of August, and beginning of September, the allied armies were embarked for the Crimea,

and at daybreak on the morning of September 19th the tents were struck, and the armies put in motion, with the view of securing the desired basis of operations, and opening a communication with the fleet. The first great battle was now fought, in which Lord Raglan displayed all the valour of his younger days; at the critical moment he dashed forward at the head of his staff, many of who fell around him, and having crossed the bridge of the Alma, obtained a point of view which enabled him to win the victory with a less sacrifice of life than would otherwise have been possible. At Balaklava, as usual, Lord Raglan and his staff were in advance of the troops—at one moment under command of the guns of Sebastopol, at another, in front of a sudden apparition of Russian infantry. The same personal devotion marked his conduct at Inkermann, for shot and shell were falling thick around him, when Colonel Gambier received his orders to bring up the two heavy guns (18 pounders), which aided so materially to decide the fate of the day. At one moment a shell exploded in the midst of the staff, killing or wounding many. After these hairbreadth escapes, it is singular to record the death of the veteran soldier from natural causes, and the more so, that he still held the post of danger and of duty at the last hour. On the 29th of June, 1855, eleven days after the unsuccessful attack upon the Redan and Malakoff, Lord Raglan breathed his last in perfect tranquillity; a short illness, aggravated by mental anxiety, being the only prelude of his fate. His remains were brought to England. [E.R.]

RATTEE, JAMES, distinguished for the beauty of his carvings, and other enrichments in the style of mediæval architecture, 1820-1855.

REHAUSEN, BARON DE, successor of Count Bjornstjerna as Swedish minister in London, 1802-1854.

RENOUARD, ANTOINE AUGUSTIN, an eminent French bibliographer, author of a valuable annotated catalogue of books—'Annales de l'Imprimerie des Aides,' 'Elemens de la Morale,' and other works, died in Paris, aged ninety-eight, 1854.

RHODES, JOSEPH, an artist and art teacher, who had sustained his reputation in Yorkshire for more than half a century, died 1855. His figures, landscapes, and flowers, afforded equal evidence of his skill in execution.

RIDDLE, EDWARD, a mathematician and astronomer, late head master of the Greenwich Hospital schools, author of astronomical and other professional works, 1788-1854.

RIGOLLOT, MARCEL JEROME, a French physician, distinguished also as a naturalist and antiquarian, 1786-1855.

ROBERTSON, PATRICK, Lord, a judge of the court of session, author of poems, 1794-1854.

ROGERS, P. H., a landscape painter, d. 1853.

ROGERS, REAR-ADMIRAL ROBERT HENLEY, born August, 1783, died 8th January, 1857.

ROGERS, SAMUEL, living to reach his ninety-third year, linked together in the history of English literature four successive generations. He witnessed in his old age the era of poetical interregnum, in which there is claimed for Tennyson the place of dictator: he had passed his own brightest days in the reigns of Scott, and Byron, and Wordsworth: his first volume had been printed in the

same year with the first volume of Burns: and he had even, in still earlier youth, looked up with awe to the critical throne of Samuel Johnson. Rogers was born at Stoke-Newington, near London, on the 30th of July, 1763. He was the son of a London banker, whose association with his fellow-dissenters made 'Watts' Hymns' to be the first poetical studies of the schoolboy; while his political activity may have aided in generating the poet's mildly Whiggish opinions. His life was, even for a literary man, singularly uneventful. He had neither difficulties to combat, nor misfortunes to suffer. He was accomplished, both through education, society, and foreign travel: he was always affluent, so far at least as to possess means more than sufficient for the luxurious life of a bachelor, who loved alike fashion, literature, and art; and all the days of his long life were spent in the pleasant employments of an amateur in letters and in painting and music, and of a friend or patron of literary men and artists.—His own literary productions showed, from beginning to end, a strongly imitative turn. They are the effusions of a man finely impressible by poetical ideas; decidedly not of one who could himself either create novel images, or strike out new channels of feeling. Some passages of his poems are very pleasing, seldom through any vigorous pictures than through some touch of emotion deeper than the usual vein. But even in such passages we feel ourselves to be listening to what is merely an echo. Yet it is curious and interesting to mark how, in period after period, the echo was caught from the present as well as from the past. One characteristic, however, of the English poetry of the eighteenth century, clung always to Rogers. His verses were elaborated, both for diction and for melody, with a care which scarcely any writer of our age has dreamt of, and which most of them have despised. His principal poems were polished and repolished for years before being thrown on the world; and while there was thus gained a remarkable sweetness both of phrase and of rhythm, the charm was but too often purchased by an augmentation of that natural feebleness, from which, perhaps, the writer could hardly in any circumstances have altogether escaped.—In 1786, Rogers published, with other poems, his 'Ode to Superstition.' In it the influence of Gray is strongly perceptible: and Goldsmith was as plainly the model for his most popular poem, 'The Pleasures of Memory,' which appeared in 1792. In 1798, in his 'Epistle to a Friend,' he had still received no teaching more recent than that of Pope and his followers. Aspirations more active, but far from successful, were evinced in 1812 by the fragmentary 'Voyage of Columbus;' and his subsequent works showed still more how he had been impressed by the more meretricious school, which had grown up since his youthful taste was formed. In 1814, his 'Jacqueline' was printed with Byron's 'Lara,' a companionship which proved fatal to a weakish, yet pretty tale. In 1819, appeared 'Human Life,' which many readers hold to be his best work; but surely this place is better deserved by 'Italy,' which, first privately printed, then much altered and corrected, from first to last, for ten or more years, was in part offered to the public, in 1823. Vigorous or essentially original it is not, either in

imagery or otherwise; but it is full of fine taste, and of sympathy for beauty both in nature and in art, not unaccompanied with active observation; and the polishing in which the timid poet so much delighted, was here performed with even more than his ordinary skill. With this poem Rogers's authorship may be said to have closed.—During the time it lasted, he was the friend of many among the leading men of letters; Byron, Moore, and Campbell being on terms especially intimate with him. He associated much also with some of the leading statesmen of the Whig party, especially Fox, Sheridan, Lord Holland, and the Marquis of Lansdowne. But likewise, from before Fox's death, his house in St. James's place continued to be for more than fifty years a place of meeting for all who, through genius, fashion, or celebrity of any kind, could interest his curiosity and grace his classic board. Rogers's breakfasts were things especially famous. A volume of 'Table-Talk,' already published since his death, has furnished the uninitiated with some specimens of the anecdotes, oftener (it should seem) pointed than good-natured, with which he was wont to entertain his guests. The tone of his conversation is hinted in a line of Moore's Diary: 'Rogers amusing and sarcastic as usual.' He possessed a large and exceedingly choice collection of works of art, from which three paintings were bequeathed by him to the National Gallery. He was a kind patron of living artists, and spent £10,000 on illustrated editions of his poems. To literary men, also, and others in difficulties, he was generous: he relieved Sheridan's distresses; Moore was obliged to him in the crisis of his Bermuda affairs; and a loan from him enabled Campbell to purchase a share in the 'Metropolitan Magazine.'—Rogers's attendances at picture sales and exhibitions, and at operas and concerts, and those other light devices in which he whiled away his time, lasted till he was extremely old. Indeed, they were stopped only when, being run over by a carriage in the street, he received an injury which confined him to his own house for the last few years of his life. He died there, on the 18th of December, 1855. [W.S.]

ROSE, SIR GEORGE HENRY, well known as having filled various diplomatic and other offices of state, author of several pamphlets; died at an advanced age, 1855.

ROSMINI, ABBE, distinguished in Italy as a writer on moral philosophy, and the founder of an order called after him the Rosminiani, 1797-1855.

ROSSI, COUNTESS. See SONTAG.

ROUSSIN, M., a distinguished French admiral, born 1781, entered the service in 1793 and was permanently employed during the war. On the establishment of peace he was engaged in scientific surveys, and in 1831 made a peer of France. He died in 1854.

ROUTH, MARTIN JOSEPH, late president of Magdalen College, and a learned writer, died in the hundredth year of his age, December, 1854. His principal works are, the 'Reliquiæ Sacræ,' published 1814-1815, and an edition of Burnet, 1823. His memory is associated with the friendship of Dr. Parr, Porson, and many other names of another generation.

ROWE, REV. SAMUEL, a topographical writer and liturgist, 1793-1853.

ROWSON, FREDERICK, one of the directors of the National Freehold Land Society, author of 'The Debater,' 'The Female Poets of Great Britain,' &c., died 1855.

RUBINI, GLAMBATISTO, the famous tenor singer, was a native of Italy, born 1795. He commenced his musical career by playing the violin in the church of Romano, and made his first appearance on the stage in 1815 at Naples. In 1825 he went to Paris, and in that capital and London realized a large fortune, and acquired a brilliant reputation. Died March 2, 1854.

RUTHERFORD, ANDREW, Lord, an eminent Scottish judge, 1791-1854.

RUTLAND, JOHN HENDRY MANNERS, fifth duke of Rutland, born 4th January, 1778, died 20th January, 1857. The duke of Rutland was known as one of the best landlords in England, and was deservedly popular among his numerous tenants. His Grace took little active part in politics; but on all important questions generally voted with the conservative party.

S

SAINT ARNAUD. See ARNAUD.

SAINT HILAIRE, AUGUSTE, an eminent Fr. naturalist, distinguished for his researches into the vegetation of the Brazils and of South America, 1779-1858.

SALE, LADY FLORENTIA, widow of Major-General Sir Robert Sale, remarkable for the daring constancy with which she accompanied her husband in all his campaigns, died at Cape Town, 1854. At the period of the Cabool disasters, she became the prisoner of Akbar Khan, and afterwards gave the world an interesting memoir of her captivity. Lady Sale was in receipt of a pension of £500 a-year.

SALTOUN, ALEXANDER GEORGE FRASER, sixteenth lord, distinguished for his gallantry as a peninsular officer, and for his defence of Hongoumont at the battle of Waterloo, 1785-1853.

SAULL, WILLIAM DEVONSHIRE, well known in the metropolis in connection with popular subjects of debate, as the working man's friend, died, aged seventy-two, 1855. He was a geologist and antiquarian, and has left a valuable museum.

SAUNDERS, THOMAS, a citizen and antiquarian of London, memorable for his exertions in procuring the restoration of 'The Ladye Chapel,' in Southwark, 1786-1854.

SAVILLE. See FAUCIT.

SCHNEIDER, J. C. F., a German musician, 1786-1853.

SCORESBY, REV. DR. J. R. S. (formerly Captain William), was the son of an able and distinguished seaman in the northern whale fishery, and was born at Whitby, in Yorkshire. As chief mate of his father's ship, the *Resolution* of Whitby, in 1806, he sailed into the highest latitude then reached by navigators. In 1820, he published his account of the arctic regions, one of the most interesting records of maritime adventure ever written. On his retirement from the sea, Captain Scoresby entered into holy orders, and took a Doctor's degree. His discourses to

seamen are of peculiar excellence. Dr. Scoresby, in the latter years of his life, enriched the *Edinburgh Philosophical Journal*, and other scientific periodicals, with valuable contributions. After a lingering illness, he died at Torbay, on the 21st March, 1857.

SELWYN, WILLIAM, an eminent lawyer, author of a valuable professional work, known as 'Selwyn's Nisi Prius,' 1774-1855.

SHADFORTH, THOMAS, lieutenant-colonel of the 57th regiment, killed in the attack on the Redan fort, June 18, 1855, was the son of Colonel Thomas Shadforth, now of Sydney. He entered the army in 1825, and fell gallantly in the fifty-first year of his age. While he was highly esteemed by Lord Raglan, circumstances prove that he was equally beloved by his men, whom he kept in a remarkable state of efficiency.

SHEEPSHANKS, RICHARD, a Church of England minister, who devoted himself wholly to scientific pursuits, author of several articles on astronomical instruments, and similar subjects, in the 'Penny Cyclopædia,' 1794-1855.

SIBOUR, MONSIEUR MARIE DOMINIQUE AUGUSTUS, archbishop of Paris, born 1792, assassinated by Vèges, a priest, in the church of St. Etienne du Mont, Paris, in 1857.

SIBTHORP, CHARLES DE LAET WALDO, the well known member of parliament for Lincoln, and colonel of the Lincoln militia: was descended from an ancient family settled in Nottinghamshire. He was born in 1782, and first became member for Lincoln in 1826, since which he was constantly re-elected, excepting only in the year 1833. He was a staunch protestant and conservative, thorough, honest, independent, and blunt in expressing his opinions. Died Dec. 14th, 1855.

SMECTYMNUS. See SPURSTOW.

SMEDLEY, REV. EDWARD, a learned minister of the Church of England, was the son of a minister of the same name, who was one of the masters of Westminster school. He was born in 1789, and was educated at Cambridge, where he took the degree of M.A. in 1812. Between that period and 1828, he took four of the Seatonian prizes for English poems, and published a history of the Reformed Religion in France. He also edited the 'Encyclopædia Metropolitana.' Died at Dulwich in July, 1836.

SMIBERT, THOMAS, a Scottish journalist and miscellaneous writer, died 1853.

SMITH, RICHARD JOHN, the celebrated actor of the Adelphi, was born at York, 1786, where at that time his father and mother were staying, then engaged in their professional vocation as actors. He made his first appearance as a regular actor at Sheffield, where he played the Coward in 'Douglas,' 17th September, 1804. His first appearance in London was at the Surrey theatre, in May, 1810, where he took the part of Farouche in the 'Black Forest.' His connection with the Adelphi dated from October 12th, 1829. Died in March, 1855. Mr. Smith was devoted to his profession, and possessed an antiquarian's knowledge of armour, costume, and prints.

SMITHSON, MISS. See BERLIOZ.

SONTAG, HENRIETTA, the famous soprano singer and actress, was born at Coblenz in 1805, of parents both belonging to the theatrical profes-

on. Her wonderful talents for song were developed by a musical education at Prague, and her subsequent appearance on the stage was at Vienna in 1820 or 1821. In 1823 and 1824 she was chosen successively by Weber and Beethoven to take a part in their operas, and finally appeared at Paris and London. Soon afterwards she was married to Count Rossi, and was thus lost to the stage. The political events of 1848 compelled her to resume her profession, and she succeeded Mdlle. Lind at her Majesty's theatre, afterwards visiting many parts of Europe and America. Died of cholera in the city of Mexico when about to appear in 'Lucretia Borgia,' 17th June, 1854.

SOUTHEY, MRS. CAROLINE, widow of the late poet-laureate, to whom she was married in 1799, died at Buckland, near Lymington, in the eighty-eighth year of her age, 1854. It has been stated that she was related to the poet Williamisle Bowles; but this is an error, arising from her father's name, who was formerly a captain in the army. Mrs. Southey was a poetess, and also a successful prose writer. She enjoyed a pension of 200 a-year from the Queen, granted two years prior to her decease.

SOWERBY, GEORGE BRETtingham, an eminent conchologist; born 1790; died in London 1854. He was the son of James Sowerby, well known as the proprietor and publisher of the 'English Botany,' edited by Sir J. E. Smith. He seems to have inherited his father's taste for natural history, but it was chiefly to the study of conchology he devoted his time and attention. He dealt largely in objects of natural history, but chiefly shells; and to him is due, to a great extent, a better knowledge in this country of the celebrated Lamarck's arrangement. Mr. Sowerby contributed numerous papers on conchological subjects to the scientific periodicals of the day, and he is the originator and publisher of the 'Zoological Journal.' His principal work, however, and by which he is best known is his 'Genera of Recent Fossil Shells,' in two volumes; but which, unfortunately, was never completed. [W.B.]

SPRATT, JAMES, a captain in the royal navy, for his gallantry in the action at Trafalgar, died at Teignmouth, aged eighty-two, June, 1853.

STANGER, WILLIAM, M.D., an English naturalist, attached to the Niger expedition in 1841; died 1854.

STEVENSON, S. W., a scholar and numismatist, author of 'A Dictionary of Roman Coins,' and 'Travels,' 1785-1854.

STOCKS, JOHN ELLERTON, M.D., a zealous and practical botanist. Born near Hull, 1820; died 1854. Dr. Stocks held a medical appointment in the service of the East India Company, and devoted his leisure time to the study of botany. During his service in India, he was for some time inspector of forests in Scinde, and was thus led to travel much through that country and Beloochistan. He fulfilled the duties also for some time as conservator of forests and superintendent of public gardens in Bombay, in the absence of Dr. Benson, who held that appointment. In the course of his official duties he had opportunities, which he did not neglect, of forming an extensive collection of plants, with a large series of drawings made by five artists, all of which he brought to this

country in the beginning of 1854, along with materials, in a forward state of preparation, for a general work on the natural history, manners, customs, arts, manufactures, and commerce, agriculture, &c., of science. These collections he had commenced arranging and putting in order, when illness supervened, and he was carried off by a fit of apoplexy, in August, 1854, at the early age of thirty-four. Dr. Stocks was a man of great and varied attainments in literature, and had his life been spared, the science of botany, especially, would have been enriched by his valuable contributions. His published papers are chiefly contained in Sir W. J. Hooker's 'London Journal of Botany,' and 'Kew Garden Miscellany.' [W.B.]

STORER, JAMES SARGEANT, an English draughtsman and engraver, famous for his accurate delineations of the antiquities of our country, and for his topographical views, 1772-1854.

STRANGFORD, PERCY CLINTON SYDNEY SMYTHE, sixth viscount, a distinguished diplomatist and man of letters, was born 1780, and succeeded his father in the peerage 1801. In early life, diplomacy and literature divided his attention at the court of Lisbon, and his translations from Camoens at that period are warmly eulogized by his countryman, Thomas Moore. In 1808-9, when, in consequence of the Portuguese revolution, the Prince Regent removed his court to the Brazils, and thus founded the Brazilian empire, Lord Viscount Strangford was residing in Lisbon with the rank of minister plenipotentiary, and appears to have enjoyed the full confidence of the royal family of Portugal; in fine, he joined them in the emigration—one of the most remarkable circumstances of modern times—and remained many years at Rio Janeiro, performing the same functions as at Lisbon. His subsequent missions were to the court of Flanders, 1817; to the Ottoman Porte, 1820; and to St. Petersburg, 1825, where he was succeeded by Lord Heytesbury. In 1828 he went on a special mission to the Brazils, in which year Don Pedro agreed to a treaty of peace with Buenos Ayres, and acknowledged the independence of Monte Video, and the Banda Oriental: with this mission his diplomatic career terminated. Since that period Lord Strangford attached himself almost solely to literature, and at the time of his death had made a large collection of documents towards the biography of his ancestor, Endymion Porter. Died May 29, 1855. [E.R.]

STRANGWAYS, THOMAS FOX, brigadier-general commanding the royal artillery in the British army in the Crimea, was born 1790, and entered the artillery service in 1806. In 1813 and 1841 he was with the allied army in Germany, and distinguished himself in the battles around Leipzig. For these services the Swedish order of the sword was conferred on him. He served also in the decisive campaign of 1815, and at Waterloo was slightly wounded. His death at Inkermann was caused by a round shot, which blew away his leg. Mr. Russell relates: 'The poor old general never moved a muscle of his face. He said merely, in a gentle voice, "Will any one be kind enough to lift me off my horse?"' He was taken down and laid on the ground, while his life-blood ebbed fast, and at last he was carried to the rear. But the gallant old man had not sufficient strength to undergo an

operation, and in two hours he had sunk to rest, leaving behind him a memory which will ever be held dear by every officer and man of the army.' [E.R.]

STRUTHERS, JOHN, a minor Scottish poet and historical writer, born in Lanarkshire, 1776, died at Glasgow, August, 1853. His best poem is 'The Poor Man's Sabbath,' first published in 1804, at which time the author obtained his living as a working shoemaker. For the last twenty years of his life he held the appointment of librarian at Stirling's library, Glasgow.

STUART, LORD DUDLEY, the friend of Poland, son of John, first marquess of Bute, and of a daughter of Thomas Coutts the banker, was born in 1803. He commenced his public career at the critical period of 1830, when he became member for Arundel, of course in the liberal interest. Home politics, however, did not engage much of his attention, his enthusiasm being excited by the arrival in England, at this time, of Prince Adam Czartoryski, and the wreck of the Polish army. Lord Dudley Stuart felt that the liberties of Europe were menaced by the advance of the Russian empire, and that the restoration of Poland was the only barrier that could be raised against her; this feeling, and a deep sense of the wrongs which the Poles had endured, took full possession of his heart and mind, and dictated his whole course of action. He fought the battles of the Poles almost alone in the House of Commons, keeping his seat for Arundel till 1837, when he was defeated by Lord Fitzallan. He then remained out of parliament for ten years, and eventually, in 1847, was returned at the head of the poll for Marylebone; in 1852 he was re-elected without opposition. Lord Dudley Stuart rejected every proposal to take office, always declaring that he would accept no other than that of ambassador at the court of Warsaw. Zealous in this cause to the last hour, he left England in September, 1854, to recruit his health, and bent his steps to Denmark and Stockholm, where he might use his influence in procuring the adhesion of those powers. Though suffering from illness, he had two audiences of the king, and was so weak when he last visited the palace that he was carried up and down the stairs. These exertions, added to his extensive correspondence, proved too much for his exhausted constitution, and he expired in Stockholm on the 17th of November. The immediate cause of his death was the deposition of water in the cellular membrane of the lungs. In early life Lord Dudley Stuart passed some years in the south of Europe, and was married to the daughter of Lucien Buonaparte, prince of Canino. [E.R.]

SULLIVAN, JOHN, a member of the supreme council of Madras, distinguished for his knowledge of Indian affairs and his unflinching advocacy of the native population, died 1855.

T

THACKERAY, ELIAS, cousin to the popular author of that name, a minister of the Church of England, 1771-1854.

THIERRY, AUGUSTIN, historian of the Norman Conquest, was born at Blois, on the 20th May,

1795, of poor and humble parents. He passed through his studies with distinguished success at the college of his native town. In 1811, on quitting his college, M. Augustin Thierry entered the normal school, where, after passing two years he was appointed professor in a provincial college. The invasion of 1814 brought him to Paris. Fired with all the ardour of youth, and versed in the most varied studies, he had as yet no particular predilection for any distinct branch of science, and his political ideas, though fervent, partook of the confusion which characterized the period. 'I yearned,' says Thierry, 'for a future, I knew not exactly what; for a liberty, whose definition, if I give it at all, assumed something of this form:—a government with the greatest possible amount of individual guarantees, and the least possible amount of administrative action.' There was at this time living in comparative obscurity in Paris a celebrated political economist, whose *Memoirs* recently published, have created a sensation in England (St. Simon). The freshness and daring scope of the views of this thinker fascinated the youthful Augustin, who, quitting the university devoted himself with all the fervour of his nature to the study of the loftiest social problems, and attached himself to St. Simon as secretary and disciple. Thierry's co-operation with St. Simon was, however, of but short duration. In 1817, we find he has joined the *Censeur Européen*, which enjoyed the reputation of being the most important and high-minded of the liberal journals of the period. The new school of French history had not at this time raised its head. The annals of France lay utterly disfigured beneath the dull and arid nomenclature of the elder historians. Garnier, Millot, Anquetil, reigned supreme. No historian had yet thought of moving out of the beaten track when M. Thierry, having occasion to seek in the history of the past materials for the polemics of the day, first descended into the arena, and young, ardent, and yet unconscious of his vocation as a destiny, entered upon that study which resulted in the establishment of the new doctrines and the new principles. Aristocracy, assailed and decimated from the days of the Grand Monarque until the epoch of the Restoration, had yet learnt nothing and forgotten nothing. With the return of the Bourbons it once more raised its voice. These were the words which, through its more eloquent champion, it addressed to new France: 'Enfranchised race, slaves wrested from our grasp—depressed people—leave was granted you to be free, but not to be noble: for us, all is of right; for you, all is of favour!' This pride of birth which Montlosier assailed the Revolution, met in M. Thierry an antagonist 'too proud to care from whence he came.' The pretensions and insolence of Montlosier were wholly based on the old right of conquest. A century before this epoch Boulaivillier had sought to construct an historical system based upon the distinction between the conquerors and the conquered in France. The Abbe Dubois, a man of the people, stood forward to combat the theory by nearly as great a fallacy, by denying the fact of a conquest at all. Montlosier had reproduced the theory of Boulaivillier, but he encountered an antagonist not more sincere, perhaps than the abbe, but incomparably more able. J

Augustin Thierry proudly accepted the fact of the conquest as the premises on which to found his claims in favour of the conquered. Not content with establishing the original iniquity of the conquest, he denounced it as the source of not merely the evils of the past, but of all present difficulties. 'The genius of conquest,' said Thierry, 'has made us mock of nature and of time; it still hovers over this unhappy country; it is under its influence that the distinctions of caste have succeeded to those of blood; those of orders to those of castes; those of titles to those of orders.' It was in the demolition of the theories of Montlosier, and defending the revolution, that Thierry's great work, the '*Histoire de la Conquête de l'Angleterre par les Normands*,' was produced. The immense sensation which it created, is known to all in any measure acquainted with the new school of French history. The great labours to which its author had subjected himself impaired at once the health and the sight of the accomplished historian. After a journey into Switzerland, and a visit to Provence, he returned to Paris somewhat invigorated in general health, but his sight still declining, and almost blind, he resumed his labours in the field of history. At this period a young man, then unknown, but destined ere long to take a brilliant position in literature and journalism, Armand Carrel, became his secretary. Young Carrel, by his friendly earnestness of purpose, rendered the necessity of reading with the eyes of others less painful to Thierry than it had formerly been. His next publication was the '*Lettres sur l'Histoire de France*.' Shortly after the appearance of this work he was elected a member of the Institute. But assailed by a nervous malady of the severest kind, he had once more to quit his beloved Paris, and betake himself to the baths of Juxenil. It was at these baths he became acquainted with and married the lady who was to alleviate his sufferings, by aiding him on his way through the evil days of premature old age. Shortly after this the Académie Française awarded him the Gobert prize of £400, which he held till death. Almost at the same time this honour was conferred upon him, M. Guizot recalled him to Paris to preside over an undertaking honourable alike to the historian who conceived it and the historian who directed it,—the task being to form a collection after the manner of the great Benedictine compilations devoted to the nobility and the clergy, of all the materials to be found throughout France bearing upon the history of the third estate. Combating alike blindness and paralysis, Thierry continued to the last to prosecute his favourite studies. He died in Paris, in May, 1856. His genius has been accurately summed up by one who knew him well: 'No historian, ancient or modern, has exhibited in a higher degree than he, that human sense which is the very soul of history. I mean that comprehensive sensibility, synthetic without losing sight of the true, which leads a writer to attach himself to the destiny of a whole people as to the destiny of an individual; following this people, step by step, through ages, with an interest as earnest and emotions as vivid as though he were following the steps of a friend engaged in a perilous enterprise.'

THOMPSON, WILLIAM, alderman and member of parliament for London, was born at Kendal,

in Westmoreland, 1792. From 1820 to 1826 he sat in parliament as member for Callington, and from that period to 1831 he represented the city, where in the interim he had 'passed the chair,' as lord mayor. From 1832 to 1837, he was the popular candidate in Sutherland, but having changed his politics, he retired in 1841, and afterwards represented the county of Westmoreland. Died 1854.

THORN, SIR NATHANIEL, K.C.B., K.H., col. of the 3rd bufs, had been more than fifty years in the British service. He entered the army in 1802, went, in 1808, with the bufs to the Peninsula, shared in most of the engagements from that time to 1814. He was at Busaco, Badajoz, Talavera, Vittoria, the Pyrenees, Nivelle, Nive, Orthes, and Toulouse. He had just returned from his investiture as a Knight Commander of the Bath, when he was suddenly taken ill, and died at his residence, near Taunton, on the 28th January, 1857.

TORRENS, MAJOR-GENERAL SIR ARTHUR WELLESLEY, born 1809; died at Paris, where he was residing as military commissioner for this country, August, 1855. General Torrens is memorable for his gallant conduct at Inkermann, where he received a wound while cheering on his men, from the effects of which he never fully recovered. He received the thanks of parliament and was promoted in December, 1854.

TRURO, THE RIGHT HON. THOMAS WILDE, first Baron Truro of Bowes, was born July, 1782, and educated at St. Paul's school. Early in life he adopted the avocation of his father, who was a solicitor, but ultimately he relinquished it for the higher branch of the same profession. He was called to the bar by the Hon. Society of the Inner Temple, in 1817, and rose to great eminence as a *nisi prius* advocate. After a singularly rapid rise at the bar, he was appointed solicitor-general in 1839, and in 1841 he became attorney-general. In 1846 he was raised to the bench as chief justice of the court of common pleas; in 1850 he became lord chancellor, and was created a peer with the title of Baron Truro. In politics Lord Truro was a strenuous supporter of the whigs. His powers as a debater were very superior. Lord Truro died on the 11th November, 1855, at his residence, Eaton square, London.

TULK, CHARLES AUGUSTUS, a magistrate of Middlesex, author of several religious works, 1786-1849.

TYLDEN, WILLIAM BURTON, brigadier-general in the royal engineers, died of cholera in the Crimea, September 22, 1855. He was honourably mentioned by Lord Raglan after the battle of the Alma; and it was owing to his exertions that Varna was saved from destruction when the powder magazines were in danger of ignition.

U

URE, ANDREW, M.D., F.R.S., was born in Glasgow, in May, 1778, founded the Observatory of Glasgow, author of '*Ure's Dictionary of Chemistry*,' and other well known works. Since 1830, Dr. Ure resided in London, where he died on the 2d January, 1857.

UXBRIDGE, EARL OF. See ANGLESEY.

V

VALPY, ABRAHAM JOHN, famous for his editions of the classics, died in his sixty-eighth year, 1854.

VAN EYCKEN, JOHN, a distinguished painter of Belgium, died in Brussels, Dec., 1854.

VEDDER, DAVID, distinguished as a poet and graceful prose writer, was born in the Orkneys, 1790, his father being a small laird in the island. Left an orphan at an early age, he became a seaman, but at the age of thirty took a situation on land as tide surveyor, and remained in the service of the customs till about two years before his death. His works are, the 'Covenanters' Communion,' 'Orcadian Sketches,' 'Lays and Lithographs,' and his popular translation from the German of 'Reynard the Fox.' Died 1854.

VICO, LIEUT.-COL., joint commissioner for France with Lieut.-Col. de Lagondie, at the headquarters of the British army in the Crimea, died before Sebastopol, July 10, 1855.

VISCONTI, M., a distinguished French architect, died 1854.

VOROSMARTY, MICHAEL, a famous Hungarian poet, 1800-1855.

W

WADMORE, JAMES, a well known patron of the fine arts, possessor of many great works of the old masters, and some fine pictures by Turner; 1782-1853.

WAKEFIELD, EDWARD, author of 'Ireland, Political and Statistical,' died at Knightsbridge in his eighty-sixth year, May 18, 1854.

WALKER, R. F., an Oriental scholar and translator from the German, died 1854.

WALLICH, NATHANIEL, a celebrated botanist, born 1796; died in London, 1854. Dr. Wallich was a Dane by birth and parentage, and served in early life in the Danish settlement of Serampore in India. At the conquest of that place by the English, he was allowed to enter the E. I. Co.'s service, and being a devoted botanist, he obtained the appointment of superintendent of the botanical garden at Calcutta. He was the author of the 'Flora Indica,' and the 'Plantæ Asiaticæ Rariores.' The former work was written while he was in India, in conjunction with the celebrated Dr. Cary, and the latter was published by him after his coming to England. It is in three folio volumes, with 100 coloured plates, and is a monument of labour and perseverance. [W.B.]

WALWORTH. See RICHARD II.

WARNEFORD, S. W., a clergyman, disting. as a benefactor to colleges and schools, 1763-1855.

WARNER, MRS., the celebrated actress, was born in Dublin, where her father was in business as a chemist, and when only fifteen years of age took a part with Macready at the Plymouth theatre. In 1836, she was engaged in Drury Lane by Mr. Bunn, and obtained great success in the 'Wrecker's Daughter.' She was afterwards engaged at the

Haymarket, and in the Patent theatres (where under the management of Mr. Macready), where she divided the Shaksperian drama with Miss Faucit. At Saddler's Wells she was associated with Mr. Phelps in sustaining the legitimate drama, and subsequently made a similar effort at Marylebone. Died of cancer in the breast, Sep. 25, 1854. Mrs. Warner was the last great actress of the English stage, and is still without a successor.

WARNER, SAMUEL ALFRED, well known as Captain Warner, was a master in the royal navy and the son of a master mariner. His famous invisible shell was the subject of an experiment in 1841, at which Sir Robert Peel was present and again, in 1844, off Brighton, when the 'John o'Gaunt,' a vessel of 300 tons measurement, was blown to pieces. A government commission has previously decided against his claims, and his 'long range' was never brought to trial. Nothing certain is known of his inventions by the public, but they are regarded as the offspring of monomania. Captain Warner died suddenly of apoplexy in 1854.

WAT TYLER. See RICHARD II.

WATSON, JOSHUA, well known as a devoted and learned lay member of the Church of England, born in London 1776; died at Clapton, January 30, 1855. Few men in recent times have equalled Mr. Watson in their devotion to the charitable uses and institutions of the church, or in the capacity to serve her. Mr. Watson was alike prodigal of his money, his influence, and his special talents in the cause he loved.

WATSON, WALKER, 'the poet of Kirkintilloch,' author of 'Jockie's far awa,' and many well known popular songs, died at an advanced age, 1854.

WEBB, PHILIP PARKER, an author of several works on botany, remarkable for their scientific accuracy, and the extensive reading displayed in them, 1792-1854.

WEST, WILLIAM, formerly a bookseller, author of several county histories, and of an amusing work, entitled his 'Recollections,' 1770-1855.

WHARNCLIFFE. See WORTLEY.

WHISH, SIR W. SAMPSON, a gallant general in the service of the E. India Company, 1787-1853.

WHITTAKER, JOHN WILLIAM, a controversial divine, author of several learned works, and an interesting essay on Ancient Etymologies, 1790-1854.

WILDE. See TRURO.

WILKE, JOHN, a member of parliament, best known as a collector of books and autographs, 1765-1854.

WILLIAMS, EDWARD, the once celebrated *Iolo Fardd Glas*, a Welch bard and writer, died in the workhouse of Pen-y-bout, Glamorganshire, at the advanced age of eighty, 1854. He was by trade a cooper, and adhered to it as a means of gaining his livelihood till the infirmities of age rendered it impossible to do so any longer.

WILLIAMS, JOHN, member of parliament for Macclesfield from 1847 to the last general election, 1851, when he was defeated by Mr. Egerton. Born of poor parentage in Denbighshire, 1799; died suddenly, Nov. 29, 1855.

WILLIAMS, S., a wood engraver and designer, celebrated for his illustrations in periodical and other works, born at Colchester, 1778; died 1854.

WILSON, HARRY BRISTOW, D.D., an anti-

arian and religious writer, was born in London 1774, and in early life was appointed one of the masters of Merchant Tailors' School, of which institution he afterwards wrote the history. In 1816 he became rector of the united parishes of St. Mary, Aldermay, and St. Thomas the Apostle. In this living he remained till his death, Nov. 21, 1854.

WILSON, JOHN, a celebrated landscape and marine painter, born in Ayr, 1774; died at Folkestone, April, 1855.

WINDUS, THOMAS, an antiquarian and collector of articles of vertu, 1797-1855.

WING, WILLIAM, late secretary to the Entomological Society, and a clever delineator of the subjects which engage the researches of that body, 1827-1855.

WORTLEY. JOHN STUART WORTLEY, Baron HARNCLIFFE, born 23d April, 1801. Was member for the West Riding, Yorkshire, from the general election in 1841 to the period of his accession to the peerage in 1845. Since that time he devoted himself mainly to agricultural improvements. His death took place at his family mansion, in October, 1855.

WRIGHT, FANNY, once celebrated as a Social and political agitator, was born at Dundee in 1796, first attracted public attention by her book, published in 1818, entitled 'A Few Days in Athens,' and about three years afterwards gave the world her 'Views on Society and Manners in America.' In 1825 she returned to that country, and founded a colony of redeemed slaves; she even, in 1833, appeared as a public lecturer, and 'Fanny Wright Societies' sprang into existence. Her establishment being broken up, she joined Robert Owen at New Harmony and edited the 'Gazette,' but con-

tracted an unhappy marriage with a M. Darusmont. Died at Cincinnati, 1853.

Y

YATES, JOSEPH BROOKS, a presbyterian minister, archæologist, and man of letters, many years resident in Liverpool, 1780-1855.

YEA, LACY WALTER GILES, lieutenant-colonel of the royal fusiliers, was the eldest son of Sir Walter Yea, and was born in Bristol, 1808. He entered the army in 1825, and won his earliest and last laurels in the Crimea. He commanded the first brigade of the light division, the advance of which at the battle of the Alma makes one of the most tragical chapters in the history of the war. The correspondent of the *Times*, who records in what confusion they advanced, relates also, 'The 7th fusiliers, led by Colonel Yea, were swept down by fifties' (letter of September 21st); and in commenting on his death passes the highest eulogiums upon him: 'A more thorough soldier, one more devoted to his men, to the service, and to his country, never fell in battle. . . . At the Alma he never went back a step, and there were tears in his eyes on that eventful afternoon when he exclaimed to me, when the men had formed on the slope of the hill after the retreat of the enemy, "There! look there! that's all that remains of my poor fusiliers! A colour is missing; but, thank God, no Russians have it!"' He fell dead under a shower of grape shot after leading his men out of the trenches on the fatal 18th of June, 1855. [E.R.]
